About this guide

This guide, written by POWERACT Consulting, walks through complete runs of a management system in DynamicMS: every end-to-end phase, macro process, task and step, with the values to type in each form. The values come from the demonstration data seeded with the application, so the screens match the guide.

- **Audience.** IMS, quality and HSE managers, process owners, auditors and top management.
- **Conventions.** Menu paths are written Menu › Screen. Values to type are shown after the field name; list values are chosen as written.
- **Scenarios.** Scenario 1: SME QMS, any sector (ISO 9001); Scenario 2: SME QHSE (ISO 9001, 14001, 45001); Scenario 3: SME QMS for AEC & Construction (ISO 9001, ISO 19650, EN 1090).

Getting started

Sign in

1. Open <http://localhost:5173> in Chrome, Edge, Firefox or Safari.
2. Type your e-mail (for example ims@atlas-sme.example) and the password [Demo@2026](#), then select Sign in.
3. Choose the language with the EN / FR / ع selector at the top right. Arabic switches the whole layout to right-to-left.
4. Check the project shown in the header switcher. Every screen works on the selected project; change it at any time.

The navigation shell

- **Menu groups.** Work, Governance, Records, Insight, Intelligence, Design and Organization. Select a group title to collapse or expand it.
- **Favorites.** Point at a menu item and select the star; favorites appear in the first group.
- **Dock and pin.** The buttons at the bottom of the menu dock it at the start, end, top or bottom, and pin or unpin it. Unpinned, the menu slides in from the edge handle.
- **Mobile.** Below tablet width the menu becomes a drawer opened with the menu button; Escape closes it.
- **Alerts bell.** Shows the number of unread alerts of the project; select it to open the notification center.

How a lifecycle runs

Each project runs the end-to-end (E2E) processes of its management system in order, from E2E-01 Context To Strategy to E2E-12 Correction To Innovation. An E2E phase groups macro processes (MP); each macro process is made of tasks, and each task of workflow steps. Every step has one input form. When all steps of a phase are complete, its gate is decided (Go, Hold or No-Go) after the gate checklist is ticked.

5. Open Lifecycle and select the phase card (E2E-01 first).
6. Select a macro process in the table to see its tasks and steps.

7. Select a step. Read What to record, fill in the fields as shown in this guide, then select Complete step. Use Save draft to keep partial input.
8. The application moves you to the next step. When a phase is complete, tick its gate checklist and record the gate decision (top management or the IMS Manager).
9. To correct a completed step, select Reopen and type a justification; the previous value is kept as a version. A step cannot be reopened once its phase gate is passed.

Input forms

Twenty form kinds cover the 1,572 steps of the process design. Lists of items are record tables: add, edit or delete one row per item, each with its own source. The table lists the fields of each kind; required fields are marked with an asterisk on screen.

Form	Fields
Standards and scope	Standards applied (tick boxes), Scope type (single standard or integrated), Organization units covered (OBS), Why these standards. Selected once per project, before the policy is drafted.
Periodicity	Frequency (list), Next due date, Review chaired by (role), Organization units in scope (OBS picker), Review inputs and notes
Register items	Items identified: a table, one row per item, with Item, Category, Description and impact, Relevance and Source / evidence (each row has its own source)
Assessment	Decision matrix: one row per criterion with Weight (%), Score 1–5 and the facts that justify it; the weighted score is computed; Conclusion
Decision	Decision criteria checked (table: criterion, met yes/partly/no, evidence), Decision (Go, No-Go, Hold), Approver (role), Comment and conditions
Document	Document template (list), Document reference, Version, Content summary, Generated document (link). Use Generate document to create it from the project data.
Communication	Communication records: one row per audience with Channel, Date, Key message and Communicated by (ISO 9001 §7.4)
Training	Session, Date, Units trained (OBS), Participants, Effectiveness evaluation method, Effectiveness (%)
Measurement	Indicators measured: one row per KPI chosen from the project list (or a new KPI), with Why this KPI for this step, Measured value and Target; Analysis
Review	Review frequency, Review date, Next review, Chaired by, Participants (roles), Inputs reviewed (table), Decisions and actions (table: each decision becomes an action)
Plan	Planned activities: one row per activity with Owner (person), Start, Due date and Deliverable; each row becomes an action of the Action plan
SMART objectives	One row per objective: Specific objective, Measure (KPI), Baseline, Achievable target, Relevant to, Owner, Time-bound deadline, Resources; each row becomes an entry of the objectives register
Execution	What was done, Records that prove it (links), Completion (%)
Assignment	Role, Person (from the OBS), Organization units covered, RACSI of the macro process in five columns (one Accountable)
Configuration	Settings table (setting, value, reason), Tested before use
Change	Change made, Reason, Documents or records updated (links)
Closure	Closure evidence, Records that prove effectiveness, Closure date
Escalation	Escalated to (role), Reason
AI-assisted draft	Context given to the assistant, Suggestion outcome (Accepted, Edited, Rejected), Final validated text
Automated service task	System result confirmed, Records produced (links); filled by the DynamicMS Engine

The step page

- **Name and description.** Every task and step name starts with a verb and names its object (for example "Fix quality policy review periodicity"). Under the name, a brief description; select Show the detailed description for the purpose, how to fill the form, the inputs, the expected result and the ISO clause.
- **Record tables.** Select Add a row, fill each column, and use the bin to delete a row. People come from the organization structure (OBS); organization units can be picked or typed; KPIs are chosen from the project list or created with New KPI.
- **Records produced.** On completion, plans and review decisions become actions of the Action plan, SMART objectives become entries of the objectives register, and the RACSI is written to the RACSI matrix. The step shows links to these records.
- **Documents of this step.** Select Generate document, choose a template (suggested for the macro process first): the document is created as a draft, filled with the data already recorded in the project, and follows the review and approval workflow. Download it in PDF or Word from the step.
- **Attachments.** Attach files to the step; select New version on a file to replace it while keeping the history (version, author, date, note).
- **AI assistance.** Only the AI use case of this step is shown. Select View prompt to read exactly what is sent (step, form, values already typed, previous steps), then Suggest. Accept, edit or reject: nothing is saved without you.

Macro process page

- **Before you start.** An optional checklist lists the inputs, previous macro processes, owner and RACSI, document templates and KPIs to have in place. Items checked by the system are ticked automatically; tick the others yourself.
- **RACSI.** The RACSI tab shows the RACSI of the macro process in five columns (R, A, C, S, I; exactly one A). It applies to all steps; select Set a step-level RACSI only for a step that differs.
- **BPMN diagram.** Select Full screen to see the diagram on the whole screen; select Exit full screen or press Escape to come back.

Documents and templates

10. Open Records > Documents. The Documents tab lists the documented information with its version, status, next review and download buttons (PDF, Word, Excel).
11. The Required by the standards tab lists the documented information that ISO 9001, ISO 14001 and ISO 45001 require for the standards of the project ("maintain" = a document, "retain" = a record), and the document that answers each one. Select Create for a missing one.
12. The Templates tab lists the IMS templates (policy, scope, manual, context analysis, registers, procedures, plans, reports). Select a template to see its structure; select Copy to edit to adapt the sections and texts for your organization, or New template to create one.
13. The Layout tab sets the logo, colors, header and footer applied to every generated document, like a Word template.
14. Documents follow market practice: the policy is a signed statement with the strategic axes and their objectives; procedures contain BPMN diagrams, the SIPOC of each step and the Go / No-Go decision of the phase; each audit has its own report with the detailed nonconformities; each major nonconformity has an 8D report; registers are laid out landscape.

- Open a document to see its structure section by section, edit its title and review frequency, create a new version (regenerated from the current project data or copied), edit the structure of a draft, submit, approve (by another person) and download it.

Administration

- Groups and organizations.** The platform administrator (admin@dynamicms.example) opens Administration › Groups and organizations: New group, and New organization with the question Part of a group? (No — independent organization, or Yes — member of a group). The organization is created with its administrator and a default structure (head office and departments).
- AI models.** Administration › AI models: choose a standard provider and model (Anthropic Claude, OpenAI, Azure OpenAI, Google Gemini, Mistral) or a custom model with an OpenAI-compatible endpoint, type the API key (stored encrypted), test the connection and enable it. A use case can use another model of the same provider. Without a provider, the built-in engine answers.

Search

- Search button.** The Search button is at the top of the left menu, in every dock position; when the menu is unpinned, a round Search button stays on the edge. Ctrl+K (Cmd+K on a Mac) opens the search from any screen.
- What is searched.** Steps and macro processes of the project, nonconformities, actions, audits, documents, register entries, attachments, risks, KPIs, rules and controls, AI use cases, people, units and roles, the process design and the Help topics. Codes such as MP-001.2 or NC-... are matched exactly and listed first.
- Results.** Results are grouped by type and can be filtered by type; use the arrow keys and Enter, or select a result to open it. You only see what you are allowed to open.
- Menu filter.** Type in the field under the Search button to filter the menu items; press Enter to search everywhere for the same words.

The screenshot displays the DynamicMS user interface. A search modal is open, showing results for the query "Interested parties". The modal includes filters for "All (5)", "Steps (2)", "Macro processes (1)", and "Documents (2)". The results are categorized into "STEPS · 2", "MACRO PROCESSES · 1", and "DOCUMENTS · 2".

STEPS · 2

- MP-001.4 Identify interested parties Context Analysis and Stakeholder Mapping Done
- MP-001.5 Determine needs and expectations of interested parties Context Analysis and Stakeholder Mapping Done

MACRO PROCESSES · 1

- UMS016 Context Analysis and Stakeholder Mapping Completed

DOCUMENTS · 2

- AT-UNI-QMS-CTX Context and interested parties analysis v1.0 Published
- AT-UNI-QMS-REG-IP Interested parties register v1.1 Published

The background interface shows a sidebar with navigation options like Home, Lifecycle, Alerts, My tasks, and Governance. The main content area displays a project overview with various metrics and a KPI trend chart for "Customer satisfaction index".

Figure — Global search: results grouped by type, with the words found highlighted.

Process design editor

16. Open Design > Process design editor and choose the element type: functions, end-to-end processes (phases), macro processes, tasks, steps, gates or checklists. For tasks and steps, choose the macro process.
17. Select an element to open it. The card shows how many project runs, child elements, documents and AI use cases use it.
18. Change the fields and type a change note, then select Save as new version. Every change is a new version; nothing is overwritten.
19. Select History to see every version with its author, date and note, compare two versions field by field, and restore any version (a restore creates a new version with the old content).
20. Select New element to create your own function, phase, macro process, task, step, gate or checklist. Steps and tasks must be named with a verb and their object.
21. Select Retire or delete: an element of your own that no project uses is deleted (and can be restored from its history); a reference element, or one used by projects, is retired.

Versions and running projects. Projects keep the version of the process design they started with. A change applies to the projects started after it; the steps of a new project then show the new names and descriptions.

MP-001.2 — Identify external issues

Used by: 2 runs in projects · 0 child elements
Running projects keep the version they started with; this change applies to projects started after it.

Roles and functions

- **Model.** The organization structure (OBS) is made of units, roles and people. A role is defined in a unit and linked to one or more functions (for example Quality Management and Documentation & Knowledge). A person can play several roles, as holder, deputy or acting, with an allocation and start and end dates.

- **Views.** Organization › Roles and functions shows the roles (unit, functions, people), the functions (roles and people of each function) and the people (roles each person plays). Vacant roles are flagged.
- **Changes.** New role, Edit and Retire create versions of the role (History to compare and restore). Assign adds a person to a role; End assignment closes it and lists the open actions of the person that need a new owner.
- **Access rights.** A role proposes an access role to its holders, but access is always decided by the permission matrix.

Figure — Roles and functions: roles with their functions and the people who play them.

Prompt specification of the AI use cases

Every AI use case is linked to the step it assists and carries its prompt as twelve separate fields, populated for that step: Role (persona), Context, Task (instruction), Inputs (variables), Knowledge sources, Constraints, Examples, Output format, Tone and language, Quality criteria, Human checkpoint and Model parameters.

22. Open Intelligence › AI use cases, select a use case, then Prompt specification.
23. Edit any field and select Save changes: each field changed gets its own version, and the whole prompt a new version.
24. Select History on a field to compare and restore one of its versions, or History of the whole prompt to restore a complete version.
25. The completeness bar shows the required fields (role, context, task, constraints, output format, human checkpoint). A use case with an incomplete specification cannot be activated.
26. Select View the assembled prompt to see what is sent to the model, section by section.

AIUC-01 — Draft management system policy clauses

Linked step: MP-002.11 — Generate the quality policy draft from the template

Completeness Complete — the use case can be activated

Role (person) * History (1)

You are an expert assistant to the IMS Manager, experienced in ISO 9001 §5.1, §5.2 and in the process "Quality Policy and Strategic Direction Definition".

Context * History (1)

Step: MP-002.11 — Generate the quality policy draft from the template
 Macro process: UMS022 Quality Policy and Strategic Direction Definition — Establish quality policy; define strategic direction; secure top mgmt commitment.
 Phase: Context To Strategy
 Inputs of the process: Purpose, Context analysis, Strategic plan, Legal requirements, Stakeholder needs

Task (instruction) * History (1)

You assist the IMS Manager on the step "Generate the quality policy draft from the template" (MP-002.11) of the macro process UMS022 Quality Policy and Strategic Direction Definition, phase E2E-01. Purpose of the step: Establish quality policy; define strategic direction; secure top mgmt commitment. Use these inputs: Purpose, Context analysis, Strategic plan, Legal requirements. Produce: Draft management system policy clauses. References: ISO 9001 §5.1, §5.2. Answer with numbered...

Audits: frequency and detailed findings

- **Frequency.** When you plan an audit, choose its frequency in the list (monthly, quarterly, semi-annual, annual, every 2 years, every 3 years) or Custom and describe it (for example "once, 6 weeks before the certification audit"). Change it later on the audit page.
- **Findings.** A finding is graded major nonconformity, minor nonconformity, observation or opportunity for improvement, with the clause, the requirement, the objective evidence and, for a nonconformity, the response due date (30 days for a major, 60 for a minor by default) and the corrective action.
- **Reports.** Each audit carried out has its own internal audit report with the detailed report of every nonconformity; each major or critical nonconformity has an 8D corrective action report.

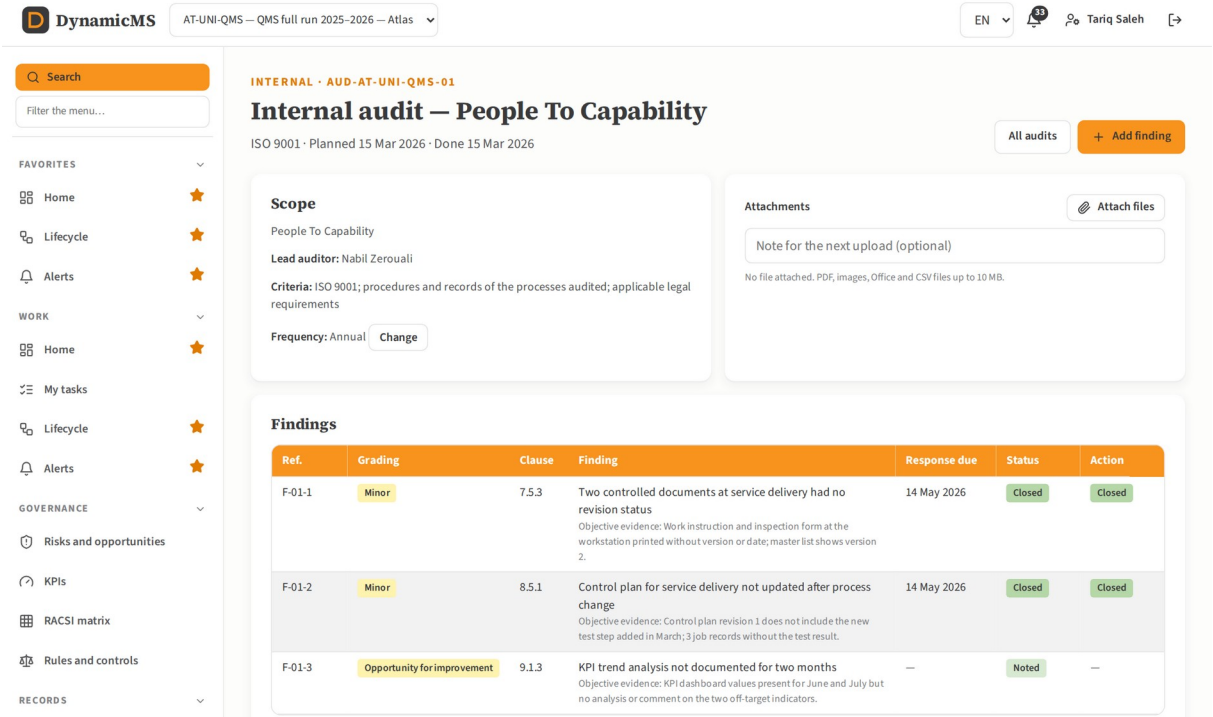

Figure — An audit: scope, criteria, frequency and graded findings with their objective evidence.

Registers

Records › Registers holds the registers of the project, including measuring equipment, training records, communication plan and log, changes, control plan, requirement reviews, releases, nonconforming outputs and 8D reports. Select an entry to see all its fields.

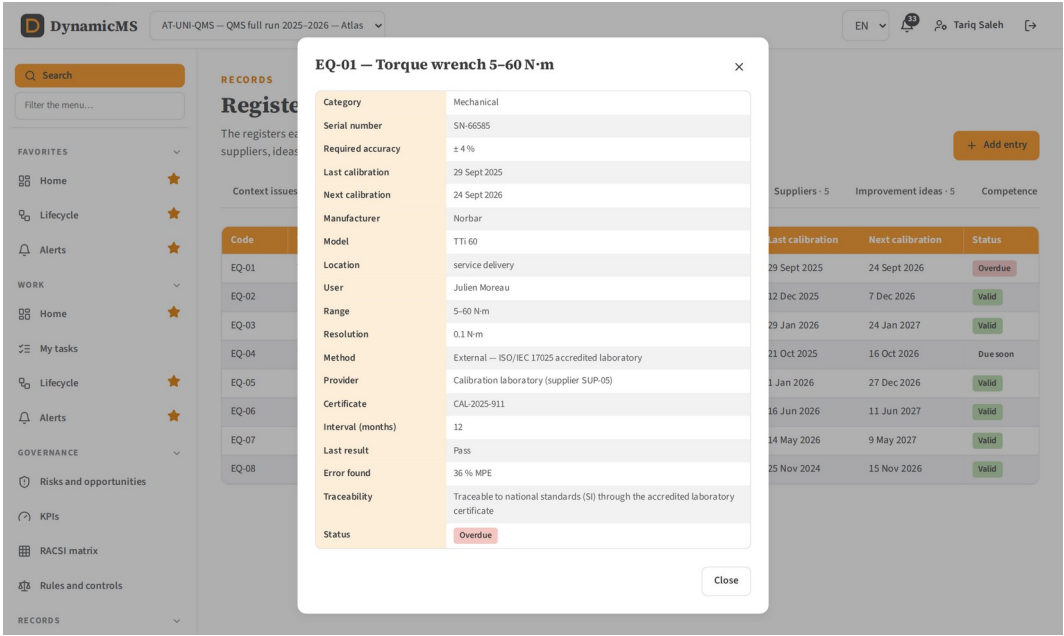

Figure — A measuring equipment entry with all its fields.

Scenario 1 — SME QMS, any sector (ISO 9001)

Organization: Atlas Universal SME (AT-UNI), SME company, vertical UNI, 197 employees, independent organization.

Project: AT-UNI-QMS — QMS full run 2025–2026 — Atlas Universal SME. Management system QMS, mode SME, track TRK-STANDARD. Standards: ISO 9001. Start 2025-11-15, end 2026-12-15.

Configuration: Solution Pack DMS-SME, capability packs DMS-CERT, DMS-AI, add-ons ADD-04.

MP-001.2 — Identify external issues · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Price competition from informal technical services providers	Economic	Pressure on quote margins; risk of losing price-sensitive local businesses.	High	Sales team market study, Q3 2025
2	Customers require ISO 9001 certification in tenders	Market and customers	Certification is needed to keep and win contracts with local businesses.	High	Tender files received in 2025 (4 of 11 require ISO 9001)
3	ISO 9001 amendment on climate change (Amd 1:2024)	Legal and regulatory	Context analysis must state whether climate change is a relevant issue.	Medium	ISO 9001:2015/Amd 1:2024; regulatory watch bulletin
4	Availability and price of spare parts	Supply	Delays when parts are missing; lead times doubled for imported references.	Medium	Supplier evaluation file and purchase orders 2025
5	Customers send requests through portals and messaging	Technological	Requests can be lost if they are not logged in one place.	Medium	Customer request log, sample of 60 requests

MP-001.3 — Identify internal issues · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Job sheet not signed	Process	No proof of service accepted; invoices disputed and paid late.	High	Review of records Jan–Oct 2025: 14% not compliant
2	Quote error	Commercial	Rework of quotes and margin loss; two customer complaints.	High	Quotation register: 9 corrections in Q3 2025
3	Workload peaks on service delivery	Resources	Late completion during summer peaks; overtime above 12%.	Medium	Planning board and overtime records
4	Know-how held by two senior staff	Competence	Dependency on two people; no written work instructions.	Medium	Competence matrix 2025

MP-001.4 — Identify interested parties · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Customers (local businesses)	External party	On-time service, correct quotes, signed proof of service, clear invoices.	High	Customer satisfaction survey 2025 (n = 48)
2	Employees and their representatives	Internal party	Safe work, training, clear instructions, workload planning.	High	Staff meeting minutes, October 2025
3	Owner and shareholders	Internal party	Profitable growth, certification obtained within 12 months.	High	Business plan 2025–2027
4	Suppliers of spare parts	External party	Forecast of needs, clear specifications, payment on time.	Medium	Supplier meetings, 2025
5	Certification body	External party	Conforming management system, access to records and people.	Medium	Certification contract
6	Authorities (labour inspection, municipality)	External party	Compliance with labour law, business licence and waste rules.	Medium	Legal register

MP-001.5 — Determine needs and expectations of interested parties · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Customer requirements identified and written down	30	4	Requirements of the 12 main customers are in the requirements matrix; 2 framework contracts still to review.
2	Legal and regulatory requirements identified	20	3	Labour and licence requirements listed; vehicle and waste rules to confirm with the legal register (MP-028).
3	Requirements adopted as compliance obligations	20	3	Adopted for customers and authorities; supplier expectations kept as information.
4	Needs monitored (survey, meetings, complaints)	15	4	Annual survey and monthly complaint review in place.
5	Requirements reflected in processes and objectives	15	3	On-time service and quote accuracy objectives defined; proof of service to add to the delivery process.

MP-001.6 — Validate and cascade stakeholder requirements · Decision criteria checked

#	Criterion	Met	Evidence
1	Issues reviewed with top management	Yes	Meeting of 2025-11-20
2	Interested parties and requirements validated	Yes	Interested parties register v1.0
3	Requirements cascaded to process owners	Partly	Sent to operations and sales; purchasing on the next meeting

MP-001.7 — Identify interactions between processes · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Sales and quotation → Service delivery	Interface	Validated quote and job order with customer requirements.	High	Job order form
2	Service delivery → Invoicing	Interface	Signed proof of service; the missing signature causes "job sheet not signed".	High	Job sheet
3	Purchasing → Service delivery	Interface	Availability of spare parts on the planned date.	Medium	Purchase orders and stock list
4	Human resources → All processes	Interface	Competent and authorized staff; training plan.	Medium	Competence matrix
5	Management → All processes	Interface	Policy, objectives, resources and review decisions.	Medium	Management review minutes

MP-001.8 — Define or review the management system scope · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Design and delivery of technical services for local businesses in the Agadir region	Scope statement	Covers sales and quotation, planning, delivery, invoicing and after-sales.	High	Strategic plan and service catalogue
2	Head office and workshop, Agadir	Site	Single site; interventions at customer premises are included.	High	Business licence
3	ISO 9001 §8.3 Design and development	Non-applicable requirement	Not applicable: services follow customer or manufacturer specifications; no design responsibility.	Medium	Contracts review
4	Vehicle maintenance	Outsourced process	Outsourced to an approved garage; controlled through the supplier evaluation.	Low	Service contract

MP-001.10 — Review organizational context periodically · Inputs reviewed

#	Input	Finding
1	External and internal issues	New competitor offer at lower price; issues list still valid.
2	Interested parties register	Add the new logistics partner.
3	Customer satisfaction and complaints	Satisfaction 82% (target 85%); complaints on quotes down by 40%.

MP-001.10 — Review organizational context periodically · Decisions and actions

#	Decision	Owner	Due date
1	Add supplier price risk to the risk register	Adam Rahmani	2025-12-24
2	Update the scope statement for the new maintenance contracts	Tariq Saleh	2026-01-08

UMS022 (MP-002) — Quality Policy and Strategic Direction Definition

Establish quality policy; define strategic direction; secure top mgmt commitment. Owner: IMS Manager. Tier 1. Requirements answered: ISO 9001 §5.1, §5.2.

Documents of this macro process: AT-UNI-QMS-POL-Q (Quality policy); AT-UNI-QMS-PSHEET-UMS022 (Macro process sheet — Quality Policy and Strategic Direction Definition).

Step	Step, task and purpose	Role · form	What to type
MP-002.10	Select the standards and scope type of the quality policy Task: Plan and prepare quality policy Select the standards and scope type of the quality policy — step 1 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Standards and scope	Standards the management system applies: ISO 9001 Scope type: Single-standard Organization units covered: Headquarters, Agadir site Why these standards: ISO 9001 only; certification is a customer requirement; environment and safety are managed through legal compliance for now.
MP-002.1	Fix quality policy review periodicity	IMS Manager	Frequency: Annual

Step	Step, task and purpose	Role · form	What to type
	Task: Plan and prepare quality policy Fix quality policy review periodicity — step 2 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	Periodicity	Next due date: 2026-11-24 Review chaired by: Top Management Organization units in scope: Headquarters, Agadir site Review inputs and notes: Reviewed at each management review, and earlier after a change of strategy, a merger, a new site or a major customer requirement.
MP-002.3	Consult top management on the quality policy Task: Plan and prepare quality policy Consult top management on the quality policy — step 3 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Register items	Items identified: 4 rows — see the table below
MP-002.11	Generate the quality policy draft from the template Task: Execute quality policy activities Generate the quality policy draft from the template — step 4 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager AI-assisted draft	Context given to the assistant: Standards: ISO 9001. Scope: technical services for local businesses in Agadir. Commitments from the management consultation: on-time and right-first-time service, legal compliance, staff competence, continual improvement. Strategic direction: reference provider in the region by 2027. Suggestion outcome: Edited Final validated text: Atlas Universal SME provides technical services to local businesses in the Agadir region. We commit to: deliver on time and right first time; satisfy our customers and the applicable legal and contractual requirements; develop the competence of our staff; set measurable quality objectives every year and continually improve our quality management system (ISO 9001).
MP-002.2	Adapt the quality policy commitments to the organization Task: Execute quality policy activities Adapt the quality policy commitments to the organization — step 5 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Document	Document template: TPL-POL-Q — Quality policy Document reference: AT-UNI-QMS-POL Version: 0.2 Content summary: Commitments adapted: "right first time" wording, signed proof of service, reference to the 2027 strategic direction. Generated document: AT-UNI-QMS-POL-Q — Quality policy
MP-002.4	Integrate mandatory commitments into the quality policy Task: Execute quality policy activities Integrate mandatory commitments into the quality policy — step 6 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Register items	Items identified: 4 rows — see the table below
MP-002.5	Align the quality policy with ISO requirements and strategy Task: Execute quality policy activities Align the quality policy with ISO requirements and strategy — step 7 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Execution	What was done: Policy cross-checked with the strategic plan 2025–2027 and the requirements matrix: two wording changes (customer proof of service, 2027 direction). No conflict with customer contracts. Records that prove it: AT-UNI-QMS-POL-Q — Quality policy Completion (%): 100
MP-002.12	Check the quality policy draft against ISO 9001 §5.2 Task: Verify, record and close quality policy Check the quality policy draft against ISO 9001 §5.2 — step 8 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Assessment	Decision matrix: 5 rows — see the table below Weighted score (1–5): 4.4 Conclusion: Draft meets ISO 9001 §5.2.1 (weighted score 4.4). §5.2.2 will be met once the communication step is done. Ready for top management approval.
MP-002.6	Obtain top management approval of the quality policy Task: Verify, record and close quality policy Obtain top management approval of the quality policy — step 9 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Decision	Decision criteria checked: 2 rows — see the table below Decision: Go Approver (Accountable): Top Management Decision comment and conditions: Approved and signed by the Managing Director. Publish version 1.0.

Step	Step, task and purpose	Role · form	What to type
MP-002.13	Publish the quality policy and generate its files Task: Verify, record and close quality policy Publish the quality policy and generate its files — step 10 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	DynamicMS Engine Automated service task	System result confirmed: Quality policy v1.0 published; DOCX and PDF generated; notice-board version printed. Records produced: AT-UNI-QMS-POL-Q — Quality policy; AT-UNI-QMS-PSHEET-UMS022 — Macro process sheet — Quality Policy and Strategic Direction Definition
MP-002.7	Communicate the quality policy Task: Verify, record and close quality policy Communicate the quality policy — step 11 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Communication	Communication records: 3 rows — see the table below
MP-002.8	Plan the quality policy review Task: Verify, record and close quality policy Plan the quality policy review — step 12 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Review	Review frequency: Annual Review date: 2025-11-26 Next review: 2026-11-26 Chaired by: Top Management Participants: IMS Manager, Quality Manager, Operations Manager Inputs reviewed: 3 rows — see the table below Decisions and actions: 1 row — see the table below On completion: rows become actions.
MP-002.9	Update the quality policy document Task: Verify, record and close quality policy Update the quality policy document — step 13 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Change	Change made: Added a commitment on confidentiality of customer data (new maintenance contracts). Version 1.1 issued. Reason: Decision D-1 of the policy review Documents or records updated: AT-UNI-QMS-POL-Q — Quality policy; Add a confidentiality commitment for customer data

MP-002.3 — Consult top management on the quality policy · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Meet customer requirements on time, first time	Commitment	Priority of the Managing Director: on-time service and correct quotes.	High	Interview with the Managing Director, 2025-11-20
2	Comply with legal and contractual requirements	Commitment	Includes customer contracts and labour law.	High	Interview with the Managing Director
3	Develop staff competence	Commitment	Two senior technicians coach the new hires.	Medium	HR interview
4	Become the reference technical services provider in the Agadir region by 2027	Strategic direction	Strategic direction for the objectives.	High	Strategic plan 2025–2027

MP-002.4 — Integrate mandatory commitments into the quality policy · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	§5.2.1 a) Appropriate to purpose and context	Commitment	First sentence describes technical services, local businesses and the region.	High	Policy draft v0.2, paragraph 1
2	§5.2.1 b) Framework for quality objectives	Commitment	"Set measurable quality objectives every year".	High	Policy draft v0.2, commitment 4
3	§5.2.1 c) Commitment to satisfy applicable requirements	Commitment	Customer, legal and contractual requirements named.	High	Policy draft v0.2, commitment 2
4	§5.2.1 d) Commitment to continual	Commitment	"Continually improve our quality management system".	High	Policy draft v0.2, commitment 4

#	Item	Category	Description and impact	Relevance	Source / evidence
	improvement				

MP-002.12 — Check the quality policy draft against ISO 9001 §5.2 · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	§5.2.1 a) Appropriate to the purpose and context	20	5	Services, customers and region described.
2	§5.2.1 b) Framework for setting objectives	20	4	Measurable objectives required every year; link to KPIs to show in MP-003.
3	§5.2.1 c) Commitment to satisfy applicable requirements	20	5	Explicit.
4	§5.2.1 d) Commitment to continual improvement	20	5	Explicit.
5	§5.2.2 Available, communicated, understood	20	3	Communication plan ready (step 11); understanding to check in the next internal audit.

MP-002.6 — Obtain top management approval of the quality policy · Decision criteria checked

#	Criterion	Met	Evidence
1	Compliance check against ISO 9001 §5.2 done	Yes	Decision matrix, step 8 (score 4.4)
2	Consistent with strategic direction	Yes	Strategic plan 2025–2027

MP-002.7 — Communicate the quality policy · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	Operations	Meeting	2025-11-25	Toolbox talk: what the policy means for each job (right first time, signed job sheet).	IMS Manager
2	All employees	Notice board	2025-11-26	Signed policy posted in the workshop and the office.	Document Controller
3	Customers and interested parties	Portal	2025-11-28	Policy published on the website.	IMS Manager

MP-002.8 — Plan the quality policy review · Inputs reviewed

#	Input	Finding
1	Changes in context and strategy	New maintenance contract segment.
2	Achievement of quality objectives	3 of 4 objectives on track.
3	Audit results and staff feedback	Policy known by 90% of interviewed staff.

MP-002.8 — Plan the quality policy review · Decisions and actions

#	Decision	Owner	Due date
1	Add a confidentiality commitment for customer data	Tariq Saleh	2025-12-16

UMS031 (MP-003) — Quality Objectives and Targets Deployment

Cascade strategic objectives; deploy SMART objectives; assign responsibilities; monitor. Owner: IMS Manager. Tier 1. Requirements answered: ISO 9001 §6.2.

Documents of this macro process: AT-UNI-QMS-OBJ (Objectives and action plan); AT-UNI-QMS-PSHEET-UMS031 (Macro process sheet — Quality Objectives and Targets Deployment).

Step	Step, task and purpose	Role · form	What to type
MP-003.1	Cascade the quality policy into quality objectives Task: Plan and prepare quality objectives Cascade the quality policy into quality objectives — step 1 of 10 in UMS031 Quality Objectives and Targets Deployment.	IMS Manager SMART objectives	Objectives (become entries of the objectives register): 2 rows — see the table below On completion: rows become objectives.
MP-003.2	Define SMART quality objectives Task: Plan and prepare quality objectives Define SMART quality objectives — step 2 of 10 in UMS031 Quality Objectives and Targets Deployment.	IMS Manager SMART objectives	Objectives (become entries of the objectives register): 4 rows — see the table below On completion: rows become objectives.
MP-003.3	Align quality objectives with the quality policy Task: Plan and prepare quality objectives Align quality objectives with the quality policy — step 3 of 10 in UMS031 Quality Objectives and Targets Deployment.	IMS Manager Execution	What was done: Each objective linked to a policy commitment and to one KPI of the dashboard; no objective without an owner. Records that prove it: AT-UNI-QMS-OBJ — Objectives and action plan; OBJ-1 — Raise customer satisfaction on technical services; OBJ-2 — Deliver technical services on time; Deliver objective: Raise customer satisfaction on technical services Completion (%): 100
MP-003.4	Designate an owner for each quality objective Task: Plan and prepare quality objectives Designate an owner for each quality objective — step 4 of 10 in UMS031 Quality Objectives and Targets Deployment.	IMS Manager Plan	Planned activities (become actions): 4 rows — see the table below On completion: rows become actions.
MP-003.5	Deploy quality objectives in the objectives register Task: Execute quality objectives activities Deploy quality objectives in the objectives register — step 5 of 10 in UMS031 Quality Objectives and Targets Deployment.	DynamicMS Engine Automated service task	System result confirmed: Deploy quality objectives in the objectives register: done by the DynamicMS Engine; Objectives available in the project. Records produced: AT-UNI-QMS-OBJ — Objectives and action plan; AT-UNI-QMS-PSHEET-UMS031 — Macro process sheet — Quality Objectives and Targets Deployment; OBJ-1 — Raise customer satisfaction on technical services; OBJ-2 — Deliver technical services on time; OBJ-3 — Reduce the cost of poor quality; OBJ-4 — Close corrective actions on time; Deliver objective: Raise customer satisfaction on technical services
MP-003.6	Monitor progress of quality objectives Task: Execute quality objectives activities Monitor progress of quality objectives — step 6 of 10 in UMS031 Quality Objectives and Targets Deployment.	IMS Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-003.7	Display quality objectives at workstations Task: Execute quality objectives activities Display quality objectives at workstations — step 7 of 10 in UMS031 Quality Objectives and Targets Deployment.	IMS Manager Execution	What was done: Objectives board displayed in the workshop and the office; monthly results updated by the Performance Manager. Records that prove it: AT-UNI-QMS-OBJ — Objectives and action plan; OBJ-1 — Raise customer satisfaction on technical services; OBJ-2 — Deliver technical services on time; Deliver objective: Raise customer satisfaction on technical services Completion (%): 100
MP-003.8	Adjust quality objectives and targets Task: Verify, record and close quality objectives Adjust quality objectives and targets — step 8 of 10 in UMS031 Quality Objectives and Targets Deployment.	IMS Manager Change	Change made: Objectives updated: Strategic (market, customer loss). Reason: Finding of the internal audit Documents or records updated: AT-UNI-QMS-OBJ — Objectives and action plan; OBJ-1 — Raise customer satisfaction on technical services; OBJ-2 — Deliver technical services on time; Deliver objective: Raise customer satisfaction

Step	Step, task and purpose	Role · form	What to type
			on technical services
MP-003.9	Recognize teams that reach quality objectives Task: Verify, record and close quality objectives Recognize teams that reach quality objectives — step 9 of 10 in UMS031 Quality Objectives and Targets Deployment.	IMS Manager Execution	What was done: Recognize teams that reach quality objectives carried out on service delivery; Objectives updated. Records that prove it: AT-UNI-QMS-OBJ — Objectives and action plan; OBJ-1 — Raise customer satisfaction on technical services; OBJ-2 — Deliver technical services on time; Deliver objective: Raise customer satisfaction on technical services Completion (%): 100
MP-003.10	Translate quality policy commitments into objective statements Task: Verify, record and close quality objectives Translate quality policy commitments into objective statements — step 10 of 10 in UMS031 Quality Objectives and Targets Deployment.	IMS Manager SMART objectives	Objectives (become entries of the objectives register): 2 rows — see the table below On completion: rows become objectives.

MP-003.1 — Cascade the quality policy into quality objectives · Objectives (become entries of the objectives register)

#	Specific objective	Measure (KPI)	Baseline	Achievable target	Relevant to (policy commitment)	Owner	Time-bound deadline	Resources
1	Raise customer satisfaction on technical services	Q-KPI-01 — Customer satisfaction index	78%	>= 85%	Satisfy customer requirements	Julien Moreau	2026-11-10	Quarterly survey; complaint review meeting
2	Deliver technical services on time	Q-KPI-02 — On-time delivery rate	86%	>= 95%	On time, right first time	Claire Martin	2026-08-12	Planning board; one extra technician in summer

MP-003.2 — Define SMART quality objectives · Objectives (become entries of the objectives register)

#	Specific objective	Measure (KPI)	Baseline	Achievable target	Relevant to (policy commitment)	Owner	Time-bound deadline	Resources
1	Raise customer satisfaction on technical services	Q-KPI-01 — Customer satisfaction index	78%	>= 85%	Satisfy customer requirements	Julien Moreau	2026-11-10	Quarterly survey; complaint review meeting
2	Deliver technical services on time	Q-KPI-02 — On-time delivery rate	86%	>= 95%	On time, right first time	Claire Martin	2026-08-12	Planning board; one extra technician in summer
3	Reduce the cost of poor quality	Q-KPI-04 — Cost of poor quality	4.1%	<= 2%	Continual improvement	Julien Moreau	2026-11-10	Rework tracking in the NC register
4	Close corrective actions on time	Q-KPI-05 — Corrective actions closed on time	70%	>= 90%	Continual improvement	Tariq Saleh	2026-05-14	Weekly action review

MP-003.4 — Designate an owner for each quality objective · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Build the action plan for: Raise customer satisfaction on technical services	Julien Moreau	2025-12-01	2025-12-22	Action plan approved
2	Build the action plan for: Deliver technical services on time	Claire Martin	2025-12-01	2025-12-29	Action plan approved
3	Build the action plan for: Reduce the cost of poor quality	Julien Moreau	2025-12-01	2026-01-05	Action plan approved
4	Build the action plan for: Close corrective actions on time	Tariq Saleh	2025-12-01	2026-01-12	Action plan approved

MP-003.6 — Monitor progress of quality objectives · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Objectives); it is the KPI its owner reviews at each Monthly review.	81.5	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Objectives); it is the KPI its owner reviews at each Monthly review.	94.4	>= 95%

MP-003.10 — Translate quality policy commitments into objective statements · Objectives (become entries of the objectives register)

#	Specific objective	Measure (KPI)	Baseline	Achievable target	Relevant to (policy commitment)	Owner	Time-bound deadline	Resources
1	Reduce the cost of poor quality	Q-KPI-04 — Cost of poor quality	4.1%	<= 2%	Continual improvement	Julien Moreau	2026-11-10	Rework tracking in the NC register
2	Close corrective actions on time	Q-KPI-05 — Corrective actions closed on time	70%	>= 90%	Continual improvement	Tariq Saleh	2026-05-14	Weekly action review

UMS002 (MP-004) — Process Architecture Mapping

Define architecture; identify core/support; map in BPMN; assign RACI. Owner: Process Excellence Manager. Tier 1. Requirements answered: ISO 9001 §4.4.

Documents of this macro process: AT-UNI-QMS-PMAP (Process map and interactions); AT-UNI-QMS-PSHEET-UMS002 (Macro process sheet — Process Architecture Mapping); AT-UNI-QMS-RACSI (RACSI matrix).

Step	Step, task and purpose	Role · form	What to type
MP-004.1	Define the process architecture scope Task: Plan and prepare process architecture Define the process architecture scope — step 1 of 13 in UMS002 Process Architecture Mapping.	Process Excellence Manager Register items	Items identified: 2 rows — see the table below
MP-004.2	Identify core, support and management processes Task: Plan and prepare process architecture Identify core, support and management processes — step 2 of 13 in UMS002	Process Excellence Manager Register items	Items identified: 6 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	Process Architecture Mapping.		
MP-004.3	Map each process in BPMN Task: Plan and prepare process architecture Map each process in BPMN — step 3 of 13 in UMS002 Process Architecture Mapping.	Process Excellence Manager Register items	Items identified: 3 rows — see the table below
MP-004.4	Assign RACSI roles to each process Task: Execute process architecture activities Assign RACSI roles to each process — step 4 of 13 in UMS002 Process Architecture Mapping.	Process Excellence Manager Assignment	Role: Process Excellence Manager Person (from the OBS): Nadia Chraibi Organization units covered: Quality RACSI of the macro process: R: Process Excellence Manager · A: IMS Manager · C: Risk Manager · S: Document Controller · I: Top Management
MP-004.5	Validate the process map with process owners Task: Execute process architecture activities Validate the process map with process owners — step 5 of 13 in UMS002 Process Architecture Mapping.	Process Excellence Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Process Excellence Manager Decision comment and conditions: Process map validated; publish version 1.0.
MP-004.6	Verify process map alignment with ISO 9001 §4.4 Task: Execute process architecture activities Verify process map alignment with ISO 9001 §4.4 — step 6 of 13 in UMS002 Process Architecture Mapping.	Process Excellence Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.5 Conclusion: Process approach in place (weighted score 3.5). Complete KPIs and risk review for purchasing and HR before the mock audit.
MP-004.7	Publish the process map Task: Verify, record and close process architecture Publish the process map — step 7 of 13 in UMS002 Process Architecture Mapping.	Process Excellence Manager Document	Document template: TPL-PMAP — Process map and interactions Document reference: AT-UNI-QMS-UMS002-07 Version: 1.0 Content summary: Architecture map for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QMS-PMAP — Process map and interactions
MP-004.8	Review the process map Task: Verify, record and close process architecture Review the process map — step 8 of 13 in UMS002 Process Architecture Mapping. Records that prove it: AT-UNI-QMS-PMAP — Process map and interactions; Update BPMN diagrams Completion (%): 100

MP-004.1 — Define the process architecture scope · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	All activities of Atlas Universal SME in the Agadir region	Scope statement	Same boundary as the management system scope (MP-001 step 8).	High	Scope statement v1.0
2	Three levels: macro process > task > step	Modeling rule	Steps are the lowest level and carry the forms and records.	Medium	Process level definitions

MP-004.2 — Identify core, support and management processes · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Strategy and management review	Management process	Owner: Managing Director	High	Organization chart
2	Sales and quotation	Core process	Owner: Operations Manager	High	Organization chart
3	Delivery of technical services	Core process	Owner: Operations Manager	High	Job orders
4	Purchasing and suppliers	Support process	Owner: Quality Manager	Medium	Purchase procedure
5	People and competence	Support process	Owner: HR Manager	Medium	Competence matrix
6	Measurement, audit and improvement	Management process	Owner: Quality Manager	Medium	Audit programme

MP-004.3 — Map each process in BPMN · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Delivery of technical services: request → planning → intervention → signed job sheet → invoice	BPMN diagram	Two lanes (Operations, Customer); gateway "job sheet signed?" before invoicing.	High	Process workshop with the technicians
2	Sales and quotation: request → site visit → quote → second check → customer approval	BPMN diagram	Second check added to prevent quote errors.	High	Quotation register
3	Purchasing: need →	BPMN diagram	Reception check against the order.	Medium	Purchase orders

#	Item	Category	Description and impact	Relevance	Source / evidence
	order → reception check → stock				

MP-004.5 — Validate the process map with process owners · Decision criteria checked

#	Criterion	Met	Evidence
1	Every process has an owner	Yes	RACSI matrix
2	Inputs, outputs and interactions shown	Yes	Process map v0.9
3	Owners agree with their process description	Yes	Validation meeting minutes

MP-004.6 — Verify process map alignment with ISO 9001 §4.4 · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	§4.4.1 a–b) Inputs, outputs, sequence and interaction determined	25	4	All core processes modeled in BPMN.
2	§4.4.1 c) Criteria, methods and KPIs	25	3	KPIs defined for core processes; support processes to complete.
3	§4.4.1 d–e) Resources, responsibilities and authorities	25	4	RACSI for every macro process.
4	§4.4.1 f) Risks and opportunities addressed	25	3	Linked to the risk register; 2 processes without risk review.

MP-004.8 — Review the process map · Inputs reviewed

#	Input	Finding
1	Scope	Scope still valid; minor updates made.
2	Strategy	No major change since the last review.
3	Process inventory	Gap found on BPMN diagrams.

MP-004.8 — Review the process map · Decisions and actions

#	Decision	Owner	Due date
1	Update BPMN diagrams	Nadia Chraibi	2026-01-10

UMS023 (MP-005) — SIPOC and Value Stream Mapping

Define SIPOC; map value stream; identify value-added steps; optimize flow. Owner: Process Excellence Manager. Tier 1. Requirements answered: ISO 9001 §4.4, §8.1.

Documents of this macro process: AT-UNI-QMS-PSHEET-UMS023 (Macro process sheet — SIPOC and Value Stream Mapping).

Step	Step, task and purpose	Role · form	What to type
MP-005.1	Define SIPOC and value stream scope Task: Plan and prepare SIPOC and value stream Define SIPOC and value stream scope — step 1 of 14 in UMS023 SIPOC and Value Stream Mapping.	Process Excellence Manager Register items	Items identified: 3 rows — see the table below
MP-005.2	Define SIPOC method	Process Excellence	Items identified: 3 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	Task: Plan and prepare SIPOC and value stream Define SIPOC method — step 2 of 14 in UMS023 SIPOC and Value Stream Mapping.	Manager Register items	
MP-005.3	Define SIPOC and value stream suppliers Task: Plan and prepare SIPOC and value stream Define SIPOC and value stream suppliers — step 3 of 14 in UMS023 SIPOC and Value Stream Mapping.	Process Excellence Manager Register items	Items identified: 3 rows — see the table below
MP-005.4	Define SIPOC and value stream inputs Task: Plan and prepare SIPOC and value stream Define SIPOC and value stream inputs — step 4 of 14 in UMS023 SIPOC and Value Stream Mapping.	Process Excellence Manager Register items	Items identified: 3 rows — see the table below
MP-005.5	Define SIPOC and value stream steps Task: Execute SIPOC and value stream activities Define SIPOC and value stream steps — step 5 of 14 in UMS023 SIPOC and Value Stream Mapping.	Process Excellence Manager Register items	Items identified: 3 rows — see the table below

MP-005.12	Design SIPOC and value stream To-Be SIPOC Task: Manage As-Is and To-Be SIPOC Design SIPOC and value stream To-Be SIPOC — step 12 of 14 in UMS023 SIPOC and Value Stream Mapping.	Process Excellence Manager AI-assisted draft	Context given to the assistant: Step: Design SIPOC and value stream To-Be SIPOC. Inputs: Process scope; Requirements; Customer needs. Standards: ISO 9001. Organization: Atlas Universal SME (technical services). Suggestion outcome: Edited Final validated text: SIPOC diagrams drafted with the assistant and reviewed by Process Excellence Manager: covers ISO 9001.
MP-005.13	Compare As-Is and To-Be SIPOC Task: Manage As-Is and To-Be SIPOC Compare As-Is and To-Be SIPOC — step 13 of 14 in UMS023 SIPOC and Value Stream Mapping.	DynamicMS Engine Automated service task	System result confirmed: Compare As-Is and To-Be SIPOC: done by the DynamicMS Engine; SIPOC diagrams available in the project. Records produced: AT-UNI-QMS-PSHEET-UMS023 — Macro process sheet — SIPOC and Value Stream Mapping
MP-005.14	Approve and deploy To-Be version Task: Manage As-Is and To-Be SIPOC Approve and deploy To-Be version — step 14 of 14 in UMS023 SIPOC and Value Stream Mapping.	Process Excellence Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Process Excellence Manager Decision comment and conditions: SIPOC diagrams approved against ISO 9001; no blocking point.

MP-005.1 — Define SIPOC and value stream scope · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	SIPOC diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	High	Customer complaint log, Nov 2025
2	Value stream maps	Output	Affects Value stream maps; followed by Process Excellence Manager.	Medium	Internal audit report, Nov 2025
3	Flow diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	Medium	Process performance dashboard, Nov 2025

MP-005.2 — Define SIPOC method · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	SIPOC diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	High	Internal audit report, Nov 2025
2	Value stream maps	Output	Affects Value stream maps; followed by Process Excellence Manager.	Medium	Process performance dashboard, Nov 2025
3	Flow diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	Medium	Interview with the process owner, Nov 2025

MP-005.3 — Define SIPOC and value stream suppliers · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Spare parts supplier A (critical)	Supplier	Affects SIPOC diagrams; followed by Process Excellence Manager.	High	Process performance dashboard, Nov 2025
2	Spare parts supplier B	Supplier	Affects Value stream maps; followed by Process Excellence Manager.	Medium	Interview with the process owner, Oct 2025
3	Logistics provider	Supplier	Affects SIPOC diagrams; followed by Process Excellence Manager.	Medium	Regulatory watch bulletin, Oct 2025

MP-005.4 — Define SIPOC and value stream inputs · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	SIPOC diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	High	Interview with the process owner, Nov 2025
2	Value stream maps	Output	Affects Value stream maps; followed by Process Excellence Manager.	Medium	Regulatory watch bulletin, Oct 2025
3	Flow diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	Medium	Supplier evaluation file, Oct 2025

MP-005.5 — Define SIPOC and value stream steps · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	SIPOC diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	High	Regulatory watch bulletin, Oct 2025
2	Value stream maps	Output	Affects Value stream maps; followed by Process Excellence Manager.	Medium	Supplier evaluation file, Oct 2025
3	Flow diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	Medium	Management review minutes, Oct 2025

MP-005.6 — Define SIPOC and value stream outputs · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	SIPOC diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	High	Supplier evaluation file, Oct 2025
2	Value stream maps	Output	Affects Value stream maps; followed by Process Excellence Manager.	Medium	Management review minutes, Oct 2025
3	Flow diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	Medium	Customer complaint log, Sep 2025

MP-005.7 — Define SIPOC and value stream customers · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	SIPOC diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	High	Management review minutes, Oct 2025
2	Value stream maps	Output	Affects Value stream maps; followed by Process Excellence Manager.	Medium	Customer complaint log, Sep 2025
3	Flow diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	Medium	Internal audit report, Sep 2025

MP-005.8 — Map SIPOC and value stream · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	SIPOC diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	High	Customer complaint log, Sep 2025
2	Value stream maps	Output	Affects Value stream maps; followed by Process Excellence Manager.	Medium	Internal audit report, Sep 2025
3	Flow diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	Medium	Process performance dashboard, Sep 2025

MP-005.9 — Validate SIPOC and value stream · Decision criteria checked

#	Criterion	Met	Evidence
1	SIPOC diagrams complete	Yes	SIPOC diagrams v1.0

#	Criterion	Met	Evidence
2	Requirements of ISO 9001 §4.4, §8.1 met	Partly	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

MP-005.11 — Capture As-Is SIPOC where required · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	SIPOC diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	High	Interview with the process owner, Sep 2025
2	Value stream maps	Output	Affects Value stream maps; followed by Process Excellence Manager.	Medium	Regulatory watch bulletin, Aug 2025
3	Flow diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	Medium	Supplier evaluation file, Aug 2025

MP-005.14 — Approve and deploy To-Be version · Decision criteria checked

#	Criterion	Met	Evidence
1	SIPOC diagrams complete	Yes	SIPOC diagrams v1.0
2	Requirements of ISO 9001 §4.4, §8.1 met	Yes	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

GRC005 (MP-028) — Regulatory and Compliance Obligations Mapping

Maintain legal register; identify obligations; link to controls; monitor changes. Owner: Compliance Officer. Tier 1. Requirements answered: ISO 9001 §4.2, ISO 14001 §6.1.3, ISO 45001 §6.1.3.

Documents of this macro process: AT-UNI-QMS-LEGAL (Compliance obligations register); AT-UNI-QMS-PSHEET-GRC005 (Macro process sheet — Regulatory and Compliance Obligations Mapping).

Step	Step, task and purpose	Role · form	What to type
MP-028.1	Maintain legal register Task: Plan and prepare compliance obligations Maintain legal register — step 1 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.	Compliance Officer Document	Document template: TPL-LEGAL — Compliance obligations register Document reference: AT-UNI-QMS-GRC005-01 Version: 1.1 Content summary: Legal register for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QMS-LEGAL — Compliance obligations register
MP-028.2	Identify compliance obligations Task: Plan and prepare compliance obligations Identify compliance obligations — step 2 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.	Compliance Officer Register items	Items identified: 1 row — see the table below
MP-028.3	Link compliance obligations to policies/controls Task: Plan and prepare compliance obligations Link compliance obligations to policies/controls — step 3 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.	Compliance Officer Execution	What was done: Link compliance obligations to policies/controls carried out on service delivery; Legal register updated. Records that prove it: AT-UNI-QMS-LEGAL — Compliance obligations register; OB-S1 — ISO 9001; OB-L01 — Consumer protection law Completion (%): 100
MP-028.4	Monitor compliance obligations changes Task: Plan and prepare compliance	Compliance Officer Measurement	Indicators measured: 1 row — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.

Step	Step, task and purpose	Role · form	What to type
	obligations Monitor compliance obligations changes — step 4 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.		
MP-028.5	Assess compliance obligations impact Task: Execute compliance obligations activities Assess compliance obligations impact — step 5 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.	Compliance Officer Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.5 Conclusion: Weighted score 4.5/5. Main gap: job sheet not signed. Action recorded in the action plan.
MP-028.6	Validate compliance obligations Task: Execute compliance obligations activities Validate compliance obligations — step 6 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.	Compliance Officer Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Compliance Officer Decision comment and conditions: Legal register approved against ISO 9001; no blocking point.
MP-028.7	Adjust compliance obligations policies Task: Execute compliance obligations activities Adjust compliance obligations policies — step 7 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.	Compliance Officer Change	Change made: Legal register updated: Strategic (market, customer loss). Reason: Change in regulation Documents or records updated: AT-UNI-QMS-LEGAL — Compliance obligations register; OB-S1 — ISO 9001; OB-L01 — Consumer protection law
MP-028.8	Submit compliance obligations declarations Task: Verify, record and close compliance obligations Submit compliance obligations declarations — step 8 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.	Compliance Officer Execution	What was done: Submit compliance obligations declarations carried out on service delivery; Legal register updated. Records that prove it: AT-UNI-QMS-LEGAL — Compliance obligations register; OB-S1 — ISO 9001; OB-L01 — Consumer protection law Completion (%): 100
MP-028.9	Manage compliance obligations inspections Task: Verify, record and close compliance obligations Manage compliance obligations inspections — step 9 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.	Compliance Officer Execution	What was done: Manage compliance obligations inspections carried out on service delivery; Legal register updated. Records that prove it: AT-UNI-QMS-LEGAL — Compliance obligations register; OB-S1 — ISO 9001; OB-L01 — Consumer protection law Completion (%): 100
MP-028.10	Report compliance obligations Task: Verify, record and close compliance obligations Report compliance obligations — step 10 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.	Compliance Officer Communication	Communication records: 2 rows — see the table below

MP-028.2 — Identify compliance obligations · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	ISO 9001	Requirement	Affects Legal register; followed by Compliance Officer.	High	Internal audit report, Nov 2025

MP-028.4 — Monitor compliance obligations changes · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	KPI-08 — Obligations mapped to process elements	Obligations mapped to process elements measures the result of this macro process (Legal register); it is the KPI its owner reviews at each Monthly review.	92.4	100%

MP-028.5 — Assess compliance obligations impact · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Legal register complete and up to date	30	5	Legal register reviewed on 2025-12-18; 2 gaps corrected.
2	Requirements of ISO 9001 §4.2, ISO 14001 §6.1.3, ISO 45001 §6.1.3 met	30	4	Checked against ISO 9001 §4.2, ISO 14001 §6.1.3, ISO 45001 §6.1.3 with the checklist of the phase gate.
3	Evidence available for Compliance obligations	20	5	Records filed in the project: Compliance obligations.
4	Results against target	20	4	KPI KPI-08 used as the measure.

MP-028.6 — Validate compliance obligations · Decision criteria checked

#	Criterion	Met	Evidence
1	Legal register complete	Yes	Legal register v1.0
2	Requirements of ISO 9001 §4.2, ISO 14001 §6.1.3, ISO 45001 §6.1.3 met	Yes	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

MP-028.10 — Report compliance obligations · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	Top mgmt	Intranet	2025-12-25	Legal register: what changes for you and what to do by 2026-01-08.	Compliance Officer
2	Regulators	Notice board	2025-12-27	Compliance obligations: what changes for you and what to do by 2026-01-08.	Compliance Officer

GRC001 (MP-036) — Policy and Procedure Governance

Define policy lifecycle; identify gaps; validate and approve; publish and renew. Owner: IMS Manager. Tier 1. Requirements answered: ISO 9001 §5.2, §7.5.

Documents of this macro process: AT-UNI-QMS-CHANGE (Control of changes record); AT-UNI-QMS-MAN (Management system manual).

Step	Step, task and purpose	Role · form	What to type
MP-036.1	Define policies and procedures lifecycle Task: Plan and prepare policies and procedures Define policies and procedures lifecycle — step 1 of 11 in GRC001 Policy and Procedure Governance.	IMS Manager Register items	Items identified: 3 rows — see the table below
MP-036.2	Identify policies and procedures gaps Task: Plan and prepare policies and procedures Identify policies and procedures gaps — step 2 of 11 in GRC001 Policy and Procedure Governance.	IMS Manager Register items	Items identified: 3 rows — see the table below
MP-036.3	Draft policies and procedures Task: Plan and prepare policies and procedures Draft policies and procedures — step 3 of 11 in GRC001 Policy and Procedure Governance.	IMS Manager Document	Document template: TPL-MAN — Management system manual Document reference: AT-UNI-QMS-GRC001-03 Version: 1.0 Content summary: Policies for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QMS-MAN — Management system manual

Step	Step, task and purpose	Role · form	What to type
MP-036.4	Align policies and procedures Task: Plan and prepare policies and procedures Align policies and procedures — step 4 of 11 in GRC001 Policy and Procedure Governance.	IMS Manager Execution	What was done: Align policies and procedures carried out on service delivery; Policies updated. Records that prove it: AT-UNI-QMS-MAN — Management system manual; CHG-01 — New quotation template with second check; CHG-02 — Replace the job sheet with a tablet form Completion (%): 100
MP-036.5	Submit policies and procedures Task: Execute policies and procedures activities Submit policies and procedures — step 5 of 11 in GRC001 Policy and Procedure Governance.	IMS Manager Execution	What was done: Submit policies and procedures carried out on service delivery; Policies updated. Records that prove it: AT-UNI-QMS-MAN — Management system manual; CHG-01 — New quotation template with second check; CHG-02 — Replace the job sheet with a tablet form Completion (%): 100
MP-036.6	Validate policies and procedures Task: Execute policies and procedures activities Validate policies and procedures — step 6 of 11 in GRC001 Policy and Procedure Governance.	IMS Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): IMS Manager Decision comment and conditions: Policies approved against ISO 9001; no blocking point.
MP-036.7	Approve policies and procedures Task: Execute policies and procedures activities Approve policies and procedures — step 7 of 11 in GRC001 Policy and Procedure Governance.	IMS Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): IMS Manager Decision comment and conditions: Policies approved against ISO 9001; no blocking point.
MP-036.8	Publish policies and procedures Task: Execute policies and procedures activities Publish policies and procedures — step 8 of 11 in GRC001 Policy and Procedure Governance.	IMS Manager Document	Document template: TPL-MAN — Management system manual Document reference: AT-UNI-QMS-GRC001-08 Version: 1.1 Content summary: Policies for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QMS-MAN — Management system manual
MP-036.9	Notify owners of policies and procedures Task: Verify, record and close policies and procedures Notify owners of policies and procedures — step 9 of 11 in GRC001 Policy and Procedure Governance.	IMS Manager Communication	Communication records: 2 rows — see the table below
MP-036.10	Schedule policies and procedures renewal Task: Verify, record and close policies and procedures Schedule policies and procedures renewal — step 10 of 11 in GRC001 Policy and Procedure Governance.	IMS Manager Plan	Planned activities (become actions): 1 row — see the table below On completion: rows become actions.
MP-036.11	Retire policies and procedures Task: Verify, record and close policies and procedures Retire policies and procedures — step 11 of 11 in GRC001 Policy and Procedure Governance.	IMS Manager Closure	Closure evidence: Policies closed; effectiveness verified on the KPI and evidence filed. Records that prove effectiveness: AT-UNI-QMS-MAN — Management system manual; CHG-01 — New quotation template with second check; CHG-02 — Replace the job sheet with a tablet form; Retire policies and procedures Closure date: 2025-12-31

MP-036.1 — Define policies and procedures lifecycle · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Policies	Output	Affects Policies; followed by IMS Manager.	High	Customer complaint log, Dec 2025

#	Item	Category	Description and impact	Relevance	Source / evidence
2	Procedures	Output	Affects Procedures; followed by IMS Manager.	Medium	Internal audit report, Nov 2025
3	Approval records	Output	Affects Policies; followed by IMS Manager.	Medium	Process performance dashboard, Nov 2025

MP-036.2 — Identify policies and procedures gaps · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Policies	Output	Affects Policies; followed by IMS Manager.	High	Internal audit report, Dec 2025
2	Procedures	Output	Affects Procedures; followed by IMS Manager.	Medium	Process performance dashboard, Nov 2025
3	Approval records	Output	Affects Policies; followed by IMS Manager.	Medium	Interview with the process owner, Nov 2025

MP-036.6 — Validate policies and procedures · Decision criteria checked

#	Criterion	Met	Evidence
1	Policies complete	Yes	Policies v1.0
2	Requirements of ISO 9001 §5.2, §7.5 met	Yes	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

MP-036.7 — Approve policies and procedures · Decision criteria checked

#	Criterion	Met	Evidence
1	Policies complete	Yes	Policies v1.0
2	Requirements of ISO 9001 §5.2, §7.5 met	Yes	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

MP-036.9 — Notify owners of policies and procedures · Communication records

GRC002 (MP-037) — Enterprise Risk Universe and Assessment

Define risk taxonomy; identify scenarios; assess probability/impact; publish heatmap. Owner: Risk Manager.
Tier 1. Requirements answered: ISO 9001 §6.1, ISO 31000.

Step	Step, task and purpose	Role · form	What to type
MP-037.1	Define enterprise risk register taxonomy Task: Plan and prepare enterprise risk register Define enterprise risk register taxonomy — step 1 of 9 in GRC002 Enterprise Risk Universe and Assessment.	Risk Manager Register items	Items identified: 3 rows — see the table below
MP-037.2	Identify enterprise risk register scenarios Task: Plan and prepare enterprise risk register Identify enterprise risk register scenarios — step 2 of 9 in GRC002 Enterprise Risk Universe and Assessment.	Risk Manager Register items	Items identified: 4 rows — see the table below
MP-037.3	Assess enterprise risk register probability/impact Task: Plan and prepare enterprise risk register Assess enterprise risk register probability/impact — step 3 of 9 in GRC002 Enterprise Risk Universe and Assessment.	Risk Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.5 Conclusion: Weighted score 3.5/5. Main gap: Operational (process failure, supply chain). Action recorded in the action plan.
MP-037.4	Calculate enterprise risk register scores Task: Execute enterprise risk register activities Calculate enterprise risk register scores — step 4 of 9 in GRC002 Enterprise Risk Universe and Assessment.	DynamicMS Engine Automated service task	System result confirmed: Calculate enterprise risk register scores: done by the DynamicMS Engine; Risk taxonomy available in the project. Records produced: —
MP-037.5	Designate owners of enterprise risk register Task: Execute enterprise risk register activities Designate owners of enterprise risk register — step 5 of 9 in GRC002 Enterprise Risk Universe and Assessment.	Risk Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-037.6	Link enterprise risk register to controls Task: Execute enterprise risk register activities Link enterprise risk register to controls — step 6 of 9 in GRC002 Enterprise Risk Universe and Assessment.	Risk Manager Execution	What was done: Link enterprise risk register to controls carried out on service delivery; Risk taxonomy updated. Records that prove it: Link enterprise risk register to controls Completion (%): 100
MP-037.7	Calculate enterprise risk register residual Task: Verify, record and close enterprise risk register Calculate enterprise risk register residual — step 7 of 9 in GRC002 Enterprise Risk Universe and Assessment.	DynamicMS Engine Automated service task	System result confirmed: Calculate enterprise risk register residual: done by the DynamicMS Engine; Risk taxonomy available in the project. Records produced: Link enterprise risk register to controls
MP-037.8	Validate enterprise risk register Task: Verify, record and close enterprise risk register Validate enterprise risk register — step 8 of 9 in GRC002 Enterprise Risk Universe and Assessment.	Risk Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Risk Manager Decision comment and conditions: Risk taxonomy approved against ISO 9001; no blocking point.
MP-037.9	Publish enterprise risk register heatmap Task: Verify, record and close enterprise risk register Publish enterprise risk register heatmap — step 9 of 9 in GRC002 Enterprise Risk Universe and	Risk Manager Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QMS-GRC002-09 Version: 2.0 Content summary: Risk taxonomy for technical services, aligned with ISO 9001; generated from the project data, then completed by the author.

3	Risks reviewed	Yes	Risk register

GRC003 (MP-038) — Risk Treatment and Mitigation Planning

Evaluate treatment options; design plans; implement and monitor; document acceptance. Owner: Risk Manager. Tier 1. Requirements answered: ISO 9001 §6.1.2.

Step	Step, task and purpose	Role · form	What to type
MP-038.1	Evaluate risk treatment plan options Task: Plan and prepare risk treatment plan Evaluate risk treatment plan options — step 1 of 8 in GRC003 Risk Treatment and Mitigation Planning.	Risk Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.7 Conclusion: Weighted score 3.7/5. Main gap: Operational (process failure, supply chain). Action recorded in the action plan.
MP-038.2	Design risk treatment plan Task: Plan and prepare risk treatment plan Design risk treatment plan — step 2 of 8 in GRC003 Risk Treatment and Mitigation Planning.	Risk Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-038.3	Allocate risk treatment plan budget Task: Plan and prepare risk treatment plan Allocate risk treatment plan budget — step 3 of 8 in GRC003 Risk Treatment and Mitigation Planning.	Risk Manager Assignment	Role: Risk Manager Person (from the OBS): Adam Rahmani Organization units covered: Finance RACSI of the macro process: R: Risk Manager · A: IMS Manager · C: Risk Manager · S: Document Controller · I: Top Management
MP-038.4	Implement risk treatment plan Task: Execute risk treatment plan activities Implement risk treatment plan — step 4 of 8 in GRC003 Risk Treatment and Mitigation Planning.	Risk Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-038.5	Monitor risk treatment plan Task: Execute risk treatment plan activities Monitor risk treatment plan — step 5 of 8 in GRC003 Risk Treatment and Mitigation Planning.	Risk Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-038.6	Reassess risk treatment plan Task: Execute risk treatment plan activities Reassess risk treatment plan — step 6 of 8 in GRC003 Risk Treatment and Mitigation Planning.	Risk Manager Execution	What was done: Reassess risk treatment plan carried out on service delivery; Treatment plans updated. Records that prove it: Treat risk: Use of an obsolete document version Completion (%): 100
MP-038.7	Escalate risk treatment plan issues Task: Verify, record and close risk treatment plan Escalate risk treatment plan issues — step 7 of 8 in GRC003 Risk Treatment and Mitigation Planning.	Risk Manager Escalation	Escalated to: Top Management Reason: Treatment plans is late beyond tolerance; a decision on resources is needed.
MP-038.8	Document risk treatment plan acceptance Task: Verify, record and close risk treatment plan Document risk treatment plan acceptance — step 8 of 8 in GRC003 Risk Treatment and Mitigation Planning.	Risk Manager Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QMS-GRC003-08 Version: 2.0 Content summary: Treatment plans for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QMS-PROC-01 — Procedure — Context To Strategy

MP-038.1 — Evaluate risk treatment plan options · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Treatment plans complete and up to date	30	3	Treatment plans reviewed on 2026-01-01; 2 gaps corrected.
2	Requirements of ISO 9001 §6.1.2 met	30	4	Checked against ISO 9001 §6.1.2 with the checklist of the phase gate.
3	Evidence available for Budget records	20	4	Records filed in the project: Budget records.
4	Results against target	20	4	KPI Q-KPI-01 used as the measure.

MP-038.2 — Design risk treatment plan · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Allocate risk treatment plan budget	Adam Rahmani	2026-01-05	2026-01-19	Treatment plans
2	Implement risk treatment plan	Adam Rahmani	2026-01-10	2026-01-29	Budget records
3	Monitor risk treatment plan	Adam Rahmani	2026-01-15	2026-02-08	Treatment plans

MP-038.4 — Implement risk treatment plan · Settings

#	Setting	Value	Reason
1	Implement risk treatment plan	Enabled for service delivery	Needed to produce Treatment plans
2	Owner and notification	Risk Manager	Alerts go to the process owner

MP-038.5 — Monitor risk treatment plan · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Treatment plans); it is the KPI its owner reviews at each Monthly review.	81.5	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Treatment plans); it is the KPI its owner reviews at each Monthly review.	94.4	>= 95%

DMS044 (MP-105) — Compliance Calendar and Obligation Scheduler

Centralize obligations; schedule tasks/deadlines; send reminders; track status. Owner: Compliance Officer. Tier 5. Requirements answered: ISO 9001 §4.2, §6.1.

Step	Step, task and purpose	Role · form	What to type
MP-105.1	Aggregate compliance calendar obligations Task: Plan and prepare compliance calendar Aggregate compliance calendar obligations — step 1 of 10 in DMS044 Compliance Calendar and Obligation Scheduler.	DynamicMS Engine Automated service task	System result confirmed: Aggregate compliance calendar obligations: done by the DynamicMS Engine; Compliance calendar available in the project. Records produced: —
MP-105.2	Define compliance calendar recurrence Task: Plan and prepare compliance calendar Define compliance calendar recurrence — step 2 of 10 in DMS044 Compliance Calendar and Obligation	Compliance Officer Register items	Items identified: 3 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	Scheduler.		
MP-105.3	Assign compliance calendar owners Task: Plan and prepare compliance calendar Assign compliance calendar owners — step 3 of 10 in DMS044 Compliance Calendar and Obligation Scheduler.	Compliance Officer Assignment	Role: Compliance Officer Person (from the OBS): Hind Berrada Organization units covered: Finance RACSI of the macro process: R: Compliance Officer · A: IMS Manager · C: Risk Manager · S: Document Controller · I: Top Management
MP-105.4	Schedule compliance calendar reminders Task: Plan and prepare compliance calendar Schedule compliance calendar reminders — step 4 of 10 in DMS044 Compliance Calendar and Obligation Scheduler.	Compliance Officer Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-105.5	Integrate task management Task: Execute compliance calendar activities Integrate task management — step 5 of 10 in DMS044 Compliance Calendar and Obligation Scheduler.	Compliance Officer Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-105.6	Track compliance calendar status Task: Execute compliance calendar activities Track compliance calendar status — step 6 of 10 in DMS044 Compliance Calendar and Obligation Scheduler.	Compliance Officer Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-105.7	Provide compliance calendar dashboard Task: Execute compliance calendar activities Provide compliance calendar dashboard — step 7 of 10 in DMS044 Compliance Calendar and Obligation Scheduler.	Compliance Officer Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-105.8	Alert compliance calendar on deadlines Task: Verify, record and close compliance calendar Alert compliance calendar on deadlines — step 8 of 10 in DMS044 Compliance Calendar and Obligation Scheduler.	Compliance Officer Communication	Communication records: 2 rows — see the table below
MP-105.9	Report compliance calendar metrics Task: Verify, record and close compliance calendar Report compliance calendar metrics — step 9 of 10 in DMS044 Compliance Calendar and Obligation Scheduler.	Compliance Officer Communication	Communication records: 2 rows — see the table below
MP-105.10	Update compliance calendar Task: Verify, record and close compliance calendar Update compliance calendar — step 10 of 10 in DMS044 Compliance Calendar and Obligation Scheduler.	Compliance Officer Change	Change made: Compliance calendar updated: quote error. Reason: Customer complaint analysis Documents or records updated: Integrate task management

MP-105.2 — Define compliance calendar recurrence · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Compliance calendar	Output	Affects Compliance calendar; followed by Compliance Officer.	High	Internal audit report, Dec 2025

#	Item	Category	Description and impact	Relevance	Source / evidence
2	Obligation register	Output	Affects Obligation register; followed by Compliance Officer.	Medium	Process performance dashboard, Dec 2025
3	Reminder records	Output	Affects Compliance calendar; followed by Compliance Officer.	Medium	Interview with the process owner, Nov 2025

MP-105.4 — Schedule compliance calendar reminders · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Integrate task management	Hind Berrada	2026-01-15	2026-01-29	Compliance calendar
2	Track compliance calendar status	Hind Berrada	2026-01-20	2026-02-08	Obligation register
3	Provide compliance calendar dashboard	Hind Berrada	2026-01-25	2026-02-18	Compliance calendar

MP-105.5 — Integrate task management · Settings

#	Setting	Value	Reason
1	Integrate task management	Enabled for service delivery	Needed to produce Compliance calendar
2	Owner and notification	Compliance Officer	Alerts go to the process owner

MP-105.6 — Track compliance calendar status · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Compliance calendar); it is the KPI its owner reviews at each Monthly review.	81.5	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Compliance calendar); it is the KPI its owner reviews at each Monthly review.	94.4	>= 95%

MP-105.7 — Provide compliance calendar dashboard · Settings

#	Setting	Value	Reason
1	Provide compliance calendar dashboard	Enabled for service delivery	Needed to produce Compliance calendar
2	Owner and notification	Compliance Officer	Alerts go to the process owner

MP-105.8 — Alert compliance calendar on deadlines · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	Compliance	Meeting	2026-01-14	Compliance calendar: what changes for you and what to do by 2026-01-28.	Compliance Officer
2	Process owners	E-mail	2026-01-16	Obligation register: what changes for you and what to do by 2026-01-28.	Compliance Officer

MP-105.9 — Report compliance calendar metrics · Communication records

				and what to do by 2026-01-27.	

DMS082 (MP-143) — SME Onboarding and Quick Start

Deploy in days; guided setup; reduce complexity. Owner: IMS Manager. Tier 7. Requirements answered: ISO 9001 §4, §5.

Step	Step, task and purpose	Role · form	What to type
MP-143.1	Select SME onboarding segment Task: Plan and prepare SME onboarding Select SME onboarding segment — step 1 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Register items	Items identified: 3 rows — see the table below
MP-143.2	Select SME onboarding standards Task: Plan and prepare SME onboarding Select SME onboarding standards — step 2 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Register items	Items identified: 1 row — see the table below
MP-143.3	Configure SME onboarding profile Task: Plan and prepare SME onboarding Configure SME onboarding profile — step 3 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-143.4	Activate SME onboarding pack Task: Plan and prepare SME onboarding Activate SME onboarding pack — step 4 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-143.5	Import SME onboarding docs Task: Execute SME onboarding activities Import SME onboarding docs — step 5 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Execution	What was done: Import SME onboarding docs carried out on service delivery; Configured tenant updated. Records that prove it: — Completion (%): 100
MP-143.6	Invite users on SME onboarding Task: Execute SME onboarding activities Invite users on SME onboarding — step 6 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Execution	What was done: Invite users on SME onboarding carried out on service delivery; Configured tenant updated. Records that prove it: — Completion (%): 100
MP-143.7	Run SME onboarding wizard Task: Execute SME onboarding activities Run SME onboarding wizard — step 7 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Execution	What was done: Run SME onboarding wizard carried out on service delivery; Configured tenant updated. Records that prove it: — Completion (%): 100
MP-143.8	Configure SME onboarding workflows Task: Execute SME onboarding activities Configure SME onboarding workflows — step 8 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-143.9	Activate SME onboarding KPIs Task: Verify, record and close SME onboarding Activate SME onboarding KPIs —	IMS Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes

Step	Step, task and purpose	Role · form	What to type
	step 9 of 12 in DMS082 SME Onboarding and Quick Start.		
MP-143.10	Launch SME onboarding Task: Verify, record and close SME onboarding Launch SME onboarding — step 10 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Execution	What was done: Launch SME onboarding carried out on service delivery; Configured tenant updated. Records that prove it: — Completion (%): 100
MP-143.11	Train staff on SME onboarding Task: Verify, record and close SME onboarding Train staff on SME onboarding — step 11 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Training	Session / module: Train staff on SME onboarding — practice session Date: 2026-01-22 Units trained: Atlas Universal SME Participants: 12 Effectiveness evaluation method: Practical test Effectiveness (%): 87
MP-143.12	Schedule SME onboarding check-in Task: Verify, record and close SME onboarding Schedule SME onboarding check-in — step 12 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.

MP-143.1 — Select SME onboarding segment · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Configured tenant	Output	Affects Configured tenant; followed by IMS Manager.	High	Customer complaint log, Jan 2026
2	Activated pack	Output	Affects Activated pack; followed by IMS Manager.	Medium	Internal audit report, Dec 2025
3	Imported docs	Output	Affects Configured tenant; followed by IMS Manager.	Medium	Process performance dashboard, Dec 2025

MP-143.2 — Select SME onboarding standards · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	ISO 9001	Requirement	Affects Configured tenant; followed by IMS Manager.	High	Internal audit report, Dec 2025

MP-143.3 — Configure SME onboarding profile · Settings

#	Setting	Value	Reason
1	Configure SME onboarding profile	Enabled for service delivery	Needed to produce Configured tenant
2	Owner and notification	IMS Manager	Alerts go to the process owner

MP-143.4 — Activate SME onboarding pack · Settings

#	Setting	Value	Reason
1	Activate SME onboarding pack	Enabled for service delivery	Needed to produce Configured tenant
2	Owner and notification	IMS Manager	Alerts go to the process owner

MP-143.8 — Configure SME onboarding workflows · Settings

#	Setting	Value	Reason
1	Configure SME onboarding workflows	Enabled for service delivery	Needed to produce Configured tenant
2	Owner and notification	IMS Manager	Alerts go to the process owner

MP-143.9 — Activate SME onboarding KPIs · Settings

#	Setting	Value	Reason
1	Activate SME onboarding KPIs	Enabled for service delivery	Needed to produce Configured tenant
2	Owner and notification	IMS Manager	Alerts go to the process owner

MP-143.12 — Schedule SME onboarding check-in · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Select segment	Tariq Saleh	2026-01-22	2026-02-05	Configured tenant
2	Select standards	Tariq Saleh	2026-01-27	2026-02-15	Activated pack
3	Configure profile	Tariq Saleh	2026-02-01	2026-02-25	Configured tenant

DMS083 (MP-144) — SME Simplified Process Modeling

Pre-built templates; quick customization; reduce effort. Owner: Process Excellence Manager. Tier 7. Requirements answered: ISO 9001 §4.4.

Step	Step, task and purpose	Role · form	What to type
MP-144.1	Select SME process model template Task: Plan and prepare SME process model Select SME process model template — step 1 of 10 in DMS083 SME Simplified Process Modeling.	Process Excellence Manager Register items	Items identified: 3 rows — see the table below
MP-144.2	Review SME process model Task: Plan and prepare SME process model Review SME process model — step 2 of 10 in DMS083 SME Simplified Process Modeling.	Process Excellence Manager Review	Review frequency: Annual Review date: 2026-01-22 Next review: 2027-01-22 Chaired by: Process Excellence Manager Participants: Process Excellence Manager, IMS Manager, Quality Manager Inputs reviewed: 3 rows — see the table below Decisions and actions: 1 row — see the table below On completion: rows become actions.
MP-144.3	Customize SME process model Task: Plan and prepare SME process model Customize SME process model — step 3 of 10 in DMS083 SME Simplified Process Modeling.	Process Excellence Manager Change	Change made: Process models updated: Strategic (market, customer loss). Reason: Change in regulation Documents or records updated: Update Documentation
MP-144.4	Assign SME process model responsibilities Task: Plan and prepare SME process model Assign SME process model responsibilities — step 4 of 10 in DMS083 SME Simplified Process Modeling.	Process Excellence Manager Assignment	Role: Process Excellence Manager Person (from the OBS): Nadia Chraïbi Organization units covered: Quality RACSI of the macro process: R: Process Excellence Manager · A: IMS Manager · C: Risk Manager · S: Document Controller · I: Top Management
MP-144.5	Configure SME process model approvals Task: Execute SME process model activities	Process Excellence Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes

Step	Step, task and purpose	Role · form	What to type
	Configure SME process model approvals — step 5 of 10 in DMS083 SME Simplified Process Modeling.		
MP-144.6	Publish SME process model Task: Execute SME process model activities Publish SME process model — step 6 of 10 in DMS083 SME Simplified Process Modeling.	Process Excellence Manager Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QMS-DMS083-06 Version: 1.1 Content summary: Process models for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QMS-PROC-01 — Procedure — Context To Strategy
MP-144.7	Train staff on SME process model Task: Execute SME process model activities Train staff on SME process model — step 7 of 10 in DMS083 SME Simplified Process Modeling.	Process Excellence Manager Training	Session / module: Train staff on SME process model — practice session Date: 2026-01-28 Units trained: Quality Participants: 15 Effectiveness evaluation method: Practical test Effectiveness (%): 83
MP-144.8	Monitor SME process model adoption Task: Verify, record and close SME process model Monitor SME process model adoption — step 8 of 10 in DMS083 SME Simplified Process Modeling.	Process Excellence Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: stable, below target; action opened. Next analysis at the performance review.
MP-144.9	Update SME process model Task: Verify, record and close SME process model Update SME process model — step 9 of 10 in DMS083 SME Simplified Process Modeling.	Process Excellence Manager Change	Change made: Process models updated: quote error. Reason: Decision of the management review Documents or records updated: Update Documentation
MP-144.10	Share SME process model Task: Verify, record and close SME process model Share SME process model — step 10 of 10 in DMS083 SME Simplified Process Modeling.	Process Excellence Manager Communication	Communication records: 2 rows — see the table below

MP-144.1 — Select SME process model template · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Process models	Output	Affects Process models; followed by Process Excellence Manager.	High	Customer complaint log, Jan 2026
2	Documentation	Output	Affects Documentation; followed by Process Excellence Manager.	Medium	Internal audit report, Dec 2025
3	RACI assignments	Output	Affects Process models; followed by Process Excellence Manager.	Medium	Process performance dashboard, Dec 2025

MP-144.2 — Review SME process model · Inputs reviewed

#	Input	Finding
1	Process requirements	Process requirements still valid; minor updates made.
2	Industry templates	No major change since the last review.
3	Best practices	Gap found on Documentation.

MP-144.2 — Review SME process model · Decisions and actions

#	Decision	Owner	Due date
1	Update Documentation	Nadia Chraibi	2026-02-21

MP-144.5 — Configure SME process model approvals · Settings

#	Setting	Value	Reason
1	Configure SME process model approvals	Enabled for service delivery	Needed to produce Process models
2	Owner and notification	Process Excellence Manager	Alerts go to the process owner

MP-144.8 — Monitor SME process model adoption · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Process models); it is the KPI its owner reviews at each Monthly review.	81.5	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Process models); it is the KPI its owner reviews at each Monthly review.	94.4	>= 95%

MP-144.10 — Share SME process model · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	SME process owners	Intranet	2026-01-30	Process models: what changes for you and what to do by 2026-02-13.	Process Excellence Manager
2	SME employees	Notice board	2026-02-01	Documentation: what changes for you and what to do by 2026-02-13.	Process Excellence Manager

Gate — G1 — Strategy baseline approved

Exit criteria: Context, policy, objectives and risk register approved by top management.

32. Open Lifecycle and select the phase card; the gate panel is on the right.
33. Tick “Context analysis report approved (mandatory, evidence required)”.
34. Tick “Management system policy signed (mandatory, evidence required)”.
35. Tick “SMART objectives cascaded to functions (mandatory, evidence required)”.
36. Tick “Risk and opportunity register reviewed (mandatory, evidence required)”.
37. Tick “Process map published”.
38. Sign in as Top Management (ceo@...) or the IMS Manager and select Go. For Hold or No-Go, type a comment explaining why.

E2E-02 — Leadership To Commitment

Goals: Establish leadership, competence, communication, audit capability

From trigger to terminal event: E2E-01 completion or leadership change → Competent personnel, communication plan, qualified auditors in place

UMS006 (MP-013) — Competence and Training Orchestration

Define competence frameworks; assess gaps; deliver training; track certifications. Owner: HR Manager. Tier 1. Requirements answered: ISO 9001 §7.2, §7.3.

Documents of this macro process: AT-UNI-QMS-COMP (Competence matrix and training records).

Step	Step, task and purpose	Role · form	What to type
MP-013.1	Define training frameworks Task: Plan and prepare training Define training frameworks — step 1 of 9 in UMS006 Competence and Training Orchestration.	HR Manager Register items	Items identified: 3 rows — see the table below
MP-013.2	Assess training gaps Task: Plan and prepare training Assess training gaps — step 2 of 9 in UMS006 Competence and Training Orchestration.	HR Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.6 Conclusion: Weighted score 3.6/5. Main gap: job sheet not signed. Action recorded in the action plan.
MP-013.3	Design training curricula Task: Plan and prepare training Design training curricula — step 3 of 9 in UMS006 Competence and Training Orchestration.	HR Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-013.4	Plan training Task: Execute training activities Plan training — step 4 of 9 in UMS006 Competence and Training Orchestration.	HR Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-013.5	Deliver training Task: Execute training activities Deliver training — step 5 of 9 in UMS006 Competence and Training Orchestration.	HR Manager Training	Session / module: Deliver training — practice session Date: 2026-02-01 Units trained: Human Resources Participants: 13 Effectiveness evaluation method: Quiz Effectiveness (%): 81
MP-013.6	Evaluate training Task: Execute training activities Evaluate training — step 6 of 9 in UMS006 Competence and Training Orchestration.	HR Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.6 Conclusion: Weighted score 3.6/5. Main gap: Strategic (market, customer loss). Action recorded in the action plan.
MP-013.7	Track training certifications Task: Verify, record and close training Track training certifications — step 7 of 9 in UMS006 Competence and Training Orchestration.	HR Manager Measurement	Indicators measured: 1 row — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-013.8	Certify training Task: Verify, record and close training Certify training — step 8 of 9 in UMS006 Competence and Training Orchestration.	HR Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): HR Manager Decision comment and conditions: Competence records approved against ISO 9001; no blocking point.
MP-013.9	Update training Task: Verify, record and close training Update training — step 9 of 9 in UMS006 Competence and Training Orchestration.	HR Manager Change	Change made: Competence records updated: Strategic (market, customer loss). Reason: Decision of the management review Documents or records updated: AT-UNI-QMS-COMP — Competence matrix and training records; CMP-01 — Internal auditing (ISO 19011); CMP-02 — Root cause analysis (5 Whys, Ishikawa, 8D); Plan training

MP-013.1 — Define training frameworks · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Competence records	Output	Affects Competence records; followed by HR Manager.	High	Customer complaint log, Jan 2026
2	Training records	Output	Affects Training records; followed by HR Manager.	Medium	Internal audit report, Jan 2026
3	Certifications	Output	Affects Competence records; followed by HR Manager.	Medium	Process performance dashboard, Dec 2025

MP-013.2 — Assess training gaps · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Competence records complete and up to date	30	5	Competence records reviewed on 2026-01-23; 2 gaps corrected.
2	Requirements of ISO 9001 §7.2, §7.3 met	30	3	Checked against ISO 9001 §7.2, §7.3 with the checklist of the phase gate.
3	Evidence available for Training records	20	3	Records filed in the project: Training records.
4	Results against target	20	3	KPI KPI-04 used as the measure.

MP-013.3 — Design training curricula · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Plan training	Maya Laurent	2026-02-01	2026-02-15	Competence records
2	Deliver training	Maya Laurent	2026-02-06	2026-02-25	Training records
3	Evaluate training	Maya Laurent	2026-02-11	2026-03-07	Competence records

MP-013.4 — Plan training · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Deliver training	Maya Laurent	2026-01-31	2026-02-14	Competence records
2	Evaluate training	Maya Laurent	2026-02-05	2026-02-24	Training records
3	Track training certifications	Maya Laurent	2026-02-10	2026-03-06	Competence records

MP-013.6 — Evaluate training · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Competence records complete and up to date	30	3	Competence records reviewed on 2026-01-30; 2 gaps corrected.
2	Requirements of ISO 9001 §7.2, §7.3 met	30	3	Checked against ISO 9001 §7.2, §7.3 with the checklist of the phase gate.
3	Evidence available for Training records	20	4	Records filed in the project: Training records.
4	Results against target	20	5	KPI KPI-04 used as the measure.

MP-013.7 — Track training certifications · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	KPI-04 — Competence gap closure rate	Competence gap closure rate measures the result of this macro process (Competence records); it is the KPI its owner reviews at each Monthly review.	76.4	>= 80%

MP-013.8 — Certify training · Decision criteria checked

#	Criterion	Met	Evidence
1	Competence records complete	Yes	Competence records v1.0
2	Requirements of ISO 9001 §7.2, §7.3 met	Yes	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

UMS032 (MP-014) — Management System Communication Plan Development

Define communication needs; develop plan; select channels; measure effectiveness. Owner: IMS Manager.
Tier 1. Requirements answered: ISO 9001 §7.4.

