About this guide

This guide, written by POWERACT Consulting, walks through complete runs of a management system in DynamicMS: every end-to-end phase, macro process, task and step, with the values to type in each form. The values come from the demonstration data seeded with the application, so the screens match the guide.

- **Audience.** IMS, quality and HSE managers, process owners, auditors and top management.
- **Conventions.** Menu paths are written Menu › Screen. Values to type are shown after the field name; list values are chosen as written.
- **Scenarios.** Scenario 1: SME QMS, any sector (ISO 9001); Scenario 2: SME QHSE (ISO 9001, 14001, 45001); Scenario 3: SME QMS for AEC & Construction (ISO 9001, ISO 19650, EN 1090).

Getting started

Sign in

1. Open <http://localhost:5173> in Chrome, Edge, Firefox or Safari.
2. Type your e-mail (for example ims@atlas-sme.example) and the password [Demo@2026](#), then select Sign in.
3. Choose the language with the EN / FR / ع selector at the top right. Arabic switches the whole layout to right-to-left.
4. Check the project shown in the header switcher. Every screen works on the selected project; change it at any time.

The navigation shell

- **Menu groups.** Work, Governance, Records, Insight, Intelligence, Design and Organization. Select a group title to collapse or expand it.
- **Favorites.** Point at a menu item and select the star; favorites appear in the first group.
- **Dock and pin.** The buttons at the bottom of the menu dock it at the start, end, top or bottom, and pin or unpin it. Unpinned, the menu slides in from the edge handle.
- **Mobile.** Below tablet width the menu becomes a drawer opened with the menu button; Escape closes it.
- **Alerts bell.** Shows the number of unread alerts of the project; select it to open the notification center.

How a lifecycle runs

Each project runs the end-to-end (E2E) processes of its management system in order, from E2E-01 Context To Strategy to E2E-12 Correction To Innovation. An E2E phase groups macro processes (MP); each macro process is made of tasks, and each task of workflow steps. Every step has one input form. When all steps of a phase are complete, its gate is decided (Go, Hold or No-Go) after the gate checklist is ticked.

5. Open Lifecycle and select the phase card (E2E-01 first).
6. Select a macro process in the table to see its tasks and steps.

7. Select a step. Read What to record, fill in the fields as shown in this guide, then select Complete step. Use Save draft to keep partial input.
8. The application moves you to the next step. When a phase is complete, tick its gate checklist and record the gate decision (top management or the IMS Manager).
9. To correct a completed step, select Reopen and type a justification; the previous value is kept as a version. A step cannot be reopened once its phase gate is passed.

Input forms

Seventeen form kinds cover the 1,572 steps of the process design. The table lists the fields of each kind; required fields are marked with an asterisk on screen.

Form	Fields
Periodicity	Frequency (list), Next due date, Scope / notes
Register items	Items identified (one per line), Source / evidence
Assessment	Score 1–5 (buttons), Rationale and facts
Decision	Decision (Go, No-Go, Hold), Approver (role), Comment — required for No-Go
Document	Document reference, Version, Summary
Communication	Audience, Channel (list), Message
Training	Session, Participants, Effectiveness (%)
Monitoring	Metric, Value, Target, Comment
Plan	Planned activities (one per line), Start, End
Execution	Evidence of execution, Completion (%)
Assignment	Role (list), Person, Scope
Configuration	Setting, Value, Notes
Update	What changed, Reason
Closure	Closure evidence, Closure date
Escalation	Escalated to (role), Reason
AI-assisted	Context given to the AI, Outcome (Accepted, Edited, Rejected), Final validated text
Automatic service	Result (filled by the DynamicMS Engine; no input)

Scenario 1 — SME QMS, any sector (ISO 9001)

Organization: Atlas Universal SME (AT-UNI), SME company, vertical UNI, 197 employees, independent organization.

Project: AT-UNI-QMS — QMS full run 2025–2026 — Atlas Universal SME. Management system QMS, mode SME, track TRK-STANDARD. Standards: ISO 9001, ISO 14001, ISO 45001. Start 2025-11-15, end 2026-12-15.

Configuration: Solution Pack DMS-SME, capability packs DMS-CERT, DMS-AI, add-ons ADD-04.