Documents of this macro process: AT-UNI-QMS-COMM (Communication plan and records).

Step	Step, task and purpose	Role · form	What to type
MP-014.1	Fix management system communication plan periodicity Task: Plan and prepare management system communication plan Fix management system communication plan periodicity — step 1 of 13 in UMS032 Management System Communication Plan Development.	IMS Manager Periodicity	Frequency: Annual Next due date: 2027-02-03 Review chaired by: IMS Manager Organization units in scope: Atlas Universal SME Review inputs and notes: Inputs for each review: Communication needs; Stakeholder requirements; Policy. An early review is triggered by: Receipt or update of Communication needs, Stakeholder requirements from Quality mgr, Comm mgr.
MP-014.2	Identify management system communication plan audiences Task: Plan and prepare management system communication plan Identify management system communication plan audiences — step 2 of 13 in UMS032 Management System Communication Plan Development.	IMS Manager Register items	Items identified: 4 rows — see the table below
MP-014.3	Define management system communication plan messages Task: Plan and prepare management system communication plan Define management system communication plan messages — step 3 of 13 in UMS032 Management System Communication Plan Development.	IMS Manager Register items	Items identified: 3 rows — see the table below
MP-014.4	Select management system communication plan channels Task: Plan and prepare management system communication plan Select management system communication plan channels — step 4 of 13 in UMS032 Management System Communication Plan Development.	IMS Manager Register items	Items identified: 3 rows — see the table below
MP-014.5	Establish management system communication plan frequency Task: Execute management system communication plan activities Establish management system communication plan frequency — step 5 of 13 in UMS032 Management System Communication Plan Development.	IMS Manager Periodicity	Frequency: Annual Next due date: 2027-02-03 Review chaired by: IMS Manager Organization units in scope: Atlas Universal SME Review inputs and notes: Inputs for each review: Communication needs; Stakeholder requirements; Policy. An early review is triggered by: Receipt or update of Communication needs, Stakeholder requirements from Quality mgr, Comm mgr.
MP-014.6	Design management system communication plan supports Task: Execute management system communication plan activities Design management system communication plan supports — step 6 of 13 in UMS032 Management System Communication Plan Development.	IMS Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-014.7	Plan management system communication plan Task: Execute management system communication plan activities Plan management system	IMS Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.

Step	Step, task and purpose	Role · form	What to type
	communication plan — step 7 of 13 in UMS032 Management System Communication Plan Development.

4	Results against target	20	4	KPI Q-KPI-01 used as the measure.

This phase has no gate for the project track; it closes when its last step is completed.

E2E-04 — Compliance To Achievement

Goals: Deploy, audit, certify, maintain the management system

From trigger to terminal event: Readiness for certification, surveillance audit due, or new compliance obligation → Certification achieved or maintained; findings closed; compliance obligations met

UMS033 (MP-015) — Management System Deployment and Implementation

Deploy the management system; conduct pilots; prepare teams; move to steady state. Owner: Compliance Officer. Tier 1. Requirements answered: ISO 9001 §8.1.

Step	Step, task and purpose	Role · form	What to type
MP-015.1	Define management system deployment phases Task: Plan and prepare management system deployment Define management system deployment phases — step 1 of 10 in UMS033 Management System Deployment and Implementation.	Compliance Officer Register items	Items identified: 3 rows — see the table below
MP-015.2	Select management system deployment pilots Task: Plan and prepare management system deployment Select management system deployment pilots — step 2 of 10 in UMS033 Management System Deployment and Implementation.	Compliance Officer Assignment	Role: Compliance Officer Person (from the OBS): Hind Berrada Organization units covered: Finance RACSI of the macro process: R: Compliance Officer · A: IMS Manager · C: Risk Manager · S: Document Controller · I: Top Management
MP-015.3	Conduct management system deployment pilot Task: Plan and prepare management system deployment Conduct management system deployment pilot — step 3 of 10 in UMS033 Management System Deployment and Implementation.	Compliance Officer Execution	What was done: Conduct management system deployment pilot carried out on service delivery; Deployed processes updated. Records that prove it: — Completion (%): 100
MP-015.4	Refine management system deployment Task: Plan and prepare management system deployment Refine management system deployment — step 4 of 10 in UMS033 Management System Deployment and Implementation.	Compliance Officer Change	Change made: Deployed processes updated: quote error. Reason: Finding of the internal audit Documents or records updated: —
MP-015.5	Prepare management system deployment teams Task: Execute management system deployment activities Prepare management system deployment teams — step 5 of 10 in UMS033 Management System Deployment and Implementation.	Compliance Officer Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QMS-UMS033-05 Version: 2.0 Content summary: Deployed processes for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QMS-PROC-01 — Procedure — Context To Strategy
MP-015.6	Validate management system deployment schedule Task: Execute management system deployment activities Validate management system deployment schedule — step 6 of 10 in UMS033 Management System Deployment and Implementation.	Compliance Officer Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Compliance Officer Decision comment and conditions: Deployed processes approved against ISO 9001; no blocking point.
MP-015.7	Verify management system deployment readiness Task: Execute management system deployment activities Verify management system deployment readiness — step 7 of 10 in UMS033 Management System Deployment and Implementation.	Compliance Officer Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.2 Conclusion: Weighted score 4.2/5. Main gap: Operational (process failure, supply chain). Action recorded in the action plan.
MP-015.8	Execute management system deployment transition Task: Verify, record and close management system deployment Execute management system deployment transition — step 8 of 10 in UMS033 Management System Deployment and Implementation.	Compliance Officer Execution	What was done: Execute management system deployment transition carried out on service delivery; Deployed processes updated. Records that prove it: — Completion (%): 100
MP-015.9	Support management system	Compliance Officer	What was done: Support management system deployment

Step	Step, task and purpose	Role · form	What to type
	deployment users Task: Verify, record and close management system deployment Support management system deployment users — step 9 of 10 in UMS033 Management System Deployment and Implementation.	Execution	users carried out on service delivery; Deployed processes updated. Records that prove it: — Completion (%): 100
MP-015.10	Move to steady state Task: Verify, record and close management system deployment Move to steady state — step 10 of 10 in UMS033 Management System Deployment and Implementation.	Compliance Officer Execution	What was done: Move to steady state carried out on service delivery; Deployed processes updated. Records that prove it: — Completion (%): 100

MP-015.1 — Define management system deployment phases · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Deployed processes	Output	Affects Deployed processes; followed by Compliance Officer.	High	Customer complaint log, Feb 2026
2	Trained personnel	Output	Affects Trained personnel; followed by Compliance Officer.	Medium	Internal audit report, Feb 2026
3	Transition records	Output	Affects Deployed processes; followed by Compliance Officer.	Medium	Process performance dashboard, Jan 2026

MP-015.6 — Validate management system deployment schedule · Decision criteria checked

#	Criterion	Met	Evidence
1	Deployed processes complete	Yes	Deployed processes v1.0
2	Requirements of ISO 9001 §8.1 met	Yes	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

MP-015.7 — Verify management system deployment readiness · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Deployed processes complete and up to date	30	4	Deployed processes reviewed on 2026-03-06; 2 gaps corrected.
2	Requirements of ISO 9001 §8.1 met	30	4	Checked against ISO 9001 §8.1 with the checklist of the phase gate.
3	Evidence available for Trained personnel	20	4	Records filed in the project: Trained personnel.
4	Results against target	20	5	KPI Q-KPI-01 used as the measure.

UMS037 (MP-016) — Mock Audit, Pre-Certification, and Gap Diagnosis

Conduct mock audit; identify findings; validate; define actions. Owner: Compliance Officer. Tier 1. Requirements answered: ISO 9001 §9.2.

Step	Step, task and purpose	Role · form	What to type
MP-016.1	Define mock audit and gap diagnosis scope Task: Plan and prepare mock audit and gap diagnosis Define mock audit and gap diagnosis scope — step 1 of 10 in UMS037	Compliance Officer Register items	Items identified: 3 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	Mock Audit, Pre-Certification, and Gap Diagnosis.		
MP-016.2	Plan mock audit and gap diagnosis Task: Plan and prepare mock audit and gap diagnosis Plan mock audit and gap diagnosis — step 2 of 10 in UMS037 Mock Audit, Pre-Certification, and Gap Diagnosis.	Compliance Officer Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-016.3	Conduct mock audit and gap diagnosis Task: Plan and prepare mock audit and gap diagnosis Conduct mock audit and gap diagnosis — step 3 of 10 in UMS037 Mock Audit, Pre-Certification, and Gap Diagnosis.	Compliance Officer Execution	What was done: Conduct mock audit and gap diagnosis carried out on service delivery; Mock audit report updated. Records that prove it: Conduct mock audit and gap diagnosis Completion (%): 100
MP-016.4	Identify mock audit and gap diagnosis findings Task: Plan and prepare mock audit and gap diagnosis Identify mock audit and gap diagnosis findings — step 4 of 10 in UMS037 Mock Audit, Pre-Certification, and Gap Diagnosis.	Compliance Officer Register items	Items identified: 3 rows — see the table below
MP-016.5	Categorize mock audit and gap diagnosis Task: Execute mock audit and gap diagnosis activities Categorize mock audit and gap diagnosis — step 5 of 10 in UMS037 Mock Audit, Pre-Certification, and Gap Diagnosis.	Compliance Officer Execution	What was done: Categorize mock audit and gap diagnosis carried out on service delivery; Mock audit report updated. Records that prove it: Conduct mock audit and gap diagnosis Completion (%): 100
MP-016.6	Validate mock audit and gap diagnosis Task: Execute mock audit and gap diagnosis activities Validate mock audit and gap diagnosis — step 6 of 10 in UMS037 Mock Audit, Pre-Certification, and Gap Diagnosis.	Compliance Officer Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Compliance Officer Decision comment and conditions: Mock audit report approved against ISO 9001; no blocking point.
MP-016.7	Issue mock audit and gap diagnosis report Task: Execute mock audit and gap diagnosis activities Issue mock audit and gap diagnosis report — step 7 of 10 in UMS037 Mock Audit, Pre-Certification, and Gap Diagnosis.	Compliance Officer Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QMS-UMS037-07 Version: 1.0 Content summary: Mock audit report for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QMS-PROC-01 — Procedure — Context To Strategy
MP-016.8	Present mock audit and gap diagnosis Task: Verify, record and close mock audit and gap diagnosis Present mock audit and gap diagnosis — step 8 of 10 in UMS037 Mock Audit, Pre-Certification, and Gap Diagnosis.	Compliance Officer Communication	Communication records: 2 rows — see the table below
MP-016.9	Define mock audit and gap diagnosis plans Task: Verify, record and close mock audit and gap diagnosis Define mock audit and gap diagnosis plans — step 9 of 10 in UMS037 Mock Audit, Pre-Certification, and Gap Diagnosis.	Compliance Officer Plan	Planned activities (become actions): 1 row — see the table below On completion: rows become actions.
MP-016.10	Monitor mock audit and gap diagnosis Task: Verify, record and close mock audit and gap diagnosis	Compliance Officer Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.

Step	Step, task and purpose	Role · form	What to type
	Monitor mock audit and gap diagnosis — step 10 of 10 in UMS037 Mock Audit, Pre-Certification, and Gap Diagnosis.		

MP-016.1 — Define mock audit and gap diagnosis scope · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Mock audit report	Output	Affects Mock audit report; followed by Compliance Officer.	High	Customer complaint log, Feb 2026
2	Findings log	Output	Affects Findings log; followed by Compliance Officer.	Medium	Internal audit report, Feb 2026
3	Corrective action plans	Output	Affects Mock audit report; followed by Compliance Officer.	Medium	Process performance dashboard, Feb 2026

MP-016.2 — Plan mock audit and gap diagnosis · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Conduct mock audit and gap diagnosis	Hind Berrada	2026-03-13	2026-03-27	Mock audit report
2	Identify mock audit and gap diagnosis findings	Hind Berrada	2026-03-18	2026-04-06	Findings log
3	Categorize mock audit and gap diagnosis	Hind Berrada	2026-03-23	2026-04-16	Mock audit report

MP-016.4 — Identify mock audit and gap diagnosis findings · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Job sheet not signed	Nonconformity	Affects Mock audit report; followed by Compliance Officer.	High	Interview with the process owner, Jan 2026
2	Quote error	Nonconformity	Affects Findings log; followed by Compliance Officer.	Medium	Regulatory watch bulletin, Jan 2026
3	Late completion	Nonconformity	Affects Mock audit report; followed by Compliance Officer.	Medium	Supplier evaluation file, Jan 2026

MP-016.6 — Validate mock audit and gap diagnosis · Decision criteria checked

#	Criterion	Met	Evidence
1	Mock audit report complete	Yes	Mock audit report v1.0
2	Requirements of ISO 9001 §9.2 met	Yes	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

MP-016.8 — Present mock audit and gap diagnosis · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	Top mgmt	Meeting	2026-03-13	Mock audit report: what changes for you and what to do by 2026-03-27.	Compliance Officer
2	Certification body	E-mail	2026-03-15	Findings log: what changes for you and what to do by 2026-03-27.	Compliance Officer

MP-016.9 — Define mock audit and gap diagnosis plans · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Monitor mock audit and gap diagnosis	Hind Berrada	2026-03-18	2026-04-01	Mock audit report

MP-016.10 — Monitor mock audit and gap diagnosis · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Mock audit report); it is the KPI its owner reviews at each Monthly review.	81.5	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Mock audit report); it is the KPI its owner reviews at each Monthly review.	94.4	>= 95%

UMS038 (MP-017) — Certification Audit Preparation and Coordination

Select certifier; coordinate dates; support audit; obtain certification. Owner: Compliance Officer. Tier 1. Requirements answered: ISO/IEC 17021-1 (certification audit).

Step	Step, task and purpose	Role · form	What to type
MP-017.1	Select certification audit certifier Task: Plan and prepare certification audit Select certification audit certifier — step 1 of 10 in UMS038 Certification Audit Preparation and Coordination.	Compliance Officer Register items	Items identified: 3 rows — see the table below
MP-017.2	Coordinate certification audit dates Task: Plan and prepare certification audit Coordinate certification audit dates — step 2 of 10 in UMS038 Certification Audit Preparation and Coordination.	Compliance Officer Execution	What was done: Coordinate certification audit dates carried out on service delivery; Certification report updated. Records that prove it: CERT-1 — ISO 9001 Completion (%): 100
MP-017.3	Prepare certification audit dossiers Task: Plan and prepare certification audit Prepare certification audit dossiers — step 3 of 10 in UMS038 Certification Audit Preparation and Coordination.	Compliance Officer Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QMS-UMS038-03 Version: 1.1 Content summary: Certification report for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QMS-PROC-01 — Procedure — Context To Strategy
MP-017.4	Designate certification audit accompanists Task: Plan and prepare certification audit Designate certification audit accompanists — step 4 of 10 in UMS038 Certification Audit Preparation and Coordination.	Compliance Officer Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-017.5	Monitor certification audit activities Task: Execute certification audit activities Monitor certification audit — step 5 of 10 in UMS038 Certification Audit Preparation and Coordination.	Compliance Officer Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-017.6	Analyze certification audit findings Task: Execute certification audit activities Analyze certification audit findings — step 6 of 10 in UMS038 Certification Audit Preparation and Coordination.	Compliance Officer Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.6 Conclusion: Weighted score 3.6/5. Main gap: Strategic (market, customer loss). Action recorded in the action plan.

Step	Step, task and purpose	Role · form	What to type
MP-017.7	Validate certification audit findings Task: Execute certification audit activities Validate certification audit findings — step 7 of 10 in UMS038 Certification Audit Preparation and Coordination.	Compliance Officer Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Compliance Officer Decision comment and conditions: Certification report approved against ISO 9001; no blocking point.
MP-017.8	Correct certification audit immediately Task: Verify, record and close certification audit Correct certification audit immediately — step 8 of 10 in UMS038 Certification Audit Preparation and Coordination.	Compliance Officer Change	Change made: Certification report updated: quote error. Reason: Finding of the internal audit Documents or records updated: CERT-1 — ISO 9001; Monitor certification audit
MP-017.9	Close and obtain Task: Verify, record and close certification audit Close and obtain — step 9 of 10 in UMS038 Certification Audit Preparation and Coordination.	Compliance Officer Decision	Decision criteria checked: 3 rows — see the table below Decision: Hold Approver (Accountable): Compliance Officer Decision comment and conditions: Hold until Certificate is complete; review in two weeks.
MP-017.10	Celebrate certification audit achievements Task: Verify, record and close certification audit Celebrate certification audit achievements — step 10 of 10 in UMS038 Certification Audit Preparation and Coordination.	Compliance Officer Execution	What was done: Celebrate certification audit achievements carried out on service delivery; Certification report updated. Records that prove it: CERT-1 — ISO 9001; Monitor certification audit Completion (%): 100

MP-017.1 — Select certification audit certifier · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence

UMS021 (MP-025) — Monitoring and Measurement Resources Control

Inventory equipment; plan/execute calibration; assess impact; maintain records. Owner: Quality Manager.
Tier 1. Requirements answered: ISO 9001 §7.1.5.

Documents of this macro process: AT-UNI-QMS-CAL (Monitoring and measuring equipment register).

Step	Step, task and purpose	Role · form	What to type
MP-025.1	Inventory measuring equipment Task: Plan and prepare measuring equipment Inventory measuring equipment — step 1 of 8 in UMS021 Monitoring and Measurement Resources Control.	Quality Manager Execution	What was done: Inventory measuring equipment carried out on service delivery; Equipment register updated. Records that prove it: AT-UNI-QMS-CAL — Monitoring and measuring equipment register; EQ-01 — Torque wrench 5–60 N·m; EQ-02 — Digital caliper 0–150 mm Completion (%): 100
MP-025.2	Establish measuring equipment schedules Task: Plan and prepare measuring equipment Establish measuring equipment schedules — step 2 of 8 in UMS021 Monitoring and Measurement Resources Control.	Quality Manager Execution	What was done: Establish measuring equipment schedules carried out on service delivery; Equipment register updated. Records that prove it: AT-UNI-QMS-CAL — Monitoring and measuring equipment register; EQ-01 — Torque wrench 5–60 N·m; EQ-02 — Digital caliper 0–150 mm Completion (%): 100
MP-025.3	Perform measuring equipment calibration Task: Plan and prepare measuring equipment Perform measuring equipment calibration — step 3 of 8 in UMS021 Monitoring and Measurement Resources Control.	Quality Manager Execution	What was done: Perform measuring equipment calibration carried out on service delivery; Equipment register updated. Records that prove it: AT-UNI-QMS-CAL — Monitoring and measuring equipment register; EQ-01 — Torque wrench 5–60 N·m; EQ-02 — Digital caliper 0–150 mm Completion (%): 100
MP-025.4	Label calibration status on equipment Task: Execute measuring equipment activities Label calibration status on equipment — step 4 of 8 in UMS021 Monitoring and Measurement Resources Control.	Quality Manager Execution	What was done: Label calibration status on equipment carried out on service delivery; Equipment register updated. Records that prove it: AT-UNI-QMS-CAL — Monitoring and measuring equipment register; EQ-01 — Torque wrench 5–60 N·m; EQ-02 — Digital caliper 0–150 mm Completion (%): 100
MP-025.5	Adjust and correct measuring equipment Task: Execute measuring equipment activities Adjust and correct measuring equipment — step 5 of 8 in UMS021 Monitoring and Measurement Resources Control.	Quality Manager Change	Change made: Equipment register updated: Strategic (market, customer loss). Reason: Decision of the management review Documents or records updated: AT-UNI-QMS-CAL — Monitoring and measuring equipment register; EQ-01 — Torque wrench 5–60 N·m; EQ-02 — Digital caliper 0–150 mm
MP-025.6	Assess measuring equipment impact Task: Execute measuring equipment activities Assess measuring equipment impact — step 6 of 8 in UMS021 Monitoring and Measurement Resources Control.	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.4 Conclusion: Weighted score 3.4/5. Main gap: Operational (process failure, supply chain). Action recorded in the action plan.
MP-025.7	Maintain measuring equipment records Task: Verify, record and close measuring equipment Maintain measuring equipment records — step 7 of 8 in UMS021 Monitoring and Measurement Resources Control.	Quality Manager Document	Document template: TPL-CAL — Monitoring and measuring equipment register Document reference: AT-UNI-QMS-UMS021-07 Version: 1.1 Content summary: Equipment register for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QMS-CAL — Monitoring and measuring equipment register
MP-025.8	Handle measuring equipment nonconforming Task: Verify, record and close measuring equipment Handle measuring equipment nonconforming — step 8 of 8 in UMS021 Monitoring and	Quality Manager Execution	What was done: Handle measuring equipment nonconforming carried out on service delivery; Equipment register updated. Records that prove it: AT-UNI-QMS-CAL — Monitoring and measuring equipment register; EQ-01 — Torque wrench 5–60 N·m; EQ-02 — Digital caliper 0–150 mm Completion (%): 100

Step	Step, task and purpose	Role · form	What to type
	Measurement Resources Control.		

MP-025.6 — Assess measuring equipment impact · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Equipment register complete and up to date	30	3	Equipment register reviewed on 2026-04-26; 2 gaps corrected.
2	Requirements of ISO 9001 §7.1.5 met	30	3	Checked against ISO 9001 §7.1.5 with the checklist of the phase gate.
3	Evidence available for Calibration records	20	5	Records filed in the project: Calibration records.
4	Results against target	20	3	KPI Q-KPI-01 used as the measure.

UMS001 (MP-029) — Documentary Lifecycle Control

Define metadata; manage approval; control versions; archive obsolete. Owner: Document Controller. Tier 1. Requirements answered: ISO 9001 §7.5.2, §7.5.3.

Documents of this macro process: AT-UNI-QMS-DOCLIST (Master list of documented information).

Step	Step, task and purpose	Role · form	What to type
MP-029.1	Define controlled documents metadata Task: Plan and prepare controlled documents Define controlled documents metadata — step 1 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Register items	Items identified: 3 rows — see the table below
MP-029.2	Identify controlled documents workflow Task: Plan and prepare controlled documents Identify controlled documents workflow — step 2 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Register items	Items identified: 3 rows — see the table below
MP-029.3	Draft controlled documents Task: Plan and prepare controlled documents Draft controlled documents — step 3 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Document	Document template: TPL-DOCLIST — Master list of documented information Document reference: AT-UNI-QMS-UMS001-03 Version: 2.0 Content summary: Controlled documents for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QMS-DOCLIST — Master list of documented information
MP-029.4	Peer-review draft documents Task: Plan and prepare controlled documents Peer-review draft documents — step 4 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Execution	What was done: Peer-review draft documents carried out on service delivery; Controlled documents updated. Records that prove it: AT-UNI-QMS-DOCLIST — Master list of documented information Completion (%): 100
MP-029.5	Check controlled documents compliance Task: Execute controlled documents activities Check controlled documents compliance — step 5 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.5 Conclusion: Weighted score 4.5/5. Main gap: job sheet not signed. Action recorded in the action plan.
MP-029.6	Verify controlled documents versions	Document Controller	Decision matrix: 4 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	Task: Execute controlled documents activities Verify controlled documents versions — step 6 of 18 in UMS001 Documentary Lifecycle Control.	Assessment	Weighted score (1–5): 3.7 Conclusion: Weighted score 3.7/5. Main gap: Strategic (market, customer loss). Action recorded in the action plan.
MP-029.7	Approve and publish controlled documents Task: Execute controlled documents activities Approve and publish controlled documents — step 7 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Document Controller Decision comment and conditions: Controlled documents approved against ISO 9001; no blocking point.
MP-029.8	Distribute controlled documents Task: Execute controlled documents activities Distribute controlled documents — step 8 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Communication	Communication records: 2 rows — see the table below
MP-029.9	Archive obsolete controlled documents Task: Verify, record and close controlled documents Archive obsolete controlled documents — step 9 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Closure	Closure evidence: Controlled documents closed; effectiveness verified on the KPI and evidence filed. Records that prove effectiveness: AT-UNI-QMS-DOCLIST — Master list of documented information Closure date: 2026-05-05
MP-029.10	Schedule controlled documents reminders Task: Verify, record and close controlled documents Schedule controlled documents reminders — step 10 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-029.11	Certify controlled documents acknowledgment Task: Verify, record and close controlled documents Certify controlled documents acknowledgment — step 11 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Document Controller Decision comment and conditions: Controlled documents approved against ISO 9001; no blocking point.
MP-029.12	Submit document for review Task: Control Versions of Governed Documents Submit document for review — step 12 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Execution	What was done: Submit document for review carried out on service delivery; Controlled documents updated. Records that prove it: AT-UNI-QMS-DOCLIST — Master list of documented information; Certify controlled documents acknowledgment Completion (%): 100
MP-029.13	Approve and release version Task: Control Versions of Governed Documents Approve and release version — step 13 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Document Controller Decision comment and conditions: Controlled documents approved against ISO 9001; no blocking point.
MP-029.14	Publish and notify Task: Control Versions of Governed Documents Publish and notify — step 14 of 18 in UMS001 Documentary Lifecycle Control.	DynamicMS Engine Automated service task	System result confirmed: Publish and notify: done by the DynamicMS Engine; Controlled documents available in the project. Records produced: AT-UNI-QMS-DOCLIST — Master list of documented information; Certify controlled documents acknowledgment
MP-029.15	Supersede and archive previous version Task: Control Versions of Governed Documents Supersede and archive previous version — step 15 of 18 in UMS001 Documentary Lifecycle Control.	DynamicMS Engine Automated service task	System result confirmed: Supersede and archive previous version: done by the DynamicMS Engine; Controlled documents available in the project. Records produced: AT-UNI-QMS-DOCLIST — Master list of documented information; Certify controlled documents acknowledgment

Step	Step, task and purpose	Role · form	What to type
MP-029.16	Customize document template Task: Customize & Generate Downloadable Files Customize document template — step 16 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Change	Change made: Controlled documents updated: quote error. Reason: Finding of the internal audit Documents or records updated: AT-UNI-QMS-DOCLIST — Master list of documented information; Certify controlled documents acknowledgment
MP-029.17	Generate files in selected formats Task: Customize & Generate Downloadable Files Generate files in selected formats — step 17 of 18 in UMS001 Documentary Lifecycle Control.	DynamicMS Engine Automated service task	System result confirmed: Generate files in selected formats: done by the DynamicMS Engine; Controlled documents available in the project. Records produced: AT-UNI-QMS-DOCLIST — Master list of documented information; Certify controlled documents acknowledgment
MP-029.18	Download or share generated file Task: Customize & Generate Downloadable Files Download or share generated file — step 18 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Execution	What was done: Download or share generated file carried out on service delivery; Controlled documents updated. Records that prove it: AT-UNI-QMS-DOCLIST — Master list of documented information; Certify controlled documents acknowledgment Completion (%): 100

MP-029.1 — Define controlled documents metadata · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Controlled documents	Output	Affects Controlled documents; followed by Document Controller.	High	Customer complaint log, Apr 2026
2	Approval records	Output	Affects Approval records; followed by Document Controller.	Medium	Internal audit report, Apr 2026
3	Distribution records	Output	Affects Controlled documents; followed by Document Controller.	Medium	Process performance dashboard, Mar 2026

MP-029.2 — Identify controlled documents workflow · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Controlled documents	Output	Affects Controlled documents; followed by Document Controller.	High	Internal audit report, Apr 2026
2	Approval records	Output	Affects Approval records; followed by Document Controller.	Medium	Process performance dashboard, Mar 2026
3	Distribution records	Output	Affects Controlled documents; followed by Document Controller.	Medium	Interview with the process owner, Mar 2026

MP-029.5 — Check controlled documents compliance · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Controlled documents complete and up to date	30	4	Controlled documents reviewed on 2026-04-30; 2 gaps corrected.
2	Requirements of ISO 9001 §7.5.2, §7.5.3 met	30	5	Checked against ISO 9001 §7.5.2, §7.5.3 with the checklist of the phase gate.
3	Evidence available for Approval records	20	5	Records filed in the project: Approval records.
4	Results against target	20	4	KPI KPI-10 used as the measure.

UMS047 (MP-030) — Records Lifecycle, Retention, and Evidence Governance

Define retention; implement disposal; manage legal holds; produce admissible evidence. Owner: Document Controller. Tier 1. Requirements answered: ISO 9001 §7.5.3.

Step	Step, task and purpose	Role · form	What to type
MP-030.1	Define records and evidence types/retention Task: Plan and prepare records and evidence Define records and evidence types/retention — step 1 of 9 in UMS047 Records Lifecycle, Retention, and Evidence Governance.	Document Controller Register items	Items identified: 3 rows — see the table below
MP-030.2	Designate owners of records and evidence Task: Plan and prepare records and evidence Designate owners of records and evidence — step 2 of 9 in UMS047 Records Lifecycle, Retention, and Evidence Governance.	Document Controller Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-030.3	Implement records and evidence rules Task: Plan and prepare records and evidence Implement records and evidence rules — step 3 of 9 in UMS047 Records Lifecycle, Retention, and Evidence Governance.	Document Controller Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-030.4	Manage records and evidence holds Task: Execute records and evidence activities Manage records and evidence holds — step 4 of 9 in UMS047 Records Lifecycle, Retention, and Evidence Governance.	Document Controller Execution	What was done: Manage records and evidence holds carried out on service delivery; Retention schedules updated. Records that prove it: Implement records and evidence rules Completion (%): 100
MP-030.5	Maintain records and evidence custody Task: Execute records and evidence activities Maintain records and evidence custody — step 5 of 9 in UMS047 Records Lifecycle, Retention, and Evidence Governance.	Document Controller Execution	What was done: Maintain records and evidence custody carried out on service delivery; Retention schedules updated. Records that prove it: Implement records and evidence rules Completion (%): 100
MP-030.6	Validate records and evidence authenticity Task: Execute records and evidence activities Validate records and evidence authenticity — step 6 of 9 in UMS047 Records Lifecycle, Retention, and Evidence Governance.	Document Controller Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Document Controller Decision comment and conditions: Retention schedules approved against ISO 9001; no blocking point.
MP-030.7	Conduct records and evidence audits Task: Verify, record and close records and evidence Conduct records and evidence audits — step 7 of 9 in UMS047 Records Lifecycle, Retention, and Evidence Governance.	Document Controller Execution	What was done: Conduct records and evidence audits carried out on service delivery; Retention schedules updated. Records that prove it: Implement records and evidence rules Completion (%): 100
MP-030.8	Dispose records and evidence expired Task: Verify, record and close records and evidence Dispose records and evidence expired — step 8 of 9 in UMS047 Records Lifecycle, Retention, and Evidence Governance.	Document Controller Closure	Closure evidence: Retention schedules closed; effectiveness verified on the KPI and evidence filed. Records that prove effectiveness: Implement records and evidence rules Closure date: 2026-05-17

Step	Step, task and purpose	Role · form	What to type
MP-030.9	Produce records and evidence Task: Verify, record and close records and evidence Produce records and evidence — step 9 of 9 in UMS047 Records Lifecycle, Retention, and Evidence Governance.	Document Controller Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QMS-UMS047-09 Version: 2.0 Content summary: Retention schedules for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QMS-PROC-01 — Procedure — Context To Strategy

MP-030.1 — Define records and evidence types/retention · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Retention schedules	Output	Affects Retention schedules; followed by Document Controller.	High	Customer complaint log, Apr 2026
2	Disposal records	Output	Affects Disposal records; followed by Document Controller.	Medium	Internal audit report, Apr 2026
3	Legal hold records	Output	Affects Retention schedules; followed by Document Controller.	Medium	Process performance dashboard, Apr 2026

MP-030.2 — Designate owners of records and evidence · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Implement records and evidence rules	Samira Benali	2026-05-15	2026-05-29	Retention schedules
2	Manage records and evidence holds	Samira Benali	2026-05-20	2026-06-08	Disposal records
3	Maintain records and evidence custody	Samira Benali	2026-05-25	2026-06-18	Retention schedules

MP-030.3 — Implement records and evidence rules · Settings

#	Setting	Value	Reason
1	Implement records and evidence rules	Enabled for service delivery	Needed to produce Retention schedules
2	Owner and notification	Document Controller	Alerts go to the process owner

MP-030.6 — Validate records and evidence authenticity · Decision criteria checked

#	Criterion	Met	Evidence
1	Retention schedules complete	Yes	Retention schedules v1.0
2	Requirements of ISO 9001 §7.5.3 met	Yes	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

DMS084 (MP-145) — SME Document Template Library

Ready-to-use templates; reduce burden; ensure compliance. Owner: Document Controller. Tier 7. Requirements answered: ISO 9001 §7.5.

Step	Step, task and purpose	Role · form	What to type
MP-145.1	Browse SME document templates Task: Plan and prepare SME document templates Browse SME document templates —	Document Controller Execution	What was done: Browse SME document templates carried out on service delivery; Customized docs updated. Records that prove it: — Completion (%): 100

DMS087 (MP-148) — SME Multi-Role User Management

Support multi-role; simplify management; ensure access. Owner: Tenant Administrator. Tier 7.

Step	Step, task and purpose	Role · form	What to type
MP-148.1	Define SME user roles Task: Plan and prepare SME user roles Define SME user roles — step 1 of 10 in DMS087 SME Multi-Role User Management.	Tenant Administrator Register items	Items identified: 3 rows — see the table below
MP-148.2	Assign SME user roles multiple Task: Plan and prepare SME user roles Assign SME user roles multiple — step 2 of 10 in DMS087 SME Multi-Role User Management.	Tenant Administrator Assignment	Role: Tenant Administrator Person (from the OBS): Hugo Lefevre Organization units covered: Information Technology RACSI of the macro process: R: Tenant Administrator · A: IMS Manager · C: Risk Manager · S: Document Controller · I: Top Management
MP-148.3	Configure SME user roles permissions Task: Plan and prepare SME user roles Configure SME user roles permissions — step 3 of 10 in DMS087 SME Multi-Role User Management.	Tenant Administrator Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-148.4	Set up delegation Task: Plan and prepare SME user roles Set up delegation — step 4 of 10 in DMS087 SME Multi-Role User Management.	Tenant Administrator Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-148.5	Manage SME user roles lifecycle Task: Execute SME user roles activities Manage SME user roles lifecycle — step 5 of 10 in DMS087 SME Multi-Role User Management.	Tenant Administrator Execution	What was done: Manage SME user roles lifecycle carried out on service delivery; User accounts updated. Records that prove it: — Completion (%): 100
MP-148.6	Handle SME user roles conflicts Task: Execute SME user roles activities Handle SME user roles conflicts — step 6 of 10 in DMS087 SME Multi-Role User Management.	Tenant Administrator Execution	What was done: Handle SME user roles conflicts carried out on service delivery; User accounts updated. Records that prove it: — Completion (%): 100
MP-148.7	Review SME user roles access Task: Execute SME user roles activities Review SME user roles access — step 7 of 10 in DMS087 SME Multi-Role User Management.	Tenant Administrator Execution	What was done: Review SME user roles access carried out on service delivery; User accounts updated. Records that prove it: — Completion (%): 100
MP-148.8	Update SME user roles Task: Verify, record and close SME user roles Update SME user roles — step 8 of 10 in DMS087 SME Multi-Role User Management.	Tenant Administrator Change	Change made: User accounts updated; quote error. Reason: Finding of the internal audit Documents or records updated: —
MP-148.9	Report SME user roles compliance Task: Verify, record and close SME user roles Report SME user roles compliance — step 9 of 10 in DMS087 SME Multi-Role User Management.	Tenant Administrator Communication	Communication records: 2 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
MP-148.10	Archive SME user roles Task: Verify, record and close SME user roles Archive SME user roles — step 10 of 10 in DMS087 SME Multi-Role User Management.	Tenant Administrator Closure	Closure evidence: User accounts closed; effectiveness verified on the KPI and evidence filed. Records that prove effectiveness: — Closure date: 2026-05-28

MP-148.1 — Define SME user roles · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	User accounts	Output	Affects User accounts; followed by Tenant Administrator.	High	Customer complaint log, May 2026
2	Role assignments	Output	Affects Role assignments; followed by Tenant Administrator.	Medium	Internal audit report, Apr 2026
3	Permissions	Output	Affects User accounts; followed by Tenant Administrator.	Medium	Process performance dashboard, Apr 2026

MP-148.3 — Configure SME user roles permissions · Settings

#	Setting	Value	Reason
1	Configure SME user roles permissions	Enabled for service delivery	Needed to produce User accounts
2	Owner and notification	Tenant Administrator	Alerts go to the process owner

MP-148.4 — Set up delegation · Settings

#	Setting	Value	Reason
1	Set up delegation	Enabled for service delivery	Needed to produce User accounts
2	Owner and notification	Tenant Administrator	Alerts go to the process owner

MP-148.9 — Report SME user roles compliance · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	SME employees	E-mail	2026-05-26	User accounts: what changes for you and what to do by 2026-06-09.	Tenant Administrator
2	SME management	Intranet	2026-05-28	Role assignments: what changes for you and what to do by 2026-06-09.	Tenant Administrator

This phase has no gate for the project track; it closes when its last step is completed.

E2E-08 — Requirements To Delivery

Goals: Transform requirements into delivered products/services

From trigger to terminal event: Customer order, production plan, supplier onboarding, welding requirement, laboratory test, or eco-design → Products/services delivered; suppliers controlled; traceability ensured; quality validated; LCA completed

DMS094 (MP-155) — SME Informal Process Digitization

Digitize informal processes; capture tribal knowledge; create repeatable. Owner: Process Excellence Manager. Tier 7.

Step	Step, task and purpose	Role · form	What to type
MP-155.1	Identify informal processes Task: Plan and prepare informal processes Identify informal processes — step 1 of 10 in DMS094 SME Informal Process Digitization.	Process Excellence Manager Register items	Items identified: 3 rows — see the table below
MP-155.2	Interview informal processes stakeholders Task: Plan and prepare informal processes Interview informal processes stakeholders — step 2 of 10 in DMS094 SME Informal Process Digitization.	Process Excellence Manager Execution	What was done: Interview informal processes stakeholders carried out on service delivery; Digitized processes updated. Records that prove it: — Completion (%): 100
MP-155.3	Document the process control plan Task: Plan and prepare informal processes Document the process control plan — step 3 of 10 in DMS094 SME Informal Process Digitization.	Process Excellence Manager Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QMS-DMS094-03 Version: 1.0 Content summary: Digitized processes for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QMS-PROC-01 — Procedure — Context To Strategy
MP-155.4	Identify informal processes improvements Task: Plan and prepare informal processes Identify informal processes improvements — step 4 of 10 in DMS094 SME Informal Process Digitization.	Process Excellence Manager Register items	Items identified: 3 rows — see the table below
MP-155.5	Design informal processes digital Task: Execute informal processes activities Design informal processes digital — step 5 of 10 in DMS094 SME Informal Process Digitization.	Process Excellence Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-155.6	Configure informal processes Task: Execute informal processes activities Configure informal processes — step 6 of 10 in DMS094 SME Informal Process Digitization.	Process Excellence Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-155.7	Train staff on informal processes Task: Execute informal processes activities Train staff on informal processes — step 7 of 10 in DMS094 SME Informal Process Digitization.	Process Excellence Manager Training	Session / module: Train staff on informal processes — practice session Date: 2026-06-01 Units trained: Quality Participants: 7 Effectiveness evaluation method: On-the-job observation Effectiveness (%): 92
MP-155.8	Monitor informal processes adoption Task: Verify, record and close informal processes Monitor informal processes adoption — step 8 of 10 in DMS094 SME Informal Process Digitization.	Process Excellence Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-155.9	Refine informal processes Task: Verify, record and close informal processes Refine informal processes — step 9 of 10 in DMS094 SME Informal Process Digitization.	Process Excellence Manager Change	Change made: Digitized processes updated: Strategic (market, customer loss). Reason: Decision of the management review Documents or records updated: Configure informal processes
MP-155.10	Document informal processes lessons Task: Verify, record and close	Process Excellence Manager	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QMS-DMS094-10

Step	Step, task and purpose	Role · form	What to type
	informal processes Document informal processes lessons — step 10 of 10 in DMS094 SME Informal Process Digitization.	Document	Version: 1.0 Content summary: Digitized processes for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QMS-PROC-01 — Procedure — Context To Strategy

MP-155.1 — Identify informal processes · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Digitized processes	Output	Affects Digitized processes; followed by Process Excellence Manager.	High	Customer complaint log, May 2026
2	Documentation	Output	Affects Documentation; followed by Process Excellence Manager.	Medium	Internal audit report, May 2026
3	Training records	Output	Affects Digitized processes; followed by Process Excellence Manager.	Medium	Process performance dashboard, Apr 2026

MP-155.4 — Identify informal processes improvements · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Digitize technical services records to cut cycle time	Opportunity	Affects Digitized processes; followed by Process Excellence Manager.	High	Interview with the process owner, Apr 2026
2	Extend certification to win technical services tenders	Opportunity	Affects Documentation; followed by Process Excellence Manager.	Medium	Regulatory watch bulletin, Apr 2026
3	Supplier development programme for technical services	Opportunity	Affects Digitized processes; followed by Process Excellence Manager.	Medium	Supplier evaluation file, Mar 2026

MP-155.5 — Design informal processes digital · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Configure informal processes	Nadia Chraibi	2026-05-31	2026-06-14	Digitized processes
2	Train staff on informal processes	Nadia Chraibi	2026-06-05	2026-06-24	Documentation
3	Monitor informal processes adoption	Nadia Chraibi	2026-06-10	2026-07-04	Digitized processes

MP-155.6 — Configure informal processes · Settings

#	Setting	Value	Reason
1	Configure informal processes	Enabled for service delivery	Needed to produce Digitized processes
2	Owner and notification	Process Excellence Manager	Alerts go to the process owner

MP-155.8 — Monitor informal processes adoption · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Digitized processes); it is the KPI its owner reviews at each Monthly review.	81.5	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Digitized processes); it is the KPI its	94.4	>= 95%

#	KPI	Why this KPI for this step	Measured value	Target
		owner reviews at each Monthly review.		

This phase has no gate for the project track; it closes when its last step is completed.

E2E-09 — Verification To Preparedness

Goals: Detect, contain, resolve, capitalize nonconformities and problems

From trigger to terminal event: Nonconformity detected, incident reported, or problem identified
→ Problem resolved; REX capitalized; KB updated

UMS011 (MP-018) — Problem Capture and Definition

Capture NCs; define criticality; analyze 5W2H; classify and approve. Owner: Quality Manager. Tier 1. Requirements answered: ISO 9001 §10.2.1.

Documents of this macro process: AT-UNI-QMS-NCO (Nonconforming outputs register).

Step	Step, task and purpose	Role · form	What to type
MP-018.1	Create quality problem record Task: Plan and prepare quality problem Create quality problem record — step 1 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Execution	What was done: Create quality problem record carried out on service delivery; NC record updated. Records that prove it: AT-UNI-QMS-NCO — Nonconforming outputs register; NCO-01 — job sheet not signed; NCO-02 — quote error Completion (%): 100
MP-018.2	Enter quality problem data Task: Plan and prepare quality problem Enter quality problem data — step 2 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Execution	What was done: Enter quality problem data carried out on service delivery; NC record updated. Records that prove it: AT-UNI-QMS-NCO — Nonconforming outputs register; NCO-01 — job sheet not signed; NCO-02 — quote error Completion (%): 100
MP-018.3	Define quality problem criticality Task: Plan and prepare quality problem Define quality problem criticality — step 3 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Register items	Items identified: 3 rows — see the table below
MP-018.4	Designate quality problem team Task: Plan and prepare quality problem Designate quality problem team — step 4 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-018.5	Submit quality problem Task: Execute quality problem activities Submit quality problem — step 5 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Execution	What was done: Submit quality problem carried out on service delivery; NC record updated. Records that prove it: AT-UNI-QMS-NCO — Nonconforming outputs register; NCO-01 — job sheet not signed; NCO-02 — quote error; Submit quality problem Completion (%): 100
MP-018.6	Analyze quality problem 5W2H Task: Execute quality problem activities Analyze quality problem 5W2H — step 6 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.3 Conclusion: Weighted score 4.3/5. Main gap: job sheet not signed. Action recorded in the action plan.
MP-018.7	Quantify quality problem gap Task: Execute quality problem activities Quantify quality problem gap — step 7 of 12 in UMS011 Problem Capture	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.3 Conclusion: Weighted score 4.3/5. Main gap: Strategic (market, customer loss). Action recorded in the action plan.

Step	Step, task and purpose	Role · form	What to type
	and Definition.		
MP-018.8	Identify quality problem standards Task: Execute quality problem activities Identify quality problem standards — step 8 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Register items	Items identified: 1 row — see the table below
MP-018.9	Classify quality problem polarity Task: Verify, record and close quality problem Classify quality problem polarity — step 9 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.5 Conclusion: Weighted score 4.5/5. Main gap: Strategic (market, customer loss). Action recorded in the action plan.
MP-018.10	Review quality problem Task: Verify, record and close quality problem Review quality problem — step 10 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Review	Review frequency: Quarterly Review date: 2026-06-07 Next review: 2026-09-06 Chaired by: Quality Manager Participants: Quality Manager, IMS Manager Inputs reviewed: 3 rows — see the table below Decisions and actions: 1 row — see the table below On completion: rows become actions.
MP-018.11	Approve quality problem Task: Verify, record and close quality problem Approve quality problem — step 11 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Quality Manager Decision comment and conditions: NC record approved against ISO 9001; no blocking point.
MP-018.12	Transmit quality problem Task: Verify, record and close quality problem Transmit quality problem — step 12 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Communication	Communication records: 2 rows — see the table below

MP-018.3 — Define quality problem criticality · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	NC record	Output	Affects NC record; followed by Quality Manager.	High	Process performance dashboard, May 2026
2	Problem definition	Output	Affects Problem definition; followed by Quality Manager.	Medium	Interview with the process owner, Apr 2026
3	Priority classification	Output	Affects NC record; followed by Quality Manager.	Medium	Regulatory watch bulletin, Apr 2026

MP-018.4 — Designate quality problem team · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Submit quality problem	Julien Moreau	2026-06-03	2026-06-17	NC record
2	Analyze quality problem 5W2H	Julien Moreau	2026-06-08	2026-06-27	Problem definition
3	Quantify quality problem gap	Julien Moreau	2026-06-13	2026-07-07	NC record

MP-018.6 — Analyze quality problem 5W2H · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	NC record complete and up to date	30	5	NC record reviewed on 2026-06-01; 2 gaps corrected.
2	Requirements of ISO 9001 §10.2.1 met	30	4	Checked against ISO 9001 §10.2.1 with the checklist of the phase gate.
3	Evidence available for Problem definition	20	3	Records filed in the project: Problem definition.
4	Results against target	20	5	KPI Q-KPI-01 used as the measure.

MP-018.7 — Quantify quality problem gap · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	NC record complete and up to date	30	4	NC record reviewed on 2026-06-01; 2 gaps corrected.
2	Requirements of ISO 9001 §10.2.1 met	30	5	Checked against ISO 9001 §10.2.1 with the checklist of the phase gate.
3	Evidence available for Problem definition	20	3	Records filed in the project: Problem definition.
4	Results against target	20	5	KPI Q-KPI-01 used as the measure.

MP-018.8 — Identify quality problem standards · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	ISO 9001	Requirement	Affects NC record; followed by Quality Manager.	High	Customer complaint log, Mar 2026

MP-018.9 — Classify quality problem polarity · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	NC record complete and up to date	30	4	NC record reviewed on 2026-06-03; 2 gaps corrected.
2	Requirements of ISO 9001 §10.2.1 met	30	5	Checked against ISO 9001 §10.2.1 with the checklist of the phase gate.
3	Evidence available for Problem definition	20	4	Records filed in the project: Problem definition.
4	Results against target	20	5	KPI Q-KPI-01 used as the measure.

MP-018.10 — Review quality problem · Inputs reviewed

#	Input	Finding
1	Problem data	Problem data still valid; minor updates made.
2	Detection data	No major change since the last review.
3	Standards requirements	Gap found on Problem definition.

MP-018.10 — Review quality problem · Decisions and actions

#	Decision	Owner	Due date
1	Update Problem definition	Julien Moreau	2026-07-07

MP-018.11 — Approve quality problem · Decision criteria checked

1	NC record complete	Yes	NC record v1.0
2	Requirements of ISO 9001 §10.2.1 met	Yes	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

MP-018.12 — Transmit quality problem · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	Quality team	Meeting	2026-06-09	NC record: what changes for you and what to do by 2026-06-23.	Quality Manager
2	Process owners	E-mail	2026-06-11	Problem definition: what changes for you and what to do by 2026-06-23.	Quality Manager

UMS012 (MP-019) — Immediate Action Management

Define containment actions; execute immediately; evaluate effectiveness; escalate. Owner: Quality Manager.
Tier 1. Requirements answered: ISO 9001 §8.7, §10.2.1 a).

Step	Step, task and purpose	Role · form	What to type
MP-019.1	Define immediate actions Task: Plan and prepare immediate actions Define immediate actions — step 1 of 6 in UMS012 Immediate Action Management.	Quality Manager Register items	Items identified: 3 rows — see the table below
MP-019.2	Designate owners of immediate actions Task: Plan and prepare immediate actions Designate owners of immediate actions — step 2 of 6 in UMS012 Immediate Action Management.	Quality Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-019.3	Execute immediate actions activities Task: Execute immediate actions activities Execute immediate actions activities — step 3 of 6 in UMS012 Immediate Action Management.	Quality Manager Execution	What was done: Execute immediate actions activities carried out on service delivery; Containment records updated. Records that prove it: Contain and sort: job sheet not signed Completion (%): 100
MP-019.4	Evaluate immediate actions Task: Execute immediate actions activities Evaluate immediate actions — step 4 of 6 in UMS012 Immediate Action Management.	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.4 Conclusion: Weighted score 4.4/5. Main gap: Operational (process failure, supply chain). Action recorded in the action plan.
MP-019.5	Upload immediate actions evidence Task: Verify, record and close immediate actions Upload immediate actions evidence — step 5 of 6 in UMS012 Immediate Action Management.	Quality Manager Execution	What was done: Upload immediate actions evidence carried out on service delivery; Containment records updated. Records that prove it: Contain and sort: job sheet not signed Completion (%): 100
MP-019.6	Confirm or escalate Task: Verify, record and close immediate actions Confirm or escalate — step 6 of 6 in UMS012 Immediate Action Management.	Quality Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Quality Manager Decision comment and conditions: Containment records approved against ISO 9001; no blocking point.

MP-019.1 — Define immediate actions · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Containment records	Output	Affects Containment records; followed by Quality Manager.	High	Customer complaint log, May 2026
2	Execution evidence	Output	Affects Execution evidence; followed by Quality Manager.	Medium	Internal audit report, May 2026
3	Effectiveness evaluation	Output	Affects Containment records; followed by Quality Manager.	Medium	Process performance dashboard, May 2026

MP-019.2 — Designate owners of immediate actions · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Execute immediate actions activities	Julien Moreau	2026-06-10	2026-06-24	Containment records
2	Evaluate immediate actions	Julien Moreau	2026-06-15	2026-07-04	Execution evidence
3	Upload immediate actions evidence	Julien Moreau	2026-06-20	2026-07-14	Containment records

MP-019.4 — Evaluate immediate actions · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Containment records complete and up to date	30	5	Containment records reviewed on 2026-06-06; 2 gaps corrected.
2	Requirements of ISO 9001 §8.7, §10.2.1 a) met	30	5	Checked against ISO 9001 §8.7, §10.2.1 a) with the checklist of the phase gate.
3	Evidence available for Execution evidence	20	4	Records filed in the project: Execution evidence.
4	Results against target	20	3	KPI Q-KPI-01 used as the measure.

MP-019.6 — Confirm or escalate · Decision criteria checked

#	Criterion	Met	Evidence
1	Containment records complete	Yes	Containment records v1.0
2	Requirements of ISO 9001 §8.7, §10.2.1 a) met	Yes	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

UMS013 (MP-020) — Root Cause Resolution

Select RCA method; conduct workshop; validate causes; define corrective actions. Owner: Quality Manager. Tier 1. Requirements answered: ISO 9001 §10.2.1 b).

Documents of this macro process: AT-UNI-QMS-CAPA-001 (Corrective action report (8D) — NC-AT-UNI-QMS-001); AT-UNI-QMS-CAPA-002 (Corrective action report (8D) — NC-AT-UNI-QMS-002); AT-UNI-QMS-CAPA-006 (Corrective action report (8D) — NC-AT-UNI-QMS-006).

Step	Step, task and purpose	Role · form	What to type
MP-020.1	Select root cause analysis method Task: Plan and prepare root cause analysis Select root cause analysis method — step 1 of 9 in UMS013 Root Cause Resolution.	Quality Manager Register items	Items identified: 3 rows — see the table below
MP-020.2	Define root cause analysis scope Task: Plan and prepare root cause analysis	Quality Manager Register items	Items identified: 3 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	Define root cause analysis scope — step 2 of 9 in UMS013 Root Cause Resolution.		
MP-020.3	Conduct root cause analysis workshop Task: Plan and prepare root cause analysis Conduct root cause analysis workshop — step 3 of 9 in UMS013 Root Cause Resolution.	Quality Manager Execution	What was done: Conduct root cause analysis workshop carried out on service delivery; RCA report updated. Records that prove it: AT-UNI-QMS-CAPA-001 — Corrective action report (8D) — NC-AT-UNI-QMS-001; 8D-01 — job sheet not signed; 8D-02 — quote error Completion (%): 100
MP-020.4	Build root cause analysis diagram Task: Execute root cause analysis activities Build root cause analysis diagram — step 4 of 9 in UMS013 Root Cause Resolution.	Quality Manager Execution	What was done: Build root cause analysis diagram carried out on service delivery; RCA report updated. Records that prove it: AT-UNI-QMS-CAPA-001 — Corrective action report (8D) — NC-AT-UNI-QMS-001; 8D-01 — job sheet not signed; 8D-02 — quote error Completion (%): 100
MP-020.5	Validate root cause analysis Task: Execute root cause analysis activities Validate root cause analysis — step 5 of 9 in UMS013 Root Cause Resolution.	Quality Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Quality Manager Decision comment and conditions: RCA report approved against ISO 9001; no blocking point.
MP-020.6	Link root cause analysis to standards Task: Execute root cause analysis activities Link root cause analysis to standards — step 6 of 9 in UMS013 Root Cause Resolution.	Quality Manager Execution	What was done: Link root cause analysis to standards carried out on service delivery; RCA report updated. Records that prove it: AT-UNI-QMS-CAPA-001 — Corrective action report (8D) — NC-AT-UNI-QMS-001; 8D-01 — job sheet not signed; 8D-02 — quote error Completion (%): 100
MP-020.7	Define root cause analysis corrective Task: Verify, record and close root cause analysis Define root cause analysis corrective — step 7 of 9 in UMS013 Root Cause Resolution.	Quality Manager Register items	Items identified: 3 rows — see the table below
MP-020.8	Assign RACSI roles for root cause analysis Task: Verify, record and close root cause analysis Assign RACSI roles for root cause analysis — step 8 of 9 in UMS013 Root Cause Resolution.	Quality Manager Assignment	Role: Quality Manager Person (from the OBS): Julien Moreau Organization units covered: Quality RACSI of the macro process: R: Quality Manager · A: IMS Manager · C: Risk Manager · S: Document Controller · I: Top Management
MP-020.9	Validate root cause analysis plan Task: Verify, record and close root cause analysis Validate root cause analysis plan — step 9 of 9 in UMS013 Root Cause Resolution.	Quality Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Quality Manager Decision comment and conditions: RCA report approved against ISO 9001; no blocking point.

Document	corrective action register Document reference: AT-UNI-QMS-UMS014-03 Version: 2.0 Content summary: Corrective records for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QMS-NC — Nonconformity and corrective action register
MP-021.4	Evaluate corrective actions Task: Execute corrective actions activities Evaluate corrective actions — step 4 of 7 in UMS014 Corrective Action Execution and Follow-Up.	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.3 Conclusion: Weighted score 3.3/5. Main gap: Strategic (market, customer loss). Action recorded in the action plan.
MP-021.5	Confirm corrective actions Task: Execute corrective actions activities Confirm corrective actions — step 5 of 7 in UMS014 Corrective Action Execution and Follow-Up.	Quality Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Quality Manager Decision comment and conditions: Corrective records approved against ISO 9001; no blocking point.
MP-021.6	Escalate if needed Task: Verify, record and close corrective actions Escalate if needed — step 6 of 7 in UMS014 Corrective Action Execution and Follow-Up.	Quality Manager Escalation	Escalated to: Top Management Reason: Corrective records is late beyond tolerance; a decision on resources is needed.
MP-021.7	Close the corrective actions cycle Task: Verify, record and close corrective actions Close the corrective actions cycle — step 7 of 7 in UMS014 Corrective Action Execution and Follow-Up.	Quality Manager Closure	Closure evidence: Corrective records closed; effectiveness verified on the KPI and evidence filed. Records that prove effectiveness: AT-UNI-QMS-NC — Nonconformity and corrective action register; Eliminate root cause: job sheet not signed Closure date: 2026-06-25

MP-021.4 — Evaluate corrective actions · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Corrective records complete and up to date	30	4	Corrective records reviewed on 2026-06-18; 2 gaps corrected.
2	Requirements of ISO 9001 §10.2.1 c)–d) met	30	3	Checked against ISO 9001 §10.2.1 c)–d) with the checklist of the phase gate.
3	Evidence available for Execution evidence	20	3	Records filed in the project: Execution evidence.
4	Results against target	20	3	KPI KPI-18 used as the measure.

MP-021.5 — Confirm corrective actions · Decision criteria checked

#	Criterion	Met	Evidence
1	Corrective records complete	Yes	Corrective records v1.0
2	Requirements of ISO 9001 §10.2.1 c)–d) met	Yes	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

UMS015 (MP-022) — Nonconformity Capitalization and Closure

Plan REX; document lessons; identify standardization; update KB. Owner: Quality Manager. Tier 1. Requirements answered: ISO 9001 §10.2.2.

Step	Step, task and purpose	Role · form	What to type
MP-022.1	Plan nonconformity closure REX Task: Plan and prepare nonconformity closure Plan nonconformity closure REX — step 1 of 8 in UMS015 Nonconformity Capitalization and Closure.	Quality Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-022.2	Document nonconformity closure lessons Task: Plan and prepare nonconformity closure Document nonconformity closure lessons — step 2 of 8 in UMS015 Nonconformity Capitalization and Closure.	Quality Manager Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QMS-UMS015-02 Version: 1.0 Content summary: REX report for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QMS-PROC-01 — Procedure — Context To Strategy
MP-022.3	Identify nonconformity closure standardization Task: Plan and prepare nonconformity closure Identify nonconformity closure standardization — step 3 of 8 in UMS015 Nonconformity Capitalization and Closure.	Quality Manager Register items	Items identified: 1 row — see the table below
MP-022.4	Review nonconformity closure effectiveness Task: Execute nonconformity closure activities Review nonconformity closure effectiveness — step 4 of 8 in UMS015 Nonconformity Capitalization and Closure.	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.1 Conclusion: Weighted score 4.1/5. Main gap: Strategic (market, customer loss). Action recorded in the action plan.
MP-022.5	Validate nonconformity closure sustainability Task: Execute nonconformity closure activities Validate nonconformity closure sustainability — step 5 of 8 in UMS015 Nonconformity Capitalization and Closure.	Quality Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Quality Manager Decision comment and conditions: REX report approved against ISO 9001; no blocking point.
MP-022.6	Plan nonconformity closure generalization Task: Execute nonconformity closure activities Plan nonconformity closure generalization — step 6 of 8 in UMS015 Nonconformity Capitalization and Closure.	Quality Manager Plan	Planned activities (become actions): 2 rows — see the table below On completion: rows become actions.
MP-022.7	Update nonconformity closure knowledge base Task: Verify, record and close nonconformity closure Update nonconformity closure knowledge base — step 7 of 8 in UMS015 Nonconformity Capitalization and Closure.	Quality Manager Change	Change made: REX report updated: Strategic (market, customer loss). Reason: Change in regulation Documents or records updated: Document nonconformity closure lessons
MP-022.8	Close the nonconformity closure cycle Task: Verify, record and close nonconformity closure Close the nonconformity closure cycle — step 8 of 8 in UMS015 Nonconformity Capitalization and Closure.	Quality Manager Closure	Closure evidence: REX report closed; effectiveness verified on the KPI and evidence filed. Records that prove effectiveness: Document nonconformity closure lessons Closure date: 2026-06-24

MP-022.1 — Plan nonconformity closure REX · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable

DMS021 (MP-082) — NCP Knowledge Base and RAG Management

Build/maintain vector KB; semantic search; RAG; multi-language; RBAC-aware. Owner: Quality Manager. Tier 4.

Step	Step, task and purpose	Role · form	What to type
MP-082.1	Define NCP knowledge base schema Task: Plan and prepare NCP knowledge base Define NCP knowledge base schema — step 1 of 10 in DMS021 NCP Knowledge Base and RAG Management.	Quality Manager Register items	Items identified: 3 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
MP-082.2	Ingest NCP knowledge base data Task: Plan and prepare NCP knowledge base Ingest NCP knowledge base data — step 2 of 10 in DMS021 NCP Knowledge Base and RAG Management.	DynamicMS Engine Automated service task	System result confirmed: Ingest NCP knowledge base data: done by the DynamicMS Engine; Vector KB available in the project. Records produced: —
MP-082.3	Generate NCP knowledge base embeddings Task: Plan and prepare NCP knowledge base Generate NCP knowledge base embeddings — step 3 of 10 in DMS021 NCP Knowledge Base and RAG Management.	Quality Manager AI-assisted draft	Context given to the assistant: Step: Generate NCP knowledge base embeddings. Inputs: Closed NCP fiches; REX entries; Standards library. Standards: ISO 9001. Organization: Atlas Universal SME (technical services). Suggestion outcome: Edited Final validated text: Vector KB drafted with the assistant and reviewed by Quality Manager: covers ISO 9001.
MP-082.4	Index into vector DB Task: Plan and prepare NCP knowledge base Index into vector DB — step 4 of 10 in DMS021 NCP Knowledge Base and RAG Management.	DynamicMS Engine Automated service task	System result confirmed: Index into vector DB: done by the DynamicMS Engine; Vector KB available in the project. Records produced: —
MP-082.5	Configure NCP knowledge base RAG Task: Execute NCP knowledge base activities Configure NCP knowledge base RAG — step 5 of 10 in DMS021 NCP Knowledge Base and RAG Management.	Quality Manager AI-assisted draft	Context given to the assistant: Step: Configure NCP knowledge base RAG. Inputs: Closed NCP fiches; REX entries; Standards library. Standards: ISO 9001. Organization: Atlas Universal SME (technical services). Suggestion outcome: Edited Final validated text: Vector KB drafted with the assistant and reviewed by Quality Manager: covers ISO 9001.
MP-082.6	Retrieve knowledge within access rights Task: Execute NCP knowledge base activities Retrieve knowledge within access rights — step 6 of 10 in DMS021 NCP Knowledge Base and RAG Management.	Quality Manager Execution	What was done: Retrieve knowledge within access rights carried out on service delivery; Vector KB updated. Records that prove it: — Completion (%): 100
MP-082.7	Translate knowledge articles (EN/FR/AR) Task: Execute NCP knowledge base activities Translate knowledge articles (EN/FR/AR) — step 7 of 10 in DMS021 NCP Knowledge Base and RAG Management.	Quality Manager Execution	What was done: Translate knowledge articles (EN/FR/AR) carried out on service delivery; Vector KB updated. Records that prove it: — Completion (%): 100
MP-082.8	Monitor NCP knowledge base quality Task: Verify, record and close NCP knowledge base Monitor NCP knowledge base quality — step 8 of 10 in DMS021 NCP Knowledge Base and RAG Management.	Quality Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-082.9	Update NCP knowledge base on closure Task: Verify, record and close NCP knowledge base Update NCP knowledge base on closure — step 9 of 10 in DMS021 NCP Knowledge Base and RAG Management.	Quality Manager Change	Change made: Vector KB updated: quote error. Reason: Decision of the management review Documents or records updated: —
MP-082.10	Report on NCP knowledge base status Task: Verify, record and close NCP knowledge base Report on NCP knowledge base status — step 10 of 10 in DMS021 NCP Knowledge Base and RAG	Quality Manager Communication	Communication records: 2 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	Management.		

MP-082.1 — Define NCP knowledge base schema · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Vector KB	Output	Affects Vector KB; followed by Quality Manager.	High	Customer complaint log, Jun 2026
2	RAG index	Output	Affects RAG index; followed by Quality Manager.	Medium	Internal audit report, Jun 2026
3	Search results	Output	Affects Vector KB; followed by Quality Manager.	Medium	Process performance dashboard, May 2026

MP-082.8 — Monitor NCP knowledge base quality · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Vector KB); it is the KPI its owner reviews at each Monthly review.	81.5	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Vector KB); it is the KPI its owner reviews at each Monthly review.	94.4	>= 95%

MP-082.10 — Report on NCP knowledge base status · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	AI agents	Intranet	2026-07-02	Vector KB: what changes for you and what to do by 2026-07-16.	Quality Manager
2	NCP teams	Notice board	2026-07-04	RAG index: what changes for you and what to do by 2026-07-16.	Quality Manager

DMS022 (MP-083) — AI Agent Orchestration for Problem Solving

Coordinate 8 AI agents; manage state machine; ensure RBAC; log with confidence. Owner: Quality Manager. Tier 4.

Step	Step, task and purpose	Role · form	What to type
MP-083.1	Initialize AI problem-solving agents Orchestrator Task: Plan and prepare AI problem-solving agents Initialize AI problem-solving agents Orchestrator — step 1 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	Quality Manager Execution	What was done: Initialize AI problem-solving agents Orchestrator carried out on service delivery; AI classifications updated. Records that prove it: — Completion (%): 100
MP-083.2	Trigger Classification at E1 Task: Plan and prepare AI problem-solving agents Trigger Classification at E1 — step 2 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	Quality Manager Execution	What was done: Trigger Classification at E1 carried out on service delivery; AI classifications updated. Records that prove it: — Completion (%): 100
MP-083.3	Trigger Structuring at E2 Task: Plan and prepare AI problem-solving agents Trigger Structuring at E2 — step 3 of 10 in DMS022 AI Agent Orchestration	Quality Manager Execution	What was done: Trigger Structuring at E2 carried out on service delivery; AI classifications updated. Records that prove it: — Completion (%): 100

Step	Step, task and purpose	Role · form	What to type
	for Problem Solving.		
MP-083.4	Trigger Containment at E3 Task: Plan and prepare AI problem-solving agents Trigger Containment at E3 — step 4 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	Quality Manager Execution	What was done: Trigger Containment at E3 carried out on service delivery; AI classifications updated. Records that prove it: — Completion (%): 100
MP-083.5	Trigger RCA at E4 Task: Execute AI problem-solving agents activities Trigger RCA at E4 — step 5 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	Quality Manager Execution	What was done: Trigger RCA at E4 carried out on service delivery; AI classifications updated. Records that prove it: — Completion (%): 100
MP-083.6	Trigger Action Rec. at E5 Task: Execute AI problem-solving agents activities Trigger Action Rec. at E5 — step 6 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	Quality Manager Execution	What was done: Trigger Action Rec. at E5 carried out on service delivery; AI classifications updated. Records that prove it: — Completion (%): 100
MP-083.7	Trigger Monitoring at E6 Task: Execute AI problem-solving agents activities Trigger Monitoring at E6 — step 7 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	Quality Manager Execution	What was done: Trigger Monitoring at E6 carried out on service delivery; AI classifications updated. Records that prove it: — Completion (%): 100
MP-083.8	Trigger REX at E7 Task: Verify, record and close AI problem-solving agents Trigger REX at E7 — step 8 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	Quality Manager Execution	What was done: Trigger REX at E7 carried out on service delivery; AI classifications updated. Records that prove it: — Completion (%): 100
MP-083.9	Manage AI problem-solving agents transitions Task: Verify, record and close AI problem-solving agents Manage AI problem-solving agents transitions — step 9 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	Quality Manager Execution	What was done: Manage AI problem-solving agents transitions carried out on service delivery; AI classifications updated. Records that prove it: — Completion (%): 100
MP-083.10	Log agent answers with confidence score Task: Verify, record and close AI problem-solving agents Log agent answers with confidence score — step 10 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	DynamicMS Engine Automated service task	System result confirmed: Log agent answers with confidence score: done by the DynamicMS Engine; AI classifications available in the project. Records produced: —

DMS023 (MP-084) — Smart Alert and Escalation Engine

Trigger 10 alert types (A–J); deliver; escalate; configurable per tenant. Owner: Performance Manager. Tier 4.

Step	Step, task and purpose	Role · form	What to type
MP-084.1	Configure alert engine A–J Task: Plan and prepare alert engine Configure alert engine A–J — step 1 of 11 in DMS023 Smart Alert and Escalation Engine.	Performance Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-084.2	Send alert A for high-priority problems Task: Plan and prepare alert engine	DynamicMS Engine Automated service task	System result confirmed: Send alert A for high-priority problems: done by the DynamicMS Engine; In-app notifications available in the project.

Step	Step, task and purpose	Role · form	What to type
	Send alert A for high-priority problems — step 2 of 11 in DMS023 Smart Alert and Escalation Engine.		Records produced: —
MP-084.3	Send alert B for overdue actions Task: Plan and prepare alert engine Send alert B for overdue actions — step 3 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Send alert B for overdue actions: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —
MP-084.4	Send alert C for pending evaluations Task: Plan and prepare alert engine Send alert C for pending evaluations — step 4 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Send alert C for pending evaluations: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —
MP-084.5	Send alert D for delayed root cause analyses Task: Execute alert engine activities Send alert D for delayed root cause analyses — step 5 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Send alert D for delayed root cause analyses: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —
MP-084.6	Send alert E for lessons to capitalize Task: Execute alert engine activities Send alert E for lessons to capitalize — step 6 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Send alert E for lessons to capitalize: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —
MP-084.7	Send alert F for KPI breaches Task: Execute alert engine activities Send alert F for KPI breaches — step 7 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Send alert F for KPI breaches: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —
MP-084.8	Send reminders G–I one and two days before due dates Task: Execute alert engine activities Send reminders G–I one and two days before due dates — step 8 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Send reminders G–I one and two days before due dates: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —
MP-084.9	Send alert J for inactive records Task: Verify, record and close alert engine Send alert J for inactive records — step 9 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Send alert J for inactive records: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —
MP-084.10	Escalate after 24h Task: Verify, record and close alert engine Escalate after 24h — step 10 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Escalate after 24h: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —
MP-084.11	Log alert dispatches and acknowledgements Task: Verify, record and close alert engine Log alert dispatches and acknowledgements — step 11 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Log alert dispatches and acknowledgements: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —

MP-084.1 — Configure alert engine A–J · Settings

#	Setting	Value	Reason
1	Configure alert engine A–J	Enabled for service delivery	Needed to produce In-app notifications

#	Setting	Value	Reason
2	Owner and notification	Performance Manager	Alerts go to the process owner

DMS026 (MP-087) — REX Capitalization and Generalization

Document lessons; identify standardization (V1); generalization (V2); update KB. Owner: Quality Manager. Tier 4.

Step	Step, task and purpose	Role · form	What to type
MP-087.1	Plan lessons learned (REX) workshop Task: Plan and prepare lessons learned (REX) Plan lessons learned (REX) workshop — step 1 of 10 in DMS026 REX Capitalization and Generalization.	Quality Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-087.2	Document lessons learned with AI assistance Task: Plan and prepare lessons learned (REX) Document lessons learned with AI assistance — step 2 of 10 in DMS026 REX Capitalization and Generalization.	Quality Manager AI-assisted draft	Context given to the assistant: Step: Document lessons learned with AI assistance. Inputs: Closed fiches; Corrective records; Effectiveness evals. Standards: ISO 9001. Organization: Atlas Universal SME (technical services). Suggestion outcome: Edited Final validated text: REX narrative drafted with the assistant and reviewed by Quality Manager: covers ISO 9001.
MP-087.3	Identify lessons learned (REX) standardization Task: Plan and prepare lessons learned (REX) Identify lessons learned (REX) standardization — step 3 of 10 in DMS026 REX Capitalization and Generalization.	Quality Manager Register items	Items identified: 1 row — see the table below
MP-087.4	Identify lessons learned (REX) generalization Task: Plan and prepare lessons learned (REX) Identify lessons learned (REX) generalization — step 4 of 10 in DMS026 REX Capitalization and Generalization.	Quality Manager Register items	Items identified: 3 rows — see the table below
MP-087.5	Assign lessons learned (REX) responsible Task: Execute lessons learned (REX) activities Assign lessons learned (REX) responsible — step 5 of 10 in DMS026 REX Capitalization and Generalization.	Quality Manager Assignment	Role: Quality Manager Person (from the OBS): Julien Moreau Organization units covered: Quality RACSI of the macro process: R: Quality Manager · A: IMS Manager · C: Risk Manager · S: Document Controller · I: Top Management
MP-087.6	Set lessons learned (REX) deadlines Task: Execute lessons learned (REX) activities Set lessons learned (REX) deadlines — step 6 of 10 in DMS026 REX Capitalization and Generalization.	Quality Manager Execution	What was done: Set lessons learned (REX) deadlines carried out on service delivery; REX narrative updated. Records that prove it: Document lessons learned with AI assistance Completion (%): 100
MP-087.7	Update lessons learned (REX) knowledge base Task: Execute lessons learned (REX) activities Update lessons learned (REX) knowledge base — step 7 of 10 in DMS026 REX Capitalization and Generalization.	Quality Manager Change	Change made: REX narrative updated: quote error. Reason: Change in regulation Documents or records updated: Document lessons learned with AI assistance
MP-087.8	Update lessons learned (REX)	Quality Manager	Change made: REX narrative updated: Strategic (market,

Step	Step, task and purpose	Role · form	What to type
	procedures Task: Verify, record and close lessons learned (REX) Update lessons learned (REX) procedures — step 8 of 10 in DMS026 REX Capitalization and Generalization.	Change	customer loss). Reason: Finding of the internal audit Documents or records updated: Document lessons learned with AI assistance
MP-087.9	Index lessons learned (REX) into RAG Task: Verify, record and close lessons learned (REX) Index lessons learned (REX) into RAG — step 9 of 10 in DMS026 REX Capitalization and Generalization.	Quality Manager AI-assisted draft	Context given to the assistant: Step: Index lessons learned (REX) into RAG. Inputs: Closed fiches; Corrective records; Effectiveness evals. Standards: ISO 9001. Organization: Atlas Universal SME (technical services). Suggestion outcome: Edited Final validated text: REX narrative drafted with the assistant and reviewed by Quality Manager: covers ISO 9001.
MP-087.10	Communicate lessons learned (REX) Task: Verify, record and close lessons learned (REX) Communicate lessons learned (REX) — step 10 of 10 in DMS026 REX Capitalization and Generalization.	Quality Manager Communication	Communication records: 2 rows — see the table below

MP-087.1 — Plan lessons learned (REX) workshop · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Document lessons learned with AI assistance	Julien Moreau	2026-07-13	2026-07-27	REX narrative
2	Identify lessons learned (REX) standardization	Julien Moreau	2026-07-18	2026-08-06	Standardization records

DMS097 (MP-158) — SME Simplified Nonconformity Management

Simplified NCP; reduce complexity; essential problem-solving. Owner: Quality Manager. Tier 7. Requirements answered: ISO 9001 §10.2.

Step	Step, task and purpose	Role · form	What to type
MP-158.1	Capture SME nonconformities Task: Plan and prepare SME nonconformities Capture SME nonconformities — step 1 of 10 in DMS097 SME Simplified Nonconformity Management.	Quality Manager Register items	Items identified: 3 rows — see the table below
MP-158.2	Assess SME nonconformities severity Task: Plan and prepare SME nonconformities Assess SME nonconformities severity — step 2 of 10 in DMS097 SME Simplified Nonconformity Management.	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.1 Conclusion: Weighted score 4.1/5. Main gap: Operational (process failure, supply chain). Action recorded in the action plan.
MP-158.3	Take immediate action on the nonconformity Task: Plan and prepare SME nonconformities Take immediate action on the nonconformity — step 3 of 10 in DMS097 SME Simplified Nonconformity Management.	Quality Manager Execution	What was done: Take immediate action on the nonconformity carried out on service delivery; NCP records updated. Records that prove it: — Completion (%): 100
MP-158.4	Perform a simple root cause analysis Task: Plan and prepare SME nonconformities Perform a simple root cause analysis — step 4 of 10 in DMS097 SME Simplified Nonconformity Management.	Quality Manager Execution	What was done: Perform a simple root cause analysis carried out on service delivery; NCP records updated. Records that prove it: — Completion (%): 100
MP-158.5	Define the corrective action Task: Execute SME nonconformities activities Define the corrective action — step 5 of 10 in DMS097 SME Simplified Nonconformity Management.	Quality Manager Change	Change made: NCP records updated: Strategic (market, customer loss). Reason: Decision of the management review Documents or records updated: —
MP-158.6	Implement SME nonconformities Task: Execute SME nonconformities activities Implement SME nonconformities — step 6 of 10 in DMS097 SME Simplified Nonconformity Management.	Quality Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-158.7	Verify SME nonconformities Task: Execute SME nonconformities activities Verify SME nonconformities — step 7 of 10 in DMS097 SME Simplified Nonconformity Management.	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.3 Conclusion: Weighted score 4.3/5. Main gap: job sheet not signed. Action recorded in the action plan.
MP-158.8	Close the SME nonconformities cycle Task: Verify, record and close SME nonconformities Close the SME nonconformities cycle — step 8 of 10 in DMS097 SME Simplified Nonconformity Management.	Quality Manager Closure	Closure evidence: NCP records closed; effectiveness verified on the KPI and evidence filed. Records that prove effectiveness: — Closure date: 2026-07-22
MP-158.9	Document SME nonconformities lesson Task: Verify, record and close SME nonconformities Document SME nonconformities	Quality Manager Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QMS-DMS097-09 Version: 2.0 Content summary: NCP records for technical services, aligned with ISO 9001; generated from the project data, then completed

Step	Step, task and purpose	Role · form	What to type
	lesson — step 9 of 10 in DMS097 SME Simplified Nonconformity Management.		by the author. Generated document: AT-UNI-QMS-PROC-01 — Procedure — Context To Strategy
MP-158.10	Report on SME nonconformities status Task: Verify, record and close SME nonconformities Report on SME nonconformities status — step 10 of 10 in DMS097 SME Simplified Nonconformity Management.	Quality Manager Communication	Communication records: 2 rows — see the table below

MP-158.1 — Capture SME nonconformities · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	NCP records	Output	Affects NCP records; followed by Quality Manager.	High	Customer complaint log, Jul 2026
2	RCA reports	Output	Affects RCA reports; followed by Quality Manager.	Medium	Internal audit report, Jun 2026
3	Corrective records	Output	Affects NCP records; followed by Quality Manager.	Medium	Process performance dashboard, Jun 2026

MP-158.2 — Assess SME nonconformities severity · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	NCP records complete and up to date	30	5	NCP records reviewed on 2026-07-19; 2 gaps corrected.
2	Requirements of ISO 9001 §10.2 met	30	4	Checked against ISO 9001 §10.2 with the checklist of the phase gate.
3	Evidence available for RCA reports	20	4	Records filed in the project: RCA reports.
4	Results against target	20	3	KPI Q-KPI-01 used as the measure.

MP-158.6 — Implement SME nonconformities · Settings

#	Setting	Value	Reason
1	Implement SME nonconformities	Enabled for service delivery	Needed to produce NCP records
2	Owner and notification	Quality Manager	Alerts go to the process owner

MP-158.7 — Verify SME nonconformities · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	NCP records complete and up to date	30	5	NCP records reviewed on 2026-07-20; 2 gaps corrected.
2	Requirements of ISO 9001 §10.2 met	30	4	Checked against ISO 9001 §10.2 with the checklist of the phase gate.
3	Evidence available for RCA reports	20	5	Records filed in the project: RCA reports.
4	Results against target	20	3	KPI Q-KPI-01 used as the measure.

MP-158.10 — Report on SME nonconformities status · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	SME owner	Intranet	2026-07-26	NCP records: what changes for you and what to do by 2026-08-09.	Quality Manager
2	SME management	Notice board	2026-07-28	RCA reports: what changes for you and what to do by 2026-08-09.	Quality Manager

Gate — G9 — Problem solving effective

Exit criteria: Critical NCs contained within 24 h; corrective actions verified by an independent evaluator.

44. Open Lifecycle and select the phase card; the gate panel is on the right.
45. Tick “Containment within 24 h for critical NCs (mandatory, evidence required)”.
46. Tick “Root cause validated for major NCs (mandatory, evidence required)”.
47. Tick “Effectiveness verified by independent evaluator (mandatory, evidence required)”.
48. Sign in as Top Management (ceo@...) or the IMS Manager and select Go. For Hold or No-Go, type a comment explaining why.

E2E-10 — Monitoring To Evaluation

Goals: Monitor performance, evaluate results, steer the organization

From trigger to terminal event: Monitoring periodicity, performance deviation, or governance review → Performance evaluated; governance decisions made; improvements identified

UMS027 (MP-009) — Process Indicators and KPI Management

Define KPIs; align with objectives; set targets; automate and visualize. Owner: Performance Manager. Tier 1. Requirements answered: ISO 9001 §9.1.1.

Documents of this macro process: AT-UNI-QMS-KPI (KPI dashboard and measurement results).

Step	Step, task and purpose	Role · form	What to type
MP-009.1	Define process KPIs indicators Task: Plan and prepare process KPIs Define process KPIs indicators — step 1 of 11 in UMS027 Process Indicators and KPI Management.	Performance Manager Register items	Items identified: 4 rows — see the table below
MP-009.2	Align process KPIs with objectives Task: Plan and prepare process KPIs Align process KPIs with objectives — step 2 of 11 in UMS027 Process Indicators and KPI Management.	Performance Manager Execution	What was done: Align process KPIs with objectives carried out on service delivery; KPI definitions updated. Records that prove it: AT-UNI-QMS-KPI — KPI dashboard and measurement results Completion (%): 100
MP-009.3	Set process KPIs targets Task: Plan and prepare process KPIs Set process KPIs targets — step 3 of 11 in UMS027 Process Indicators and KPI Management.	Performance Manager SMART objectives	Objectives (become entries of the objectives register): 4 rows — see the table below On completion: rows become objectives.
MP-009.4	Define process KPIs data sources Task: Execute process KPIs activities Define process KPIs data sources — step 4 of 11 in UMS027 Process Indicators and KPI Management.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-009.5	Establish process KPIs frequency Task: Execute process KPIs activities Establish process KPIs frequency — step 5 of 11 in UMS027 Process	Performance Manager Periodicity	Frequency: Monthly Next due date: 2026-08-27 Review chaired by: Performance Manager Organization units in scope: Operations

Step	Step, task and purpose	Role · form	What to type
	Indicators and KPI Management.		Review inputs and notes: Inputs for each review: Process objectives; Strategic objectives; Performance data. An early review is triggered by: Receipt or update of Process objectives, Strategic objectives from Process owners, Data analysts.
MP-009.6	Designate owners of process KPIs Task: Execute process KPIs activities Designate owners of process KPIs — step 6 of 11 in UMS027 Process Indicators and KPI Management.	Performance Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-009.7	Review process KPIs relevance Task: Verify, record and close process KPIs Review process KPIs relevance — step 7 of 11 in UMS027 Process Indicators and KPI Management.	Performance Manager Review	Review frequency: Quarterly Review date: 2026-07-29 Next review: 2026-10-28 Chaired by: Performance Manager Participants: Performance Manager, IMS Manager, Quality Manager Inputs reviewed: 3 rows — see the table below Decisions and actions: 1 row — see the table below On completion: rows become actions.
MP-009.8	Automate process KPIs Task: Verify, record and close process KPIs Automate process KPIs — step 8 of 11 in UMS027 Process Indicators and KPI Management.	DynamicMS Engine Automated service task	System result confirmed: Automate process KPIs: done by the DynamicMS Engine; KPI definitions available in the project. Records produced: AT-UNI-QMS-KPI — KPI dashboard and measurement results; Review process KPIs relevance
MP-009.9	Visualize process KPIs Task: Verify, record and close process KPIs Visualize process KPIs — step 9 of 11 in UMS027 Process Indicators and KPI Management.	Performance Manager Execution	What was done: Visualize process KPIs carried out on service delivery; KPI definitions updated. Records that prove it: AT-UNI-QMS-KPI — KPI dashboard and measurement results; Review process KPIs relevance Completion (%): 100
MP-009.10	Set KPI measurement and analysis frequencies Task: Govern KPI Frequencies & RACSI Set KPI measurement and analysis frequencies — step 10 of 11 in UMS027 Process Indicators and KPI Management.	Performance Manager Execution	What was done: Set KPI measurement and analysis frequencies carried out on service delivery; KPI definitions updated. Records that prove it: AT-UNI-QMS-KPI — KPI dashboard and measurement results; Review process KPIs relevance Completion (%): 100
MP-009.11	Assign KPI RACSI Task: Govern KPI Frequencies & RACSI Assign KPI RACSI — step 11 of 11 in UMS027 Process Indicators and KPI Management.	Performance Manager Assignment	Role: Performance Manager Person (from the OBS): Omar Haddad Organization units covered: Operations RACSI of the macro process: R: Performance Manager · A: IMS Manager · C: Risk Manager · S: Document Controller · I: Top Management

MP-009.1 — Define process KPIs indicators · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Customer satisfaction index	Indicator	Affects KPI definitions; followed by Performance Manager.	High	Customer complaint log, Jul 2026
2	On-time delivery rate	Indicator	Affects Dashboards; followed by Performance Manager.	Medium	Internal audit report, Jul 2026
3	First pass yield	Indicator	Affects KPI definitions; followed by Performance Manager.	Medium	Process performance dashboard, Jun 2026
4	Cost of poor quality	Indicator	Affects Dashboards; followed by Performance Manager.	Low	Interview with the process owner, Jun 2026

MP-009.3 — Set process KPIs targets · Objectives (become entries of the objectives register)

#	Specific objective	Measure (KPI)	Baseline	Achievable target	Relevant to (policy commitment)	Owner	Time-bound deadline	Resources
1	Raise customer satisfaction on technical services	Q-KPI-01 — Customer satisfaction index	78%	>= 85%	Satisfy customer requirements	Julien Moreau	2026-11-10	Quarterly survey; complaint review meeting
2	Deliver technical services on time	Q-KPI-02 — On-time delivery rate	86%	>= 95%	On time, right first time	Claire Martin	2026-08-12	Planning board; one extra technician in summer
3	Reduce the cost of poor quality	Q-KPI-04 — Cost of poor quality	4.1%	<= 2%	Continual improvement	Julien Moreau	2026-11-10	Rework tracking in the NC register
4	Close corrective actions on time	Q-KPI-05 — Corrective actions closed on time	70%	>= 90%	Continual improvement	Tariq Saleh	2026-05-14	Weekly action review

MP-009.4 — Define process KPIs data sources · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	KPI definitions	Output	Affects KPI definitions; followed by Performance Manager.	High	Interview with the process owner, Jun 2026
2	Dashboards	Output	Affects Dashboards; followed by Performance Manager.	Medium	Regulatory watch bulletin, Jun 2026
3	Target tracking	Output	Affects KPI definitions; followed by Performance Manager.	Medium	Supplier evaluation file, May 2026

MP-009.6 — Designate owners of process KPIs · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Review process KPIs relevance	Omar Haddad	2026-07-29	2026-08-12	KPI definitions
2	Automate process KPIs	Omar Haddad	2026-08-03	2026-08-22	Dashboards
3	Visualize process KPIs	Omar Haddad	2026-08-08	2026-09-01	KPI definitions

MP-009.7 — Review process KPIs relevance · Inputs reviewed

#	Input	Finding
1	Process objectives	Process objectives still valid; minor updates made.
2	Strategic objectives	No major change since the last review.
3	Performance data	Gap found on Dashboards.

MP-009.7 — Review process KPIs relevance · Decisions and actions

#	Decision	Owner	Due date
1	Update Dashboards	Omar Haddad	2026-08-28

UMS028 (MP-010) — Process Alert and Escalation Thresholds

Define alert thresholds; set escalation levels; configure notifications; test. Owner: Performance Manager. Tier 1. Requirements answered: ISO 9001 §9.1.1.

Step	Step, task and purpose	Role · form	What to type
MP-010.1	Define alert and escalation thresholds Task: Plan and prepare alert and escalation thresholds Define alert and escalation thresholds — step 1 of 9 in UMS028 Process Alert and Escalation Thresholds.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-010.2	Set alert levels Task: Plan and prepare alert and escalation thresholds Set alert levels — step 2 of 9 in UMS028 Process Alert and Escalation Thresholds.	Performance Manager Execution	What was done: Set alert levels carried out on service delivery; Alert thresholds updated. Records that prove it: — Completion (%): 100
MP-010.3	Configure alert and escalation thresholds triggers Task: Plan and prepare alert and escalation thresholds Configure alert and escalation thresholds triggers — step 3 of 9 in UMS028 Process Alert and Escalation Thresholds.	Performance Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-010.4	Designate alert and escalation thresholds recipients Task: Execute alert and escalation thresholds activities Designate alert and escalation thresholds recipients — step 4 of 9 in UMS028 Process Alert and Escalation Thresholds.	Performance Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-010.5	Define escalation paths Task: Execute alert and escalation thresholds activities Define escalation paths — step 5 of 9 in UMS028 Process Alert and Escalation Thresholds.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-010.6	Test alert and escalation thresholds Task: Execute alert and escalation thresholds activities Test alert and escalation thresholds — step 6 of 9 in UMS028 Process Alert and Escalation Thresholds.	Performance Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.2 Conclusion: Weighted score 4.2/5. Main gap: job sheet not signed. Action recorded in the action plan.
MP-010.7	Monitor alert and escalation thresholds Task: Verify, record and close alert and escalation thresholds Monitor alert and escalation thresholds — step 7 of 9 in UMS028 Process Alert and Escalation Thresholds.	Performance Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-010.8	Adjust alert and escalation thresholds Task: Verify, record and close alert and escalation thresholds Adjust alert and escalation thresholds — step 8 of 9 in UMS028 Process Alert and Escalation Thresholds.	Performance Manager Change	Change made: Alert thresholds updated: quote error. Reason: Finding of the internal audit Documents or records updated: Define escalation paths
MP-010.9	Update alert and escalation thresholds Task: Verify, record and close alert and escalation thresholds Update alert and escalation thresholds — step 9 of 9 in UMS028 Process Alert and Escalation Thresholds.	Performance Manager Change	Change made: Alert thresholds updated: Strategic (market, customer loss). Reason: Decision of the management review Documents or records updated: Define escalation paths

MP-010.1 — Define alert and escalation thresholds · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Alert thresholds	Output	Affects Alert thresholds; followed by Performance Manager.	High	Customer complaint log, Jul 2026
2	Escalation procedures	Output	Affects Escalation procedures; followed by Performance Manager.	Medium	Internal audit report, Jul 2026
3	Notification records	Output	Affects Alert thresholds; followed by Performance Manager.	Medium	Process performance dashboard, Jul 2026

MP-010.3 — Configure alert and escalation thresholds triggers · Settings

#	Setting	Value	Reason
1	Configure alert and escalation thresholds triggers	Enabled for service delivery	Needed to produce Alert thresholds
2	Owner and notification	Performance Manager	Alerts go to the process owner

MP-010.4 — Designate alert and escalation thresholds recipients · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Define escalation paths	Omar Haddad	2026-08-05	2026-08-19	Alert thresholds
2	Test alert and escalation thresholds	Omar Haddad	2026-08-10	2026-08-29	Escalation procedures
3	Monitor alert and escalation thresholds	Omar Haddad	2026-08-15	2026-09-08	Alert thresholds

MP-010.5 — Define escalation paths · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Alert thresholds	Output	Affects Alert thresholds; followed by Performance Manager.	High	Regulatory watch bulletin, Jun 2026
2	Escalation procedures	Output	Affects Escalation procedures; followed by Performance Manager.	Medium	Supplier evaluation file, Jun 2026
3	Notification records	Output	Affects Alert thresholds; followed by Performance Manager.	Medium	Management review minutes, May 2026

MP-010.6 — Test alert and escalation thresholds · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Alert thresholds complete and up to date	30	4	Alert thresholds reviewed on 2026-07-28; 2 gaps corrected.
2	Requirements of ISO 9001 §9.1.1 met	30	4	Checked against ISO 9001 §9.1.1 with the checklist of the phase gate.
3	Evidence available for Escalation procedures	20	5	Records filed in the project: Escalation procedures.
4	Results against target	20	4	KPI Q-KPI-01 used as the measure.

MP-010.7 — Monitor alert and escalation thresholds · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Alert thresholds); it is the KPI its	81.5	>= 85%

#	KPI	Why this KPI for this step	Measured value	Target
		owner reviews at each Monthly review.		
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Alert thresholds); it is the KPI its owner reviews at each Monthly review.	94.4	>= 95%

UMS029 (MP-011) — Real-Time Dashboard and Process Steering

Provide real-time visibility; enable drill-down; control access; update. Owner: Performance Manager. Tier 1.
Requirements answered: ISO 9001 §9.1.3.

Step	Step, task and purpose	Role · form	What to type
MP-011.1	Identify process dashboard profiles Task: Plan and prepare process dashboard Identify process dashboard profiles — step 1 of 9 in UMS029 Real-Time Dashboard and Process Steering.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-011.2	Define process dashboard layout Task: Plan and prepare process dashboard Define process dashboard layout — step 2 of 9 in UMS029 Real-Time Dashboard and Process Steering.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-011.3	Aggregate process dashboard data Task: Plan and prepare process dashboard Aggregate process dashboard data — step 3 of 9 in UMS029 Real-Time Dashboard and Process Steering.	DynamicMS Engine Automated service task	System result confirmed: Aggregate process dashboard data: done by the DynamicMS Engine; Dashboards available in the project. Records produced: —
MP-011.4	Configure process dashboard widgets Task: Execute process dashboard activities Configure process dashboard widgets — step 4 of 9 in UMS029 Real-Time Dashboard and Process Steering.	Performance Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-011.5	Set up drill-down Task: Execute process dashboard activities Set up drill-down — step 5 of 9 in UMS029 Real-Time Dashboard and Process Steering.	Performance Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-011.6	Publish process dashboard Task: Execute process dashboard activities Publish process dashboard — step 6 of 9 in UMS029 Real-Time Dashboard and Process Steering.	Performance Manager Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QMS-UMS029-06 Version: 1.1 Content summary: Dashboards for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QMS-PROC-01 — Procedure — Context To Strategy
MP-011.7	Control process dashboard access Task: Verify, record and close process dashboard Control process dashboard access — step 7 of 9 in UMS029 Real-Time Dashboard and Process Steering.	Performance Manager Execution	What was done: Control process dashboard access carried out on service delivery; Dashboards updated. Records that prove it: — Completion (%): 100
MP-011.8	Gather process dashboard feedback Task: Verify, record and close process dashboard Gather process dashboard feedback — step 8 of 9 in UMS029 Real-Time	Performance Manager Register items	Items identified: 3 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	Dashboard and Process Steering.		
MP-011.9	Update process dashboard Task: Verify, record and close process dashboard Update process dashboard — step 9 of 9 in UMS029 Real-Time Dashboard and Process Steering.	Performance Manager Change	Change made: Dashboards updated: quote error. Reason: Decision of the management review Documents or records updated: —

MP-011.1 — Identify process dashboard profiles · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Dashboards	Output	Affects Dashboards; followed by Performance Manager.	High	Customer complaint log, Jul 2026
2	Drill-down reports	Output	Affects Drill-down reports; followed by Performance Manager.	Medium	Internal audit report, Jul 2026
3	Access records	Output	Affects Dashboards; followed by Performance Manager.	Medium	Process performance dashboard, Jul 2026

MP-011.2 — Define process dashboard layout · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Dashboards	Output	Affects Dashboards; followed by Performance Manager.	High	Internal audit report, Jul 2026
2	Drill-down reports	Output	Affects Drill-down reports; followed by Performance Manager.	Medium	Process performance dashboard, Jul 2026
3	Access records	Output	Affects Dashboards; followed by Performance Manager.	Medium	Interview with the process owner, Jun 2026

MP-011.4 — Configure process dashboard widgets · Settings

#	Setting	Value	Reason
1	Configure process dashboard widgets	Enabled for service delivery	Needed to produce Dashboards
2	Owner and notification	Performance Manager	Alerts go to the process owner

MP-011.5 — Set up drill-down · Settings

#	Setting	Value	Reason
1	Set up drill-down	Enabled for service delivery	Needed to produce Dashboards
2	Owner and notification	Performance Manager	Alerts go to the process owner

MP-011.8 — Gather process dashboard feedback · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Dashboards	Output	Affects Dashboards; followed by Performance Manager.	High	Customer complaint log, May 2026
2	Drill-down reports	Output	Affects Drill-down reports; followed by Performance Manager.	Medium	Internal audit report, May 2026
3	Access records	Output	Affects Dashboards; followed by Performance Manager.	Medium	Process performance dashboard, May 2026

UMS010 (MP-031) — Performance Indicator Consolidation and Reviews

Define indicators; collect real-time data; aggregate dashboards; analyze trends. Owner: Performance Manager.
Tier 1. Requirements answered: ISO 9001 §9.1.3.

Step	Step, task and purpose	Role · form	What to type
MP-031.1	Define performance indicators Task: Plan and prepare performance indicators Define performance indicators — step 1 of 9 in UMS010 Performance Indicator Consolidation and Reviews.	Performance Manager Register items	Items identified: 1 row — see the table below
MP-031.2	Establish performance indicators agenda Task: Plan and prepare performance indicators Establish performance indicators agenda — step 2 of 9 in UMS010 Performance Indicator Consolidation and Reviews.	Performance Manager Execution	What was done: Establish performance indicators agenda carried out on service delivery; Dashboards updated. Records that prove it: — Completion (%): 100
MP-031.3	Collect performance indicators data Task: Plan and prepare performance indicators Collect performance indicators data — step 3 of 9 in UMS010 Performance Indicator Consolidation and Reviews.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-031.4	Aggregate performance indicators Task: Execute performance indicators activities Aggregate performance indicators — step 4 of 9 in UMS010 Performance Indicator Consolidation and Reviews.	DynamicMS Engine Automated service task	System result confirmed: Aggregate performance indicators: done by the DynamicMS Engine; Dashboards available in the project. Records produced: —
MP-031.5	Analyze performance indicators Task: Execute performance indicators activities Analyze performance indicators — step 5 of 9 in UMS010 Performance Indicator Consolidation and Reviews.	Performance Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.3 Conclusion: Weighted score 4.3/5. Main gap: job sheet not signed. Action recorded in the action plan.
MP-031.6	Identify performance indicators gaps Task: Execute performance indicators activities Identify performance indicators gaps — step 6 of 9 in UMS010 Performance Indicator Consolidation and Reviews.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-031.7	Generate performance indicators supports Task: Verify, record and close performance indicators Generate performance indicators supports — step 7 of 9 in UMS010 Performance Indicator Consolidation and Reviews.	Performance Manager Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QMS-UMS010-07 Version: 2.0 Content summary: Dashboards for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QMS-PROC-01 — Procedure — Context To Strategy
MP-031.8	Facilitate performance indicators reviews Task: Verify, record and close performance indicators Facilitate performance indicators reviews — step 8 of 9 in UMS010 Performance Indicator Consolidation and Reviews.	Performance Manager Execution	What was done: Facilitate performance indicators reviews carried out on service delivery; Dashboards updated. Records that prove it: — Completion (%): 100
MP-031.9	Monitor performance indicators actions Task: Verify, record and close performance indicators	Performance Manager Measurement	Indicators measured: 1 row — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.

Step	Step, task and purpose	Role · form	What to type
	Monitor performance indicators actions — step 9 of 9 in UMS010 Performance Indicator Consolidation and Reviews.		

MP-031.1 — Define performance indicators · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	KPI analysis timeliness	Indicator	Affects Dashboards; followed by Performance Manager.	High	Customer complaint log, Jul 2026

MP-031.3 — Collect performance indicators data · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Dashboards	Output	Affects Dashboards; followed by Performance Manager.	High	Process performance dashboard, Jul 2026
2	Trend analysis	Output	Affects Trend analysis; followed by Performance Manager.	Medium	Interview with the process owner, Jun 2026
3	Gap reports	Output	Affects Dashboards; followed by Performance Manager.	Medium	Regulatory watch bulletin, Jun 2026

MP-031.5 — Analyze performance indicators · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Dashboards complete and up to date	30	4	Dashboards reviewed on 2026-08-11; 2 gaps corrected.
2	Requirements of ISO 9001 §9.1.3 met	30	5	Checked against ISO 9001 §9.1.3 with the checklist of the phase gate.
3	Evidence available for Trend analysis	20	3	Records filed in the project: Trend analysis.
4	Results against target	20	5	KPI KPI-20 used as the measure.

MP-031.6 — Identify performance indicators gaps · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Dashboards	Output	Affects Dashboards; followed by Performance Manager.	High	Supplier evaluation file, Jun 2026
2	Trend analysis	Output	Affects Trend analysis; followed by Performance Manager.	Medium	Management review minutes, Jun 2026
3	Gap reports	Output	Affects Dashboards; followed by Performance Manager.	Medium	Customer complaint log, May 2026

MP-031.9 — Monitor performance indicators actions · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	KPI-20 — KPI analysis timeliness	KPI analysis timeliness measures the result of this macro process (Dashboards); it is the KPI its owner reviews at each Monthly review.	88	>= 95%

UMS034 (MP-032) — Management System Performance Monitoring

Set PDCA periodicity; define system indicators; compare data; trigger corrective actions. Owner: Performance Manager. Tier 1. Requirements answered: ISO 9001 §9.1.

Step	Step, task and purpose	Role · form	What to type
MP-032.1	Set management system performance periodicity Task: Plan and prepare management system performance Set management system performance periodicity — step 1 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Periodicity	Frequency: Monthly Next due date: 2026-09-18 Review chaired by: Performance Manager Organization units in scope: Operations Review inputs and notes: Inputs for each review: System indicators; Performance data; Targets. An early review is triggered by: Receipt or update of System indicators, Performance data from Quality mgr, Data analysts.
MP-032.2	Define management system performance indicators Task: Plan and prepare management system performance Define management system performance indicators — step 2 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Register items	Items identified: 2 rows — see the table below
MP-032.3	Collect management system performance data Task: Plan and prepare management system performance Collect management system performance data — step 3 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-032.4	Compare management system performance to plan Task: Plan and prepare management system performance Compare management system performance to plan — step 4 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.6 Conclusion: Weighted score 3.6/5. Main gap: Strategic (market, customer loss). Action recorded in the action plan.
MP-032.5	Identify management system performance anomalies Task: Execute management system performance activities Identify management system performance anomalies — step 5 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-032.6	Generate management system performance reports Task: Execute management system performance activities Generate management system performance reports — step 6 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QMS-UMS034-06 Version: 1.1 Content summary: Health reports for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QMS-PROC-01 — Procedure — Context To Strategy
MP-032.7	Trigger management system performance corrections Task: Execute management system performance activities Trigger management system performance corrections — step 7 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Execution	What was done: Trigger management system performance corrections carried out on service delivery; Health reports updated. Records that prove it: — Completion (%): 100

Step	Step, task and purpose	Role · form	What to type
	management system performance Report on management system performance status — step 8 of 12 in UMS034 Management System Performance Monitoring.		
MP-032.9	Monitor management system performance trends Task: Verify, record and close management system performance Monitor management system performance trends — step 9 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-032.10	Adjust management system performance parameters Task: Verify, record and close management system performance Adjust management system performance parameters — step 10 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Change	Change made: Health reports updated: quote error. Reason: Customer complaint analysis Documents or records updated: —
MP-032.11	Plan monitoring methods Task: Plan & Execute Monitoring Methods Plan monitoring methods — step 11 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Plan	Planned activities (become actions): 1 row — see the table below On completion: rows become actions.
MP-032.12	Execute monitoring and record results Task: Plan & Execute Monitoring Methods Execute monitoring and record results — step 12 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Execution	What was done: Execute monitoring and record results carried out on service delivery; Health reports updated. Records that prove it: Execute monitoring and record results Completion (%): 100

MP-032.2 — Define management system performance indicators · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Monitoring plan execution	Indicator	Affects Health reports; followed by Performance Manager.	High	Internal audit report, Jul 2026
2	Cost of poor quality	Indicator	Affects Anomaly reports; followed by Performance Manager.	Medium	Process performance dashboard, Jul 2026

MP-032.3 — Collect management system performance data · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Health reports	Output	Affects Health reports; followed by Performance Manager.	High	Process performance dashboard, Jul 2026
2	Anomaly reports	Output	Affects Anomaly reports; followed by Performance Manager.	Medium	Interview with the process owner, Jul 2026
3	Corrective triggers	Output	Affects Health reports; followed by Performance Manager.	Medium	Regulatory watch bulletin, Jun 2026

MP-032.4 — Compare management system performance to plan · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Health reports complete and	30	3	Health reports reviewed on 2026-08-11; 2 gaps

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
	up to date			corrected.
2	Requirements of ISO 9001 §9.1 met	30	3	Checked against ISO 9001 §9.1 with the checklist of the phase gate.
3	Evidence available for Anomaly reports	20	4	Records filed in the project: Anomaly reports.
4	Results against target	20	5	KPI KPI-21 used as the measure.

MP-032.5 — Identify management system performance anomalies · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Health reports	Output	Affects Health reports; followed by Performance Manager.	High	Regulatory watch bulletin, Jun 2026
2	Anomaly reports	Output	Affects Anomaly reports; followed by Performance Manager.	Medium	Supplier evaluation file, Jun 2026
3	Corrective triggers	Output	Affects Health reports; followed by Performance Manager.	Medium	Management review minutes, Jun 2026

MP-032.8 — Report on management system performance status · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	Top mgmt	Meeting	2026-08-20	Health reports: what changes for you and what to do by 2026-09-03.	Performance Manager
2	Board	E-mail	2026-08-22	Anomaly reports: what changes for you and what to do by 2026-09-03.	Performance Manager

MP-032.9 — Monitor management system performance trends · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	KPI-21 — Monitoring plan execution	Monitoring plan execution measures the result of this macro process (Health reports); it is the KPI its owner reviews at each Monthly review.	94.5	>= 95%
2	Q-KPI-04 — Cost of poor quality	Cost of poor quality measures the result of this macro process (Health reports); it is the KPI its owner reviews at each Monthly review.	2.1	<= 2%

MP-032.11 — Plan monitoring methods · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Execute monitoring and record results	Omar Haddad	2026-08-25	2026-09-08	Health reports

UMS036 (MP-033) — Operational Process Performance Review

Set periodicity; collect data; conduct workshops; identify root causes. Owner: Performance Manager. Tier 1. Requirements answered: ISO 9001 §9.1.3.

Step	Step, task and purpose	Role · form	What to type
MP-033.1	Set operational process performance periodicity Task: Plan and prepare operational process performance Set operational process performance periodicity — step 1 of 10 in UMS036	Performance Manager Periodicity	Frequency: Monthly Next due date: 2026-09-21 Review chaired by: Performance Manager Organization units in scope: Operations Review inputs and notes: Inputs for each review: KPI data; Defect data; Cycle time data. An early review is triggered by:

Step	Step, task and purpose	Role · form	What to type
	Operational Process Performance Review.		Receipt or update of KPI data, Defect data from Process owner, Facilitator.
MP-033.2	Define operational process performance agenda Task: Plan and prepare operational process performance Define operational process performance agenda — step 2 of 10 in UMS036 Operational Process Performance Review.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-033.3	Collect operational process performance data Task: Plan and prepare operational process performance Collect operational process performance data — step 3 of 10 in UMS036 Operational Process Performance Review.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-033.4	Conduct operational process performance workshops Task: Plan and prepare operational process performance Conduct operational process performance workshops — step 4 of 10 in UMS036 Operational Process Performance Review.	Performance Manager Execution	What was done: Conduct operational process performance workshops carried out on service delivery; Review minutes updated. Records that prove it: — Completion (%): 100
MP-033.5	Compare operational process performance to targets Task: Execute operational process performance activities Compare operational process performance to targets — step 5 of 10 in UMS036 Operational Process Performance Review.	Performance Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4 Conclusion: Weighted score 4/5. Main gap: Operational (process failure, supply chain). Action recorded in the action plan.
MP-033.6	Identify operational process performance causes Task: Execute operational process performance activities Identify operational process performance causes — step 6 of 10 in UMS036 Operational Process Performance Review.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-033.7	Define operational process performance actions Task: Execute operational process performance activities Define operational process performance actions — step 7 of 10 in UMS036 Operational Process Performance Review.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-033.8	Document the process control plan Task: Verify, record and close operational process performance Document the process control plan — step 8 of 10 in UMS036 Operational Process Performance Review.	Performance Manager Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QMS-UMS036-08 Version: 1.1 Content summary: Review minutes for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QMS-PROC-01 — Procedure — Context To Strategy
MP-033.9	Escalate operational process performance issues Task: Verify, record and close operational process performance Escalate operational process performance issues — step 9 of 10 in UMS036 Operational Process	Performance Manager Escalation	Escalated to: Top Management Reason: Review minutes is late beyond tolerance; a decision on resources is needed.

Step	Step, task and purpose	Role · form	What to type
	Performance Review.		
MP-033.10	Monitor operational process performance Task: Verify, record and close operational process performance — step 10 of 10 in UMS036 Operational Process Performance Review.	Performance Manager Measurement	Indicators measured: 1 row — see the table below Analysis of gaps and trend: Trend over the last three months: stable, below target; action opened. Next analysis at the performance review.

MP-033.2 — Define operational process performance agenda · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Review minutes	Output	Affects Review minutes; followed by Performance Manager.	High	Internal audit report, Jul 2026
2	Root cause analysis	Output	Affects Root cause analysis; followed by Performance Manager.	Medium	Process performance dashboard, Jul 2026
3	Improvement plans	Output	Affects Review minutes; followed by Performance Manager.	Medium	Interview with the process owner, Jul 2026

MP-033.3 — Collect operational process performance data · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Review minutes	Output	Affects Review minutes; followed by Performance Manager.	High	Process performance dashboard, Jul 2026
2	Root cause analysis	Output	Affects Root cause analysis; followed by Performance Manager.	Medium	Interview with the process owner, Jul 2026
3	Improvement plans	Output	Affects Review minutes; followed by Performance Manager.	Medium	Regulatory watch bulletin, Jul 2026

MP-033.5 — Compare operational process performance to targets · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Review minutes complete and up to date	30	3	Review minutes reviewed on 2026-08-18; 2 gaps corrected.
2	Requirements of ISO 9001 §9.1.3 met	30	5	Checked against ISO 9001 §9.1.3 with the checklist of the phase gate.
3	Evidence available for Root cause analysis	20	4	Records filed in the project: Root cause analysis.
4	Results against target	20	4	KPI Q-KPI-02 used as the measure.

MP-033.6 — Identify operational process performance causes · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Work instruction not updated after change	Root cause	Affects Review minutes; followed by Performance Manager.	High	Supplier evaluation file, Jun 2026
2	Insufficient training of new operators	Root cause	Affects Root cause analysis; followed by Performance Manager.	Medium	Management review minutes, Jun 2026
3	Supplier batch variation not detected	Root cause	Affects Review minutes; followed by Performance Manager.	Medium	Customer complaint log, Jun 2026

MP-033.7 — Define operational process performance actions · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Review minutes	Output	Affects Review minutes; followed by Performance Manager.	High	Management review minutes, Jun 2026
2	Root cause analysis	Output	Affects Root cause analysis; followed by Performance Manager.	Medium	Customer complaint log, Jun 2026
3	Improvement plans	Output	Affects Review minutes; followed by Performance Manager.	Medium	Internal audit report, May 2026

MP-033.10 — Monitor operational process performance · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Review minutes); it is the KPI its owner reviews at each Monthly review.	94.4	>= 95%

UMS039 (MP-034) — Governance Bodies and Reviews Orchestration

Set periodicity per body; define data; conduct reviews; consolidate decisions. Owner: IMS Manager. Tier 1. Requirements answered: ISO 9001 §9.3.

Documents of this macro process: AT-UNI-QMS-MR (Management review minutes).

Step	Step, task and purpose	Role · form	What to type
MP-034.1	Set governance reviews periodicity Task: Plan and prepare governance reviews Set governance reviews periodicity — step 1 of 11 in UMS039 Governance Bodies and Reviews Orchestration.	IMS Manager Periodicity	Frequency: Monthly Next due date: 2026-09-28 Review chaired by: IMS Manager Organization units in scope: Atlas Universal SME Review inputs and notes: Inputs for each review: Governance calendar; Required data; Decision requirements. An early review is triggered by: Receipt or update of Governance calendar, Required data from Process owner, Facilitator.
MP-034.2	Define governance reviews data Task: Plan and prepare governance reviews Define governance reviews data — step 2 of 11 in UMS039 Governance Bodies and Reviews Orchestration.	IMS Manager Register items	Items identified: 3 rows — see the table below
MP-034.3	Process governance reviews Task: Plan and prepare governance reviews Process governance reviews — step 3 of 11 in UMS039 Governance Bodies and Reviews Orchestration.	IMS Manager Execution	What was done: Process governance reviews carried out on service delivery; Governance calendar updated. Records that prove it: AT-UNI-QMS-MR — Management review minutes; MR-1 — Management review 2026-03; MR-2 — Management review 2026-09 Completion (%): 100
MP-034.4	Hold monthly process mini-reviews Task: Plan and prepare governance reviews Hold monthly process mini-reviews — step 4 of 11 in UMS039 Governance Bodies and Reviews Orchestration.	IMS Manager Review	Review frequency: Quarterly Review date: 2026-08-28 Next review: 2026-11-27 Chaired by: IMS Manager Participants: IMS Manager, Quality Manager Inputs reviewed: 3 rows — see the table below Decisions and actions: 1 row — see the table below On completion: rows become actions.
MP-034.5	Hold full management reviews Task: Execute governance reviews activities Hold full management reviews — step 5 of 11 in UMS039 Governance Bodies and Reviews Orchestration.	IMS Manager Review	Review frequency: Quarterly Review date: 2026-08-30 Next review: 2026-11-29 Chaired by: IMS Manager Participants: IMS Manager, Quality Manager Inputs reviewed: 3 rows — see the table below Decisions and actions: 1 row — see the table below On completion: rows become actions.

Step	Step, task and purpose	Role · form	What to type
MP-034.6	Present results to the Executive Committee Task: Execute governance reviews activities Present results to the Executive Committee — step 6 of 11 in UMS039 Governance Bodies and Reviews Orchestration.	IMS Manager Review	Review frequency: Quarterly Review date: 2026-08-30 Next review: 2026-11-29 Chaired by: IMS Manager Participants: IMS Manager, Quality Manager Inputs reviewed: 3 rows — see the table below Decisions and actions: 1 row — see the table below On completion: rows become actions.
MP-034.7	Hold commercial committee reviews Task: Execute governance reviews activities Hold commercial committee reviews — step 7 of 11 in UMS039 Governance Bodies and Reviews Orchestration.	IMS Manager Review	Review frequency: Quarterly Review date: 2026-08-30 Next review: 2026-11-29 Chaired by: IMS Manager Participants: IMS Manager, Quality Manager Inputs reviewed: 3 rows — see the table below Decisions and actions: 1 row — see the table below On completion: rows become actions.
MP-034.8	Consolidate governance reviews dashboard Task: Execute governance reviews activities Consolidate governance reviews dashboard — step 8 of 11 in UMS039 Governance Bodies and Reviews Orchestration.	IMS Manager Execution	What was done: Consolidate governance reviews dashboard carried out on service delivery; Governance calendar updated. Records that prove it: AT-UNI-QMS-MR — Management review minutes; MR-1 — Management review 2026-03; MR-2 — Management review 2026-09; Update Minutes Completion (%): 100
MP-034.9	Validate governance reviews decisions Task: Verify, record and close governance reviews Validate governance reviews decisions — step 9 of 11 in UMS039 Governance Bodies and Reviews Orchestration.	IMS Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): IMS Manager Decision comment and conditions: Governance calendar approved against ISO 9001; no blocking point.
MP-034.10	Monitor governance reviews actions Task: Verify, record and close governance reviews Monitor governance reviews actions — step 10 of 11 in UMS039 Governance Bodies and Reviews Orchestration.	IMS Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-034.11	Report governance reviews velocity Task: Verify, record and close governance reviews Report governance reviews velocity — step 11 of 11 in UMS039 Governance Bodies and Reviews Orchestration.	IMS Manager Communication	Communication records: 2 rows — see the table below

UMS040 (MP-035) — Customer Satisfaction Barometer Management

Set survey periodicity; define NPS/CSAT; manage campaigns; correlate. Owner: Performance Manager. Tier 1. Requirements answered: ISO 9001 §9.1.2.

Step	Step, task and purpose	Role · form	What to type
MP-035.1	Set customer satisfaction survey periodicity Task: Plan and prepare customer satisfaction survey Set customer satisfaction survey periodicity — step 1 of 9 in UMS040 Customer Satisfaction Barometer Management.	Performance Manager Periodicity	Frequency: Monthly Next due date: 2026-10-03 Review chaired by: Performance Manager Organization units in scope: Operations Review inputs and notes: Inputs for each review: Customer feedback; Survey data; NPS/CSAT targets. An early review is triggered by: Receipt or update of Customer feedback, Survey data from CX mgr, Data analysts.
MP-035.2	Define customer satisfaction survey objectives Task: Plan and prepare customer satisfaction survey Define customer satisfaction survey objectives — step 2 of 9 in UMS040 Customer Satisfaction Barometer Management.	Performance Manager SMART objectives	Objectives (become entries of the objectives register): 4 rows — see the table below On completion: rows become objectives.
MP-035.3	Determine customer satisfaction survey costs Task: Plan and prepare customer satisfaction survey Determine customer satisfaction survey costs — step 3 of 9 in UMS040 Customer Satisfaction Barometer Management.	Performance Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.1 Conclusion: Weighted score 4.1/5. Main gap: Operational (process failure, supply chain). Action recorded in the action plan.
MP-035.4	Manage customer satisfaction survey campaign Task: Execute customer satisfaction survey activities Manage customer satisfaction survey	Performance Manager Execution	What was done: Manage customer satisfaction survey campaign carried out on service delivery; Satisfaction reports updated. Records that prove it: — Completion (%): 100

Step	Step, task and purpose	Role · form	What to type
	campaign — step 4 of 9 in UMS040 Customer Satisfaction Barometer Management.		
MP-035.5	Analyze customer satisfaction survey trends Task: Execute customer satisfaction survey activities Analyze customer satisfaction survey trends — step 5 of 9 in UMS040 Customer Satisfaction Barometer Management.	Performance Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.6 Conclusion: Weighted score 4.6/5. Main gap: Operational (process failure, supply chain). Action recorded in the action plan.
MP-035.6	Generate customer satisfaction survey dashboards Task: Execute customer satisfaction survey activities Generate customer satisfaction survey dashboards — step 6 of 9 in UMS040 Customer Satisfaction Barometer Management.	Performance Manager Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QMS-UMS040-06 Version: 1.1 Content summary: Satisfaction reports for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QMS-PROC-01 — Procedure — Context To Strategy
MP-035.7	Correlate customer satisfaction survey Task: Verify, record and close customer satisfaction survey Correlate customer satisfaction survey — step 7 of 9 in UMS040 Customer Satisfaction Barometer Management.	Performance Manager Execution	What was done: Correlate customer satisfaction survey carried out on service delivery; Satisfaction reports updated. Records that prove it: — Completion (%): 100
MP-035.8	Identify customer satisfaction survey actions Task: Verify, record and close customer satisfaction survey Identify customer satisfaction survey actions — step 8 of 9 in UMS040 Customer Satisfaction Barometer Management.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-035.9	Report to management review Task: Verify, record and close customer satisfaction survey Report to management review — step 9 of 9 in UMS040 Customer Satisfaction Barometer Management.	Performance Manager Communication	Communication records: 2 rows — see the table below

MP-035.2 — Define customer satisfaction survey objectives · Objectives (become entries of the objectives register)

#	Specific objective	Measure (KPI)	Baseline	Achievable target	Relevant to (policy commitment)	Owner	Time-bound deadline	Resources
1	Raise customer satisfaction on technical services	Q-KPI-01 — Customer satisfaction index	78%	>= 85%	Satisfy customer requirements	Julien Moreau	2026-11-10	Quarterly survey; complaint review meeting
2	Deliver technical services on time	Q-KPI-02 — On-time delivery rate	86%	>= 95%	On time, right first time	Claire Martin	2026-08-12	Planning board; one extra technician in summer
3	Reduce the cost of poor quality	Q-KPI-04 — Cost of poor quality	4.1%	<= 2%	Continual improvement	Julien Moreau	2026-11-10	Rework tracking in the NC register
4	Close corrective actions on time	Q-KPI-05 — Corrective actions closed on time	70%	>= 90%	Continual improvement	Tariq Saleh	2026-05-14	Weekly action review

MP-035.3 — Determine customer satisfaction survey costs · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Satisfaction reports complete and up to date	30	4	Satisfaction reports reviewed on 2026-09-01; 2 gaps corrected.
2	Requirements of ISO 9001 §9.1.2 met	30	5	Checked against ISO 9001 §9.1.2 with the checklist of the phase gate.
3	Evidence available for NPS/CSAT scores	20	3	Records filed in the project: NPS/CSAT scores.
4	Results against target	20	4	KPI Q-KPI-01 used as the measure.

MP-035.5 — Analyze customer satisfaction survey trends · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Satisfaction reports complete and up to date	30	5	Satisfaction reports reviewed on 2026-08-30; 2 gaps corrected.
2	Requirements of ISO 9001 §9.1.2 met	30	5	Checked against ISO 9001 §9.1.2 with the checklist of the phase gate.
3	Evidence available for NPS/CSAT scores	20	3	Records filed in the project: NPS/CSAT scores.
4	Results against target	20	5	KPI Q-KPI-01 used as the measure.

MP-035.8 — Identify customer satisfaction survey actions · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Satisfaction reports	Output	Affects Satisfaction reports; followed by Performance Manager.	High	Customer complaint log, Jun 2026
2	NPS/CSAT scores	Output	Affects NPS/CSAT scores; followed by Performance Manager.	Medium	Internal audit report, Jun 2026
3	Trend analysis	Output	Affects Satisfaction reports; followed by Performance Manager.	Medium	Process performance dashboard, Jun 2026

MP-035.9 — Report to management review · Communication records

	programme Plan internal audit programme by risk — step 1 of 9 in GRC008 Internal Audit and Assurance Cycle.	Plan	On completion: rows become actions.
MP-039.2	Develop internal audit programme programs Task: Plan and prepare internal audit programme Develop internal audit programme programs — step 2 of 9 in GRC008 Internal Audit and Assurance Cycle.	Internal Audit Manager Execution	What was done: Develop internal audit programme programs carried out on service delivery; Audit plan updated. Records that prove it: AT-UNI-QMS-AUDPRG — Internal audit programme; Address audit finding: Two controlled documents at service delivery had no revision status Completion (%): 100
MP-039.3	Allocate internal audit programme Task: Plan and prepare internal audit programme Allocate internal audit programme — step 3 of 9 in GRC008 Internal Audit and Assurance Cycle.	Internal Audit Manager Assignment	Role: Internal Audit Manager Person (from the OBS): Nabil Zerouali Organization units covered: Quality RACSI of the macro process: R: Internal Audit Manager · A: IMS Manager · C: Risk Manager · S: Document Controller · I: Top Management
MP-039.4	Test internal audit programme Task: Execute internal audit programme activities Test internal audit programme — step 4 of 9 in GRC008 Internal Audit and Assurance Cycle.	Internal Audit Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3 Conclusion: Weighted score 3/5. Main gap: job sheet not signed. Action recorded in the action plan.
MP-039.5	Document the process control plan Task: Execute internal audit programme activities Document the process control plan — step 5 of 9 in GRC008 Internal Audit and Assurance Cycle.	Internal Audit Manager Document	Document template: TPL-AUDPRG — Internal audit programme Document reference: AT-UNI-QMS-GRC008-05 Version: 2.0 Content summary: Audit plan for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QMS-AUDPRG — Internal audit programme
MP-039.6	Draft internal audit programme report Task: Execute internal audit programme activities Draft internal audit programme report — step 6 of 9 in GRC008 Internal Audit and Assurance Cycle.	Internal Audit Manager Document	Document template: TPL-AUDPRG — Internal audit programme Document reference: AT-UNI-QMS-GRC008-06 Version: 2.0 Content summary: Audit plan for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QMS-AUDPRG — Internal audit programme
MP-039.7	Hold the audit closing meeting Task: Verify, record and close internal audit programme Hold the audit closing meeting — step 7 of 9 in GRC008 Internal Audit and Assurance Cycle.	Internal Audit Manager Execution	What was done: Hold the audit closing meeting carried out on service delivery; Audit plan updated. Records that prove it: AT-UNI-QMS-AUDPRG — Internal audit programme; Address audit finding: Two controlled documents at service delivery had no revision status Completion (%): 100
MP-039.8	Issue internal audit programme report Task: Verify, record and close internal audit programme Issue internal audit programme report — step 8 of 9 in GRC008 Internal Audit and Assurance Cycle.	Internal Audit Manager Document	Document template: TPL-AUDPRG — Internal audit programme Document reference: AT-UNI-QMS-GRC008-08 Version: 2.0 Content summary: Audit plan for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QMS-AUDPRG — Internal audit programme
MP-039.9	Monitor action plans Task: Verify, record and close internal audit programme Monitor action plans — step 9 of 9 in GRC008 Internal Audit and Assurance Cycle.	Internal Audit Manager Measurement	Indicators measured: 1 row — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.

MP-039.1 — Plan internal audit programme by risk · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Develop internal audit programme programs	Nabil Zerouali	2026-09-08	2026-09-22	Audit plan
2	Allocate internal audit programme	Nabil Zerouali	2026-09-13	2026-10-02	Audit programs
3	Test internal audit programme	Nabil Zerouali	2026-09-18	2026-10-12	Audit plan

MP-039.4 — Test internal audit programme · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Audit plan complete and up to date	30	3	Audit plan reviewed on 2026-09-09; 2 gaps corrected.
2	Requirements of ISO 9001 §9.2 met	30	3	Checked against ISO 9001 §9.2 with the checklist of the phase gate.
3	Evidence available for Audit programs	20	3	Records filed in the project: Audit programs.
4	Results against target	20	3	KPI KPI-22 used as the measure.

MP-039.9 — Monitor action plans · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	KPI-22 — Audit programme completion	Audit programme completion measures the result of this macro process (Audit plan); it is the KPI its owner reviews at each Monthly review.	99.5	100%

GRC010 (MP-040) — Executive GRC Reporting and Dashboards

Aggregate data; build dashboards; generate reports; use predictive analytics. Owner: IMS Manager. Tier 1.
Requirements answered: ISO 9001 §9.1.3.

Step	Step, task and purpose	Role · form	What to type
MP-040.1	Aggregate GRC dashboard Task: Plan and prepare GRC dashboard Aggregate GRC dashboard — step 1 of 10 in GRC010 Executive GRC Reporting and Dashboards.	DynamicMS Engine Automated service task	System result confirmed: Aggregate GRC dashboard: done by the DynamicMS Engine; GRC dashboards available in the project. Records produced: —
MP-040.2	Define GRC dashboard needs Task: Plan and prepare GRC dashboard Define GRC dashboard needs — step 2 of 10 in GRC010 Executive GRC Reporting and Dashboards.	IMS Manager Register items	Items identified: 3 rows — see the table below
MP-040.3	Build GRC dashboard Task: Plan and prepare GRC dashboard Build GRC dashboard — step 3 of 10 in GRC010 Executive GRC Reporting and Dashboards.	IMS Manager Execution	What was done: Build GRC dashboard carried out on service delivery; GRC dashboards updated. Records that prove it: — Completion (%): 100
MP-040.4	Generate GRC dashboard reports Task: Plan and prepare GRC dashboard Generate GRC dashboard reports — step 4 of 10 in GRC010 Executive GRC Reporting and Dashboards.	IMS Manager Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QMS-GRC010-04 Version: 1.0 Content summary: GRC dashboards for technical services, aligned with ISO 9001; generated from the project data, then completed by the author.

Step	Step, task and purpose	Role · form	What to type
			Generated document: AT-UNI-QMS-PROC-01 — Procedure — Context To Strategy
MP-040.5	Prepare GRC dashboard submissions Task: Execute GRC dashboard activities Prepare GRC dashboard submissions — step 5 of 10 in GRC010 Executive GRC Reporting and Dashboards.	IMS Manager Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QMS-GRC010-05 Version: 2.0 Content summary: GRC dashboards for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QMS-PROC-01 — Procedure — Context To Strategy
MP-040.6	Validate GRC dashboard Task: Execute GRC dashboard activities Validate GRC dashboard — step 6 of 10 in GRC010 Executive GRC Reporting and Dashboards.	IMS Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): IMS Manager Decision comment and conditions: GRC dashboards approved against ISO 9001; no blocking point.
MP-040.7	Verify GRC dashboard Task: Execute GRC dashboard activities Verify GRC dashboard — step 7 of 10 in GRC010 Executive GRC Reporting and Dashboards.	IMS Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.5 Conclusion: Weighted score 3.5/5. Main gap: job sheet not signed. Action recorded in the action plan.
MP-040.8	Publish GRC dashboard Task: Verify, record and close GRC dashboard Publish GRC dashboard — step 8 of 10 in GRC010 Executive GRC Reporting and Dashboards.	IMS Manager Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QMS-GRC010-08 Version: 2.0 Content summary: GRC dashboards for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QMS-PROC-01 — Procedure — Context To Strategy
MP-040.9	Deliver GRC dashboard Task: Verify, record and close GRC dashboard Deliver GRC dashboard — step 9 of 10 in GRC010 Executive GRC Reporting and Dashboards.	IMS Manager Training	Session / module: Deliver GRC dashboard — practice session Date: 2026-09-21 Units trained: Atlas Universal SME Participants: 6 Effectiveness evaluation method: On-the-job observation Effectiveness (%): 82
MP-040.10	Use predictive analytics Task: Verify, record and close GRC dashboard Use predictive analytics — step 10 of 10 in GRC010 Executive GRC Reporting and Dashboards.	IMS Manager AI-assisted draft	Context given to the assistant: Step: Use predictive analytics. Inputs: Risk data; Compliance data; Audit data. Standards: ISO 9001. Organization: Atlas Universal SME (technical services). Suggestion outcome: Edited Final validated text: GRC dashboards drafted with the assistant and reviewed by IMS Manager: covers ISO 9001.

MP-040.2 — Define GRC dashboard needs · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	GRC dashboards	Output	Affects GRC dashboards; followed by IMS Manager.	High	Internal audit report, Aug 2026
2	Executive reports	Output	Affects Executive reports; followed by IMS Manager.	Medium	Process performance dashboard, Aug 2026
3	Predictive analytics	Output	Affects GRC dashboards; followed by IMS Manager.	Medium	Interview with the process owner, Aug 2026

MP-040.6 — Validate GRC dashboard · Decision criteria checked

#	Criterion	Met	Evidence
1	GRC dashboards complete	Yes	GRC dashboards v1.0
2	Requirements of ISO 9001 §9.1.3 met	Yes	Checklist of the phase gate

#	Criterion	Met	Evidence
3	Risks reviewed	Yes	Risk register

MP-040.7 — Verify GRC dashboard · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	GRC dashboards complete and up to date	30	3	GRC dashboards reviewed on 2026-09-10; 2 gaps corrected.
2	Requirements of ISO 9001 §9.1.3 met	30	4	Checked against ISO 9001 §9.1.3 with the checklist of the phase gate.
3	Evidence available for Executive reports	20	3	Records filed in the project: Executive reports.
4	Results against target	20	4	KPI Q-KPI-01 used as the measure.

DMS086 (MP-147) — SME Peer Benchmarking

Benchmark against peers; identify improvements; learn. Owner: Performance Manager. Tier 7.

Step	Step, task and purpose	Role · form	What to type
MP-147.1	Select SME peer benchmark category Task: Plan and prepare SME peer benchmark Select SME peer benchmark category — step 1 of 10 in DMS086 SME Peer Benchmarking.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-147.2	Define peer group Task: Plan and prepare SME peer benchmark Define peer group — step 2 of 10 in DMS086 SME Peer Benchmarking.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-147.3	Collect SME peer benchmark data Task: Plan and prepare SME peer benchmark Collect SME peer benchmark data — step 3 of 10 in DMS086 SME Peer Benchmarking.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-147.4	Compare SME peer benchmark Task: Plan and prepare SME peer benchmark Compare SME peer benchmark — step 4 of 10 in DMS086 SME Peer Benchmarking.	Performance Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.4 Conclusion: Weighted score 4.4/5. Main gap: Operational (process failure, supply chain). Action recorded in the action plan.
MP-147.5	Identify SME peer benchmark gaps Task: Execute SME peer benchmark activities Identify SME peer benchmark gaps — step 5 of 10 in DMS086 SME Peer Benchmarking.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-147.6	Identify SME peer benchmark strengths Task: Execute SME peer benchmark activities Identify SME peer benchmark strengths — step 6 of 10 in DMS086 SME Peer Benchmarking.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-147.7	Develop SME peer benchmark plan Task: Execute SME peer benchmark activities Develop SME peer benchmark plan —	Performance Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.

Step	Step, task and purpose	Role · form	What to type
	step 7 of 10 in DMS086 SME Peer Benchmarking.		
MP-147.8	Implement SME peer benchmark Task: Verify, record and close SME peer benchmark Implement SME peer benchmark — step 8 of 10 in DMS086 SME Peer Benchmarking.	Performance Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-147.9	Re-benchmark SME peer benchmark Task: Verify, record and close SME peer benchmark Re-benchmark SME peer benchmark — step 9 of 10 in DMS086 SME Peer Benchmarking.	Performance Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: stable, below target; action opened. Next analysis at the performance review.
MP-147.10	Share SME peer benchmark Task: Verify, record and close SME peer benchmark Share SME peer benchmark — step 10 of 10 in DMS086 SME Peer Benchmarking.	Performance Manager Communication	Communication records: 2 rows — see the table below

MP-147.1 — Select SME peer benchmark category · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Benchmarking reports	Output	Affects Benchmarking reports; followed by Performance Manager.	High	Customer complaint log, Sep 2026
2	Gap analysis	Output	Affects Gap analysis; followed by Performance Manager.	Medium	Internal audit report, Aug 2026
3	Strengths analysis	Output	Affects Benchmarking reports; followed by Performance Manager.	Medium	Process performance dashboard, Aug 2026

MP-147.2 — Define peer group · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Benchmarking reports	Output	Affects Benchmarking reports; followed by Performance Manager.	High	Internal audit report, Aug 2026

2	SME management	Intranet	2026-10-13	Essential metrics: what changes for you and what to do by 2026-10-25.	IMS Manager

Gate — G10 — Performance reviewed

Exit criteria: KPIs measured for three periods; management review held; internal audit programme on track.

49. Open Lifecycle and select the phase card; the gate panel is on the right.
50. Tick “KPI dashboard live (mandatory, evidence required)”.
51. Tick “Management review minutes signed (mandatory, evidence required)”.
52. Tick “Internal audit programme ≥ 90% complete (mandatory, evidence required)”.
53. Tick “Owner dashboard configured (mandatory, evidence required)”.
54. Tick “Top 10 risks reviewed quarterly (mandatory, evidence required)”.
55. Sign in as Top Management (ceo@...) or the IMS Manager and select Go. For Hold or No-Go, type a comment explaining why.

E2E-11 — Audit To Assurance

Goals: Provide assurance through AI, foresight, IoT, ESG, analytics

From trigger to terminal event: Predictive analytics alert, regulatory change, or assurance requirement → Risks predicted; compliance assured; ESG and carbon reported

DMS004 (MP-065) — Intelligent Document Generation

Auto-generate documents; ensure compliance; reduce effort. Owner: Document Controller. Tier 3.

Step	Step, task and purpose	Role · form	What to type
MP-065.1	Select generated documents template Task: Plan and prepare generated documents Select generated documents template — step 1 of 8 in DMS004 Intelligent Document Generation.	Document Controller Register items	Items identified: 3 rows — see the table below
MP-065.2	Gather generated documents data Task: Plan and prepare generated documents Gather generated documents data — step 2 of 8 in DMS004 Intelligent Document Generation.	Document Controller Register items	Items identified: 3 rows — see the table below
MP-065.3	Generate generated documents draft Task: Plan and prepare generated documents Generate generated documents draft — step 3 of 8 in DMS004 Intelligent Document Generation.	Document Controller Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QMS-DMS004-03 Version: 2.0 Content summary: Generated docs for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: —
MP-065.4	Validate generated documents against standards Task: Execute generated documents activities Validate generated documents against standards — step 4 of 8 in DMS004 Intelligent Document Generation.	Document Controller Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Document Controller Decision comment and conditions: Generated docs approved against ISO 9001; no blocking point.
MP-065.5	Route generated documents for review Task: Execute generated documents activities Route generated documents for review — step 5 of 8 in DMS004 Intelligent Document Generation.	Document Controller Execution	What was done: Route generated documents for review carried out on service delivery; Generated docs updated. Records that prove it: — Completion (%): 100
MP-065.6	Publish generated documents Task: Execute generated documents activities Publish generated documents — step 6 of 8 in DMS004 Intelligent Document Generation.	Document Controller Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QMS-DMS004-06 Version: 1.0 Content summary: Generated docs for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: —
MP-065.7	Track generated documents version Task: Verify, record and close generated documents Track generated documents version — step 7 of 8 in DMS004 Intelligent Document Generation.	Document Controller Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-065.8	Archive generated documents Task: Verify, record and close generated documents Archive generated documents — step 8 of 8 in DMS004 Intelligent Document Generation.	Document Controller Closure	Closure evidence: Generated docs closed; effectiveness verified on the KPI and evidence filed. Records that prove effectiveness: — Closure date: 2026-10-10

MP-065.1 — Select generated documents template · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Generated docs	Output	Affects Generated docs; followed by Document Controller.	High	Customer complaint log, Sep 2026
2	Compliance validation	Output	Affects Compliance validation; followed by Document Controller.	Medium	Internal audit report, Sep 2026
3	Approval records	Output	Affects Generated docs; followed by Document Controller.	Medium	Process performance dashboard, Sep 2026

MP-065.2 — Gather generated documents data · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Generated docs	Output	Affects Generated docs; followed by Document Controller.	High	Internal audit report, Aug 2026
2	Compliance validation	Output	Affects Compliance validation; followed by Document Controller.	Medium	Process performance dashboard, Aug 2026
3	Approval records	Output	Affects Generated docs; followed by Document Controller.	Medium	Interview with the process owner, Aug 2026

MP-065.4 — Validate generated documents against standards · Decision criteria checked

#	Criterion	Met	Evidence
1	Generated docs complete	Yes	Generated docs v1.0
2	Requirements of ISO 9001 met	Yes	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

MP-065.7 — Track generated documents version · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Generated docs); it is the KPI its owner reviews at each Monthly review.	81.5	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Generated docs); it is the KPI its owner reviews at each Monthly review.	94.4	>= 95%

DMS027 (MP-088) — AI Explainability and Confidence Scoring

Log AI recommendations with confidence; provide explainability; human-in-the-loop. Owner: Transformation Manager. Tier 4.

Step	Step, task and purpose	Role · form	What to type
MP-088.1	Define requirements per agent Task: Plan and prepare AI explanations Define requirements per agent — step 1 of 8 in DMS027 AI Explainability and Confidence Scoring.	Transformation Manager Register items	Items identified: 1 row — see the table below
MP-088.2	Log agent answers with confidence score Task: Plan and prepare AI explanations Log agent answers with confidence score — step 2 of 8 in DMS027 AI Explainability and Confidence Scoring.	DynamicMS Engine Automated service task	System result confirmed: Log agent answers with confidence score: done by the DynamicMS Engine; AI recommendation logs available in the project. Records produced: —
MP-088.3	Attach source refs Task: Plan and prepare AI explanations Attach source refs — step 3 of 8 in DMS027 AI Explainability and Confidence Scoring.	Transformation Manager Execution	What was done: Attach source refs carried out on service delivery; AI recommendation logs updated. Records that prove it: — Completion (%): 100
MP-088.4	Enable human review Task: Execute AI explanations	Transformation Manager	Settings: 2 rows — see the table below Tested before use: Yes

Step	Step, task and purpose	Role · form	What to type
	activities Enable human review — step 4 of 8 in DMS027 AI Explainability and Confidence Scoring.	Configuration	
MP-088.5	Track AI explanations accuracy Task: Execute AI explanations activities Track AI explanations accuracy — step 5 of 8 in DMS027 AI Explainability and Confidence Scoring.	Transformation Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-088.6	Generate AI explanations reports Task: Execute AI explanations activities Generate AI explanations reports — step 6 of 8 in DMS027 AI Explainability and Confidence Scoring.	Transformation Manager Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QMS-DMS027-06 Version: 2.0 Content summary: AI recommendation logs for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: —
MP-088.7	Conduct bias audits Task: Verify, record and close AI explanations Conduct bias audits — step 7 of 8 in DMS027 AI Explainability and Confidence Scoring.	Transformation Manager Execution	What was done: Conduct bias audits carried out on service delivery; AI recommendation logs updated. Records that prove it: — Completion (%): 100
MP-088.8	Update AI explanations models Task: Verify, record and close AI explanations Update AI explanations models — step 8 of 8 in DMS027 AI Explainability and Confidence Scoring.	Transformation Manager AI-assisted draft	Context given to the assistant: Step: Update AI explanations models. Inputs: AI outputs; Confidence scores; Source references. Standards: ISO 9001. Organization: Atlas Universal SME (technical services). Suggestion outcome: Accepted Final validated text: AI recommendation logs drafted with the assistant and reviewed by Transformation Manager: covers ISO 9001.

MP-088.1 — Define requirements per agent · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	ISO 9001	Requirement	Affects AI recommendation logs; followed by Transformation Manager.	High	Customer complaint log, Sep 2026

MP-088.4 — Enable human review · Settings

#	Setting	Value	Reason
1	Enable human review	Enabled for service delivery	Needed to produce AI recommendation logs
2	Owner and notification	Transformation Manager	Alerts go to the process owner

MP-088.5 — Track AI explanations accuracy · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (AI recommendation logs); it is the KPI its owner reviews at each Monthly review.	81.5	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (AI recommendation logs); it is the KPI its owner reviews at each Monthly review.	94.4	>= 95%

This phase has no gate for the project track; it closes when its last step is completed.

E2E-12 — Correction To Innovation

Goals: Drive continual improvement, innovation, automation, ecosystem

From trigger to terminal event: Improvement opportunity, innovation idea, or automation candidate → Improvements implemented; innovations deployed; ecosystem expanded

DMS093 (MP-154) — SME Growth Readiness

Prepare for growth; scale processes; ensure IMS scales. Owner: Transformation Manager. Tier 7.

Step	Step, task and purpose	Role · form	What to type
MP-154.1	Assess SME growth readiness plans Task: Plan and prepare SME growth readiness Assess SME growth readiness plans — step 1 of 10 in DMS093 SME Growth Readiness.	Transformation Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.8 Conclusion: Weighted score 3.8/5. Main gap: Strategic (market, customer loss). Action recorded in the action plan.
MP-154.2	Identify SME growth readiness gaps Task: Plan and prepare SME growth readiness Identify SME growth readiness gaps — step 2 of 10 in DMS093 SME Growth Readiness.	Transformation Manager Register items	Items identified: 3 rows — see the table below
MP-154.3	Plan SME growth readiness scaling Task: Plan and prepare SME growth readiness Plan SME growth readiness scaling — step 3 of 10 in DMS093 SME Growth Readiness.	Transformation Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-154.4	Upgrade SME growth readiness configuration Task: Plan and prepare SME growth readiness Upgrade SME growth readiness configuration — step 4 of 10 in DMS093 SME Growth Readiness.	Transformation Manager Change	Change made: Growth readiness assessment updated: quote error. Reason: Finding of the internal audit Documents or records updated: —
MP-154.5	Add SME growth readiness users Task: Execute SME growth readiness activities Add SME growth readiness users — step 5 of 10 in DMS093 SME Growth Readiness.	Transformation Manager Execution	What was done: Add SME growth readiness users carried out on service delivery; Growth readiness assessment updated. Records that prove it: — Completion (%): 100
MP-154.6	Expand SME growth readiness compliance Task: Execute SME growth readiness activities Expand SME growth readiness compliance — step 6 of 10 in DMS093 SME Growth Readiness.	Transformation Manager Execution	What was done: Expand SME growth readiness compliance carried out on service delivery; Growth readiness assessment updated. Records that prove it: — Completion (%): 100
MP-154.7	Add SME growth readiness standards Task: Execute SME growth readiness activities Add SME growth readiness standards — step 7 of 10 in DMS093 SME Growth Readiness.	Transformation Manager Execution	What was done: Add SME growth readiness standards carried out on service delivery; Growth readiness assessment updated. Records that prove it: — Completion (%): 100
MP-154.8	Train new employees on the management system Task: Verify, record and close SME growth readiness Train new employees on the management system — step 8 of 10 in DMS093 SME Growth Readiness.	Transformation Manager Training	Session / module: Train new employees on the management system — practice session Date: 2026-11-08 Units trained: Operations Participants: 13 Effectiveness evaluation method: Quiz Effectiveness (%): 97

Step	Step, task and purpose	Role · form	What to type
MP-154.9	Monitor SME growth readiness Task: Verify, record and close SME growth readiness Monitor SME growth readiness — step 9 of 10 in DMS093 SME Growth Readiness.	Transformation Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-154.10	Review SME growth readiness Task: Verify, record and close SME growth readiness Review SME growth readiness — step 10 of 10 in DMS093 SME Growth Readiness.	Transformation Manager Execution	What was done: Review SME growth readiness carried out on service delivery; Growth readiness assessment updated. Records that prove it: — Completion (%): 100

MP-154.1 — Assess SME growth readiness plans · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Growth readiness assessment complete and up to date	30	3	Growth readiness assessment reviewed on 2026-10-21; 2 gaps corrected.
2	Requirements of ISO 9001 met	30	3	Checked against ISO 9001 with the checklist of the phase gate.
3	Evidence available for Scaling plans	20	5	Records filed in the project: Scaling plans.
4	Results against target	20	5	KPI Q-KPI-01 used as the measure.

MP-154.2 — Identify SME growth readiness gaps · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Growth readiness assessment	Output	Affects Growth readiness assessment; followed by Transformation Manager.	High	Internal audit report, Oct 2026
2	Scaling plans	Output	Affects Scaling plans; followed by Transformation Manager.	Medium	Process performance dashboard, Sep 2026
3	Upgraded configuration	Output	Affects Growth readiness assessment; followed by Transformation Manager.	Medium	Interview with the process owner, Sep 2026

MP-154.3 — Plan SME growth readiness scaling · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Upgrade SME growth readiness configuration	Karim Tazi	2026-10-30	2026-11-13	Growth readiness assessment
2	Add SME growth readiness users	Karim Tazi	2026-11-04	2026-11-23	Scaling plans
3	Expand SME growth readiness compliance	Karim Tazi	2026-11-09	2026-12-03	Growth readiness assessment

MP-154.9 — Monitor SME growth readiness · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Growth readiness assessment); it is the KPI its owner reviews at each Monthly review.	81.5	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Growth readiness assessment); it is the KPI its owner reviews at each Monthly review.	94.4	>= 95%

DMS098 (MP-159) — SME Budget-Conscious Improvement

Drive improvement within constraints; prioritize high-impact; maximize ROI. Owner: Quality Manager. Tier 7.

Step	Step, task and purpose	Role · form	What to type
MP-159.1	Collect low-cost improvements ideas Task: Plan and prepare low-cost improvements Collect low-cost improvements ideas — step 1 of 10 in DMS098 SME Budget-Conscious Improvement.	Quality Manager Register items	Items identified: 3 rows — see the table below
MP-159.2	Assess low-cost improvements cost/impact Task: Plan and prepare low-cost improvements Assess low-cost improvements cost/impact — step 2 of 10 in DMS098 SME Budget-Conscious Improvement.	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.1 Conclusion: Weighted score 4.1/5. Main gap: Operational (process failure, supply chain). Action recorded in the action plan.
MP-159.3	Prioritize low-cost improvements by ROI Task: Plan and prepare low-cost improvements Prioritize low-cost improvements by ROI — step 3 of 10 in DMS098 SME Budget-Conscious Improvement.	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.5 Conclusion: Weighted score 3.5/5. Main gap: job sheet not signed. Action recorded in the action plan.
MP-159.4	Allocate low-cost improvements budget Task: Plan and prepare low-cost improvements Allocate low-cost improvements budget — step 4 of 10 in DMS098 SME Budget-Conscious Improvement.	Quality Manager Assignment	Role: Quality Manager Person (from the OBS): Julien Moreau Organization units covered: Quality RACSI of the macro process: R: Quality Manager · A: IMS Manager · C: Risk Manager · S: Document Controller · I: Top Management
MP-159.5	Implement low-cost improvements Task: Execute low-cost improvements activities Implement low-cost improvements — step 5 of 10 in DMS098 SME Budget-Conscious Improvement.	Quality Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-159.6	Monitor low-cost improvements Task: Execute low-cost improvements activities Monitor low-cost improvements — step 6 of 10 in DMS098 SME Budget-Conscious Improvement.	Quality Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-159.7	Measure low-cost improvements ROI Task: Execute low-cost improvements activities Measure low-cost improvements ROI — step 7 of 10 in DMS098 SME Budget-Conscious Improvement.	Quality Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-159.8	Standardize low-cost improvements Task: Verify, record and close low-cost improvements Standardize low-cost improvements — step 8 of 10 in DMS098 SME Budget-Conscious Improvement.	Quality Manager Change	Change made: Improvement pipeline updated: Strategic (market, customer loss). Reason: Finding of the internal audit Documents or records updated: —
MP-159.9	Recognize contributors to low-cost improvements Task: Verify, record and close low-cost improvements Recognize contributors to low-cost improvements — step 9 of 10 in DMS098 SME Budget-Conscious	Quality Manager Execution	What was done: Recognize contributors to low-cost improvements carried out on service delivery; Improvement pipeline updated. Records that prove it: — Completion (%): 100

Step	Step, task and purpose	Role · form	What to type
	Improvement.		
MP-159.10	Report on low-cost improvements status Task: Verify, record and close low-cost improvements Report on low-cost improvements status — step 10 of 10 in DMS098 SME Budget-Conscious Improvement.	Quality Manager Communication	Communication records: 2 rows — see the table below

MP-159.1 — Collect low-cost improvements ideas · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Digitize technical services records to cut cycle time	Opportunity	Affects Improvement pipeline; followed by Quality Manager.	High	Customer complaint log, Oct 2026
2	Extend certification to win technical services tenders	Opportunity	Affects Prioritized initiatives; followed by Quality Manager.	Medium	Internal audit report, Oct 2026
3	Supplier development programme for technical services	Opportunity	Affects Improvement pipeline; followed by Quality Manager.	Medium	Process performance dashboard, Oct 2026

MP-159.2 — Assess low-cost improvements cost/impact · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Improvement pipeline complete and up to date	30	5	Improvement pipeline reviewed on 2026-11-10; 2 gaps corrected.
2	Requirements of ISO 9001 met	30	4	Checked against ISO 9001 with the checklist of the phase gate.
3	Evidence available for Prioritized initiatives	20	4	Records filed in the project: Prioritized initiatives.
4	Results against target	20	3	KPI Q-KPI-01 used as the measure.

MP-159.3 — Prioritize low-cost improvements by ROI · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Improvement pipeline complete and up to date	30	3	Improvement pipeline reviewed on 2026-11-12; 2 gaps corrected.
2	Requirements of ISO 9001 met	30	4	Checked against ISO 9001 with the checklist of the phase gate.
3	Evidence available for Prioritized initiatives	20	4	Records filed in the project: Prioritized initiatives.
4	Results against target	20	3	KPI Q-KPI-01 used as the measure.

MP-159.5 — Implement low-cost improvements · Settings

#	Setting	Value	Reason
1	Implement low-cost improvements	Enabled for service delivery	Needed to produce Improvement pipeline
2	Owner and notification	Quality Manager	Alerts go to the process owner

MP-159.6 — Monitor low-cost improvements · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Improvement pipeline); it is the KPI its owner reviews at each Monthly review.	81.5	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Improvement pipeline); it is the KPI its owner reviews at each Monthly review.	94.4	>= 95%

MP-159.7 — Measure low-cost improvements ROI · Indicators measured

DMS100 (MP-161) — SME Collaborative Community

Connect with peers; share knowledge; reduce isolation; accelerate learning. Owner: Transformation Manager. Tier 7.

Step	Step, task and purpose	Role · form	What to type
MP-161.1	Join SME community Task: Plan and prepare SME community Join SME community — step 1 of 10 in DMS100 SME Collaborative Community.	Transformation Manager Execution	What was done: Join SME community carried out on service delivery; Community profile updated. Records that prove it: — Completion (%): 100
MP-161.2	Create SME community profile Task: Plan and prepare SME community Create SME community profile — step 2 of 10 in DMS100 SME Collaborative Community.	Transformation Manager Execution	What was done: Create SME community profile carried out on service delivery; Community profile updated. Records that prove it: — Completion (%): 100
MP-161.3	Browse SME community Task: Plan and prepare SME community Browse SME community — step 3 of 10 in DMS100 SME Collaborative Community.	Transformation Manager Execution	What was done: Browse SME community carried out on service delivery; Community profile updated. Records that prove it: — Completion (%): 100
MP-161.4	Ask questions about SME community Task: Plan and prepare SME community Ask questions about SME community — step 4 of 10 in DMS100 SME Collaborative Community.	Transformation Manager Execution	What was done: Ask questions about SME community carried out on service delivery; Community profile updated. Records that prove it: — Completion (%): 100
MP-161.5	Share SME community Task: Execute SME community	Transformation Manager	Communication records: 2 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	activities Share SME community — step 5 of 10 in DMS100 SME Collaborative Community.	Communication	
MP-161.6	Participate in SME community activities Task: Execute SME community activities Participate in SME community activities — step 6 of 10 in DMS100 SME Collaborative Community.	Transformation Manager Execution	What was done: Participate in SME community activities carried out on service delivery; Community profile updated. Records that prove it: — Completion (%): 100
MP-161.7	Attend SME community events Task: Execute SME community activities Attend SME community events — step 7 of 10 in DMS100 SME Collaborative Community.	Transformation Manager Execution	What was done: Attend SME community events carried out on service delivery; Community profile updated. Records that prove it: — Completion (%): 100
MP-161.8	Collaborate on SME community Task: Verify, record and close SME community Collaborate on SME community — step 8 of 10 in DMS100 SME Collaborative Community.	Transformation Manager Execution	What was done: Collaborate on SME community carried out on service delivery; Community profile updated. Records that prove it: — Completion (%): 100
MP-161.9	Rate SME community contributions Task: Verify, record and close SME community Rate SME community contributions — step 9 of 10 in DMS100 SME Collaborative Community.	Transformation Manager Execution	What was done: Rate SME community contributions carried out on service delivery; Community profile updated. Records that prove it: — Completion (%): 100
MP-161.10	Report SME community value Task: Verify, record and close SME community Report SME community value — step 10 of 10 in DMS100 SME Collaborative Community.	Transformation Manager Communication	Communication records: 2 rows — see the table below

MP-161.5 — Share SME community · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	SME owner	E-mail	2026-12-09	Community profile: what changes for you and what to do by 2026-12-23.	Transformation Manager
2	SME employees	Intranet	2026-12-11	Discussion records: what changes for you and what to do by 2026-12-23.	Transformation Manager

MP-161.10 — Report SME community value · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	SME owner	Intranet	2026-12-18	Community profile: what changes for you and what to do by 2027-01-01.	Transformation Manager
2	SME employees	Notice board	2026-12-20	Discussion records: what changes for you and what to do by 2027-01-01.	Transformation Manager

This phase has no gate for the project track; it closes when its last step is completed.

Records created along the run

Besides the workflow steps, the run creates records in the Records and Governance menus. The examples below are the ones seeded in the demonstration; type the same values to reproduce them.

Report a problem (nonconformity)

56. Open Records › Nonconformities and select Report a problem.
57. Title: type “job sheet not signed”.
58. Description: type “Detected on 2025-12-10 at service delivery. Immediate containment applied and affected items segregated.”.
59. Source: choose Process. Criticality: choose Major.
60. Select Submit. A Critical problem raises an alert to the Quality Manager and top management.
61. Open the nonconformity and select Move to Analysis, then type the root cause (“Supplier batch variation not detected at receiving”).
62. Select Add action: type the title, choose an owner and a different evaluator, and a due date.
63. When all actions are closed, move to Verification then Closed; type the lessons learned (what went well, what did not, recommendation).

Record a risk

64. Open Governance › Risks and opportunities and select Add.
65. Title: “Financial (cash flow, cost)”; kind Risk; likelihood 5; impact 5.
66. Treatment: “Reduce”, then select Save. The heatmap updates immediately.

Code	Kind	Title	$L \times I$
UNI-R04	Risk	Financial (cash flow, cost)	$5 \times 5 = 25$
RSK-19	Risk	Business interruption	$5 \times 4 = 20$
UNI-R02	Risk	Operational (process failure, supply chain)	$4 \times 5 = 20$
UNI-R03	Risk	Compliance (regulatory, certification)	$4 \times 5 = 20$
UNI-R06	Risk	Technology (system, cyber)	$4 \times 5 = 20$

Record a KPI measurement

67. Open Governance › KPIs and select KPI-01 — Policy review on time rate.
68. In Record a measurement, type the period (for example 2026-09) and the value (for example 96.6); target 100%.
69. Select Record. A value off target raises a KPI alert to the Performance Manager and the IMS Manager.

Audit programme

Code	Audit	Standard	Planned	Status
AUD-AT-UNI-QMS-01	Internal audit — People To Capability	ISO 9001	2026-03-15	Completed
AUD-AT-UNI-QMS-02	Internal audit — Requirements To Delivery	ISO 9001	2026-05-14	Completed
AUD-AT-UNI-QMS-03	Supplier audit — Requirements To Delivery	ISO 9001	2026-06-13	Completed
AUD-AT-UNI-QMS-04	Mock certification audit — Compliance To Achievement	ISO 9001	2026-07-23	Completed
AUD-AT-UNI-QMS-05	Internal audit — Verification To Preparedness	ISO 9001	2026-09-11	Completed

Code	Audit	Standard	Planned	Status
AUD-AT-UNI-QMS-06	Certification audit (stage 2) — Compliance To Achievement	ISO 9001	2026-10-01	Planned
AUD-AT-UNI-QMS-07	Surveillance audit — Monitoring To Evaluation	ISO 9001	2026-11-27	Planned

To add a finding: open the audit, select Add finding, choose the type (Major, Minor, Observation, OFI), type the clause and the finding; for Major and Minor choose the action owner and a different evaluator.

Documented information generated from the templates

Every document below is generated from an IMS template and filled with the data of this run (issues, interested parties, objectives, RACSI, KPIs, risks, audits, nonconformities...). Open Records › Documents and select Download to get it in PDF, Word or Excel.

Create the project

73. Sign in as the IMS Manager and open Organization › New project.

74. Select Manual.

75. Name: type “QHSE full run 2025–2026 — Atlas Universal SME”. Management system: QHSE.
Start date: 2025-12-01.

76. Tick the phases that need a gate (for an SME, the track decides: Light E2E-01 and E2E-10;
Standard adds E2E-04 and E2E-09; Advanced adds E2E-03 and E2E-08).

77. Set the complexity levels below and keep the recommended track (TRK-STANDARD); select
Create project.

Criterion	Weight	Level to choose
CX-01	20	3
CX-02	10	3
CX-03	20	3
CX-04	15	3
CX-05	15	3
CX-06	10	3
CX-07	10	2

Resulting complexity score: 48 / 100; recommended track TRK-STANDARD, chosen TRK-STANDARD.

Note. The demonstration database already contains this project with its full run. To practise, create a copy with another name, or open the seeded project and follow the steps that are still open.

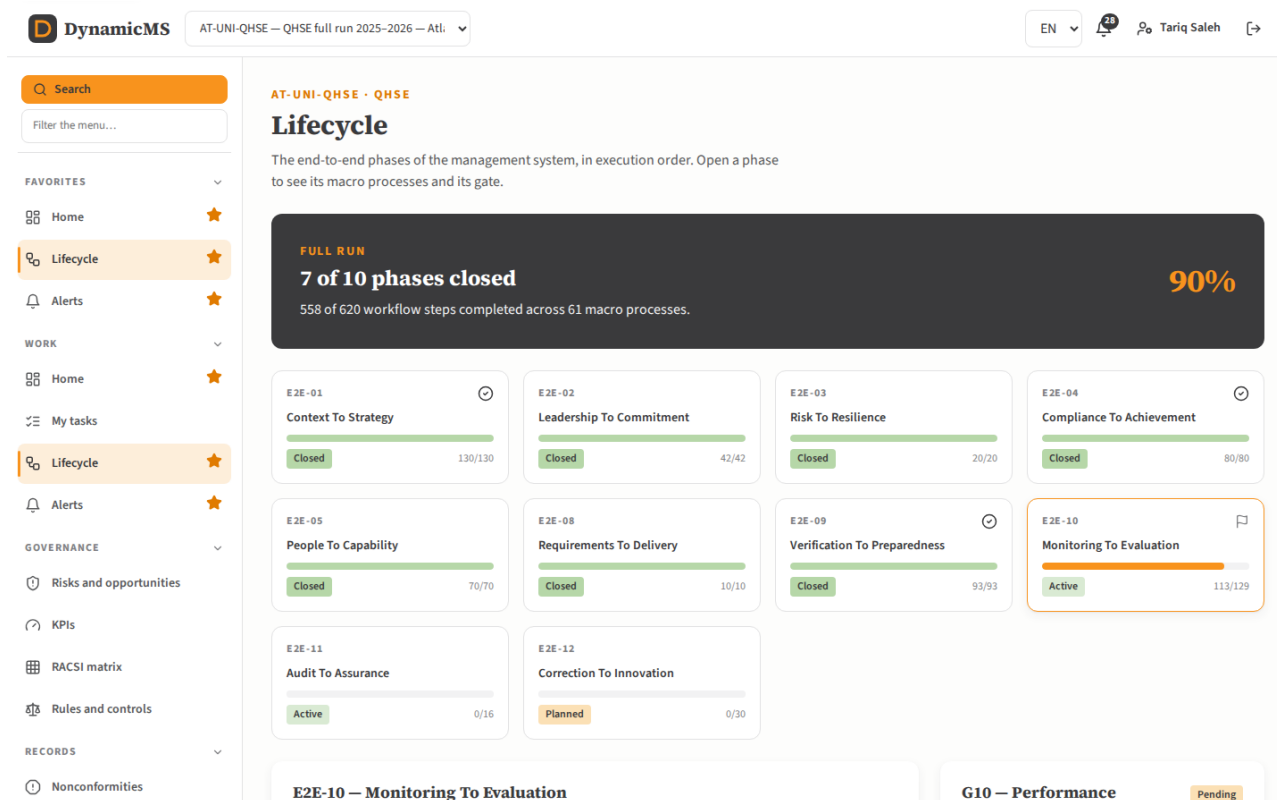

Figure — Lifecycle screen: phase cards with progress and gate status.

Run the lifecycle, phase by phase

The run has 10 phases, 61 macro processes and 620 steps. For each step the tables give the step identifier, the responsible role, the form and what to type in each field. Values between quotes are typed as shown; choose list values as written.

E2E-01 — Context To Strategy

Goals: Define context, policy, strategy, objectives, compliance, governance

From trigger to terminal event: Strategic planning cycle, management review output, or significant context change → Approved policy, strategy, objectives, risk register, compliance framework in place

UMS016 (MP-001) — Context Analysis and Stakeholder Mapping

Understand internal/external issues; identify interested parties; define IMS scope. Owner: IMS Manager. Tier 1. Requirements answered: ISO 9001 §4.1, §4.2, §4.3.

Documents of this macro process: AT-UNI-QHSE-CTX (Context and interested parties analysis); AT-UNI-QHSE-PSHEET-UMS016 (Macro process sheet — Context Analysis and Stakeholder Mapping); AT-UNI-QHSE-REG-IP (Interested parties register); AT-UNI-QHSE-REQ (Customer requirements review record); AT-UNI-QHSE-SCOPE (Scope of the management system).

Step	Step, task and purpose	Role · form	What to type

MP-001.9	Document and communicate the context analysis Task: Verify, record and close organizational context Document and communicate the context analysis — step 9 of 10 in UMS016 Context Analysis and Stakeholder Mapping.	IMS Manager Document	Document template: TPL-SCOPE — Scope of the management system Document reference: AT-UNI-QHSE-UMS016-09 Version: 1.0 Content summary: Context analysis report for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QHSE-SCOPE — Scope of the management system
MP-001.10	Review organizational context periodically	IMS Manager Review	Review frequency: Annual Review date: 2025-12-08

Step	Step, task and purpose	Role · form	What to type
	Task: Verify, record and close organizational context Review organizational context periodically — step 10 of 10 in UMS016 Context Analysis and Stakeholder Mapping.		Next review: 2026-12-08 Chaired by: IMS Manager Participants: Top Management, Quality Manager, Operations Manager, Risk Manager Inputs reviewed: 3 rows — see the table below Decisions and actions: 2 rows — see the table below On completion: rows become actions.

MP-001.2 — Identify external issues · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Price competition from informal technical services providers	Economic	Pressure on quote margins; risk of losing price-sensitive local businesses.	High	Sales team market study, Q3 2025
2	Customers require ISO 9001 certification in tenders	Market and customers	Certification is needed to keep and win contracts with local businesses.	High	Tender files received in 2025 (4 of 11 require ISO 9001)
3	ISO 9001 amendment on climate change (Amd 1:2024)	Legal and regulatory	Context analysis must state whether climate change is a relevant issue.	Medium	ISO 9001:2015/Amd 1:2024; regulatory watch bulletin
4	Availability and price of spare parts	Supply	Delays when parts are missing; lead times doubled for imported references.	Medium	Supplier evaluation file and purchase orders 2025
5	Customers send requests through portals and messaging	Technological	Requests can be lost if they are not logged in one place.	Medium	Customer request log, sample of 60 requests

MP-001.3 — Identify internal issues · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Job sheet not signed	Process	No proof of service accepted; invoices disputed and paid late.	High	Review of records Jan–Oct 2025: 14% not compliant
2	Quote error	Commercial	Rework of quotes and margin loss; two customer complaints.	High	Quotation register: 9 corrections in Q3 2025
3	Workload peaks on service delivery	Resources	Late completion during summer peaks; overtime above 12%.	Medium	Planning board and overtime records
4	Know-how held by two senior staff	Competence	Dependency on two people; no written work instructions.	Medium	Competence matrix 2025

MP-001.4 — Identify interested parties · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Customers (local businesses)	External party	On-time service, correct quotes, signed proof of service, clear invoices.	High	Customer satisfaction survey 2025 (n = 48)
2	Employees and their representatives	Internal party	Safe work, training, clear instructions, workload planning.	High	Staff meeting minutes, October 2025
3	Owner and shareholders	Internal party	Profitable growth, certification obtained within 12 months.	High	Business plan 2025–2027
4	Suppliers of spare parts	External party	Forecast of needs, clear specifications, payment on time.	Medium	Supplier meetings, 2025
5	Certification body	External party	Conforming management system, access to records and people.	Medium	Certification contract
6	Authorities (labour inspection, municipality)	External party	Compliance with labour law, business licence and waste rules.	Medium	Legal register

MP-001.5 — Determine needs and expectations of interested parties · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Customer requirements identified and written down	30	4	Requirements of the 12 main customers are in the requirements matrix; 2 framework contracts still to review.
2	Legal and regulatory requirements identified	20	3	Labour and licence requirements listed; vehicle and waste rules to confirm with the legal register (MP-028).
3	Requirements adopted as compliance obligations	20	3	Adopted for customers and authorities; supplier expectations kept as information.
4	Needs monitored (survey, meetings, complaints)	15	4	Annual survey and monthly complaint review in place.
5	Requirements reflected in processes and objectives	15	3	On-time service and quote accuracy objectives defined; proof of service to add to the delivery process.

MP-001.6 — Validate and cascade stakeholder requirements · Decision criteria checked

#	Criterion	Met	Evidence
1	Issues reviewed with top management	Yes	Meeting of 2025-12-06
2	Interested parties and requirements validated	Yes	Interested parties register v1.0
3	Requirements cascaded to process owners	Partly	Sent to operations and sales; purchasing on the next meeting

MP-001.7 — Identify interactions between processes · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Sales and quotation → Service delivery	Interface	Validated quote and job order with customer requirements.	High	Job order form
2	Service delivery → Invoicing	Interface	Signed proof of service; the missing signature causes "job sheet not signed".	High	Job sheet
3	Purchasing → Service delivery	Interface	Availability of spare parts on the planned date.	Medium	Purchase orders and stock list
4	Human resources → All processes	Interface	Competent and authorized staff; training plan.	Medium	Competence matrix
5	Management → All processes	Interface	Policy, objectives, resources and review decisions.	Medium	Management review minutes

MP-001.8 — Define or review the management system scope · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Design and delivery of technical services for local businesses in the Agadir region	Scope statement	Covers sales and quotation, planning, delivery, invoicing and after-sales.	High	Strategic plan and service catalogue
2	Head office and workshop, Agadir	Site	Single site; interventions at customer premises are included.	High	Business licence
3	ISO 9001 §8.3 Design and development	Non-applicable requirement	Not applicable: services follow customer or manufacturer specifications; no design responsibility.	Medium	Contracts review
4	Vehicle maintenance	Outsourced process	Outsourced to an approved garage; controlled through the supplier evaluation.	Low	Service contract

MP-001.10 — Review organizational context periodically · Inputs reviewed

#	Input	Finding
1	External and internal issues	New competitor offer at lower price; issues list still valid.
2	Interested parties register	Add the new logistics partner.
3	Customer satisfaction and complaints	Satisfaction 82% (target 85%); complaints on quotes down by 40%.

MP-001.10 — Review organizational context periodically · Decisions and actions

#	Decision	Owner	Due date
1	Add supplier price risk to the risk register	Adam Rahmani	2026-01-07
2	Update the scope statement for the new maintenance contracts	Tariq Saleh	2026-01-22

UMS022 (MP-002) — Quality Policy and Strategic Direction Definition

Establish quality policy; define strategic direction; secure top mgmt commitment. Owner: IMS Manager. Tier 1. Requirements answered: ISO 9001 §5.1, §5.2.

Documents of this macro process: AT-UNI-QHSE-POL-IMS (Integrated QHSE policy); AT-UNI-QHSE-PSHEET-UMS022 (Macro process sheet — Quality Policy and Strategic Direction Definition).

Step	Step, task and purpose	Role · form	What to type
MP-002.10	Select the standards and scope type of the quality policy Task: Plan and prepare quality policy Select the standards and scope type of the quality policy — step 1 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Standards and scope	Standards the management system applies: ISO 9001, ISO 14001, ISO 45001 Scope type: Integrated Organization units covered: Headquarters, Agadir site Why these standards: Integrated policy for ISO 9001, ISO 14001, ISO 45001: customers ask for ISO 9001, and the owner wants to prevent road and workshop accidents and control waste.

Step	Step, task and purpose	Role · form	What to type
MP-002.1	Fix quality policy review periodicity Task: Plan and prepare quality policy Fix quality policy review periodicity — step 2 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Periodicity	Frequency: Annual Next due date: 2026-12-08 Review chaired by: Top Management Organization units in scope: Headquarters, Agadir site Review inputs and notes: Reviewed at each management review, and earlier after a change of strategy, a merger, a new site or a major customer requirement.
MP-002.3	Consult top management on the quality policy Task: Plan and prepare quality policy Consult top management on the quality policy — step 3 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Register items	Items identified: 4 rows — see the table below
MP-002.11	Generate the quality policy draft from the template Task: Execute quality policy activities Generate the quality policy draft from the template — step 4 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager AI-assisted draft	Context given to the assistant: Standards: ISO 9001, ISO 14001, ISO 45001. Scope: technical services for local businesses in Agadir. Commitments from the management consultation: on-time and right-first-time service, legal compliance, staff competence, continual improvement. Strategic direction: reference provider in the region by 2027. Suggestion outcome: Edited Final validated text: Atlas Universal SME provides technical services to local businesses in the Agadir region. We commit to: satisfy our customers and the applicable legal requirements; provide safe and healthy working conditions and prevent injury and ill health; protect the environment and prevent pollution; consult and involve our workers; set measurable objectives every year and continually improve our integrated management system (ISO 9001, ISO 14001, ISO 45001).
MP-002.2	Adapt the quality policy commitments to the organization Task: Execute quality policy activities Adapt the quality policy commitments to the organization — step 5 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Document	Document template: TPL-POL-IMS — Integrated QHSE policy Document reference: AT-UNI-QHSE-POL Version: 0.2 Content summary: Commitments adapted: "right first time" wording, signed proof of service, reference to the 2027 strategic direction. Generated document: AT-UNI-QHSE-POL-IMS — Integrated QHSE policy
MP-002.4	Integrate mandatory commitments into the quality policy Task: Execute quality policy activities Integrate mandatory commitments into the quality policy — step 6 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Register items	Items identified: 4 rows — see the table below
MP-002.5	Align the quality policy with ISO requirements and strategy Task: Execute quality policy activities Align the quality policy with ISO requirements and strategy — step 7 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Execution	What was done: Policy cross-checked with the strategic plan 2025–2027 and the requirements matrix: two wording changes (customer proof of service, 2027 direction). No conflict with customer contracts. Records that prove it: AT-UNI-QHSE-POL-IMS — Integrated QHSE policy Completion (%): 100
MP-002.12	Check the quality policy draft against ISO 9001 §5.2 Task: Verify, record and close quality policy Check the quality policy draft against ISO 9001 §5.2 — step 8 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Assessment	Decision matrix: 5 rows — see the table below Weighted score (1–5): 4.4 Conclusion: Draft meets ISO 9001 §5.2.1 (weighted score 4.4). §5.2.2 will be met once the communication step is done. Ready for top management approval.
MP-002.6	Obtain top management approval of the quality policy Task: Verify, record and close quality policy Obtain top management approval of	IMS Manager Decision	Decision criteria checked: 2 rows — see the table below Decision: Go Approver (Accountable): Top Management Decision comment and conditions: Approved and signed by the Managing Director. Publish version 1.0.

Step	Step, task and purpose	Role · form	What to type
	the quality policy — step 9 of 13 in UMS022 Quality Policy and Strategic Direction Definition.		
MP-002.13	Publish the quality policy and generate its files Task: Verify, record and close quality policy Publish the quality policy and generate its files — step 10 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	DynamicMS Engine Automated service task	System result confirmed: Quality policy v1.0 published; DOCX and PDF generated; notice-board version printed. Records produced: AT-UNI-QHSE-POL-IMS — Integrated QHSE policy; AT-UNI-QHSE-PSHEET-UMS022 — Macro process sheet — Quality Policy and Strategic Direction Definition
MP-002.7	Communicate the quality policy Task: Verify, record and close quality policy Communicate the quality policy — step 11 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Communication	Communication records: 3 rows — see the table below
MP-002.8	Plan the quality policy review Task: Verify, record and close quality policy Plan the quality policy review — step 12 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Review	Review frequency: Annual Review date: 2025-12-15 Next review: 2026-12-15 Chaired by: Top Management Participants: IMS Manager, Quality Manager, Operations Manager Inputs reviewed: 3 rows — see the table below Decisions and actions: 1 row — see the table below On completion: rows become actions.
MP-002.9	Update the quality policy document Task: Verify, record and close quality policy Update the quality policy document — step 13 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Change	Change made: Added a commitment on confidentiality of customer data (new maintenance contracts). Version 1.1 issued. Reason: Decision D-1 of the policy review Documents or records updated: AT-UNI-QHSE-POL-IMS — Integrated QHSE policy; Add a confidentiality commitment for customer data

MP-002.3 — Consult top management on the quality policy · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Meet customer requirements on time, first time	Commitment	Priority of the Managing Director: on-time service and correct quotes.	High	Interview with the Managing Director, 2025-12-05
2	Comply with legal and contractual requirements	Commitment	Includes customer contracts and labour law.	High	Interview with the Managing Director
3	Develop staff competence	Commitment	Two senior technicians coach the new hires.	Medium	HR interview
4	Become the reference technical services provider in the Agadir region by 2027	Strategic direction	Strategic direction for the objectives.	High	Strategic plan 2025–2027

MP-002.4 — Integrate mandatory commitments into the quality policy · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	§5.2.1 a) Appropriate to purpose and context	Commitment	First sentence describes technical services, local businesses and the region.	High	Policy draft v0.2, paragraph 1
2	§5.2.1 b) Framework for quality objectives	Commitment	"Set measurable quality objectives every year".	High	Policy draft v0.2, commitment 4
3	§5.2.1 c) Commitment to satisfy applicable	Commitment	Customer, legal and contractual requirements named.	High	Policy draft v0.2, commitment 2

#	Item	Category	Description and impact	Relevance	Source / evidence
	requirements				
4	§5.2.1 d) Commitment to continual improvement	Commitment	"Continually improve our quality management system".	High	Policy draft v0.2, commitment 4

MP-002.12 — Check the quality policy draft against ISO 9001 §5.2 · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	§5.2.1 a) Appropriate to the purpose and context	20	5	Services, customers and region described.
2	§5.2.1 b) Framework for setting objectives	20	4	Measurable objectives required every year; link to KPIs to show in MP-003.
3	§5.2.1 c) Commitment to satisfy applicable requirements	20	5	Explicit.
4	§5.2.1 d) Commitment to continual improvement	20	5	Explicit.
5	§5.2.2 Available, communicated, understood	20	3	Communication plan ready (step 11); understanding to check in the next internal audit.

MP-002.6 — Obtain top management approval of the quality policy · Decision criteria checked

#	Criterion	Met	Evidence
1	Compliance check against ISO 9001 §5.2 done	Yes	Decision matrix, step 8 (score 4.4)
2	Consistent with strategic direction	Yes	Strategic plan 2025–2027

MP-002.7 — Communicate the quality policy · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	Operations	Meeting	2025-12-13	Toolbox talk: what the policy means for each job (right first time, signed job sheet).	IMS Manager
2	All employees	Notice board	2025-12-14	Signed policy posted in the workshop and the office.	Document Controller
3	Customers and interested parties	Portal	2025-12-16	Policy published on the website.	IMS Manager

MP-002.8 — Plan the quality policy review · Inputs reviewed

#	Input	Finding
1	Changes in context and strategy	New maintenance contract segment.
2	Achievement of quality objectives	3 of 4 objectives on track.
3	Audit results and staff feedback	Policy known by 90% of interviewed staff.

MP-002.8 — Plan the quality policy review · Decisions and actions

#	Decision	Owner	Due date
1	Add a confidentiality commitment for customer data	Tariq Saleh	2026-01-04

UMS031 (MP-003) — Quality Objectives and Targets Deployment

Cascade strategic objectives; deploy SMART objectives; assign responsibilities; monitor. Owner: IMS Manager. Tier 1. Requirements answered: ISO 9001 §6.2.

Documents of this macro process: AT-UNI-QHSE-OBJ (Objectives and action plan); AT-UNI-QHSE-PSHEET-UMS031 (Macro process sheet — Quality Objectives and Targets Deployment).