Create the project

10. Sign in as the IMS Manager and open Organization › New project.
11. Select Manual.
12. Name: type “QMS full run 2025–2026 — Atlas Universal SME”. Management system: QMS.
Start date: 2025-11-15.
13. Tick the phases that need a gate (for an SME, the track decides: Light E2E-01 and E2E-10;
Standard adds E2E-04 and E2E-09; Advanced adds E2E-03 and E2E-08).
14. Set the complexity levels below and keep the recommended track (TRK-STANDARD); select
Create project.

Criterion	Weight	Level to choose
CX-01	20	4
CX-02	10	3
CX-03	20	3
CX-04	15	2
CX-05	15	2
CX-06	10	2
CX-07	10	3

Resulting complexity score: 45 / 100; recommended track TRK-STANDARD, chosen TRK-STANDARD.

Note. The demonstration database already contains this project with its full run. To practise, create a copy with another name, or open the seeded project and follow the steps that are still open.

Run the lifecycle, phase by phase

The run has 10 phases, 61 macro processes and 620 steps. For each step the tables give the step identifier, the responsible role, the form and what to type in each field. Values between quotes are typed as shown; choose list values as written.

E2E-01 — Context To Strategy

Goals: Define context, policy, strategy, objectives, compliance, governance

From trigger to terminal event: Strategic planning cycle, management review output, or significant context change → Approved policy, strategy, objectives, risk register, compliance framework in place

Records created along the run

Besides the workflow steps, the run creates records in the Records and Governance menus. The examples below are the ones seeded in the demonstration; type the same values to reproduce them.

Report a problem (nonconformity)

39. Open Records › Nonconformities and select Report a problem.
40. Title: type “job sheet not signed”.
41. Description: type “Detected on 2025-12-10 at service delivery. Immediate containment applied and affected items segregated.”.
42. Source: choose Process. Criticality: choose Minor.
43. Select Submit. A Critical problem raises an alert to the Quality Manager and top management.
44. Open the nonconformity and select Move to Analysis, then type the root cause (“Insufficient training of new operators”).
45. Select Add action: type the title, choose an owner and a different evaluator, and a due date.
46. When all actions are closed, move to Verification then Closed; type the lessons learned (what went well, what did not, recommendation).

Record a risk

47. Open Governance › Risks and opportunities and select Add.
48. Title: “Reputation (complaints, incidents)”; kind Risk; likelihood 5; impact 5.
49. Treatment: “Reduce”, then select Save. The heatmap updates immediately.

Code	Kind	Title	L × I
UNI-R07	Risk	Reputation (complaints, incidents)	5 × 5 = 25
RSK-19	Risk	Business interruption	5 × 4 = 20
UNI-R05	Risk	People (key person, skills)	4 × 5 = 20
UNI-R06	Risk	Technology (system, cyber)	4 × 5 = 20
O-02	Opportunity	Poka-yoke on service delivery	5 × 4 = 20

Record a KPI measurement

50. Open Governance › KPIs and select KPI-01 — Policy review on time rate.
51. In Record a measurement, type the period (for example 2026-09) and the value (for example 96.6); target 100%.
52. Select Record. A value off target raises a KPI alert to the Performance Manager and the IMS Manager.

Audit programme

Code	Audit	Standard	Planned	Status
AUD-AT-UNI-QMS-01	Internal audit — People To Capability	ISO 9001	2026-03-15	Completed
AUD-AT-UNI-QMS-02	Internal audit — Requirements To Delivery	ISO 9001	2026-05-14	Completed

Export the management review report

53. Open Insight › Reports.

54. Choose the format (PDF, Excel, Word or CSV) and the language.

55. Select Download on Management review input. The report compiles objectives, KPIs, audit results, nonconformities and phase status.

The screenshot shows the 'Nonconformities' section of the DynamicMS application. The left sidebar contains a navigation menu with categories: FAVORITES, WORK, GOVERNANCE, and RECORDS. The 'Nonconformities' item is highlighted under the RECORDS category. The main content area is titled 'RECORDS' and 'Nonconformities'. It includes a sub-header 'Problems move through five stages: open, analysis, action, verification and closure with lessons learned.' and a '+ Report a problem' button. Below this is a filter bar showing 'Open - 1', 'Closed - 5', and 'All'. A table lists the nonconformities with columns: Code, Title, Source, Criticality, Stage, Detected, Owner, and Actions. The table contains one entry: NC-AT-UNI-QMS-006, Late delivery of spare parts batch, Supplier, Minor, Action, 23 Aug 2026, Claire Martin, 2.