Step	Step, task and purpose	Role · form	What to type
MP-003.1	Cascade the quality policy into quality objectives Task: Plan and prepare quality objectives Cascade the quality policy into quality objectives — step 1 of 10 in UMS031 Quality Objectives and Targets Deployment.	IMS Manager SMART objectives	Objectives (become entries of the objectives register): 2 rows — see the table below On completion: rows become objectives.
MP-003.2	Define SMART quality objectives Task: Plan and prepare quality objectives Define SMART quality objectives — step 2 of 10 in UMS031 Quality Objectives and Targets Deployment.	IMS Manager SMART objectives	Objectives (become entries of the objectives register): 4 rows — see the table below On completion: rows become objectives.
MP-003.3	Align quality objectives with the quality policy Task: Plan and prepare quality objectives Align quality objectives with the quality policy — step 3 of 10 in UMS031 Quality Objectives and Targets Deployment.	IMS Manager Execution	What was done: Each objective linked to a policy commitment and to one KPI of the dashboard; no objective without an owner. Records that prove it: AT-UNI-QHSE-OBJ — Objectives and action plan; OBJ-1 — Raise customer satisfaction on technical services; OBJ-2 — Deliver technical services on time; Deliver objective: Raise customer satisfaction on technical services Completion (%): 100
MP-003.4	Designate an owner for each quality objective Task: Plan and prepare quality objectives Designate an owner for each quality objective — step 4 of 10 in UMS031 Quality Objectives and Targets Deployment.	IMS Manager Plan	Planned activities (become actions): 4 rows — see the table below On completion: rows become actions.
MP-003.5	Deploy quality objectives in the objectives register Task: Execute quality objectives activities Deploy quality objectives in the objectives register — step 5 of 10 in UMS031 Quality Objectives and Targets Deployment.	DynamicMS Engine Automated service task	System result confirmed: Deploy quality objectives in the objectives register: done by the DynamicMS Engine; Objectives available in the project. Records produced: AT-UNI-QHSE-OBJ — Objectives and action plan; AT-UNI-QHSE-PSHEET-UMS031 — Macro process sheet — Quality Objectives and Targets Deployment; OBJ-1 — Raise customer satisfaction on technical services; OBJ-2 — Deliver technical services on time; OBJ-3 — Reduce the cost of poor quality; OBJ-4 — Close corrective actions on time; Deliver objective: Raise customer satisfaction on technical services
MP-003.6	Monitor progress of quality objectives Task: Execute quality objectives activities Monitor progress of quality objectives — step 6 of 10 in UMS031 Quality Objectives and Targets Deployment.	IMS Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-003.7	Display quality objectives at workstations Task: Execute quality objectives activities Display quality objectives at workstations — step 7 of 10 in UMS031 Quality Objectives and Targets Deployment.	IMS Manager Execution	What was done: Objectives board displayed in the workshop and the office; monthly results updated by the Performance Manager. Records that prove it: AT-UNI-QHSE-OBJ — Objectives and action plan; OBJ-1 — Raise customer satisfaction on technical services; OBJ-2 — Deliver technical services on time; Deliver objective: Raise customer satisfaction on technical services Completion (%): 100
MP-003.8	Adjust quality objectives and targets Task: Verify, record and close quality	IMS Manager Change	Change made: Objectives updated: quote error. Reason: Finding of the internal audit

Step	Step, task and purpose	Role · form	What to type
	objectives Adjust quality objectives and targets — step 8 of 10 in UMS031 Quality Objectives and Targets Deployment.		Documents or records updated: AT-UNI-QHSE-OBJ — Objectives and action plan; OBJ-1 — Raise customer satisfaction on technical services; OBJ-2 — Deliver technical services on time; Deliver objective: Raise customer satisfaction on technical services
MP-003.9	Recognize teams that reach quality objectives Task: Verify, record and close quality objectives Recognize teams that reach quality objectives — step 9 of 10 in UMS031 Quality Objectives and Targets Deployment.	IMS Manager Execution	What was done: Recognize teams that reach quality objectives carried out on service delivery; Objectives updated. Records that prove it: AT-UNI-QHSE-OBJ — Objectives and action plan; OBJ-1 — Raise customer satisfaction on technical services; OBJ-2 — Deliver technical services on time; Deliver objective: Raise customer satisfaction on technical services Completion (%): 100
MP-003.10	Translate quality policy commitments into objective statements Task: Verify, record and close quality objectives Translate quality policy commitments into objective statements — step 10 of 10 in UMS031 Quality Objectives and Targets Deployment.	IMS Manager SMART objectives	Objectives (become entries of the objectives register): 2 rows — see the table below On completion: rows become objectives.

MP-003.1 — Cascade the quality policy into quality objectives · Objectives (become entries of the objectives register)

#	Specific objective	Measure (KPI)	Baseline	Achievable target	Relevant to (policy commitment)	Owner	Time-bound deadline	Resources
1	Raise customer satisfaction on technical services	Q-KPI-01 — Customer satisfaction index	78%	>= 85%	Satisfy customer requirements	Julien Moreau	2026-11-26	Quarterly survey; complaint review meeting
2	Deliver technical services on time	Q-KPI-02 — On-time delivery rate	86%	>= 95%	On time, right first time	Claire Martin	2026-08-28	Planning board; one extra technician in summer

MP-003.2 — Define SMART quality objectives · Objectives (become entries of the objectives register)

#	Specific objective	Measure (KPI)	Baseline	Achievable target	Relevant to (policy commitment)	Owner	Time-bound deadline	Resources
1	Raise customer satisfaction on technical services	Q-KPI-01 — Customer satisfaction index	78%	>= 85%	Satisfy customer requirements	Julien Moreau	2026-11-26	Quarterly survey; complaint review meeting
2	Deliver technical services on time	Q-KPI-02 — On-time delivery rate	86%	>= 95%	On time, right first time	Claire Martin	2026-08-28	Planning board; one extra technician in summer
3	Reduce the cost of poor quality	Q-KPI-04 — Cost of poor quality	4.1%	<= 2%	Continual improvement	Julien Moreau	2026-11-26	Rework tracking in the NC register
4	Close corrective actions on time	Q-KPI-05 — Corrective actions closed on time	70%	>= 90%	Continual improvement	Tariq Saleh	2026-05-30	Weekly action review

MP-003.4 — Designate an owner for each quality objective · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Build the action plan for: Raise customer satisfaction on technical services	Julien Moreau	2025-12-18	2026-01-08	Action plan approved
2	Build the action plan for: Deliver technical services on time	Claire Martin	2025-12-18	2026-01-15	Action plan approved
3	Build the action plan for: Reduce the cost of poor quality	Julien Moreau	2025-12-18	2026-01-22	Action plan approved
4	Build the action plan for: Close corrective actions on time	Tariq Saleh	2025-12-18	2026-01-29	Action plan approved

MP-003.6 — Monitor progress of quality objectives · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Objectives); it is the KPI its owner reviews at each Monthly review.	82.5	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Objectives); it is the KPI its owner reviews at each Monthly review.	97.2	>= 95%

MP-003.10 — Translate quality policy commitments into objective statements · Objectives (become entries of the objectives register)

#	Specific objective	Measure (KPI)	Baseline	Achievable target	Relevant to (policy commitment)	Owner	Time-bound deadline	Resources
1	Reduce the cost of poor quality	Q-KPI-04 — Cost of poor quality	4.1%	<= 2%	Continual improvement	Julien Moreau	2026-11-26	Rework tracking in the NC register
2	Close corrective actions on time	Q-KPI-05 — Corrective actions closed on time	70%	>= 90%	Continual improvement	Tariq Saleh	2026-05-30	Weekly action review

UMS002 (MP-004) — Process Architecture Mapping

Define architecture; identify core/support; map in BPMN; assign RACI. Owner: Process Excellence Manager. Tier 1. Requirements answered: ISO 9001 §4.4.

Documents of this macro process: AT-UNI-QHSE-PMAP (Process map and interactions); AT-UNI-QHSE-PSHEET-UMS002 (Macro process sheet — Process Architecture Mapping); AT-UNI-QHSE-RACSI (RACSI matrix).

Step	Step, task and purpose	Role · form	What to type
MP-004.1	Define the process architecture scope Task: Plan and prepare process architecture Define the process architecture scope — step 1 of 13 in UMS002 Process Architecture Mapping.	Process Excellence Manager Register items	Items identified: 2 rows — see the table below
MP-004.2	Identify core, support and management processes Task: Plan and prepare process architecture Identify core, support and management processes — step 2 of 13 in UMS002	Process Excellence Manager Register items	Items identified: 6 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	Process Architecture Mapping.		
MP-004.3	Map each process in BPMN Task: Plan and prepare process architecture Map each process in BPMN — step 3 of 13 in UMS002 Process Architecture Mapping.	Process Excellence Manager Register items	Items identified: 3 rows — see the table below
MP-004.4	Assign RACSI roles to each process Task: Execute process architecture activities Assign RACSI roles to each process — step 4 of 13 in UMS002 Process Architecture Mapping.	Process Excellence Manager Assignment	Role: Process Excellence Manager Person (from the OBS): Nadia Chraibi Organization units covered: Quality RACSI of the macro process: R: Process Excellence Manager · A: IMS Manager · C: HSE Manager · S: Document Controller · I: Top Management
MP-004.5	Validate the process map with process owners Task: Execute process architecture activities Validate the process map with process owners — step 5 of 13 in UMS002 Process Architecture Mapping.	Process Excellence Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Process Excellence Manager Decision comment and conditions: Process map validated; publish version 1.0.
MP-004.6	Verify process map alignment with ISO 9001 §4.4 Task: Execute process architecture activities Verify process map alignment with ISO 9001 §4.4 — step 6 of 13 in UMS002 Process Architecture Mapping.	Process Excellence Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.5 Conclusion: Process approach in place (weighted score 3.5). Complete KPIs and risk review for purchasing and HR before the mock audit.
MP-004.7	Publish the process map Task: Verify, record and close process architecture Publish the process map — step 7 of 13 in UMS002 Process Architecture Mapping.	Process Excellence Manager Document	Document template: TPL-PMAP — Process map and interactions Document reference: AT-UNI-QHSE-UMS002-07 Version: 2.0 Content summary: Architecture map for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QHSE-PMAP — Process map and interactions
MP-004.8	Review the process map Task: Verify, record and close process architecture Review the process map — step 8 of 13 in UMS002 Process Architecture Mapping. MP-004.13	Group atomic sheets into composite sheet Task: Compile Macro Process Sheets Group atomic sheets into composite sheet — step 13 of 13 in UMS002 Process Architecture Mapping.	Process Excellence Manager Execution	What was done: Group atomic sheets into composite sheet carried out on service delivery; Architecture map updated. Records that prove it: AT-UNI-QHSE-PMAP — Process map and interactions; Update BPMN diagrams Completion (%): 100

MP-004.1 — Define the process architecture scope · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	All activities of Atlas Universal SME in the Agadir region	Scope statement	Same boundary as the management system scope (MP-001 step 8).	High	Scope statement v1.0
2	Three levels: macro process > task > step	Modeling rule	Steps are the lowest level and carry the forms and records.	Medium	Process level definitions

MP-004.2 — Identify core, support and management processes · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Strategy and management review	Management process	Owner: Managing Director	High	Organization chart
2	Sales and quotation	Core process	Owner: Operations Manager	High	Organization chart
3	Delivery of technical services	Core process	Owner: Operations Manager	High	Job orders
4	Purchasing and suppliers	Support process	Owner: Quality Manager	Medium	Purchase procedure
5	People and competence	Support process	Owner: HR Manager	Medium	Competence matrix
6	Measurement, audit and improvement	Management process	Owner: Quality Manager	Medium	Audit programme

MP-004.3 — Map each process in BPMN · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Delivery of technical services: request → planning → intervention → signed job sheet → invoice	BPMN diagram	Two lanes (Operations, Customer); gateway "job sheet signed?" before invoicing.	High	Process workshop with the technicians
2	Sales and quotation: request → site visit → quote → second check → customer approval	BPMN diagram	Second check added to prevent quote errors.	High	Quotation register
3	Purchasing: need →	BPMN diagram	Reception check against the order.	Medium	Purchase orders

#	Item	Category	Description and impact	Relevance	Source / evidence
	order → reception check → stock				

MP-004.5 — Validate the process map with process owners · Decision criteria checked

#	Criterion	Met	Evidence
1	Every process has an owner	Yes	RACSI matrix
2	Inputs, outputs and interactions shown	Yes	Process map v0.9
3	Owners agree with their process description	Yes	Validation meeting minutes

MP-004.6 — Verify process map alignment with ISO 9001 §4.4 · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	§4.4.1 a–b) Inputs, outputs, sequence and interaction determined	25	4	All core processes modeled in BPMN.
2	§4.4.1 c) Criteria, methods and KPIs	25	3	KPIs defined for core processes; support processes to complete.
3	§4.4.1 d–e) Resources, responsibilities and authorities	25	4	RACSI for every macro process.
4	§4.4.1 f) Risks and opportunities addressed	25	3	Linked to the risk register; 2 processes without risk review.

MP-004.8 — Review the process map · Inputs reviewed

#	Input	Finding
1	Scope	Scope still valid; minor updates made.
2	Strategy	No major change since the last review.
3	Process inventory	Gap found on BPMN diagrams.

MP-004.8 — Review the process map · Decisions and actions

#	Decision	Owner	Due date
1	Update BPMN diagrams	Nadia Chraibi	2026-01-25

UMS023 (MP-005) — SIPOC and Value Stream Mapping

Define SIPOC; map value stream; identify value-added steps; optimize flow. Owner: Process Excellence Manager. Tier 1. Requirements answered: ISO 9001 §4.4, §8.1.

Documents of this macro process: AT-UNI-QHSE-PSHEET-UMS023 (Macro process sheet — SIPOC and Value Stream Mapping).

Step	Step, task and purpose	Role · form	What to type
MP-005.1	Define SIPOC and value stream scope Task: Plan and prepare SIPOC and value stream Define SIPOC and value stream scope — step 1 of 14 in UMS023 SIPOC and Value Stream Mapping.	Process Excellence Manager Register items	Items identified: 3 rows — see the table below

GRC005 (MP-028) — Regulatory and Compliance Obligations Mapping

Maintain legal register; identify obligations; link to controls; monitor changes. Owner: Compliance Officer. Tier 1. Requirements answered: ISO 9001 §4.2, ISO 14001 §6.1.3, ISO 45001 §6.1.3.

Documents of this macro process: AT-UNI-QHSE-LEGAL (Compliance obligations register); AT-UNI-QHSE-PSHEET-GRC005 (Macro process sheet — Regulatory and Compliance Obligations Mapping).

Step	Step, task and purpose	Role · form	What to type
MP-028.1	Maintain legal register Task: Plan and prepare compliance obligations Maintain legal register — step 1 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.	Compliance Officer Document	Document template: TPL-LEGAL — Compliance obligations register Document reference: AT-UNI-QHSE-GRC005-01 Version: 1.0 Content summary: Legal register for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QHSE-LEGAL — Compliance obligations register
MP-028.2	Identify compliance obligations Task: Plan and prepare compliance obligations Identify compliance obligations — step 2 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.	Compliance Officer Register items	Items identified: 3 rows — see the table below
MP-028.3	Link compliance obligations to policies/controls Task: Plan and prepare compliance obligations Link compliance obligations to policies/controls — step 3 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.	Compliance Officer Execution	What was done: Link compliance obligations to policies/controls carried out on service delivery; Legal register updated. Records that prove it: AT-UNI-QHSE-LEGAL — Compliance obligations register; OB-S1 — ISO 9001; OB-S2 — ISO 14001 Completion (%): 100
MP-028.4	Monitor compliance obligations changes Task: Plan and prepare compliance	Compliance Officer Measurement	Indicators measured: 1 row — see the table below Analysis of gaps and trend: Trend over the last three months: stable, below target; action opened. Next analysis at the

Step	Step, task and purpose	Role · form	What to type
	obligations Monitor compliance obligations changes — step 4 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.		performance review.
MP-028.5	Assess compliance obligations impact Task: Execute compliance obligations activities Assess compliance obligations impact — step 5 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.	Compliance Officer Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.9 Conclusion: Weighted score 3.9/5. Main gap: Strategic (market, customer loss). Action recorded in the action plan.
MP-028.6	Validate compliance obligations Task: Execute compliance obligations activities Validate compliance obligations — step 6 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.	Compliance Officer Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Compliance Officer Decision comment and conditions: Legal register approved against ISO 9001; no blocking point.
MP-028.7	Adjust compliance obligations policies Task: Execute compliance obligations activities Adjust compliance obligations policies — step 7 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.	Compliance Officer Change	Change made: Legal register updated: Strategic (market, customer loss). Reason: Change in regulation Documents or records updated: AT-UNI-QHSE-LEGAL — Compliance obligations register; OB-S1 — ISO 9001; OB-S2 — ISO 14001
MP-028.8	Submit compliance obligations declarations Task: Verify, record and close compliance obligations Submit compliance obligations declarations — step 8 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.	Compliance Officer Execution	What was done: Submit compliance obligations declarations carried out on service delivery; Legal register updated. Records that prove it: AT-UNI-QHSE-LEGAL — Compliance obligations register; OB-S1 — ISO 9001; OB-S2 — ISO 14001 Completion (%): 100
MP-028.9	Manage compliance obligations inspections Task: Verify, record and close compliance obligations Manage compliance obligations inspections — step 9 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.	Compliance Officer Execution	What was done: Manage compliance obligations inspections carried out on service delivery; Legal register updated. Records that prove it: AT-UNI-QHSE-LEGAL — Compliance obligations register; OB-S1 — ISO 9001; OB-S2 — ISO 14001 Completion (%): 100
MP-028.10	Report compliance obligations Task: Verify, record and close compliance obligations Report compliance obligations — step 10 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.	Compliance Officer Communication	Communication records: 2 rows — see the table below

MP-028.2 — Identify compliance obligations · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	ISO 9001	Requirement	Affects Legal register; followed by Compliance Officer.	High	Internal audit report, Dec 2025
2	ISO 14001	Requirement	Affects Compliance obligations; followed by Compliance Officer.	Medium	Process performance dashboard, Nov 2025
3	ISO 45001	Requirement	Affects Legal register; followed by Compliance Officer.	Medium	Interview with the process owner, Nov 2025

MP-028.4 — Monitor compliance obligations changes · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	KPI-08 — Obligations mapped to process elements	Obligations mapped to process elements measures the result of this macro process (Legal register); it is the KPI its owner reviews at each Monthly review.	100	100%

MP-028.5 — Assess compliance obligations impact · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Legal register complete and up to date	30	3	Legal register reviewed on 2026-01-01; 2 gaps corrected.
2	Requirements of ISO 9001 §4.2, ISO 14001 §6.1.3, ISO 45001 §6.1.3 met	30	4	Checked against ISO 9001 §4.2, ISO 14001 §6.1.3, ISO 45001 §6.1.3 with the checklist of the phase gate.
3	Evidence available for Compliance obligations	20	5	Records filed in the project: Compliance obligations.
4	Results against target	20	4	KPI KPI-08 used as the measure.

MP-028.6 — Validate compliance obligations · Decision criteria checked

#	Criterion	Met	Evidence
1	Legal register complete	Yes	Legal register v1.0
2	Requirements of ISO 9001 §4.2, ISO 14001 §6.1.3, ISO 45001 §6.1.3 met	Yes	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

GRC001 (MP-036) — Policy and Procedure Governance

Define policy lifecycle; identify gaps; validate and approve; publish and renew. Owner: IMS Manager. Tier 1. Requirements answered: ISO 9001 §5.2, §7.5.

Documents of this macro process: AT-UNI-QHSE-CHANGE (Control of changes record); AT-UNI-QHSE-MAN (Management system manual).

Step	Step, task and purpose	Role · form	What to type
MP-036.1	Define policies and procedures lifecycle Task: Plan and prepare policies and procedures Define policies and procedures lifecycle — step 1 of 11 in GRC001 Policy and Procedure Governance.	IMS Manager Register items	Items identified: 3 rows — see the table below
MP-036.2	Identify policies and procedures gaps Task: Plan and prepare policies and procedures Identify policies and procedures gaps — step 2 of 11 in GRC001 Policy and Procedure Governance.	IMS Manager Register items	Items identified: 3 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
MP-036.3	Draft policies and procedures Task: Plan and prepare policies and procedures Draft policies and procedures — step 3 of 11 in GRC001 Policy and Procedure Governance.	IMS Manager Document	Document template: TPL-MAN — Management system manual Document reference: AT-UNI-QHSE-GRC001-03 Version: 2.0 Content summary: Policies for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QHSE-MAN — Management system manual
MP-036.4	Align policies and procedures Task: Plan and prepare policies and procedures Align policies and procedures — step 4 of 11 in GRC001 Policy and Procedure Governance.	IMS Manager Execution	What was done: Align policies and procedures carried out on service delivery; Policies updated. Records that prove it: AT-UNI-QHSE-MAN — Management system manual; CHG-01 — New quotation template with second check; CHG-02 — Replace the job sheet with a tablet form Completion (%): 100
MP-036.5	Submit policies and procedures Task: Execute policies and procedures activities Submit policies and procedures — step 5 of 11 in GRC001 Policy and Procedure Governance.	IMS Manager Execution	What was done: Submit policies and procedures carried out on service delivery; Policies updated. Records that prove it: AT-UNI-QHSE-MAN — Management system manual; CHG-01 — New quotation template with second check; CHG-02 — Replace the job sheet with a tablet form Completion (%): 100
MP-036.6	Validate policies and procedures Task: Execute policies and procedures activities Validate policies and procedures — step 6 of 11 in GRC001 Policy and Procedure Governance.	IMS Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): IMS Manager Decision comment and conditions: Policies approved against ISO 9001; no blocking point.
MP-036.7	Approve policies and procedures Task: Execute policies and procedures activities Approve policies and procedures — step 7 of 11 in GRC001 Policy and Procedure Governance.	IMS Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): IMS Manager Decision comment and conditions: Policies approved against ISO 9001; no blocking point.
MP-036.8	Publish policies and procedures Task: Execute policies and procedures activities Publish policies and procedures — step 8 of 11 in GRC001 Policy and Procedure Governance.	IMS Manager Document	Document template: TPL-MAN — Management system manual Document reference: AT-UNI-QHSE-GRC001-08 Version: 2.0 Content summary: Policies for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QHSE-MAN — Management system manual
MP-036.9	Notify owners of policies and procedures Task: Verify, record and close policies and procedures Notify owners of policies and procedures — step 9 of 11 in GRC001 Policy and Procedure Governance.	IMS Manager Communication	Communication records: 2 rows — see the table below
MP-036.10	Schedule policies and procedures renewal Task: Verify, record and close policies and procedures Schedule policies and procedures renewal — step 10 of 11 in GRC001 Policy and Procedure Governance.	IMS Manager Plan	Planned activities (become actions): 1 row — see the table below On completion: rows become actions.
MP-036.11	Retire policies and procedures Task: Verify, record and close policies and procedures Retire policies and procedures — step 11 of 11 in GRC001 Policy and Procedure Governance.	IMS Manager Closure	Closure evidence: Policies closed; effectiveness verified on the KPI and evidence filed. Records that prove effectiveness: AT-UNI-QHSE-MAN — Management system manual; CHG-01 — New quotation template with second check; CHG-02 — Replace the job sheet with a tablet form; Retire policies and procedures

#	Setting	Value	Reason
1	Implement risk treatment plan	Enabled for service delivery	Needed to produce Treatment plans
2	Owner and notification	Risk Manager	Alerts go to the process owner

MP-038.5 — Monitor risk treatment plan · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Treatment plans); it is the KPI its owner reviews at each Monthly review.	82.5	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Treatment plans); it is the KPI its owner reviews at each Monthly review.	97.2	>= 95%

DMS044 (MP-105) — Compliance Calendar and Obligation Scheduler

Centralize obligations; schedule tasks/deadlines; send reminders; track status. Owner: Compliance Officer.
Tier 5. Requirements answered: ISO 9001 §4.2, §6.1.

Step	Step, task and purpose	Role · form	What to type
MP-105.1	Aggregate compliance calendar obligations Task: Plan and prepare compliance calendar Aggregate compliance calendar obligations — step 1 of 10 in DMS044	DynamicMS Engine Automated service task	System result confirmed: Aggregate compliance calendar obligations: done by the DynamicMS Engine; Compliance calendar available in the project. Records produced: —

Step	Step, task and purpose	Role · form	What to type
	Compliance Calendar and Obligation Scheduler.		
MP-105.2	Define compliance calendar recurrence Task: Plan and prepare compliance calendar Define compliance calendar recurrence — step 2 of 10 in DMS044 Compliance Calendar and Obligation Scheduler.	Compliance Officer Register items	Items identified: 3 rows — see the table below
MP-105.3	Assign compliance calendar owners Task: Plan and prepare compliance calendar Assign compliance calendar owners — step 3 of 10 in DMS044 Compliance Calendar and Obligation Scheduler.	Compliance Officer Assignment	Role: Compliance Officer Person (from the OBS): Hind Berrada Organization units covered: Finance RACSI of the macro process: R: Compliance Officer · A: IMS Manager · C: HSE Manager · S: Document Controller · I: Top Management
MP-105.4	Schedule compliance calendar reminders Task: Plan and prepare compliance calendar Schedule compliance calendar reminders — step 4 of 10 in DMS044 Compliance Calendar and Obligation Scheduler.	Compliance Officer Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-105.5	Integrate task management Task: Execute compliance calendar activities Integrate task management — step 5 of 10 in DMS044 Compliance Calendar and Obligation Scheduler.	Compliance Officer Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-105.6	Track compliance calendar status Task: Execute compliance calendar activities Track compliance calendar status — step 6 of 10 in DMS044 Compliance Calendar and Obligation Scheduler.	Compliance Officer Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-105.7	Provide compliance calendar dashboard Task: Execute compliance calendar activities Provide compliance calendar dashboard — step 7 of 10 in DMS044 Compliance Calendar and Obligation Scheduler.	Compliance Officer Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-105.8	Alert compliance calendar on deadlines Task: Verify, record and close compliance calendar Alert compliance calendar on deadlines — step 8 of 10 in DMS044 Compliance Calendar and Obligation Scheduler.	Compliance Officer Communication	Communication records: 2 rows — see the table below
MP-105.9	Report compliance calendar metrics Task: Verify, record and close compliance calendar Report compliance calendar metrics — step 9 of 10 in DMS044 Compliance Calendar and Obligation Scheduler.	Compliance Officer Communication	Communication records: 2 rows — see the table below
MP-105.10	Update compliance calendar Task: Verify, record and close compliance calendar Update compliance calendar — step 10 of 10 in DMS044 Compliance Calendar and Obligation Scheduler.	Compliance Officer Change	Change made: Compliance calendar updated: Strategic (market, customer loss). Reason: Customer complaint analysis Documents or records updated: Integrate task management

MP-105.2 — Define compliance calendar recurrence · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Compliance calendar	Output	Affects Compliance calendar; followed by Compliance Officer.	High	Internal audit report, Jan 2026
2	Obligation register	Output	Affects Obligation register; followed by Compliance Officer.	Medium	Process performance dashboard, Dec 2025
3	Reminder records	Output	Affects Compliance calendar; followed by Compliance Officer.	Medium	Interview with the process owner, Dec 2025

MP-105.4 — Schedule compliance calendar reminders · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Integrate task management	Hind Berrada	2026-01-24	2026-02-07	Compliance calendar
2	Track compliance calendar status	Hind Berrada	2026-01-29	2026-02-17	Obligation register
3	Provide compliance calendar dashboard	Hind Berrada	2026-02-03	2026-02-27	Compliance calendar

MP-105.5 — Integrate task management · Settings

#	Setting	Value	Reason
1	Integrate task management	Enabled for service delivery	Needed to produce Compliance calendar
2	Owner and notification	Compliance Officer	Alerts go to the process owner

MP-105.6 — Track compliance calendar status · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Compliance calendar); it is the KPI its owner reviews at each Monthly review.	82.5	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Compliance calendar); it is the KPI its owner reviews at each Monthly review.	97.2	>= 95%

MP-105.7 — Provide compliance calendar dashboard · Settings

#	Setting	Value	Reason
1	Provide compliance calendar dashboard	Enabled for service delivery	Needed to produce Compliance calendar
2	Owner and notification	Compliance Officer	Alerts go to the process owner

MP-105.8 — Alert compliance calendar on deadlines · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	Compliance	Meeting	2026-01-30	Compliance calendar: what changes for you and what to do by 2026-02-13.	Compliance Officer
2	Process owners	E-mail	2026-02-01	Obligation register: what changes for you and what to do by 2026-02-13.	Compliance Officer

MP-105.9 — Report compliance calendar metrics · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	Compliance	E-mail	2026-01-28	Compliance calendar: what changes for you and what to do by 2026-02-11.	Compliance Officer
2	Process owners	Intranet	2026-01-30	Obligation register: what changes for you and what to do by 2026-02-11.	Compliance Officer

DMS082 (MP-143) — SME Onboarding and Quick Start

Deploy in days; guided setup; reduce complexity. Owner: IMS Manager. Tier 7. Requirements answered: ISO 9001 §4, §5.

Step	Step, task and purpose	Role · form	What to type
MP-143.1	Select SME onboarding segment Task: Plan and prepare SME onboarding Select SME onboarding segment — step 1 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Register items	Items identified: 3 rows — see the table below
MP-143.2	Select SME onboarding standards Task: Plan and prepare SME onboarding Select SME onboarding standards — step 2 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Register items	Items identified: 3 rows — see the table below
MP-143.3	Configure SME onboarding profile Task: Plan and prepare SME onboarding Configure SME onboarding profile — step 3 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-143.4	Activate SME onboarding pack Task: Plan and prepare SME onboarding Activate SME onboarding pack — step 4 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-143.5	Import SME onboarding docs Task: Execute SME onboarding activities Import SME onboarding docs — step 5 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Execution	What was done: Import SME onboarding docs carried out on service delivery; Configured tenant updated. Records that prove it: — Completion (%): 100
MP-143.6	Invite users on SME onboarding Task: Execute SME onboarding activities Invite users on SME onboarding — step 6 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Execution	What was done: Invite users on SME onboarding carried out on service delivery; Configured tenant updated. Records that prove it: — Completion (%): 100
MP-143.7	Run SME onboarding wizard Task: Execute SME onboarding activities Run SME onboarding wizard — step 7 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Execution	What was done: Run SME onboarding wizard carried out on service delivery; Configured tenant updated. Records that prove it: — Completion (%): 100
MP-143.8	Configure SME onboarding workflows Task: Execute SME onboarding activities Configure SME onboarding workflows — step 8 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-143.9	Activate SME onboarding KPIs	IMS Manager	Settings: 2 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	Task: Verify, record and close SME onboarding Activate SME onboarding KPIs — step 9 of 12 in DMS082 SME Onboarding and Quick Start.	Configuration	Tested before use: Yes
MP-143.10	Launch SME onboarding Task: Verify, record and close SME onboarding Launch SME onboarding — step 10 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Execution	What was done: Launch SME onboarding carried out on service delivery; Configured tenant updated. Records that prove it: — Completion (%): 100
MP-143.11	Train staff on SME onboarding Task: Verify, record and close SME onboarding Train staff on SME onboarding — step 11 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Training	Session / module: Train staff on SME onboarding — practice session Date: 2026-02-05 Units trained: Atlas Universal SME Participants: 14 Effectiveness evaluation method: On-the-job observation Effectiveness (%): 84
MP-143.12	Schedule SME onboarding check-in Task: Verify, record and close SME onboarding Schedule SME onboarding check-in — step 12 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.

MP-143.1 — Select SME onboarding segment · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Configured tenant	Output	Affects Configured tenant; followed by IMS Manager.	High	Customer complaint log, Jan 2026
2	Activated pack	Output	Affects Activated pack; followed by IMS Manager.	Medium	Internal audit report, Jan 2026
3	Imported docs	Output	Affects Configured tenant; followed by IMS Manager.	Medium	Process performance dashboard, Dec 2025

MP-143.2 — Select SME onboarding standards · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	ISO 9001	Requirement	Affects Configured tenant; followed by IMS Manager.	High	Internal audit report, Jan 2026
2	ISO 14001	Requirement	Affects Activated pack; followed by IMS Manager.	Medium	Process performance dashboard, Dec 2025
3	ISO 45001	Requirement	Affects Configured tenant; followed by IMS Manager.	Medium	Interview with the process owner, Dec 2025

MP-143.3 — Configure SME onboarding profile · Settings

#	Setting	Value	Reason
1	Configure SME onboarding profile	Enabled for service delivery	Needed to produce Configured tenant

DMS083 (MP-144) — SME Simplified Process Modeling

Pre-built templates; quick customization; reduce effort. Owner: Process Excellence Manager. Tier 7.
Requirements answered: ISO 9001 §4.4.

Step	Step, task and purpose	Role · form	What to type
MP-144.1	Select SME process model template Task: Plan and prepare SME process model Select SME process model template — step 1 of 10 in DMS083 SME Simplified Process Modeling.	Process Excellence Manager Register items	Items identified: 3 rows — see the table below
MP-144.2	Review SME process model Task: Plan and prepare SME process model Review SME process model — step 2 of 10 in DMS083 SME Simplified Process Modeling.	Process Excellence Manager Review	Review frequency: Annual Review date: 2026-02-04 Next review: 2027-02-04 Chaired by: Process Excellence Manager Participants: Process Excellence Manager, IMS Manager, Quality Manager Inputs reviewed: 3 rows — see the table below Decisions and actions: 1 row — see the table below On completion: rows become actions.
MP-144.3	Customize SME process model Task: Plan and prepare SME process model Customize SME process model — step 3 of 10 in DMS083 SME Simplified Process Modeling.	Process Excellence Manager Change	Change made: Process models updated: Strategic (market, customer loss). Reason: Change in regulation Documents or records updated: Update Documentation
MP-144.4	Assign SME process model responsibilities Task: Plan and prepare SME process model	Process Excellence Manager Assignment	Role: Process Excellence Manager Person (from the OBS): Nadia Chraibi Organization units covered: Quality RACSI of the macro process: R: Process Excellence Manager

Step	Step, task and purpose	Role · form	What to type
	Assign SME process model responsibilities — step 4 of 10 in DMS083 SME Simplified Process Modeling.		· A: IMS Manager · C: HSE Manager · S: Document Controller · I: Top Management
MP-144.5	Configure SME process model approvals Task: Execute SME process model activities Configure SME process model approvals — step 5 of 10 in DMS083 SME Simplified Process Modeling.	Process Excellence Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-144.6	Publish SME process model Task: Execute SME process model activities Publish SME process model — step 6 of 10 in DMS083 SME Simplified Process Modeling.	Process Excellence Manager Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QHSE-DMS083-06 Version: 1.0 Content summary: Process models for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QHSE-PROC-01 — Procedure — Context To Strategy
MP-144.7	Train staff on SME process model Task: Execute SME process model activities Train staff on SME process model — step 7 of 10 in DMS083 SME Simplified Process Modeling.	Process Excellence Manager Training	Session / module: Train staff on SME process model — practice session Date: 2026-02-10 Units trained: Quality Participants: 18 Effectiveness evaluation method: Practical test Effectiveness (%): 95
MP-144.8	Monitor SME process model adoption Task: Verify, record and close SME process model Monitor SME process model adoption — step 8 of 10 in DMS083 SME Simplified Process Modeling.	Process Excellence Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-144.9	Update SME process model Task: Verify, record and close SME process model Update SME process model — step 9 of 10 in DMS083 SME Simplified Process Modeling.	Process Excellence Manager Change	Change made: Process models updated: Strategic (market, customer loss). Reason: Decision of the management review Documents or records updated: Update Documentation
MP-144.10	Share SME process model Task: Verify, record and close SME process model Share SME process model — step 10 of 10 in DMS083 SME Simplified Process Modeling.	Process Excellence Manager Communication	Communication records: 2 rows — see the table below

MP-144.1 — Select SME process model template · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Process models	Output	Affects Process models; followed by Process Excellence Manager.	High	Customer complaint log, Jan 2026
2	Documentation	Output	Affects Documentation; followed by Process Excellence Manager.	Medium	Internal audit report, Jan 2026
3	RACI assignments	Output	Affects Process models; followed by Process Excellence Manager.	Medium	Process performance dashboard, Jan 2026

MP-144.2 — Review SME process model · Inputs reviewed

#	Input	Finding
1	Process requirements	Process requirements still valid; minor updates made.

#	Input	Finding
2	Industry templates	No major change since the last review.
3	Best practices	Gap found on Documentation.

MP-144.2 — Review SME process model · Decisions and actions

#	Decision	Owner	Due date
1	Update Documentation	Nadia Chraibi	2026-03-06

MP-144.5 — Configure SME process model approvals · Settings

#	Setting	Value	Reason
1	Configure SME process model approvals	Enabled for service delivery	Needed to produce Process models
2	Owner and notification	Process Excellence Manager	Alerts go to the process owner

MP-144.8 — Monitor SME process model adoption · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Process models); it is the KPI its owner reviews at each Monthly review.	82.5	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Process models); it is the KPI its owner reviews at each Monthly review.	97.2	>= 95%

MP-144.10 — Share SME process model · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	SME process owners	Intranet	2026-02-13	Process models: what changes for you and what to do by 2026-02-27.	Process Excellence Manager
2	SME employees	Notice board	2026-02-15	Documentation: what changes for you and what to do by 2026-02-27.	Process Excellence Manager

Gate — G1 — Strategy baseline approved

Exit criteria: Context, policy, objectives and risk register approved by top management.

78. Open Lifecycle and select the phase card; the gate panel is on the right.

79. Tick “Context analysis report approved (mandatory, evidence required)”.

80. Tick “Management system policy signed (mandatory, evidence required)”.

81. Tick “SMART objectives cascaded to functions (mandatory, evidence required)”.

82. Tick “Risk and opportunity register reviewed (mandatory, evidence required)”.

83. Tick “Process map published”.

84. Sign in as Top Management (ceo@...) or the IMS Manager and select Go. For Hold or No-Go, type a comment explaining why.

E2E-02 — Leadership To Commitment

Goals: Establish leadership, competence, communication, audit capability

From trigger to terminal event: E2E-01 completion or leadership change → Competent personnel, communication plan, qualified auditors in place

UMS006 (MP-013) — Competence and Training Orchestration

Define competence frameworks; assess gaps; deliver training; track certifications. Owner: HR Manager. Tier 1. Requirements answered: ISO 9001 §7.2, §7.3.

Documents of this macro process: AT-UNI-QHSE-COMP (Competence matrix and training records).

Step	Step, task and purpose	Role · form	What to type
MP-013.1	Define training frameworks Task: Plan and prepare training Define training frameworks — step 1 of 9 in UMS006 Competence and Training Orchestration.	HR Manager Register items	Items identified: 3 rows — see the table below
MP-013.2	Assess training gaps Task: Plan and prepare training Assess training gaps — step 2 of 9 in UMS006 Competence and Training Orchestration.	HR Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.9 Conclusion: Weighted score 3.9/5. Main gap: Operational (process failure, supply chain). Action recorded in the action plan.
MP-013.3	Design training curricula Task: Plan and prepare training Design training curricula — step 3 of 9 in UMS006 Competence and Training Orchestration.	HR Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-013.4	Plan training Task: Execute training activities Plan training — step 4 of 9 in UMS006 Competence and Training Orchestration.	HR Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-013.5	Deliver training Task: Execute training activities Deliver training — step 5 of 9 in UMS006 Competence and Training Orchestration.	HR Manager Training	Session / module: Deliver training — practice session Date: 2026-02-11 Units trained: Human Resources Participants: 8 Effectiveness evaluation method: Practical test Effectiveness (%): 88
MP-013.6	Evaluate training Task: Execute training activities Evaluate training — step 6 of 9 in UMS006 Competence and Training Orchestration.	HR Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4 Conclusion: Weighted score 4/5. Main gap: Operational (process failure, supply chain). Action recorded in the action plan.
MP-013.7	Track training certifications Task: Verify, record and close training Track training certifications — step 7 of 9 in UMS006 Competence and Training Orchestration.	HR Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-013.8	Certify training Task: Verify, record and close training Certify training — step 8 of 9 in UMS006 Competence and Training Orchestration.	HR Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): HR Manager Decision comment and conditions: Competence records approved against ISO 9001; no blocking point.
MP-013.9	Update training Task: Verify, record and close training Update training — step 9 of 9 in UMS006 Competence and Training Orchestration.	HR Manager Change	Change made: Competence records updated: Strategic (market, customer loss). Reason: Decision of the management review Documents or records updated: AT-UNI-QHSE-COMP — Competence matrix and training records; CMP-01 — Internal auditing (ISO 19011); CMP-02 — Root cause analysis (5 Whys, Ishikawa, 8D); Plan training

MP-013.1 — Define training frameworks · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Competence records	Output	Affects Competence records; followed by HR Manager.	High	Customer complaint log, Jan 2026
2	Training records	Output	Affects Training records; followed by HR Manager.	Medium	Internal audit report, Jan 2026
3	Certifications	Output	Affects Competence records; followed by HR Manager.	Medium	Process performance dashboard, Jan 2026

MP-013.2 — Assess training gaps · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Competence records complete and up to date	30	3	Competence records reviewed on 2026-02-06; 2 gaps corrected.
2	Requirements of ISO 9001 §7.2, §7.3 met	30	4	Checked against ISO 9001 §7.2, §7.3 with the checklist of the phase gate.
3	Evidence available for Training records	20	4	Records filed in the project: Training records.
4	Results against target	20	5	KPI KPI-04 used as the measure.

MP-013.3 — Design training curricula · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Plan training	Maya Laurent	2026-02-10	2026-02-24	Competence records

IMS Manager Execution	What was done: Support due diligence carried out on service delivery; Exit plan updated. Records that prove it: Assess IMS status Completion (%): 100
MP-162.7	Coordinate SME exit and transition buyer Task: Execute SME exit and transition activities Coordinate SME exit and transition buyer — step 7 of 10 in DMS101 SME Exit and Transition.	IMS Manager Execution	What was done: Coordinate SME exit and transition buyer carried out on service delivery; Exit plan updated. Records that prove it: Assess IMS status Completion (%): 100
MP-162.8	Complete SME exit and transition handover Task: Verify, record and close SME exit and transition Complete SME exit and transition handover — step 8 of 10 in DMS101 SME Exit and Transition.	IMS Manager Closure	Closure evidence: Exit plan closed; effectiveness verified on the KPI and evidence filed. Records that prove effectiveness: Assess IMS status Closure date: 2026-03-12
MP-162.9	Archive SME exit and transition records Task: Verify, record and close SME exit and transition Archive SME exit and transition records — step 9 of 10 in DMS101 SME Exit and Transition.	IMS Manager Closure	Closure evidence: Exit plan closed; effectiveness verified on the KPI and evidence filed. Records that prove effectiveness: Assess IMS status Closure date: 2026-03-14
MP-162.10	Close SME exit and transition account Task: Verify, record and close SME exit and transition Close SME exit and transition account — step 10 of 10 in DMS101 SME Exit and Transition.	IMS Manager Closure	Closure evidence: Exit plan closed; effectiveness verified on the KPI and evidence filed. Records that prove effectiveness: Assess IMS status Closure date: 2026-03-17

MP-162.1 — Plan SME exit and transition · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Assess IMS status	Tariq Saleh	2026-03-09	2026-03-23	Exit plan
2	Compile SME exit and transition docs	Tariq Saleh	2026-03-14	2026-04-02	IMS documentation package
3	Transfer SME exit and transition records	Tariq Saleh	2026-03-19	2026-04-12	Exit plan

MP-162.2 — Assess IMS status · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Exit plan complete and up to date	30	4	Exit plan reviewed on 2026-03-04; 2 gaps corrected.
2	Requirements of ISO 9001 §6.3 met	30	3	Checked against ISO 9001 §6.3 with the checklist of the phase gate.
3	Evidence available for IMS documentation package	20	4	Records filed in the project: IMS documentation package.
4	Results against target	20	4	KPI Q-KPI-01 used as the measure.

This phase has no gate for the project track; it closes when its last step is completed.

E2E-04 — Compliance To Achievement

Goals: Deploy, audit, certify, maintain the management system

From trigger to terminal event: Readiness for certification, surveillance audit due, or new compliance obligation → Certification achieved or maintained; findings closed; compliance obligations met

UMS033 (MP-015) — Management System Deployment and Implementation

Deploy the management system; conduct pilots; prepare teams; move to steady state. Owner: Compliance Officer. Tier 1. Requirements answered: ISO 9001 §8.1.

Step	Step, task and purpose	Role · form	What to type
MP-015.1	Define management system deployment phases Task: Plan and prepare management system deployment Define management system deployment phases — step 1 of 10 in UMS033 Management System Deployment and Implementation.	Compliance Officer Register items	Items identified: 3 rows — see the table below
MP-015.2	Select management system deployment pilots Task: Plan and prepare management system deployment Select management system deployment pilots — step 2 of 10 in UMS033 Management System Deployment and Implementation.	Compliance Officer Assignment	Role: Compliance Officer Person (from the OBS): Hind Berrada Organization units covered: Finance RACSI of the macro process: R: Compliance Officer · A: IMS Manager · C: HSE Manager · S: Document Controller · I: Top Management
MP-015.3	Conduct management system deployment pilot Task: Plan and prepare management system deployment Conduct management system deployment pilot — step 3 of 10 in UMS033 Management System Deployment and Implementation.	Compliance Officer Execution	What was done: Conduct management system deployment pilot carried out on service delivery; Deployed processes updated. Records that prove it: — Completion (%): 100
MP-015.4	Refine management system deployment Task: Plan and prepare management system deployment Refine management system deployment — step 4 of 10 in UMS033 Management System Deployment and Implementation.	Compliance Officer Change	Change made: Deployed processes updated: Strategic (market, customer loss). Reason: Finding of the internal audit Documents or records updated: —
MP-015.5	Prepare management system deployment teams Task: Execute management system deployment activities Prepare management system deployment teams — step 5 of 10 in UMS033 Management System Deployment and Implementation.	Compliance Officer Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QHSE-UMS033-05 Version: 1.0 Content summary: Deployed processes for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QHSE-PROC-01 — Procedure — Context To Strategy
MP-015.6	Validate management system deployment schedule Task: Execute management system deployment activities Validate management system deployment schedule — step 6 of 10 in	Compliance Officer Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Compliance Officer Decision comment and conditions: Deployed processes approved against ISO 9001; no blocking point.

Step	Step, task and purpose	Role · form	What to type
	UMS033 Management System Deployment and Implementation.		
MP-015.7	Verify management system deployment readiness Task: Execute management system deployment activities Verify management system deployment readiness — step 7 of 10 in UMS033 Management System Deployment and Implementation.	Compliance Officer Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.1 Conclusion: Weighted score 4.1/5. Main gap: job sheet not signed. Action recorded in the action plan.
MP-015.8	Execute management system deployment transition Task: Verify, record and close management system deployment Execute management system deployment transition — step 8 of 10 in UMS033 Management System Deployment and Implementation.	Compliance Officer Execution	What was done: Execute management system deployment transition carried out on service delivery; Deployed processes updated. Records that prove it: — Completion (%): 100
MP-015.9	Support management system deployment users Task: Verify, record and close management system deployment Support management system deployment users — step 9 of 10 in UMS033 Management System Deployment and Implementation.	Compliance Officer Execution	What was done: Support management system deployment users carried out on service delivery; Deployed processes updated. Records that prove it: — Completion (%): 100
MP-015.10	Move to steady state Task: Verify, record and close management system deployment Move to steady state — step 10 of 10 in UMS033 Management System Deployment and Implementation.	Compliance Officer Execution	What was done: Move to steady state carried out on service delivery; Deployed processes updated. Records that prove it: — Completion (%): 100

MP-015.1 — Define management system deployment phases · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Deployed processes	Output	Affects Deployed processes; followed by Compliance Officer.	High	Customer complaint log, Mar 2026
2	Trained personnel	Output	Affects Trained personnel; followed by Compliance Officer.	Medium	Internal audit report, Feb 2026
3	Transition records	Output	Affects Deployed processes; followed by Compliance Officer.	Medium	Process performance dashboard, Feb 2026

MP-015.6 — Validate management system deployment schedule · Decision criteria checked

#	Criterion	Met	Evidence
1	Deployed processes complete	Yes	Deployed processes v1.0
2	Requirements of ISO 9001 §8.1 met	Yes	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

MP-015.7 — Verify management system deployment readiness · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Deployed processes complete and up to date	30	3	Deployed processes reviewed on 2026-03-16; 2 gaps corrected.
2	Requirements of ISO 9001 §8.1 met	30	4	Checked against ISO 9001 §8.1 with the checklist of the phase gate.

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
3	Evidence available for Trained personnel	20	5	Records filed in the project: Trained personnel.
4	Results against target	20	5	KPI Q-KPI-01 used as the measure.

UMS037 (MP-016) — Mock Audit, Pre-Certification, and Gap Diagnosis

Conduct mock audit; identify findings; validate; define actions. Owner: Compliance Officer. Tier 1. Requirements answered: ISO 9001 §9.2.

Step	Step, task and purpose	Role · form	What to type
MP-016.1	Define mock audit and gap diagnosis scope Task: Plan and prepare mock audit and gap diagnosis Define mock audit and gap diagnosis scope — step 1 of 10 in UMS037 Mock Audit, Pre-Certification, and Gap Diagnosis.	Compliance Officer Register items	Items identified: 3 rows — see the table below
MP-016.2	Plan mock audit and gap diagnosis Task: Plan and prepare mock audit and gap diagnosis Plan mock audit and gap diagnosis — step 2 of 10 in UMS037 Mock Audit, Pre-Certification, and Gap Diagnosis.	Compliance Officer Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-016.3	Conduct mock audit and gap diagnosis Task: Plan and prepare mock audit and gap diagnosis Conduct mock audit and gap diagnosis — step 3 of 10 in UMS037 Mock Audit, Pre-Certification, and Gap Diagnosis.	Compliance Officer Execution	What was done: Conduct mock audit and gap diagnosis carried out on service delivery; Mock audit report updated. Records that prove it: Conduct mock audit and gap diagnosis Completion (%): 100
MP-016.4	Identify mock audit and gap diagnosis findings Task: Plan and prepare mock audit and gap diagnosis Identify mock audit and gap diagnosis findings — step 4 of 10 in UMS037 Mock Audit, Pre-Certification, and Gap Diagnosis.	Compliance Officer Register items	Items identified: 3 rows — see the table below
MP-016.5	Categorize mock audit and gap diagnosis Task: Execute mock audit and gap diagnosis activities Categorize mock audit and gap diagnosis — step 5 of 10 in UMS037 Mock Audit, Pre-Certification, and Gap Diagnosis.	Compliance Officer Execution	What was done: Categorize mock audit and gap diagnosis carried out on service delivery; Mock audit report updated. Records that prove it: Conduct mock audit and gap diagnosis Completion (%): 100
MP-016.6	Validate mock audit and gap diagnosis Task: Execute mock audit and gap diagnosis activities Validate mock audit and gap diagnosis — step 6 of 10 in UMS037 Mock Audit, Pre-Certification, and Gap Diagnosis.	Compliance Officer Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Compliance Officer Decision comment and conditions: Mock audit report approved against ISO 9001; no blocking point.
MP-016.7	Issue mock audit and gap diagnosis report Task: Execute mock audit and gap diagnosis activities Issue mock audit and gap diagnosis report — step 7 of 10 in UMS037 Mock Audit, Pre-Certification, and Gap Diagnosis.	Compliance Officer Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QHSE-UMS037-07 Version: 1.1 Content summary: Mock audit report for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. UMS021 (MP-025) — Monitoring and Measurement Resources Control

Inventory equipment; plan/execute calibration; assess impact; maintain records. Owner: Quality Manager.
Tier 1. Requirements answered: ISO 9001 §7.1.5.

Documents of this macro process: AT-UNI-QHSE-CAL (Monitoring and measuring equipment register).

Step	Step, task and purpose	Role · form	What to type
MP-025.1	Inventory measuring equipment Task: Plan and prepare measuring equipment Inventory measuring equipment — step 1 of 8 in UMS021 Monitoring and Measurement Resources Control.	Quality Manager Execution	What was done: Inventory measuring equipment carried out on service delivery; Equipment register updated. Records that prove it: AT-UNI-QHSE-CAL — Monitoring and measuring equipment register; EQ-01 — Torque wrench 5–60 N·m; EQ-02 — Digital caliper 0–150 mm Completion (%): 100
MP-025.2	Establish measuring equipment schedules Task: Plan and prepare measuring equipment Establish measuring equipment schedules — step 2 of 8 in UMS021 Monitoring and Measurement Resources Control.	Quality Manager Execution	What was done: Establish measuring equipment schedules carried out on service delivery; Equipment register updated. Records that prove it: AT-UNI-QHSE-CAL — Monitoring and measuring equipment register; EQ-01 — Torque wrench 5–60 N·m; EQ-02 — Digital caliper 0–150 mm Completion (%): 100
MP-025.3	Perform measuring equipment calibration Task: Plan and prepare measuring equipment Perform measuring equipment calibration — step 3 of 8 in UMS021 Monitoring and Measurement Resources Control.	Quality Manager Execution	What was done: Perform measuring equipment calibration carried out on service delivery; Equipment register updated. Records that prove it: AT-UNI-QHSE-CAL — Monitoring and measuring equipment register; EQ-01 — Torque wrench 5–60 N·m; EQ-02 — Digital caliper 0–150 mm Completion (%): 100

Step	Step, task and purpose	Role · form	What to type
MP-025.4	Label calibration status on equipment Task: Execute measuring equipment activities Label calibration status on equipment — step 4 of 8 in UMS021 Monitoring and Measurement Resources Control.	Quality Manager Execution	What was done: Label calibration status on equipment carried out on service delivery; Equipment register updated. Records that prove it: AT-UNI-QHSE-CAL — Monitoring and measuring equipment register; EQ-01 — Torque wrench 5–60 N·m; EQ-02 — Digital caliper 0–150 mm Completion (%): 100
MP-025.5	Adjust and correct measuring equipment Task: Execute measuring equipment activities Adjust and correct measuring equipment — step 5 of 8 in UMS021 Monitoring and Measurement Resources Control.	Quality Manager Change	Change made: Equipment register updated: Strategic (market, customer loss). Reason: Decision of the management review Documents or records updated: AT-UNI-QHSE-CAL — Monitoring and measuring equipment register; EQ-01 — Torque wrench 5–60 N·m; EQ-02 — Digital caliper 0–150 mm
MP-025.6	Assess measuring equipment impact Task: Execute measuring equipment activities Assess measuring equipment impact — step 6 of 8 in UMS021 Monitoring and Measurement Resources Control.	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.3 Conclusion: Weighted score 3.3/5. Main gap: Strategic (market, customer loss). Action recorded in the action plan.
MP-025.7	Maintain measuring equipment records Task: Verify, record and close measuring equipment Maintain measuring equipment records — step 7 of 8 in UMS021 Monitoring and Measurement Resources Control.	Quality Manager Document	Document template: TPL-CAL — Monitoring and measuring equipment register Document reference: AT-UNI-QHSE-UMS021-07 Version: 2.0 Content summary: Equipment register for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QHSE-CAL — Monitoring and measuring equipment register
MP-025.8	Handle measuring equipment nonconforming Task: Verify, record and close measuring equipment Handle measuring equipment nonconforming — step 8 of 8 in UMS021 Monitoring and Measurement Resources Control.	Quality Manager Execution	What was done: Handle measuring equipment nonconforming carried out on service delivery; Equipment register updated. Records that prove it: AT-UNI-QHSE-CAL — Monitoring and measuring equipment register; EQ-01 — Torque wrench 5–60 N·m; EQ-02 — Digital caliper 0–150 mm Completion (%): 100

MP-025.6 — Assess measuring equipment impact · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Equipment register complete and up to date	30	3	Equipment register reviewed on 2026-05-01; 2 gaps corrected.
2	Requirements of ISO 9001 §7.1.5 met	30	4	Checked against ISO 9001 §7.1.5 with the checklist of the phase gate.
3	Evidence available for Calibration records	20	3	Records filed in the project: Calibration records.
4	Results against target	20	3	KPI Q-KPI-01 used as the measure.

UMS001 (MP-029) — Documentary Lifecycle Control

Define metadata; manage approval; control versions; archive obsolete. Owner: Document Controller. Tier 1. Requirements answered: ISO 9001 §7.5.2, §7.5.3.

Documents of this macro process: AT-UNI-QHSE-DOCLIST (Master list of documented information).

Step	Step, task and purpose	Role · form	What to type
MP-029.1	Define controlled documents metadata Task: Plan and prepare controlled	Document Controller Register items	Items identified: 3 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	documents Define controlled documents metadata — step 1 of 18 in UMS001 Documentary Lifecycle Control.		
MP-029.2	Identify controlled documents workflow Task: Plan and prepare controlled documents Identify controlled documents workflow — step 2 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Register items	Items identified: 3 rows — see the table below
MP-029.3	Draft controlled documents Task: Plan and prepare controlled documents Draft controlled documents — step 3 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Document	Document template: TPL-DOCLIST — Master list of documented information Document reference: AT-UNI-QHSE-UMS001-03 Version: 1.1 Content summary: Controlled documents for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QHSE-DOCLIST — Master list of documented information
MP-029.4	Peer-review draft documents Task: Plan and prepare controlled documents Peer-review draft documents — step 4 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Execution	What was done: Peer-review draft documents carried out on service delivery; Controlled documents updated. Records that prove it: AT-UNI-QHSE-DOCLIST — Master list of documented information Completion (%): 100
MP-029.5	Check controlled documents compliance Task: Execute controlled documents activities Check controlled documents compliance — step 5 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.4 Conclusion: Weighted score 4.4/5. Main gap: Strategic (market, customer loss). Action recorded in the action plan.
MP-029.6	Verify controlled documents versions Task: Execute controlled documents activities Verify controlled documents versions — step 6 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.5 Conclusion: Weighted score 4.5/5. Main gap: Strategic (market, customer loss). Action recorded in the action plan.
MP-029.7	Approve and publish controlled documents Task: Execute controlled documents activities Approve and publish controlled documents — step 7 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Document Controller Decision comment and conditions: Controlled documents approved against ISO 9001; no blocking point.
MP-029.8	Distribute controlled documents Task: Execute controlled documents activities Distribute controlled documents — step 8 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Communication	Communication records: 2 rows — see the table below
MP-029.9	Archive obsolete controlled documents Task: Verify, record and close controlled documents Archive obsolete controlled documents — step 9 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Closure	Closure evidence: Controlled documents closed; effectiveness verified on the KPI and evidence filed. Records that prove effectiveness: AT-UNI-QHSE-DOCLIST — Master list of documented information Closure date: 2026-05-14
MP-029.10	Schedule controlled documents reminders Task: Verify, record and close controlled documents Schedule controlled documents	Document Controller Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.

Step	Step, task and purpose	Role · form	What to type
	reminders — step 10 of 18 in UMS001 Documentary Lifecycle Control.		
MP-029.11	Certify controlled documents acknowledgment Task: Verify, record and close controlled documents Certify controlled documents acknowledgment — step 11 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Document Controller Decision comment and conditions: Controlled documents approved against ISO 9001; no blocking point.
MP-029.12	Submit document for review Task: Control Versions of Governed Documents Submit document for review — step 12 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Execution	What was done: Submit document for review carried out on service delivery; Controlled documents updated. Records that prove it: AT-UNI-QHSE-DOCLIST — Master list of documented information; Certify controlled documents acknowledgment Completion (%): 100
MP-029.13	Approve and release version Task: Control Versions of Governed Documents Approve and release version — step 13 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Document Controller Decision comment and conditions: Controlled documents approved against ISO 9001; no blocking point.
MP-029.14	Publish and notify Task: Control Versions of Governed Documents Publish and notify — step 14 of 18 in UMS001 Documentary Lifecycle Control.	DynamicMS Engine Automated service task	System result confirmed: Publish and notify: done by the DynamicMS Engine; Controlled documents available in the project. Records produced: AT-UNI-QHSE-DOCLIST — Master list of documented information; Certify controlled documents acknowledgment
MP-029.15	Supersede and archive previous version Task: Control Versions of Governed Documents Supersede and archive previous version — step 15 of 18 in UMS001 Documentary Lifecycle Control.	DynamicMS Engine Automated service task	System result confirmed: Supersede and archive previous version: done by the DynamicMS Engine; Controlled documents available in the project. Records produced: AT-UNI-QHSE-DOCLIST — Master list of documented information; Certify controlled documents acknowledgment
MP-029.16	Customize document template Task: Customize & Generate Downloadable Files Customize document template — step 16 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Change	Change made: Controlled documents updated: Strategic (market, customer loss). Reason: Finding of the internal audit Documents or records updated: AT-UNI-QHSE-DOCLIST — Master list of documented information; Certify controlled documents acknowledgment
MP-029.17	Generate files in selected formats Task: Customize & Generate Downloadable Files Generate files in selected formats — step 17 of 18 in UMS001 Documentary Lifecycle Control.	DynamicMS Engine Automated service task	System result confirmed: Generate files in selected formats: done by the DynamicMS Engine; Controlled documents available in the project. Records produced: AT-UNI-QHSE-DOCLIST — Master list of documented information; Certify controlled documents acknowledgment
MP-029.18	Download or share generated file Task: Customize & Generate Downloadable Files Download or share generated file — step 18 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Execution	What was done: Download or share generated file carried out on service delivery; Controlled documents updated. Records that prove it: AT-UNI-QHSE-DOCLIST — Master list of documented information; Certify controlled documents acknowledgment Completion (%): 100

MP-029.1 — Define controlled documents metadata · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence

DMS087 (MP-148) — SME Multi-Role User Management

Support multi-role; simplify management; ensure access. Owner: Tenant Administrator. Tier 7.

Step	Step, task and purpose	Role · form	What to type
MP-148.1	Define SME user roles Task: Plan and prepare SME user roles Define SME user roles — step 1 of 10 in DMS087 SME Multi-Role User Management.	Tenant Administrator Register items	Items identified: 3 rows — see the table below
MP-148.2	Assign SME user roles multiple Task: Plan and prepare SME user roles Assign SME user roles multiple — step 2 of 10 in DMS087 SME Multi-Role User Management.	Tenant Administrator Assignment	Role: Tenant Administrator Person (from the OBS): Hugo Lefevre Organization units covered: Information Technology RACSI of the macro process: R: Tenant Administrator · A: IMS Manager · C: HSE Manager · S: Document Controller · I: Top Management
MP-148.3	Configure SME user roles permissions Task: Plan and prepare SME user roles Configure SME user roles permissions — step 3 of 10 in DMS087 SME Multi-Role User Management.	Tenant Administrator Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-148.4	Set up delegation Task: Plan and prepare SME user roles	Tenant Administrator Configuration	Settings: 2 rows — see the table below Tested before use: Yes

Step	Step, task and purpose	Role · form	What to type
	Set up delegation — step 4 of 10 in DMS087 SME Multi-Role User Management.		
MP-148.5	Manage SME user roles lifecycle Task: Execute SME user roles activities Manage SME user roles lifecycle — step 5 of 10 in DMS087 SME Multi-Role User Management.	Tenant Administrator Execution	What was done: Manage SME user roles lifecycle carried out on service delivery; User accounts updated. Records that prove it: — Completion (%): 100
MP-148.6	Handle SME user roles conflicts Task: Execute SME user roles activities Handle SME user roles conflicts — step 6 of 10 in DMS087 SME Multi-Role User Management.	Tenant Administrator Execution	What was done: Handle SME user roles conflicts carried out on service delivery; User accounts updated. Records that prove it: — Completion (%): 100
MP-148.7	Review SME user roles access Task: Execute SME user roles activities Review SME user roles access — step 7 of 10 in DMS087 SME Multi-Role User Management.	Tenant Administrator Execution	What was done: Review SME user roles access carried out on service delivery; User accounts updated. Records that prove it: — Completion (%): 100
MP-148.8	Update SME user roles Task: Verify, record and close SME user roles Update SME user roles — step 8 of 10 in DMS087 SME Multi-Role User Management.	Tenant Administrator Change	Change made: User accounts updated: Strategic (market, customer loss). Reason: Finding of the internal audit Documents or records updated: —
MP-148.9	Report SME user roles compliance Task: Verify, record and close SME user roles Report SME user roles compliance — step 9 of 10 in DMS087 SME Multi-Role User Management.	Tenant Administrator Communication	Communication records: 2 rows — see the table below
MP-148.10	Archive SME user roles Task: Verify, record and close SME user roles Archive SME user roles — step 10 of 10 in DMS087 SME Multi-Role User Management.	Tenant Administrator Closure	Closure evidence: User accounts closed; effectiveness verified on the KPI and evidence filed. Records that prove effectiveness: — Closure date: 2026-06-04

MP-148.1 — Define SME user roles · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	User accounts	Output	Affects User accounts; followed by Tenant Administrator.	High	Customer complaint log, May 2026
2	Role assignments	Output	Affects Role assignments; followed by Tenant Administrator.	Medium	Internal audit report, May 2026
3	Permissions	Output	Affects User accounts; followed by Tenant Administrator.	Medium	Process performance dashboard, Apr 2026

MP-148.3 — Configure SME user roles permissions · Settings

#	Setting	Value	Reason
1	Configure SME user roles permissions	Enabled for service delivery	Needed to produce User accounts
2	Owner and notification	Tenant Administrator	Alerts go to the process owner

MP-148.4 — Set up delegation · Settings

#	Setting	Value	Reason
1	Set up delegation	Enabled for service delivery	Needed to produce User accounts
2	Owner and notification	Tenant Administrator	Alerts go to the process owner

MP-148.9 — Report SME user roles compliance · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	SME employees	E-mail	2026-06-01	User accounts: what changes for you and what to do by 2026-06-15.	Tenant Administrator
2	SME management	Intranet	2026-06-03	Role assignments: what changes for you and what to do by 2026-06-15.	Tenant Administrator

This phase has no gate for the project track; it closes when its last step is completed.

E2E-08 — Requirements To Delivery

Goals: Transform requirements into delivered products/services

From trigger to terminal event: Customer order, production plan, supplier onboarding, welding requirement, laboratory test, or eco-design → Products/services delivered; suppliers controlled; traceability ensured; quality validated; LCA completed

DMS094 (MP-155) — SME Informal Process Digitization

Digitize informal processes; capture tribal knowledge; create repeatable. Owner: Process Excellence Manager. Tier 7.

Step	Step, task and purpose	Role · form	What to type
MP-155.1	Identify informal processes Task: Plan and prepare informal processes Identify informal processes — step 1 of 10 in DMS094 SME Informal Process Digitization.	Process Excellence Manager Register items	Items identified: 3 rows — see the table below
MP-155.2	Interview informal processes stakeholders Task: Plan and prepare informal processes Interview informal processes stakeholders — step 2 of 10 in DMS094 SME Informal Process Digitization.	Process Excellence Manager Execution	What was done: Interview informal processes stakeholders carried out on service delivery; Digitized processes updated. Records that prove it: — Completion (%): 100
MP-155.3	Document the process control plan Task: Plan and prepare informal processes Document the process control plan — step 3 of 10 in DMS094 SME Informal Process Digitization.	Process Excellence Manager Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QHSE-DMS094-03 Version: 1.0 Content summary: Digitized processes for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QHSE-PROC-01 — Procedure — Context To Strategy
MP-155.4	Identify informal processes improvements Task: Plan and prepare informal processes Identify informal processes improvements — step 4 of 10 in DMS094 SME Informal Process Digitization.	Process Excellence Manager Register items	Items identified: 3 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
MP-155.5	Design informal processes digital Task: Execute informal processes activities Design informal processes digital — step 5 of 10 in DMS094 SME Informal Process Digitization.	Process Excellence Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-155.6	Configure informal processes Task: Execute informal processes activities Configure informal processes — step 6 of 10 in DMS094 SME Informal Process Digitization.	Process Excellence Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-155.7	Train staff on informal processes Task: Execute informal processes activities Train staff on informal processes — step 7 of 10 in DMS094 SME Informal Process Digitization.	Process Excellence Manager Training	Session / module: Train staff on informal processes — practice session Date: 2026-06-08 Units trained: Quality Participants: 11 Effectiveness evaluation method: On-the-job observation Effectiveness (%): 78
MP-155.8	Monitor informal processes adoption Task: Verify, record and close informal processes Monitor informal processes adoption — step 8 of 10 in DMS094 SME Informal Process Digitization.	Process Excellence Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-155.9	Refine informal processes Task: Verify, record and close informal processes Refine informal processes — step 9 of 10 in DMS094 SME Informal Process Digitization.	Process Excellence Manager Change	Change made: Digitized processes updated: quote error. Reason: Decision of the management review Documents or records updated: Configure informal processes
MP-155.10	Document informal processes lessons Task: Verify, record and close informal processes Document informal processes lessons — step 10 of 10 in DMS094 SME Informal Process Digitization.	Process Excellence Manager Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QHSE-DMS094-10 Version: 1.1 Content summary: Digitized processes for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QHSE-PROC-01 — Procedure — Context To Strategy

MP-155.1 — Identify informal processes · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Digitized processes	Output	Affects Digitized processes; followed by Process Excellence Manager.	High	Customer complaint log, May 2026
2	Documentation	Output	Affects Documentation; followed by Process Excellence Manager.	Medium	Internal audit report, May 2026
3	Training records	Output	Affects Digitized processes; followed by Process Excellence Manager.	Medium	Process performance dashboard, Apr 2026

MP-155.4 — Identify informal processes improvements · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Digitize technical services records to cut cycle time	Opportunity	Affects Digitized processes; followed by Process Excellence Manager.	High	Interview with the process owner, Apr 2026
2	Extend certification to win technical services tenders	Opportunity	Affects Documentation; followed by Process Excellence Manager.	Medium	Regulatory watch bulletin, Apr 2026

#	Item	Category	Description and impact	Relevance	Source / evidence
3	Supplier development programme for technical services	Opportunity	Affects Digitized processes; followed by Process Excellence Manager.	Medium	Supplier evaluation file, Apr 2026

MP-155.5 — Design informal processes digital · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Configure informal processes	Nadia Chraibi	2026-06-07	2026-06-21	Digitized processes
2	Train staff on informal processes	Nadia Chraibi	2026-06-12	2026-07-01	Documentation
3	Monitor informal processes adoption	Nadia Chraibi	2026-06-17	2026-07-11	Digitized processes

MP-155.6 — Configure informal processes · Settings

#	Setting	Value	Reason
1	Configure informal processes	Enabled for service delivery	Needed to produce Digitized processes
2	Owner and notification	Process Excellence Manager	Alerts go to the process owner

MP-155.8 — Monitor informal processes adoption · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Digitized processes); it is the KPI its owner reviews at each Monthly review.	82.5	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Digitized processes); it is the KPI its owner reviews at each Monthly review.	97.2	>= 95%

This phase has no gate for the project track; it closes when its last step is completed.

E2E-09 — Verification To Preparedness

Goals: Detect, contain, resolve, capitalize nonconformities and problems

From trigger to terminal event: Nonconformity detected, incident reported, or problem identified
→ Problem resolved; REX capitalized; KB updated

UMS011 (MP-018) — Problem Capture and Definition

Capture NCs; define criticality; analyze 5W2H; classify and approve. Owner: Quality Manager. Tier 1. Requirements answered: ISO 9001 §10.2.1.

Documents of this macro process: AT-UNI-QHSE-NCO (Nonconforming outputs register).

Step	Step, task and purpose	Role · form	What to type
MP-018.1	Create quality problem record Task: Plan and prepare quality problem Create quality problem record — step 1 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Execution	What was done: Create quality problem record carried out on service delivery; NC record updated. Records that prove it: AT-UNI-QHSE-NCO — Nonconforming outputs register; NCO-01 — job sheet not signed; NCO-02 — quote error Completion (%): 100
MP-018.2	Enter quality problem data	Quality Manager	What was done: Enter quality problem data carried out on

Step	Step, task and purpose	Role · form	What to type
	Task: Plan and prepare quality problem Enter quality problem data — step 2 of 12 in UMS011 Problem Capture and Definition.	Execution	service delivery; NC record updated. Records that prove it: AT-UNI-QHSE-NCO — Nonconforming outputs register; NCO-01 — job sheet not signed; NCO-02 — quote error Completion (%): 100
MP-018.3	Define quality problem criticality Task: Plan and prepare quality problem Define quality problem criticality — step 3 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Register items	Items identified: 3 rows — see the table below
MP-018.4	Designate quality problem team Task: Plan and prepare quality problem Designate quality problem team — step 4 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-018.5	Submit quality problem Task: Execute quality problem activities Submit quality problem — step 5 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Execution	What was done: Submit quality problem carried out on service delivery; NC record updated. Records that prove it: AT-UNI-QHSE-NCO — Nonconforming outputs register; NCO-01 — job sheet not signed; NCO-02 — quote error; Submit quality problem Completion (%): 100
MP-018.6	Analyze quality problem 5W2H Task: Execute quality problem activities Analyze quality problem 5W2H — step 6 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.7 Conclusion: Weighted score 3.7/5. Main gap: job sheet not signed. Action recorded in the action plan.
MP-018.7	Quantify quality problem gap Task: Execute quality problem activities Quantify quality problem gap — step 7 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.7 Conclusion: Weighted score 3.7/5. Main gap: Strategic (market, customer loss). Action recorded in the action plan.
MP-018.8	Identify quality problem standards Task: Execute quality problem activities Identify quality problem standards — step 8 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Register items	Items identified: 3 rows — see the table below
MP-018.9	Classify quality problem polarity Task: Verify, record and close quality problem Classify quality problem polarity — step 9 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.4 Conclusion: Weighted score 4.4/5. Main gap: job sheet not signed. Action recorded in the action plan.
MP-018.10	Review quality problem Task: Verify, record and close quality problem Review quality problem — step 10 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Review	Review frequency: Quarterly Review date: 2026-06-14 Next review: 2026-09-13 Chaired by: Quality Manager Participants: Quality Manager, IMS Manager Inputs reviewed: 3 rows — see the table below Decisions and actions: 1 row — see the table below On completion: rows become actions.
MP-018.11	Approve quality problem Task: Verify, record and close quality problem Approve quality problem — step 11 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Hold Approver (Accountable): Quality Manager Decision comment and conditions: Hold until Problem definition is complete; review in two weeks.
MP-018.12	Transmit quality problem	Quality Manager	Communication records: 2 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	Task: Verify, record and close quality problem Transmit quality problem — step 12 of 12 in UMS011 Problem Capture and Definition.	Communication	

MP-018.3 — Define quality problem criticality · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	NC record	Output	Affects NC record; followed by Quality Manager.	High	Process performance dashboard, May 2026
2	Problem definition	Output	Affects Problem definition; followed by Quality Manager.	Medium	Interview with the process owner, Apr 2026
3	Priority classification	Output	Affects NC record; followed by Quality Manager.	Medium	Regulatory watch bulletin, Apr 2026

MP-018.4 — Designate quality problem team · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Submit quality problem	Julien Moreau	2026-06-10	2026-06-24	NC record
2	Analyze quality problem 5W2H	Julien Moreau	2026-06-15	2026-07-04	Problem definition
3	Quantify quality problem gap	Julien Moreau	2026-06-20	2026-07-14	NC record

MP-018.6 — Analyze quality problem 5W2H · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	NC record complete and up to date	30	3	NC record reviewed on 2026-06-10; 2 gaps corrected.
2	Requirements of ISO 9001 §10.2.1 met	30	4	Checked against ISO 9001 §10.2.1 with the checklist of the phase gate.
3	Evidence available for Problem definition	20	4	Records filed in the project: Problem definition.
4	Results against target	20	4	KPI Q-KPI-01 used as the measure.

MP-018.7 — Quantify quality problem gap · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	NC record complete and up to date	30	4	NC record reviewed on 2026-06-06; 2 gaps corrected.
2	Requirements of ISO 9001 §10.2.1 met	30	3	Checked against ISO 9001 §10.2.1 with the checklist of the phase gate.
3	Evidence available for Problem definition	20	3	Records filed in the project: Problem definition.
4	Results against target	20	5	KPI Q-KPI-01 used as the measure.

MP-018.8 — Identify quality problem standards · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence

UMS014 (MP-021) — Corrective Action Execution and Follow-Up

Assign corrective actions; execute and document; confirm effectiveness; close. Owner: Quality Manager. Tier 1. Requirements answered: ISO 9001 §10.2.1 c)–d).

Documents of this macro process: AT-UNI-QHSE-NC (Nonconformity and corrective action register).

Step	Step, task and purpose	Role · form	What to type
MP-021.1	Assign corrective actions Task: Plan and prepare corrective actions Assign corrective actions — step 1 of 7 in UMS014 Corrective Action Execution and Follow-Up.	Quality Manager Assignment	Role: Quality Manager Person (from the OBS): Julien Moreau Organization units covered: Quality RACSI of the macro process: R: Quality Manager · A: IMS Manager · C: HSE Manager · S: Document Controller · I: Top Management
MP-021.2	Execute corrective actions activities Task: Plan and prepare corrective actions Execute corrective actions activities — step 2 of 7 in UMS014 Corrective Action Execution and Follow-Up.	Quality Manager Execution	What was done: Execute corrective actions activities carried out on service delivery; Corrective records updated. Records that prove it: AT-UNI-QHSE-NC — Nonconformity and corrective action register; Eliminate root cause: job sheet not signed Completion (%): 100
MP-021.3	Document the process control plan Task: Plan and prepare corrective actions Document the process control plan — step 3 of 7 in UMS014 Corrective Action Execution and Follow-Up.	Quality Manager Document	Document template: TPL-NC — Nonconformity and corrective action register Document reference: AT-UNI-QHSE-UMS014-03 Version: 2.0 Content summary: Corrective records for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QHSE-NC — Nonconformity and corrective action register
MP-021.4	Evaluate corrective actions Task: Execute corrective actions activities Evaluate corrective actions — step 4 of 7 in UMS014 Corrective Action Execution and Follow-Up.	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4 Conclusion: Weighted score 4/5. Main gap: Operational (process failure, supply chain). Action recorded in the action plan.
MP-021.5	Confirm corrective actions Task: Execute corrective actions activities Confirm corrective actions — step 5 of 7 in UMS014 Corrective Action Execution and Follow-Up.	Quality Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Quality Manager Decision comment and conditions: Corrective records approved against ISO 9001; no blocking point.
MP-021.6	Escalate if needed Task: Verify, record and close corrective actions	Quality Manager Escalation	Escalated to: Top Management Reason: Corrective records is late beyond tolerance; a decision on resources is needed.

Step	Step, task and purpose	Role · form	What to type
	Escalate if needed — step 6 of 7 in UMS014 Corrective Action Execution and Follow-Up.		
MP-021.7	Close the corrective actions cycle Task: Verify, record and close corrective actions Close the corrective actions cycle — step 7 of 7 in UMS014 Corrective Action Execution and Follow-Up.	Quality Manager Closure	Closure evidence: Corrective records closed; effectiveness verified on the KPI and evidence filed. Records that prove effectiveness: AT-UNI-QHSE-NC — Nonconformity and corrective action register; Eliminate root cause: job sheet not signed Closure date: 2026-06-28

MP-021.4 — Evaluate corrective actions · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Corrective records complete and up to date	30	4	Corrective records reviewed on 2026-06-21; 2 gaps corrected.
2	Requirements of ISO 9001 §10.2.1 c)–d) met	30	4	Checked against ISO 9001 §10.2.1 c)–d) with the checklist of the phase gate.
3	Evidence available for Execution evidence	20	4	Records filed in the project: Execution evidence.
4	Results against target	20	4	KPI KPI-18 used as the measure.

MP-021.5 — Confirm corrective actions · Decision criteria checked

#	Criterion	Met	Evidence
1	Corrective records complete	Yes	Corrective records v1.0
2	Requirements of ISO 9001 §10.2.1 c)–d) met	Yes	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

UMS015 (MP-022) — Nonconformity Capitalization and Closure

Plan REX; document lessons; identify standardization; update KB. Owner: Quality Manager. Tier 1. Requirements answered: ISO 9001 §10.2.2.

Step	Step, task and purpose	Role · form	What to type
MP-022.1	Plan nonconformity closure REX Task: Plan and prepare nonconformity closure Plan nonconformity closure REX — step 1 of 8 in UMS015 Nonconformity Capitalization and Closure.	Quality Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-022.2	Document nonconformity closure lessons Task: Plan and prepare nonconformity closure Document nonconformity closure lessons — step 2 of 8 in UMS015 Nonconformity Capitalization and Closure.	Quality Manager Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QHSE-UMS015-02 Version: 2.0 Content summary: REX report for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QHSE-PROC-01 — Procedure — Context To Strategy
MP-022.3	Identify nonconformity closure standardization Task: Plan and prepare nonconformity closure Identify nonconformity closure standardization — step 3 of 8 in UMS015 Nonconformity Capitalization and Closure.	Quality Manager Register items	Items identified: 3 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
MP-022.4	Review nonconformity closure effectiveness Task: Execute nonconformity closure activities Review nonconformity closure effectiveness — step 4 of 8 in UMS015 Nonconformity Capitalization and Closure.	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.7 Conclusion: Weighted score 3.7/5. Main gap: Operational (process failure, supply chain). Action recorded in the action plan.
MP-022.5	Validate nonconformity closure sustainability Task: Execute nonconformity closure activities Validate nonconformity closure sustainability — step 5 of 8 in UMS015 Nonconformity Capitalization and Closure.	Quality Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Quality Manager Decision comment and conditions: REX report approved against ISO 9001; no blocking point.
MP-022.6	Plan nonconformity closure generalization Task: Execute nonconformity closure activities Plan nonconformity closure generalization — step 6 of 8 in UMS015 Nonconformity Capitalization and Closure.	Quality Manager Plan	Planned activities (become actions): 2 rows — see the table below On completion: rows become actions.
MP-022.7	Update nonconformity closure knowledge base Task: Verify, record and close nonconformity closure Update nonconformity closure knowledge base — step 7 of 8 in UMS015 Nonconformity Capitalization and Closure.	Quality Manager Change	Change made: REX report updated: quote error. Reason: Change in regulation Documents or records updated: Document nonconformity closure lessons
MP-022.8	Close the nonconformity closure cycle Task: Verify, record and close nonconformity closure Close the nonconformity closure cycle — step 8 of 8 in UMS015 Nonconformity Capitalization and Closure.	Quality Manager Closure	Closure evidence: REX report closed; effectiveness verified on the KPI and evidence filed. Records that prove effectiveness: Document nonconformity closure lessons Closure date: 2026-07-01

MP-022.1 — Plan nonconformity closure REX · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Document nonconformity closure lessons	Julien Moreau	2026-06-29	2026-07-13	REX report
2	Identify nonconformity closure standardization	Julien Moreau	2026-07-04	2026-07-23	Lessons register
3	Review nonconformity closure effectiveness	Julien Moreau	2026-07-09	2026-08-02	REX report

MP-022.3 — Identify nonconformity closure standardization · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence

MP-022.6 — Plan nonconformity closure generalization · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Update nonconformity closure knowledge base	Julien Moreau	2026-06-28	2026-07-12	REX report
2	Close the nonconformity closure cycle	Julien Moreau	2026-07-03	2026-07-22	Lessons register

DMS021 (MP-082) — NCP Knowledge Base and RAG Management

Build/maintain vector KB; semantic search; RAG; multi-language; RBAC-aware. Owner: Quality Manager. Tier 4.

Step	Step, task and purpose	Role · form	What to type
MP-082.1	Define NCP knowledge base schema Task: Plan and prepare NCP knowledge base Define NCP knowledge base schema — step 1 of 10 in DMS021 NCP Knowledge Base and RAG Management.	Quality Manager Register items	Items identified: 3 rows — see the table below
MP-082.2	Ingest NCP knowledge base data Task: Plan and prepare NCP knowledge base Ingest NCP knowledge base data — step 2 of 10 in DMS021 NCP Knowledge Base and RAG Management.	DynamicMS Engine Automated service task	System result confirmed: Ingest NCP knowledge base data: done by the DynamicMS Engine; Vector KB available in the project. Records produced: —
MP-082.3	Generate NCP knowledge base embeddings Task: Plan and prepare NCP knowledge base Generate NCP knowledge base embeddings — step 3 of 10 in DMS021 NCP Knowledge Base and RAG Management.	Quality Manager AI-assisted draft	Context given to the assistant: Step: Generate NCP knowledge base embeddings. Inputs: Closed NCP fiches; REX entries; Standards library. Standards: ISO 9001, ISO 14001, ISO 45001. Organization: Atlas Universal SME (technical services). Suggestion outcome: Accepted Final validated text: Vector KB drafted with the assistant and reviewed by Quality Manager: covers ISO 9001, ISO 14001.
MP-082.4	Index into vector DB	DynamicMS Engine	System result confirmed: Index into vector DB: done by the

Step	Step, task and purpose	Role · form	What to type
	Task: Plan and prepare NCP knowledge base Index into vector DB — step 4 of 10 in DMS021 NCP Knowledge Base and RAG Management.	Automated service task	DynamicMS Engine; Vector KB available in the project. Records produced: —
MP-082.5	Configure NCP knowledge base RAG Task: Execute NCP knowledge base activities Configure NCP knowledge base RAG — step 5 of 10 in DMS021 NCP Knowledge Base and RAG Management.	Quality Manager AI-assisted draft	Context given to the assistant: Step: Configure NCP knowledge base RAG. Inputs: Closed NCP fiches; REX entries; Standards library. Standards: ISO 9001, ISO 14001, ISO 45001. Organization: Atlas Universal SME (technical services). Suggestion outcome: Edited Final validated text: Vector KB drafted with the assistant and reviewed by Quality Manager: covers ISO 9001, ISO 14001.
MP-082.6	Retrieve knowledge within access rights Task: Execute NCP knowledge base activities Retrieve knowledge within access rights — step 6 of 10 in DMS021 NCP Knowledge Base and RAG Management.	Quality Manager Execution	What was done: Retrieve knowledge within access rights carried out on service delivery; Vector KB updated. Records that prove it: — Completion (%): 100
MP-082.7	Translate knowledge articles (EN/FR/AR) Task: Execute NCP knowledge base activities Translate knowledge articles (EN/FR/AR) — step 7 of 10 in DMS021 NCP Knowledge Base and RAG Management.	Quality Manager Execution	What was done: Translate knowledge articles (EN/FR/AR) carried out on service delivery; Vector KB updated. Records that prove it: — Completion (%): 100
MP-082.8	Monitor NCP knowledge base quality Task: Verify, record and close NCP knowledge base Monitor NCP knowledge base quality — step 8 of 10 in DMS021 NCP Knowledge Base and RAG Management.	Quality Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-082.9	Update NCP knowledge base on closure Task: Verify, record and close NCP knowledge base Update NCP knowledge base on closure — step 9 of 10 in DMS021 NCP Knowledge Base and RAG Management.	Quality Manager Change	Change made: Vector KB updated: Strategic (market, customer loss). Reason: Decision of the management review Documents or records updated: —
MP-082.10	Report on NCP knowledge base status Task: Verify, record and close NCP knowledge base Report on NCP knowledge base status — step 10 of 10 in DMS021 NCP Knowledge Base and RAG Management.	Quality Manager Communication	Communication records: 2 rows — see the table below

MP-082.1 — Define NCP knowledge base schema · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Vector KB	Output	Affects Vector KB; followed by Quality Manager.	High	Customer complaint log, Jun 2026
2	RAG index	Output	Affects RAG index; followed by Quality Manager.	Medium	Internal audit report, Jun 2026
3	Search results	Output	Affects Vector KB; followed by Quality Manager.	Medium	Process performance dashboard, May 2026

MP-082.8 — Monitor NCP knowledge base quality · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Vector KB); it is the KPI its owner reviews at each Monthly review.	82.5	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Vector KB); it is the KPI its owner reviews at each Monthly review.	97.2	>= 95%

MP-082.10 — Report on NCP knowledge base status · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	AI agents	Intranet	2026-07-06	Vector KB: what changes for you and what to do by 2026-07-20.	Quality Manager
2	NCP teams	Notice board	2026-07-08	RAG index: what changes for you and what to do by 2026-07-20.	Quality Manager

DMS022 (MP-083) — AI Agent Orchestration for Problem Solving

Coordinate 8 AI agents; manage state machine; ensure RBAC; log with confidence. Owner: Quality Manager. Tier 4.

Step	Step, task and purpose	Role · form	What to type
MP-083.1	Initialize AI problem-solving agents Orchestrator Task: Plan and prepare AI problem-solving agents Initialize AI problem-solving agents Orchestrator — step 1 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	Quality Manager Execution	What was done: Initialize AI problem-solving agents Orchestrator carried out on service delivery; AI classifications updated. Records that prove it: — Completion (%): 100
MP-083.2	Trigger Classification at E1 Task: Plan and prepare AI problem-solving agents Trigger Classification at E1 — step 2 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	Quality Manager Execution	What was done: Trigger Classification at E1 carried out on service delivery; AI classifications updated. Records that prove it: — Completion (%): 100
MP-083.3	Trigger Structuring at E2 Task: Plan and prepare AI problem-solving agents Trigger Structuring at E2 — step 3 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	Quality Manager Execution	What was done: Trigger Structuring at E2 carried out on service delivery; AI classifications updated. Records that prove it: — Completion (%): 100
MP-083.4	Trigger Containment at E3 Task: Plan and prepare AI problem-solving agents Trigger Containment at E3 — step 4 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	Quality Manager Execution	What was done: Trigger Containment at E3 carried out on service delivery; AI classifications updated. Records that prove it: — Completion (%): 100
MP-083.5	Trigger RCA at E4 Task: Execute AI problem-solving agents activities Trigger RCA at E4 — step 5 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	Quality Manager Execution	What was done: Trigger RCA at E4 carried out on service delivery; AI classifications updated. Records that prove it: — Completion (%): 100
MP-083.6	Trigger Action Rec. at E5 Task: Execute AI problem-solving agents activities Trigger Action Rec. at E5 — step 6 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	Quality Manager Execution	What was done: Trigger Action Rec. at E5 carried out on service delivery; AI classifications updated. Records that prove it: — Completion (%): 100

Step	Step, task and purpose	Role · form	What to type
MP-083.7	Trigger Monitoring at E6 Task: Execute AI problem-solving agents activities Trigger Monitoring at E6 — step 7 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	Quality Manager Execution	What was done: Trigger Monitoring at E6 carried out on service delivery; AI classifications updated. Records that prove it: — Completion (%): 100
MP-083.8	Trigger REX at E7 Task: Verify, record and close AI problem-solving agents Trigger REX at E7 — step 8 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	Quality Manager Execution	What was done: Trigger REX at E7 carried out on service delivery; AI classifications updated. Records that prove it: — Completion (%): 100
MP-083.9	Manage AI problem-solving agents transitions Task: Verify, record and close AI problem-solving agents Manage AI problem-solving agents transitions — step 9 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	Quality Manager Execution	What was done: Manage AI problem-solving agents transitions carried out on service delivery; AI classifications updated. Records that prove it: — Completion (%): 100
MP-083.10	Log agent answers with confidence score Task: Verify, record and close AI problem-solving agents Log agent answers with confidence score — step 10 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	DynamicMS Engine Automated service task	System result confirmed: Log agent answers with confidence score: done by the DynamicMS Engine; AI classifications available in the project. Records produced: —

DMS023 (MP-084) — Smart Alert and Escalation Engine

Trigger 10 alert types (A–J); deliver; escalate; configurable per tenant. Owner: Performance Manager. Tier 4.

Step	Step, task and purpose	Role · form	What to type
MP-084.1	Configure alert engine A–J Task: Plan and prepare alert engine Configure alert engine A–J — step 1 of 11 in DMS023 Smart Alert and Escalation Engine.	Performance Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-084.2	Send alert A for high-priority problems Task: Plan and prepare alert engine Send alert A for high-priority problems — step 2 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Send alert A for high-priority problems: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —
MP-084.3	Send alert B for overdue actions Task: Plan and prepare alert engine Send alert B for overdue actions — step 3 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Send alert B for overdue actions: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —
MP-084.4	Send alert C for pending evaluations Task: Plan and prepare alert engine Send alert C for pending evaluations — step 4 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Send alert C for pending evaluations: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —
MP-084.5	Send alert D for delayed root cause analyses Task: Execute alert engine activities Send alert D for delayed root cause analyses — step 5 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Send alert D for delayed root cause analyses: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —

Step	Step, task and purpose	Role · form	What to type
MP-084.6	Send alert E for lessons to capitalize Task: Execute alert engine activities Send alert E for lessons to capitalize — step 6 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Send alert E for lessons to capitalize: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —
MP-084.7	Send alert F for KPI breaches Task: Execute alert engine activities Send alert F for KPI breaches — step 7 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Send alert F for KPI breaches: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —
MP-084.8	Send reminders G–I one and two days before due dates Task: Execute alert engine activities Send reminders G–I one and two days before due dates — step 8 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Send reminders G–I one and two days before due dates: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —
MP-084.9	Send alert J for inactive records Task: Verify, record and close alert engine Send alert J for inactive records — step 9 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Send alert J for inactive records: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —
MP-084.10	Escalate after 24h Task: Verify, record and close alert engine Escalate after 24h — step 10 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Escalate after 24h: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —
MP-084.11	Log alert dispatches and acknowledgements Task: Verify, record and close alert engine Log alert dispatches and acknowledgements — step 11 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Log alert dispatches and acknowledgements: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —

MP-084.1 — Configure alert engine A–J · Settings

#	Setting	Value	Reason
1	Configure alert engine A–J	Enabled for service delivery	Needed to produce In-app notifications
2	Owner and notification	Performance Manager	Alerts go to the process owner

DMS026 (MP-087) — REX Capitalization and Generalization

Document lessons; identify standardization (V1); generalization (V2); update KB. Owner: Quality Manager. Tier 4.

Step	Step, task and purpose	Role · form	What to type
MP-087.1	Plan lessons learned (REX) workshop Task: Plan and prepare lessons learned (REX) Plan lessons learned (REX) workshop — step 1 of 10 in DMS026 REX Capitalization and Generalization.	Quality Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-087.2	Document lessons learned with AI assistance Task: Plan and prepare lessons	Quality Manager AI-assisted draft	Context given to the assistant: Step: Document lessons learned with AI assistance. Inputs: Closed fiches; Corrective records; Effectiveness evals. Standards: ISO 9001, ISO 14001,

Step	Step, task and purpose	Role · form	What to type
	learned (REX) Document lessons learned with AI assistance — step 2 of 10 in DMS026 REX Capitalization and Generalization.		ISO 45001. Organization: Atlas Universal SME (technical services). Suggestion outcome: Edited Final validated text: REX narrative drafted with the assistant and reviewed by Quality Manager: covers ISO 9001, ISO 14001.
MP-087.3	Identify lessons learned (REX) standardization Task: Plan and prepare lessons learned (REX) Identify lessons learned (REX) standardization — step 3 of 10 in DMS026 REX Capitalization and Generalization.	Quality Manager Register items	Items identified: 3 rows — see the table below
MP-087.4	Identify lessons learned (REX) generalization Task: Plan and prepare lessons learned (REX) Identify lessons learned (REX) generalization — step 4 of 10 in DMS026 REX Capitalization and Generalization.	Quality Manager Register items	Items identified: 3 rows — see the table below
MP-087.5	Assign lessons learned (REX) responsible Task: Execute lessons learned (REX) activities Assign lessons learned (REX) responsible — step 5 of 10 in DMS026 REX Capitalization and Generalization.	Quality Manager Assignment	Role: Quality Manager Person (from the OBS): Julien Moreau Organization units covered: Quality RACSI of the macro process: R: Quality Manager · A: IMS Manager · C: HSE Manager · S: Document Controller · I: Top Management
MP-087.6	Set lessons learned (REX) deadlines Task: Execute lessons learned (REX) activities Set lessons learned (REX) deadlines — step 6 of 10 in DMS026 REX Capitalization and Generalization.	Quality Manager Execution	What was done: Set lessons learned (REX) deadlines carried out on service delivery; REX narrative updated. Records that prove it: Document lessons learned with AI assistance Completion (%): 100
MP-087.7	Update lessons learned (REX) knowledge base Task: Execute lessons learned (REX) activities Update lessons learned (REX) knowledge base — step 7 of 10 in DMS026 REX Capitalization and Generalization.	Quality Manager Change	Change made: REX narrative updated: quote error. Reason: Change in regulation Documents or records updated: Document lessons learned with AI assistance
MP-087.8	Update lessons learned (REX) procedures Task: Verify, record and close lessons learned (REX) Update lessons learned (REX) procedures — step 8 of 10 in DMS026 REX Capitalization and Generalization.	Quality Manager Change	Change made: REX narrative updated: quote error. Reason: Finding of the internal audit Documents or records updated: Document lessons learned with AI assistance
MP-087.9	Index lessons learned (REX) into RAG Task: Verify, record and close lessons learned (REX) Index lessons learned (REX) into RAG — step 9 of 10 in DMS026 REX Capitalization and Generalization.	Quality Manager AI-assisted draft	Context given to the assistant: Step: Index lessons learned (REX) into RAG. Inputs: Closed fiches; Corrective records; Effectiveness evals. Standards: ISO 9001, ISO 14001, ISO 45001. Organization: Atlas Universal SME (technical services). Suggestion outcome: Edited Final validated text: REX narrative drafted with the assistant and reviewed by Quality Manager: covers ISO 9001, ISO 14001.
MP-087.10	Communicate lessons learned (REX) Task: Verify, record and close lessons learned (REX) Communicate lessons learned (REX) — step 10 of 10 in DMS026 REX	Quality Manager Communication	Communication records: 2 rows — see the table below

DMS097 (MP-158) — SME Simplified Nonconformity Management

Simplified NCP; reduce complexity; essential problem-solving. Owner: Quality Manager. Tier 7. Requirements answered: ISO 9001 §10.2.

Step	Step, task and purpose	Role · form	What to type
MP-158.1	Capture SME nonconformities Task: Plan and prepare SME nonconformities Capture SME nonconformities — step 1 of 10 in DMS097 SME Simplified	Quality Manager Register items	Items identified: 3 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	Nonconformity Management.		
MP-158.2	Assess SME nonconformities severity Task: Plan and prepare SME nonconformities Assess SME nonconformities severity — step 2 of 10 in DMS097 SME Simplified Nonconformity Management.	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.9 Conclusion: Weighted score 3.9/5. Main gap: Strategic (market, customer loss). Action recorded in the action plan.
MP-158.3	Take immediate action on the nonconformity Task: Plan and prepare SME nonconformities Take immediate action on the nonconformity — step 3 of 10 in DMS097 SME Simplified Nonconformity Management.	Quality Manager Execution	What was done: Take immediate action on the nonconformity carried out on service delivery; NCP records updated. Records that prove it: — Completion (%): 100
MP-158.4	Perform a simple root cause analysis Task: Plan and prepare SME nonconformities Perform a simple root cause analysis — step 4 of 10 in DMS097 SME Simplified Nonconformity Management.	Quality Manager Execution	What was done: Perform a simple root cause analysis carried out on service delivery; NCP records updated. Records that prove it: — Completion (%): 100
MP-158.5	Define the corrective action Task: Execute SME nonconformities activities Define the corrective action — step 5 of 10 in DMS097 SME Simplified Nonconformity Management.	Quality Manager Change	Change made: NCP records updated: quote error. Reason: Decision of the management review Documents or records updated: —
MP-158.6	Implement SME nonconformities Task: Execute SME nonconformities activities Implement SME nonconformities — step 6 of 10 in DMS097 SME Simplified Nonconformity Management.	Quality Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-158.7	Verify SME nonconformities Task: Execute SME nonconformities activities Verify SME nonconformities — step 7 of 10 in DMS097 SME Simplified Nonconformity Management.	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.7 Conclusion: Weighted score 3.7/5. Main gap: Operational (process failure, supply chain). Action recorded in the action plan.
MP-158.8	Close the SME nonconformities cycle Task: Verify, record and close SME nonconformities Close the SME nonconformities cycle — step 8 of 10 in DMS097 SME Simplified Nonconformity Management.	Quality Manager Closure	Closure evidence: NCP records closed; effectiveness verified on the KPI and evidence filed. Records that prove effectiveness: — Closure date: 2026-07-29
MP-158.9	Document SME nonconformities lesson Task: Verify, record and close SME nonconformities Document SME nonconformities lesson — step 9 of 10 in DMS097 SME Simplified Nonconformity Management.	Quality Manager Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QHSE-DMS097-09 Version: 2.0 Content summary: NCP records for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QHSE-PROC-01 — Procedure — Context To Strategy
MP-158.10	Report on SME nonconformities status Task: Verify, record and close SME nonconformities Report on SME nonconformities status — step 10 of 10 in DMS097 SME Simplified Nonconformity Management.	Quality Manager Communication	Communication records: 2 rows — see the table below

MP-158.1 — Capture SME nonconformities · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	NCP records	Output	Affects NCP records; followed by Quality Manager.	High	Customer complaint log, Jul 2026
2	RCA reports	Output	Affects RCA reports; followed by Quality Manager.	Medium	Internal audit report, Jun 2026
3	Corrective records	Output	Affects NCP records; followed by Quality Manager.	Medium	Process performance dashboard, Jun 2026

MP-158.2 — Assess SME nonconformities severity · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	NCP records complete and up to date	30	4	NCP records reviewed on 2026-07-19; 2 gaps corrected.
2	Requirements of ISO 9001 §10.2 met	30	5	Checked against ISO 9001 §10.2 with the checklist of the phase gate.
3	Evidence available for RCA reports	20	3	Records filed in the project: RCA reports.
4	Results against target	20	3	KPI Q-KPI-01 used as the measure.

MP-158.6 — Implement SME nonconformities · Settings

#	Setting	Value	Reason
1	Implement SME nonconformities	Enabled for service delivery	Needed to produce NCP records
2	Owner and notification	Quality Manager	Alerts go to the process owner

MP-158.7 — Verify SME nonconformities · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	NCP records complete and up to date	30	3	NCP records reviewed on 2026-07-24; 2 gaps corrected.
2	Requirements of ISO 9001 §10.2 met	30	4	Checked against ISO 9001 §10.2 with the checklist of the phase gate.
3	Evidence available for RCA reports	20	5	Records filed in the project: RCA reports.
4	Results against target	20	3	KPI Q-KPI-01 used as the measure.

MP-158.10 — Report on SME nonconformities status · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	SME owner	Intranet	2026-07-26	NCP records: what changes for you and what to do by 2026-08-09.	Quality Manager

Gate — G9 — Problem solving effective

Exit criteria: Critical NCs contained within 24 h; corrective actions verified by an independent evaluator.

90. Open Lifecycle and select the phase card; the gate panel is on the right.

91. Tick “Containment within 24 h for critical NCs (mandatory, evidence required)”.
92. Tick “Root cause validated for major NCs (mandatory, evidence required)”.
93. Tick “Effectiveness verified by independent evaluator (mandatory, evidence required)”.
94. Sign in as Top Management (ceo@...) or the IMS Manager and select Go. For Hold or No-Go, type a comment explaining why.

E2E-10 — Monitoring To Evaluation

Goals: Monitor performance, evaluate results, steer the organization

From trigger to terminal event: Monitoring periodicity, performance deviation, or governance review → Performance evaluated; governance decisions made; improvements identified

UMS027 (MP-009) — Process Indicators and KPI Management

Define KPIs; align with objectives; set targets; automate and visualize. Owner: Performance Manager. Tier 1. Requirements answered: ISO 9001 §9.1.1.

Documents of this macro process: AT-UNI-QHSE-KPI (KPI dashboard and measurement results).

Step	Step, task and purpose	Role · form	What to type
MP-009.1	Define process KPIs indicators Task: Plan and prepare process KPIs Define process KPIs indicators — step 1 of 11 in UMS027 Process Indicators and KPI Management.	Performance Manager Register items	Items identified: 4 rows — see the table below
MP-009.2	Align process KPIs with objectives Task: Plan and prepare process KPIs Align process KPIs with objectives — step 2 of 11 in UMS027 Process Indicators and KPI Management.	Performance Manager Execution	What was done: Align process KPIs with objectives carried out on service delivery; KPI definitions updated. Records that prove it: AT-UNI-QHSE-KPI — KPI dashboard and measurement results Completion (%): 100
MP-009.3	Set process KPIs targets Task: Plan and prepare process KPIs Set process KPIs targets — step 3 of 11 in UMS027 Process Indicators and KPI Management.	Performance Manager SMART objectives	Objectives (become entries of the objectives register): 4 rows — see the table below On completion: rows become objectives.
MP-009.4	Define process KPIs data sources Task: Execute process KPIs activities Define process KPIs data sources — step 4 of 11 in UMS027 Process Indicators and KPI Management.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-009.5	Establish process KPIs frequency Task: Execute process KPIs activities Establish process KPIs frequency — step 5 of 11 in UMS027 Process Indicators and KPI Management.	Performance Manager Periodicity	Frequency: Monthly Next due date: 2026-08-28 Review chaired by: Performance Manager Organization units in scope: Operations Review inputs and notes: Inputs for each review: Process objectives; Strategic objectives; Performance data. An early review is triggered by: Receipt or update of Process objectives, Strategic objectives from Process owners, Data analysts.
MP-009.6	Designate owners of process KPIs Task: Execute process KPIs activities Designate owners of process KPIs — step 6 of 11 in UMS027 Process Indicators and KPI Management.	Performance Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-009.7	Review process KPIs relevance Task: Verify, record and close process KPIs Review process KPIs relevance — step 7 of 11 in UMS027 Process Indicators and KPI Management.	Performance Manager Review	Review frequency: Quarterly Review date: 2026-08-01 Next review: 2026-10-31 Chaired by: Performance Manager Participants: Performance Manager, IMS Manager, Quality Manager Inputs reviewed: 3 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
			Decisions and actions: 1 row — see the table below On completion: rows become actions.
MP-009.8	Automate process KPIs Task: Verify, record and close process KPIs Automate process KPIs — step 8 of 11 in UMS027 Process Indicators and KPI Management.	DynamicMS Engine Automated service task	System result confirmed: Automate process KPIs: done by the DynamicMS Engine; KPI definitions available in the project. Records produced: AT-UNI-QHSE-KPI — KPI dashboard and measurement results; Review process KPIs relevance
MP-009.9	Visualize process KPIs Task: Verify, record and close process KPIs Visualize process KPIs — step 9 of 11 in UMS027 Process Indicators and KPI Management.	Performance Manager Execution	What was done: Visualize process KPIs carried out on service delivery; KPI definitions updated. Records that prove it: AT-UNI-QHSE-KPI — KPI dashboard and measurement results; Review process KPIs relevance Completion (%): 100
MP-009.10	Set KPI measurement and analysis frequencies Task: Govern KPI Frequencies & RACSI Set KPI measurement and analysis frequencies — step 10 of 11 in UMS027 Process Indicators and KPI Management.	Performance Manager Execution	What was done: Set KPI measurement and analysis frequencies carried out on service delivery; KPI definitions updated. Records that prove it: AT-UNI-QHSE-KPI — KPI dashboard and measurement results; Review process KPIs relevance Completion (%): 100
MP-009.11	Assign KPI RACSI Task: Govern KPI Frequencies & RACSI Assign KPI RACSI — step 11 of 11 in UMS027 Process Indicators and KPI Management.	Performance Manager Assignment	Role: Performance Manager Person (from the OBS): Omar Haddad Organization units covered: Operations RACSI of the macro process: R: Performance Manager · A: IMS Manager · C: HSE Manager · S: Document Controller · I: Top Management

MP-009.1 — Define process KPIs indicators · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Customer satisfaction index	Indicator	Affects KPI definitions; followed by Performance Manager.	High	Customer complaint log, Jul 2026
2	On-time delivery rate	Indicator	Affects Dashboards; followed by Performance Manager.	Medium	Internal audit report, Jul 2026
3	First pass yield	Indicator	Affects KPI definitions; followed by Performance Manager.	Medium	Process performance dashboard, Jun 2026
4	Cost of poor quality	Indicator	Affects Dashboards; followed by Performance Manager.	Low	Interview with the process owner, Jun 2026

MP-009.3 — Set process KPIs targets · Objectives (become entries of the objectives register)

#	Specific objective	Measure (KPI)	Baseline	Achievable target	Relevant to (policy commitment)	Owner	Time-bound deadline	Resources
1	Raise customer satisfaction on technical services	Q-KPI-01 — Customer satisfaction index	78%	>= 85%	Satisfy customer requirements	Julien Moreau	2026-11-26	Quarterly survey; complaint review meeting
2	Deliver technical services on time	Q-KPI-02 — On-time delivery rate	86%	>= 95%	On time, right first time	Claire Martin	2026-08-28	Planning board; one extra technician in summer
3	Reduce the cost of poor quality	Q-KPI-04 — Cost of poor quality	4.1%	<= 2%	Continual improvement	Julien Moreau	2026-11-26	Rework tracking in the NC register

#	Specific objective	Measure (KPI)	Baseline	Achievable target	Relevant to (policy commitment)	Owner	Time-bound deadline	Resources
4	Close corrective actions on time	Q-KPI-05 — Corrective actions closed on time	70%	>= 90%	Continual improvement	Tariq Saleh	2026-05-30	Weekly action review

MP-009.4 — Define process KPIs data sources · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	KPI definitions	Output	Affects KPI definitions; followed by Performance Manager.	High	Interview with the process owner, Jun 2026
2	Dashboards	Output	Affects Dashboards; followed by Performance Manager.	Medium	Regulatory watch bulletin, Jun 2026
3	Target tracking	Output	Affects KPI definitions; followed by Performance Manager.	Medium	Supplier evaluation file, Jun 2026

MP-009.6 — Designate owners of process KPIs · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Review process KPIs relevance	Omar Haddad	2026-08-01	2026-08-15	KPI definitions
2	Automate process KPIs	Omar Haddad	2026-08-06	2026-08-25	Dashboards
3	Visualize process KPIs	Omar Haddad	2026-08-11	2026-09-04	KPI definitions

MP-009.7 — Review process KPIs relevance · Inputs reviewed

#	Input	Finding
1	Process objectives	Process objectives still valid; minor updates made.
2	Strategic objectives	No major change since the last review.
3	Performance data	Gap found on Dashboards.

MP-009.7 — Review process KPIs relevance · Decisions and actions

#	Decision	Owner	Due date
1	Update Dashboards	Omar Haddad	2026-08-31

UMS028 (MP-010) — Process Alert and Escalation Thresholds

Define alert thresholds; set escalation levels; configure notifications; test. Owner: Performance Manager. Tier 1. Requirements answered: ISO 9001 §9.1.1.

Step	Step, task and purpose	Role · form	What to type
MP-010.1	Define alert and escalation thresholds Task: Plan and prepare alert and escalation thresholds Define alert and escalation thresholds — step 1 of 9 in UMS028 Process Alert and Escalation Thresholds.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-010.2	Set alert levels Task: Plan and prepare alert and	Performance Manager Execution	What was done: Set alert levels carried out on service delivery; Alert thresholds updated.

Step	Step, task and purpose	Role · form	What to type
	escalation thresholds Set alert levels — step 2 of 9 in UMS028 Process Alert and Escalation Thresholds.		Records that prove it: — Completion (%): 100
MP-010.3	Configure alert and escalation thresholds triggers Task: Plan and prepare alert and escalation thresholds Configure alert and escalation thresholds triggers — step 3 of 9 in UMS028 Process Alert and Escalation Thresholds.	Performance Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-010.4	Designate alert and escalation thresholds recipients Task: Execute alert and escalation thresholds activities Designate alert and escalation thresholds recipients — step 4 of 9 in UMS028 Process Alert and Escalation Thresholds.	Performance Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-010.5	Define escalation paths Task: Execute alert and escalation thresholds activities Define escalation paths — step 5 of 9 in UMS028 Process Alert and Escalation Thresholds.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-010.6	Test alert and escalation thresholds Task: Execute alert and escalation thresholds activities Test alert and escalation thresholds — step 6 of 9 in UMS028 Process Alert and Escalation Thresholds.	Performance Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.7 Conclusion: Weighted score 3.7/5. Main gap: Strategic (market, customer loss). Action recorded in the action plan.
MP-010.7	Monitor alert and escalation thresholds Task: Verify, record and close alert and escalation thresholds Monitor alert and escalation thresholds — step 7 of 9 in UMS028 Process Alert and Escalation Thresholds.	Performance Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-010.8	Adjust alert and escalation thresholds Task: Verify, record and close alert and escalation thresholds Adjust alert and escalation thresholds — step 8 of 9 in UMS028 Process Alert and Escalation Thresholds.	Performance Manager Change	Change made: Alert thresholds updated: quote error. Reason: Finding of the internal audit Documents or records updated: Define escalation paths
MP-010.9	Update alert and escalation thresholds Task: Verify, record and close alert and escalation thresholds Update alert and escalation thresholds — step 9 of 9 in UMS028 Process Alert and Escalation Thresholds.	Performance Manager Change	Change made: Alert thresholds updated: quote error. Reason: Decision of the management review Documents or records updated: Define escalation paths

MP-010.1 — Define alert and escalation thresholds · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Alert thresholds	Output	Affects Alert thresholds; followed by Performance Manager.	High	Customer complaint log, Jul 2026
2	Escalation procedures	Output	Affects Escalation procedures; followed by Performance Manager.	Medium	Internal audit report, Jul 2026
3	Notification records	Output	Affects Alert thresholds; followed by Performance Manager.	Medium	Process performance dashboard, Jul 2026

MP-010.3 — Configure alert and escalation thresholds triggers · Settings

#	Setting	Value	Reason
1	Configure alert and escalation thresholds triggers	Enabled for service delivery	Needed to produce Alert thresholds
2	Owner and notification	Performance Manager	Alerts go to the process owner

MP-010.4 — Designate alert and escalation thresholds recipients · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Define escalation paths	Omar Haddad	2026-08-08	2026-08-22	Alert thresholds
2	Test alert and escalation thresholds	Omar Haddad	2026-08-13	2026-09-01	Escalation procedures
3	Monitor alert and escalation thresholds	Omar Haddad	2026-08-18	2026-09-11	Alert thresholds

MP-010.5 — Define escalation paths · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Alert thresholds	Output	Affects Alert thresholds; followed by Performance Manager.	High	Regulatory watch bulletin, Jun 2026
2	Escalation procedures	Output	Affects Escalation procedures; followed by Performance Manager.	Medium	Supplier evaluation file, Jun 2026
3	Notification records	Output	Affects Alert thresholds; followed by Performance Manager.	Medium	Management review minutes, May 2026

MP-010.6 — Test alert and escalation thresholds · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Alert thresholds complete and up to date	30	4	Alert thresholds reviewed on 2026-08-01; 2 gaps corrected.
2	Requirements of ISO 9001 §9.1.1 met	30	3	Checked against ISO 9001 §9.1.1 with the checklist of the phase gate.
3	Evidence available for Escalation procedures	20	4	Records filed in the project: Escalation procedures.
4	Results against target	20	4	KPI Q-KPI-01 used as the measure.

MP-010.7 — Monitor alert and escalation thresholds · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Alert thresholds); it is the KPI its owner reviews at each Monthly review.	82.5	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Alert thresholds); it is the KPI its owner reviews at each Monthly review.	97.2	>= 95%

UMS029 (MP-011) — Real-Time Dashboard and Process Steering

Provide real-time visibility; enable drill-down; control access; update. Owner: Performance Manager. Tier 1. Requirements answered: ISO 9001 §9.1.3.

Step	Step, task and purpose	Role · form	What to type
MP-011.1	Identify process dashboard profiles Task: Plan and prepare process dashboard Identify process dashboard profiles — step 1 of 9 in UMS029 Real-Time Dashboard and Process Steering.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-011.2	Define process dashboard layout Task: Plan and prepare process dashboard Define process dashboard layout — step 2 of 9 in UMS029 Real-Time Dashboard and Process Steering.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-011.3	Aggregate process dashboard data Task: Plan and prepare process dashboard Aggregate process dashboard data — step 3 of 9 in UMS029 Real-Time Dashboard and Process Steering.	DynamicMS Engine Automated service task	System result confirmed: Aggregate process dashboard data: done by the DynamicMS Engine; Dashboards available in the project. Records produced: —
MP-011.4	Configure process dashboard widgets Task: Execute process dashboard activities Configure process dashboard widgets — step 4 of 9 in UMS029 Real-Time Dashboard and Process Steering.	Performance Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-011.5	Set up drill-down Task: Execute process dashboard activities Set up drill-down — step 5 of 9 in UMS029 Real-Time Dashboard and Process Steering.	Performance Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-011.6	Publish process dashboard Task: Execute process dashboard activities Publish process dashboard — step 6 of 9 in UMS029 Real-Time Dashboard and Process Steering.	Performance Manager Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QHSE-UMS029-06 Version: 1.0 Content summary: Dashboards for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QHSE-PROC-01 — Procedure — Context To Strategy
MP-011.7	Control process dashboard access Task: Verify, record and close process dashboard Control process dashboard access — step 7 of 9 in UMS029 Real-Time Dashboard and Process Steering.	Performance Manager Execution	What was done: Control process dashboard access carried out on service delivery; Dashboards updated. Records that prove it: — Completion (%): 100
MP-011.8	Gather process dashboard feedback Task: Verify, record and close process dashboard Gather process dashboard feedback — step 8 of 9 in UMS029 Real-Time Dashboard and Process Steering.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-011.9	Update process dashboard Task: Verify, record and close process dashboard Update process dashboard — step 9 of 9 in UMS029 Real-Time Dashboard and Process Steering.	Performance Manager Change	Change made: Dashboards updated: Strategic (market, customer loss). Reason: Decision of the management review Documents or records updated: —

3	Access records	Output	Affects Dashboards; followed by Performance Manager.	Medium	Process performance dashboard, May 2026

UMS010 (MP-031) — Performance Indicator Consolidation and Reviews

Define indicators; collect real-time data; aggregate dashboards; analyze trends. Owner: Performance Manager.
Tier 1. Requirements answered: ISO 9001 §9.1.3.

Step	Step, task and purpose	Role · form	What to type
MP-031.1	Define performance indicators Task: Plan and prepare performance indicators Define performance indicators — step 1 of 9 in UMS010 Performance Indicator Consolidation and Reviews.	Performance Manager Register items	Items identified: 1 row — see the table below
MP-031.2	Establish performance indicators agenda	Performance Manager Execution	What was done: Establish performance indicators agenda carried out on service delivery; Dashboards updated.

Step	Step, task and purpose	Role · form	What to type
	Task: Plan and prepare performance indicators Establish performance indicators agenda — step 2 of 9 in UMS010 Performance Indicator Consolidation and Reviews.		Records that prove it: — Completion (%): 100
MP-031.3	Collect performance indicators data Task: Plan and prepare performance indicators Collect performance indicators data — step 3 of 9 in UMS010 Performance Indicator Consolidation and Reviews.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-031.4	Aggregate performance indicators Task: Execute performance indicators activities Aggregate performance indicators — step 4 of 9 in UMS010 Performance Indicator Consolidation and Reviews.	DynamicMS Engine Automated service task	System result confirmed: Aggregate performance indicators: done by the DynamicMS Engine; Dashboards available in the project. Records produced: —
MP-031.5	Analyze performance indicators Task: Execute performance indicators activities Analyze performance indicators — step 5 of 9 in UMS010 Performance Indicator Consolidation and Reviews.	Performance Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.2 Conclusion: Weighted score 3.2/5. Main gap: job sheet not signed. Action recorded in the action plan.
MP-031.6	Identify performance indicators gaps Task: Execute performance indicators activities Identify performance indicators gaps — step 6 of 9 in UMS010 Performance Indicator Consolidation and Reviews.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-031.7	Generate performance indicators supports Task: Verify, record and close performance indicators Generate performance indicators supports — step 7 of 9 in UMS010 Performance Indicator Consolidation and Reviews.	Performance Manager Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QHSE-UMS010-07 Version: 1.1 Content summary: Dashboards for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QHSE-PROC-01 — Procedure — Context To Strategy
MP-031.8	Facilitate performance indicators reviews Task: Verify, record and close performance indicators Facilitate performance indicators reviews — step 8 of 9 in UMS010 Performance Indicator Consolidation and Reviews.	Performance Manager Execution	What was done: Facilitate performance indicators reviews carried out on service delivery; Dashboards updated. Records that prove it: — Completion (%): 100
MP-031.9	Monitor performance indicators actions Task: Verify, record and close performance indicators Monitor performance indicators actions — step 9 of 9 in UMS010 Performance Indicator Consolidation and Reviews.	Performance Manager Measurement	Indicators measured: 1 row — see the table below Analysis of gaps and trend: Trend over the last three months: stable, below target; action opened. Next analysis at the performance review.

MP-031.1 — Define performance indicators · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	KPI analysis timeliness	Indicator	Affects Dashboards; followed by Performance Manager.	High	Customer complaint log, Jul 2026

MP-031.3 — Collect performance indicators data · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Dashboards	Output	Affects Dashboards; followed by Performance Manager.	High	Process performance dashboard, Jul 2026
2	Trend analysis	Output	Affects Trend analysis; followed by Performance Manager.	Medium	Interview with the process owner, Jul 2026
3	Gap reports	Output	Affects Dashboards; followed by Performance Manager.	Medium	Regulatory watch bulletin, Jun 2026

MP-031.5 — Analyze performance indicators · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Dashboards complete and up to date	30	3	Dashboards reviewed on 2026-08-14; 2 gaps corrected.
2	Requirements of ISO 9001 §9.1.3 met	30	3	Checked against ISO 9001 §9.1.3 with the checklist of the phase gate.
3	Evidence available for Trend analysis	20	3	Records filed in the project: Trend analysis.
4	Results against target	20	4	KPI KPI-20 used as the measure.

MP-031.6 — Identify performance indicators gaps · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Dashboards	Output	Affects Dashboards; followed by Performance Manager.	High	Supplier evaluation file, Jun 2026
2	Trend analysis	Output	Affects Trend analysis; followed by Performance Manager.	Medium	Management review minutes, Jun 2026
3	Gap reports	Output	Affects Dashboards; followed by Performance Manager.	Medium	Customer complaint log, May 2026

MP-031.9 — Monitor performance indicators actions · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	KPI-20 — KPI analysis timeliness	KPI analysis timeliness measures the result of this macro process (Dashboards); it is the KPI its owner reviews at each Monthly review.	88.8	>= 95%

UMS034 (MP-032) — Management System Performance Monitoring

Set PDCA periodicity; define system indicators; compare data; trigger corrective actions. Owner: Performance Manager. Tier 1. Requirements answered: ISO 9001 §9.1.

Step	Step, task and purpose	Role · form	What to type
MP-032.1	Set management system performance periodicity Task: Plan and prepare management system performance Set management system performance periodicity — step 1 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Periodicity	Frequency: Monthly Next due date: 2026-09-17 Review chaired by: Performance Manager Organization units in scope: Operations Review inputs and notes: Inputs for each review: System indicators; Performance data; Targets. An early review is triggered by: Receipt or update of System indicators, Performance data from Quality mgr, Data analysts.
MP-032.2	Define management system performance indicators Task: Plan and prepare management	Performance Manager Register items	Items identified: 2 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	system performance Define management system performance indicators — step 2 of 12 in UMS034 Management System Performance Monitoring.		
MP-032.3	Collect management system performance data Task: Plan and prepare management system performance Collect management system performance data — step 3 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-032.4	Compare management system performance to plan Task: Plan and prepare management system performance Compare management system performance to plan — step 4 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.6 Conclusion: Weighted score 3.6/5. Main gap: Strategic (market, customer loss). Action recorded in the action plan.
MP-032.5	Identify management system performance anomalies Task: Execute management system performance activities Identify management system performance anomalies — step 5 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-032.6	Generate management system performance reports Task: Execute management system performance activities Generate management system performance reports — step 6 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QHSE-UMS034-06 Version: 1.0 Content summary: Health reports for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QHSE-PROC-01 — Procedure — Context To Strategy
MP-032.7	Trigger management system performance corrections Task: Execute management system performance activities Trigger management system performance corrections — step 7 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Execution	What was done: Trigger management system performance corrections carried out on service delivery; Health reports updated. Records that prove it: — Completion (%): 100
MP-032.8	Report on management system performance status Task: Verify, record and close management system performance Report on management system performance status — step 8 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Communication	Communication records: 2 rows — see the table below
MP-032.9	Monitor management system performance trends Task: Verify, record and close management system performance Monitor management system performance trends — step 9 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-032.10	Adjust management system performance parameters Task: Verify, record and close management system performance	Performance Manager Change	Change made: Health reports updated: quote error. Reason: Customer complaint analysis Documents or records updated: —

Step	Step, task and purpose	Role · form	What to type
	Adjust management system performance parameters — step 10 of 12 in UMS034 Management System Performance Monitoring.		
MP-032.11	Plan monitoring methods Task: Plan & Execute Monitoring Methods Plan monitoring methods — step 11 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Plan	Planned activities (become actions): 1 row — see the table below On completion: rows become actions.
MP-032.12	Execute monitoring and record results Task: Plan & Execute Monitoring Methods Execute monitoring and record results — step 12 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Execution	What was done: Execute monitoring and record results carried out on service delivery; Health reports updated. Records that prove it: Execute monitoring and record results Completion (%): 100

MP-032.2 — Define management system performance indicators · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Monitoring plan execution	Indicator	Affects Health reports; followed by Performance Manager.	High	Internal audit report, Jul 2026
2	Cost of poor quality	Indicator	Affects Anomaly reports; followed by Performance Manager.	Medium	Process performance dashboard, Jul 2026

MP-032.3 — Collect management system performance data · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Health reports	Output	Affects Health reports; followed by Performance Manager.	High	Process performance dashboard, Jul 2026
2	Anomaly reports	Output	Affects Anomaly reports; followed by Performance Manager.	Medium	Interview with the process owner, Jul 2026
3	Corrective triggers	Output	Affects Health reports; followed by Performance Manager.	Medium	Regulatory watch bulletin, Jun 2026

MP-032.4 — Compare management system performance to plan · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Health reports complete and up to date	30	3	Health reports reviewed on 2026-08-14; 2 gaps corrected.
2	Requirements of ISO 9001 §9.1 met	30	5	Checked against ISO 9001 §9.1 with the checklist of the phase gate.
3	Evidence available for Anomaly reports	20	3	Records filed in the project: Anomaly reports.
4	Results against target	20	3	KPI KPI-21 used as the measure.

MP-032.5 — Identify management system performance anomalies · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Health reports	Output	Affects Health reports; followed by Performance Manager.	High	Regulatory watch bulletin, Jul 2026
2	Anomaly reports	Output	Affects Anomaly reports; followed by Performance Manager.	Medium	Supplier evaluation file, Jun 2026

#	Item	Category	Description and impact	Relevance	Source / evidence
3	Corrective triggers	Output	Affects Health reports; followed by Performance Manager.	Medium	Management review minutes, Jun 2026

MP-032.8 — Report on management system performance status · Communication records

MP-032.9 — Monitor management system performance trends · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	KPI-21 — Monitoring plan execution	Monitoring plan execution measures the result of this macro process (Health reports); it is the KPI its owner reviews at each Monthly review.	93.8	>= 95%
2	Q-KPI-04 — Cost of poor quality	Cost of poor quality measures the result of this macro process (Health reports); it is the KPI its owner reviews at each Monthly review.	1.9	<= 2%

MP-032.11 — Plan monitoring methods · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Execute monitoring and record results	Omar Haddad	2026-08-22	2026-09-05	Health reports

UMS036 (MP-033) — Operational Process Performance Review

Set periodicity; collect data; conduct workshops; identify root causes. Owner: Performance Manager. Tier 1.
Requirements answered: ISO 9001 §9.1.3.

Step	Step, task and purpose	Role · form	What to type
MP-033.1	Set operational process performance periodicity Task: Plan and prepare operational process performance Set operational process performance periodicity — step 1 of 10 in UMS036 Operational Process Performance Review.	Performance Manager Periodicity	Frequency: Monthly Next due date: 2026-09-24 Review chaired by: Performance Manager Organization units in scope: Operations Review inputs and notes: Inputs for each review: KPI data; Defect data; Cycle time data. An early review is triggered by: Receipt or update of KPI data, Defect data from Process owner, Facilitator.
MP-033.2	Define operational process performance agenda Task: Plan and prepare operational process performance Define operational process performance agenda — step 2 of 10 in UMS036 Operational Process Performance Review.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-033.3	Collect operational process performance data Task: Plan and prepare operational process performance Collect operational process performance data — step 3 of 10 in UMS036 Operational Process	Performance Manager Register items	Items identified: 3 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	Performance Review.		
MP-033.4	Conduct operational process performance workshops Task: Plan and prepare operational process performance Conduct operational process performance workshops — step 4 of 10 in UMS036 Operational Process Performance Review.	Performance Manager Execution	What was done: Conduct operational process performance workshops carried out on service delivery; Review minutes updated. Records that prove it: — Completion (%): 100
MP-033.5	Compare operational process performance to targets Task: Execute operational process performance activities Compare operational process performance to targets — step 5 of 10 in UMS036 Operational Process Performance Review.	Performance Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4 Conclusion: Weighted score 4/5. Main gap: job sheet not signed. Action recorded in the action plan.
MP-033.6	Identify operational process performance causes Task: Execute operational process performance activities Identify operational process performance causes — step 6 of 10 in UMS036 Operational Process Performance Review.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-033.7	Define operational process performance actions Task: Execute operational process performance activities Define operational process performance actions — step 7 of 10 in UMS036 Operational Process Performance Review.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-033.8	Document the process control plan Task: Verify, record and close operational process performance Document the process control plan — step 8 of 10 in UMS036 Operational Process Performance Review.	Performance Manager Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QHSE-UMS036-08 Version: 1.1 Content summary: Review minutes for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QHSE-PROC-01 — Procedure — Context To Strategy
MP-033.9	Escalate operational process performance issues Task: Verify, record and close operational process performance Escalate operational process performance issues — step 9 of 10 in UMS036 Operational Process Performance Review.	Performance Manager Escalation	Escalated to: Top Management Reason: Review minutes is late beyond tolerance; a decision on resources is needed.
MP-033.10	Monitor operational process performance Task: Verify, record and close operational process performance Monitor operational process performance — step 10 of 10 in UMS036 Operational Process Performance Review.	Performance Manager Measurement	Indicators measured: 1 row — see the table below Analysis of gaps and trend: Trend over the last three months: stable, below target; action opened. Next analysis at the performance review.

UMS040 (MP-035) — Customer Satisfaction Barometer Management

Set survey periodicity; define NPS/CSAT; manage campaigns; correlate. Owner: Performance Manager. Tier 1. Requirements answered: ISO 9001 §9.1.2.

Step	Step, task and purpose	Role · form	What to type
MP-035.1	Set customer satisfaction survey periodicity Task: Plan and prepare customer satisfaction survey Set customer satisfaction survey periodicity — step 1 of 9 in UMS040 Customer Satisfaction Barometer Management.	Performance Manager Periodicity	Frequency: Monthly Next due date: 2026-10-04 Review chaired by: Performance Manager Organization units in scope: Operations Review inputs and notes: Inputs for each review: Customer feedback; Survey data; NPS/CSAT targets. An early review is triggered by: Receipt or update of Customer feedback, Survey data from CX mgr, Data analysts.
MP-035.2	Define customer satisfaction survey objectives Task: Plan and prepare customer satisfaction survey Define customer satisfaction survey objectives — step 2 of 9 in UMS040 Customer Satisfaction Barometer Management.	Performance Manager SMART objectives	Objectives (become entries of the objectives register): 4 rows — see the table below On completion: rows become objectives.
MP-035.3	Determine customer satisfaction survey costs Task: Plan and prepare customer satisfaction survey Determine customer satisfaction survey costs — step 3 of 9 in UMS040 Customer Satisfaction Barometer Management.	Performance Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 5 Conclusion: Weighted score 5/5. Main gap: Strategic (market, customer loss). Action recorded in the action plan.
MP-035.4	Manage customer satisfaction survey campaign Task: Execute customer satisfaction survey activities Manage customer satisfaction survey campaign — step 4 of 9 in UMS040 Customer Satisfaction Barometer Management.	Performance Manager Execution	What was done: Manage customer satisfaction survey campaign carried out on service delivery; Satisfaction reports updated. Records that prove it: — Completion (%): 100
MP-035.5	Analyze customer satisfaction survey trends Task: Execute customer satisfaction survey activities Analyze customer satisfaction survey trends — step 5 of 9 in UMS040 Customer Satisfaction Barometer Management.	Performance Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.3 Conclusion: Weighted score 4.3/5. Main gap: job sheet not signed. Action recorded in the action plan.
MP-035.6	Generate customer satisfaction survey dashboards Task: Execute customer satisfaction	Performance Manager Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QHSE-UMS040-06

Step	Step, task and purpose	Role · form	What to type
	survey activities Generate customer satisfaction survey dashboards — step 6 of 9 in UMS040 Customer Satisfaction Barometer Management.		Version: 2.0 Content summary: Satisfaction reports for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QHSE-PROC-01 — Procedure — Context To Strategy
MP-035.7	Correlate customer satisfaction survey Task: Verify, record and close customer satisfaction survey Correlate customer satisfaction survey — step 7 of 9 in UMS040 Customer Satisfaction Barometer Management.	Performance Manager Execution	What was done: Correlate customer satisfaction survey carried out on service delivery; Satisfaction reports updated. Records that prove it: — Completion (%): 100
MP-035.8	Identify customer satisfaction survey actions Task: Verify, record and close customer satisfaction survey Identify customer satisfaction survey actions — step 8 of 9 in UMS040 Customer Satisfaction Barometer Management.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-035.9	Report to management review Task: Verify, record and close customer satisfaction survey Report to management review — step 9 of 9 in UMS040 Customer Satisfaction Barometer Management.	Performance Manager Communication	Communication records: 2 rows — see the table below

MP-035.2 — Define customer satisfaction survey objectives · Objectives (become entries of the objectives register)

#	Specific objective	Measure (KPI)	Baseline	Achievable target	Relevant to (policy commitment)	Owner	Time-bound deadline	Resources
1	Raise customer satisfaction on technical services	Q-KPI-01 — Customer satisfaction index	78%	>= 85%	Satisfy customer requirements	Julien Moreau	2026-11-26	Quarterly survey; complaint review meeting
2	Deliver technical services on time	Q-KPI-02 — On-time delivery rate	86%	>= 95%	On time, right first time	Claire Martin	2026-08-28	Planning board; one extra technician in summer
3	Reduce the cost of poor quality	Q-KPI-04 — Cost of poor quality	4.1%	<= 2%	Continual improvement	Julien Moreau	2026-11-26	Rework tracking in the NC register
4	Close corrective actions on time	Q-KPI-05 — Corrective actions closed on time	70%	>= 90%	Continual improvement	Tariq Saleh	2026-05-30	Weekly action review

MP-035.3 — Determine customer satisfaction survey costs · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Satisfaction reports complete and up to date	30	5	Satisfaction reports reviewed on 2026-09-03; 2 gaps corrected.
2	Requirements of ISO 9001 §9.1.2 met	30	5	Checked against ISO 9001 §9.1.2 with the checklist of the phase gate.
3	Evidence available for NPS/CSAT scores	20	5	Records filed in the project: NPS/CSAT scores.
4	Results against target	20	5	KPI Q-KPI-01 used as the measure.

MP-035.5 — Analyze customer satisfaction survey trends · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Satisfaction reports complete and up to date	30	4	Satisfaction reports reviewed on 2026-09-05; 2 gaps corrected.
2	Requirements of ISO 9001 §9.1.2 met	30	5	Checked against ISO 9001 §9.1.2 with the checklist of the phase gate.
3	Evidence available for NPS/CSAT scores	20	4	Records filed in the project: NPS/CSAT scores.
4	Results against target	20	4	KPI Q-KPI-01 used as the measure.

MP-035.8 — Identify customer satisfaction survey actions · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Satisfaction reports	Output	Affects Satisfaction reports; followed by Performance Manager.	High	Customer complaint log, Jun 2026
2	NPS/CSAT scores	Output	Affects NPS/CSAT scores; followed by Performance Manager.	Medium	Internal audit report, Jun 2026
3	Trend analysis	Output	Affects Satisfaction reports; followed by Performance Manager.	Medium	Process performance dashboard, Jun 2026

MP-035.9 — Report to management review · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	Top mgmt	E-mail	2026-09-07	Satisfaction reports: what changes for you and what to do by 2026-09-21.	Performance Manager

GRC008 (MP-039) — Internal Audit and Assurance Cycle

Plan by risk; develop programs; test and document; report and follow up. Owner: Internal Audit Manager. Tier 1. Requirements answered: ISO 9001 §9.2.

Documents of this macro process: AT-UNI-QHSE-AUDPRG (Internal audit programme); AT-UNI-QHSE-AUDREP-01 (Internal audit report — AUD-AT-UNI-QHSE-01); AT-UNI-QHSE-AUDREP-02 (Internal audit report — AUD-AT-UNI-QHSE-02); AT-UNI-QHSE-AUDREP-03 (Internal audit report — AUD-AT-UNI-QHSE-03); AT-UNI-QHSE-AUDREP-04 (Internal audit report — AUD-AT-UNI-QHSE-04); AT-UNI-QHSE-AUDREP-05 (Internal audit report — AUD-AT-UNI-QHSE-05).

Step	Step, task and purpose	Role · form	What to type
MP-039.1	Plan internal audit programme by risk Task: Plan and prepare internal audit programme Plan internal audit programme by risk — step 1 of 9 in GRC008 Internal Audit and Assurance Cycle.	Internal Audit Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-039.2	Develop internal audit programme programs Task: Plan and prepare internal audit programme Develop internal audit programme programs — step 2 of 9 in GRC008 Internal Audit and Assurance Cycle.	Internal Audit Manager Execution	What was done: Develop internal audit programme programs carried out on service delivery; Audit plan updated. Records that prove it: AT-UNI-QHSE-AUDPRG — Internal audit programme; Address audit finding: Two controlled documents at service delivery had no revision status Completion (%): 100
MP-039.3	Allocate internal audit programme	Internal Audit	Role: Internal Audit Manager

Step	Step, task and purpose	Role · form	What to type
	Task: Plan and prepare internal audit programme Allocate internal audit programme — step 3 of 9 in GRC008 Internal Audit and Assurance Cycle.	Manager Assignment	Person (from the OBS): Nabil Zerouali Organization units covered: Quality RACSI of the macro process: R: Internal Audit Manager · A: IMS Manager · C: HSE Manager · S: Document Controller · I: Top Management
MP-039.4	Test internal audit programme Task: Execute internal audit programme activities Test internal audit programme — step 4 of 9 in GRC008 Internal Audit and Assurance Cycle.	Internal Audit Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.3 Conclusion: Weighted score 3.3/5. Main gap: Operational (process failure, supply chain). Action recorded in the action plan.
MP-039.5	Document the process control plan Task: Execute internal audit programme activities Document the process control plan — step 5 of 9 in GRC008 Internal Audit and Assurance Cycle.	Internal Audit Manager Document	Document template: TPL-AUDPRG — Internal audit programme Document reference: AT-UNI-QHSE-GRC008-05 Version: 2.0 Content summary: Audit plan for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QHSE-AUDPRG — Internal audit programme
MP-039.6	Draft internal audit programme report Task: Execute internal audit programme activities Draft internal audit programme report — step 6 of 9 in GRC008 Internal Audit and Assurance Cycle.	Internal Audit Manager Document	Document template: TPL-AUDPRG — Internal audit programme Document reference: AT-UNI-QHSE-GRC008-06 Version: 2.0 Content summary: Audit plan for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QHSE-AUDPRG — Internal audit programme
MP-039.7	Hold the audit closing meeting Task: Verify, record and close internal audit programme Hold the audit closing meeting — step 7 of 9 in GRC008 Internal Audit and Assurance Cycle.	Internal Audit Manager Execution	What was done: Hold the audit closing meeting carried out on service delivery; Audit plan updated. Records that prove it: AT-UNI-QHSE-AUDPRG — Internal audit programme; Address audit finding: Two controlled documents at service delivery had no revision status Completion (%): 100
MP-039.8	Issue internal audit programme report Task: Verify, record and close internal audit programme Issue internal audit programme report — step 8 of 9 in GRC008 Internal Audit and Assurance Cycle.	Internal Audit Manager Document	Document template: TPL-AUDPRG — Internal audit programme Document reference: AT-UNI-QHSE-GRC008-08 Version: 2.0 Content summary: Audit plan for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QHSE-AUDPRG — Internal audit programme
MP-039.9	Monitor action plans Task: Verify, record and close internal audit programme Monitor action plans — step 9 of 9 in GRC008 Internal Audit and Assurance Cycle.	Internal Audit Manager Measurement	Indicators measured: 1 row — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.

MP-039.1 — Plan internal audit programme by risk · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Develop internal audit programme programs	Nabil Zerouali	2026-09-11	2026-09-25	Audit plan
2	Allocate internal audit programme	Nabil Zerouali	2026-09-16	2026-10-05	Audit programs
3	Test internal audit programme	Nabil Zerouali	2026-09-21	2026-10-15	Audit plan

MP-039.4 — Test internal audit programme · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Audit plan complete and up to date	30	4	Audit plan reviewed on 2026-09-08; 2 gaps corrected.
2	Requirements of ISO 9001 §9.2 met	30	3	Checked against ISO 9001 §9.2 with the checklist of the phase gate.
3	Evidence available for Audit programs	20	3	Records filed in the project: Audit programs.
4	Results against target	20	3	KPI KPI-22 used as the measure.

MP-039.9 — Monitor action plans · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	KPI-22 — Audit programme completion	Audit programme completion measures the result of this macro process (Audit plan); it is the KPI its owner reviews at each Monthly review.	100	100%

GRC010 (MP-040) — Executive GRC Reporting and Dashboards

Aggregate data; build dashboards; generate reports; use predictive analytics. Owner: IMS Manager. Tier 1.
Requirements answered: ISO 9001 §9.1.3.

Step	Step, task and purpose	Role · form	What to type
MP-040.1	Aggregate GRC dashboard Task: Plan and prepare GRC dashboard Aggregate GRC dashboard — step 1 of 10 in GRC010 Executive GRC Reporting and Dashboards.	DynamicMS Engine Automated service task	System result confirmed: Aggregate GRC dashboard: done by the DynamicMS Engine; GRC dashboards available in the project. Records produced: —
MP-040.2	Define GRC dashboard needs Task: Plan and prepare GRC dashboard Define GRC dashboard needs — step 2 of 10 in GRC010 Executive GRC Reporting and Dashboards.	IMS Manager Register items	Items identified: 3 rows — see the table below
MP-040.3	Build GRC dashboard Task: Plan and prepare GRC dashboard Build GRC dashboard — step 3 of 10 in GRC010 Executive GRC Reporting and Dashboards.	IMS Manager Execution	What was done: Build GRC dashboard carried out on service delivery; GRC dashboards updated. Records that prove it: — Completion (%): 100
MP-040.4	Generate GRC dashboard reports Task: Plan and prepare GRC dashboard Generate GRC dashboard reports — step 4 of 10 in GRC010 Executive GRC Reporting and Dashboards.	IMS Manager Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QHSE-GRC010-04 Version: 2.0 Content summary: GRC dashboards for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QHSE-PROC-01 — Procedure — Context To Strategy
MP-040.5	Prepare GRC dashboard submissions Task: Execute GRC dashboard activities Prepare GRC dashboard submissions — step 5 of 10 in GRC010 Executive GRC Reporting and Dashboards.	IMS Manager Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QHSE-GRC010-05 Version: 1.0 Content summary: GRC dashboards for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QHSE-PROC-01 — Procedure — Context To Strategy
MP-040.6	Validate GRC dashboard	IMS Manager	Decision criteria checked: 3 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	Task: Execute GRC dashboard activities Validate GRC dashboard — step 6 of 10 in GRC010 Executive GRC Reporting and Dashboards.	Decision	Decision: Hold Approver (Accountable): IMS Manager Decision comment and conditions: Hold until Executive reports is complete; review in two weeks.
MP-040.7	Verify GRC dashboard Task: Execute GRC dashboard activities Verify GRC dashboard — step 7 of 10 in GRC010 Executive GRC Reporting and Dashboards.	IMS Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.6 Conclusion: Weighted score 3.6/5. Main gap: job sheet not signed. Action recorded in the action plan.
MP-040.8	Publish GRC dashboard Task: Verify, record and close GRC dashboard Publish GRC dashboard — step 8 of 10 in GRC010 Executive GRC Reporting and Dashboards.	IMS Manager Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QHSE-GRC010-08 Version: 1.0 Content summary: GRC dashboards for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: AT-UNI-QHSE-PROC-01 — Procedure — Context To Strategy
MP-040.9	Deliver GRC dashboard Task: Verify, record and close GRC dashboard Deliver GRC dashboard — step 9 of 10 in GRC010 Executive GRC Reporting and Dashboards.	IMS Manager Training	Session / module: Deliver GRC dashboard — practice session Date: 2026-09-19 Units trained: Atlas Universal SME Participants: 27 Effectiveness evaluation method: Practical test Effectiveness (%): 97
MP-040.10	Use predictive analytics Task: Verify, record and close GRC dashboard Use predictive analytics — step 10 of 10 in GRC010 Executive GRC Reporting and Dashboards.	IMS Manager AI-assisted draft	Context given to the assistant: Step: Use predictive analytics. Inputs: Risk data; Compliance data; Audit data. Standards: ISO 9001, ISO 14001, ISO 45001. Organization: Atlas Universal SME (technical services). Suggestion outcome: Edited Final validated text: GRC dashboards drafted with the assistant and reviewed by IMS Manager: covers ISO 9001, ISO 14001.

MP-040.2 — Define GRC dashboard needs · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	GRC dashboards	Output	Affects GRC dashboards; followed by IMS Manager.	High	Internal audit report, Aug 2026
2	Executive reports	Output	Affects Executive reports; followed by IMS Manager.	Medium	Process performance dashboard, Aug 2026
3	Predictive analytics	Output	Affects GRC dashboards; followed by IMS Manager.	Medium	Interview with the process owner, Aug 2026

MP-040.6 — Validate GRC dashboard · Decision criteria checked

#	Criterion	Met	Evidence
1	GRC dashboards complete	Yes	GRC dashboards v1.0
2	Requirements of ISO 9001 §9.1.3 met	Partly	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

MP-040.7 — Verify GRC dashboard · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	GRC dashboards complete and up to date	30	3	GRC dashboards reviewed on 2026-09-12; 2 gaps corrected.

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
2	Requirements of ISO 9001 §9.1.3 met	30	3	Checked against ISO 9001 §9.1.3 with the checklist of the phase gate.
3	Evidence available for Executive reports	20	4	Records filed in the project: Executive reports.
4	Results against target	20	5	KPI Q-KPI-01 used as the measure.

DMS086 (MP-147) — SME Peer Benchmarking

Benchmark against peers; identify improvements; learn. Owner: Performance Manager. Tier 7.

Step	Step, task and purpose	Role · form	What to type
MP-147.1	Select SME peer benchmark category Task: Plan and prepare SME peer benchmark Select SME peer benchmark category — step 1 of 10 in DMS086 SME Peer Benchmarking.	Performance Manager Register items	Items identified: 3 rows — see the table below

MP-156.1 — Define owner dashboard requirements · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	ISO 9001	Requirement	Affects Owner dashboard; followed by IMS Manager.	High	Customer complaint log, Sep 2026
2	ISO 14001	Requirement	Affects Essential metrics; followed by IMS Manager.	Medium	Internal audit report, Aug 2026
3	ISO 45001	Requirement	Affects Owner dashboard; followed by IMS Manager.	Medium	Process performance dashboard, Aug 2026

MP-156.2 — Select owner dashboard metrics · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Customer satisfaction index	Indicator	Affects Owner dashboard; followed by IMS Manager.	High	Internal audit report, Sep 2026
2	On-time delivery rate	Indicator	Affects Essential metrics; followed by IMS Manager.	Medium	Process performance dashboard, Sep 2026
3	First pass yield	Indicator	Affects Owner dashboard; followed by IMS Manager.	Medium	Interview with the process owner, Aug 2026
4	Cost of poor quality	Indicator	Affects Essential metrics; followed by IMS Manager.	Low	Regulatory watch bulletin, Aug 2026

MP-156.3 — Configure owner dashboard sources · Settings

#	Setting	Value	Reason
1	Configure owner dashboard sources	Enabled for service delivery	Needed to produce Owner dashboard
2	Owner and notification	IMS Manager	Alerts go to the process owner

MP-156.4 — Design owner dashboard layout · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Set up alerts	Tariq Saleh	2026-10-04	2026-10-18	Owner dashboard
2	Review owner dashboard daily	Tariq Saleh	2026-10-09	2026-10-28	Essential metrics
3	Drill owner dashboard down	Tariq Saleh	2026-10-14	2026-11-07	Owner dashboard

MP-156.5 — Set up alerts · Settings

#	Setting	Value	Reason
1	Set up alerts	Enabled for service delivery	Needed to produce Owner dashboard
2	Owner and notification	IMS Manager	Alerts go to the process owner

MP-156.9 — Report on owner dashboard status · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	SME owner	E-mail	2026-10-08	Owner dashboard: what changes for you and what to do by 2026-10-22.	IMS Manager
2	SME management	Intranet	2026-10-10	Essential metrics: what changes for you and what to do by 2026-10-22.	IMS Manager

Gate — G10 — Performance reviewed

Exit criteria: KPIs measured for three periods; management review held; internal audit programme on track.

95. Open Lifecycle and select the phase card; the gate panel is on the right.

96. Tick “KPI dashboard live (mandatory, evidence required)”.

97. Tick “Management review minutes signed (mandatory, evidence required)”.

98. Tick “Internal audit programme ≥ 90% complete (mandatory, evidence required)”.

99. Tick “Owner dashboard configured (mandatory, evidence required)”.

100. Tick “Top 10 risks reviewed quarterly (mandatory, evidence required)”.

101. Sign in as Top Management (ceo@...) or the IMS Manager and select Go. For Hold or No-Go, type a comment explaining why.

E2E-11 — Audit To Assurance

Goals: Provide assurance through AI, foresight, IoT, ESG, analytics

From trigger to terminal event: Predictive analytics alert, regulatory change, or assurance requirement → Risks predicted; compliance assured; ESG and carbon reported

DMS004 (MP-065) — Intelligent Document Generation

Auto-generate documents; ensure compliance; reduce effort. Owner: Document Controller. Tier 3.

Step	Step, task and purpose	Role · form	What to type
MP-065.1	Select generated documents template Task: Plan and prepare generated documents Select generated documents template — step 1 of 8 in DMS004 Intelligent Document Generation.	Document Controller Register items	Items identified: 3 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
MP-065.2	Gather generated documents data Task: Plan and prepare generated documents Gather generated documents data — step 2 of 8 in DMS004 Intelligent Document Generation.	Document Controller Register items	Items identified: 3 rows — see the table below
MP-065.3	Generate generated documents draft Task: Plan and prepare generated documents Generate generated documents draft — step 3 of 8 in DMS004 Intelligent Document Generation.	Document Controller Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QHSE-DMS004-03 Version: 2.0 Content summary: Generated docs for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: —
MP-065.4	Validate generated documents against standards Task: Execute generated documents activities Validate generated documents against standards — step 4 of 8 in DMS004 Intelligent Document Generation.	Document Controller Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Document Controller Decision comment and conditions: Generated docs approved against ISO 9001; no blocking point.
MP-065.5	Route generated documents for review Task: Execute generated documents activities Route generated documents for review — step 5 of 8 in DMS004 Intelligent Document Generation.	Document Controller Execution	What was done: Route generated documents for review carried out on service delivery; Generated docs updated. Records that prove it: — Completion (%): 100
MP-065.6	Publish generated documents Task: Execute generated documents activities Publish generated documents — step 6 of 8 in DMS004 Intelligent Document Generation.	Document Controller Document	Document template: TPL-PROC — Procedure Document reference: AT-UNI-QHSE-DMS004-06 Version: 2.0 Content summary: Generated docs for technical services, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: —
MP-065.7	Track generated documents version Task: Verify, record and close generated documents Track generated documents version — step 7 of 8 in DMS004 Intelligent Document Generation.	Document Controller Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-065.8	Archive generated documents Task: Verify, record and close generated documents Archive generated documents — step 8 of 8 in DMS004 Intelligent Document Generation.	Document Controller Closure	Closure evidence: Generated docs closed; effectiveness verified on the KPI and evidence filed. Records that prove effectiveness: — Closure date: 2026-10-10

MP-065.1 — Select generated documents template · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Generated docs	Output	Affects Generated docs; followed by Document Controller.	High	Customer complaint log, Sep 2026
2	Compliance validation	Output	Affects Compliance validation; followed by Document Controller.	Medium	Internal audit report, Sep 2026
3	Approval records	Output	Affects Generated docs; followed by Document Controller.	Medium	Process performance dashboard, Sep 2026

MP-065.2 — Gather generated documents data · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Generated docs	Output	Affects Generated docs; followed by Document Controller.	High	Internal audit report, Sep 2026
2	Compliance validation	Output	Affects Compliance validation; followed by Document Controller.	Medium	Process performance dashboard, Aug 2026
3	Approval records	Output	Affects Generated docs; followed by Document Controller.	Medium	Interview with the process owner, Aug 2026

MP-065.4 — Validate generated documents against standards · Decision criteria checked

#	Criterion	Met	Evidence
1	Generated docs complete	Yes	Generated docs v1.0
2	Requirements of ISO 9001 met	Yes	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

MP-065.7 — Track generated documents version · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	H-KPI-01 — Lost time injury frequency rate (LTIFR)	Lost time injury frequency rate (LTIFR) measures the result of this macro process (Generated docs); it is the KPI its owner reviews at each Monthly review.	1.2	<= 1.5
2	H-KPI-02 — Near-miss reports per 100 employees	Near-miss reports per 100 employees measures the result of this macro process (Generated docs); it is the KPI its owner reviews at each Monthly review.	12.3	>= 12

DMS027 (MP-088) — AI Explainability and Confidence Scoring

Log AI recommendations with confidence; provide explainability; human-in-the-loop. Owner: Transformation Manager. Tier 4.

Step	Step, task and purpose	Role · form	What to type
MP-088.1	Define requirements per agent Task: Plan and prepare AI explanations Define requirements per agent — step 1 of 8 in DMS027 AI Explainability and Confidence Scoring.	Transformation Manager Register items	Items identified: 3 rows — see the table below
MP-088.2	Log agent answers with confidence score Task: Plan and prepare AI explanations Log agent answers with confidence score — step 2 of 8 in DMS027 AI Explainability and Confidence Scoring.	DynamicMS Engine Automated service task	System result confirmed: Log agent answers with confidence score; done by the DynamicMS Engine; AI recommendation logs available in the project. Records produced: —
MP-088.3	Attach source refs Task: Plan and prepare AI explanations Attach source refs — step 3 of 8 in DMS027 AI Explainability and Confidence Scoring.	Transformation Manager Execution	What was done: Attach source refs carried out on service delivery; AI recommendation logs updated. Records that prove it: — Completion (%): 100
MP-088.4	Enable human review Task: Execute AI explanations activities Enable human review — step 4 of 8 in DMS027 AI Explainability and Confidence Scoring.	Transformation Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes

Transformation Manager Execution	What was done: Attend SME community events carried out on service delivery; Community profile updated. Records that prove it: — Completion (%): 100
MP-161.8	Collaborate on SME community Task: Verify, record and close SME community Collaborate on SME community — step 8 of 10 in DMS100 SME Collaborative Community.	Transformation Manager Execution	What was done: Collaborate on SME community carried out on service delivery; Community profile updated. Records that prove it: — Completion (%): 100
MP-161.9	Rate SME community contributions Task: Verify, record and close SME community Rate SME community contributions — step 9 of 10 in DMS100 SME Collaborative Community.	Transformation Manager Execution	What was done: Rate SME community contributions carried out on service delivery; Community profile updated. Records that prove it: — Completion (%): 100
MP-161.10	Report SME community value Task: Verify, record and close SME community Report SME community value — step 10 of 10 in DMS100 SME Collaborative Community.	Transformation Manager Communication	Communication records: 2 rows — see the table below

MP-161.5 — Share SME community · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	SME owner	E-mail	2026-12-09	Community profile: what changes for you and what to do by 2026-12-23.	Transformation Manager
2	SME employees	Intranet	2026-12-11	Discussion records: what changes for you and what to do by 2026-12-23.	Transformation Manager

MP-161.10 — Report SME community value · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	SME owner	Intranet	2026-09-16	Community profile: what changes for you and what to do by 2026-09-30.	Transformation Manager

#	Audience	Channel	Date	Key message	Communicated by
2	SME employees	Notice board	2026-09-18	Discussion records: what changes for you and what to do by 2026-09-30.	Transformation Manager

This phase has no gate for the project track; it closes when its last step is completed.

Records created along the run

Besides the workflow steps, the run creates records in the Records and Governance menus. The examples below are the ones seeded in the demonstration; type the same values to reproduce them.

Report a problem (nonconformity)

102. Open Records › Nonconformities and select Report a problem.
103. Title: type “job sheet not signed”.
104. Description: type “Detected on 2025-12-25 at service delivery. Immediate containment applied and affected items segregated.”.
105. Source: choose Process. Criticality: choose Minor.
106. Select Submit. A Critical problem raises an alert to the Quality Manager and top management.
107. Open the nonconformity and select Move to Analysis, then type the root cause (“Preventive maintenance interval too long”).
108. Select Add action: type the title, choose an owner and a different evaluator, and a due date.
109. When all actions are closed, move to Verification then Closed; type the lessons learned (what went well, what did not, recommendation).

Record a risk

110. Open Governance › Risks and opportunities and select Add.
111. Title: “Operational (process failure, supply chain)”; kind Risk; likelihood 5; impact 5.
112. Treatment: “Reduce”, then select Save. The heatmap updates immediately.

Code	Kind	Title	L × I
UNI-R02	Risk	Operational (process failure, supply chain)	5 × 5 = 25
RSK-19	Risk	Business interruption	5 × 4 = 20
Q-R02	Risk	quote error	4 × 4 = 16
E-02	Aspect	used parts waste	4 × 4 = 16
RSK-01	Risk	Use of an obsolete document version	5 × 3 = 15

Record a KPI measurement

113. Open Governance › KPIs and select KPI-01 — Policy review on time rate.
114. In Record a measurement, type the period (for example 2026-09) and the value (for example 99.2); target 100%.
115. Select Record. A value off target raises a KPI alert to the Performance Manager and the IMS Manager.

Audit programme

Code	Audit	Standard	Planned	Status
AUD-AT-UNI-QHSE-01	Internal audit — People To Capability	ISO 9001	2026-03-31	Completed
AUD-AT-UNI-QHSE-02	Internal audit — Requirements To Delivery	ISO 9001	2026-05-30	Completed
AUD-AT-UNI-QHSE-03	Internal audit — Risk To Resilience	ISO 14001	2026-06-19	Completed
AUD-AT-UNI-QHSE-04	Supplier audit — Requirements To Delivery	ISO 9001	2026-06-29	Completed
AUD-AT-UNI-QHSE-05	Mock certification audit — Compliance To Achievement	ISO 9001, ISO 14001, ISO 45001	2026-08-08	Completed
AUD-AT-UNI-QHSE-06	Internal audit — Verification To Preparedness	ISO 45001	2026-09-27	Completed
AUD-AT-UNI-QHSE-07	Certification audit (stage 2) — Compliance To Achievement	ISO 9001, ISO 14001, ISO 45001	2026-10-17	Planned
AUD-AT-UNI-QHSE-08	Surveillance audit — Monitoring To Evaluation	ISO 9001, ISO 14001, ISO 45001	2026-11-27	Planned

To add a finding: open the audit, select Add finding, choose the type (Major, Minor, Observation, OFI), type the clause and the finding; for Major and Minor choose the action owner and a different evaluator.

Documented information generated from the templates

Every document below is generated from an IMS template and filled with the data of this run (issues, interested parties, objectives, RACSI, KPIs, risks, audits, nonconformities...). Open Records > Documents and select Download to get it in PDF, Word or Excel.

Code	Title	Template	Version	Status
AT-UNI-QHSE-ASPECTS	Environmental aspects and impacts register	TPL-ASPECTS	1.0	Published

To revise a document: open it, select New version, choose Minor or Major, type the summary of change and choose whether to regenerate the content from the current project data; then Submit for review. Another user approves and publishes it; the author cannot approve their own version.

Export the management review report

116. Open Insight › Reports.
117. Choose the format (PDF, Excel, Word or CSV) and the language.

118. Select Download on Management review input. The report compiles objectives, KPIs, audit results, nonconformities and phase status.

The screenshot shows the 'Nonconformities' section of the DynamicMS application. The left sidebar contains a navigation menu with categories: FAVORITES, WORK, GOVERNANCE, and RECORDS. The 'RECORDS' section is expanded, showing 'Nonconformities' as the selected item. The main content area is titled 'Nonconformities' and includes a sub-header: 'Problems move through five stages: open, analysis, action, verification and closure with lessons learned.' Below this, there are tabs for 'Open - 2', 'Closed - 4', and 'All'. A table lists the nonconformities with columns: Code, Title, Source, Criticality, Stage, Detected, Owner, and Actions.

Code	Title	Source	Criticality	Stage	Detected	Owner	Actions
NC-AT-UNI-QHSE-006	Late delivery of spare parts batch	Supplier	Minor	Action	24 Aug 2026	Claire Martin	2
NC-AT-UNI-QHSE-005	Obsolete work instruction found at technical services	Audit	Minor	Verification	7 Jul 2026	Julien Moreau	2

Figure — Nonconformity register of the project.

The screenshot shows the 'Documents' section of the DynamicMS application. The left sidebar is identical to the previous screenshot. The main content area is titled 'Documents' and includes a sub-header: 'Documented information of the project: generated from templates with the project data, versioned (draft, review, published) and downloadable in Word, PDF and Excel. The author never approves their own version.' Below this, there are tabs for 'Documents', 'Required by the standards', 'Templates', and 'Layout'. A search bar and a dropdown for 'All types' are present. A table lists the documents with columns: Code, Title, Type, Template, Version, Status, Next review, and Download.

Code	Title	Type	Template	Version	Status	Next review	Download
AT-UNI-QHSE-WI	Work instruction	Work instruction	TPL-WI	1.0	Published	3 May 2027	DOCX, PDF
AT-UNI-QHSE-MAN	Management system manual	Manual	TPL-MAN	1.1	Published	11 Jun 2027	DOCX, PDF
AT-UNI-QHSE-PMAP	Process map and interactions	Process map	TPL-PMAP	1.0	Published	25 Dec 2026	DOCX, PDF
AT-UNI-QHSE-RACSI	RACSI matrix	Matrix	TPL-RACSI	1.0	Published	25 Dec 2026	XLSX, PDF
AT-UNI-QHSE-AUDPRG	Internal audit programme	Plan	TPL-AUDPRG	1.0	Published	12 Sept 2027	XLSX, PDF
AT-UNI-QHSE-COMM	Communication plan and records	Plan	TPL-COMM	1.0	Published	19 Feb 2027	XLSX

POWERACT Consulting · Page 311 of 468

Scenario 3 — SME QMS for AEC & Construction (ISO 9001, ISO 19650, EN 1090)

Organization: Nova Build & Construct (NV-AEC), SME company, vertical AEC, 69 employees, member of Nova SME Alliance.

Project: NV-AEC-QMS — QMS full run 2025–2026 — Nova Build & Construct. Management system QMS, mode SME, track TRK-STANDARD. Standards: ISO 9001, ISO 19650, EN 1090, CE Marking (CPR). Start 2025-11-15, end 2026-12-15.

Configuration: Solution Pack DMS-SME, capability packs DMS-CERT, DMS-AI, add-ons ADD-04.

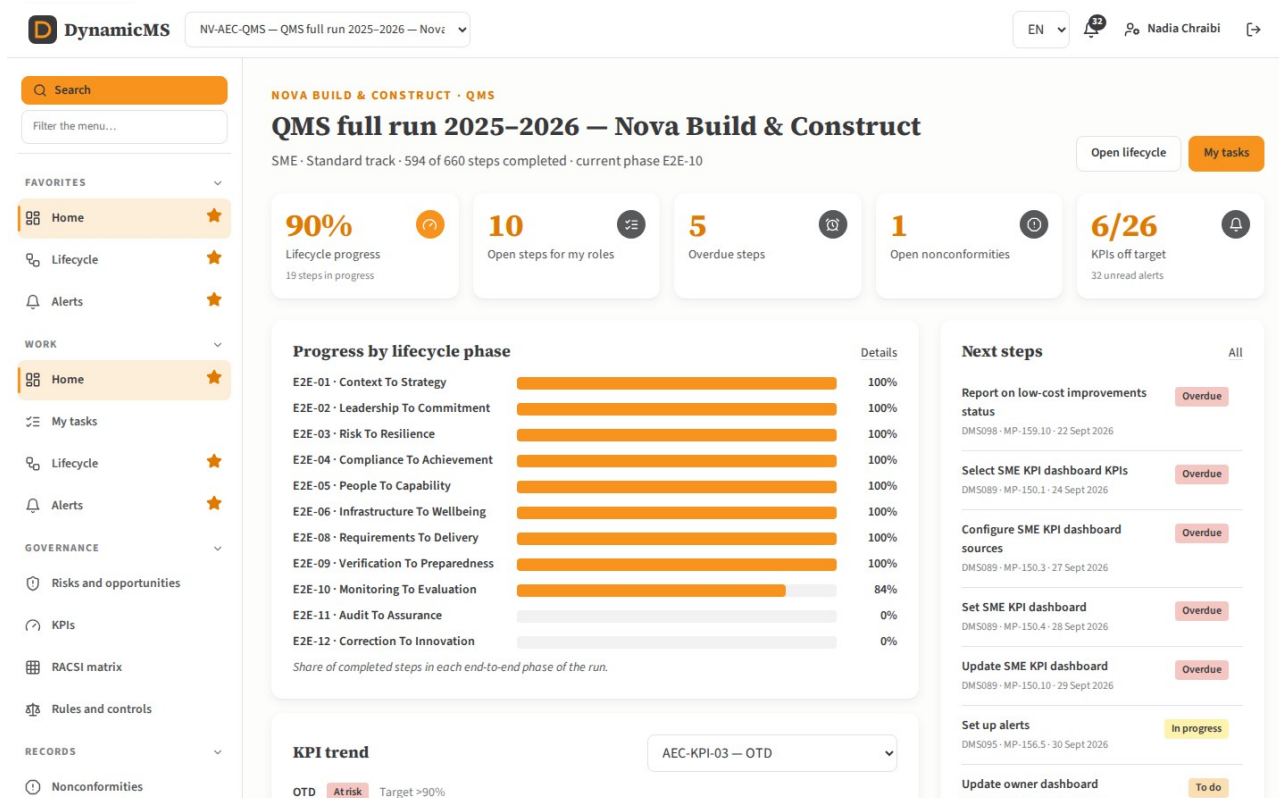

Figure — Home dashboard of NV-AEC-QMS: progress by phase, KPI trend and next steps.

Before you start

Accounts of the organization

All accounts use the password Demo@2026. Sign in with the account whose role owns the step you want to complete; the IMS Manager and process owners can complete any step.

Role	Name	E-mail to type
Tenant Administrator	Maya Laurent	admin@nova-aec.example
AI Governance Officer	Claire Martin	aigov@nova-aec.example
Internal Audit Manager	Sofia Bennani	audit@nova-aec.example
Auditor (read-only)	Omar Haddad	auditor@nova-aec.example
Top Management	Samira Benali	ceo@nova-aec.example
Compliance Officer	Rachid Alaoui	compliance@nova-aec.example

Role	Name	E-mail to type
Document Controller	Ines Garcia	documents@nova-aec.example
Employee	Youssef El Idrissi	employee@nova-aec.example
ESG Manager	Adam Rahmani	esg@nova-aec.example
HR Manager	Mehdi Fassi	hr@nova-aec.example
HSE Manager	Hugo Lefevre	hse@nova-aec.example
IMS Manager	Karim Tazi	ims@nova-aec.example
IT Manager	Tariq Saleh	it@nova-aec.example
Operations Manager	Julien Moreau	operations@nova-aec.example
Performance Manager	Salma Kettani	performance@nova-aec.example
Process Excellence Manager	Nabil Zerouali	process@nova-aec.example
Quality Manager	Nadia Chraibi	quality@nova-aec.example
Risk Manager	Amina Ouazzani	risk@nova-aec.example
Transformation Manager	Hind Berrada	transformation@nova-aec.example

Create the project

119. Sign in as the IMS Manager and open Organization › New project.
120. Select With AI.
121. Short description: type “QMS certification for Nova Build & Construct before the customer audit, with a small team.”
122. Select Draft the project, keep the suggested items ticked, select Apply accepted items.
123. Name: type “QMS full run 2025–2026 — Nova Build & Construct”; check the track (TRK-STANDARD) and the complexity levels below, then select Create project.

Criterion	Weight	Level to choose
CX-01	20	1
CX-02	10	3
CX-03	20	2
CX-04	15	2
CX-05	15	3
CX-06	10	3
CX-07	10	1

Resulting complexity score: 26 / 100; recommended track TRK-LIGHT, chosen TRK-STANDARD.

Note. The demonstration database already contains this project with its full run. To practise, create a copy with another name, or open the seeded project and follow the steps that are still open.

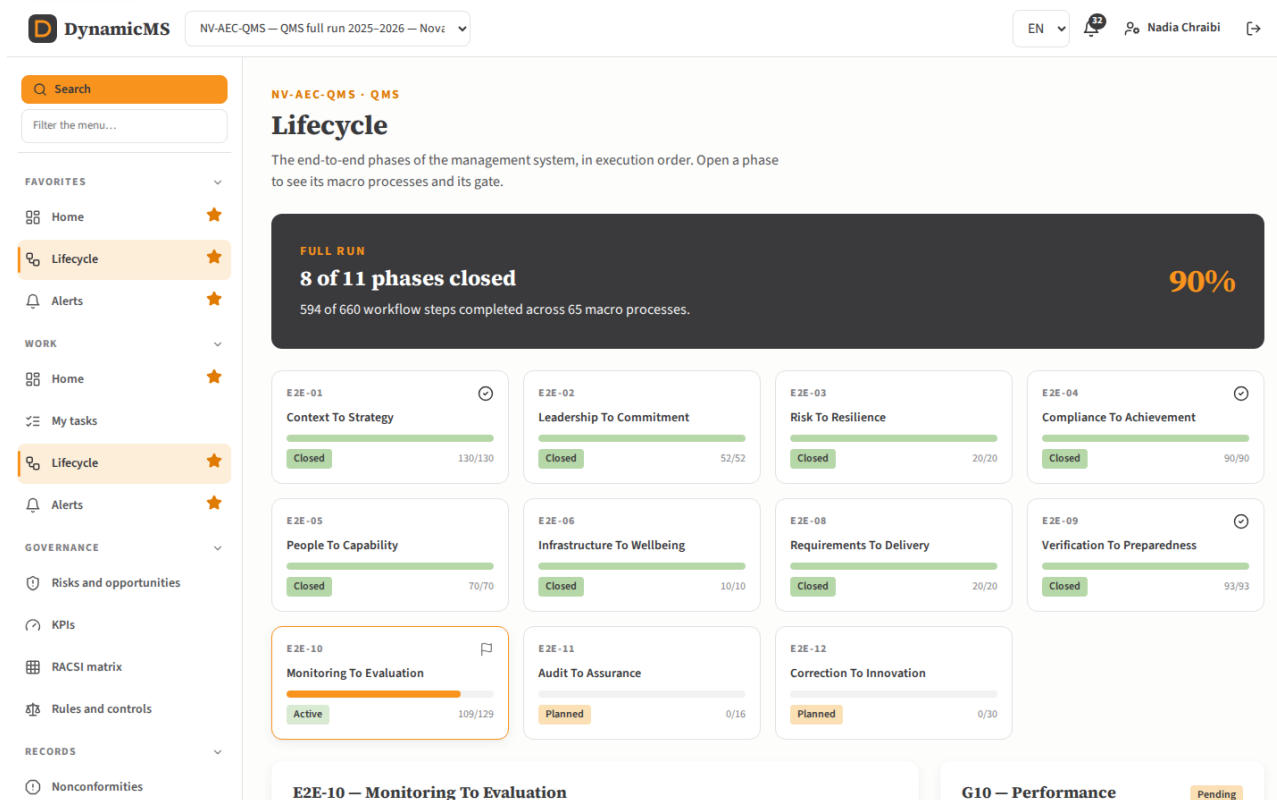

Figure — Lifecycle screen: phase cards with progress and gate status.

Run the lifecycle, phase by phase

The run has 11 phases, 65 macro processes and 660 steps. For each step the tables give the step identifier, the responsible role, the form and what to type in each field. Values between quotes are typed as shown; choose list values as written.

E2E-01 — Context To Strategy

Goals: Define context, policy, strategy, objectives, compliance, governance

From trigger to terminal event: Strategic planning cycle, management review output, or significant context change → Approved policy, strategy, objectives, risk register, compliance framework in place

UMS016 (MP-001) — Context Analysis and Stakeholder Mapping

Understand internal/external issues; identify interested parties; define IMS scope. Owner: IMS Manager. Tier 1. Requirements answered: ISO 9001 §4.1, §4.2, §4.3.

Documents of this macro process: NV-AEC-QMS-CTX (Context and interested parties analysis); NV-AEC-QMS-PSHEET-UMS016 (Macro process sheet — Context Analysis and Stakeholder Mapping); NV-AEC-QMS-REG-IP (Interested parties register); NV-AEC-QMS-REQ (Customer requirements review record); NV-AEC-QMS-SCOPE (Scope of the management system).

Step	Step, task and purpose	Role · form	What to type
MP-001.1	Fix periodicity of strategic diagnosis Task: Plan and prepare organizational context Fix periodicity of strategic diagnosis — step 1 of 10 in UMS016 Context Analysis and Stakeholder Mapping.	IMS Manager Periodicity	Frequency: Annual Next due date: 2026-11-18 Review chaired by: IMS Manager Organization units in scope: Headquarters, Rabat site Review inputs and notes: Inputs to the next diagnosis: last management review outputs, customer complaints of the year,

Step	Step, task and purpose	Role · form	What to type
			regulatory watch bulletins, supplier evaluation results and the strategic plan. An extraordinary review is triggered by a new site, a new service line or a major regulatory change.
MP-001.2	Identify external issues Task: Plan and prepare organizational context Identify external issues — step 2 of 10 in UMS016 Context Analysis and Stakeholder Mapping.	IMS Manager Register items	Items identified: 5 rows — see the table below
MP-001.3	Identify internal issues Task: Plan and prepare organizational context Identify internal issues — step 3 of 10 in UMS016 Context Analysis and Stakeholder Mapping.	IMS Manager Register items	Items identified: 4 rows — see the table below
MP-001.4	Identify interested parties Task: Plan and prepare organizational context Identify interested parties — step 4 of 10 in UMS016 Context Analysis and Stakeholder Mapping.	IMS Manager Register items	Items identified: 6 rows — see the table below
MP-001.5	Determine needs and expectations of interested parties Task: Execute organizational context activities Determine needs and expectations of interested parties — step 5 of 10 in UMS016 Context Analysis and Stakeholder Mapping.	IMS Manager Assessment	Decision matrix: 5 rows — see the table below Weighted score (1–5): 3.5 Conclusion: Needs and expectations of the six relevant interested parties are known (weighted score 3.5 = "Defined"). Two actions: confirm vehicle and waste requirements in the legal register; add the signed job sheet as a release criterion.
MP-001.6	Validate and cascade stakeholder requirements Task: Execute organizational context activities Validate and cascade stakeholder requirements — step 6 of 10 in UMS016 Context Analysis and Stakeholder Mapping.	IMS Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Top Management Decision comment and conditions: Go: context and requirements approved. Condition: purchasing receives the requirements matrix before the next steering meeting.
MP-001.7	Identify interactions between processes Task: Execute organizational context activities Identify interactions between processes — step 7 of 10 in UMS016 Context Analysis and Stakeholder Mapping.	IMS Manager Register items	Items identified: 5 rows — see the table below
MP-001.8	Define or review the management system scope Task: Verify, record and close organizational context Define or review the management system scope — step 8 of 10 in UMS016 Context Analysis and Stakeholder Mapping.	IMS Manager Register items	Items identified: 4 rows — see the table below
MP-001.9	Document and communicate the context analysis Task: Verify, record and close organizational context Document and communicate the context analysis — step 9 of 10 in UMS016 Context Analysis and Stakeholder Mapping.	IMS Manager Document	Document template: TPL-SCOPE — Scope of the management system Document reference: NV-AEC-QMS-UMS016-09 Version: 1.1 Content summary: Context analysis report for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-SCOPE — Scope of the management system
MP-001.10	Review organizational context periodically	IMS Manager Review	Review frequency: Annual Review date: 2025-11-20

Step	Step, task and purpose	Role · form	What to type
	Task: Verify, record and close organizational context Review organizational context periodically — step 10 of 10 in UMS016 Context Analysis and Stakeholder Mapping.		Next review: 2026-11-20 Chaired by: IMS Manager Participants: Top Management, Quality Manager, Operations Manager, Risk Manager Inputs reviewed: 3 rows — see the table below Decisions and actions: 2 rows — see the table below On completion: rows become actions.

MP-001.2 — Identify external issues · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Price competition from informal steel-frame buildings providers	Economic	Pressure on quote margins; risk of losing price-sensitive public and private project owners.	High	Sales team market study, Q3 2025
2	Customers require ISO 9001 certification in tenders	Market and customers	Certification is needed to keep and win contracts with public and private project owners.	High	Tender files received in 2025 (4 of 11 require ISO 9001)
3	ISO 9001 amendment on climate change (Amd 1:2024)	Legal and regulatory	Context analysis must state whether climate change is a relevant issue.	Medium	ISO 9001:2015/Amd 1:2024; regulatory watch bulletin
4	Availability and price of structural steel sections	Supply	Delays when parts are missing; lead times doubled for imported references.	Medium	Supplier evaluation file and purchase orders 2025
5	Customers send requests through portals and messaging	Technological	Requests can be lost if they are not logged in one place.	Medium	Customer request log, sample of 60 requests

MP-001.3 — Identify internal issues · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Weld not conforming to EN 1090	Process	No proof of service accepted; invoices disputed and paid late.	High	Review of records Jan–Oct 2025: 14% not compliant
2	BIM model clash not resolved	Commercial	Rework of quotes and margin loss; two customer complaints.	High	Quotation register: 9 corrections in Q3 2025
3	Workload peaks on site execution and prefabrication yard	Resources	Concrete cover below spec during summer peaks; overtime above 12%.	Medium	Planning board and overtime records
4	Know-how held by two senior staff	Competence	Dependency on two people; no written work instructions.	Medium	Competence matrix 2025

MP-001.4 — Identify interested parties · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Customers (public and private project owners)	External party	On-time service, correct quotes, signed proof of service, clear invoices.	High	Customer satisfaction survey 2025 (n = 48)
2	Employees and their representatives	Internal party	Safe work, training, clear instructions, workload planning.	High	Staff meeting minutes, October 2025
3	Owner and shareholders	Internal party	Profitable growth, certification obtained within 12 months.	High	Business plan 2025–2027
4	Suppliers of structural steel sections	External party	Forecast of needs, clear specifications, payment on time.	Medium	Supplier meetings, 2025
5	Certification body	External party	Conforming management system, access to records and people.	Medium	Certification contract
6	Authorities (labour inspection, municipality)	External party	Compliance with labour law, business licence and waste rules.	Medium	Legal register

MP-001.5 — Determine needs and expectations of interested parties · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Customer requirements identified and written down	30	4	Requirements of the 12 main customers are in the requirements matrix; 2 framework contracts still to review.
2	Legal and regulatory requirements identified	20	3	Labour and licence requirements listed; vehicle and waste rules to confirm with the legal register (MP-028).
3	Requirements adopted as compliance obligations	20	3	Adopted for customers and authorities; supplier expectations kept as information.
4	Needs monitored (survey, meetings, complaints)	15	4	Annual survey and monthly complaint review in place.
5	Requirements reflected in processes and objectives	15	3	On-time service and quote accuracy objectives defined; proof of service to add to the delivery process.

MP-001.6 — Validate and cascade stakeholder requirements · Decision criteria checked

#	Criterion	Met	Evidence
1	Issues reviewed with top management	Yes	Meeting of 2025-11-16
2	Interested parties and requirements validated	Yes	Interested parties register v1.0
3	Requirements cascaded to process owners	Partly	Sent to operations and sales; purchasing on the next meeting

MP-001.7 — Identify interactions between processes · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Sales and quotation → Service delivery	Interface	Validated quote and job order with customer requirements.	High	Job order form
2	Service delivery → Invoicing	Interface	Signed proof of service; the missing signature causes "weld not conforming to EN 1090".	High	Job sheet
3	Purchasing → Service delivery	Interface	Availability of structural steel sections on the planned date.	Medium	Purchase orders and stock list
4	Human resources → All processes	Interface	Competent and authorized staff; training plan.	Medium	Competence matrix
5	Management → All processes	Interface	Policy, objectives, resources and review decisions.	Medium	Management review minutes

MP-001.8 — Define or review the management system scope · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Design and delivery of steel-frame buildings for public and private project owners in the Rabat region	Scope statement	Covers sales and quotation, planning, delivery, invoicing and after-sales.	High	Strategic plan and service catalogue
2	Head office and workshop, Rabat	Site	Single site; interventions at customer premises are included.	High	Business licence
3	ISO 9001 §8.3 Design and development	Non-applicable requirement	Not applicable: services follow customer or manufacturer specifications; no design responsibility.	Medium	Contracts review
4	Vehicle maintenance	Outsourced process	Outsourced to an approved garage; controlled through the supplier evaluation.	Low	Service contract

MP-001.10 — Review organizational context periodically · Inputs reviewed

#	Input	Finding
1	External and internal issues	New competitor offer at lower price; issues list still valid.
2	Interested parties register	Add the new logistics partner.
3	Customer satisfaction and complaints	Satisfaction 82% (target 85%); complaints on quotes down by 40%.

MP-001.10 — Review organizational context periodically · Decisions and actions

#	Decision	Owner	Due date
1	Add supplier price risk to the risk register	Amina Ouazzani	2025-12-20
2	Update the scope statement for the new maintenance contracts	Karim Tazi	2026-01-04

Identify external issues

Plan and prepare organizational context

Done Register items IMS Manager · Karim Tazi · Due 16 Nov 2025

What to record

Identify external issues — step 2 of 10 in UMS016 Context Analysis and Stakeholder Mapping.

▼ Show the detailed description

The gate of this phase is passed; the step is locked.

Completed by Karim Tazi on 15 Nov 2025.

Items identified *

#	Item *	Category	Description and impact	Relevance	Source / evidence
1	Price competition from informal steel-frame buildings providers	Economic	Pressure on quote margins; risk of losing price-sensitive public and private project owners.	High	Sales team market study, Q3 2025
2	Customers require ISO 9001 certification in tenders	Market and customers	Certification is needed to keep and win contracts with public and private project owners.	High	Tender files received in 2025 (4 of 11 require ISO 9001)
3	ISO 9001 amendment on climate change	Legal and regulatory	Context analysis must state whether climate change is a relevant issue.	Medium	ISO 9001:2015/Amd 1:2024; regulatory watch bulletin

UMS022 (MP-002) — Quality Policy and Strategic Direction Definition

Establish quality policy; define strategic direction; secure top mgmt commitment. Owner: IMS Manager. Tier 1. Requirements answered: ISO 9001 §5.1, §5.2.

Documents of this macro process: NV-AEC-QMS-POL-Q (Quality policy); NV-AEC-QMS-PSHEET-UMS022 (Macro process sheet — Quality Policy and Strategic Direction Definition).