Code	Title	Source	Criticality	Stage	Detected	Owner	Actions
NC-AT-UNI-QMS-006	Late delivery of spare parts batch	Supplier	Minor	Action	23 Aug 2026	Claire Martin	2

Figure — Nonconformity register of the project.

The screenshot shows the 'Reports' section of the DynamicMS application. The left sidebar is identical to the previous screenshot, with 'Nonconformities' highlighted. The main content area is titled 'INSIGHT' and 'Reports'. It includes a sub-header 'Every report is computed from the live records of the project and exported in the language you choose.' Below this is an 'Export options' panel with 'Format' (PDF, Excel, Word, CSV) and 'Language' (English, Français, العربية) dropdowns. To the right, there are eight report cards, each with a 'Download PDF' button: Project status report, Management review input, KPI report, Nonconformity register, Risk register, Audit programme, Master document list, and RACSI matrix. At the bottom, there is a 'Report catalog of the process design' section.

Create the project

56. Sign in as the IMS Manager and open Organization › New project.

57. Select Manual.

58. Name: type “QHSE full run 2025–2026 — Atlas Universal SME”. Management system: QHSE.
Start date: 2025-12-01.

59. Tick the phases that need a gate (for an SME, the track decides: Light E2E-01 and E2E-10;
Standard adds E2E-04 and E2E-09; Advanced adds E2E-03 and E2E-08).

60. Set the complexity levels below and keep the recommended track (TRK-STANDARD); select
Create project.

Criterion	Weight	Level to choose
CX-01	20	3
CX-02	10	3
CX-03	20	3
CX-04	15	3
CX-05	15	3
CX-06	10	3

Run the lifecycle, phase by phase

The run has 10 phases, 61 macro processes and 620 steps. For each step the tables give the step identifier, the responsible role, the form and what to type in each field. Values between quotes are typed as shown; choose list values as written.

E2E-01 — Context To Strategy

Goals: Define context, policy, strategy, objectives, compliance, governance

From trigger to terminal event: Strategic planning cycle, management review output, or significant context change → Approved policy, strategy, objectives, risk register, compliance framework in place

This phase has no gate for the project track; it closes when its last step is completed.

Records created along the run

Besides the workflow steps, the run creates records in the Records and Governance menus. The examples below are the ones seeded in the demonstration; type the same values to reproduce them.

Report a problem (nonconformity)

85. Open Records › Nonconformities and select Report a problem.
86. Title: type “job sheet not signed”.
87. Description: type “Detected on 2025-12-25 at service delivery. Immediate containment applied and affected items segregated.”.
88. Source: choose Process. Criticality: choose Minor.
89. Select Submit. A Critical problem raises an alert to the Quality Manager and top management.
90. Open the nonconformity and select Move to Analysis, then type the root cause (“Preventive maintenance interval too long”).
91. Select Add action: type the title, choose an owner and a different evaluator, and a due date.
92. When all actions are closed, move to Verification then Closed; type the lessons learned (what went well, what did not, recommendation).

Record a risk

93. Open Governance › Risks and opportunities and select Add.
94. Title: “Technology (system, cyber)”; kind Risk; likelihood 5; impact 5.
95. Treatment: “Reduce”, then select Save. The heatmap updates immediately.

Code	Kind	Title	L × I
UNI-R06	Risk	Technology (system, cyber)	5 × 5 = 25
RSK-19	Risk	Business interruption	5 × 4 = 20
UNI-R02	Risk	Operational (process failure, supply chain)	5 × 4 = 20
UNI-R03	Risk	Compliance (regulatory, certification)	5 × 4 = 20
UNI-R05	Risk	People (key person, skills)	5 × 4 = 20

Record a KPI measurement

96. Open Governance › KPIs and select KPI-01 — Policy review on time rate.
97. In Record a measurement, type the period (for example 2026-09) and the value (for example 99.2); target 100%.
98. Select Record. A value off target raises a KPI alert to the Performance Manager and the IMS Manager.