Step	Step, task and purpose	Role · form	What to type
MP-002.10	Select the standards and scope type of the quality policy Task: Plan and prepare quality policy Select the standards and scope type of the quality policy — step 1 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Standards and scope	Standards the management system applies: ISO 9001, ISO 19650, EN 1090, CE Marking (CPR) Scope type: Single-standard Organization units covered: Headquarters, Rabat site Why these standards: ISO 9001 only: certification is a customer requirement; environment and safety are managed through legal compliance for now.

Step	Step, task and purpose	Role · form	What to type
MP-002.1	Fix quality policy review periodicity Task: Plan and prepare quality policy Fix quality policy review periodicity — step 2 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Periodicity	Frequency: Annual Next due date: 2026-11-22 Review chaired by: Top Management Organization units in scope: Headquarters, Rabat site Review inputs and notes: Reviewed at each management review, and earlier after a change of strategy, a merger, a new site or a major customer requirement.
MP-002.3	Consult top management on the quality policy Task: Plan and prepare quality policy Consult top management on the quality policy — step 3 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Register items	Items identified: 4 rows — see the table below
MP-002.11	Generate the quality policy draft from the template Task: Execute quality policy activities Generate the quality policy draft from the template — step 4 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager AI-assisted draft	Context given to the assistant: Standards: ISO 9001, ISO 19650, EN 1090, CE Marking (CPR). Scope: steel-frame buildings for public and private project owners in Rabat. Commitments from the management consultation: on-time and right-first-time service, legal compliance, staff competence, continual improvement. Strategic direction: reference provider in the region by 2027. Suggestion outcome: Edited Final validated text: Nova Build & Construct provides steel-frame buildings to public and private project owners in the Rabat region. We commit to: deliver on time and right first time; satisfy our customers and the applicable legal and contractual requirements; develop the competence of our staff; set measurable quality objectives every year and continually improve our quality management system (ISO 9001, ISO 19650, EN 1090, CE Marking (CPR)).
MP-002.2	Adapt the quality policy commitments to the organization Task: Execute quality policy activities Adapt the quality policy commitments to the organization — step 5 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Document	Document template: TPL-POL-Q — Quality policy Document reference: NV-AEC-QMS-POL Version: 0.2 Content summary: Commitments adapted: "right first time" wording, signed proof of service, reference to the 2027 strategic direction. Generated document: NV-AEC-QMS-POL-Q — Quality policy
MP-002.4	Integrate mandatory commitments into the quality policy Task: Execute quality policy activities Integrate mandatory commitments into the quality policy — step 6 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Register items	Items identified: 4 rows — see the table below
MP-002.5	Align the quality policy with ISO requirements and strategy Task: Execute quality policy activities Align the quality policy with ISO requirements and strategy — step 7 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Execution	What was done: Policy cross-checked with the strategic plan 2025–2027 and the requirements matrix: two wording changes (customer proof of service, 2027 direction). No conflict with customer contracts. Records that prove it: NV-AEC-QMS-POL-Q — Quality policy Completion (%): 100
MP-002.12	Check the quality policy draft against ISO 9001 §5.2 Task: Verify, record and close quality policy Check the quality policy draft against ISO 9001 §5.2 — step 8 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Assessment	Decision matrix: 5 rows — see the table below Weighted score (1–5): 4.4 Conclusion: Draft meets ISO 9001 §5.2.1 (weighted score 4.4). §5.2.2 will be met once the communication step is done. Ready for top management approval.
MP-002.6	Obtain top management approval of the quality policy Task: Verify, record and close quality policy Obtain top management approval of	IMS Manager Decision	Decision criteria checked: 2 rows — see the table below Decision: Go Approver (Accountable): Top Management Decision comment and conditions: Approved and signed by the Managing Director. Publish version 1.0.

Step	Step, task and purpose	Role · form	What to type
	the quality policy — step 9 of 13 in UMS022 Quality Policy and Strategic Direction Definition.		
MP-002.13	Publish the quality policy and generate its files Task: Verify, record and close quality policy Publish the quality policy and generate its files — step 10 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	DynamicMS Engine Automated service task	System result confirmed: Quality policy v1.0 published; DOCX and PDF generated; notice-board version printed. Records produced: NV-AEC-QMS-POL-Q — Quality policy; NV-AEC-QMS-PSHEET-UMS022 — Macro process sheet — Quality Policy and Strategic Direction Definition
MP-002.7	Communicate the quality policy Task: Verify, record and close quality policy Communicate the quality policy — step 11 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Communication	Communication records: 3 rows — see the table below
MP-002.8	Plan the quality policy review Task: Verify, record and close quality policy Plan the quality policy review — step 12 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Review	Review frequency: Annual Review date: 2025-11-27 Next review: 2026-11-27 Chaired by: Top Management Participants: IMS Manager, Quality Manager, Operations Manager Inputs reviewed: 3 rows — see the table below Decisions and actions: 1 row — see the table below On completion: rows become actions.
MP-002.9	Update the quality policy document Task: Verify, record and close quality policy Update the quality policy document — step 13 of 13 in UMS022 Quality Policy and Strategic Direction Definition.	IMS Manager Change	Change made: Added a commitment on confidentiality of customer data (new maintenance contracts). Version 1.1 issued. Reason: Decision D-1 of the policy review Documents or records updated: NV-AEC-QMS-POL-Q — Quality policy; Add a confidentiality commitment for customer data

MP-002.3 — Consult top management on the quality policy · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Meet customer requirements on time, first time	Commitment	Priority of the Managing Director: on-time service and correct quotes.	High	Interview with the Managing Director, 2025-11-23
2	Comply with legal and contractual requirements	Commitment	Includes customer contracts and labour law.	High	Interview with the Managing Director
3	Develop staff competence	Commitment	Two senior technicians coach the new hires.	Medium	HR interview
4	Become the reference steel-frame buildings provider in the Rabat region by 2027	Strategic direction	Strategic direction for the objectives.	High	Strategic plan 2025–2027

MP-002.4 — Integrate mandatory commitments into the quality policy · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	§5.2.1 a) Appropriate to purpose and context	Commitment	First sentence describes steel-frame buildings, public and private project owners and the region.	High	Policy draft v0.2, paragraph 1
2	§5.2.1 b) Framework for quality objectives	Commitment	"Set measurable quality objectives every year".	High	Policy draft v0.2, commitment 4
3	§5.2.1 c) Commitment	Commitment	Customer, legal and contractual	High	Policy draft v0.2,

#	Item	Category	Description and impact	Relevance	Source / evidence
	to satisfy applicable requirements		requirements named.		commitment 2
4	§5.2.1 d) Commitment to continual improvement	Commitment	"Continually improve our quality management system".	High	Policy draft v0.2, commitment 4

MP-002.12 — Check the quality policy draft against ISO 9001 §5.2 · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	§5.2.1 a) Appropriate to the purpose and context	20	5	Services, customers and region described.
2	§5.2.1 b) Framework for setting objectives	20	4	Measurable objectives required every year; link to KPIs to show in MP-003.
3	§5.2.1 c) Commitment to satisfy applicable requirements	20	5	Explicit.
4	§5.2.1 d) Commitment to continual improvement	20	5	Explicit.
5	§5.2.2 Available, communicated, understood	20	3	Communication plan ready (step 11); understanding to check in the next internal audit.

MP-002.6 — Obtain top management approval of the quality policy · Decision criteria checked

#	Criterion	Met	Evidence
1	Compliance check against ISO 9001 §5.2 done	Yes	Decision matrix, step 8 (score 4.4)
2	Consistent with strategic direction	Yes	Strategic plan 2025–2027

MP-002.7 — Communicate the quality policy · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	Operations	Meeting	2025-11-26	Toolbox talk: what the policy means for each job (right first time, signed job sheet).	IMS Manager
2	All employees	Notice board	2025-11-27	Signed policy posted in the workshop and the office.	Document Controller
3	Customers and interested parties	Portal	2025-11-29	Policy published on the website.	IMS Manager

MP-002.8 — Plan the quality policy review · Inputs reviewed

#	Input	Finding
1	Changes in context and strategy	New maintenance contract segment.
2	Achievement of quality objectives	3 of 4 objectives on track.
3	Audit results and staff feedback	Policy known by 90% of interviewed staff.

MP-002.8 — Plan the quality policy review · Decisions and actions

#	Decision	Owner	Due date
1	Add a confidentiality commitment for customer data	Karim Tazi	2025-12-17

UMS031 (MP-003) — Quality Objectives and Targets Deployment

Cascade strategic objectives; deploy SMART objectives; assign responsibilities; monitor. Owner: IMS Manager. Tier 1. Requirements answered: ISO 9001 §6.2.

Documents of this macro process: NV-AEC-QMS-OBJ (Objectives and action plan); NV-AEC-QMS-PSHEET-UMS031 (Macro process sheet — Quality Objectives and Targets Deployment).

Step	Step, task and purpose	Role · form	What to type
MP-003.1	Cascade the quality policy into quality objectives Task: Plan and prepare quality objectives Cascade the quality policy into quality objectives — step 1 of 10 in UMS031 Quality Objectives and Targets Deployment.	IMS Manager SMART objectives	Objectives (become entries of the objectives register): 2 rows — see the table below On completion: rows become objectives.
MP-003.2	Define SMART quality objectives Task: Plan and prepare quality objectives Define SMART quality objectives — step 2 of 10 in UMS031 Quality Objectives and Targets Deployment.	IMS Manager SMART objectives	Objectives (become entries of the objectives register): 4 rows — see the table below On completion: rows become objectives.
MP-003.3	Align quality objectives with the quality policy Task: Plan and prepare quality objectives Align quality objectives with the quality policy — step 3 of 10 in UMS031 Quality Objectives and Targets Deployment.	IMS Manager Execution	What was done: Each objective linked to a policy commitment and to one KPI of the dashboard; no objective without an owner. Records that prove it: NV-AEC-QMS-OBJ — Objectives and action plan; OBJ-1 — Raise customer satisfaction on steel-frame buildings; OBJ-2 — Deliver steel-frame buildings on time Completion (%): 100
MP-003.4	Designate an owner for each quality objective Task: Plan and prepare quality objectives Designate an owner for each quality objective — step 4 of 10 in UMS031 Quality Objectives and Targets Deployment.	IMS Manager Plan	Planned activities (become actions): 4 rows — see the table below On completion: rows become actions.
MP-003.5	Deploy quality objectives in the objectives register Task: Execute quality objectives activities Deploy quality objectives in the objectives register — step 5 of 10 in UMS031 Quality Objectives and Targets Deployment.	DynamicMS Engine Automated service task	System result confirmed: Deploy quality objectives in the objectives register: done by the DynamicMS Engine; Objectives available in the project. Records produced: NV-AEC-QMS-OBJ — Objectives and action plan; NV-AEC-QMS-PSHEET-UMS031 — Macro process sheet — Quality Objectives and Targets Deployment; OBJ-1 — Raise customer satisfaction on steel-frame buildings; OBJ-2 — Deliver steel-frame buildings on time; OBJ-3 — Reduce the cost of poor quality; OBJ-4 — Close corrective actions on time; Build the action plan for: Raise customer satisfaction on steel-frame buildings
MP-003.6	Monitor progress of quality objectives Task: Execute quality objectives activities Monitor progress of quality objectives — step 6 of 10 in UMS031 Quality Objectives and Targets Deployment.	IMS Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-003.7	Display quality objectives at workstations Task: Execute quality objectives activities Display quality objectives at workstations — step 7 of 10 in UMS031 Quality Objectives and Targets Deployment.	IMS Manager Execution	What was done: Objectives board displayed in the workshop and the office; monthly results updated by the Performance Manager. Records that prove it: NV-AEC-QMS-OBJ — Objectives and action plan; OBJ-1 — Raise customer satisfaction on steel-frame buildings; OBJ-2 — Deliver steel-frame buildings on time; Build the action plan for: Raise customer satisfaction on steel-frame buildings Completion (%): 100
MP-003.8	Adjust quality objectives and targets	IMS Manager	Change made: Objectives updated: Structural failure.

Step	Step, task and purpose	Role · form	What to type
	Task: Verify, record and close quality objectives Adjust quality objectives and targets — step 8 of 10 in UMS031 Quality Objectives and Targets Deployment.	Change	Reason: Finding of the internal audit Documents or records updated: NV-AEC-QMS-OBJ — Objectives and action plan; OBJ-1 — Raise customer satisfaction on steel-frame buildings; OBJ-2 — Deliver steel-frame buildings on time; Build the action plan for: Raise customer satisfaction on steel-frame buildings
MP-003.9	Recognize teams that reach quality objectives Task: Verify, record and close quality objectives Recognize teams that reach quality objectives — step 9 of 10 in UMS031 Quality Objectives and Targets Deployment.	IMS Manager Execution	What was done: Recognize teams that reach quality objectives carried out on site execution and prefabrication yard; Objectives updated. Records that prove it: NV-AEC-QMS-OBJ — Objectives and action plan; OBJ-1 — Raise customer satisfaction on steel-frame buildings; OBJ-2 — Deliver steel-frame buildings on time; Build the action plan for: Raise customer satisfaction on steel-frame buildings Completion (%): 100
MP-003.10	Translate quality policy commitments into objective statements Task: Verify, record and close quality objectives Translate quality policy commitments into objective statements — step 10 of 10 in UMS031 Quality Objectives and Targets Deployment.	IMS Manager SMART objectives	Objectives (become entries of the objectives register): 2 rows — see the table below On completion: rows become objectives.

MP-003.1 — Cascade the quality policy into quality objectives · Objectives (become entries of the objectives register)

#	Specific objective	Measure (KPI)	Baseline	Achievable target	Relevant to (policy commitment)	Owner	Time-bound deadline	Resources
1	Raise customer satisfaction on steel-frame buildings	Q-KPI-01 — Customer satisfaction index	78%	>= 85%	Satisfy customer requirements	Nadia Chraibi	2026-11-10	Quarterly survey; complaint review meeting
2	Deliver steel-frame buildings on time	Q-KPI-02 — On-time delivery rate	86%	>= 95%	On time, right first time	Julien Moreau	2026-08-12	Planning board; one extra technician in summer

MP-003.2 — Define SMART quality objectives · Objectives (become entries of the objectives register)

#	Specific objective	Measure (KPI)	Baseline	Achievable target	Relevant to (policy commitment)	Owner	Time-bound deadline	Resources
1	Raise customer satisfaction on steel-frame buildings	Q-KPI-01 — Customer satisfaction index	78%	>= 85%	Satisfy customer requirements	Nadia Chraibi	2026-11-10	Quarterly survey; complaint review meeting
2	Deliver steel-frame buildings on time	Q-KPI-02 — On-time delivery rate	86%	>= 95%	On time, right first time	Julien Moreau	2026-08-12	Planning board; one extra technician in summer
3	Reduce the cost of poor quality	Q-KPI-04 — Cost of poor quality	4.1%	<= 2%	Continual improvement	Nadia Chraibi	2026-11-10	Rework tracking in the NC register
4	Close corrective actions on time	Q-KPI-05 — Corrective actions closed on time	70%	>= 90%	Continual improvement	Karim Tazi	2026-05-14	Weekly action review

MP-003.4 — Designate an owner for each quality objective · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Build the action plan for: Raise customer satisfaction on steel-frame buildings	Nadia Chraibi	2025-11-29	2025-12-20	Action plan approved
2	Build the action plan for: Deliver steel-frame buildings on time	Julien Moreau	2025-11-29	2025-12-27	Action plan approved
3	Build the action plan for: Reduce the cost of poor quality	Nadia Chraibi	2025-11-29	2026-01-03	Action plan approved
4	Build the action plan for: Close corrective actions on time	Karim Tazi	2025-11-29	2026-01-10	Action plan approved

MP-003.6 — Monitor progress of quality objectives · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Objectives); it is the KPI its owner reviews at each Monthly review.	87	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Objectives); it is the KPI its owner reviews at each Monthly review.	96.6	>= 95%

MP-003.10 — Translate quality policy commitments into objective statements · Objectives (become entries of the objectives register)

#	Specific objective	Measure (KPI)	Baseline	Achievable target	Relevant to (policy commitment)	Owner	Time-bound deadline	Resources
1	Reduce the cost of poor quality	Q-KPI-04 — Cost of poor quality	4.1%	<= 2%	Continual improvement	Nadia Chraibi	2026-11-10	Rework tracking in the NC register
2	Close corrective actions on time	Q-KPI-05 — Corrective actions closed on time	70%	>= 90%	Continual improvement	Karim Tazi	2026-05-14	Weekly action review

UMS002 (MP-004) — Process Architecture Mapping

Define architecture; identify core/support; map in BPMN; assign RACI. Owner: Process Excellence Manager.
Tier 1. Requirements answered: ISO 9001 §4.4.

Documents of this macro process: NV-AEC-QMS-PMAP (Process map and interactions); NV-AEC-QMS-PSHEET-UMS002 (Macro process sheet — Process Architecture Mapping); NV-AEC-QMS-RACSI (RACSI matrix).

Step	Step, task and purpose	Role · form	What to type
MP-004.1	Define the process architecture scope Task: Plan and prepare process architecture Define the process architecture scope — step 1 of 13 in UMS002 Process Architecture Mapping.	Process Excellence Manager Register items	Items identified: 2 rows — see the table below
MP-004.2	Identify core, support and management processes	Process Excellence Manager	Items identified: 6 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	Task: Plan and prepare process architecture Identify core, support and management processes — step 2 of 13 in UMS002 Process Architecture Mapping.	Register items	
MP-004.3	Map each process in BPMN Task: Plan and prepare process architecture Map each process in BPMN — step 3 of 13 in UMS002 Process Architecture Mapping.	Process Excellence Manager Register items	Items identified: 3 rows — see the table below
MP-004.4	Assign RACSI roles to each process Task: Execute process architecture activities Assign RACSI roles to each process — step 4 of 13 in UMS002 Process Architecture Mapping.	Process Excellence Manager Assignment	Role: Process Excellence Manager Person (from the OBS): Nabil Zerouali Organization units covered: Quality RACSI of the macro process: R: Process Excellence Manager · A: IMS Manager · C: Risk Manager · S: Document Controller · I: Top Management
MP-004.5	Validate the process map with process owners Task: Execute process architecture activities Validate the process map with process owners — step 5 of 13 in UMS002 Process Architecture Mapping.	Process Excellence Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Process Excellence Manager Decision comment and conditions: Process map validated; publish version 1.0.
MP-004.6	Verify process map alignment with ISO 9001 §4.4 Task: Execute process architecture activities Verify process map alignment with ISO 9001 §4.4 — step 6 of 13 in UMS002 Process Architecture Mapping.	Process Excellence Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.5 Conclusion: Process approach in place (weighted score 3.5). Complete KPIs and risk review for purchasing and HR before the mock audit.
MP-004.7	Publish the process map Task: Verify, record and close process architecture Publish the process map — step 7 of 13 in UMS002 Process Architecture Mapping.	Process Excellence Manager Document	Document template: TPL-PMAP — Process map and interactions Document reference: NV-AEC-QMS-UMS002-07 Version: 2.0 Content summary: Architecture map for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-PMAP — Process map and interactions
MP-004.8	Review the process map Task: Verify, record and close process architecture Review the process map — step 8 of 13 in UMS002 Process Architecture Mapping. Records that prove it: NV-AEC-QMS-PMAP — Process map and interactions; Update BPMN diagrams Completion (%): 100

MP-004.1 — Define the process architecture scope · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	All activities of Nova Build & Construct in the Rabat region	Scope statement	Same boundary as the management system scope (MP-001 step 8).	High	Scope statement v1.0
2	Three levels: macro process > task > step	Modeling rule	Steps are the lowest level and carry the forms and records.	Medium	Process level definitions

MP-004.2 — Identify core, support and management processes · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Strategy and management review	Management process	Owner: Managing Director	High	Organization chart
2	Sales and quotation	Core process	Owner: Operations Manager	High	Organization chart
3	Delivery of steel-frame buildings	Core process	Owner: Operations Manager	High	Job orders
4	Purchasing and suppliers	Support process	Owner: Quality Manager	Medium	Purchase procedure
5	People and competence	Support process	Owner: HR Manager	Medium	Competence matrix
6	Measurement, audit and improvement	Management process	Owner: Quality Manager	Medium	Audit programme

MP-004.3 — Map each process in BPMN · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Delivery of steel-frame buildings: request → planning → intervention → signed job sheet → invoice	BPMN diagram	Two lanes (Operations, Customer); gateway "job sheet signed?" before invoicing.	High	Process workshop with the technicians
2	Sales and quotation: request → site visit →	BPMN diagram	Second check added to prevent quote errors.	High	Quotation register

#	Item	Category	Description and impact	Relevance	Source / evidence
	quote → second check → customer approval				
3	Purchasing: need → order → reception check → stock	BPMN diagram	Reception check against the order.	Medium	Purchase orders

MP-004.5 — Validate the process map with process owners · Decision criteria checked

#	Criterion	Met	Evidence
1	Every process has an owner	Yes	RACSI matrix
2	Inputs, outputs and interactions shown	Yes	Process map v0.9
3	Owners agree with their process description	Yes	Validation meeting minutes

MP-004.6 — Verify process map alignment with ISO 9001 §4.4 · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	§4.4.1 a–b) Inputs, outputs, sequence and interaction determined	25	4	All core processes modeled in BPMN.
2	§4.4.1 c) Criteria, methods and KPIs	25	3	KPIs defined for core processes; support processes to complete.
3	§4.4.1 d–e) Resources, responsibilities and authorities	25	4	RACSI for every macro process.
4	§4.4.1 f) Risks and opportunities addressed	25	3	Linked to the risk register; 2 processes without risk review.

MP-004.8 — Review the process map · Inputs reviewed

#	Input	Finding
1	Scope	Scope still valid; minor updates made.
2	Strategy	No major change since the last review.
3	Process inventory	Gap found on BPMN diagrams.

#	Decision	Owner	Due date
1	Update BPMN diagrams	Nabil Zerouali	2026-01-06

UMS023 (MP-005) — SIPOC and Value Stream Mapping

Define SIPOC; map value stream; identify value-added steps; optimize flow. Owner: Process Excellence Manager. Tier 1. Requirements answered: ISO 9001 §4.4, §8.1.

Documents of this macro process: NV-AEC-QMS-PSHEET-UMS023 (Macro process sheet — SIPOC and Value Stream Mapping).

Step	Step, task and purpose	Role · form	What to type
MP-005.1	Define SIPOC and value stream scope Task: Plan and prepare SIPOC and value stream Define SIPOC and value stream scope	Process Excellence Manager Register items	Items identified: 3 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	— step 1 of 14 in UMS023 SIPOC and Value Stream Mapping.		
MP-005.2	Define SIPOC method Task: Plan and prepare SIPOC and value stream Define SIPOC method — step 2 of 14 in UMS023 SIPOC and Value Stream Mapping.	Process Excellence Manager Register items	Items identified: 3 rows — see the table below
MP-005.3	Define SIPOC and value stream suppliers Task: Plan and prepare SIPOC and value stream Define SIPOC and value stream suppliers — step 3 of 14 in UMS023 SIPOC and Value Stream Mapping.	Process Excellence Manager Register items	Items identified: 3 rows — see the table below
MP-005.4	Define SIPOC and value stream inputs Task: Plan and prepare SIPOC and value stream Define SIPOC and value stream inputs — step 4 of 14 in UMS023 SIPOC and Value Stream Mapping.	Process Excellence Manager Register items	Items identified: 3 rows — see the table below
MP-005.5	Define SIPOC and value stream steps Task: Execute SIPOC and value stream activities Define SIPOC and value stream steps — step 5 of 14 in UMS023 SIPOC and Value Stream Mapping.	Process Excellence Manager Register items	Items identified: 3 rows — see the table below
MP-005.6	Define SIPOC and value stream outputs Task: Execute SIPOC and value stream activities Define SIPOC and value stream outputs — step 6 of 14 in UMS023 SIPOC and Value Stream Mapping.	Process Excellence Manager Register items	Items identified: 3 rows — see the table below
MP-005.7	Define SIPOC and value stream customers Task: Execute SIPOC and value stream activities Define SIPOC and value stream customers — step 7 of 14 in UMS023 SIPOC and Value Stream Mapping.	Process Excellence Manager Register items	Items identified: 3 rows — see the table below
MP-005.8	Map SIPOC and value stream Task: Verify, record and close SIPOC and value stream Map SIPOC and value stream — step 8 of 14 in UMS023 SIPOC and Value Stream Mapping.	Process Excellence Manager Register items	Items identified: 3 rows — see the table below
MP-005.9	Validate SIPOC and value stream Task: Verify, record and close SIPOC and value stream Validate SIPOC and value stream — step 9 of 14 in UMS023 SIPOC and Value Stream Mapping.	Process Excellence Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Hold Approver (Accountable): Process Excellence Manager Decision comment and conditions: Hold until Value stream maps is complete; review in two weeks.
MP-005.10	Publish SIPOC and value stream Task: Verify, record and close SIPOC and value stream Publish SIPOC and value stream — step 10 of 14 in UMS023 SIPOC and Value Stream Mapping.	Process Excellence Manager Document	Document template: TPL-PROC — Procedure Document reference: NV-AEC-QMS-UMS023-10 Version: 1.0 Content summary: SIPOC diagrams for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-PSHEET-UMS023 — Macro process sheet — SIPOC and Value Stream Mapping
MP-005.11	Capture As-Is SIPOC where required Task: Manage As-Is and To-Be	Process Excellence Manager	Items identified: 3 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	SIPOC Capture As-Is SIPOC where required — step 11 of 14 in UMS023 SIPOC and Value Stream Mapping.	Register items	
MP-005.12	Design SIPOC and value stream To-Be SIPOC Task: Manage As-Is and To-Be SIPOC Design SIPOC and value stream To-Be SIPOC — step 12 of 14 in UMS023 SIPOC and Value Stream Mapping.	Process Excellence Manager AI-assisted draft	Context given to the assistant: Step: Design SIPOC and value stream To-Be SIPOC. Inputs: Process scope; Requirements; Customer needs. Standards: ISO 9001, ISO 19650, EN 1090. Organization: Nova Build & Construct (steel-frame buildings). Suggestion outcome: Edited Final validated text: SIPOC diagrams drafted with the assistant and reviewed by Process Excellence Manager: covers ISO 9001, ISO 19650.
MP-005.13	Compare As-Is and To-Be SIPOC Task: Manage As-Is and To-Be SIPOC Compare As-Is and To-Be SIPOC — step 13 of 14 in UMS023 SIPOC and Value Stream Mapping.	DynamicMS Engine Automated service task	System result confirmed: Compare As-Is and To-Be SIPOC: done by the DynamicMS Engine; SIPOC diagrams available in the project. Records produced: NV-AEC-QMS-PSHEET-UMS023 — Macro process sheet — SIPOC and Value Stream Mapping
MP-005.14	Approve and deploy To-Be version Task: Manage As-Is and To-Be SIPOC Approve and deploy To-Be version — step 14 of 14 in UMS023 SIPOC and Value Stream Mapping.	Process Excellence Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Process Excellence Manager Decision comment and conditions: SIPOC diagrams approved against ISO 9001; no blocking point.

MP-005.1 — Define SIPOC and value stream scope · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	SIPOC diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	High	Customer complaint log, Nov 2025
2	Value stream maps	Output	Affects Value stream maps; followed by Process Excellence Manager.	Medium	Internal audit report, Nov 2025
3	Flow diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	Medium	Process performance dashboard, Nov 2025

MP-005.2 — Define SIPOC method · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	SIPOC diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	High	Internal audit report, Nov 2025
2	Value stream maps	Output	Affects Value stream maps; followed by Process Excellence Manager.	Medium	Process performance dashboard, Nov 2025
3	Flow diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	Medium	Interview with the process owner, Oct 2025

MP-005.3 — Define SIPOC and value stream suppliers · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Structural steel sections supplier A (critical)	Supplier	Affects SIPOC diagrams; followed by Process Excellence Manager.	High	Process performance dashboard, Nov 2025
2	Structural steel sections supplier B	Supplier	Affects Value stream maps; followed by Process Excellence Manager.	Medium	Interview with the process owner, Nov 2025
3	Logistics provider	Supplier	Affects SIPOC diagrams; followed by Process Excellence Manager.	Medium	Regulatory watch bulletin, Oct 2025

MP-005.4 — Define SIPOC and value stream inputs · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	SIPOC diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	High	Interview with the process owner, Oct 2025
2	Value stream maps	Output	Affects Value stream maps; followed by Process Excellence Manager.	Medium	Regulatory watch bulletin, Oct 2025
3	Flow diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	Medium	Supplier evaluation file, Oct 2025

MP-005.5 — Define SIPOC and value stream steps · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	SIPOC diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	High	Regulatory watch bulletin, Oct 2025
2	Value stream maps	Output	Affects Value stream maps; followed by Process Excellence Manager.	Medium	Supplier evaluation file, Oct 2025
3	Flow diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	Medium	Management review minutes, Oct 2025

MP-005.6 — Define SIPOC and value stream outputs · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	SIPOC diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	High	Supplier evaluation file, Oct 2025
2	Value stream maps	Output	Affects Value stream maps; followed by Process Excellence Manager.	Medium	Management review minutes, Oct 2025
3	Flow diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	Medium	Customer complaint log, Sep 2025

MP-005.7 — Define SIPOC and value stream customers · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	SIPOC diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	High	Management review minutes, Oct 2025
2	Value stream maps	Output	Affects Value stream maps; followed by Process Excellence Manager.	Medium	Customer complaint log, Sep 2025
3	Flow diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	Medium	Internal audit report, Sep 2025

MP-005.8 — Map SIPOC and value stream · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	SIPOC diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	High	Customer complaint log, Sep 2025
2	Value stream maps	Output	Affects Value stream maps; followed by Process Excellence Manager.	Medium	Internal audit report, Sep 2025
3	Flow diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	Medium	Process performance dashboard, Sep 2025

MP-005.9 — Validate SIPOC and value stream · Decision criteria checked

#	Criterion	Met	Evidence
1	SIPOC diagrams complete	Yes	SIPOC diagrams v1.0
2	Requirements of ISO 9001 §4.4, §8.1 met	Partly	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

MP-005.11 — Capture As-Is SIPOC where required · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	SIPOC diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	High	Interview with the process owner, Sep 2025
2	Value stream maps	Output	Affects Value stream maps; followed by Process Excellence Manager.	Medium	Regulatory watch bulletin, Aug 2025
3	Flow diagrams	Output	Affects SIPOC diagrams; followed by Process Excellence Manager.	Medium	Supplier evaluation file, Aug 2025

MP-005.14 — Approve and deploy To-Be version · Decision criteria checked

#	Criterion	Met	Evidence
1	SIPOC diagrams complete	Yes	SIPOC diagrams v1.0
2	Requirements of ISO 9001 §4.4, §8.1 met	Yes	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

GRC005 (MP-028) — Regulatory and Compliance Obligations Mapping

Maintain legal register; identify obligations; link to controls; monitor changes. Owner: Compliance Officer. Tier 1. Requirements answered: ISO 9001 §4.2, ISO 14001 §6.1.3, ISO 45001 §6.1.3.

Documents of this macro process: NV-AEC-QMS-LEGAL (Compliance obligations register); NV-AEC-QMS-PSHEET-GRC005 (Macro process sheet — Regulatory and Compliance Obligations Mapping).

Step	Step, task and purpose	Role · form	What to type
MP-028.1	Maintain legal register Task: Plan and prepare compliance obligations Maintain legal register — step 1 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.	Compliance Officer Document	Document template: TPL-LEGAL — Compliance obligations register Document reference: NV-AEC-QMS-GRC005-01 Version: 2.0 Content summary: Legal register for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-LEGAL — Compliance obligations register
MP-028.2	Identify compliance obligations Task: Plan and prepare compliance obligations Identify compliance obligations — step 2 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.	Compliance Officer Register items	Items identified: 4 rows — see the table below
MP-028.3	Link compliance obligations to policies/controls Task: Plan and prepare compliance obligations Link compliance obligations to policies/controls — step 3 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.	Compliance Officer Execution	What was done: Link compliance obligations to policies/controls carried out on site execution and prefabrication yard; Legal register updated. Records that prove it: NV-AEC-QMS-LEGAL — Compliance obligations register; OB-S1 — ISO 9001; OB-S2 — ISO 19650 Completion (%): 100
MP-028.4	Monitor compliance obligations	Compliance Officer	Indicators measured: 1 row — see the table below

Step	Step, task and purpose	Role · form	What to type
	changes Task: Plan and prepare compliance obligations Monitor compliance obligations changes — step 4 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.	Measurement	Analysis of gaps and trend: Trend over the last three months: stable, below target; action opened. Next analysis at the performance review.
MP-028.5	Assess compliance obligations impact Task: Execute compliance obligations activities Assess compliance obligations impact — step 5 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.	Compliance Officer Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.4 Conclusion: Weighted score 4.4/5. Main gap: Structural failure. Action recorded in the action plan.
MP-028.6	Validate compliance obligations Task: Execute compliance obligations activities Validate compliance obligations — step 6 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.	Compliance Officer Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Compliance Officer Decision comment and conditions: Legal register approved against ISO 9001; no blocking point.
MP-028.7	Adjust compliance obligations policies Task: Execute compliance obligations activities Adjust compliance obligations policies — step 7 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.	Compliance Officer Change	Change made: Legal register updated: BIM model clash not resolved. Reason: Change in regulation Documents or records updated: NV-AEC-QMS-LEGAL — Compliance obligations register; OB-S1 — ISO 9001; OB-S2 — ISO 19650
MP-028.8	Submit compliance obligations declarations Task: Verify, record and close compliance obligations Submit compliance obligations declarations — step 8 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.	Compliance Officer Execution	What was done: Submit compliance obligations declarations carried out on site execution and prefabrication yard; Legal register updated. Records that prove it: NV-AEC-QMS-LEGAL — Compliance obligations register; OB-S1 — ISO 9001; OB-S2 — ISO 19650 Completion (%): 100
MP-028.9	Manage compliance obligations inspections Task: Verify, record and close compliance obligations Manage compliance obligations inspections — step 9 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.	Compliance Officer Execution	What was done: Manage compliance obligations inspections carried out on site execution and prefabrication yard; Legal register updated. Records that prove it: NV-AEC-QMS-LEGAL — Compliance obligations register; OB-S1 — ISO 9001; OB-S2 — ISO 19650 Completion (%): 100
MP-028.10	Report compliance obligations Task: Verify, record and close compliance obligations Report compliance obligations — step 10 of 10 in GRC005 Regulatory and Compliance Obligations Mapping.	Compliance Officer Communication	Communication records: 2 rows — see the table below

MP-028.2 — Identify compliance obligations · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	ISO 9001	Requirement	Affects Legal register; followed by Compliance Officer.	High	Internal audit report, Nov 2025
2	ISO 19650	Requirement	Affects Compliance obligations; followed by Compliance Officer.	Medium	Process performance dashboard, Nov 2025
3	EN 1090	Requirement	Affects Legal register; followed by Compliance Officer.	Medium	Interview with the process owner, Nov 2025
4	CE Marking (CPR)	Requirement	Affects Compliance obligations; followed by Compliance Officer.	Low	Regulatory watch bulletin, Oct 2025

MP-028.4 — Monitor compliance obligations changes · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	KPI-08 — Obligations mapped to process elements	Obligations mapped to process elements measures the result of this macro process (Legal register); it is the KPI its owner reviews at each Monthly review.	100	100%

MP-028.5 — Assess compliance obligations impact · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Legal register complete and up to date	30	5	Legal register reviewed on 2025-12-17; 2 gaps corrected.
2	Requirements of ISO 9001 §4.2, ISO 14001 §6.1.3, ISO 45001 §6.1.3 met	30	3	Checked against ISO 9001 §4.2, ISO 14001 §6.1.3, ISO 45001 §6.1.3 with the checklist of the phase gate.
3	Evidence available for Compliance obligations	20	5	Records filed in the project: Compliance obligations.
4	Results against target	20	5	KPI KPI-08 used as the measure.

2	Risk register	Output	Affects Risk register; followed by Risk Manager.	Medium	Internal audit report, Dec 2025
3	Risk scores	Output	Affects Risk taxonomy; followed by Risk Manager.	Medium	Process performance dashboard, Nov 2025

MP-037.2 — Identify enterprise risk register scenarios · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Structural failure	External issue	Affects Risk taxonomy; followed by Risk Manager.	High	Internal audit report, Dec 2025
2	BIM data loss	External issue	Affects Risk register; followed by Risk Manager.	Medium	Process performance dashboard, Nov 2025
3	CE non-compliance	External issue	Affects Risk taxonomy; followed by Risk Manager.	Medium	Interview with the process owner, Nov 2025
4	Revision of ISO 9001	Requirement	Affects Risk register; followed by Risk Manager.	Low	Regulatory watch bulletin, Nov 2025

MP-037.3 — Assess enterprise risk register probability/impact · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Risk taxonomy complete and up to date	30	3	Risk taxonomy reviewed on 2025-12-26; 2 gaps corrected.
2	Requirements of ISO 9001 §6.1, ISO 31000 met	30	4	Checked against ISO 9001 §6.1, ISO 31000 with the checklist of the phase gate.
3	Evidence available for Risk register	20	4	Records filed in the project: Risk register.
4	Results against target	20	4	KPI KPI-06 used as the measure.

MP-037.5 — Designate owners of enterprise risk register · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Link enterprise risk register to controls	Amina Ouazzani	2026-01-03	2026-01-17	Risk taxonomy
2	Calculate enterprise risk register residual	Amina Ouazzani	2026-01-08	2026-01-27	Risk register

#	Activity	Owner	Start	Due date	Deliverable
3	Validate enterprise risk register	Amina Ouazzani	2026-01-13	2026-02-06	Risk taxonomy

MP-037.8 — Validate enterprise risk register · Decision criteria checked

#	Criterion	Met	Evidence
1	Risk taxonomy complete	Yes	Risk taxonomy v1.0
2	Requirements of ISO 9001 §6.1, ISO 31000 met	Yes	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

GRC003 (MP-038) — Risk Treatment and Mitigation Planning

Evaluate treatment options; design plans; implement and monitor; document acceptance. Owner: Risk Manager. Tier 1. Requirements answered: ISO 9001 §6.1.2.

Step	Step, task and purpose	Role · form	What to type
MP-038.1	Evaluate risk treatment plan options Task: Plan and prepare risk treatment plan Evaluate risk treatment plan options — step 1 of 8 in GRC003 Risk Treatment and Mitigation Planning.	Risk Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.4 Conclusion: Weighted score 4.4/5. Main gap: Structural failure. Action recorded in the action plan.
MP-038.2	Design risk treatment plan Task: Plan and prepare risk treatment plan Design risk treatment plan — step 2 of 8 in GRC003 Risk Treatment and Mitigation Planning.	Risk Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-038.3	Allocate risk treatment plan budget Task: Plan and prepare risk treatment plan Allocate risk treatment plan budget — step 3 of 8 in GRC003 Risk Treatment and Mitigation Planning.	Risk Manager Assignment	Role: Risk Manager Person (from the OBS): Amina Ouazzani Organization units covered: Finance RACSI of the macro process: R: Risk Manager · A: IMS Manager · C: Risk Manager · S: Document Controller · I: Top Management
MP-038.4	Implement risk treatment plan Task: Execute risk treatment plan activities Implement risk treatment plan — step 4 of 8 in GRC003 Risk Treatment and Mitigation Planning.	Risk Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-038.5	Monitor risk treatment plan Task: Execute risk treatment plan activities Monitor risk treatment plan — step 5 of 8 in GRC003 Risk Treatment and Mitigation Planning.	Risk Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: stable, below target; action opened. Next analysis at the performance review.
MP-038.6	Reassess risk treatment plan Task: Execute risk treatment plan activities Reassess risk treatment plan — step 6 of 8 in GRC003 Risk Treatment and Mitigation Planning.	Risk Manager Execution	What was done: Reassess risk treatment plan carried out on site execution and prefabrication yard; Treatment plans updated. Records that prove it: Treat risk; Use of an obsolete document version Completion (%): 100
MP-038.7	Escalate risk treatment plan issues Task: Verify, record and close risk treatment plan Escalate risk treatment plan issues — step 7 of 8 in GRC003 Risk Treatment	Risk Manager Escalation	Escalated to: Top Management Reason: Treatment plans is late beyond tolerance; a decision on resources is needed.

Step	Step, task and purpose	Role · form	What to type
	and Mitigation Planning.		
MP-038.8	Document risk treatment plan acceptance Task: Verify, record and close risk treatment plan Document risk treatment plan acceptance — step 8 of 8 in GRC003 Risk Treatment and Mitigation Planning.	Risk Manager Document	Document template: TPL-PROC — Procedure Document reference: NV-AEC-QMS-GRC003-08 Version: 2.0 Content summary: Treatment plans for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-PROC-01 — Procedure — Context To Strategy

MP-038.1 — Evaluate risk treatment plan options · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Treatment plans complete and up to date	30	5	Treatment plans reviewed on 2025-12-28; 2 gaps corrected.
2	Requirements of ISO 9001 §6.1.2 met	30	5	Checked against ISO 9001 §6.1.2 with the checklist of the phase gate.
3	Evidence available for Budget records	20	4	Records filed in the project: Budget records.
4	Results against target	20	3	KPI Q-KPI-01 used as the measure.

MP-038.2 — Design risk treatment plan · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Allocate risk treatment plan budget	Amina Ouazzani	2026-01-05	2026-01-19	Treatment plans
2	Implement risk treatment plan	Amina Ouazzani	2026-01-10	2026-01-29	Budget records
3	Monitor risk treatment plan	Amina Ouazzani	2026-01-15	2026-02-08	Treatment plans

MP-038.4 — Implement risk treatment plan · Settings

#	Setting	Value	Reason
1	Implement risk treatment plan	Enabled for site execution and prefabrication yard	Needed to produce Treatment plans
2	Owner and notification	Risk Manager	Alerts go to the process owner

MP-038.5 — Monitor risk treatment plan · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Treatment plans); it is the KPI its owner reviews at each Monthly review.	87	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Treatment plans); it is the KPI its owner reviews at each Monthly review.	96.6	>= 95%

DMS044 (MP-105) — Compliance Calendar and Obligation Scheduler

Centralize obligations; schedule tasks/deadlines; send reminders; track status. Owner: Compliance Officer.
Tier 5. Requirements answered: ISO 9001 §4.2, §6.1.

Step	Step, task and purpose	Role · form	What to type
MP-105.1	Aggregate compliance calendar obligations Task: Plan and prepare compliance calendar Aggregate compliance calendar obligations — step 1 of 10 in DMS044 Compliance Calendar and Obligation Scheduler.	DynamicMS Engine Automated service task	System result confirmed: Aggregate compliance calendar obligations: done by the DynamicMS Engine; Compliance calendar available in the project. Records produced: —
MP-105.2	Define compliance calendar recurrence Task: Plan and prepare compliance calendar Define compliance calendar recurrence — step 2 of 10 in DMS044 Compliance Calendar and Obligation Scheduler.	Compliance Officer Register items	Items identified: 3 rows — see the table below
MP-105.3	Assign compliance calendar owners Task: Plan and prepare compliance calendar Assign compliance calendar owners — step 3 of 10 in DMS044 Compliance Calendar and Obligation Scheduler.	Compliance Officer Assignment	Role: Compliance Officer Person (from the OBS): Rachid Alaoui Organization units covered: Finance RACSI of the macro process: R: Compliance Officer · A: IMS Manager · C: Risk Manager · S: Document Controller · I: Top Management
MP-105.4	Schedule compliance calendar reminders Task: Plan and prepare compliance calendar Schedule compliance calendar reminders — step 4 of 10 in DMS044 Compliance Calendar and Obligation Scheduler.	Compliance Officer Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-105.5	Integrate task management Task: Execute compliance calendar activities Integrate task management — step 5 of 10 in DMS044 Compliance Calendar and Obligation Scheduler.	Compliance Officer Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-105.6	Track compliance calendar status Task: Execute compliance calendar activities Track compliance calendar status — step 6 of 10 in DMS044 Compliance Calendar and Obligation Scheduler.	Compliance Officer Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-105.7	Provide compliance calendar dashboard Task: Execute compliance calendar activities Provide compliance calendar dashboard — step 7 of 10 in DMS044 Compliance Calendar and Obligation Scheduler.	Compliance Officer Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-105.8	Alert compliance calendar on deadlines Task: Verify, record and close compliance calendar Alert compliance calendar on deadlines — step 8 of 10 in DMS044 Compliance Calendar and Obligation Scheduler.	Compliance Officer Communication	Communication records: 2 rows — see the table below
MP-105.9	Report compliance calendar metrics Task: Verify, record and close compliance calendar Report compliance calendar metrics — step 9 of 10 in DMS044 Compliance Calendar and Obligation Scheduler.	Compliance Officer Communication	Communication records: 2 rows — see the table below
MP-105.10	Update compliance calendar	Compliance Officer	Change made: Compliance calendar updated: BIM model

Step	Step, task and purpose	Role · form	What to type
	Task: Verify, record and close compliance calendar Update compliance calendar — step 10 of 10 in DMS044 Compliance Calendar and Obligation Scheduler.	Change	clash not resolved. Reason: Customer complaint analysis Documents or records updated: Integrate task management

MP-105.2 — Define compliance calendar recurrence · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Compliance calendar	Output	Affects Compliance calendar; followed by Compliance Officer.	High	Internal audit report, Dec 2025
2	Obligation register	Output	Affects Obligation register; followed by Compliance Officer.	Medium	Process performance dashboard, Dec 2025
3	Reminder records	Output	Affects Compliance calendar; followed by Compliance Officer.	Medium	Interview with the process owner, Nov 2025

MP-105.4 — Schedule compliance calendar reminders · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Integrate task management	Rachid Alaoui	2026-01-07	2026-01-21	Compliance calendar
2	Track compliance calendar status	Rachid Alaoui	2026-01-12	2026-01-31	Obligation register
3	Provide compliance calendar dashboard	Rachid Alaoui	2026-01-17	2026-02-10	Compliance calendar

MP-105.5 — Integrate task management · Settings

#	Setting	Value	Reason
1	Integrate task management	Enabled for site execution and prefabrication yard	Needed to produce Compliance calendar
2	Owner and notification	Compliance Officer	Alerts go to the process owner

MP-105.6 — Track compliance calendar status · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Compliance calendar); it is the KPI its owner reviews at each Monthly review.	87	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Compliance calendar); it is the KPI its owner reviews at each Monthly review.	96.6	>= 95%

MP-105.7 — Provide compliance calendar dashboard · Settings

#	Setting	Value	Reason
1	Provide compliance calendar dashboard	Enabled for site execution and prefabrication yard	Needed to produce Compliance calendar
2	Owner and notification	Compliance Officer	Alerts go to the process owner

MP-105.8 — Alert compliance calendar on deadlines · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	Compliance	Meeting	2026-01-14	Compliance calendar: what changes for you and what to do by 2026-01-28.	Compliance Officer
2	Process owners	E-mail	2026-01-16	Obligation register: what changes for you and what to do by 2026-01-28.	Compliance Officer

MP-105.9 — Report compliance calendar metrics · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	Compliance	E-mail	2026-01-13	Compliance calendar: what changes for you and what to do by 2026-01-27.	Compliance Officer
2	Process owners	Intranet	2026-01-15	Obligation register: what changes for you and what to do by 2026-01-27.	Compliance Officer

DMS082 (MP-143) — SME Onboarding and Quick Start

Deploy in days; guided setup; reduce complexity. Owner: IMS Manager. Tier 7. Requirements answered: ISO 9001 §4, §5.

Step	Step, task and purpose	Role · form	What to type
MP-143.1	Select SME onboarding segment Task: Plan and prepare SME onboarding Select SME onboarding segment — step 1 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Register items	Items identified: 3 rows — see the table below
MP-143.2	Select SME onboarding standards Task: Plan and prepare SME onboarding Select SME onboarding standards — step 2 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Register items	Items identified: 4 rows — see the table below
MP-143.3	Configure SME onboarding profile Task: Plan and prepare SME onboarding Configure SME onboarding profile — step 3 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-143.4	Activate SME onboarding pack Task: Plan and prepare SME onboarding Activate SME onboarding pack — step 4 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-143.5	Import SME onboarding docs Task: Execute SME onboarding activities Import SME onboarding docs — step 5 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Execution	What was done: Import SME onboarding docs carried out on site execution and prefabrication yard; Configured tenant updated. Records that prove it: — Completion (%): 100
MP-143.6	Invite users on SME onboarding Task: Execute SME onboarding activities Invite users on SME onboarding — step 6 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Execution	What was done: Invite users on SME onboarding carried out on site execution and prefabrication yard; Configured tenant updated. Records that prove it: — Completion (%): 100
MP-143.7	Run SME onboarding wizard Task: Execute SME onboarding activities	IMS Manager Execution	What was done: Run SME onboarding wizard carried out on site execution and prefabrication yard; Configured tenant updated.

Step	Step, task and purpose	Role · form	What to type
	Run SME onboarding wizard — step 7 of 12 in DMS082 SME Onboarding and Quick Start.		Records that prove it: — Completion (%): 100
MP-143.8	Configure SME onboarding workflows Task: Execute SME onboarding activities Configure SME onboarding workflows — step 8 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-143.9	Activate SME onboarding KPIs Task: Verify, record and close SME onboarding Activate SME onboarding KPIs — step 9 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-143.10	Launch SME onboarding Task: Verify, record and close SME onboarding Launch SME onboarding — step 10 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Execution	What was done: Launch SME onboarding carried out on site execution and prefabrication yard; Configured tenant updated. Records that prove it: — Completion (%): 100
MP-143.11	Train staff on SME onboarding Task: Verify, record and close SME onboarding Train staff on SME onboarding — step 11 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Training	Session / module: Train staff on SME onboarding — practice session Date: 2026-01-18 Units trained: Nova Build & Construct Participants: 12 Effectiveness evaluation method: Quiz Effectiveness (%): 97
MP-143.12	Schedule SME onboarding check-in Task: Verify, record and close SME onboarding Schedule SME onboarding check-in — step 12 of 12 in DMS082 SME Onboarding and Quick Start.	IMS Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.

MP-143.1 — Select SME onboarding segment · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Configured tenant	Output	Affects Configured tenant; followed by IMS Manager.	High	Customer complaint log, Dec 2025
2	Activated pack	Output	Affects Activated pack; followed by IMS Manager.	Medium	Internal audit report, Dec 2025
3	Imported docs	Output	Affects Configured tenant; followed by IMS Manager.	Medium	Process performance dashboard, Dec 2025

MP-143.2 — Select SME onboarding standards · Items identified

3	RACI assignments	Output	Affects Process models; followed by Process Excellence Manager.	Medium	Process performance dashboard, Dec 2025

MP-144.2 — Review SME process model · Inputs reviewed

#	Input	Finding
1	Process requirements	Process requirements still valid; minor updates made.
2	Industry templates	No major change since the last review.
3	Best practices	Gap found on Documentation.

MP-144.2 — Review SME process model · Decisions and actions

#	Decision	Owner	Due date
1	Update Documentation	Nabil Zerouali	2026-02-21

MP-144.5 — Configure SME process model approvals · Settings

#	Setting	Value	Reason
1	Configure SME process model approvals	Enabled for site execution and prefabrication yard	Needed to produce Process models
2	Owner and notification	Process Excellence Manager	Alerts go to the process owner

MP-144.8 — Monitor SME process model adoption · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Process models); it is the KPI its owner reviews at each Monthly review.	87	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Process models); it is the KPI its owner reviews at each Monthly review.	96.6	>= 95%

MP-144.10 — Share SME process model · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	SME process owners	Intranet	2026-01-27	Process models: what changes for you and what to do by 2026-02-10.	Process Excellence Manager
2	SME employees	Notice board	2026-01-29	Documentation: what changes for you and what to do by 2026-02-10.	Process Excellence Manager

Gate — G1 — Strategy baseline approved

Exit criteria: Context, policy, objectives and risk register approved by top management.

124. Open Lifecycle and select the phase card; the gate panel is on the right.
125. Tick “Context analysis report approved (mandatory, evidence required)”.
126. Tick “Management system policy signed (mandatory, evidence required)”.

127. Tick “SMART objectives cascaded to functions (mandatory, evidence required)”.
128. Tick “Risk and opportunity register reviewed (mandatory, evidence required)”.
129. Tick “Process map published”.
130. Sign in as Top Management (ceo@...) or the IMS Manager and select Go. For Hold or No-Go, type a comment explaining why.

E2E-02 — Leadership To Commitment

Goals: Establish leadership, competence, communication, audit capability

From trigger to terminal event: E2E-01 completion or leadership change → Competent personnel, communication plan, qualified auditors in place

UMS006 (MP-013) — Competence and Training Orchestration

Define competence frameworks; assess gaps; deliver training; track certifications. Owner: HR Manager. Tier 1. Requirements answered: ISO 9001 §7.2, §7.3.

Documents of this macro process: NV-AEC-QMS-COMP (Competence matrix and training records).

Step	Step, task and purpose	Role · form	What to type
MP-013.1	Define training frameworks Task: Plan and prepare training Define training frameworks — step 1 of 9 in UMS006 Competence and Training Orchestration.	HR Manager Register items	Items identified: 3 rows — see the table below
MP-013.2	Assess training gaps Task: Plan and prepare training Assess training gaps — step 2 of 9 in UMS006 Competence and Training Orchestration.	HR Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.3 Conclusion: Weighted score 4.3/5. Main gap: Structural failure. Action recorded in the action plan.
MP-013.3	Design training curricula Task: Plan and prepare training Design training curricula — step 3 of 9 in UMS006 Competence and Training Orchestration.	HR Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-013.4	Plan training Task: Execute training activities Plan training — step 4 of 9 in UMS006 Competence and Training Orchestration.	HR Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-013.5	Deliver training Task: Execute training activities Deliver training — step 5 of 9 in UMS006 Competence and Training Orchestration.	HR Manager Training	Session / module: Deliver training — practice session Date: 2026-01-30 Units trained: Human Resources Participants: 12 Effectiveness evaluation method: Quiz Effectiveness (%): 95
MP-013.6	Evaluate training Task: Execute training activities Evaluate training — step 6 of 9 in UMS006 Competence and Training Orchestration.	HR Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.1 Conclusion: Weighted score 4.1/5. Main gap: Structural failure. Action recorded in the action plan.
MP-013.7	Track training certifications Task: Verify, record and close training Track training certifications — step 7 of 9 in UMS006 Competence and Training Orchestration.	HR Manager Measurement	Indicators measured: 1 row — see the table below Analysis of gaps and trend: Trend over the last three months: stable, below target; action opened. Next analysis at the performance review.
MP-013.8	Certify training Task: Verify, record and close training Certify training — step 8 of 9 in	HR Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Hold Approver (Accountable): HR Manager

UMS032 (MP-014) — Management System Communication Plan Development

Define communication needs; develop plan; select channels; measure effectiveness. Owner: IMS Manager.
Tier 1. Requirements answered: ISO 9001 §7.4.

Documents of this macro process: NV-AEC-QMS-COMM (Communication plan and records).

Step	Step, task and purpose	Role · form	What to type
MP-014.1	Fix management system communication plan periodicity Task: Plan and prepare management system communication plan Fix management system communication plan periodicity — step 1 of 13 in UMS032 Management System Communication Plan Development.	IMS Manager Periodicity	Frequency: Annual Next due date: 2027-01-31 Review chaired by: IMS Manager Organization units in scope: Nova Build & Construct Review inputs and notes: Inputs for each review: Communication needs; Stakeholder requirements; Policy. An early review is triggered by: Receipt or update of Communication needs, Stakeholder requirements from Quality mgr, Comm mgr.
MP-014.2	Identify management system communication plan audiences Task: Plan and prepare management system communication plan Identify management system communication plan audiences — step 2 of 13 in UMS032 Management System Communication Plan Development.	IMS Manager Register items	Items identified: 4 rows — see the table below
MP-014.3	Define management system communication plan messages Task: Plan and prepare management system communication plan Define management system communication plan messages — step 3 of 13 in UMS032 Management System Communication Plan Development.	IMS Manager Register items	Items identified: 3 rows — see the table below
MP-014.4	Select management system communication plan channels Task: Plan and prepare management system communication plan	IMS Manager Register items	Items identified: 3 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	Select management system communication plan channels — step 4 of 13 in UMS032 Management System Communication Plan Development.		
MP-014.5	Establish management system communication plan frequency Task: Execute management system communication plan activities Establish management system communication plan frequency — step 5 of 13 in UMS032 Management System Communication Plan Development.	IMS Manager Periodicity	Frequency: Annual Next due date: 2027-02-03 Review chaired by: IMS Manager Organization units in scope: Nova Build & Construct Review inputs and notes: Inputs for each review: Communication needs; Stakeholder requirements; Policy. An early review is triggered by: Receipt or update of Communication needs, Stakeholder requirements from Quality mgr, Comm mgr.
MP-014.6	Design management system communication plan supports Task: Execute management system communication plan activities Design management system communication plan supports — step 6 of 13 in UMS032 Management System Communication Plan Development.	IMS Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-014.7	Plan management system communication plan Task: Execute management system communication plan activities Plan management system communication plan — step 7 of 13 in UMS032 Management System Communication Plan Development.	IMS Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-014.8	Publish management system communication plan Task: Execute management system communication plan activities Publish management system communication plan — step 8 of 13 in UMS032 Management System Communication Plan Development.	IMS Manager Document	Document template: TPL-COMM — Communication plan and records Document reference: NV-AEC-QMS-UMS032-08 Version: 2.0 Content summary: Communication plan for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-COMM — Communication plan and records
MP-014.9	Measure management system communication plan effectiveness Task: Verify, record and close management system communication plan Measure management system communication plan effectiveness — step 9 of 13 in UMS032 Management System Communication Plan Development.	IMS Manager Measurement	Indicators measured: 1 row — see the table below Analysis of gaps and trend: Trend over the last three months: stable, below target; action opened. Next analysis at the performance review.
MP-014.10	Produce management system communication plan report Task: Verify, record and close management system communication plan Produce management system communication plan report — step 10 of 13 in UMS032 Management System Communication Plan Development.	IMS Manager Document	Document template: TPL-COMM — Communication plan and records Document reference: NV-AEC-QMS-UMS032-10 Version: 2.0 Content summary: Communication plan for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-COMM — Communication plan and records
MP-014.11	Update management system communication plan Task: Verify, record and close management system communication plan Update management system communication plan — step 11 of 13	IMS Manager Change	Change made: Communication plan updated: BIM model clash not resolved. Reason: Change in regulation Documents or records updated: NV-AEC-QMS-COMM — Communication plan and records; CL-011 — Management system policy; CL-012 — Management system policy; Plan management system communication plan

Step	Step, task and purpose	Role · form	What to type
	in UMS032 Management System Communication Plan Development.		
MP-014.12	Distribute published documents to distribution lists Task: Distribute Published Documents Distribute published documents to distribution lists — step 12 of 13 in UMS032 Management System Communication Plan Development.	DynamicMS Engine Automated service task	System result confirmed: Distribute published documents to distribution lists: done by the DynamicMS Engine; Communication plan available in the project. Records produced: NV-AEC-QMS-COMM — Communication plan and records; CL-011 — Management system policy; CL-012 — Management system policy; CL-021 — Objectives and KPI results; CL-022 — Objectives and KPI results; Plan management system communication plan
MP-014.13	Track distribution acknowledgements Task: Distribute Published Documents Track distribution acknowledgements — step 13 of 13 in UMS032 Management System Communication Plan Development.	DynamicMS Engine Automated service task	System result confirmed: Track distribution acknowledgements: done by the DynamicMS Engine; Communication plan available in the project. Records produced: NV-AEC-QMS-COMM — Communication plan and records; CL-011 — Management system policy; CL-012 — Management system policy; CL-021 — Objectives and KPI results; CL-022 — Objectives and KPI results; Plan management system communication plan

MP-014.2 — Identify management system communication plan audiences · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Customers (public and private project owners)	Interested party	Affects Communication plan; followed by IMS Manager.	High	Internal audit report, Jan 2026
2	Employees and their representatives	Interested party	Affects Records; followed by IMS Manager.	Medium	Process performance dashboard, Dec 2025
3	Regulators and certification body	Interested party	Affects Communication plan; followed by IMS Manager.	Medium	Interview with the process owner, Dec 2025
4	Suppliers of structural steel sections	Interested party	Affects Records; followed by IMS Manager.	Low	Regulatory watch bulletin, Dec 2025

MP-014.3 — Define management system communication plan messages · Items identified

MP-152.3 — Schedule SME training plan · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Deliver SME training plan	Mehdi Fassi	2026-02-19	2026-03-05	Training records
2	Record SME training plan completion	Mehdi Fassi	2026-02-24	2026-03-15	Competence records
3	Assess SME training plan competence	Mehdi Fassi	2026-03-01	2026-03-25	Training records

MP-152.6 — Assess SME training plan competence · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Training records complete and up to date	30	5	Training records reviewed on 2026-02-12; 2 gaps corrected.
2	Requirements of ISO 9001 §7.2 met	30	5	Checked against ISO 9001 §7.2 with the checklist of the phase gate.
3	Evidence available for	20	5	Records filed in the project: Competence records.

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
	Competence records			
4	Results against target	20	5	KPI Q-KPI-01 used as the measure.

MP-152.7 — Track SME training plan certifications · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Training records); it is the KPI its owner reviews at each Monthly review.	87	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Training records); it is the KPI its owner reviews at each Monthly review.	96.6	>= 95%

MP-152.8 — Schedule SME training plan refreshers · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Report on SME training plan status	Mehdi Fassi	2026-02-19	2026-03-05	Training records
2	Update SME training plan	Mehdi Fassi	2026-02-24	2026-03-15	Competence records

MP-152.9 — Report on SME training plan status · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	SME employees	E-mail	2026-02-23	Training records: what changes for you and what to do by 2026-03-09.	HR Manager
2	SME management	Intranet	2026-02-25	Competence records: what changes for you and what to do by 2026-03-09.	HR Manager

This phase has no gate for the project track; it closes when its last step is completed.

E2E-03 — Risk To Resilience

Goals: Manage controls, third-party risk, continuity, functional safety, process safety, crisis

From trigger to terminal event: Risk assessment cycle, incident, regulatory change, or functional safety requirement → Controls, third-party risk managed, continuity tested, functional/process safety assured, crisis ready

DMS088 (MP-149) — SME Simplified Risk Register

Simplified risk management; reduce complexity; ensure coverage. Owner: Risk Manager. Tier 7. Requirements answered: ISO 9001 §6.1.

Step	Step, task and purpose	Role · form	What to type
MP-149.1	Select SME risk register template Task: Plan and prepare SME risk register Select SME risk register template — step 1 of 10 in DMS088 SME Simplified Risk Register.	Risk Manager Register items	Items identified: 3 rows — see the table below
MP-149.2	Identify SME risk register Task: Plan and prepare SME risk register	Risk Manager Register items	Items identified: 4 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	Identify SME risk register — step 2 of 10 in DMS088 SME Simplified Risk Register.		
MP-149.3	Assess SME risk register likelihood/impact Task: Plan and prepare SME risk register Assess SME risk register likelihood/impact — step 3 of 10 in DMS088 SME Simplified Risk Register.	Risk Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.5 Conclusion: Weighted score 3.5/5. Main gap: BIM data loss. Action recorded in the action plan.
MP-149.4	Prioritize SME risk register Task: Plan and prepare SME risk register Prioritize SME risk register — step 4 of 10 in DMS088 SME Simplified Risk Register.	Risk Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.6 Conclusion: Weighted score 4.6/5. Main gap: BIM data loss. Action recorded in the action plan.
MP-149.5	Define SME risk register mitigation Task: Execute SME risk register activities Define SME risk register mitigation — step 5 of 10 in DMS088 SME Simplified Risk Register.	Risk Manager Register items	Items identified: 3 rows — see the table below
MP-149.6	Assign SME risk register owners Task: Execute SME risk register activities Assign SME risk register owners — step 6 of 10 in DMS088 SME Simplified Risk Register.	Risk Manager Assignment	Role: Risk Manager Person (from the OBS): Amina Ouazzani Organization units covered: Finance RACSI of the macro process: R: Risk Manager · A: IMS Manager · C: Risk Manager · S: Document Controller · I: Top Management
MP-149.7	Monitor SME risk register Task: Execute SME risk register activities Monitor SME risk register — step 7 of 10 in DMS088 SME Simplified Risk Register.	Risk Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-149.8	Review SME risk register quarterly Task: Verify, record and close SME risk register Review SME risk register quarterly — step 8 of 10 in DMS088 SME Simplified Risk Register.	Risk Manager Execution	What was done: Review SME risk register quarterly carried out on site execution and prefabrication yard; Risk register updated. Records that prove it: — Completion (%): 100
MP-149.9	Update SME risk register Task: Verify, record and close SME risk register Update SME risk register — step 9 of 10 in DMS088 SME Simplified Risk Register.	Risk Manager Change	Change made: Risk register updated: BIM model clash not resolved. Reason: Decision of the management review Documents or records updated: —
MP-149.10	Report on SME risk register status Task: Verify, record and close SME risk register Report on SME risk register status — step 10 of 10 in DMS088 SME Simplified Risk Register.	Risk Manager Communication	Communication records: 2 rows — see the table below

MP-149.1 — Select SME risk register template · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Risk register	Output	Affects Risk register; followed by Risk Manager.	High	Customer complaint log, Feb 2026
2	Risk assessments	Output	Affects Risk assessments; followed by Risk Manager.	Medium	Internal audit report, Jan 2026

#	Item	Category	Description and impact	Relevance	Source / evidence
3	Mitigation plans	Output	Affects Risk register; followed by Risk Manager.	Medium	Process performance dashboard, Jan 2026

MP-149.2 — Identify SME risk register · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Structural failure	Risk	Affects Risk register; followed by Risk Manager.	High	Internal audit report, Jan 2026
2	BIM data loss	Risk	Affects Risk assessments; followed by Risk Manager.	Medium	Process performance dashboard, Jan 2026
3	CE non-compliance	Risk	Affects Risk register; followed by Risk Manager.	Medium	Interview with the process owner, Jan 2026
4	Weld not conforming to EN 1090	Risk	Affects Risk assessments; followed by Risk Manager.	Low	Regulatory watch bulletin, Jan 2026

MP-149.3 — Assess SME risk register likelihood/impact · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Risk register complete and up to date	30	4	Risk register reviewed on 2026-02-16; 2 gaps corrected.
2	Requirements of ISO 9001 §6.1 met	30	3	Checked against ISO 9001 §6.1 with the checklist of the phase gate.
3	Evidence available for Risk assessments	20	3	Records filed in the project: Risk assessments.
4	Results against target	20	4	KPI Q-KPI-01 used as the measure.

MP-149.4 — Prioritize SME risk register · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Risk register complete and up to date	30	5	Risk register reviewed on 2026-02-18; 2 gaps corrected.
2	Requirements of ISO 9001 §6.1 met	30	5	Checked against ISO 9001 §6.1 with the checklist of the phase gate.
3	Evidence available for Risk assessments	20	5	Records filed in the project: Risk assessments.
4	Results against target	20	3	KPI Q-KPI-01 used as the measure.

MP-149.5 — Define SME risk register mitigation · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Risk register	Output	Affects Risk register; followed by Risk Manager.	High	Regulatory watch bulletin, Jan 2026
2	Risk assessments	Output	Affects Risk assessments; followed by Risk Manager.	Medium	Supplier evaluation file, Dec 2025
3	Mitigation plans	Output	Affects Risk register; followed by Risk Manager.	Medium	Management review minutes, Dec 2025

MP-149.7 — Monitor SME risk register · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer	Customer satisfaction index measures the result of	87	>= 85%

#	KPI	Why this KPI for this step	Measured value	Target
	satisfaction index	this macro process (Risk register); it is the KPI its owner reviews at each Monthly review.		
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Risk register); it is the KPI its owner reviews at each Monthly review.	96.6	>= 95%

MP-149.10 — Report on SME risk register status · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	SME owner	Intranet	2026-02-26	Risk register: what changes for you and what to do by 2026-03-12.	Risk Manager
2	SME management	Notice board	2026-02-28	Risk assessments: what changes for you and what to do by 2026-03-12.	Risk Manager

DMS101 (MP-162) — SME Exit and Transition

Support exit/sale/transition; preserve IMS records; smooth handover. Owner: IMS Manager. Tier 7.
Requirements answered: ISO 9001 §6.3.

Step	Step, task and purpose	Role · form	What to type
MP-162.1	Plan SME exit and transition Task: Plan and prepare SME exit and transition Plan SME exit and transition — step 1 of 10 in DMS101 SME Exit and Transition.	IMS Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-162.2	Assess IMS status Task: Plan and prepare SME exit and transition Assess IMS status — step 2 of 10 in DMS101 SME Exit and Transition.	IMS Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.3 Conclusion: Weighted score 4.3/5. Main gap: weld not conforming to EN 1090. Action recorded in the action plan.
MP-162.3	Compile SME exit and transition docs Task: Plan and prepare SME exit and transition Compile SME exit and transition docs — step 3 of 10 in DMS101 SME Exit and Transition.	IMS Manager Document	Document template: TPL-PROC — Procedure Document reference: NV-AEC-QMS-DMS101-03 Version: 2.0 Content summary: Exit plan for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-PROC-01 — Procedure — Context To Strategy
MP-162.4	Transfer SME exit and transition records Task: Plan and prepare SME exit and transition Transfer SME exit and transition records — step 4 of 10 in DMS101 SME Exit and Transition.	IMS Manager Execution	What was done: Transfer SME exit and transition records carried out on site execution and prefabrication yard; Exit plan updated. Records that prove it: Assess IMS status Completion (%): 100
MP-162.5	Train SME exit and transition successor Task: Execute SME exit and transition activities Train SME exit and transition successor — step 5 of 10 in DMS101 SME Exit and Transition.	IMS Manager Training	Session / module: Train SME exit and transition successor — practice session Date: 2026-03-02 Units trained: Nova Build & Construct Participants: 27 Effectiveness evaluation method: Practical test Effectiveness (%): 95
MP-162.6	Support due diligence Task: Execute SME exit and transition activities Support due diligence — step 6 of 10 in DMS101 SME Exit and Transition.	IMS Manager Execution	What was done: Support due diligence carried out on site execution and prefabrication yard; Exit plan updated. Records that prove it: Assess IMS status Completion (%): 100

Step	Step, task and purpose	Role · form	What to type
MP-162.7	Coordinate SME exit and transition buyer Task: Execute SME exit and transition activities Coordinate SME exit and transition buyer — step 7 of 10 in DMS101 SME Exit and Transition.	IMS Manager Execution	What was done: Coordinate SME exit and transition buyer carried out on site execution and prefabrication yard; Exit plan updated. Records that prove it: Assess IMS status Completion (%): 100
MP-162.8	Complete SME exit and transition handover Task: Verify, record and close SME exit and transition Complete SME exit and transition handover — step 8 of 10 in DMS101 SME Exit and Transition.	IMS Manager Closure	Closure evidence: Exit plan closed; effectiveness verified on the KPI and evidence filed. Records that prove effectiveness: Assess IMS status Closure date: 2026-03-01
MP-162.9	Archive SME exit and transition records Task: Verify, record and close SME exit and transition Archive SME exit and transition records — step 9 of 10 in DMS101 SME Exit and Transition.	IMS Manager Closure	Closure evidence: Exit plan closed; effectiveness verified on the KPI and evidence filed. Records that prove effectiveness: Assess IMS status Closure date: 2026-03-05
MP-162.10	Close SME exit and transition account Task: Verify, record and close SME exit and transition Close SME exit and transition account — step 10 of 10 in DMS101 SME Exit and Transition.	IMS Manager Closure	Closure evidence: Exit plan closed; effectiveness verified on the KPI and evidence filed. Records that prove effectiveness: Assess IMS status Closure date: 2026-03-01

MP-162.1 — Plan SME exit and transition · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Assess IMS status	Karim Tazi	2026-02-25	2026-03-11	Exit plan
2	Compile SME exit and transition docs	Karim Tazi	2026-03-02	2026-03-21	IMS documentation package
3	Transfer SME exit and transition records	Karim Tazi	2026-03-07	2026-03-31	Exit plan

MP-162.2 — Assess IMS status · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Exit plan complete and up to date	30	4	Exit plan reviewed on 2026-02-25; 2 gaps corrected.
2	Requirements of ISO 9001 §6.3 met	30	5	Checked against ISO 9001 §6.3 with the checklist of the phase gate.
3	Evidence available for IMS documentation package	20	4	Records filed in the project: IMS documentation package.
4	Results against target	20	4	KPI Q-KPI-01 used as the measure.

This phase has no gate for the project track; it closes when its last step is completed.

E2E-04 — Compliance To Achievement

Goals: Deploy, audit, certify, maintain the management system

From trigger to terminal event: Readiness for certification, surveillance audit due, or new compliance obligation → Certification achieved or maintained; findings closed; compliance obligations met

UMS033 (MP-015) — Management System Deployment and Implementation

Deploy the management system; conduct pilots; prepare teams; move to steady state. Owner: Compliance Officer. Tier 1. Requirements answered: ISO 9001 §8.1.

Step	Step, task and purpose	Role · form	What to type
MP-015.1	Define management system deployment phases Task: Plan and prepare management system deployment Define management system deployment phases — step 1 of 10 in UMS033 Management System Deployment and Implementation.	Compliance Officer Register items	Items identified: 3 rows — see the table below
MP-015.2	Select management system deployment pilots Task: Plan and prepare management system deployment Select management system deployment pilots — step 2 of 10 in UMS033 Management System Deployment and Implementation.	Compliance Officer Assignment	Role: Compliance Officer Person (from the OBS): Rachid Alaoui Organization units covered: Finance RACSI of the macro process: R: Compliance Officer · A: IMS Manager · C: Risk Manager · S: Document Controller · I: Top Management
MP-015.3	Conduct management system deployment pilot Task: Plan and prepare management system deployment Conduct management system deployment pilot — step 3 of 10 in UMS033 Management System Deployment and Implementation.	Compliance Officer Execution	What was done: Conduct management system deployment pilot carried out on site execution and prefabrication yard; Deployed processes updated. Records that prove it: — Completion (%): 100
MP-015.4	Refine management system deployment Task: Plan and prepare management system deployment Refine management system deployment — step 4 of 10 in UMS033 Management System Deployment and Implementation.	Compliance Officer Change	Change made: Deployed processes updated: Structural failure. Reason: Finding of the internal audit Documents or records updated: —
MP-015.5	Prepare management system deployment teams Task: Execute management system deployment activities Prepare management system deployment teams — step 5 of 10 in UMS033 Management System Deployment and Implementation.	Compliance Officer Document	Document template: TPL-PROC — Procedure Document reference: NV-AEC-QMS-UMS033-05 Version: 2.0 Content summary: Deployed processes for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-PROC-01 — Procedure — Context To Strategy
MP-015.6	Validate management system deployment schedule Task: Execute management system deployment activities Validate management system deployment schedule — step 6 of 10 in UMS033 Management System Deployment and Implementation.	Compliance Officer Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Compliance Officer Decision comment and conditions: Deployed processes approved against ISO 9001; no blocking point.
MP-015.7	Verify management system deployment readiness Task: Execute management system deployment activities Verify management system deployment readiness — step 7 of 10 in UMS033 Management System	Compliance Officer Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.3 Conclusion: Weighted score 3.3/5. Main gap: Structural failure. Action recorded in the action plan.

Step	Step, task and purpose	Role · form	What to type
	Deployment and Implementation.		
MP-015.8	Execute management system deployment transition Task: Verify, record and close management system deployment Execute management system deployment transition — step 8 of 10 in UMS033 Management System Deployment and Implementation.	Compliance Officer Execution	What was done: Execute management system deployment transition carried out on site execution and prefabrication yard; Deployed processes updated. Records that prove it: — Completion (%): 100
MP-015.9	Support management system deployment users Task: Verify, record and close management system deployment Support management system deployment users — step 9 of 10 in UMS033 Management System Deployment and Implementation.	Compliance Officer Execution	What was done: Support management system deployment users carried out on site execution and prefabrication yard; Deployed processes updated. Records that prove it: — Completion (%): 100
MP-015.10	Move to steady state Task: Verify, record and close management system deployment Move to steady state — step 10 of 10 in UMS033 Management System Deployment and Implementation.	Compliance Officer Execution	What was done: Move to steady state carried out on site execution and prefabrication yard; Deployed processes updated. Records that prove it: — Completion (%): 100

MP-015.1 — Define management system deployment phases · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Deployed processes	Output	Affects Deployed processes; followed by Compliance Officer.	High	Customer complaint log, Feb 2026
2	Trained personnel	Output	Affects Trained personnel; followed by Compliance Officer.	Medium	Internal audit report, Feb 2026
3	Transition records	Output	Affects Deployed processes; followed by Compliance Officer.	Medium	Process performance dashboard, Jan 2026

MP-015.6 — Validate management system deployment schedule · Decision criteria checked

#	Criterion	Met	Evidence
1	Deployed processes complete	Yes	Deployed processes v1.0
2	Requirements of ISO 9001 §8.1 met	Yes	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

MP-015.7 — Verify management system deployment readiness · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Deployed processes complete and up to date	30	4	Deployed processes reviewed on 2026-03-02; 2 gaps corrected.
2	Requirements of ISO 9001 §8.1 met	30	3	Checked against ISO 9001 §8.1 with the checklist of the phase gate.
3	Evidence available for Trained personnel	20	3	Records filed in the project: Trained personnel.
4	Results against target	20	3	KPI Q-KPI-01 used as the measure.

UMS037 (MP-016) — Mock Audit, Pre-Certification, and Gap Diagnosis

Conduct mock audit; identify findings; validate; define actions. Owner: Compliance Officer. Tier 1. Requirements answered: ISO 9001 §9.2.

Step	Step, task and purpose	Role · form	What to type
MP-016.1	Define mock audit and gap diagnosis scope Task: Plan and prepare mock audit and gap diagnosis Define mock audit and gap diagnosis scope — step 1 of 10 in UMS037 Mock Audit, Pre-Certification, and Gap Diagnosis.	Compliance Officer Register items	Items identified: 3 rows — see the table below
MP-016.2	Plan mock audit and gap diagnosis Task: Plan and prepare mock audit and gap diagnosis Plan mock audit and gap diagnosis — step 2 of 10 in UMS037 Mock Audit, Pre-Certification, and Gap Diagnosis.	Compliance Officer Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-016.3	Conduct mock audit and gap diagnosis Task: Plan and prepare mock audit and gap diagnosis Conduct mock audit and gap diagnosis — step 3 of 10 in UMS037 Mock Audit, Pre-Certification, and Gap Diagnosis.	Compliance Officer Execution	What was done: Conduct mock audit and gap diagnosis carried out on site execution and prefabrication yard; Mock audit report updated. Records that prove it: Conduct mock audit and gap diagnosis Completion (%): 100
MP-016.4	Identify mock audit and gap diagnosis findings Task: Plan and prepare mock audit and gap diagnosis Identify mock audit and gap diagnosis findings — step 4 of 10 in UMS037 Mock Audit, Pre-Certification, and Gap Diagnosis.	Compliance Officer Register items	Items identified: 3 rows — see the table below
MP-016.5	Categorize mock audit and gap diagnosis Task: Execute mock audit and gap diagnosis activities Categorize mock audit and gap diagnosis — step 5 of 10 in UMS037 Mock Audit, Pre-Certification, and Gap Diagnosis.	Compliance Officer Execution	What was done: Categorize mock audit and gap diagnosis carried out on site execution and prefabrication yard; Mock audit report updated. Records that prove it: Conduct mock audit and gap diagnosis Completion (%): 100
MP-016.6	Validate mock audit and gap diagnosis Task: Execute mock audit and gap diagnosis activities Validate mock audit and gap diagnosis — step 6 of 10 in UMS037 Mock Audit, Pre-Certification, and Gap Diagnosis.	Compliance Officer Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Compliance Officer Decision comment and conditions: Mock audit report approved against ISO 9001; no blocking point.
MP-016.7	Issue mock audit and gap diagnosis report Task: Execute mock audit and gap diagnosis activities Issue mock audit and gap diagnosis report — step 7 of 10 in UMS037 Mock Audit, Pre-Certification, and Gap Diagnosis.	Compliance Officer Document	Document template: TPL-PROC — Procedure Document reference: NV-AEC-QMS-UMS037-07 Version: 2.0 Content summary: Mock audit report for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-PROC-01 — Procedure — Context To Strategy
MP-016.8	Present mock audit and gap diagnosis Task: Verify, record and close mock audit and gap diagnosis Present mock audit and gap diagnosis — step 8 of 10 in UMS037 Mock Audit, Pre-Certification, and Gap Diagnosis.	Compliance Officer Communication	Communication records: 2 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
MP-016.9	Define mock audit and gap diagnosis plans Task: Verify, record and close mock audit and gap diagnosis Define mock audit and gap diagnosis plans — step 9 of 10 in UMS037 Mock Audit, Pre-Certification, and Gap Diagnosis.	Compliance Officer Plan	Planned activities (become actions): 1 row — see the table below On completion: rows become actions.
MP-016.10	Monitor mock audit and gap diagnosis Task: Verify, record and close mock audit and gap diagnosis Monitor mock audit and gap diagnosis — step 10 of 10 in UMS037 Mock Audit, Pre-Certification, and Gap Diagnosis.	Compliance Officer Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.

MP-016.1 — Define mock audit and gap diagnosis scope · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Mock audit report	Output	Affects Mock audit report; followed by Compliance Officer.	High	Customer complaint log, Feb 2026
2	Findings log	Output	Affects Findings log; followed by Compliance Officer.	Medium	Internal audit report, Feb 2026
3	Corrective action plans	Output	Affects Mock audit report; followed by Compliance Officer.	Medium	Process performance dashboard, Feb 2026

MP-016.2 — Plan mock audit and gap diagnosis · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Conduct mock audit and gap diagnosis	Rachid Alaoui	2026-03-11	2026-03-25	Mock audit report
2	Identify mock audit and gap diagnosis findings	Rachid Alaoui	2026-03-16	2026-04-04	Findings log
3	Categorize mock audit and gap diagnosis	Rachid Alaoui	2026-03-21	2026-04-14	Mock audit report

MP-016.4 — Identify mock audit and gap diagnosis findings · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Weld not conforming to EN 1090	Nonconformity	Affects Mock audit report; followed by Compliance Officer.	High	Interview with the process owner, Jan 2026
2	BIM model clash not resolved	Nonconformity	Affects Findings log; followed by Compliance Officer.	Medium	Regulatory watch bulletin, Jan 2026
3	Concrete cover below spec	Nonconformity	Affects Mock audit report; followed by Compliance Officer.	Medium	Supplier evaluation file, Jan 2026

MP-016.6 — Validate mock audit and gap diagnosis · Decision criteria checked

#	Criterion	Met	Evidence
1	Mock audit report complete	Yes	Mock audit report v1.0
2	Requirements of ISO 9001 §9.2 met	Yes	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

MP-016.8 — Present mock audit and gap diagnosis · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	Top mgmt	Meeting	2026-03-12	Mock audit report: what changes for you and what to do by 2026-03-26.	Compliance Officer
2	Certification body	E-mail	2026-03-14	Findings log: what changes for you and what to do by 2026-03-26.	Compliance Officer

MP-016.9 — Define mock audit and gap diagnosis plans · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Monitor mock audit and gap diagnosis	Rachid Alaoui	2026-03-13	2026-03-27	Mock audit report

MP-016.10 — Monitor mock audit and gap diagnosis · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Mock audit report); it is the KPI its owner reviews at each Monthly review.	87	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Mock audit report); it is the KPI its owner reviews at each Monthly review.	96.6	>= 95%

UMS038 (MP-017) — Certification Audit Preparation and Coordination

Select certifier; coordinate dates; support audit; obtain certification. Owner: Compliance Officer. Tier 1. Requirements answered: ISO/IEC 17021-1 (certification audit).

Step	Step, task and purpose	Role · form	What to type
MP-017.1	Select certification audit certifier Task: Plan and prepare certification audit Select certification audit certifier — step 1 of 10 in UMS038 Certification Audit Preparation and Coordination.	Compliance Officer Register items	Items identified: 3 rows — see the table below
MP-017.2	Coordinate certification audit dates Task: Plan and prepare certification audit Coordinate certification audit dates — step 2 of 10 in UMS038 Certification Audit Preparation and Coordination.	Compliance Officer Execution	What was done: Coordinate certification audit dates carried out on site execution and prefabrication yard; Certification report updated. Records that prove it: CERT-1 — ISO 9001 Completion (%): 100
MP-017.3	Prepare certification audit dossiers Task: Plan and prepare certification audit Prepare certification audit dossiers — step 3 of 10 in UMS038 Certification Audit Preparation and Coordination.	Compliance Officer Document	Document template: TPL-PROC — Procedure Document reference: NV-AEC-QMS-UMS038-03 Version: 1.0 Content summary: Certification report for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-PROC-01 — Procedure — Context To Strategy
MP-017.4	Designate certification audit accompanists Task: Plan and prepare certification audit Designate certification audit accompanists — step 4 of 10 in UMS038 Certification Audit Preparation and Coordination.	Compliance Officer Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-017.5	Monitor certification audit	Compliance Officer	Indicators measured: 2 rows — see the table below

DMS096 (MP-157) — SME Regulatory Alert Service

Alert to regulatory changes; simplify monitoring; timely compliance. Owner: Compliance Officer. Tier 7.

Step	Step, task and purpose	Role · form	What to type
MP-157.1	Configure regulatory alerts profile Task: Plan and prepare regulatory alerts Configure regulatory alerts profile — step 1 of 10 in DMS096 SME Regulatory Alert Service.	Compliance Officer Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-157.2	Subscribe regulatory alerts feeds Task: Plan and prepare regulatory alerts Subscribe regulatory alerts feeds — step 2 of 10 in DMS096 SME Regulatory Alert Service.	Compliance Officer Execution	What was done: Subscribe regulatory alerts feeds carried out on site execution and prefabrication yard; Regulatory alerts updated. Records that prove it: — Completion (%): 100
MP-157.3	Filter regulatory alerts changes Task: Plan and prepare regulatory alerts Filter regulatory alerts changes — step 3 of 10 in DMS096 SME Regulatory Alert Service.	Compliance Officer Execution	What was done: Filter regulatory alerts changes carried out on site execution and prefabrication yard; Regulatory alerts updated. Records that prove it: — Completion (%): 100
MP-157.4	Assess regulatory alerts impact Task: Plan and prepare regulatory alerts Assess regulatory alerts impact — step 4 of 10 in DMS096 SME Regulatory Alert Service.	Compliance Officer Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.3 Conclusion: Weighted score 4.3/5. Main gap: weld not conforming to EN 1090. Action recorded in the action plan.
MP-157.5	Alert owner on regulatory alerts Task: Execute regulatory alerts activities Alert owner on regulatory alerts — step 5 of 10 in DMS096 SME Regulatory Alert Service.	Compliance Officer Communication	Communication records: 2 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
MP-157.6	Provide regulatory alerts guidance Task: Execute regulatory alerts activities Provide regulatory alerts guidance — step 6 of 10 in DMS096 SME Regulatory Alert Service.	Compliance Officer Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-157.7	Recommend regulatory alerts actions Task: Execute regulatory alerts activities Recommend regulatory alerts actions — step 7 of 10 in DMS096 SME Regulatory Alert Service.	Compliance Officer Execution	What was done: Recommend regulatory alerts actions carried out on site execution and prefabrication yard; Regulatory alerts updated. Records that prove it: — Completion (%): 100
MP-157.8	Track regulatory alerts implementation Task: Verify, record and close regulatory alerts Track regulatory alerts implementation — step 8 of 10 in DMS096 SME Regulatory Alert Service.	Compliance Officer Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-157.9	Report on regulatory alerts status Task: Verify, record and close regulatory alerts Report on regulatory alerts status — step 9 of 10 in DMS096 SME Regulatory Alert Service.	Compliance Officer Communication	Communication records: 2 rows — see the table below
MP-157.10	Update regulatory alerts Task: Verify, record and close regulatory alerts Update regulatory alerts — step 10 of 10 in DMS096 SME Regulatory Alert Service.	Compliance Officer Change	Change made: Regulatory alerts updated: Structural failure. Reason: Customer complaint analysis Documents or records updated: —

MP-157.1 — Configure regulatory alerts profile · Settings

#	Setting	Value	Reason
1	Configure regulatory alerts profile	Enabled for site execution and prefabrication yard	Needed to produce Regulatory alerts
2	Owner and notification	Compliance Officer	Alerts go to the process owner

MP-157.4 — Assess regulatory alerts impact · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Regulatory alerts complete and up to date	30	4	Regulatory alerts reviewed on 2026-04-09; 2 gaps corrected.
2	Requirements of ISO 9001 met	30	5	Checked against ISO 9001 with the checklist of the phase gate.
3	Evidence available for Impact assessments	20	4	Records filed in the project: Impact assessments.
4	Results against target	20	4	KPI Q-KPI-01 used as the measure.

MP-157.5 — Alert owner on regulatory alerts · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	SME owner	E-mail	2026-04-10	Regulatory alerts: what changes for you and what to do by 2026-04-24.	Compliance Officer
2	SME management	Intranet	2026-04-12	Impact assessments: what changes for you and what to do by 2026-04-24.	Compliance Officer

MP-157.6 — Provide regulatory alerts guidance · Settings

#	Setting	Value	Reason
1	Provide regulatory alerts guidance	Enabled for site execution and prefabrication yard	Needed to produce Regulatory alerts
2	Owner and notification	Compliance Officer	Alerts go to the process owner

MP-157.8 — Track regulatory alerts implementation · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Regulatory alerts); it is the KPI its owner reviews at each Monthly review.	87	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Regulatory alerts); it is the KPI its owner reviews at each Monthly review.	96.6	>= 95%

MP-157.9 — Report on regulatory alerts status · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	SME owner	E-mail	2026-04-12	Regulatory alerts: what changes for you and what to do by 2026-04-26.	Compliance Officer
2	SME management	Intranet	2026-04-14	Impact assessments: what changes for you and what to do by 2026-04-26.	Compliance Officer

DMS099 (MP-160) — SME Multi-Standard Quick Certification

Efficient multiple certifications; reduce costs; streamline audits. Owner: Compliance Officer. Tier 7. Requirements answered: ISO 9001, ISO 14001, ISO 45001.

Step	Step, task and purpose	Role · form	What to type
MP-160.1	Identify multi-standard certification targets Task: Plan and prepare multi-standard certification Identify multi-standard certification targets — step 1 of 10 in DMS099 SME Multi-Standard Quick Certification.	Compliance Officer Register items	Items identified: 3 rows — see the table below
MP-160.2	Assess multi-standard certification compliance Task: Plan and prepare multi-standard certification Assess multi-standard certification compliance — step 2 of 10 in DMS099 SME Multi-Standard Quick Certification.	Compliance Officer Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.4 Conclusion: Weighted score 4.4/5. Main gap: Structural failure. Action recorded in the action plan.
MP-160.3	Identify multi-standard certification gaps Task: Plan and prepare multi-standard certification Identify multi-standard certification gaps — step 3 of 10 in DMS099 SME Multi-Standard Quick Certification.	Compliance Officer Register items	Items identified: 3 rows — see the table below
MP-160.4	Prioritize multi-standard certification Task: Plan and prepare multi-standard certification Prioritize multi-standard certification — step 4 of 10 in DMS099 SME	Compliance Officer Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.7 Conclusion: Weighted score 4.7/5. Main gap: Structural failure. Action recorded in the action plan.

Step	Step, task and purpose	Role · form	What to type
	Multi-Standard Quick Certification.		
MP-160.5	Implement multi-standard certification corrections Task: Execute multi-standard certification activities Implement multi-standard certification corrections — step 5 of 10 in DMS099 SME Multi-Standard Quick Certification.	Compliance Officer Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-160.6	Conduct mock audits for each standard Task: Execute multi-standard certification activities Conduct mock audits for each standard — step 6 of 10 in DMS099 SME Multi-Standard Quick Certification.	Compliance Officer Execution	What was done: Conduct mock audits for each standard carried out on site execution and prefabrication yard; Certification plans updated. Records that prove it: — Completion (%): 100
MP-160.7	Coordinate multi-standard certification certifiers Task: Execute multi-standard certification activities Coordinate multi-standard certification certifiers — step 7 of 10 in DMS099 SME Multi-Standard Quick Certification.	Compliance Officer Execution	What was done: Coordinate multi-standard certification certifiers carried out on site execution and prefabrication yard; Certification plans updated. Records that prove it: — Completion (%): 100
MP-160.8	Support multi-standard certification audits Task: Verify, record and close multi-standard certification Support multi-standard certification audits — step 8 of 10 in DMS099 SME Multi-Standard Quick Certification.	Compliance Officer Execution	What was done: Support multi-standard certification audits carried out on site execution and prefabrication yard; Certification plans updated. Records that prove it: — Completion (%): 100
MP-160.9	Close multi-standard certification findings Task: Verify, record and close multi-standard certification Close multi-standard certification findings — step 9 of 10 in DMS099 SME Multi-Standard Quick Certification.	Compliance Officer Closure	Closure evidence: Certification plans closed; effectiveness verified on the KPI and evidence filed. Records that prove effectiveness: — Closure date: 2026-04-17
MP-160.10	Maintain multi-standard certification Task: Verify, record and close multi-standard certification Maintain multi-standard certification — step 10 of 10 in DMS099 SME Multi-Standard Quick Certification.	Compliance Officer Execution	What was done: Maintain multi-standard certification carried out on site execution and prefabrication yard; Certification plans updated. Records that prove it: — Completion (%): 100

MP-160.1 — Identify multi-standard certification targets · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Certification plans	Output	Affects Certification plans; followed by Compliance Officer.	High	Customer complaint log, Mar 2026
2	Gap analysis	Output	Affects Gap analysis; followed by Compliance Officer.	Medium	Internal audit report, Mar 2026
3	Corrective records	Output	Affects Certification plans; followed by Compliance Officer.	Medium	Process performance dashboard, Mar 2026

MP-160.2 — Assess multi-standard certification compliance · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Certification plans complete	30	5	Certification plans reviewed on 2026-04-13; 2 gaps

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
	and up to date			corrected.
2	Requirements of ISO 9001, ISO 14001, ISO 45001 met	30	5	Checked against ISO 9001, ISO 14001, ISO 45001 with the checklist of the phase gate.
3	Evidence available for Gap analysis	20	4	Records filed in the project: Gap analysis.
4	Results against target	20	3	KPI Q-KPI-01 used as the measure.

MP-160.3 — Identify multi-standard certification gaps · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Certification plans	Output	Affects Certification plans; followed by Compliance Officer.	High	Process performance dashboard, Mar 2026
2	Gap analysis	Output	Affects Gap analysis; followed by Compliance Officer.	Medium	Interview with the process owner, Mar 2026
3	Corrective records	Output	Affects Certification plans; followed by Compliance Officer.	Medium	Regulatory watch bulletin, Feb 2026

MP-160.4 — Prioritize multi-standard certification · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Certification plans complete and up to date	30	5	Certification plans reviewed on 2026-04-15; 2 gaps corrected.
2	Requirements of ISO 9001, ISO 14001, ISO 45001 met	30	4	Checked against ISO 9001, ISO 14001, ISO 45001 with the checklist of the phase gate.
3	Evidence available for Gap analysis	20	5	Records filed in the project: Gap analysis.
4	Results against target	20	5	KPI Q-KPI-01 used as the measure.

MP-160.5 — Implement multi-standard certification corrections · Settings

#	Setting	Value	Reason
1	Implement multi-standard certification corrections	Enabled for site execution and prefabrication yard	Needed to produce Certification plans
2	Owner and notification	Compliance Officer	Alerts go to the process owner

Gate — G4 — Ready for certification

Exit criteria: Mock audit closed; no open major finding; certification body scheduled.

131. Open Lifecycle and select the phase card; the gate panel is on the right.
132. Tick “Mock audit report issued (mandatory, evidence required)”.
133. Tick “All major findings closed (mandatory, evidence required)”.
134. Tick “Certification body contract signed (mandatory, evidence required)”.
135. Sign in as Top Management (ceo@...) or the IMS Manager and select Go. For Hold or No-Go, type a comment explaining why.

E2E-05 — People To Capability

Goals: Provide people, competence, documentation, records, measurement, health

From trigger to terminal event: IMS deployment, new hire, documentation change, or medical surveillance requirement → Competent people, controlled documentation, calibrated equipment, health records

UMS024 (MP-006) — Procedures and Work Instructions Development

Develop procedures; ensure clarity; validate compliance. Owner: Process Excellence Manager. Tier 1. Requirements answered: ISO 9001 §7.5, §8.1.

Documents of this macro process: NV-AEC-QMS-WI (Work instruction).

Step	Step, task and purpose	Role · form	What to type
MP-006.1	Identify procedures and work instructions need Task: Plan and prepare procedures and work instructions Identify procedures and work instructions need — step 1 of 15 in UMS024 Procedures and Work Instructions Development.	Process Excellence Manager Register items	Items identified: 3 rows — see the table below
MP-006.2	Define procedures and work instructions structure Task: Plan and prepare procedures and work instructions Define procedures and work instructions structure — step 2 of 15 in UMS024 Procedures and Work Instructions Development.	Process Excellence Manager Register items	Items identified: 3 rows — see the table below
MP-006.3	Draft procedures and work instructions Task: Plan and prepare procedures and work instructions Draft procedures and work instructions — step 3 of 15 in UMS024 Procedures and Work Instructions Development.	Process Excellence Manager Document	Document template: TPL-PROC — Procedure Document reference: NV-AEC-QMS-UMS024-03 Version: 2.0 Content summary: Procedures for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-WI — Work instruction
MP-006.4	Develop procedures and work instructions Task: Plan and prepare procedures and work instructions Develop procedures and work instructions — step 4 of 15 in UMS024 Procedures and Work Instructions Development.	Process Excellence Manager Document	Document template: TPL-PROC — Procedure Document reference: NV-AEC-QMS-UMS024-04 Version: 1.0 Content summary: Procedures for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-WI — Work instruction
MP-006.5	Integrate visual supports Task: Execute procedures and work instructions activities Integrate visual supports — step 5 of 15 in UMS024 Procedures and Work Instructions Development.	Process Excellence Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-006.6	Validate procedures and work instructions Task: Execute procedures and work instructions activities Validate procedures and work instructions — step 6 of 15 in UMS024 Procedures and Work Instructions Development.	Process Excellence Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Process Excellence Manager Decision comment and conditions: Procedures approved against ISO 9001; no blocking point.
MP-006.7	Verify procedures and work instructions compliance Task: Execute procedures and work instructions activities Verify procedures and work instructions compliance — step 7 of 15 in UMS024 Procedures and Work Instructions Development.	Process Excellence Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 5 Conclusion: Weighted score 5/5. Main gap: Structural failure. Action recorded in the action plan.

Step	Step, task and purpose	Role · form	What to type
MP-006.8	Submit procedures and work instructions for approval Task: Execute procedures and work instructions activities Submit procedures and work instructions for approval — step 8 of 15 in UMS024 Procedures and Work Instructions Development.	Process Excellence Manager Execution	What was done: Submit procedures and work instructions for approval carried out on site execution and prefabrication yard; Procedures updated. Records that prove it: NV-AEC-QMS-WI — Work instruction Completion (%): 100
MP-006.9	Publish procedures and work instructions Task: Verify, record and close procedures and work instructions Publish procedures and work instructions — step 9 of 15 in UMS024 Procedures and Work Instructions Development.	Process Excellence Manager Document	Document template: TPL-PROC — Procedure Document reference: NV-AEC-QMS-UMS024-09 Version: 2.0 Content summary: Procedures for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-WI — Work instruction
MP-006.10	Train staff on procedures and work instructions Task: Verify, record and close procedures and work instructions Train staff on procedures and work instructions — step 10 of 15 in UMS024 Procedures and Work Instructions Development.	Process Excellence Manager Training	Session / module: Train staff on procedures and work instructions — practice session Date: 2026-04-28 Units trained: Quality Participants: 27 Effectiveness evaluation method: On-the-job observation Effectiveness (%): 78
MP-006.11	Plan procedures and work instructions reviews Task: Verify, record and close procedures and work instructions Plan procedures and work instructions reviews — step 11 of 15 in UMS024 Procedures and Work Instructions Development.	Process Excellence Manager Review	Review frequency: Semi-annual Review date: 2026-04-26 Next review: 2026-10-25 Chaired by: Process Excellence Manager Participants: Process Excellence Manager, IMS Manager, Quality Manager Inputs reviewed: 3 rows — see the table below Decisions and actions: 1 row — see the table below On completion: rows become actions.
MP-006.12	Create procedure header Task: Author Task Procedures (Use Cases) Create procedure header — step 12 of 15 in UMS024 Procedures and Work Instructions Development.	Process Excellence Manager Document	Document template: TPL-PROC — Procedure Document reference: NV-AEC-QMS-UMS024-12 Version: 1.1 Content summary: Procedures for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-WI — Work instruction
MP-006.13	Define step sequence with exceptions Task: Author Task Procedures (Use Cases) Define step sequence with exceptions — step 13 of 15 in UMS024 Procedures and Work Instructions Development.	Process Excellence Manager Register items	Items identified: 3 rows — see the table below
MP-006.14	Generate BPMN diagram from step table Task: Author Task Procedures (Use Cases) Generate BPMN diagram from step table — step 14 of 15 in UMS024 Procedures and Work Instructions Development.	DynamicMS Engine Automated service task	System result confirmed: Generate BPMN diagram from step table: done by the DynamicMS Engine; Procedures available in the project. Records produced: NV-AEC-QMS-WI — Work instruction; Update Work instructions
MP-006.15	Attach KPIs, reporting and alerts Task: Author Task Procedures (Use Cases) Attach KPIs, reporting and alerts — step 15 of 15 in UMS024 Procedures and Work Instructions Development.	Process Excellence Manager Execution	What was done: Attach KPIs, reporting and alerts carried out on site execution and prefabrication yard; Procedures updated. Records that prove it: NV-AEC-QMS-WI — Work instruction; Update Work instructions Completion (%): 100

MP-006.1 — Identify procedures and work instructions need · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Procedures	Output	Affects Procedures; followed by Process Excellence Manager.	High	Customer complaint log, Apr 2026
2	Work instructions	Output	Affects Work instructions; followed by Process Excellence Manager.	Medium	Internal audit report, Mar 2026
3	Visual aids	Output	Affects Procedures; followed by Process Excellence Manager.	Medium	Process performance dashboard, Mar 2026

MP-006.2 — Define procedures and work instructions structure · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Procedures	Output	Affects Procedures; followed by Process Excellence Manager.	High	Internal audit report, Mar 2026
2	Work instructions	Output	Affects Work instructions; followed by Process Excellence Manager.	Medium	Process performance dashboard, Mar 2026
3	Visual aids	Output	Affects Procedures; followed by Process Excellence Manager.	Medium	Interview with the process owner, Mar 2026

MP-006.5 — Integrate visual supports · Settings

#	Setting	Value	Reason
1	Integrate visual supports	Enabled for site execution and prefabrication yard	Needed to produce Procedures
2	Owner and notification	Process Excellence Manager	Alerts go to the process owner

MP-006.6 — Validate procedures and work instructions · Decision criteria checked

#	Criterion	Met	Evidence
1	Procedures complete	Yes	Procedures v1.0
2	Requirements of ISO 9001 §7.5, §8.1 met	Yes	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

MP-006.7 — Verify procedures and work instructions compliance · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Procedures complete and up to date	30	5	Procedures reviewed on 2026-04-19; 2 gaps corrected.
2	Requirements of ISO 9001 §7.5, §8.1 met	30	5	Checked against ISO 9001 §7.5, §8.1 with the checklist of the phase gate.
3	Evidence available for Work instructions	20	5	Records filed in the project: Work instructions.
4	Results against target	20	5	KPI KPI-11 used as the measure.

MP-006.11 — Plan procedures and work instructions reviews · Inputs reviewed

#	Input	Finding
1	Process designs	Process designs still valid; minor updates made.
2	Standard requirements	No major change since the last review.
3	Documentation standards	Gap found on Work instructions.

MP-006.11 — Plan procedures and work instructions reviews · Decisions and actions

#	Decision	Owner	Due date
1	Update Work instructions	Nabil Zerouali	2026-05-26

MP-006.13 — Define step sequence with exceptions · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Procedures	Output	Affects Procedures; followed by Process Excellence Manager.	High	Supplier evaluation file, Dec 2025
2	Work instructions	Output	Affects Work instructions; followed by Process Excellence Manager.	Medium	Management review minutes, Dec 2025
3	Visual aids	Output	Affects Procedures; followed by Process Excellence Manager.	Medium	Customer complaint log, Dec 2025

UMS021 (MP-025) — Monitoring and Measurement Resources Control

Inventory equipment; plan/execute calibration; assess impact; maintain records. Owner: Quality Manager.
Tier 1. Requirements answered: ISO 9001 §7.1.5.

Documents of this macro process: NV-AEC-QMS-CAL (Monitoring and measuring equipment register).

Step	Step, task and purpose	Role · form	What to type
MP-025.1	Inventory measuring equipment Task: Plan and prepare measuring equipment Inventory measuring equipment — step 1 of 8 in UMS021 Monitoring and Measurement Resources Control.	Quality Manager Execution	What was done: Inventory measuring equipment carried out on site execution and prefabrication yard; Equipment register updated. Records that prove it: NV-AEC-QMS-CAL — Monitoring and measuring equipment register; EQ-01 — Torque wrench 5–60 N·m; EQ-02 — Digital caliper 0–150 mm Completion (%): 100
MP-025.2	Establish measuring equipment schedules Task: Plan and prepare measuring equipment Establish measuring equipment schedules — step 2 of 8 in UMS021 Monitoring and Measurement Resources Control.	Quality Manager Execution	What was done: Establish measuring equipment schedules carried out on site execution and prefabrication yard; Equipment register updated. Records that prove it: NV-AEC-QMS-CAL — Monitoring and measuring equipment register; EQ-01 — Torque wrench 5–60 N·m; EQ-02 — Digital caliper 0–150 mm Completion (%): 100
MP-025.3	Perform measuring equipment calibration Task: Plan and prepare measuring equipment Perform measuring equipment calibration — step 3 of 8 in UMS021 Monitoring and Measurement Resources Control.	Quality Manager Execution	What was done: Perform measuring equipment calibration carried out on site execution and prefabrication yard; Equipment register updated. Records that prove it: NV-AEC-QMS-CAL — Monitoring and measuring equipment register; EQ-01 — Torque wrench 5–60 N·m; EQ-02 — Digital caliper 0–150 mm Completion (%): 100
MP-025.4	Label calibration status on equipment Task: Execute measuring equipment activities Label calibration status on equipment — step 4 of 8 in UMS021 Monitoring and Measurement Resources Control.	Quality Manager Execution	What was done: Label calibration status on equipment carried out on site execution and prefabrication yard; Equipment register updated. Records that prove it: NV-AEC-QMS-CAL — Monitoring and measuring equipment register; EQ-01 — Torque wrench 5–60 N·m; EQ-02 — Digital caliper 0–150 mm Completion (%): 100
MP-025.5	Adjust and correct measuring equipment Task: Execute measuring equipment activities Adjust and correct measuring equipment — step 5 of 8 in UMS021 Monitoring and Measurement Resources Control.	Quality Manager Change	Change made: Equipment register updated; BIM model clash not resolved. Reason: Decision of the management review Documents or records updated: NV-AEC-QMS-CAL — Monitoring and measuring equipment register; EQ-01 — Torque wrench 5–60 N·m; EQ-02 — Digital caliper 0–150 mm

Step	Step, task and purpose	Role · form	What to type
MP-025.6	Assess measuring equipment impact Task: Execute measuring equipment activities Assess measuring equipment impact — step 6 of 8 in UMS021 Monitoring and Measurement Resources Control.	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.6 Conclusion: Weighted score 4.6/5. Main gap: BIM data loss. Action recorded in the action plan.
MP-025.7	Maintain measuring equipment records Task: Verify, record and close measuring equipment Maintain measuring equipment records — step 7 of 8 in UMS021 Monitoring and Measurement Resources Control.	Quality Manager Document	Document template: TPL-CAL — Monitoring and measuring equipment register Document reference: NV-AEC-QMS-UMS021-07 Version: 1.0 Content summary: Equipment register for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-CAL — Monitoring and measuring equipment register
MP-025.8	Handle measuring equipment nonconforming Task: Verify, record and close measuring equipment Handle measuring equipment nonconforming — step 8 of 8 in UMS021 Monitoring and Measurement Resources Control.	Quality Manager Execution	What was done: Handle measuring equipment nonconforming carried out on site execution and prefabrication yard; Equipment register updated. Records that prove it: NV-AEC-QMS-CAL — Monitoring and measuring equipment register; EQ-01 — Torque wrench 5–60 N·m; EQ-02 — Digital caliper 0–150 mm Completion (%): 100

MP-025.6 — Assess measuring equipment impact · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Equipment register complete and up to date	30	5	Equipment register reviewed on 2026-04-24; 2 gaps corrected.
2	Requirements of ISO 9001 §7.1.5 met	30	5	Checked against ISO 9001 §7.1.5 with the checklist of the phase gate.
3	Evidence available for Calibration records	20	4	Records filed in the project: Calibration records.
4	Results against target	20	4	KPI Q-KPI-01 used as the measure.

UMS001 (MP-029) — Documentary Lifecycle Control

Define metadata; manage approval; control versions; archive obsolete. Owner: Document Controller. Tier 1. Requirements answered: ISO 9001 §7.5.2, §7.5.3.

Documents of this macro process: NV-AEC-QMS-DOCLIST (Master list of documented information).

Step	Step, task and purpose	Role · form	What to type
MP-029.1	Define controlled documents metadata Task: Plan and prepare controlled documents Define controlled documents metadata — step 1 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Register items	Items identified: 3 rows — see the table below
MP-029.2	Identify controlled documents workflow Task: Plan and prepare controlled documents Identify controlled documents workflow — step 2 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Register items	Items identified: 3 rows — see the table below
MP-029.3	Draft controlled documents Task: Plan and prepare controlled documents	Document Controller Document	Document template: TPL-DOCLIST — Master list of documented information Document reference: NV-AEC-QMS-UMS001-03

Step	Step, task and purpose	Role · form	What to type
	Draft controlled documents — step 3 of 18 in UMS001 Documentary Lifecycle Control.		Version: 1.0 Content summary: Controlled documents for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-DOCLIST — Master list of documented information
MP-029.4	Peer-review draft documents Task: Plan and prepare controlled documents Peer-review draft documents — step 4 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Execution	What was done: Peer-review draft documents carried out on site execution and prefabrication yard; Controlled documents updated. Records that prove it: NV-AEC-QMS-DOCLIST — Master list of documented information Completion (%): 100
MP-029.5	Check controlled documents compliance Task: Execute controlled documents activities Check controlled documents compliance — step 5 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.2 Conclusion: Weighted score 4.2/5. Main gap: Structural failure. Action recorded in the action plan.
MP-029.6	Verify controlled documents versions Task: Execute controlled documents activities Verify controlled documents versions — step 6 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4 Conclusion: Weighted score 4/5. Main gap: BIM data loss. Action recorded in the action plan.
MP-029.7	Approve and publish controlled documents Task: Execute controlled documents activities Approve and publish controlled documents — step 7 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Document Controller Decision comment and conditions: Controlled documents approved against ISO 9001; no blocking point.
MP-029.8	Distribute controlled documents Task: Execute controlled documents activities Distribute controlled documents — step 8 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Communication	Communication records: 2 rows — see the table below
MP-029.9	Archive obsolete controlled documents Task: Verify, record and close controlled documents Archive obsolete controlled documents — step 9 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Closure	Closure evidence: Controlled documents closed; effectiveness verified on the KPI and evidence filed. Records that prove effectiveness: NV-AEC-QMS-DOCLIST — Master list of documented information Closure date: 2026-05-09
MP-029.10	Schedule controlled documents reminders Task: Verify, record and close controlled documents Schedule controlled documents reminders — step 10 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-029.11	Certify controlled documents acknowledgment Task: Verify, record and close controlled documents Certify controlled documents acknowledgment — step 11 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Document Controller Decision comment and conditions: Controlled documents approved against ISO 9001; no blocking point.
MP-029.12	Submit document for review Task: Control Versions of Governed Documents Submit document for review — step	Document Controller Execution	What was done: Submit document for review carried out on site execution and prefabrication yard; Controlled documents updated. Records that prove it: NV-AEC-QMS-DOCLIST — Master

Step	Step, task and purpose	Role · form	What to type
	12 of 18 in UMS001 Documentary Lifecycle Control.		list of documented information; Certify controlled documents acknowledgment Completion (%): 100
MP-029.13	Approve and release version Task: Control Versions of Governed Documents Approve and release version — step 13 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Document Controller Decision comment and conditions: Controlled documents approved against ISO 9001; no blocking point.
MP-029.14	Publish and notify Task: Control Versions of Governed Documents Publish and notify — step 14 of 18 in UMS001 Documentary Lifecycle Control.	DynamicMS Engine Automated service task	System result confirmed: Publish and notify: done by the DynamicMS Engine; Controlled documents available in the project. Records produced: NV-AEC-QMS-DOCLIST — Master list of documented information; Certify controlled documents acknowledgment
MP-029.15	Supersede and archive previous version Task: Control Versions of Governed Documents Supersede and archive previous version — step 15 of 18 in UMS001 Documentary Lifecycle Control.	DynamicMS Engine Automated service task	System result confirmed: Supersede and archive previous version: done by the DynamicMS Engine; Controlled documents available in the project. Records produced: NV-AEC-QMS-DOCLIST — Master list of documented information; Certify controlled documents acknowledgment
MP-029.16	Customize document template Task: Customize & Generate Downloadable Files Customize document template — step 16 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Change	Change made: Controlled documents updated: BIM model clash not resolved. Reason: Finding of the internal audit Documents or records updated: NV-AEC-QMS-DOCLIST — Master list of documented information; Certify controlled documents acknowledgment
MP-029.17	Generate files in selected formats Task: Customize & Generate Downloadable Files Generate files in selected formats — step 17 of 18 in UMS001 Documentary Lifecycle Control.	DynamicMS Engine Automated service task	System result confirmed: Generate files in selected formats: done by the DynamicMS Engine; Controlled documents available in the project. Records produced: NV-AEC-QMS-DOCLIST — Master list of documented information; Certify controlled documents acknowledgment
MP-029.18	Download or share generated file Task: Customize & Generate Downloadable Files Download or share generated file — step 18 of 18 in UMS001 Documentary Lifecycle Control.	Document Controller Execution	What was done: Download or share generated file carried out on site execution and prefabrication yard; Controlled documents updated. Records that prove it: NV-AEC-QMS-DOCLIST — Master list of documented information; Certify controlled documents acknowledgment Completion (%): 100

MP-029.1 — Define controlled documents metadata · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Controlled documents	Output	Affects Controlled documents; followed by Document Controller.	High	Customer complaint log, Apr 2026
2	Approval records	Output	Affects Approval records; followed by Document Controller.	Medium	Internal audit report, Apr 2026
3	Distribution records	Output	Affects Controlled documents; followed by Document Controller.	Medium	Process performance dashboard, Apr 2026

MP-029.2 — Identify controlled documents workflow · Items identified

UMS047 (MP-030) — Records Lifecycle, Retention, and Evidence Governance

Define retention; implement disposal; manage legal holds; produce admissible evidence. Owner: Document Controller. Tier 1. Requirements answered: ISO 9001 §7.5.3.

Step	Step, task and purpose	Role · form	What to type
MP-030.1	Define records and evidence types/retention Task: Plan and prepare records and evidence Define records and evidence types/retention — step 1 of 9 in UMS047 Records Lifecycle, Retention, and Evidence Governance.	Document Controller Register items	Items identified: 3 rows — see the table below
MP-030.2	Designate owners of records and evidence Task: Plan and prepare records and evidence Designate owners of records and evidence — step 2 of 9 in UMS047 Records Lifecycle, Retention, and Evidence Governance.	Document Controller Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-030.3	Implement records and evidence rules Task: Plan and prepare records and evidence Implement records and evidence rules — step 3 of 9 in UMS047 Records Lifecycle, Retention, and Evidence Governance.	Document Controller Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-030.4	Manage records and evidence holds Task: Execute records and evidence activities Manage records and evidence holds — step 4 of 9 in UMS047 Records Lifecycle, Retention, and Evidence Governance.	Document Controller Execution	What was done: Manage records and evidence holds carried out on site execution and prefabrication yard; Retention schedules updated. Records that prove it: Implement records and evidence rules Completion (%): 100
MP-030.5	Maintain records and evidence custody Task: Execute records and evidence activities Maintain records and evidence custody — step 5 of 9 in UMS047 Records Lifecycle, Retention, and Evidence Governance.	Document Controller Execution	What was done: Maintain records and evidence custody carried out on site execution and prefabrication yard; Retention schedules updated. Records that prove it: Implement records and evidence rules Completion (%): 100
MP-030.6	Validate records and evidence authenticity	Document Controller Decision	Decision criteria checked: 3 rows — see the table below Decision: Go

Step	Step, task and purpose	Role · form	What to type
	Task: Execute records and evidence activities Validate records and evidence authenticity — step 6 of 9 in UMS047 Records Lifecycle, Retention, and Evidence Governance.		Approver (Accountable): Document Controller Decision comment and conditions: Retention schedules approved against ISO 9001; no blocking point.
MP-030.7	Conduct records and evidence audits Task: Verify, record and close records and evidence Conduct records and evidence audits — step 7 of 9 in UMS047 Records Lifecycle, Retention, and Evidence Governance.	Document Controller Execution	What was done: Conduct records and evidence audits carried out on site execution and prefabrication yard; Retention schedules updated. Records that prove it: Implement records and evidence rules Completion (%): 100
MP-030.8	Dispose records and evidence expired Task: Verify, record and close records and evidence Dispose records and evidence expired — step 8 of 9 in UMS047 Records Lifecycle, Retention, and Evidence Governance.	Document Controller Closure	Closure evidence: Retention schedules closed; effectiveness verified on the KPI and evidence filed. Records that prove effectiveness: Implement records and evidence rules Closure date: 2026-05-18
MP-030.9	Produce records and evidence Task: Verify, record and close records and evidence Produce records and evidence — step 9 of 9 in UMS047 Records Lifecycle, Retention, and Evidence Governance.	Document Controller Document	Document template: TPL-PROC — Procedure Document reference: NV-AEC-QMS-UMS047-09 Version: 2.0 Content summary: Retention schedules for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-PROC-01 — Procedure — Context To Strategy

MP-030.1 — Define records and evidence types/retention · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Retention schedules	Output	Affects Retention schedules; followed by Document Controller.	High	Customer complaint log, Apr 2026
2	Disposal records	Output	Affects Disposal records; followed by Document Controller.	Medium	Internal audit report, Apr 2026
3	Legal hold records	Output	Affects Retention schedules; followed by Document Controller.	Medium	Process performance dashboard, Apr 2026

MP-030.2 — Designate owners of records and evidence · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Implement records and evidence rules	Ines Garcia	2026-05-13	2026-05-27	Retention schedules
2	Manage records and evidence holds	Ines Garcia	2026-05-18	2026-06-06	Disposal records
3	Maintain records and evidence custody	Ines Garcia	2026-05-23	2026-06-16	Retention schedules

MP-030.3 — Implement records and evidence rules · Settings

#	Setting	Value	Reason
1	Implement records and evidence rules	Enabled for site execution and prefabrication yard	Needed to produce Retention schedules
2	Owner and notification	Document Controller	Alerts go to the process owner

MP-030.6 — Validate records and evidence authenticity · Decision criteria checked

#	Criterion	Met	Evidence
1	Retention schedules complete	Yes	Retention schedules v1.0
2	Requirements of ISO 9001 §7.5.3 met	Yes	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

DMS084 (MP-145) — SME Document Template Library

Ready-to-use templates; reduce burden; ensure compliance. Owner: Document Controller. Tier 7. Requirements answered: ISO 9001 §7.5.

Step	Step, task and purpose	Role · form	What to type
MP-145.1	Browse SME document templates Task: Plan and prepare SME document templates Browse SME document templates — step 1 of 10 in DMS084 SME Document Template Library.	Document Controller Execution	What was done: Browse SME document templates carried out on site execution and prefabrication yard; Customized docs updated. Records that prove it: — Completion (%): 100
MP-145.2	Select SME document templates type Task: Plan and prepare SME document templates Select SME document templates type — step 2 of 10 in DMS084 SME Document Template Library.	Document Controller Register items	Items identified: 3 rows — see the table below
MP-145.3	Download SME document templates Task: Plan and prepare SME document templates Download SME document templates — step 3 of 10 in DMS084 SME Document Template Library.	Document Controller Execution	What was done: Download SME document templates carried out on site execution and prefabrication yard; Customized docs updated. Records that prove it: — Completion (%): 100
MP-145.4	Customize SME document templates Task: Plan and prepare SME document templates Customize SME document templates — step 4 of 10 in DMS084 SME Document Template Library.	Document Controller Change	Change made: Customized docs updated; BIM model clash not resolved. Reason: Finding of the internal audit Documents or records updated: —
MP-145.5	Review SME document templates Task: Execute SME document templates activities Review SME document templates — step 5 of 10 in DMS084 SME Document Template Library.	Document Controller Review	Review frequency: Semi-annual Review date: 2026-05-20 Next review: 2026-11-18 Chaired by: Document Controller Participants: Document Controller, IMS Manager, Quality Manager Inputs reviewed: 3 rows — see the table below Decisions and actions: 1 row — see the table below On completion: rows become actions.

4	Results against target	20	4	KPI Q-KPI-01 used as the measure.

MP-133.3 — Plan facilities services · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Manage facilities maintenance	Julien Moreau	2026-05-31	2026-06-14	Facility management plan
2	Manage facilities space	Julien Moreau	2026-06-05	2026-06-24	Maintenance records
3	Manage facilities utilities	Julien Moreau	2026-06-10	2026-07-04	Facility management plan

MP-133.8 — Report on facilities status · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	Top mgmt	Meeting	2026-06-02	Facility management plan: what changes for you and what to do by 2026-06-16.	Operations Manager
2	Employees	E-mail	2026-06-04	Maintenance records: what changes for you and what to do by 2026-06-16.	Operations Manager

MP-133.9 — Review and improve facilities · Inputs reviewed

#	Input	Finding
1	ISO 41001	ISO 41001 still valid; minor updates made.
2	Facility data	No major change since the last review.
3	Maintenance data	Gap found on Maintenance records.

MP-133.9 — Review and improve facilities · Decisions and actions

#	Decision	Owner	Due date
1	Update Maintenance records	Julien Moreau	2026-07-01

MP-133.10 — Certify facilities compliance · Decision criteria checked

#	Criterion	Met	Evidence
1	Facility management plan complete	Yes	Facility management plan v1.0
2	Requirements of ISO 9001 met	Yes	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

This phase has no gate for the project track; it closes when its last step is completed.

E2E-08 — Requirements To Delivery

Goals: Transform requirements into delivered products/services

From trigger to terminal event: Customer order, production plan, supplier onboarding, welding requirement, laboratory test, or eco-design → Products/services delivered; suppliers controlled; traceability ensured; quality validated; LCA completed

DMS062 (MP-123) — Welding Quality Management

Manage welding per ISO 3834/14554/EN 1090; ensure weld integrity. Owner: Quality Manager. Tier 6.

Step	Step, task and purpose	Role · form	What to type
MP-123.1	Develop welding quality WPS Task: Plan and prepare welding quality Develop welding quality WPS — step 1 of 10 in DMS062 Welding Quality Management.	Quality Manager Execution	What was done: Develop welding quality WPS carried out on site execution and prefabrication yard; WPS/PQR records updated. Records that prove it: — Completion (%): 100
MP-123.2	Qualify welding quality PQR Task: Plan and prepare welding quality Qualify welding quality PQR — step 2 of 10 in DMS062 Welding Quality Management.	Quality Manager Execution	What was done: Qualify welding quality PQR carried out on site execution and prefabrication yard; WPS/PQR records updated. Records that prove it: — Completion (%): 100
MP-123.3	Qualify welding quality welders Task: Plan and prepare welding quality Qualify welding quality welders — step 3 of 10 in DMS062 Welding Quality Management.	Quality Manager Execution	What was done: Qualify welding quality welders carried out on site execution and prefabrication yard; WPS/PQR records updated. Records that prove it: — Completion (%): 100
MP-123.4	Inspect welding quality operations Task: Plan and prepare welding quality Inspect welding quality operations — step 4 of 10 in DMS062 Welding	Quality Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.

Step	Step, task and purpose	Role · form	What to type
	Quality Management.		
MP-123.5	Inspect welds visually Task: Execute welding quality activities Inspect welds visually — step 5 of 10 in DMS062 Welding Quality Management.	Quality Manager Execution	What was done: Inspect welds visually carried out on site execution and prefabrication yard; WPS/PQR records updated. Records that prove it: — Completion (%): 100
MP-123.6	Perform non-destructive testing Task: Execute welding quality activities Perform non-destructive testing — step 6 of 10 in DMS062 Welding Quality Management.	Quality Manager Execution	What was done: Perform non-destructive testing carried out on site execution and prefabrication yard; WPS/PQR records updated. Records that prove it: — Completion (%): 100
MP-123.7	Assess welding quality Task: Execute welding quality activities Assess welding quality — step 7 of 10 in DMS062 Welding Quality Management.	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.7 Conclusion: Weighted score 3.7/5. Main gap: Structural failure. Action recorded in the action plan.
MP-123.8	Manage welding quality repairs Task: Verify, record and close welding quality Manage welding quality repairs — step 8 of 10 in DMS062 Welding Quality Management.	Quality Manager Execution	What was done: Manage welding quality repairs carried out on site execution and prefabrication yard; WPS/PQR records updated. Records that prove it: — Completion (%): 100
MP-123.9	Maintain welding quality records Task: Verify, record and close welding quality Maintain welding quality records — step 9 of 10 in DMS062 Welding Quality Management.	Quality Manager Document	Document template: TPL-PROC — Procedure Document reference: NV-AEC-QMS-DMS062-09 Version: 2.0 Content summary: WPS/PQR records for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-PROC-01 — Procedure — Context To Strategy
MP-123.10	Report on welding quality status Task: Verify, record and close welding quality Report on welding quality status — step 10 of 10 in DMS062 Welding Quality Management.	Quality Manager Communication	Communication records: 2 rows — see the table below

MP-123.4 — Inspect welding quality operations · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (WPS/PQR records); it is the KPI its owner reviews at each Monthly review.	87	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (WPS/PQR records); it is the KPI its owner reviews at each Monthly review.	96.6	>= 95%

MP-123.7 — Assess welding quality · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	WPS/PQR records complete and up to date	30	3	WPS/PQR records reviewed on 2026-06-01; 2 gaps corrected.
2	Requirements of ISO 9001 met	30	4	Checked against ISO 9001 with the checklist of the phase gate.
3	Evidence available for Welder quals	20	5	Records filed in the project: Welder quals.

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
4	Results against target	20	3	KPI Q-KPI-01 used as the measure.

MP-123.10 — Report on welding quality status · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	Production	Intranet	2026-06-07	WPS/PQR records: what changes for you and what to do by 2026-06-21.	Quality Manager
2	Quality	Notice board	2026-06-09	Welder quals: what changes for you and what to do by 2026-06-21.	Quality Manager

DMS094 (MP-155) — SME Informal Process Digitization

Digitize informal processes; capture tribal knowledge; create repeatable. Owner: Process Excellence Manager. Tier 7.

Step	Step, task and purpose	Role · form	What to type
MP-155.1	Identify informal processes Task: Plan and prepare informal processes Identify informal processes — step 1 of 10 in DMS094 SME Informal Process Digitization.	Process Excellence Manager Register items	Items identified: 3 rows — see the table below
MP-155.2	Interview informal processes stakeholders Task: Plan and prepare informal processes Interview informal processes stakeholders — step 2 of 10 in DMS094 SME Informal Process Digitization.	Process Excellence Manager Execution	What was done: Interview informal processes stakeholders carried out on site execution and prefabrication yard; Digitized processes updated. Records that prove it: — Completion (%): 100
MP-155.3	Document the process control plan Task: Plan and prepare informal processes Document the process control plan — step 3 of 10 in DMS094 SME Informal Process Digitization.	Process Excellence Manager Document	Document template: TPL-PROC — Procedure Document reference: NV-AEC-QMS-DMS094-03 Version: 1.1 Content summary: Digitized processes for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-PROC-01 — Procedure — Context To Strategy
MP-155.4	Identify informal processes improvements Task: Plan and prepare informal processes Identify informal processes improvements — step 4 of 10 in DMS094 SME Informal Process Digitization.	Process Excellence Manager Register items	Items identified: 3 rows — see the table below
MP-155.5	Design informal processes digital Task: Execute informal processes activities Design informal processes digital — step 5 of 10 in DMS094 SME Informal Process Digitization.	Process Excellence Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-155.6	Configure informal processes Task: Execute informal processes activities Configure informal processes — step 6 of 10 in DMS094 SME Informal Process Digitization.	Process Excellence Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-155.7	Train staff on informal processes	Process Excellence	Session / module: Train staff on informal processes — practice

Step	Step, task and purpose	Role · form	What to type
	Task: Execute informal processes activities Train staff on informal processes — step 7 of 10 in DMS094 SME Informal Process Digitization.	Manager Training	session Date: 2026-06-08 Units trained: Quality Participants: 11 Effectiveness evaluation method: Quiz Effectiveness (%): 90
MP-155.8	Monitor informal processes adoption Task: Verify, record and close informal processes Monitor informal processes adoption — step 8 of 10 in DMS094 SME Informal Process Digitization.	Process Excellence Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: stable, below target; action opened. Next analysis at the performance review.
MP-155.9	Refine informal processes Task: Verify, record and close informal processes Refine informal processes — step 9 of 10 in DMS094 SME Informal Process Digitization.	Process Excellence Manager Change	Change made: Digitized processes updated: BIM model clash not resolved. Reason: Decision of the management review Documents or records updated: Configure informal processes
MP-155.10	Document informal processes lessons Task: Verify, record and close informal processes Document informal processes lessons — step 10 of 10 in DMS094 SME Informal Process Digitization.	Process Excellence Manager Document	Document template: TPL-PROC — Procedure Document reference: NV-AEC-QMS-DMS094-10 Version: 2.0 Content summary: Digitized processes for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-PROC-01 — Procedure — Context To Strategy

MP-155.1 — Identify informal processes · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Digitized processes	Output	Affects Digitized processes; followed by Process Excellence Manager.	High	Customer complaint log, May 2026
2	Documentation	Output	Affects Documentation; followed by Process Excellence Manager.	Medium	Internal audit report, May 2026
3	Training records	Output	Affects Digitized processes; followed by Process Excellence Manager.	Medium	Process performance dashboard, May 2026

MP-155.4 — Identify informal processes improvements · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Digitize steel-frame buildings records to cut cycle time	Opportunity	Affects Digitized processes; followed by Process Excellence Manager.	High	Interview with the process owner, Apr 2026
2	Extend certification to win steel-frame buildings tenders	Opportunity	Affects Documentation; followed by Process Excellence Manager.	Medium	Regulatory watch bulletin, Apr 2026
3	Supplier development programme for steel-frame buildings	Opportunity	Affects Digitized processes; followed by Process Excellence Manager.	Medium	Supplier evaluation file, Apr 2026

MP-155.5 — Design informal processes digital · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Configure informal processes	Nabil Zerouali	2026-06-12	2026-06-26	Digitized processes
2	Train staff on informal processes	Nabil Zerouali	2026-06-17	2026-07-06	Documentation

#	Activity	Owner	Start	Due date	Deliverable
3	Monitor informal processes adoption	Nabil Zerouali	2026-06-22	2026-07-16	Digitized processes

MP-155.6 — Configure informal processes · Settings

#	Setting	Value	Reason
1	Configure informal processes	Enabled for site execution and prefabrication yard	Needed to produce Digitized processes
2	Owner and notification	Process Excellence Manager	Alerts go to the process owner

MP-155.8 — Monitor informal processes adoption · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Digitized processes); it is the KPI its owner reviews at each Monthly review.	87	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Digitized processes); it is the KPI its owner reviews at each Monthly review.	96.6	>= 95%

This phase has no gate for the project track; it closes when its last step is completed.

E2E-09 — Verification To Preparedness

Goals: Detect, contain, resolve, capitalize nonconformities and problems

From trigger to terminal event: Nonconformity detected, incident reported, or problem identified
→ Problem resolved; REX capitalized; KB updated

UMS011 (MP-018) — Problem Capture and Definition

Capture NCs; define criticality; analyze 5W2H; classify and approve. Owner: Quality Manager. Tier 1. Requirements answered: ISO 9001 §10.2.1.

Documents of this macro process: NV-AEC-QMS-NCO (Nonconforming outputs register).

Step	Step, task and purpose	Role · form	What to type
MP-018.1	Create quality problem record Task: Plan and prepare quality problem Create quality problem record — step 1 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Execution	What was done: Create quality problem record carried out on site execution and prefabrication yard; NC record updated. Records that prove it: NV-AEC-QMS-NCO — Nonconforming outputs register; NCO-01 — weld not conforming to EN 1090; NCO-02 — BIM model clash not resolved Completion (%): 100
MP-018.2	Enter quality problem data Task: Plan and prepare quality problem Enter quality problem data — step 2 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Execution	What was done: Enter quality problem data carried out on site execution and prefabrication yard; NC record updated. Records that prove it: NV-AEC-QMS-NCO — Nonconforming outputs register; NCO-01 — weld not conforming to EN 1090; NCO-02 — BIM model clash not resolved Completion (%): 100
MP-018.3	Define quality problem criticality Task: Plan and prepare quality problem Define quality problem criticality — step 3 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Register items	Items identified: 3 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
MP-018.4	Designate quality problem team Task: Plan and prepare quality problem Designate quality problem team — step 4 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-018.5	Submit quality problem Task: Execute quality problem activities Submit quality problem — step 5 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Execution	What was done: Submit quality problem carried out on site execution and prefabrication yard; NC record updated. Records that prove it: NV-AEC-QMS-NCO — Nonconforming outputs register; NCO-01 — weld not conforming to EN 1090; NCO-02 — BIM model clash not resolved; Submit quality problem Completion (%): 100
MP-018.6	Analyze quality problem 5W2H Task: Execute quality problem activities Analyze quality problem 5W2H — step 6 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.3 Conclusion: Weighted score 4.3/5. Main gap: Structural failure. Action recorded in the action plan.
MP-018.7	Quantify quality problem gap Task: Execute quality problem activities Quantify quality problem gap — step 7 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.4 Conclusion: Weighted score 4.4/5. Main gap: BIM data loss. Action recorded in the action plan.
MP-018.8	Identify quality problem standards Task: Execute quality problem activities Identify quality problem standards — step 8 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Register items	Items identified: 4 rows — see the table below
MP-018.9	Classify quality problem polarity Task: Verify, record and close quality problem Classify quality problem polarity — step 9 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.5 Conclusion: Weighted score 4.5/5. Main gap: BIM data loss. Action recorded in the action plan.
MP-018.10	Review quality problem Task: Verify, record and close quality problem Review quality problem — step 10 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Review	Review frequency: Quarterly Review date: 2026-06-19 Next review: 2026-09-18 Chaired by: Quality Manager Participants: Quality Manager, IMS Manager Inputs reviewed: 3 rows — see the table below Decisions and actions: 1 row — see the table below On completion: rows become actions.
MP-018.11	Approve quality problem Task: Verify, record and close quality problem Approve quality problem — step 11 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Quality Manager Decision comment and conditions: NC record approved against ISO 9001; no blocking point.
MP-018.12	Transmit quality problem Task: Verify, record and close quality problem Transmit quality problem — step 12 of 12 in UMS011 Problem Capture and Definition.	Quality Manager Communication	Communication records: 2 rows — see the table below

MP-018.3 — Define quality problem criticality · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	NC record	Output	Affects NC record; followed by Quality Manager.	High	Process performance dashboard, May 2026
2	Problem definition	Output	Affects Problem definition; followed by Quality Manager.	Medium	Interview with the process owner, Apr 2026
3	Priority classification	Output	Affects NC record; followed by Quality Manager.	Medium	Regulatory watch bulletin, Apr 2026

MP-018.4 — Designate quality problem team · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Submit quality problem	Nadia Chraibi	2026-06-14	2026-06-28	NC record

4	Results against target	20	5	KPI Q-KPI-01 used as the measure.

MP-019.6 — Confirm or escalate · Decision criteria checked

#	Criterion	Met	Evidence
1	Containment records complete	Yes	Containment records v1.0
2	Requirements of ISO 9001 §8.7, §10.2.1 a) met	Yes	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

UMS013 (MP-020) — Root Cause Resolution

Select RCA method; conduct workshop; validate causes; define corrective actions. Owner: Quality Manager.
Tier 1. Requirements answered: ISO 9001 §10.2.1 b).

Documents of this macro process: NV-AEC-QMS-CAPA-002 (Corrective action report (8D) — NC-NV-AEC-QMS-002); NV-AEC-QMS-CAPA-003 (Corrective action report (8D) — NC-NV-AEC-QMS-003).

Step	Step, task and purpose	Role · form	What to type
MP-020.1	Select root cause analysis method Task: Plan and prepare root cause analysis Select root cause analysis method — step 1 of 9 in UMS013 Root Cause Resolution.	Quality Manager Register items	Items identified: 3 rows — see the table below
MP-020.2	Define root cause analysis scope Task: Plan and prepare root cause analysis Define root cause analysis scope — step 2 of 9 in UMS013 Root Cause Resolution.	Quality Manager Register items	Items identified: 3 rows — see the table below
MP-020.3	Conduct root cause analysis workshop Task: Plan and prepare root cause analysis Conduct root cause analysis workshop — step 3 of 9 in UMS013 Root Cause Resolution.	Quality Manager Execution	What was done: Conduct root cause analysis workshop carried out on site execution and prefabrication yard; RCA report updated. Records that prove it: NV-AEC-QMS-CAPA-002 — Corrective action report (8D) — NC-NV-AEC-QMS-002; 8D-02 — BIM model clash not resolved; 8D-03 — concrete cover below spec Completion (%): 100
MP-020.4	Build root cause analysis diagram Task: Execute root cause analysis activities Build root cause analysis diagram — step 4 of 9 in UMS013 Root Cause Resolution.	Quality Manager Execution	What was done: Build root cause analysis diagram carried out on site execution and prefabrication yard; RCA report updated. Records that prove it: NV-AEC-QMS-CAPA-002 — Corrective action report (8D) — NC-NV-AEC-QMS-002; 8D-02 — BIM model clash not resolved; 8D-03 — concrete cover below spec Completion (%): 100
MP-020.5	Validate root cause analysis Task: Execute root cause analysis activities Validate root cause analysis — step 5 of 9 in UMS013 Root Cause Resolution.	Quality Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Hold Approver (Accountable): Quality Manager Decision comment and conditions: Hold until Root cause analysis is complete; review in two weeks.
MP-020.6	Link root cause analysis to standards Task: Execute root cause analysis activities Link root cause analysis to standards — step 6 of 9 in UMS013 Root Cause Resolution.	Quality Manager Execution	What was done: Link root cause analysis to standards carried out on site execution and prefabrication yard; RCA report updated. Records that prove it: NV-AEC-QMS-CAPA-002 — Corrective action report (8D) — NC-NV-AEC-QMS-002; 8D-02 — BIM model clash not resolved; 8D-03 — concrete cover below spec Completion (%): 100

Step	Step, task and purpose	Role · form	What to type
MP-020.7	Define root cause analysis corrective Task: Verify, record and close root cause analysis Define root cause analysis corrective — step 7 of 9 in UMS013 Root Cause Resolution.	Quality Manager Register items	Items identified: 3 rows — see the table below
MP-020.8	Assign RACSI roles for root cause analysis Task: Verify, record and close root cause analysis Assign RACSI roles for root cause analysis — step 8 of 9 in UMS013 Root Cause Resolution.	Quality Manager Assignment	Role: Quality Manager Person (from the OBS): Nadia Chraibi Organization units covered: Quality RACSI of the macro process: R: Quality Manager · A: IMS Manager · C: Risk Manager · S: Document Controller · I: Top Management
MP-020.9	Validate root cause analysis plan Task: Verify, record and close root cause analysis Validate root cause analysis plan — step 9 of 9 in UMS013 Root Cause Resolution.	Quality Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Quality Manager Decision comment and conditions: RCA report approved against ISO 9001; no blocking point.

MP-020.1 — Select root cause analysis method · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	RCA report	Output	Affects RCA report; followed by Quality Manager.	High	Customer complaint log, Jun 2026
2	Root cause analysis	Output	Affects Root cause analysis; followed by Quality Manager.	Medium	Internal audit report, May 2026
3	Corrective action plan	Output	Affects RCA report; followed by Quality Manager.	Medium	Process performance dashboard, May 2026

MP-020.2 — Define root cause analysis scope · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	RCA report	Output	Affects RCA report; followed by Quality Manager.	High	Internal audit report, May 2026
2	Root cause analysis	Output	Affects Root cause analysis; followed by Quality Manager.	Medium	Process performance dashboard, May 2026
3	Corrective action plan	Output	Affects RCA report; followed by Quality Manager.	Medium	Interview with the process owner, May 2026

MP-020.5 — Validate root cause analysis · Decision criteria checked

#	Criterion	Met	Evidence
1	RCA report complete	Yes	RCA report v1.0
2	Requirements of ISO 9001 §10.2.1 b) met	Partly	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

MP-020.7 — Define root cause analysis corrective · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	RCA report	Output	Affects RCA report; followed by Quality Manager.	High	Management review minutes, Apr 2026
2	Root cause analysis	Output	Affects Root cause analysis; followed by Quality Manager.	Medium	Customer complaint log, Apr 2026

#	Item	Category	Description and impact	Relevance	Source / evidence
3	Corrective action plan	Output	Affects RCA report; followed by Quality Manager.	Medium	Internal audit report, Mar 2026

MP-020.9 — Validate root cause analysis plan · Decision criteria checked

#	Criterion	Met	Evidence
1	RCA report complete	Yes	RCA report v1.0
2	Requirements of ISO 9001 §10.2.1 b) met	Yes	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

UMS014 (MP-021) — Corrective Action Execution and Follow-Up

Assign corrective actions; execute and document; confirm effectiveness; close. Owner: Quality Manager. Tier 1. Requirements answered: ISO 9001 §10.2.1 c)–d).

Documents of this macro process: NV-AEC-QMS-NC (Nonconformity and corrective action register).

Step	Step, task and purpose	Role · form	What to type
MP-021.1	Assign corrective actions Task: Plan and prepare corrective actions Assign corrective actions — step 1 of 7 in UMS014 Corrective Action Execution and Follow-Up.	Quality Manager Assignment	Role: Quality Manager Person (from the OBS): Nadia Chraibi Organization units covered: Quality RACSI of the macro process: R: Quality Manager · A: IMS Manager · C: Risk Manager · S: Document Controller · I: Top Management
MP-021.2	Execute corrective actions activities Task: Plan and prepare corrective actions Execute corrective actions activities — step 2 of 7 in UMS014 Corrective Action Execution and Follow-Up.	Quality Manager Execution	What was done: Execute corrective actions activities carried out on site execution and prefabrication yard; Corrective records updated. Records that prove it: NV-AEC-QMS-NC — Nonconformity and corrective action register; Eliminate root cause: weld not conforming to EN 1090 Completion (%): 100
MP-021.3	Document the process control plan Task: Plan and prepare corrective actions Document the process control plan — step 3 of 7 in UMS014 Corrective Action Execution and Follow-Up.	Quality Manager Document	Document template: TPL-NC — Nonconformity and corrective action register Document reference: NV-AEC-QMS-UMS014-03 Version: 1.0 Content summary: Corrective records for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-NC — Nonconformity and corrective action register
MP-021.4	Evaluate corrective actions Task: Execute corrective actions activities Evaluate corrective actions — step 4 of 7 in UMS014 Corrective Action Execution and Follow-Up.	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4 Conclusion: Weighted score 4/5. Main gap: weld not conforming to EN 1090. Action recorded in the action plan.
MP-021.5	Confirm corrective actions Task: Execute corrective actions activities Confirm corrective actions — step 5 of 7 in UMS014 Corrective Action Execution and Follow-Up.	Quality Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Quality Manager Decision comment and conditions: Corrective records approved against ISO 9001; no blocking point.
MP-021.6	Escalate if needed Task: Verify, record and close corrective actions Escalate if needed — step 6 of 7 in UMS014 Corrective Action Execution and Follow-Up.	Quality Manager Escalation	Escalated to: Top Management Reason: Corrective records is late beyond tolerance; a decision on resources is needed.

Step	Step, task and purpose	Role · form	What to type
MP-021.7	Close the corrective actions cycle Task: Verify, record and close corrective actions Close the corrective actions cycle — step 7 of 7 in UMS014 Corrective Action Execution and Follow-Up.	Quality Manager Closure	Closure evidence: Corrective records closed; effectiveness verified on the KPI and evidence filed. Records that prove effectiveness: NV-AEC-QMS-NC — Nonconformity and corrective action register; Eliminate root cause: weld not conforming to EN 1090 Closure date: 2026-06-30

MP-021.4 — Evaluate corrective actions · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Corrective records complete and up to date	30	3	Corrective records reviewed on 2026-06-24; 2 gaps corrected.
2	Requirements of ISO 9001 §10.2.1 c)–d) met	30	5	Checked against ISO 9001 §10.2.1 c)–d) with the checklist of the phase gate.
3	Evidence available for Execution evidence	20	4	Records filed in the project: Execution evidence.
4	Results against target	20	4	KPI KPI-18 used as the measure.

MP-021.5 — Confirm corrective actions · Decision criteria checked

#	Criterion	Met	Evidence
1	Corrective records complete	Yes	Corrective records v1.0
2	Requirements of ISO 9001 §10.2.1 c)–d) met	Yes	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

UMS015 (MP-022) — Nonconformity Capitalization and Closure

Plan REX; document lessons; identify standardization; update KB. Owner: Quality Manager. Tier 1. Requirements answered: ISO 9001 §10.2.2.

Step	Step, task and purpose	Role · form	What to type
MP-022.1	Plan nonconformity closure REX Task: Plan and prepare nonconformity closure Plan nonconformity closure REX — step 1 of 8 in UMS015 Nonconformity Capitalization and Closure.	Quality Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-022.2	Document nonconformity closure lessons Task: Plan and prepare nonconformity closure Document nonconformity closure lessons — step 2 of 8 in UMS015 Nonconformity Capitalization and Closure.	Quality Manager Document	Document template: TPL-PROC — Procedure Document reference: NV-AEC-QMS-UMS015-02 Version: 2.0 Content summary: REX report for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-PROC-01 — Procedure — Context To Strategy
MP-022.3	Identify nonconformity closure standardization Task: Plan and prepare nonconformity closure Identify nonconformity closure standardization — step 3 of 8 in UMS015 Nonconformity Capitalization and Closure.	Quality Manager Register items	Items identified: 4 rows — see the table below
MP-022.4	Review nonconformity closure effectiveness Task: Execute nonconformity closure	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.7 Conclusion: Weighted score 3.7/5. Main gap: weld not

Step	Step, task and purpose	Role · form	What to type
	activities Review nonconformity closure effectiveness — step 4 of 8 in UMS015 Nonconformity Capitalization and Closure.		conforming to EN 1090. Action recorded in the action plan.
MP-022.5	Validate nonconformity closure sustainability Task: Execute nonconformity closure activities Validate nonconformity closure sustainability — step 5 of 8 in UMS015 Nonconformity Capitalization and Closure.	Quality Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Quality Manager Decision comment and conditions: REX report approved against ISO 9001; no blocking point.
MP-022.6	Plan nonconformity closure generalization Task: Execute nonconformity closure activities Plan nonconformity closure generalization — step 6 of 8 in UMS015 Nonconformity Capitalization and Closure.	Quality Manager Plan	Planned activities (become actions): 2 rows — see the table below On completion: rows become actions.
MP-022.7	Update nonconformity closure knowledge base Task: Verify, record and close nonconformity closure Update nonconformity closure knowledge base — step 7 of 8 in UMS015 Nonconformity Capitalization and Closure.	Quality Manager Change	Change made: REX report updated: Structural failure. Reason: Change in regulation Documents or records updated: Document nonconformity closure lessons
MP-022.8	Close the nonconformity closure cycle Task: Verify, record and close nonconformity closure Close the nonconformity closure cycle — step 8 of 8 in UMS015 Nonconformity Capitalization and Closure.	Quality Manager Closure	Closure evidence: REX report closed; effectiveness verified on the KPI and evidence filed. Records that prove effectiveness: Document nonconformity closure lessons Closure date: 2026-07-02

MP-022.1 — Plan nonconformity closure REX · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Document nonconformity closure lessons	Nadia Chraibi	2026-06-30	2026-07-14	REX report
2	Identify nonconformity closure standardization	Nadia Chraibi	2026-07-05	2026-07-24	Lessons register
3	Review nonconformity closure effectiveness	Nadia Chraibi	2026-07-10	2026-08-03	REX report

MP-022.3 — Identify nonconformity closure standardization · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	ISO 9001	Requirement	Affects REX report; followed by Quality Manager.	High	Process performance dashboard, May 2026
2	ISO 19650	Requirement	Affects Lessons register; followed by Quality Manager.	Medium	Interview with the process owner, May 2026
3	EN 1090	Requirement	Affects REX report; followed by Quality Manager.	Medium	Regulatory watch bulletin, May 2026
4	CE Marking (CPR)	Requirement	Affects Lessons register; followed by Quality Manager.	Low	Supplier evaluation file, May 2026

MP-022.4 — Review nonconformity closure effectiveness · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	REX report complete and up to date	30	3	REX report reviewed on 2026-06-26; 2 gaps corrected.
2	Requirements of ISO 9001 §10.2.2 met	30	4	Checked against ISO 9001 §10.2.2 with the checklist of the phase gate.
3	Evidence available for Lessons register	20	3	Records filed in the project: Lessons register.
4	Results against target	20	5	KPI KPI-19 used as the measure.

MP-022.5 — Validate nonconformity closure sustainability · Decision criteria checked

#	Criterion	Met	Evidence
1	REX report complete	Yes	REX report v1.0
2	Requirements of ISO 9001 §10.2.2 met	Yes	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

MP-022.6 — Plan nonconformity closure generalization · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Update nonconformity closure knowledge base	Nadia Chraibi	2026-07-01	2026-07-15	REX report
2	Close the nonconformity closure cycle	Nadia Chraibi	2026-07-06	2026-07-25	Lessons register

DMS021 (MP-082) — NCP Knowledge Base and RAG Management

Build/maintain vector KB; semantic search; RAG; multi-language; RBAC-aware. Owner: Quality Manager. Tier 4.

Step	Step, task and purpose	Role · form	What to type
MP-082.1	Define NCP knowledge base schema Task: Plan and prepare NCP knowledge base Define NCP knowledge base schema — step 1 of 10 in DMS021 NCP Knowledge Base and RAG Management.	Quality Manager Register items	Items identified: 3 rows — see the table below
MP-082.2	Ingest NCP knowledge base data Task: Plan and prepare NCP knowledge base Ingest NCP knowledge base data — step 2 of 10 in DMS021 NCP Knowledge Base and RAG Management.	DynamicMS Engine Automated service task	System result confirmed: Ingest NCP knowledge base data: done by the DynamicMS Engine; Vector KB available in the project. Records produced: —
MP-082.3	Generate NCP knowledge base embeddings Task: Plan and prepare NCP knowledge base Generate NCP knowledge base embeddings — step 3 of 10 in DMS021 NCP Knowledge Base and RAG Management.	Quality Manager AI-assisted draft	Context given to the assistant: Step: Generate NCP knowledge base embeddings. Inputs: Closed NCP fiches; REX entries; Standards library. Standards: ISO 9001, ISO 19650, EN 1090. Organization: Nova Build & Construct (steel-frame buildings). Suggestion outcome: Accepted Final validated text: Vector KB drafted with the assistant and reviewed by Quality Manager: covers ISO 9001, ISO 19650.
MP-082.4	Index into vector DB Task: Plan and prepare NCP knowledge base	DynamicMS Engine Automated service task	System result confirmed: Index into vector DB: done by the DynamicMS Engine; Vector KB available in the project. Records produced: —

Step	Step, task and purpose	Role · form	What to type
	Index into vector DB — step 4 of 10 in DMS021 NCP Knowledge Base and RAG Management.		
MP-082.5	Configure NCP knowledge base RAG Task: Execute NCP knowledge base activities Configure NCP knowledge base RAG — step 5 of 10 in DMS021 NCP Knowledge Base and RAG Management.	Quality Manager AI-assisted draft	Context given to the assistant: Step: Configure NCP knowledge base RAG. Inputs: Closed NCP fiches; REX entries; Standards library. Standards: ISO 9001, ISO 19650, EN 1090. Organization: Nova Build & Construct (steel-frame buildings). Suggestion outcome: Edited Final validated text: Vector KB drafted with the assistant and reviewed by Quality Manager: covers ISO 9001, ISO 19650.
MP-082.6	Retrieve knowledge within access rights Task: Execute NCP knowledge base activities Retrieve knowledge within access rights — step 6 of 10 in DMS021 NCP Knowledge Base and RAG Management.	Quality Manager Execution	What was done: Retrieve knowledge within access rights carried out on site execution and prefabrication yard; Vector KB updated. Records that prove it: — Completion (%): 100
MP-082.7	Translate knowledge articles (EN/FR/AR) Task: Execute NCP knowledge base activities Translate knowledge articles (EN/FR/AR) — step 7 of 10 in DMS021 NCP Knowledge Base and RAG Management.	Quality Manager Execution	What was done: Translate knowledge articles (EN/FR/AR) carried out on site execution and prefabrication yard; Vector KB updated. Records that prove it: — Completion (%): 100
MP-082.8	Monitor NCP knowledge base quality Task: Verify, record and close NCP knowledge base Monitor NCP knowledge base quality — step 8 of 10 in DMS021 NCP Knowledge Base and RAG Management.	Quality Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-082.9	Update NCP knowledge base on closure Task: Verify, record and close NCP knowledge base Update NCP knowledge base on closure — step 9 of 10 in DMS021 NCP Knowledge Base and RAG Management.	Quality Manager Change	Change made: Vector KB updated: BIM model clash not resolved. Reason: Decision of the management review Documents or records updated: —
MP-082.10	Report on NCP knowledge base status Task: Verify, record and close NCP knowledge base Report on NCP knowledge base status — step 10 of 10 in DMS021 NCP Knowledge Base and RAG Management.	Quality Manager Communication	Communication records: 2 rows — see the table below

MP-082.1 — Define NCP knowledge base schema · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Vector KB	Output	Affects Vector KB; followed by Quality Manager.	High	Customer complaint log, Jun 2026
2	RAG index	Output	Affects RAG index; followed by Quality Manager.	Medium	Internal audit report, Jun 2026
3	Search results	Output	Affects Vector KB; followed by Quality Manager.	Medium	Process performance dashboard, Jun 2026

MP-082.8 — Monitor NCP knowledge base quality · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Vector KB); it is the KPI its owner reviews at each Monthly review.	87	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Vector KB); it is the KPI its owner reviews at each Monthly review.	96.6	>= 95%

MP-082.10 — Report on NCP knowledge base status · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	AI agents	Intranet	2026-07-09	Vector KB: what changes for you and what to do by 2026-07-23.	Quality Manager
2	NCP teams	Notice board	2026-07-11	RAG index: what changes for you and what to do by 2026-07-23.	Quality Manager

DMS022 (MP-083) — AI Agent Orchestration for Problem Solving

Coordinate 8 AI agents; manage state machine; ensure RBAC; log with confidence. Owner: Quality Manager. Tier 4.

Step	Step, task and purpose	Role · form	What to type
MP-083.1	Initialize AI problem-solving agents Orchestrator Task: Plan and prepare AI problem-solving agents Initialize AI problem-solving agents Orchestrator — step 1 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	Quality Manager Execution	What was done: Initialize AI problem-solving agents Orchestrator carried out on site execution and prefabrication yard; AI classifications updated. Records that prove it: — Completion (%): 100
MP-083.2	Trigger Classification at E1 Task: Plan and prepare AI problem-solving agents Trigger Classification at E1 — step 2 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	Quality Manager Execution	What was done: Trigger Classification at E1 carried out on site execution and prefabrication yard; AI classifications updated. Records that prove it: — Completion (%): 100
MP-083.3	Trigger Structuring at E2 Task: Plan and prepare AI problem-solving agents Trigger Structuring at E2 — step 3 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	Quality Manager Execution	What was done: Trigger Structuring at E2 carried out on site execution and prefabrication yard; AI classifications updated. Records that prove it: — Completion (%): 100
MP-083.4	Trigger Containment at E3 Task: Plan and prepare AI problem-solving agents Trigger Containment at E3 — step 4 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	Quality Manager Execution	What was done: Trigger Containment at E3 carried out on site execution and prefabrication yard; AI classifications updated. Records that prove it: — Completion (%): 100
MP-083.5	Trigger RCA at E4 Task: Execute AI problem-solving agents activities Trigger RCA at E4 — step 5 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	Quality Manager Execution	What was done: Trigger RCA at E4 carried out on site execution and prefabrication yard; AI classifications updated. Records that prove it: — Completion (%): 100
MP-083.6	Trigger Action Rec. at E5 Task: Execute AI problem-solving agents activities Trigger Action Rec. at E5 — step 6 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	Quality Manager Execution	What was done: Trigger Action Rec. at E5 carried out on site execution and prefabrication yard; AI classifications updated. Records that prove it: — Completion (%): 100

Step	Step, task and purpose	Role · form	What to type
MP-083.7	Trigger Monitoring at E6 Task: Execute AI problem-solving agents activities Trigger Monitoring at E6 — step 7 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	Quality Manager Execution	What was done: Trigger Monitoring at E6 carried out on site execution and prefabrication yard; AI classifications updated. Records that prove it: — Completion (%): 100
MP-083.8	Trigger REX at E7 Task: Verify, record and close AI problem-solving agents Trigger REX at E7 — step 8 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	Quality Manager Execution	What was done: Trigger REX at E7 carried out on site execution and prefabrication yard; AI classifications updated. Records that prove it: — Completion (%): 100
MP-083.9	Manage AI problem-solving agents transitions Task: Verify, record and close AI problem-solving agents Manage AI problem-solving agents transitions — step 9 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	Quality Manager Execution	What was done: Manage AI problem-solving agents transitions carried out on site execution and prefabrication yard; AI classifications updated. Records that prove it: — Completion (%): 100
MP-083.10	Log agent answers with confidence score Task: Verify, record and close AI problem-solving agents Log agent answers with confidence score — step 10 of 10 in DMS022 AI Agent Orchestration for Problem Solving.	DynamicMS Engine Automated service task	System result confirmed: Log agent answers with confidence score: done by the DynamicMS Engine; AI classifications available in the project. Records produced: —

DMS023 (MP-084) — Smart Alert and Escalation Engine

Trigger 10 alert types (A–J); deliver; escalate; configurable per tenant. Owner: Performance Manager. Tier 4.

Step	Step, task and purpose	Role · form	What to type
MP-084.1	Configure alert engine A–J Task: Plan and prepare alert engine Configure alert engine A–J — step 1 of 11 in DMS023 Smart Alert and Escalation Engine.	Performance Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-084.2	Send alert A for high-priority problems Task: Plan and prepare alert engine Send alert A for high-priority problems — step 2 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Send alert A for high-priority problems: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —
MP-084.3	Send alert B for overdue actions Task: Plan and prepare alert engine Send alert B for overdue actions — step 3 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Send alert B for overdue actions: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —
MP-084.4	Send alert C for pending evaluations Task: Plan and prepare alert engine Send alert C for pending evaluations — step 4 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Send alert C for pending evaluations: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —
MP-084.5	Send alert D for delayed root cause analyses Task: Execute alert engine activities Send alert D for delayed root cause analyses — step 5 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Send alert D for delayed root cause analyses: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —

Step	Step, task and purpose	Role · form	What to type
MP-084.6	Send alert E for lessons to capitalize Task: Execute alert engine activities Send alert E for lessons to capitalize — step 6 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Send alert E for lessons to capitalize: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —
MP-084.7	Send alert F for KPI breaches Task: Execute alert engine activities Send alert F for KPI breaches — step 7 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Send alert F for KPI breaches: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —
MP-084.8	Send reminders G–I one and two days before due dates Task: Execute alert engine activities Send reminders G–I one and two days before due dates — step 8 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Send reminders G–I one and two days before due dates: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —
MP-084.9	Send alert J for inactive records Task: Verify, record and close alert engine Send alert J for inactive records — step 9 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Send alert J for inactive records: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —
MP-084.10	Escalate after 24h Task: Verify, record and close alert engine Escalate after 24h — step 10 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Escalate after 24h: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —
MP-084.11	Log alert dispatches and acknowledgements Task: Verify, record and close alert engine Log alert dispatches and acknowledgements — step 11 of 11 in DMS023 Smart Alert and Escalation Engine.	DynamicMS Engine Automated service task	System result confirmed: Log alert dispatches and acknowledgements: done by the DynamicMS Engine; In-app notifications available in the project. Records produced: —

MP-084.1 — Configure alert engine A–J · Settings

#	Setting	Value	Reason
1	Configure alert engine A–J	Enabled for site execution and prefabrication yard	Needed to produce In-app notifications
2	Owner and notification	Performance Manager	Alerts go to the process owner

DMS026 (MP-087) — REX Capitalization and Generalization

Document lessons; identify standardization (V1); generalization (V2); update KB. Owner: Quality Manager. Tier 4.

Step	Step, task and purpose	Role · form	What to type
MP-087.1	Plan lessons learned (REX) workshop Task: Plan and prepare lessons learned (REX) Plan lessons learned (REX) workshop — step 1 of 10 in DMS026 REX Capitalization and Generalization.	Quality Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-087.2	Document lessons learned with AI assistance	Quality Manager	Context given to the assistant: Step: Document lessons learned with AI assistance. Inputs: Closed fiches; Corrective

Step	Step, task and purpose	Role · form	What to type
	Task: Plan and prepare lessons learned (REX) Document lessons learned with AI assistance — step 2 of 10 in DMS026 REX Capitalization and Generalization.	AI-assisted draft	records; Effectiveness evals. Standards: ISO 9001, ISO 19650, EN 1090. Organization: Nova Build & Construct (steel-frame buildings). Suggestion outcome: Accepted Final validated text: REX narrative drafted with the assistant and reviewed by Quality Manager: covers ISO 9001, ISO 19650.
MP-087.3	Identify lessons learned (REX) standardization Task: Plan and prepare lessons learned (REX) Identify lessons learned (REX) standardization — step 3 of 10 in DMS026 REX Capitalization and Generalization.	Quality Manager Register items	Items identified: 4 rows — see the table below
MP-087.4	Identify lessons learned (REX) generalization Task: Plan and prepare lessons learned (REX) Identify lessons learned (REX) generalization — step 4 of 10 in DMS026 REX Capitalization and Generalization.	Quality Manager Register items	Items identified: 3 rows — see the table below
MP-087.5	Assign lessons learned (REX) responsible Task: Execute lessons learned (REX) activities Assign lessons learned (REX) responsible — step 5 of 10 in DMS026 REX Capitalization and Generalization.	Quality Manager Assignment	Role: Quality Manager Person (from the OBS): Nadia Chraibi Organization units covered: Quality RACSI of the macro process: R: Quality Manager · A: IMS Manager · C: Risk Manager · S: Document Controller · I: Top Management
MP-087.6	Set lessons learned (REX) deadlines Task: Execute lessons learned (REX) activities Set lessons learned (REX) deadlines — step 6 of 10 in DMS026 REX Capitalization and Generalization.	Quality Manager Execution	What was done: Set lessons learned (REX) deadlines carried out on site execution and prefabrication yard; REX narrative updated. Records that prove it: Document lessons learned with AI assistance Completion (%): 100
MP-087.7	Update lessons learned (REX) knowledge base Task: Execute lessons learned (REX) activities Update lessons learned (REX) knowledge base — step 7 of 10 in DMS026 REX Capitalization and Generalization.	Quality Manager Change	Change made: REX narrative updated: BIM model clash not resolved. Reason: Change in regulation Documents or records updated: Document lessons learned with AI assistance
MP-087.8	Update lessons learned (REX) procedures Task: Verify, record and close lessons learned (REX) Update lessons learned (REX) procedures — step 8 of 10 in DMS026 REX Capitalization and Generalization.	Quality Manager Change	Change made: REX narrative updated: Structural failure. Reason: Finding of the internal audit Documents or records updated: Document lessons learned with AI assistance
MP-087.9	Index lessons learned (REX) into RAG Task: Verify, record and close lessons learned (REX) Index lessons learned (REX) into RAG — step 9 of 10 in DMS026 REX Capitalization and Generalization.	Quality Manager AI-assisted draft	Context given to the assistant: Step: Index lessons learned (REX) into RAG. Inputs: Closed fiches; Corrective records; Effectiveness evals. Standards: ISO 9001, ISO 19650, EN 1090. Organization: Nova Build & Construct (steel-frame buildings). Suggestion outcome: Accepted Final validated text: REX narrative drafted with the assistant and reviewed by Quality Manager: covers ISO 9001, ISO 19650.
MP-087.10	Communicate lessons learned (REX) Task: Verify, record and close lessons learned (REX)	Quality Manager Communication	Communication records: 2 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	Communicate lessons learned (REX) — step 10 of 10 in DMS026 REX Capitalization and Generalization.		

MP-087.1 — Plan lessons learned (REX) workshop · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Document lessons learned with AI assistance	Nadia Chraibi	2026-07-21	2026-08-04	REX narrative

DMS097 (MP-158) — SME Simplified Nonconformity Management

Simplified NCP; reduce complexity; essential problem-solving. Owner: Quality Manager. Tier 7. Requirements answered: ISO 9001 §10.2.

Step	Step, task and purpose	Role · form	What to type
MP-158.1	Capture SME nonconformities Task: Plan and prepare SME nonconformities Capture SME nonconformities — step 1 of 10 in DMS097 SME Simplified Nonconformity Management.	Quality Manager Register items	Items identified: 3 rows — see the table below
MP-158.2	Assess SME nonconformities severity Task: Plan and prepare SME nonconformities Assess SME nonconformities severity — step 2 of 10 in DMS097 SME Simplified Nonconformity Management.	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4 Conclusion: Weighted score 4/5. Main gap: weld not conforming to EN 1090. Action recorded in the action plan.
MP-158.3	Take immediate action on the nonconformity Task: Plan and prepare SME nonconformities Take immediate action on the nonconformity — step 3 of 10 in DMS097 SME Simplified Nonconformity Management.	Quality Manager Execution	What was done: Take immediate action on the nonconformity carried out on site execution and prefabrication yard; NCP records updated. Records that prove it: — Completion (%): 100
MP-158.4	Perform a simple root cause analysis Task: Plan and prepare SME nonconformities Perform a simple root cause analysis — step 4 of 10 in DMS097 SME Simplified Nonconformity Management.	Quality Manager Execution	What was done: Perform a simple root cause analysis carried out on site execution and prefabrication yard; NCP records updated. Records that prove it: — Completion (%): 100
MP-158.5	Define the corrective action Task: Execute SME nonconformities activities Define the corrective action — step 5 of 10 in DMS097 SME Simplified Nonconformity Management.	Quality Manager Change	Change made: NCP records updated: Structural failure. Reason: Decision of the management review Documents or records updated: —
MP-158.6	Implement SME nonconformities Task: Execute SME nonconformities activities Implement SME nonconformities — step 6 of 10 in DMS097 SME Simplified Nonconformity Management.	Quality Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-158.7	Verify SME nonconformities Task: Execute SME nonconformities activities Verify SME nonconformities — step 7 of 10 in DMS097 SME Simplified Nonconformity Management.	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.7 Conclusion: Weighted score 3.7/5. Main gap: Structural failure. Action recorded in the action plan.
MP-158.8	Close the SME nonconformities cycle Task: Verify, record and close SME nonconformities Close the SME nonconformities cycle — step 8 of 10 in DMS097 SME Simplified Nonconformity Management.	Quality Manager Closure	Closure evidence: NCP records closed; effectiveness verified on the KPI and evidence filed. Records that prove effectiveness: — Closure date: 2026-08-02
MP-158.9	Document SME nonconformities lesson Task: Verify, record and close SME nonconformities Document SME nonconformities lesson — step 9 of 10 in DMS097 SME Simplified Nonconformity Management.	Quality Manager Document	Document template: TPL-PROC — Procedure Document reference: NV-AEC-QMS-DMS097-09 Version: 2.0 Content summary: NCP records for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-PROC-01 — Procedure — Context To Strategy
MP-158.10	Report on SME nonconformities status Task: Verify, record and close SME	Quality Manager Communication	Communication records: 2 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	nonconformities Report on SME nonconformities status — step 10 of 10 in DMS097 SME Simplified Nonconformity Management.		

MP-158.1 — Capture SME nonconformities · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	NCP records	Output	Affects NCP records; followed by Quality Manager.	High	Customer complaint log, Jul 2026
2	RCA reports	Output	Affects RCA reports; followed by Quality Manager.	Medium	Internal audit report, Jul 2026
3	Corrective records	Output	Affects NCP records; followed by Quality Manager.	Medium	Process performance dashboard, Jun 2026

MP-158.2 — Assess SME nonconformities severity · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	NCP records complete and up to date	30	5	NCP records reviewed on 2026-07-24; 2 gaps corrected.
2	Requirements of ISO 9001 §10.2 met	30	3	Checked against ISO 9001 §10.2 with the checklist of the phase gate.
3	Evidence available for RCA reports	20	5	Records filed in the project: RCA reports.
4	Results against target	20	3	KPI Q-KPI-01 used as the measure.

MP-158.6 — Implement SME nonconformities · Settings

#	Setting	Value	Reason
1	Implement SME nonconformities	Enabled for site execution and prefabrication yard	Needed to produce NCP records
2	Owner and notification	Quality Manager	Alerts go to the process owner

MP-158.7 — Verify SME nonconformities · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	NCP records complete and up to date	30	3	NCP records reviewed on 2026-07-23; 2 gaps corrected.
2	Requirements of ISO 9001 §10.2 met	30	4	Checked against ISO 9001 §10.2 with the checklist of the phase gate.
3	Evidence available for RCA reports	20	3	Records filed in the project: RCA reports.
4	Results against target	20	5	KPI Q-KPI-01 used as the measure.

MP-158.10 — Report on SME nonconformities status · Communication records

Gate — G9 — Problem solving effective

Exit criteria: Critical NCs contained within 24 h; corrective actions verified by an independent evaluator.

136. Open Lifecycle and select the phase card; the gate panel is on the right.
137. Tick “Containment within 24 h for critical NCs (mandatory, evidence required)”.
138. Tick “Root cause validated for major NCs (mandatory, evidence required)”.
139. Tick “Effectiveness verified by independent evaluator (mandatory, evidence required)”.
140. Sign in as Top Management (ceo@...) or the IMS Manager and select Go. For Hold or No-Go, type a comment explaining why.

E2E-10 — Monitoring To Evaluation

Goals: Monitor performance, evaluate results, steer the organization

From trigger to terminal event: Monitoring periodicity, performance deviation, or governance review → Performance evaluated; governance decisions made; improvements identified

UMS027 (MP-009) — Process Indicators and KPI Management

Define KPIs; align with objectives; set targets; automate and visualize. Owner: Performance Manager. Tier 1. Requirements answered: ISO 9001 §9.1.1.

Documents of this macro process: NV-AEC-QMS-KPI (KPI dashboard and measurement results).

Step	Step, task and purpose	Role · form	What to type
MP-009.1	Define process KPIs indicators Task: Plan and prepare process KPIs Define process KPIs indicators — step 1 of 11 in UMS027 Process Indicators and KPI Management.	Performance Manager Register items	Items identified: 4 rows — see the table below
MP-009.2	Align process KPIs with objectives Task: Plan and prepare process KPIs Align process KPIs with objectives — step 2 of 11 in UMS027 Process Indicators and KPI Management.	Performance Manager Execution	What was done: Align process KPIs with objectives carried out on site execution and prefabrication yard; KPI definitions updated. Records that prove it: NV-AEC-QMS-KPI — KPI dashboard and measurement results Completion (%): 100
MP-009.3	Set process KPIs targets Task: Plan and prepare process KPIs Set process KPIs targets — step 3 of 11 in UMS027 Process Indicators and KPI Management.	Performance Manager SMART objectives	Objectives (become entries of the objectives register): 4 rows — see the table below On completion: rows become objectives.
MP-009.4	Define process KPIs data sources Task: Execute process KPIs activities Define process KPIs data sources — step 4 of 11 in UMS027 Process Indicators and KPI Management.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-009.5	Establish process KPIs frequency Task: Execute process KPIs activities Establish process KPIs frequency — step 5 of 11 in UMS027 Process Indicators and KPI Management.	Performance Manager Periodicity	Frequency: Monthly Next due date: 2026-09-05 Review chaired by: Performance Manager Organization units in scope: Operations Review inputs and notes: Inputs for each review: Process objectives; Strategic objectives; Performance data. An early review is triggered by: Receipt or update of Process objectives, Strategic objectives from Process owners, Data analysts.
MP-009.6	Designate owners of process KPIs Task: Execute process KPIs activities	Performance Manager Plan	Planned activities (become actions): 3 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	Designate owners of process KPIs — step 6 of 11 in UMS027 Process Indicators and KPI Management.		On completion: rows become actions.
MP-009.7	Review process KPIs relevance Task: Verify, record and close process KPIs Review process KPIs relevance — step 7 of 11 in UMS027 Process Indicators and KPI Management.	Performance Manager Review	Review frequency: Quarterly Review date: 2026-08-05 Next review: 2026-11-04 Chaired by: Performance Manager Participants: Performance Manager, IMS Manager, Quality Manager Inputs reviewed: 3 rows — see the table below Decisions and actions: 1 row — see the table below On completion: rows become actions.
MP-009.8	Automate process KPIs Task: Verify, record and close process KPIs Automate process KPIs — step 8 of 11 in UMS027 Process Indicators and KPI Management.	DynamicMS Engine Automated service task	System result confirmed: Automate process KPIs: done by the DynamicMS Engine; KPI definitions available in the project. Records produced: NV-AEC-QMS-KPI — KPI dashboard and measurement results; Review process KPIs relevance
MP-009.9	Visualize process KPIs Task: Verify, record and close process KPIs Visualize process KPIs — step 9 of 11 in UMS027 Process Indicators and KPI Management.	Performance Manager Execution	What was done: Visualize process KPIs carried out on site execution and prefabrication yard; KPI definitions updated. Records that prove it: NV-AEC-QMS-KPI — KPI dashboard and measurement results; Review process KPIs relevance Completion (%): 100
MP-009.10	Set KPI measurement and analysis frequencies Task: Govern KPI Frequencies & RACSI Set KPI measurement and analysis frequencies — step 10 of 11 in UMS027 Process Indicators and KPI Management.	Performance Manager Execution	What was done: Set KPI measurement and analysis frequencies carried out on site execution and prefabrication yard; KPI definitions updated. Records that prove it: NV-AEC-QMS-KPI — KPI dashboard and measurement results; Review process KPIs relevance Completion (%): 100
MP-009.11	Assign KPI RACSI Task: Govern KPI Frequencies & RACSI Assign KPI RACSI — step 11 of 11 in UMS027 Process Indicators and KPI Management.	Performance Manager Assignment	Role: Performance Manager Person (from the OBS): Salma Kettani Organization units covered: Operations RACSI of the macro process: R: Performance Manager · A: IMS Manager · C: Risk Manager · S: Document Controller · I: Top Management

MP-009.1 — Define process KPIs indicators · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Customer satisfaction index	Indicator	Affects KPI definitions; followed by Performance Manager.	High	Customer complaint log, Jul 2026
2	On-time delivery rate	Indicator	Affects Dashboards; followed by Performance Manager.	Medium	Internal audit report, Jul 2026
3	First pass yield	Indicator	Affects KPI definitions; followed by Performance Manager.	Medium	Process performance dashboard, Jul 2026
4	Cost of poor quality	Indicator	Affects Dashboards; followed by Performance Manager.	Low	Interview with the process owner, Jun 2026

MP-009.3 — Set process KPIs targets · Objectives (become entries of the objectives register)

#	Specific objective	Measure (KPI)	Baseline	Achievable target	Relevant to (policy commitment)	Owner	Time-bound deadline	Resources
1	Raise customer satisfaction on steel-frame buildings	Q-KPI-01 — Customer satisfaction	78%	>= 85%	Satisfy customer requirements	Nadia Chraibi	2026-11-10	Quarterly survey; complaint

#	Specific objective	Measure (KPI)	Baseline	Achievable target	Relevant to (policy commitment)	Owner	Time-bound deadline	Resources
		index						review meeting
2	Deliver steel-frame buildings on time	Q-KPI-02 — On-time delivery rate	86%	>= 95%	On time, right first time	Julien Moreau	2026-08-12	Planning board; one extra technician in summer
3	Reduce the cost of poor quality	Q-KPI-04 — Cost of poor quality	4.1%	<= 2%	Continual improvement	Nadia Chraibi	2026-11-10	Rework tracking in the NC register
4	Close corrective actions on time	Q-KPI-05 — Corrective actions closed on time	70%	>= 90%	Continual improvement	Karim Tazi	2026-05-14	Weekly action review

MP-009.4 — Define process KPIs data sources · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	KPI definitions	Output	Affects KPI definitions; followed by Performance Manager.	High	Interview with the process owner, Jun 2026
2	Dashboards	Output	Affects Dashboards; followed by Performance Manager.	Medium	Regulatory watch bulletin, Jun 2026
3	Target tracking	Output	Affects KPI definitions; followed by Performance Manager.	Medium	Supplier evaluation file, Jun 2026

MP-009.6 — Designate owners of process KPIs · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Review process KPIs relevance	Salma Kettani	2026-08-05	2026-08-19	KPI definitions
2	Automate process KPIs	Salma Kettani	2026-08-10	2026-08-29	Dashboards
3	Visualize process KPIs	Salma Kettani	2026-08-15	2026-09-08	KPI definitions

MP-009.7 — Review process KPIs relevance · Inputs reviewed

#	Input	Finding
1	Process objectives	Process objectives still valid; minor updates made.
2	Strategic objectives	No major change since the last review.
3	Performance data	Gap found on Dashboards.

MP-009.7 — Review process KPIs relevance · Decisions and actions

#	Decision	Owner	Due date
1	Update Dashboards	Salma Kettani	2026-09-04

UMS028 (MP-010) — Process Alert and Escalation Thresholds

Define alert thresholds; set escalation levels; configure notifications; test. Owner: Performance Manager. Tier 1. Requirements answered: ISO 9001 §9.1.1.

Step	Step, task and purpose	Role · form	What to type
MP-010.1	Define alert and escalation thresholds Task: Plan and prepare alert and escalation thresholds Define alert and escalation thresholds — step 1 of 9 in UMS028 Process Alert and Escalation Thresholds.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-010.2	Set alert levels Task: Plan and prepare alert and escalation thresholds Set alert levels — step 2 of 9 in UMS028 Process Alert and Escalation Thresholds.	Performance Manager Execution	What was done: Set alert levels carried out on site execution and prefabrication yard; Alert thresholds updated. Records that prove it: — Completion (%): 100
MP-010.3	Configure alert and escalation thresholds triggers Task: Plan and prepare alert and escalation thresholds Configure alert and escalation thresholds triggers — step 3 of 9 in UMS028 Process Alert and Escalation Thresholds.	Performance Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-010.4	Designate alert and escalation thresholds recipients Task: Execute alert and escalation thresholds activities Designate alert and escalation thresholds recipients — step 4 of 9 in UMS028 Process Alert and Escalation Thresholds.	Performance Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-010.5	Define escalation paths Task: Execute alert and escalation thresholds activities Define escalation paths — step 5 of 9 in UMS028 Process Alert and Escalation Thresholds.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-010.6	Test alert and escalation thresholds Task: Execute alert and escalation thresholds activities Test alert and escalation thresholds — step 6 of 9 in UMS028 Process Alert and Escalation Thresholds.	Performance Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4 Conclusion: Weighted score 4/5. Main gap: weld not conforming to EN 1090. Action recorded in the action plan.
MP-010.7	Monitor alert and escalation thresholds Task: Verify, record and close alert and escalation thresholds Monitor alert and escalation thresholds — step 7 of 9 in UMS028 Process Alert and Escalation Thresholds.	Performance Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: stable, below target; action opened. Next analysis at the performance review.
MP-010.8	Adjust alert and escalation thresholds Task: Verify, record and close alert and escalation thresholds Adjust alert and escalation thresholds — step 8 of 9 in UMS028 Process Alert and Escalation Thresholds.	Performance Manager Change	Change made: Alert thresholds updated: Structural failure. Reason: Finding of the internal audit Documents or records updated: Define escalation paths
MP-010.9	Update alert and escalation thresholds Task: Verify, record and close alert and escalation thresholds Update alert and escalation thresholds — step 9 of 9 in UMS028 Process Alert and Escalation Thresholds.	Performance Manager Change	Change made: Alert thresholds updated: BIM model clash not resolved. Reason: Decision of the management review Documents or records updated: Define escalation paths

MP-010.1 — Define alert and escalation thresholds · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Alert thresholds	Output	Affects Alert thresholds; followed by Performance Manager.	High	Customer complaint log, Jul 2026
2	Escalation procedures	Output	Affects Escalation procedures; followed by Performance Manager.	Medium	Internal audit report, Jul 2026
3	Notification records	Output	Affects Alert thresholds; followed by Performance Manager.	Medium	Process performance dashboard, Jul 2026

MP-010.3 — Configure alert and escalation thresholds triggers · Settings

#	Setting	Value	Reason
1	Configure alert and escalation thresholds triggers	Enabled for site execution and prefabrication yard	Needed to produce Alert thresholds
2	Owner and notification	Performance Manager	Alerts go to the process owner

MP-010.4 — Designate alert and escalation thresholds recipients · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Define escalation paths	Salma Kettani	2026-08-09	2026-08-23	Alert thresholds
2	Test alert and escalation thresholds	Salma Kettani	2026-08-14	2026-09-02	Escalation procedures
3	Monitor alert and escalation thresholds	Salma Kettani	2026-08-19	2026-09-12	Alert thresholds

MP-010.5 — Define escalation paths · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Alert thresholds	Output	Affects Alert thresholds; followed by Performance Manager.	High	Regulatory watch bulletin, Jun 2026
2	Escalation procedures	Output	Affects Escalation procedures; followed by Performance Manager.	Medium	Supplier evaluation file, Jun 2026
3	Notification records	Output	Affects Alert thresholds; followed by Performance Manager.	Medium	Management review minutes, May 2026

MP-010.6 — Test alert and escalation thresholds · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Alert thresholds complete and up to date	30	4	Alert thresholds reviewed on 2026-08-06; 2 gaps corrected.
2	Requirements of ISO 9001 §9.1.1 met	30	4	Checked against ISO 9001 §9.1.1 with the checklist of the phase gate.
3	Evidence available for Escalation procedures	20	4	Records filed in the project: Escalation procedures.
4	Results against target	20	4	KPI Q-KPI-01 used as the measure.