Audit programme

Code	Audit	Standard	Planned	Status
AUD-AT-UNI-QHSE-01	Internal audit — People To Capability	ISO 9001	2026-03-31	Completed
AUD-AT-UNI-QHSE-02	Internal audit — Requirements To Delivery	ISO 9001	2026-05-30	Completed
AUD-AT-UNI-QHSE-03	Internal audit — Risk To Resilience	ISO 14001	2026-06-19	Completed
AUD-AT-UNI-QHSE-04	Supplier audit — Requirements To Delivery	ISO 9001	2026-06-29	Completed

Code	Audit	Standard	Planned	Status
AUD-AT-UNI-QHSE-05	Mock certification audit — Compliance To Achievement	ISO 9001, ISO 14001, ISO 45001	2026-08-08	Completed
AUD-AT-UNI-QHSE-06	Internal audit — Verification To Preparedness	ISO 45001	2026-09-27	Completed
AUD-AT-UNI-QHSE-07	Certification audit (stage 2) — Compliance To Achievement	ISO 9001, ISO 14001, ISO 45001	2026-10-17	Planned
AUD-AT-UNI-QHSE-08	Surveillance audit — Monitoring To Evaluation	ISO 9001, ISO 14001, ISO 45001	2026-11-27	Planned

To add a finding: open the audit, select Add finding, choose the type (Major, Minor, Observation, OFI), type the clause and the finding; for Major and Minor choose the action owner and a different evaluator.

Documented information

Code	Title	Type	Version	Status

To revise a document: open it, select New version, choose Minor or Major, type the summary of change and the content, then Submit for review. Another user approves and publishes it; the author cannot approve their own version.

Export the management review report

99. Open Insight › Reports.

100. Choose the format (PDF, Excel, Word or CSV) and the language.

101. Select Download on Management review input. The report compiles objectives, KPIs, audit results, nonconformities and phase status.

The screenshot shows the 'Nonconformities' section of the DynamicMS application. The left sidebar contains navigation menus for FAVORITES, WORK, GOVERNANCE, and RECORDS. The 'RECORDS' menu is expanded, showing 'Nonconformities' as the selected item. The main content area is titled 'Nonconformities' and includes a description: 'Problems move through five stages: open, analysis, action, verification and closure with lessons learned.' Below this is a filter bar with 'Open - 2', 'Closed - 4', and 'All' options. A table lists two nonconformities:

Code	Title	Source	Criticality	Stage	Detected	Owner	Actions
NC-AT-UNI-QHSE-006	Late delivery of technical services batch	Supplier	Minor	Action	24 Aug 2026	Julien Moreau	2
NC-AT-UNI-QHSE-005	Obsolete work instruction found at spare parts	Audit	Minor	Verification	7 Jul 2026	Julien Moreau	2

A '+ Report a problem' button is located in the top right corner of the main content area.

Figure — Nonconformity register of the project.

The screenshot shows the 'Reports' section of the DynamicMS application. The left sidebar is identical to the previous figure. The main content area is titled 'Reports' and includes a description: 'Every report is computed from the live records of the project and exported in the language you choose.' Below this is an 'Export options' panel with the following settings:

- Format:** PDF (selected), Excel, Word, CSV
- Language:** English (selected), Français, العربية

To the right of the export options are ten report cards, each with a 'Download PDF' button:

- Project status report
- KPI report
- Risk register
- Master document list
- Execution log
- Management review input
- Nonconformity register
- Audit programme
- RACSI matrix

At the bottom of the main content area is a section titled 'Report catalog of the process design'.

Create the project

102. Sign in as the IMS Manager and open Organization › New project.
103. Select With AI.
104. Short description: type “QMS certification for Nova Build & Construct before the customer audit, with a small team.”
105. Select Draft the project, keep the suggested items ticked, select Apply accepted items.
106. Name: type “QMS full run 2025–2026 — Nova Build & Construct”; check the track (TRK-STANDARD) and the complexity levels below, then select Create project.

Criterion	Weight	Level to choose
CX-01	20	1
CX-02	10	3
CX-03	20	2
CX-04	15	2
CX-05	15	3

Records created along the run

Besides the workflow steps, the run creates records in the Records and Governance menus. The examples below are the ones seeded in the demonstration; type the same values to reproduce them.

Report a problem (nonconformity)

131. Open Records › Nonconformities and select Report a problem.
132. Title: type “weld not conforming to EN 1090”.
133. Description: type “Detected on 2025-12-10 at site execution and prefabrication yard. Immediate containment applied and affected items segregated.”.
134. Source: choose Process. Criticality: choose Minor.
135. Select Submit. A Critical problem raises an alert to the Quality Manager and top management.

136. Open the nonconformity and select Move to Analysis, then type the root cause (“Insufficient training of new operators”).
137. Select Add action: type the title, choose an owner and a different evaluator, and a due date.
138. When all actions are closed, move to Verification then Closed; type the lessons learned (what went well, what did not, recommendation).

Record a risk

139. Open Governance > Risks and opportunities and select Add.
140. Title: “Safety incidents”; kind Risk; likelihood 5; impact 5.
141. Treatment: “Reduce”, then select Save. The heatmap updates immediately.

Code	Kind	Title	L × I
AEC-R04	Risk	Safety incidents	5 × 5 = 25
RSK-19	Risk	Business interruption	5 × 4 = 20
AEC-R07	Risk	Subcontractor performance	4 × 5 = 20
O-02	Opportunity	Poka-yoke on site execution and prefabrication yard	4 × 4 = 16
RSK-01	Risk	Use of an obsolete document version	5 × 3 = 15

Record a KPI measurement

142. Open Governance > KPIs and select KPI-01 — Policy review on time rate.
143. In Record a measurement, type the period (for example 2026-09) and the value (for example 100); target 100%.
144. Select Record. A value off target raises a KPI alert to the Performance Manager and the IMS Manager.

Audit programme

Code	Audit	Standard	Planned	Status
AUD-NV-AEC-QMS-01	Internal audit — People To Capability	ISO 9001	2026-03-15	Completed
AUD-NV-AEC-QMS-02	Internal audit — Requirements To Delivery	ISO 9001	2026-05-14	Completed
AUD-NV-AEC-QMS-03	Supplier audit — Requirements To Delivery	ISO 9001	2026-06-13	Completed
AUD-NV-AEC-QMS-04	Mock certification audit — Compliance To Achievement	ISO 9001, ISO 19650, EN 1090, CE Marking (CPR)	2026-07-23	Completed
AUD-NV-AEC-QMS-05	Internal audit — Verification To Preparedness	ISO 9001	2026-09-11	Completed
AUD-NV-AEC-QMS-06	Certification audit (stage 2) — Compliance To Achievement	ISO 9001	2026-10-01	Planned
AUD-NV-AEC-QMS-07	Surveillance audit — Monitoring To Evaluation	ISO 9001	2026-11-27	Planned

To add a finding: open the audit, select Add finding, choose the type (Major, Minor, Observation, OFI), type the clause and the finding; for Major and Minor choose the action owner and a different evaluator.

Export the management review report

145. Open Insight > Reports.
146. Choose the format (PDF, Excel, Word or CSV) and the language.
147. Select Download on Management review input. The report compiles objectives, KPIs, audit results, nonconformities and phase status.

The screenshot shows the DynamicMS interface for managing nonconformities. The top header includes the DynamicMS logo, a project filter 'NV-AEC-QMS — QMS full run 2025-2026 — Nov', and user information 'EN', 'Nadia Chraïbi'. The left sidebar contains navigation links: FAVORITES (Home, Lifecycle, Alerts), WORK (Home, My tasks, Lifecycle, Alerts), GOVERNANCE (Risks and opportunities, KPIs, RACSI matrix, Rules and controls), and RECORDS (Nonconformities, Actions, Audits). The main content area is titled 'Nonconformities' and includes a description: 'Problems move through five stages: open, analysis, action, verification and closure with lessons learned.' Below this is a filter bar showing 'Open · 1', 'Closed · 5', and 'All'. A table lists the nonconformities with the following data:

Code	Title	Source	Criticality	Stage	Detected	Owner	Actions

Appendix — Frequent questions

Question	Answer
I cannot complete a step.	The step is assigned to another role, or its phase gate is passed. Sign in with the role shown on the step, or ask the IMS Manager.
The Go button is disabled.	Some steps of the phase are still open. The gate panel shows how many.
Can the same person own and evaluate an action?	No. The application refuses it on screen and on the server.
Where are my changes recorded?	Every change is written to the audit trail (Administration › Audit trail) and versioned records keep their history.
Does the AI Assistant send my data outside?	No. Answers are built from DynamicMS content and your records; no external AI service is called.