MP-010.7 — Monitor alert and escalation thresholds · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Alert thresholds); it is the KPI its owner reviews at each Monthly review.	87	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Alert thresholds); it is the KPI its	96.6	>= 95%

#	KPI	Why this KPI for this step	Measured value	Target
		owner reviews at each Monthly review.		

UMS029 (MP-011) — Real-Time Dashboard and Process Steering

Provide real-time visibility; enable drill-down; control access; update. Owner: Performance Manager. Tier 1.
Requirements answered: ISO 9001 §9.1.3.

Step	Step, task and purpose	Role · form	What to type
MP-011.1	Identify process dashboard profiles Task: Plan and prepare process dashboard Identify process dashboard profiles — step 1 of 9 in UMS029 Real-Time Dashboard and Process Steering.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-011.2	Define process dashboard layout Task: Plan and prepare process dashboard Define process dashboard layout — step 2 of 9 in UMS029 Real-Time Dashboard and Process Steering.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-011.3	Aggregate process dashboard data Task: Plan and prepare process dashboard Aggregate process dashboard data — step 3 of 9 in UMS029 Real-Time Dashboard and Process Steering.	DynamicMS Engine Automated service task	System result confirmed: Aggregate process dashboard data: done by the DynamicMS Engine; Dashboards available in the project. Records produced: —
MP-011.4	Configure process dashboard widgets Task: Execute process dashboard activities Configure process dashboard widgets — step 4 of 9 in UMS029 Real-Time Dashboard and Process Steering.	Performance Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-011.5	Set up drill-down Task: Execute process dashboard activities Set up drill-down — step 5 of 9 in UMS029 Real-Time Dashboard and Process Steering.	Performance Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-011.6	Publish process dashboard Task: Execute process dashboard activities Publish process dashboard — step 6 of 9 in UMS029 Real-Time Dashboard and Process Steering.	Performance Manager Document	Document template: TPL-PROC — Procedure Document reference: NV-AEC-QMS-UMS029-06 Version: 2.0 Content summary: Dashboards for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-PROC-01 — Procedure — Context To Strategy
MP-011.7	Control process dashboard access Task: Verify, record and close process dashboard Control process dashboard access — step 7 of 9 in UMS029 Real-Time Dashboard and Process Steering.	Performance Manager Execution	What was done: Control process dashboard access carried out on site execution and prefabrication yard; Dashboards updated. Records that prove it: — Completion (%): 100

1	Dashboards	Output	Affects Dashboards; followed by Performance Manager.	High	Customer complaint log, Jul 2026
2	Drill-down reports	Output	Affects Drill-down reports; followed by Performance Manager.	Medium	Internal audit report, Jul 2026
3	Access records	Output	Affects Dashboards; followed by Performance Manager.	Medium	Process performance dashboard, Jul 2026

MP-011.2 — Define process dashboard layout · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Dashboards	Output	Affects Dashboards; followed by Performance Manager.	High	Internal audit report, Jul 2026
2	Drill-down reports	Output	Affects Drill-down reports; followed by Performance Manager.	Medium	Process performance dashboard, Jul 2026
3	Access records	Output	Affects Dashboards; followed by Performance Manager.	Medium	Interview with the process owner, Jun 2026

MP-011.4 — Configure process dashboard widgets · Settings

#	Setting	Value	Reason
1	Configure process dashboard widgets	Enabled for site execution and prefabrication yard	Needed to produce Dashboards
2	Owner and notification	Performance Manager	Alerts go to the process owner

MP-011.5 — Set up drill-down · Settings

#	Setting	Value	Reason
1	Set up drill-down	Enabled for site execution and prefabrication yard	Needed to produce Dashboards
2	Owner and notification	Performance Manager	Alerts go to the process owner

MP-011.8 — Gather process dashboard feedback · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Dashboards	Output	Affects Dashboards; followed by Performance Manager.	High	Customer complaint log, May 2026
2	Drill-down reports	Output	Affects Drill-down reports; followed by Performance Manager.	Medium	Internal audit report, May 2026
3	Access records	Output	Affects Dashboards; followed by Performance Manager.	Medium	Process performance dashboard, May 2026

UMS010 (MP-031) — Performance Indicator Consolidation and Reviews

Define indicators; collect real-time data; aggregate dashboards; analyze trends. Owner: Performance Manager.
Tier 1. Requirements answered: ISO 9001 §9.1.3.

Step	Step, task and purpose	Role · form	What to type
MP-031.1	Define performance indicators Task: Plan and prepare performance indicators Define performance indicators — step 1 of 9 in UMS010 Performance Indicator Consolidation and Reviews.	Performance Manager Register items	Items identified: 1 row — see the table below
MP-031.2	Establish performance indicators agenda Task: Plan and prepare performance indicators Establish performance indicators agenda — step 2 of 9 in UMS010 Performance Indicator Consolidation and Reviews.	Performance Manager Execution	What was done: Establish performance indicators agenda carried out on site execution and prefabrication yard; Dashboards updated. Records that prove it: — Completion (%): 100
MP-031.3	Collect performance indicators data Task: Plan and prepare performance indicators Collect performance indicators data — step 3 of 9 in UMS010 Performance Indicator Consolidation and Reviews.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-031.4	Aggregate performance indicators Task: Execute performance indicators activities Aggregate performance indicators — step 4 of 9 in UMS010 Performance Indicator Consolidation and Reviews.	DynamicMS Engine Automated service task	System result confirmed: Aggregate performance indicators: done by the DynamicMS Engine; Dashboards available in the project. Records produced: —
MP-031.5	Analyze performance indicators Task: Execute performance indicators activities Analyze performance indicators — step 5 of 9 in UMS010 Performance Indicator Consolidation and Reviews.	Performance Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.2 Conclusion: Weighted score 3.2/5. Main gap: Structural failure. Action recorded in the action plan.
MP-031.6	Identify performance indicators gaps Task: Execute performance indicators activities Identify performance indicators gaps — step 6 of 9 in UMS010 Performance Indicator Consolidation and Reviews.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-031.7	Generate performance indicators supports Task: Verify, record and close performance indicators Generate performance indicators supports — step 7 of 9 in UMS010 Performance Indicator Consolidation and Reviews.	Performance Manager Document	Document template: TPL-PROC — Procedure Document reference: NV-AEC-QMS-UMS010-07 Version: 1.1 Content summary: Dashboards for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-PROC-01 — Procedure — Context To Strategy
MP-031.8	Facilitate performance indicators reviews Task: Verify, record and close performance indicators Facilitate performance indicators reviews — step 8 of 9 in UMS010 Performance Indicator Consolidation and Reviews.	Performance Manager Execution	What was done: Facilitate performance indicators reviews carried out on site execution and prefabrication yard; Dashboards updated. Records that prove it: — Completion (%): 100
MP-031.9	Monitor performance indicators actions Task: Verify, record and close performance indicators	Performance Manager Measurement	Indicators measured: 1 row — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.

Step	Step, task and purpose	Role · form	What to type
	Monitor performance indicators actions — step 9 of 9 in UMS010 Performance Indicator Consolidation and Reviews.		

MP-031.1 — Define performance indicators · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	KPI analysis timeliness	Indicator	Affects Dashboards; followed by Performance Manager.	High	Customer complaint log, Jul 2026

MP-031.3 — Collect performance indicators data · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Dashboards	Output	Affects Dashboards; followed by Performance Manager.	High	Process performance dashboard, Jul 2026
2	Trend analysis	Output	Affects Trend analysis; followed by Performance Manager.	Medium	Interview with the process owner, Jul 2026
3	Gap reports	Output	Affects Dashboards; followed by Performance Manager.	Medium	Regulatory watch bulletin, Jun 2026

MP-031.5 — Analyze performance indicators · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Dashboards complete and up to date	30	3	Dashboards reviewed on 2026-08-11; 2 gaps corrected.
2	Requirements of ISO 9001 §9.1.3 met	30	3	Checked against ISO 9001 §9.1.3 with the checklist of the phase gate.
3	Evidence available for Trend analysis	20	4	Records filed in the project: Trend analysis.
4	Results against target	20	3	KPI KPI-20 used as the measure.

MP-031.6 — Identify performance indicators gaps · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Dashboards	Output	Affects Dashboards; followed by Performance Manager.	High	Supplier evaluation file, Jun 2026
2	Trend analysis	Output	Affects Trend analysis; followed by Performance Manager.	Medium	Management review minutes, Jun 2026
3	Gap reports	Output	Affects Dashboards; followed by Performance Manager.	Medium	Customer complaint log, May 2026

MP-031.9 — Monitor performance indicators actions · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	KPI-20 — KPI analysis timeliness	KPI analysis timeliness measures the result of this macro process (Dashboards); it is the KPI its owner reviews at each Monthly review.	98.7	>= 95%

UMS034 (MP-032) — Management System Performance Monitoring

Set PDCA periodicity; define system indicators; compare data; trigger corrective actions. Owner: Performance Manager. Tier 1. Requirements answered: ISO 9001 §9.1.

Step	Step, task and purpose	Role · form	What to type
MP-032.1	Set management system performance periodicity Task: Plan and prepare management system performance Set management system performance periodicity — step 1 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Periodicity	Frequency: Monthly Next due date: 2026-09-19 Review chaired by: Performance Manager Organization units in scope: Operations Review inputs and notes: Inputs for each review: System indicators; Performance data; Targets. An early review is triggered by: Receipt or update of System indicators, Performance data from Quality mgr, Data analysts.
MP-032.2	Define management system performance indicators Task: Plan and prepare management system performance Define management system performance indicators — step 2 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Register items	Items identified: 2 rows — see the table below
MP-032.3	Collect management system performance data Task: Plan and prepare management system performance Collect management system performance data — step 3 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-032.4	Compare management system performance to plan Task: Plan and prepare management system performance Compare management system performance to plan — step 4 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.4 Conclusion: Weighted score 4.4/5. Main gap: BIM data loss. Action recorded in the action plan.
MP-032.5	Identify management system performance anomalies Task: Execute management system performance activities Identify management system performance anomalies — step 5 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-032.6	Generate management system performance reports Task: Execute management system performance activities Generate management system performance reports — step 6 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Document	Document template: TPL-PROC — Procedure Document reference: NV-AEC-QMS-UMS034-06 Version: 1.0 Content summary: Health reports for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-PROC-01 — Procedure — Context To Strategy
MP-032.7	Trigger management system performance corrections Task: Execute management system performance activities Trigger management system performance corrections — step 7 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Execution	What was done: Trigger management system performance corrections carried out on site execution and prefabrication yard; Health reports updated. Records that prove it: — Completion (%): 100
MP-032.8	Report on management system performance status Task: Verify, record and close	Performance Manager Communication	Communication records: 2 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	management system performance Report on management system performance status — step 8 of 12 in UMS034 Management System Performance Monitoring.		
MP-032.9	Monitor management system performance trends Task: Verify, record and close management system performance Monitor management system performance trends — step 9 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-032.10	Adjust management system performance parameters Task: Verify, record and close management system performance Adjust management system performance parameters — step 10 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Change	Change made: Health reports updated: BIM model clash not resolved. Reason: Customer complaint analysis Documents or records updated: —
MP-032.11	Plan monitoring methods Task: Plan & Execute Monitoring Methods Plan monitoring methods — step 11 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Plan	Planned activities (become actions): 1 row — see the table below On completion: rows become actions.
MP-032.12	Execute monitoring and record results Task: Plan & Execute Monitoring Methods Execute monitoring and record results — step 12 of 12 in UMS034 Management System Performance Monitoring.	Performance Manager Execution	What was done: Execute monitoring and record results carried out on site execution and prefabrication yard; Health reports updated. Records that prove it: Execute monitoring and record results Completion (%): 100

MP-032.2 — Define management system performance indicators · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Monitoring plan execution	Indicator	Affects Health reports; followed by Performance Manager.	High	Internal audit report, Jul 2026
2	Cost of poor quality	Indicator	Affects Anomaly reports; followed by Performance Manager.	Medium	Process performance dashboard, Jul 2026

MP-032.3 — Collect management system performance data · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Health reports	Output	Affects Health reports; followed by Performance Manager.	High	Process performance dashboard, Jul 2026
2	Anomaly reports	Output	Affects Anomaly reports; followed by Performance Manager.	Medium	Interview with the process owner, Jul 2026
3	Corrective triggers	Output	Affects Health reports; followed by Performance Manager.	Medium	Regulatory watch bulletin, Jul 2026

MP-032.4 — Compare management system performance to plan · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Health reports complete and	30	5	Health reports reviewed on 2026-08-17; 2 gaps

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
	up to date			corrected.
2	Requirements of ISO 9001 §9.1 met	30	5	Checked against ISO 9001 §9.1 with the checklist of the phase gate.
3	Evidence available for Anomaly reports	20	3	Records filed in the project: Anomaly reports.
4	Results against target	20	4	KPI KPI-21 used as the measure.

MP-032.5 — Identify management system performance anomalies · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Health reports	Output	Affects Health reports; followed by Performance Manager.	High	Regulatory watch bulletin, Jul 2026
2	Anomaly reports	Output	Affects Anomaly reports; followed by Performance Manager.	Medium	Supplier evaluation file, Jun 2026
3	Corrective triggers	Output	Affects Health reports; followed by Performance Manager.	Medium	Management review minutes, Jun 2026

MP-032.8 — Report on management system performance status · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	Top mgmt	Meeting	2026-08-24	Health reports: what changes for you and what to do by 2026-09-07.	Performance Manager
2	Board	E-mail	2026-08-26	Anomaly reports: what changes for you and what to do by 2026-09-07.	Performance Manager

MP-032.9 — Monitor management system performance trends · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	KPI-21 — Monitoring plan execution	Monitoring plan execution measures the result of this macro process (Health reports); it is the KPI its owner reviews at each Monthly review.	93.1	>= 95%
2	Q-KPI-04 — Cost of poor quality	Cost of poor quality measures the result of this macro process (Health reports); it is the KPI its owner reviews at each Monthly review.	1.7	<= 2%

MP-032.11 — Plan monitoring methods · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Execute monitoring and record results	Salma Kettani	2026-08-29	2026-09-12	Health reports

UMS036 (MP-033) — Operational Process Performance Review

Set periodicity; collect data; conduct workshops; identify root causes. Owner: Performance Manager. Tier 1. Requirements answered: ISO 9001 §9.1.3.

Step	Step, task and purpose	Role · form	What to type
MP-033.1	Set operational process performance periodicity Task: Plan and prepare operational process performance Set operational process performance periodicity — step 1 of 10 in UMS036	Performance Manager Periodicity	Frequency: Monthly Next due date: 2026-09-27 Review chaired by: Performance Manager Organization units in scope: Operations Review inputs and notes: Inputs for each review: KPI data; Defect data; Cycle time data. An early review is triggered by:

Step	Step, task and purpose	Role · form	What to type
	Operational Process Performance Review.		Receipt or update of KPI data, Defect data from Process owner, Facilitator.
MP-033.2	Define operational process performance agenda Task: Plan and prepare operational process performance Define operational process performance agenda — step 2 of 10 in UMS036 Operational Process Performance Review.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-033.3	Collect operational process performance data Task: Plan and prepare operational process performance Collect operational process performance data — step 3 of 10 in UMS036 Operational Process Performance Review.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-033.4	Conduct operational process performance workshops Task: Plan and prepare operational process performance Conduct operational process performance workshops — step 4 of 10 in UMS036 Operational Process Performance Review.	Performance Manager Execution	What was done: Conduct operational process performance workshops carried out on site execution and prefabrication yard; Review minutes updated. Records that prove it: — Completion (%): 100
MP-033.5	Compare operational process performance to targets Task: Execute operational process performance activities Compare operational process performance to targets — step 5 of 10 in UMS036 Operational Process Performance Review.	Performance Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.5 Conclusion: Weighted score 3.5/5. Main gap: Structural failure. Action recorded in the action plan.
MP-033.6	Identify operational process performance causes Task: Execute operational process performance activities Identify operational process performance causes — step 6 of 10 in UMS036 Operational Process Performance Review.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-033.7	Define operational process performance actions Task: Execute operational process performance activities Define operational process performance actions — step 7 of 10 in UMS036 Operational Process Performance Review.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-033.8	Document the process control plan Task: Verify, record and close operational process performance Document the process control plan — step 8 of 10 in UMS036 Operational Process Performance Review.	Performance Manager Document	Document template: TPL-PROC — Procedure Document reference: NV-AEC-QMS-UMS036-08 Version: 1.1 Content summary: Review minutes for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-PROC-01 — Procedure — Context To Strategy
MP-033.9	Escalate operational process performance issues Task: Verify, record and close operational process performance Escalate operational process performance issues — step 9 of 10 in UMS036 Operational Process	Performance Manager Escalation	Escalated to: Top Management Reason: Review minutes is late beyond tolerance; a decision on resources is needed.

Step	Step, task and purpose	Role · form	What to type
	Performance Review.		
MP-033.10	Monitor operational process performance Task: Verify, record and close operational process performance — step 10 of 10 in UMS036 Operational Process Performance Review.	Performance Manager Measurement	Indicators measured: 1 row — see the table below Analysis of gaps and trend: Trend over the last three months: stable, below target; action opened. Next analysis at the performance review.

MP-033.2 — Define operational process performance agenda · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Review minutes	Output	Affects Review minutes; followed by Performance Manager.	High	Internal audit report, Aug 2026
2	Root cause analysis	Output	Affects Root cause analysis; followed by Performance Manager.	Medium	Process performance dashboard, Jul 2026
3	Improvement plans	Output	Affects Review minutes; followed by Performance Manager.	Medium	Interview with the process owner, Jul 2026

MP-033.3 — Collect operational process performance data · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Review minutes	Output	Affects Review minutes; followed by Performance Manager.	High	Process performance dashboard, Jul 2026
2	Root cause analysis	Output	Affects Root cause analysis; followed by Performance Manager.	Medium	Interview with the process owner, Jul 2026
3	Improvement plans	Output	Affects Review minutes; followed by Performance Manager.	Medium	Regulatory watch bulletin, Jul 2026

MP-033.5 — Compare operational process performance to targets · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Review minutes complete and up to date	30	3	Review minutes reviewed on 2026-08-25; 2 gaps corrected.
2	Requirements of ISO 9001 §9.1.3 met	30	4	Checked against ISO 9001 §9.1.3 with the checklist of the phase gate.
3	Evidence available for Root cause analysis	20	3	Records filed in the project: Root cause analysis.
4	Results against target	20	4	KPI Q-KPI-02 used as the measure.

MP-033.6 — Identify operational process performance causes · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Work instruction not updated after change	Root cause	Affects Review minutes; followed by Performance Manager.	High	Supplier evaluation file, Jun 2026
2	Insufficient training of new operators	Root cause	Affects Root cause analysis; followed by Performance Manager.	Medium	Management review minutes, Jun 2026
3	Supplier batch variation not detected	Root cause	Affects Review minutes; followed by Performance Manager.	Medium	Customer complaint log, Jun 2026

MP-033.7 — Define operational process performance actions · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Review minutes	Output	Affects Review minutes; followed by Performance Manager.	High	Management review minutes, Jun 2026
2	Root cause analysis	Output	Affects Root cause analysis; followed by Performance Manager.	Medium	Customer complaint log, Jun 2026
3	Improvement plans	Output	Affects Review minutes; followed by Performance Manager.	Medium	Internal audit report, Jun 2026

MP-033.10 — Monitor operational process performance · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Review minutes); it is the KPI its owner reviews at each Monthly review.	96.6	>= 95%

UMS039 (MP-034) — Governance Bodies and Reviews Orchestration

Set periodicity per body; define data; conduct reviews; consolidate decisions. Owner: IMS Manager. Tier 1. Requirements answered: ISO 9001 §9.3.

Documents of this macro process: NV-AEC-QMS-MR (Management review minutes).

Step	Step, task and purpose	Role · form	What to type
MP-034.1	Set governance reviews periodicity Task: Plan and prepare governance reviews Set governance reviews periodicity — step 1 of 11 in UMS039 Governance Bodies and Reviews Orchestration.	IMS Manager Periodicity	Frequency: Monthly Next due date: 2026-10-05 Review chaired by: IMS Manager Organization units in scope: Nova Build & Construct Review inputs and notes: Inputs for each review: Governance calendar; Required data; Decision requirements. An early review is triggered by: Receipt or update of Governance calendar, Required data from Process owner, Facilitator.
MP-034.2	Define governance reviews data Task: Plan and prepare governance reviews Define governance reviews data — step 2 of 11 in UMS039 Governance Bodies and Reviews Orchestration.	IMS Manager Register items	Items identified: 3 rows — see the table below
MP-034.3	Process governance reviews Task: Plan and prepare governance reviews Process governance reviews — step 3 of 11 in UMS039 Governance Bodies and Reviews Orchestration.	IMS Manager Execution	What was done: Process governance reviews carried out on site execution and prefabrication yard; Governance calendar updated. Records that prove it: NV-AEC-QMS-MR — Management review minutes; MR-1 — Management review 2026-03; MR-2 — Management review 2026-09 Completion (%): 100
MP-034.4	Hold monthly process mini-reviews Task: Plan and prepare governance reviews Hold monthly process mini-reviews — step 4 of 11 in UMS039 Governance Bodies and Reviews Orchestration.	IMS Manager Review	Review frequency: Quarterly Review date: 2026-09-03 Next review: 2026-12-03 Chaired by: IMS Manager Participants: IMS Manager, Quality Manager Inputs reviewed: 3 rows — see the table below Decisions and actions: 1 row — see the table below On completion: rows become actions.
MP-034.5	Hold full management reviews Task: Execute governance reviews activities Hold full management reviews — step 5 of 11 in UMS039 Governance Bodies and Reviews Orchestration.	IMS Manager Review	Review frequency: Quarterly Review date: 2026-09-04 Next review: 2026-12-04 Chaired by: IMS Manager Participants: IMS Manager, Quality Manager Inputs reviewed: 3 rows — see the table below Decisions and actions: 1 row — see the table below On completion: rows become actions.

Step	Step, task and purpose	Role · form	What to type
MP-034.6	Present results to the Executive Committee Task: Execute governance reviews activities Present results to the Executive Committee — step 6 of 11 in UMS039 Governance Bodies and Reviews Orchestration.	IMS Manager Review	Review frequency: Quarterly Review date: 2026-09-04 Next review: 2026-12-04 Chaired by: IMS Manager Participants: IMS Manager, Quality Manager Inputs reviewed: 3 rows — see the table below Decisions and actions: 1 row — see the table below On completion: rows become actions.
MP-034.7	Hold commercial committee reviews Task: Execute governance reviews activities Hold commercial committee reviews — step 7 of 11 in UMS039 Governance Bodies and Reviews Orchestration.	IMS Manager Review	Review frequency: Quarterly Review date: 2026-09-08 Next review: 2026-12-08 Chaired by: IMS Manager Participants: IMS Manager, Quality Manager Inputs reviewed: 3 rows — see the table below Decisions and actions: 1 row — see the table below On completion: rows become actions.
MP-034.8	Consolidate governance reviews dashboard Task: Execute governance reviews activities Consolidate governance reviews dashboard — step 8 of 11 in UMS039 Governance Bodies and Reviews Orchestration.	IMS Manager Execution	What was done: Consolidate governance reviews dashboard carried out on site execution and prefabrication yard; Governance calendar updated. Records that prove it: NV-AEC-QMS-MR — Management review minutes; MR-1 — Management review 2026-03; MR-2 — Management review 2026-09; Update Minutes Completion (%): 100
MP-034.9	Validate governance reviews decisions Task: Verify, record and close governance reviews Validate governance reviews decisions — step 9 of 11 in UMS039 Governance Bodies and Reviews Orchestration.	IMS Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): IMS Manager Decision comment and conditions: Governance calendar approved against ISO 9001; no blocking point.
MP-034.10	Monitor governance reviews actions Task: Verify, record and close governance reviews Monitor governance reviews actions — step 10 of 11 in UMS039 Governance Bodies and Reviews Orchestration.	IMS Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-034.11	Report governance reviews velocity Task: Verify, record and close governance reviews Report governance reviews velocity — step 11 of 11 in UMS039 Governance Bodies and Reviews Orchestration.	IMS Manager Communication	Communication records: 2 rows — see the table below

MP-034.2 — Define governance reviews data · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Governance calendar	Output	Affects Governance calendar; followed by IMS Manager.	High	Internal audit report, Aug 2026
2	Minutes	Output	Affects Minutes; followed by IMS Manager.	Medium	Process performance dashboard, Aug 2026
3	Decision records	Output	Affects Governance calendar; followed by IMS Manager.	Medium	Interview with the process owner, Jul 2026

MP-034.4 — Hold monthly process mini-reviews · Inputs reviewed

#	Input	Finding
1	Governance calendar	Governance calendar still valid; minor updates made.

#	Input	Finding

UMS040 (MP-035) — Customer Satisfaction Barometer Management

Set survey periodicity; define NPS/CSAT; manage campaigns; correlate. Owner: Performance Manager. Tier 1. Requirements answered: ISO 9001 §9.1.2.

Step	Step, task and purpose	Role · form	What to type
MP-035.1	Set customer satisfaction survey periodicity Task: Plan and prepare customer satisfaction survey Set customer satisfaction survey periodicity — step 1 of 9 in UMS040 Customer Satisfaction Barometer Management.	Performance Manager Periodicity	Frequency: Monthly Next due date: 2026-10-08 Review chaired by: Performance Manager Organization units in scope: Operations Review inputs and notes: Inputs for each review: Customer feedback; Survey data; NPS/CSAT targets. An early review is triggered by: Receipt or update of Customer feedback, Survey data from CX mgr, Data analysts.
MP-035.2	Define customer satisfaction survey objectives Task: Plan and prepare customer satisfaction survey Define customer satisfaction survey objectives — step 2 of 9 in UMS040 Customer Satisfaction Barometer Management.	Performance Manager SMART objectives	Objectives (become entries of the objectives register): 4 rows — see the table below On completion: rows become objectives.
MP-035.3	Determine customer satisfaction survey costs Task: Plan and prepare customer satisfaction survey Determine customer satisfaction survey costs — step 3 of 9 in UMS040 Customer Satisfaction Barometer Management.	Performance Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.5 Conclusion: Weighted score 3.5/5. Main gap: Structural failure. Action recorded in the action plan.
MP-035.4	Manage customer satisfaction survey campaign Task: Execute customer satisfaction survey activities Manage customer satisfaction survey	Performance Manager Execution	What was done: Manage customer satisfaction survey campaign carried out on site execution and prefabrication yard; Satisfaction reports updated. Records that prove it: — Completion (%): 100

Step	Step, task and purpose	Role · form	What to type
	campaign — step 4 of 9 in UMS040 Customer Satisfaction Barometer Management.		
MP-035.5	Analyze customer satisfaction survey trends Task: Execute customer satisfaction survey activities Analyze customer satisfaction survey trends — step 5 of 9 in UMS040 Customer Satisfaction Barometer Management.	Performance Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.3 Conclusion: Weighted score 4.3/5. Main gap: BIM data loss. Action recorded in the action plan.
MP-035.6	Generate customer satisfaction survey dashboards Task: Execute customer satisfaction survey activities Generate customer satisfaction survey dashboards — step 6 of 9 in UMS040 Customer Satisfaction Barometer Management.	Performance Manager Document	Document template: TPL-PROC — Procedure Document reference: NV-AEC-QMS-UMS040-06 Version: 1.1 Content summary: Satisfaction reports for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-PROC-01 — Procedure — Context To Strategy
MP-035.7	Correlate customer satisfaction survey Task: Verify, record and close customer satisfaction survey Correlate customer satisfaction survey — step 7 of 9 in UMS040 Customer Satisfaction Barometer Management.	Performance Manager Execution	What was done: Correlate customer satisfaction survey carried out on site execution and prefabrication yard; Satisfaction reports updated. Records that prove it: — Completion (%): 100
MP-035.8	Identify customer satisfaction survey actions Task: Verify, record and close customer satisfaction survey Identify customer satisfaction survey actions — step 8 of 9 in UMS040 Customer Satisfaction Barometer Management.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-035.9	Report to management review Task: Verify, record and close customer satisfaction survey Report to management review — step 9 of 9 in UMS040 Customer Satisfaction Barometer Management.	Performance Manager Communication	Communication records: 2 rows — see the table below

MP-035.2 — Define customer satisfaction survey objectives · Objectives (become entries of the objectives register)

#	Specific objective	Measure (KPI)	Baseline	Achievable target	Relevant to (policy commitment)	Owner	Time-bound deadline	Resources
1	Raise customer satisfaction on steel-frame buildings	Q-KPI-01 — Customer satisfaction index	78%	>= 85%	Satisfy customer requirements	Nadia Chraibi	2026-11-10	Quarterly survey; complaint review meeting
2	Deliver steel-frame buildings on time	Q-KPI-02 — On-time delivery rate	86%	>= 95%	On time, right first time	Julien Moreau	2026-08-12	Planning board; one extra technician in summer
3	Reduce the cost of poor quality	Q-KPI-04 — Cost of poor quality	4.1%	<= 2%	Continual improvement	Nadia Chraibi	2026-11-10	Rework tracking in the NC register
4	Close corrective actions on time	Q-KPI-05 — Corrective actions closed on time	70%	>= 90%	Continual improvement	Karim Tazi	2026-05-14	Weekly action review

MP-035.3 — Determine customer satisfaction survey costs · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Satisfaction reports complete and up to date	30	3	Satisfaction reports reviewed on 2026-09-02; 2 gaps corrected.
2	Requirements of ISO 9001 §9.1.2 met	30	4	Checked against ISO 9001 §9.1.2 with the checklist of the phase gate.
3	Evidence available for NPS/CSAT scores	20	4	Records filed in the project: NPS/CSAT scores.
4	Results against target	20	3	KPI Q-KPI-01 used as the measure.

MP-035.5 — Analyze customer satisfaction survey trends · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Satisfaction reports complete and up to date	30	4	Satisfaction reports reviewed on 2026-09-06; 2 gaps corrected.
2	Requirements of ISO 9001 §9.1.2 met	30	5	Checked against ISO 9001 §9.1.2 with the checklist of the phase gate.
3	Evidence available for NPS/CSAT scores	20	5	Records filed in the project: NPS/CSAT scores.
4	Results against target	20	3	KPI Q-KPI-01 used as the measure.

MP-035.8 — Identify customer satisfaction survey actions · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Satisfaction reports	Output	Affects Satisfaction reports; followed by Performance Manager.	High	Customer complaint log, Jun 2026
2	NPS/CSAT scores	Output	Affects NPS/CSAT scores; followed by Performance Manager.	Medium	Internal audit report, Jun 2026
3	Trend analysis	Output	Affects Satisfaction reports; followed by Performance Manager.	Medium	Process performance dashboard, Jun 2026

MP-035.9 — Report to management review · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	Top mgmt	E-mail	2026-09-15	Satisfaction reports: what changes for you and what to do by 2026-09-29.	Performance Manager
2	Sales/Marketing	Intranet	2026-09-17	NPS/CSAT scores: what changes for you and what to do by 2026-09-29.	Performance Manager

GRC008 (MP-039) — Internal Audit and Assurance Cycle

Plan by risk; develop programs; test and document; report and follow up. Owner: Internal Audit Manager. Tier 1. Requirements answered: ISO 9001 §9.2.

Documents of this macro process: NV-AEC-QMS-AUDPRG (Internal audit programme); NV-AEC-QMS-AUDREP-01 (Internal audit report — AUD-NV-AEC-QMS-01); NV-AEC-QMS-AUDREP-02 (Internal audit report — AUD-NV-AEC-QMS-02); NV-AEC-QMS-AUDREP-03 (Internal audit report — AUD-NV-AEC-QMS-03); NV-AEC-QMS-AUDREP-04 (Internal audit report — AUD-NV-AEC-QMS-04); NV-AEC-QMS-AUDREP-05 (Internal audit report — AUD-NV-AEC-QMS-05).

Step	Step, task and purpose	Role · form	What to type
MP-039.1	Plan internal audit programme by risk Task: Plan and prepare internal audit	Internal Audit Manager	Planned activities (become actions): 3 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	programme Plan internal audit programme by risk — step 1 of 9 in GRC008 Internal Audit and Assurance Cycle.	Plan	On completion: rows become actions.
MP-039.2	Develop internal audit programme programs Task: Plan and prepare internal audit programme Develop internal audit programme programs — step 2 of 9 in GRC008 Internal Audit and Assurance Cycle.	Internal Audit Manager Execution	What was done: Develop internal audit programme programs carried out on site execution and prefabrication yard; Audit plan updated. Records that prove it: NV-AEC-QMS-AUDPRG — Internal audit programme; Address audit finding: Two controlled documents at site execution and prefabrication yard had no revision status Completion (%): 100
MP-039.3	Allocate internal audit programme Task: Plan and prepare internal audit programme Allocate internal audit programme — step 3 of 9 in GRC008 Internal Audit and Assurance Cycle.	Internal Audit Manager Assignment	Role: Internal Audit Manager Person (from the OBS): Sofia Bennani Organization units covered: Quality RACSI of the macro process: R: Internal Audit Manager · A: IMS Manager · C: Risk Manager · S: Document Controller · I: Top Management
MP-039.4	Test internal audit programme Task: Execute internal audit programme activities Test internal audit programme — step 4 of 9 in GRC008 Internal Audit and Assurance Cycle.	Internal Audit Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.2 Conclusion: Weighted score 4.2/5. Main gap: Structural failure. Action recorded in the action plan.
MP-039.5	Document the process control plan Task: Execute internal audit programme activities Document the process control plan — step 5 of 9 in GRC008 Internal Audit and Assurance Cycle.	Internal Audit Manager Document	Document template: TPL-AUDPRG — Internal audit programme Document reference: NV-AEC-QMS-GRC008-05 Version: 1.0 Content summary: Audit plan for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-AUDPRG — Internal audit programme
MP-039.6	Draft internal audit programme report Task: Execute internal audit programme activities Draft internal audit programme report — step 6 of 9 in GRC008 Internal Audit and Assurance Cycle.	Internal Audit Manager Document	Document template: TPL-AUDPRG — Internal audit programme Document reference: NV-AEC-QMS-GRC008-06 Version: 1.1 Content summary: Audit plan for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-AUDPRG — Internal audit programme
MP-039.7	Hold the audit closing meeting Task: Verify, record and close internal audit programme Hold the audit closing meeting — step 7 of 9 in GRC008 Internal Audit and Assurance Cycle.	Internal Audit Manager Execution	What was done: Hold the audit closing meeting carried out on site execution and prefabrication yard; Audit plan updated. Records that prove it: NV-AEC-QMS-AUDPRG — Internal audit programme; Address audit finding: Two controlled documents at site execution and prefabrication yard had no revision status Completion (%): 100
MP-039.8	Issue internal audit programme report Task: Verify, record and close internal audit programme Issue internal audit programme report — step 8 of 9 in GRC008 Internal Audit and Assurance Cycle.	Internal Audit Manager Document	Document template: TPL-AUDPRG — Internal audit programme Document reference: NV-AEC-QMS-GRC008-08 Version: 1.0 Content summary: Audit plan for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-AUDPRG — Internal audit programme
MP-039.9	Monitor action plans Task: Verify, record and close internal audit programme Monitor action plans — step 9 of 9 in GRC008 Internal Audit and Assurance Cycle.	Internal Audit Manager Measurement	Indicators measured: 1 row — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.

MP-039.1 — Plan internal audit programme by risk · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Develop internal audit programme programs	Sofia Bennani	2026-09-14	2026-09-28	Audit plan
2	Allocate internal audit programme	Sofia Bennani	2026-09-19	2026-10-08	Audit programs
3	Test internal audit programme	Sofia Bennani	2026-09-24	2026-10-18	Audit plan

MP-039.4 — Test internal audit programme · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Audit plan complete and up to date	30	3	Audit plan reviewed on 2026-09-08; 2 gaps corrected.
2	Requirements of ISO 9001 §9.2 met	30	5	Checked against ISO 9001 §9.2 with the checklist of the phase gate.
3	Evidence available for Audit programs	20	4	Records filed in the project: Audit programs.
4	Results against target	20	5	KPI KPI-22 used as the measure.

MP-039.9 — Monitor action plans · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	KPI-22 — Audit programme completion	Audit programme completion measures the result of this macro process (Audit plan); it is the KPI its owner reviews at each Monthly review.	100	100%

GRC010 (MP-040) — Executive GRC Reporting and Dashboards

Aggregate data; build dashboards; generate reports; use predictive analytics. Owner: IMS Manager. Tier 1.
Requirements answered: ISO 9001 §9.1.3.

Step	Step, task and purpose	Role · form	What to type
MP-040.1	Aggregate GRC dashboard Task: Plan and prepare GRC dashboard Aggregate GRC dashboard — step 1 of 10 in GRC010 Executive GRC Reporting and Dashboards.	DynamicMS Engine Automated service task	System result confirmed: Aggregate GRC dashboard: done by the DynamicMS Engine; GRC dashboards available in the project. Records produced: —
MP-040.2	Define GRC dashboard needs Task: Plan and prepare GRC dashboard Define GRC dashboard needs — step 2 of 10 in GRC010 Executive GRC Reporting and Dashboards.	IMS Manager Register items	Items identified: 3 rows — see the table below
MP-040.3	Build GRC dashboard Task: Plan and prepare GRC dashboard Build GRC dashboard — step 3 of 10 in GRC010 Executive GRC Reporting and Dashboards.	IMS Manager Execution	What was done: Build GRC dashboard carried out on site execution and prefabrication yard; GRC dashboards updated. Records that prove it: — Completion (%): 100
MP-040.4	Generate GRC dashboard reports Task: Plan and prepare GRC dashboard Generate GRC dashboard reports —	IMS Manager Document	Document template: TPL-PROC — Procedure Document reference: NV-AEC-QMS-GRC010-04 Version: 1.0 Content summary: GRC dashboards for steel-frame buildings,

Step	Step, task and purpose	Role · form	What to type
	step 4 of 10 in GRC010 Executive GRC Reporting and Dashboards.		aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-PROC-01 — Procedure — Context To Strategy
MP-040.5	Prepare GRC dashboard submissions Task: Execute GRC dashboard activities Prepare GRC dashboard submissions — step 5 of 10 in GRC010 Executive GRC Reporting and Dashboards.	IMS Manager Document	Document template: TPL-PROC — Procedure Document reference: NV-AEC-QMS-GRC010-05 Version: 2.0 Content summary: GRC dashboards for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-PROC-01 — Procedure — Context To Strategy
MP-040.6	Validate GRC dashboard Task: Execute GRC dashboard activities Validate GRC dashboard — step 6 of 10 in GRC010 Executive GRC Reporting and Dashboards.	IMS Manager Decision	Decision criteria checked: 3 rows — see the table below Decision: Hold Approver (Accountable): IMS Manager Decision comment and conditions: Hold until Executive reports is complete; review in two weeks.
MP-040.7	Verify GRC dashboard Task: Execute GRC dashboard activities Verify GRC dashboard — step 7 of 10 in GRC010 Executive GRC Reporting and Dashboards.	IMS Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.8 Conclusion: Weighted score 4.8/5. Main gap: BIM data loss. Action recorded in the action plan.
MP-040.8	Publish GRC dashboard Task: Verify, record and close GRC dashboard Publish GRC dashboard — step 8 of 10 in GRC010 Executive GRC Reporting and Dashboards.	IMS Manager Document	Document template: TPL-PROC — Procedure Document reference: NV-AEC-QMS-GRC010-08 Version: 1.0 Content summary: GRC dashboards for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: NV-AEC-QMS-PROC-01 — Procedure — Context To Strategy
MP-040.9	Deliver GRC dashboard Task: Verify, record and close GRC dashboard Deliver GRC dashboard — step 9 of 10 in GRC010 Executive GRC Reporting and Dashboards.	IMS Manager Training	Session / module: Deliver GRC dashboard — practice session Date: 2026-09-19 Units trained: Nova Build & Construct Participants: 18 Effectiveness evaluation method: Practical test Effectiveness (%): 82
MP-040.10	Use predictive analytics Task: Verify, record and close GRC dashboard Use predictive analytics — step 10 of 10 in GRC010 Executive GRC Reporting and Dashboards.	IMS Manager AI-assisted draft	Context given to the assistant: Step: Use predictive analytics. Inputs: Risk data; Compliance data; Audit data. Standards: ISO 9001, ISO 19650, EN 1090. Organization: Nova Build & Construct (steel-frame buildings). Suggestion outcome: Edited Final validated text: GRC dashboards drafted with the assistant and reviewed by IMS Manager: covers ISO 9001, ISO 19650.

MP-040.2 — Define GRC dashboard needs · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	GRC dashboards	Output	Affects GRC dashboards; followed by IMS Manager.	High	Internal audit report, Aug 2026
2	Executive reports	Output	Affects Executive reports; followed by IMS Manager.	Medium	Process performance dashboard, Aug 2026
3	Predictive analytics	Output	Affects GRC dashboards; followed by IMS Manager.	Medium	Interview with the process owner, Aug 2026

MP-040.6 — Validate GRC dashboard · Decision criteria checked

#	Criterion	Met	Evidence
1	GRC dashboards complete	Yes	GRC dashboards v1.0
2	Requirements of ISO 9001 §9.1.3 met	Partly	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

MP-040.7 — Verify GRC dashboard · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	GRC dashboards complete and up to date	30	5	GRC dashboards reviewed on 2026-09-15; 2 gaps corrected.
2	Requirements of ISO 9001 §9.1.3 met	30	5	Checked against ISO 9001 §9.1.3 with the checklist of the phase gate.
3	Evidence available for Executive reports	20	5	Records filed in the project: Executive reports.
4	Results against target	20	4	KPI Q-KPI-01 used as the measure.

DMS086 (MP-147) — SME Peer Benchmarking

Benchmark against peers; identify improvements; learn. Owner: Performance Manager. Tier 7.

Step	Step, task and purpose	Role · form	What to type
MP-147.1	Select SME peer benchmark category Task: Plan and prepare SME peer benchmark Select SME peer benchmark category — step 1 of 10 in DMS086 SME Peer Benchmarking.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-147.2	Define peer group Task: Plan and prepare SME peer benchmark Define peer group — step 2 of 10 in DMS086 SME Peer Benchmarking.	Performance Manager Register items	Items identified: 3 rows — see the table below

DMS089 (MP-150) — SME Essential KPI Dashboard

Essential KPIs; simplify monitoring; data-driven decisions. Owner: Performance Manager. Tier 7.
Requirements answered: ISO 9001 §9.1.

Step	Step, task and purpose	Role · form	What to type
MP-150.1	Select SME KPI dashboard KPIs Task: Plan and prepare SME KPI dashboard Select SME KPI dashboard KPIs — step 1 of 10 in DMS089 SME Essential KPI Dashboard.	Performance Manager Register items	Items identified: 4 rows — see the table below
MP-150.2	Define SME KPI dashboard targets Task: Plan and prepare SME KPI dashboard Define SME KPI dashboard targets — step 2 of 10 in DMS089 SME Essential KPI Dashboard.	Performance Manager Register items	Items identified: 3 rows — see the table below
MP-150.3	Configure SME KPI dashboard sources Task: Plan and prepare SME KPI dashboard Configure SME KPI dashboard sources — step 3 of 10 in DMS089 SME Essential KPI Dashboard.	Performance Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-150.4	Set SME KPI dashboard Task: Plan and prepare SME KPI dashboard Set SME KPI dashboard — step 4 of 10 in DMS089 SME Essential KPI Dashboard.	Performance Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-150.5	Configure SME KPI dashboard alerts Task: Execute SME KPI dashboard activities Configure SME KPI dashboard alerts — step 5 of 10 in DMS089 SME Essential KPI Dashboard.	Performance Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-150.6	Review SME KPI dashboard daily Task: Execute SME KPI dashboard activities Review SME KPI dashboard daily — step 6 of 10 in DMS089 SME Essential KPI Dashboard.	Performance Manager Execution	What was done: Review SME KPI dashboard daily carried out on site execution and prefabrication yard; KPI dashboard updated. Records that prove it: — Completion (%): 67
MP-150.7	Analyze SME KPI dashboard trends Task: Execute SME KPI dashboard activities Analyze SME KPI dashboard trends — step 7 of 10 in DMS089 SME	Performance Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 2.7 Conclusion: Weighted score 2.7/5. Main gap: Structural failure. Action recorded in the action plan.

Step	Step, task and purpose	Role · form	What to type
	Essential KPI Dashboard.		
MP-150.8	Take action on SME KPI dashboard deviations Task: Verify, record and close SME KPI dashboard Take action on SME KPI dashboard deviations — step 8 of 10 in DMS089 SME Essential KPI Dashboard.	Performance Manager Execution	What was done: Take action on SME KPI dashboard deviations carried out on site execution and prefabrication yard; KPI dashboard updated. Records that prove it: — Completion (%): 49
MP-150.9	Report on SME KPI dashboard status Task: Verify, record and close SME KPI dashboard Report on SME KPI dashboard status — step 9 of 10 in DMS089 SME Essential KPI Dashboard.	Performance Manager Communication	Communication records: 2 rows — see the table below
MP-150.10	Update SME KPI dashboard Task: Verify, record and close SME KPI dashboard Update SME KPI dashboard — step 10 of 10 in DMS089 SME Essential KPI Dashboard.	Performance Manager Change	Change made: KPI dashboard updated; BIM model clash not resolved. Reason: Customer complaint analysis Documents or records updated: —

MP-150.1 — Select SME KPI dashboard KPIs · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Customer satisfaction index	Indicator	Affects KPI dashboard; followed by Performance Manager.	High	Customer complaint log, Sep 2026
2	On-time delivery rate	Indicator	Affects KPI reports; followed by Performance Manager.	Medium	Internal audit report, Aug 2026
3	First pass yield	Indicator	Affects KPI dashboard; followed by Performance Manager.	Medium	Process performance dashboard, Aug 2026
4	Cost of poor quality	Indicator	Affects KPI reports; followed by Performance Manager.	Low	Interview with the process owner, Aug 2026

MP-150.2 — Define SME KPI dashboard targets · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	KPI dashboard	Output	Affects KPI dashboard; followed by Performance Manager.	High	Internal audit report, Sep 2026
2	KPI reports	Output	Affects KPI reports; followed by Performance Manager.	Medium	Process performance dashboard, Aug 2026
3	Alert records	Output	Affects KPI dashboard; followed by Performance Manager.	Medium	Interview with the process owner, Aug 2026

MP-150.3 — Configure SME KPI dashboard sources · Settings

#	Setting	Value	Reason
1	Configure SME KPI dashboard sources	Enabled for site execution and prefabrication yard	Needed to produce KPI dashboard
2	Owner and notification	Performance Manager	Alerts go to the process owner

MP-150.4 — Set SME KPI dashboard · Settings

#	Setting	Value	Reason
1	Set SME KPI dashboard	Enabled for site execution and prefabrication yard	Needed to produce KPI dashboard
2	Owner and notification	Performance Manager	Alerts go to the process owner

MP-150.5 — Configure SME KPI dashboard alerts · Settings

#	Setting	Value	Reason
1	Configure SME KPI dashboard alerts	Enabled for site execution and prefabrication yard	Needed to produce KPI dashboard
2	Owner and notification	Performance Manager	Alerts go to the process owner

MP-150.7 — Analyze SME KPI dashboard trends · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	KPI dashboard complete and up to date	30	3	KPI dashboard reviewed on 2026-09-29; 2 gaps corrected.
2	Requirements of ISO 9001 §9.1 met	30	2	Checked against ISO 9001 §9.1 with the checklist of the phase gate.
3	Evidence available for KPI reports	20	3	Records filed in the project: KPI reports.
4	Results against target	20	3	KPI Q-KPI-01 used as the measure.

MP-150.9 — Report on SME KPI dashboard status · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	SME owner	E-mail	2026-10-02	KPI dashboard: what changes for you and what to do by 2026-10-16.	Performance Manager
2	SME management	Intranet	2026-10-04	KPI reports: what changes for you and what to do by 2026-10-16.	Performance Manager

DMS095 (MP-156) — SME Owner Dashboard

Simplified executive dashboard; quick decisions; essential metrics. Owner: IMS Manager. Tier 7.

Step	Step, task and purpose	Role · form	What to type
MP-156.1	Define owner dashboard requirements Task: Plan and prepare owner dashboard Define owner dashboard requirements — step 1 of 10 in DMS095 SME Owner Dashboard.	IMS Manager Register items	Items identified: 4 rows — see the table below
MP-156.2	Select owner dashboard metrics Task: Plan and prepare owner dashboard Select owner dashboard metrics — step 2 of 10 in DMS095 SME Owner Dashboard.	IMS Manager Register items	Items identified: 4 rows — see the table below
MP-156.3	Configure owner dashboard sources Task: Plan and prepare owner dashboard Configure owner dashboard sources — step 3 of 10 in DMS095 SME Owner Dashboard.	IMS Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-156.4	Design owner dashboard layout	IMS Manager	Planned activities (become actions): 3 rows — see the table

Step	Step, task and purpose	Role · form	What to type
	Task: Plan and prepare owner dashboard Design owner dashboard layout — step 4 of 10 in DMS095 SME Owner Dashboard.	Plan	below On completion: rows become actions.
MP-156.5	Set up alerts Task: Execute owner dashboard activities Set up alerts — step 5 of 10 in DMS095 SME Owner Dashboard.	IMS Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-156.6	Review owner dashboard daily Task: Execute owner dashboard activities Review owner dashboard daily — step 6 of 10 in DMS095 SME Owner Dashboard.	IMS Manager Execution	What was done: Review owner dashboard daily carried out on site execution and prefabrication yard; Owner dashboard updated. Records that prove it: — Completion (%): 63
MP-156.7	Drill owner dashboard down Task: Execute owner dashboard activities Drill owner dashboard down — step 7 of 10 in DMS095 SME Owner Dashboard.	IMS Manager Execution	What was done: Drill owner dashboard down carried out on site execution and prefabrication yard; Owner dashboard updated. Records that prove it: — Completion (%): 64
MP-156.8	Take action on owner dashboard deviations Task: Verify, record and close owner dashboard Take action on owner dashboard deviations — step 8 of 10 in DMS095 SME Owner Dashboard.	IMS Manager Execution	What was done: Take action on owner dashboard deviations carried out on site execution and prefabrication yard; Owner dashboard updated. Records that prove it: — Completion (%): 76
MP-156.9	Report on owner dashboard status Task: Verify, record and close owner dashboard Report on owner dashboard status — step 9 of 10 in DMS095 SME Owner Dashboard.	IMS Manager Communication	Communication records: 2 rows — see the table below
MP-156.10	Update owner dashboard Task: Verify, record and close owner dashboard Update owner dashboard — step 10 of 10 in DMS095 SME Owner Dashboard.	IMS Manager Change	Change made: Owner dashboard updated: BIM model clash not resolved. Reason: Customer complaint analysis Documents or records updated: —

MP-156.1 — Define owner dashboard requirements · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	ISO 9001	Requirement	Affects Owner dashboard; followed by IMS Manager.	High	Customer complaint log, Sep 2026
2	ISO 19650	Requirement	Affects Essential metrics; followed by IMS Manager.	Medium	Internal audit report, Sep 2026
3	EN 1090	Requirement	Affects Owner dashboard; followed by IMS Manager.	Medium	Process performance dashboard, Sep 2026
4	CE Marking (CPR)	Requirement	Affects Essential metrics; followed by IMS Manager.	Low	Interview with the process owner, Aug 2026

MP-156.2 — Select owner dashboard metrics · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Customer satisfaction	Indicator	Affects Owner dashboard; followed by IMS	High	Internal audit report,

#	Item	Category	Description and impact	Relevance	Source / evidence
	index		Manager.		Sep 2026
2	On-time delivery rate	Indicator	Affects Essential metrics; followed by IMS Manager.	Medium	Process performance dashboard, Sep 2026
3	First pass yield	Indicator	Affects Owner dashboard; followed by IMS Manager.	Medium	Interview with the process owner, Aug 2026
4	Cost of poor quality	Indicator	Affects Essential metrics; followed by IMS Manager.	Low	Regulatory watch bulletin, Aug 2026

MP-156.3 — Configure owner dashboard sources · Settings

#	Setting	Value	Reason
1	Configure owner dashboard sources	Enabled for site execution and prefabrication yard	Needed to produce Owner dashboard
2	Owner and notification	IMS Manager	Alerts go to the process owner

MP-156.4 — Design owner dashboard layout · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Set up alerts	Karim Tazi	2026-10-05	2026-10-19	Owner dashboard
2	Review owner dashboard daily	Karim Tazi	2026-10-10	2026-10-29	Essential metrics
3	Drill owner dashboard down	Karim Tazi	2026-10-15	2026-11-08	Owner dashboard

MP-156.5 — Set up alerts · Settings

#	Setting	Value	Reason
1	Set up alerts	Enabled for site execution and prefabrication yard	Needed to produce Owner dashboard
2	Owner and notification	IMS Manager	Alerts go to the process owner

MP-156.9 — Report on owner dashboard status · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	SME owner	E-mail	2026-10-09	Owner dashboard: what changes for you and what to do by 2026-10-23.	IMS Manager
2	SME management	Intranet	2026-10-11	Essential metrics: what changes for you and what to do by 2026-10-23.	IMS Manager

Gate — G10 — Performance reviewed

Exit criteria: KPIs measured for three periods; management review held; internal audit programme on track.

141. Open Lifecycle and select the phase card; the gate panel is on the right.
142. Tick “KPI dashboard live (mandatory, evidence required)”.
143. Tick “Management review minutes signed (mandatory, evidence required)”.
144. Tick “Internal audit programme ≥ 90% complete (mandatory, evidence required)”.
145. Tick “Owner dashboard configured (mandatory, evidence required)”.

146. Tick “Top 10 risks reviewed quarterly (mandatory, evidence required)”.
147. Sign in as Top Management (ceo@...) or the IMS Manager and select Go. For Hold or No-Go, type a comment explaining why.

E2E-11 — Audit To Assurance

Goals: Provide assurance through AI, foresight, IoT, ESG, analytics

From trigger to terminal event: Predictive analytics alert, regulatory change, or assurance requirement → Risks predicted; compliance assured; ESG and carbon reported

DMS004 (MP-065) — Intelligent Document Generation

Auto-generate documents; ensure compliance; reduce effort. Owner: Document Controller. Tier 3.

Step	Step, task and purpose	Role · form	What to type
MP-065.1	Select generated documents template Task: Plan and prepare generated documents Select generated documents template — step 1 of 8 in DMS004 Intelligent Document Generation.	Document Controller Register items	Items identified: 3 rows — see the table below
MP-065.2	Gather generated documents data Task: Plan and prepare generated documents Gather generated documents data — step 2 of 8 in DMS004 Intelligent Document Generation.	Document Controller Register items	Items identified: 3 rows — see the table below
MP-065.3	Generate generated documents draft Task: Plan and prepare generated documents Generate generated documents draft — step 3 of 8 in DMS004 Intelligent Document Generation.	Document Controller Document	Document template: TPL-PROC — Procedure Document reference: NV-AEC-QMS-DMS004-03 Version: 2.0 Content summary: Generated docs for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: —
MP-065.4	Validate generated documents against standards Task: Execute generated documents activities Validate generated documents against standards — step 4 of 8 in DMS004 Intelligent Document Generation.	Document Controller Decision	Decision criteria checked: 3 rows — see the table below Decision: Go Approver (Accountable): Document Controller Decision comment and conditions: Generated docs approved against ISO 9001; no blocking point.
MP-065.5	Route generated documents for review Task: Execute generated documents activities Route generated documents for review — step 5 of 8 in DMS004 Intelligent Document Generation.	Document Controller Execution	What was done: Route generated documents for review carried out on site execution and prefabrication yard; Generated docs updated. Records that prove it: — Completion (%): 100
MP-065.6	Publish generated documents Task: Execute generated documents activities Publish generated documents — step 6 of 8 in DMS004 Intelligent Document Generation.	Document Controller Document	Document template: TPL-PROC — Procedure Document reference: NV-AEC-QMS-DMS004-06 Version: 2.0 Content summary: Generated docs for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: —
MP-065.7	Track generated documents version Task: Verify, record and close generated documents Track generated documents version — step 7 of 8 in DMS004 Intelligent Document Generation.	Document Controller Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: stable, below target; action opened. Next analysis at the performance review.
MP-065.8	Archive generated documents	Document Controller	Closure evidence: Generated docs closed; effectiveness

Step	Step, task and purpose	Role · form	What to type
	Task: Verify, record and close generated documents Archive generated documents — step 8 of 8 in DMS004 Intelligent Document Generation.	Closure	verified on the KPI and evidence filed. Records that prove effectiveness: — Closure date: 2026-10-14

MP-065.1 — Select generated documents template · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Generated docs	Output	Affects Generated docs; followed by Document Controller.	High	Customer complaint log, Sep 2026
2	Compliance validation	Output	Affects Compliance validation; followed by Document Controller.	Medium	Internal audit report, Sep 2026
3	Approval records	Output	Affects Generated docs; followed by Document Controller.	Medium	Process performance dashboard, Aug 2026

MP-065.2 — Gather generated documents data · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Generated docs	Output	Affects Generated docs; followed by Document Controller.	High	Internal audit report, Sep 2026
2	Compliance validation	Output	Affects Compliance validation; followed by Document Controller.	Medium	Process performance dashboard, Aug 2026
3	Approval records	Output	Affects Generated docs; followed by Document Controller.	Medium	Interview with the process owner, Aug 2026

MP-065.4 — Validate generated documents against standards · Decision criteria checked

#	Criterion	Met	Evidence
1	Generated docs complete	Yes	Generated docs v1.0
2	Requirements of ISO 9001 met	Yes	Checklist of the phase gate
3	Risks reviewed	Yes	Risk register

MP-065.7 — Track generated documents version · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Generated docs); it is the KPI its owner reviews at each Monthly review.	87	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Generated docs); it is the KPI its owner reviews at each Monthly review.	96.6	>= 95%

DMS027 (MP-088) — AI Explainability and Confidence Scoring

Log AI recommendations with confidence; provide explainability; human-in-the-loop. Owner: Transformation Manager. Tier 4.

Step	Step, task and purpose	Role · form	What to type
MP-088.1	Define requirements per agent Task: Plan and prepare AI explanations	Transformation Manager Register items	Items identified: 4 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	Define requirements per agent — step 1 of 8 in DMS027 AI Explainability and Confidence Scoring.		
MP-088.2	Log agent answers with confidence score Task: Plan and prepare AI explanations Log agent answers with confidence score — step 2 of 8 in DMS027 AI Explainability and Confidence Scoring.	DynamicMS Engine Automated service task	System result confirmed: Log agent answers with confidence score: done by the DynamicMS Engine; AI recommendation logs available in the project. Records produced: —
MP-088.3	Attach source refs Task: Plan and prepare AI explanations Attach source refs — step 3 of 8 in DMS027 AI Explainability and Confidence Scoring.	Transformation Manager Execution	What was done: Attach source refs carried out on site execution and prefabrication yard; AI recommendation logs updated. Records that prove it: — Completion (%): 100
MP-088.4	Enable human review Task: Execute AI explanations activities Enable human review — step 4 of 8 in DMS027 AI Explainability and Confidence Scoring.	Transformation Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes
MP-088.5	Track AI explanations accuracy Task: Execute AI explanations activities Track AI explanations accuracy — step 5 of 8 in DMS027 AI Explainability and Confidence Scoring.	Transformation Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: stable, below target; action opened. Next analysis at the performance review.
MP-088.6	Generate AI explanations reports Task: Execute AI explanations activities Generate AI explanations reports — step 6 of 8 in DMS027 AI Explainability and Confidence Scoring.	Transformation Manager Document	Document template: TPL-PROC — Procedure Document reference: NV-AEC-QMS-DMS027-06 Version: 2.0 Content summary: AI recommendation logs for steel-frame buildings, aligned with ISO 9001; generated from the project data, then completed by the author. Generated document: —
MP-088.7	Conduct bias audits Task: Verify, record and close AI explanations Conduct bias audits — step 7 of 8 in DMS027 AI Explainability and Confidence Scoring.	Transformation Manager Execution	What was done: Conduct bias audits carried out on site execution and prefabrication yard; AI recommendation logs updated. Records that prove it: — Completion (%): 100
MP-088.8	Update AI explanations models Task: Verify, record and close AI explanations Update AI explanations models — step 8 of 8 in DMS027 AI Explainability and Confidence Scoring.	Transformation Manager AI-assisted draft	Context given to the assistant: Step: Update AI explanations models. Inputs: AI outputs; Confidence scores; Source references. Standards: ISO 9001, ISO 19650, EN 1090. Organization: Nova Build & Construct (steel-frame buildings). Suggestion outcome: Edited Final validated text: AI recommendation logs drafted with the assistant and reviewed by Transformation Manager: covers ISO 9001, ISO 19650.

MP-088.1 — Define requirements per agent · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	ISO 9001	Requirement	Affects AI recommendation logs; followed by Transformation Manager.	High	Customer complaint log, Sep 2026
2	ISO 19650	Requirement	Affects Confidence scores; followed by Transformation Manager.	Medium	Internal audit report, Sep 2026
3	EN 1090	Requirement	Affects AI recommendation logs; followed by Transformation Manager.	Medium	Process performance dashboard, Sep 2026

#	Item	Category	Description and impact	Relevance	Source / evidence
4	CE Marking (CPR)	Requirement	Affects Confidence scores; followed by Transformation Manager.	Low	Interview with the process owner, Sep 2026

MP-088.4 — Enable human review · Settings

#	Setting	Value	Reason
1	Enable human review	Enabled for site execution and prefabrication yard	Needed to produce AI recommendation logs
2	Owner and notification	Transformation Manager	Alerts go to the process owner

MP-088.5 — Track AI explanations accuracy · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (AI recommendation logs); it is the KPI its owner reviews at each Monthly review.	87	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (AI recommendation logs); it is the KPI its owner reviews at each Monthly review.	96.6	>= 95%

This phase has no gate for the project track; it closes when its last step is completed.

E2E-12 — Correction To Innovation

Goals: Drive continual improvement, innovation, automation, ecosystem

From trigger to terminal event: Improvement opportunity, innovation idea, or automation candidate → Improvements implemented; innovations deployed; ecosystem expanded

DMS093 (MP-154) — SME Growth Readiness

Prepare for growth; scale processes; ensure IMS scales. Owner: Transformation Manager. Tier 7.

Step	Step, task and purpose	Role · form	What to type
MP-154.1	Assess SME growth readiness plans Task: Plan and prepare SME growth readiness Assess SME growth readiness plans — step 1 of 10 in DMS093 SME Growth Readiness.	Transformation Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.8 Conclusion: Weighted score 3.8/5. Main gap: BIM data loss. Action recorded in the action plan.
MP-154.2	Identify SME growth readiness gaps Task: Plan and prepare SME growth readiness Identify SME growth readiness gaps — step 2 of 10 in DMS093 SME Growth Readiness.	Transformation Manager Register items	Items identified: 3 rows — see the table below
MP-154.3	Plan SME growth readiness scaling Task: Plan and prepare SME growth readiness Plan SME growth readiness scaling — step 3 of 10 in DMS093 SME Growth Readiness.	Transformation Manager Plan	Planned activities (become actions): 3 rows — see the table below On completion: rows become actions.
MP-154.4	Upgrade SME growth readiness configuration Task: Plan and prepare SME growth readiness	Transformation Manager Change	Change made: Growth readiness assessment updated: BIM model clash not resolved. Reason: Finding of the internal audit Documents or records updated: —

Step	Step, task and purpose	Role · form	What to type
	Upgrade SME growth readiness configuration — step 4 of 10 in DMS093 SME Growth Readiness.		
MP-154.5	Add SME growth readiness users Task: Execute SME growth readiness activities Add SME growth readiness users — step 5 of 10 in DMS093 SME Growth Readiness.	Transformation Manager Execution	What was done: Add SME growth readiness users carried out on site execution and prefabrication yard; Growth readiness assessment updated. Records that prove it: — Completion (%): 100
MP-154.6	Expand SME growth readiness compliance Task: Execute SME growth readiness activities Expand SME growth readiness compliance — step 6 of 10 in DMS093 SME Growth Readiness.	Transformation Manager Execution	What was done: Expand SME growth readiness compliance carried out on site execution and prefabrication yard; Growth readiness assessment updated. Records that prove it: — Completion (%): 100
MP-154.7	Add SME growth readiness standards Task: Execute SME growth readiness activities Add SME growth readiness standards — step 7 of 10 in DMS093 SME Growth Readiness.	Transformation Manager Execution	What was done: Add SME growth readiness standards carried out on site execution and prefabrication yard; Growth readiness assessment updated. Records that prove it: — Completion (%): 100
MP-154.8	Train new employees on the management system Task: Verify, record and close SME growth readiness Train new employees on the management system — step 8 of 10 in DMS093 SME Growth Readiness.	Transformation Manager Training	Session / module: Train new employees on the management system — practice session Date: 2026-11-10 Units trained: Operations Participants: 23 Effectiveness evaluation method: Quiz Effectiveness (%): 97
MP-154.9	Monitor SME growth readiness Task: Verify, record and close SME growth readiness Monitor SME growth readiness — step 9 of 10 in DMS093 SME Growth Readiness.	Transformation Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-154.10	Review SME growth readiness Task: Verify, record and close SME growth readiness Review SME growth readiness — step 10 of 10 in DMS093 SME Growth Readiness.	Transformation Manager Execution	What was done: Review SME growth readiness carried out on site execution and prefabrication yard; Growth readiness assessment updated. Records that prove it: — Completion (%): 100

MP-154.1 — Assess SME growth readiness plans · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Growth readiness assessment complete and up to date	30	3	Growth readiness assessment reviewed on 2026-10-24; 2 gaps corrected.
2	Requirements of ISO 9001 met	30	5	Checked against ISO 9001 with the checklist of the phase gate.
3	Evidence available for Scaling plans	20	4	Records filed in the project: Scaling plans.
4	Results against target	20	3	KPI Q-KPI-01 used as the measure.

MP-154.2 — Identify SME growth readiness gaps · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Growth readiness assessment	Output	Affects Growth readiness assessment; followed by Transformation Manager.	High	Internal audit report, Oct 2026
2	Scaling plans	Output	Affects Scaling plans; followed by	Medium	Process performance

#	Item	Category	Description and impact	Relevance	Source / evidence
			Transformation Manager.		dashboard, Sep 2026
3	Upgraded configuration	Output	Affects Growth readiness assessment; followed by Transformation Manager.	Medium	Interview with the process owner, Sep 2026

MP-154.3 — Plan SME growth readiness scaling · Planned activities (become actions)

#	Activity	Owner	Start	Due date	Deliverable
1	Upgrade SME growth readiness configuration	Hind Berrada	2026-11-02	2026-11-16	Growth readiness assessment
2	Add SME growth readiness users	Hind Berrada	2026-11-07	2026-11-26	Scaling plans
3	Expand SME growth readiness compliance	Hind Berrada	2026-11-12	2026-12-06	Growth readiness assessment

MP-154.9 — Monitor SME growth readiness · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Growth readiness assessment); it is the KPI its owner reviews at each Monthly review.	87	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Growth readiness assessment); it is the KPI its owner reviews at each Monthly review.	96.6	>= 95%

DMS098 (MP-159) — SME Budget-Conscious Improvement

Drive improvement within constraints; prioritize high-impact; maximize ROI. Owner: Quality Manager. Tier 7.

Step	Step, task and purpose	Role · form	What to type
MP-159.1	Collect low-cost improvements ideas Task: Plan and prepare low-cost improvements Collect low-cost improvements ideas — step 1 of 10 in DMS098 SME Budget-Conscious Improvement.	Quality Manager Register items	Items identified: 3 rows — see the table below
MP-159.2	Assess low-cost improvements cost/impact Task: Plan and prepare low-cost improvements Assess low-cost improvements cost/impact — step 2 of 10 in DMS098 SME Budget-Conscious Improvement.	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 3.8 Conclusion: Weighted score 3.8/5. Main gap: Structural failure. Action recorded in the action plan.
MP-159.3	Prioritize low-cost improvements by ROI Task: Plan and prepare low-cost improvements Prioritize low-cost improvements by ROI — step 3 of 10 in DMS098 SME Budget-Conscious Improvement.	Quality Manager Assessment	Decision matrix: 4 rows — see the table below Weighted score (1–5): 4.3 Conclusion: Weighted score 4.3/5. Main gap: weld not conforming to EN 1090. Action recorded in the action plan.
MP-159.4	Allocate low-cost improvements budget Task: Plan and prepare low-cost improvements Allocate low-cost improvements	Quality Manager Assignment	Role: Quality Manager Person (from the OBS): Nadia Chraibi Organization units covered: Quality RACSI of the macro process: R: Quality Manager · A: IMS Manager · C: Risk Manager · S: Document Controller · I: Top

Step	Step, task and purpose	Role · form	What to type
	budget — step 4 of 10 in DMS098 SME Budget-Conscious Improvement.		Management
MP-159.5	Implement low-cost improvements Task: Execute low-cost improvements activities Implement low-cost improvements — step 5 of 10 in DMS098 SME Budget-Conscious Improvement.	Quality Manager Configuration	Settings: 2 rows — see the table below Tested before use: Yes

Quality Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-159.7	Measure low-cost improvements ROI Task: Execute low-cost improvements activities Measure low-cost improvements ROI — step 7 of 10 in DMS098 SME Budget-Conscious Improvement.	Quality Manager Measurement	Indicators measured: 2 rows — see the table below Analysis of gaps and trend: Trend over the last three months: improving. Next analysis at the performance review.
MP-159.8	Standardize low-cost improvements Task: Verify, record and close low-cost improvements Standardize low-cost improvements — step 8 of 10 in DMS098 SME Budget-Conscious Improvement.	Quality Manager Change	Change made: Improvement pipeline updated: BIM model clash not resolved. Reason: Finding of the internal audit Documents or records updated: —
MP-159.9	Recognize contributors to low-cost improvements Task: Verify, record and close low-cost improvements Recognize contributors to low-cost improvements — step 9 of 10 in DMS098 SME Budget-Conscious Improvement.	Quality Manager Execution	What was done: Recognize contributors to low-cost improvements carried out on site execution and prefabrication yard; Improvement pipeline updated. Records that prove it: — Completion (%): 100
MP-159.10	Report on low-cost improvements status Task: Verify, record and close low-cost improvements Report on low-cost improvements status — step 10 of 10 in DMS098 SME Budget-Conscious Improvement.	Quality Manager Communication	Communication records: 2 rows — see the table below

MP-159.1 — Collect low-cost improvements ideas · Items identified

#	Item	Category	Description and impact	Relevance	Source / evidence
1	Digitize steel-frame buildings records to cut cycle time	Opportunity	Affects Improvement pipeline; followed by Quality Manager.	High	Customer complaint log, Oct 2026
2	Extend certification to win steel-frame buildings tenders	Opportunity	Affects Prioritized initiatives; followed by Quality Manager.	Medium	Internal audit report, Oct 2026
3	Supplier development programme for steel-frame buildings	Opportunity	Affects Improvement pipeline; followed by Quality Manager.	Medium	Process performance dashboard, Oct 2026

MP-159.2 — Assess low-cost improvements cost/impact · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Improvement pipeline complete and up to date	30	3	Improvement pipeline reviewed on 2026-11-12; 2 gaps corrected.

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
2	Requirements of ISO 9001 met	30	3	Checked against ISO 9001 with the checklist of the phase gate.
3	Evidence available for Prioritized initiatives	20	5	Records filed in the project: Prioritized initiatives.
4	Results against target	20	5	KPI Q-KPI-01 used as the measure.

MP-159.3 — Prioritize low-cost improvements by ROI · Decision matrix

#	Criterion	Weight (%)	Score (1–5)	Facts that justify the score
1	Improvement pipeline complete and up to date	30	5	Improvement pipeline reviewed on 2026-11-14; 2 gaps corrected.
2	Requirements of ISO 9001 met	30	4	Checked against ISO 9001 with the checklist of the phase gate.
3	Evidence available for Prioritized initiatives	20	5	Records filed in the project: Prioritized initiatives.
4	Results against target	20	3	KPI Q-KPI-01 used as the measure.

MP-159.5 — Implement low-cost improvements · Settings

#	Setting	Value	Reason
1	Implement low-cost improvements	Enabled for site execution and prefabrication yard	Needed to produce Improvement pipeline
2	Owner and notification	Quality Manager	Alerts go to the process owner

MP-159.6 — Monitor low-cost improvements · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Improvement pipeline); it is the KPI its owner reviews at each Monthly review.	87	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Improvement pipeline); it is the KPI its owner reviews at each Monthly review.	96.6	>= 95%

MP-159.7 — Measure low-cost improvements ROI · Indicators measured

#	KPI	Why this KPI for this step	Measured value	Target
1	Q-KPI-01 — Customer satisfaction index	Customer satisfaction index measures the result of this macro process (Improvement pipeline); it is the KPI its owner reviews at each Monthly review.	87	>= 85%
2	Q-KPI-02 — On-time delivery rate	On-time delivery rate measures the result of this macro process (Improvement pipeline); it is the KPI its owner reviews at each Monthly review.	96.6	>= 95%

MP-159.10 — Report on low-cost improvements status · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	SME owner	Intranet	2026-09-22	Improvement pipeline: what changes for you and what to do by 2026-10-06.	Quality Manager
2	SME management	Notice board	2026-09-24	Prioritized initiatives: what changes for you and what to do by 2026-10-06.	Quality Manager

DMS100 (MP-161) — SME Collaborative Community

Connect with peers; share knowledge; reduce isolation; accelerate learning. Owner: Transformation Manager.
Tier 7.

Step	Step, task and purpose	Role · form	What to type
MP-161.1	Join SME community Task: Plan and prepare SME community Join SME community — step 1 of 10 in DMS100 SME Collaborative Community.	Transformation Manager Execution	What was done: Join SME community carried out on site execution and prefabrication yard; Community profile updated. Records that prove it: — Completion (%): 100
MP-161.2	Create SME community profile Task: Plan and prepare SME community Create SME community profile — step 2 of 10 in DMS100 SME Collaborative Community.	Transformation Manager Execution	What was done: Create SME community profile carried out on site execution and prefabrication yard; Community profile updated. Records that prove it: — Completion (%): 100
MP-161.3	Browse SME community Task: Plan and prepare SME community Browse SME community — step 3 of 10 in DMS100 SME Collaborative Community.	Transformation Manager Execution	What was done: Browse SME community carried out on site execution and prefabrication yard; Community profile updated. Records that prove it: — Completion (%): 100
MP-161.4	Ask questions about SME community Task: Plan and prepare SME community Ask questions about SME community — step 4 of 10 in DMS100 SME Collaborative Community.	Transformation Manager Execution	What was done: Ask questions about SME community carried out on site execution and prefabrication yard; Community profile updated. Records that prove it: — Completion (%): 100
MP-161.5	Share SME community Task: Execute SME community activities Share SME community — step 5 of 10 in DMS100 SME Collaborative Community.	Transformation Manager Communication	Communication records: 2 rows — see the table below
MP-161.6	Participate in SME community activities Task: Execute SME community activities Participate in SME community activities — step 6 of 10 in DMS100 SME Collaborative Community.	Transformation Manager Execution	What was done: Participate in SME community activities carried out on site execution and prefabrication yard; Community profile updated. Records that prove it: — Completion (%): 100
MP-161.7	Attend SME community events Task: Execute SME community activities Attend SME community events — step 7 of 10 in DMS100 SME Collaborative Community.	Transformation Manager Execution	What was done: Attend SME community events carried out on site execution and prefabrication yard; Community profile updated. Records that prove it: — Completion (%): 100
MP-161.8	Collaborate on SME community Task: Verify, record and close SME community Collaborate on SME community — step 8 of 10 in DMS100 SME Collaborative Community.	Transformation Manager Execution	What was done: Collaborate on SME community carried out on site execution and prefabrication yard; Community profile updated. Records that prove it: — Completion (%): 100
MP-161.9	Rate SME community contributions Task: Verify, record and close SME community Rate SME community contributions — step 9 of 10 in DMS100 SME Collaborative Community.	Transformation Manager Execution	What was done: Rate SME community contributions carried out on site execution and prefabrication yard; Community profile updated. Records that prove it: — Completion (%): 100
MP-161.10	Report SME community value Task: Verify, record and close SME community	Transformation Manager Communication	Communication records: 2 rows — see the table below

Step	Step, task and purpose	Role · form	What to type
	Report SME community value — step 10 of 10 in DMS100 SME Collaborative Community.		

MP-161.5 — Share SME community · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	SME owner	E-mail	2026-12-09	Community profile: what changes for you and what to do by 2026-12-23.	Transformation Manager
2	SME employees	Intranet	2026-12-11	Discussion records: what changes for you and what to do by 2026-12-23.	Transformation Manager

MP-161.10 — Report SME community value · Communication records

#	Audience	Channel	Date	Key message	Communicated by
1	SME owner	Intranet	2026-12-18	Community profile: what changes for you and what to do by 2027-01-01.	Transformation Manager
2	SME employees	Notice board	2026-12-20	Discussion records: what changes for you and what to do by 2027-01-01.	Transformation Manager

This phase has no gate for the project track; it closes when its last step is completed.

Records created along the run

Besides the workflow steps, the run creates records in the Records and Governance menus. The examples below are the ones seeded in the demonstration; type the same values to reproduce them.

Report a problem (nonconformity)

148. Open Records › Nonconformities and select Report a problem.
149. Title: type “weld not conforming to EN 1090”.
150. Description: type “Detected on 2025-12-10 at site execution and prefabrication yard. Immediate containment applied and affected items segregated.”.
151. Source: choose Process. Criticality: choose Minor.
152. Select Submit. A Critical problem raises an alert to the Quality Manager and top management.
153. Open the nonconformity and select Move to Analysis, then type the root cause (“Insufficient training of new operators”).
154. Select Add action: type the title, choose an owner and a different evaluator, and a due date.
155. When all actions are closed, move to Verification then Closed; type the lessons learned (what went well, what did not, recommendation).

Record a risk

156. Open Governance › Risks and opportunities and select Add.
157. Title: “Business interruption”; kind Risk; likelihood 5; impact 4.
158. Treatment: “Reduce”, then select Save. The heatmap updates immediately.

Code	Kind	Title	L × I
RSK-19	Risk	Business interruption	5 × 4 = 20

Code	Kind	Title	L × I
AEC-R05	Risk	Schedule delays	5 × 4 = 20
AEC-R06	Risk	Cost overruns	4 × 5 = 20
AEC-R07	Risk	Subcontractor performance	4 × 5 = 20
O-02	Opportunity	Poka-yoke on site execution and prefabrication yard	5 × 4 = 20

Record a KPI measurement

159. Open Governance › KPIs and select KPI-01 — Policy review on time rate.
160. In Record a measurement, type the period (for example 2026-09) and the value (for example 100); target 100%.
161. Select Record. A value off target raises a KPI alert to the Performance Manager and the IMS Manager.

Audit programme

Code	Audit	Standard	Planned	Status
AUD-NV-AEC-QMS-01	Internal audit — People To Capability	ISO 9001	2026-03-15	Completed
AUD-NV-AEC-QMS-02	Internal audit — Requirements To Delivery	ISO 9001	2026-05-14	Completed
AUD-NV-AEC-QMS-03	Supplier audit — Requirements To Delivery	ISO 9001	2026-06-13	Completed
AUD-NV-AEC-QMS-04	Mock certification audit — Compliance To Achievement	ISO 9001, ISO 19650, EN 1090, CE Marking (CPR)	2026-07-23	Completed
AUD-NV-AEC-QMS-05	Internal audit — Verification To Preparedness	ISO 9001	2026-09-11	Completed
AUD-NV-AEC-QMS-06	Certification audit (stage 2) — Compliance To Achievement	ISO 9001	2026-10-01	Planned
AUD-NV-AEC-QMS-07	Surveillance audit — Monitoring To Evaluation	ISO 9001	2026-11-27	Planned

To add a finding: open the audit, select Add finding, choose the type (Major, Minor, Observation, OFI), type the clause and the finding; for Major and Minor choose the action owner and a different evaluator.

Documented information generated from the templates

Every document below is generated from an IMS template and filled with the data of this run (issues, interested parties, objectives, RACSI, KPIs, risks, audits, nonconformities...). Open Records › Documents and select Download to get it in PDF, Word or Excel.

Code	Title	Template	Version	Status
NV-AEC-QMS-AUDPRG	Internal audit programme	TPL-AUDPRG	1.0	Published
NV-AEC-QMS-AUDREP-01	Internal audit report — AUD-NV-AEC-QMS-01	TPL-AUDREP	1.0	Published

To revise a document: open it, select New version, choose Minor or Major, type the summary of change and choose whether to regenerate the content from the current project data; then Submit for review. Another user approves and publishes it; the author cannot approve their own version.

Export the management review report

162. Open Insight > Reports.
163. Choose the format (PDF, Excel, Word or CSV) and the language.
164. Select Download on Management review input. The report compiles objectives, KPIs, audit results, nonconformities and phase status.

The screenshot shows the DynamicMS web application interface. At the top, the header includes the DynamicMS logo, a project breadcrumb 'NV-AEC-QMS — QMS full run 2025-2026 — Nov', a language dropdown set to 'EN', and a user profile for 'Nadia Chraïbi'. The left sidebar contains a navigation menu with sections: FAVORITES (Home, Lifecycle, Alerts), WORK (Home, My tasks, Lifecycle, Alerts), GOVERNANCE (Risks and opportunities, KPIs, RACSI matrix, Rules and controls), and RECORDS (Nonconformities). The main content area is titled 'RECORDS' and 'Nonconformities'. It includes a sub-header 'Problems move through five stages: open, analysis, action, verification and closure with lessons learned.' and a '+ Report a problem' button. Below this is a filter bar showing 'Open - 1', 'Closed - 5', and 'All'. A table displays the nonconformity data:

Code	Title	Source	Criticality	Stage	Detected	Owner	Actions
NC-NV-AEC-QMS-006	Late delivery of site execution and prefabrication yard batch	Supplier	Minor	Action	23 Aug 2026	Julien Moreau	2

Figure — Nonconformity register of the project.

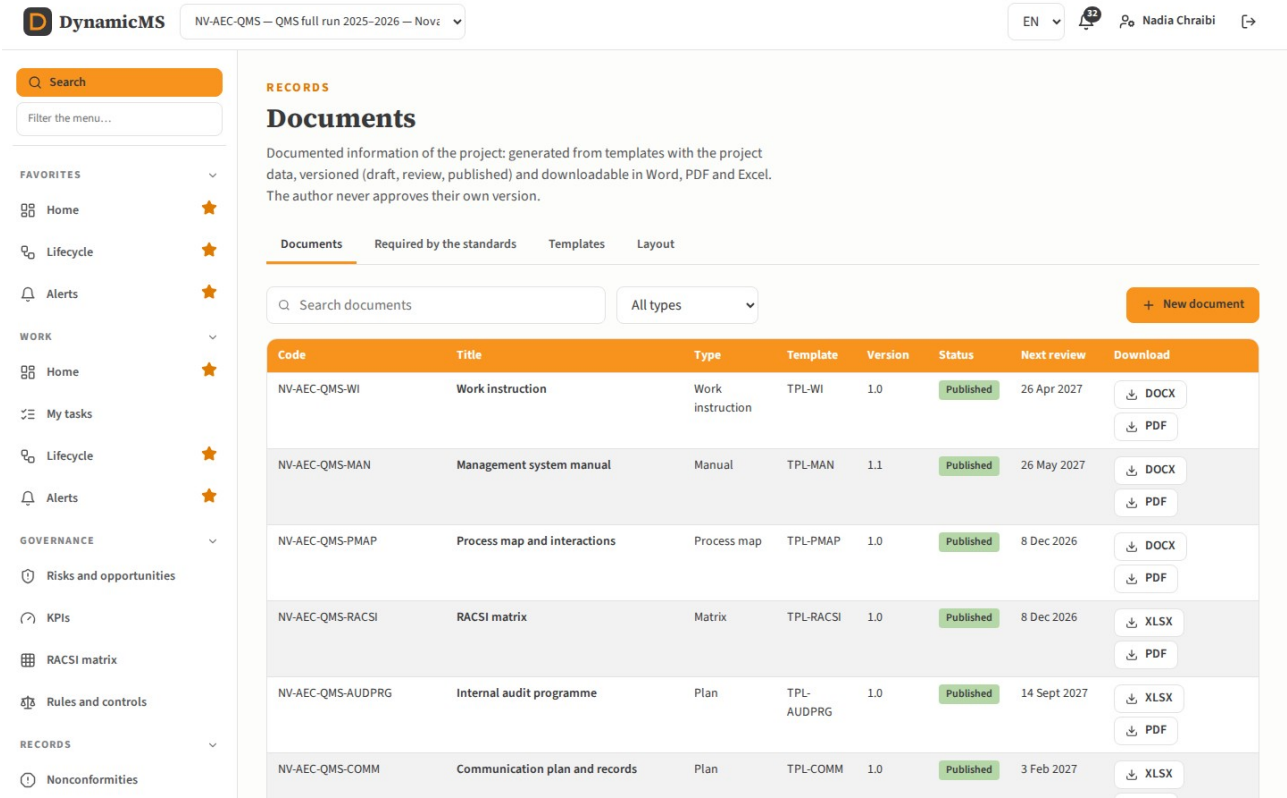

Figure — Documents: documented information generated from the templates, with versions and downloads.

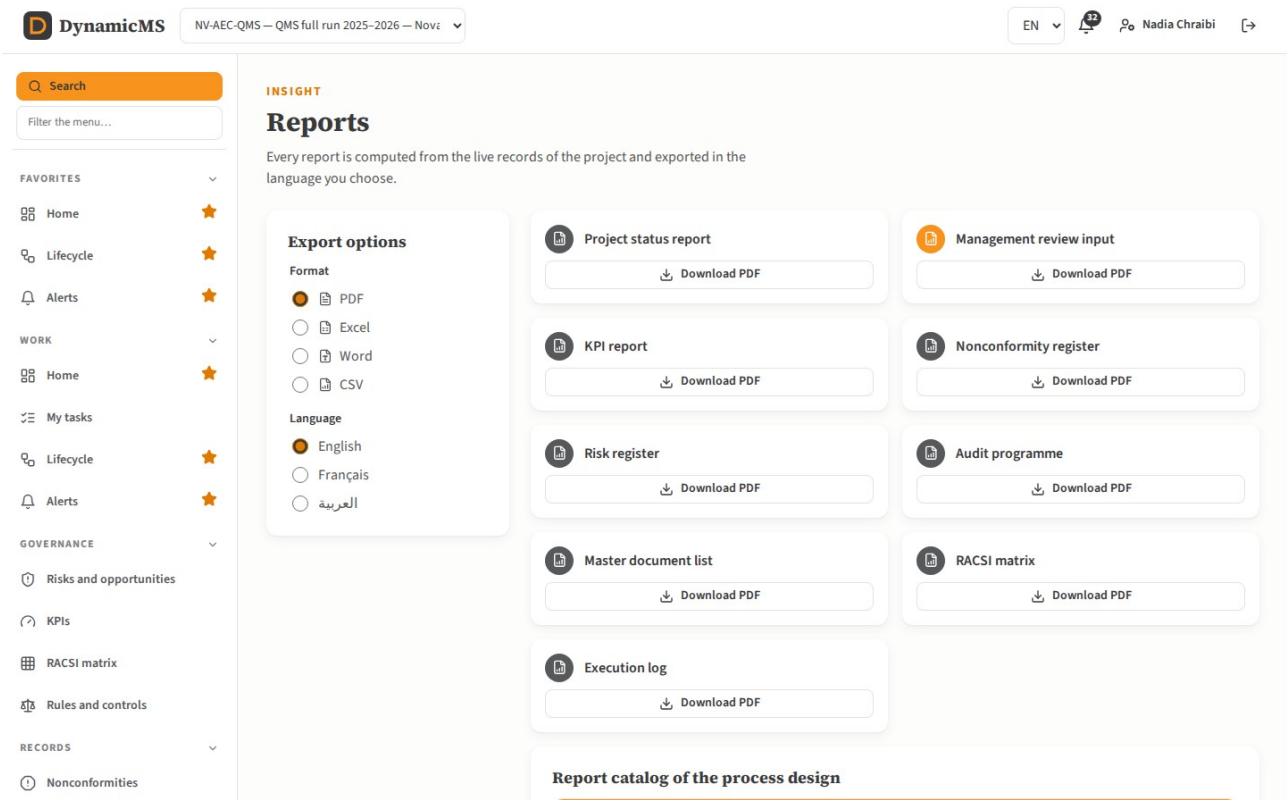

Figure — Reports: choose the format and language, then download.

Appendix — Frequent questions

Question	Answer
I cannot complete a step.	The step is assigned to another role, or its phase gate is passed. Sign in with the role shown on the step, or ask the IMS Manager.
The Go button is disabled.	Some steps of the phase are still open. The gate panel shows how many.
Can the same person own and evaluate an action?	No. The application refuses it on screen and on the server.
Where are my changes recorded?	Every change is written to the audit trail (Administration › Audit trail) and versioned records keep their history.
Does the AI send my data outside?	Only if your administrator enables an external language model in Administration › AI models. Otherwise answers are built from DynamicMS content and your records. View prompt shows what would be sent.
Where are the records produced by a step?	The step shows them under Records produced by this step and Documents of this step: actions (Action plan), objectives (Registers), RACSI (RACSI matrix), KPI values (KPIs) and documents (Documents).
