DELIVERY CHECKLIST

CortexPLM Coverage Checklist

Every content block of the five source documents and where the application covers it

Version 1.0 · September 2026

Table of Contents

1. Summary.....3

2. Process Design Reference v2.....3

3. Deliverables workbook.....3

4. Packs, Integrations & Add-Ons Catalog.....4

5. Dynamic Apps Standard SRS.....5

6. D30 Licensing Implementation Schema.....5

7. Seed data requirement.....5

8. End-to-End Verification.....6

1. Summary

41 of 43 content blocks of the five source documents and of the request are fully covered. The SRS blocks are marked Partial: 148 of 155 SRS requirements are met, and the remaining ones are listed with next steps in the SRS Gap Analysis. Counts come from the running application after a fresh demonstration seed.

Source	Blocks	Status
Process Design Reference v2	8	Covered
Deliverables workbook	15	Covered
Packs, Integrations & Add-Ons Catalog	7	Covered
Dynamic Apps Standard SRS	4	Partial
D30 Licensing Implementation Schema	4	Covered
Seed data requirement	5	Covered

Note Governance registers hold more records than the workbook because each organization adds its own records (project risks, compliance starter controls). Every reference record from the workbook is present.

2. Process Design Reference v2

Source file: CortexPLM_Process_Design_Reference_v2.docx

Source content	Implemented as	Where to see it	Measured	Status
Identifier conventions, RACSI codes, status of content	Glossary, RACSI matrix screen, task accountability card	Process design, Governance > RACSI matrix	33 glossary terms	Covered
Part 1 Executive summary: key figures, lifecycle, E2E inventory, three levels of steps	Macro processes and E2E pages, dashboard	Process design > Macro processes / End-to-end processes	9 E2E, 81 tasks, 727 steps	Covered
Part 2 Macro processes repository (Parts A, B, C, D, E, I, J) with SIPOC	One page per macro process with SIPOC, goal, steps	Process design > Macro processes	69 of 69, 69 with full SIPOC	Covered
Parts 3 to 5 E2E processes, user-facing tasks, UFS, BPMN flow template	E2E pages, task forms, BPMN modeler (one diagram per E2E)	End-to-end processes; Governance > BPMN diagrams	81 tasks, 30 UFS, 9 BPMN per organization	Covered
Part 6 Coverage statement and 16 unmapped macro processes	Coverage matrix with resolutions	Process design > Coverage matrix	69 × 9 matrix, 16 findings	Covered
Part 7 Track modes, mode-to-MP matrix, activation summary, scoring model, rules R1–R4	Track configuration (versioned), project wizard scoring, lifecycle engine enforcing R1–R4	Process design > Track configuration; New project	69 rows, 7 criteria, 4 rules, 3 thresholds	Covered
Part 8 Phase-gate reference: gate summary, decision outcomes, gate roles	Gate reference, checklists by track, Go/Kill/Hold/Recycle engine, CTL-01	Process design > Phase-gate reference; Gate board	8 gates, 4 outcomes	Covered
Part 9 Design review findings and next steps; Appendix A glossary	Findings and glossary pages	Coverage matrix > Findings; Glossary	16 findings, 33 terms	Covered

3. Deliverables workbook

Source file: CortexPLM_Deliverables_D01D10_D15_D15b_D26.xlsx

Source content	Implemented as	Where to see it	Measured	Status
Cover	Workbook cover data	Reference API /reference/workbook	Loaded	Covered
D01 Macro Processes	Macro process pages (owner role, category, tier)	Macro processes	69 of 69	Covered

Source content	Implemented as	Where to see it	Measured	Status
D02 Tasks & Steps	Steps under each macro process; checklist evidence items	Macro processes; gate checklists	727 of 727	Covered
D03 Business Rules	Business rules register (versioned); BR-001/002/004/005/008/009/011/030 enforced live	Governance > Business rules	64 / 64 / 64 / 64 / 64 / 64 / 64 per organization (60 reference + organization rules)	Covered
D03a Actions Registry	Actions registry (ACT-01..)	Governance > Business rules > Actions	50 of 50	Covered
D04 Controls	Controls register with COSO components; CTL-01, CTL-04 enforced	Governance > Controls (COSO)	58 / 53 / 59 / 53 / 54 / 57 / 57 per organization (47 reference + compliance starters)	Covered
D05 Risks	Risks & opportunities register, heat map, project risks	Governance > Risks & opportunities	50 / 48 / 50 / 48 / 49 / 48 / 48 per organization (27 reference + project risks)	Covered
D06 KPIs	Built-in KPIs computed live or recorded, custom KPIs	Governance > KPIs	38 / 38 / 38 / 38 / 38 / 38 / 38 per organization (38 of 38)	Covered
D07 Alerts	Alert catalog, background checks, multi-channel dispatch	Alerts; Notifications	31 alert types (25 D07 + 6 system)	Covered
D08 Reports & Cockpits	Report screens with PDF, Excel and Word export	Reports & cockpits	24 of 24	Covered
D09 Information Class Model	Data model page	Reports > Data model	58 of 58	Covered
D10 Data Dictionary	Data dictionary with types and validation rules	Reports > Data model	189 of 189	Covered
D15 AI Use Cases	Governed AI use cases, suggestions, append-only usage log	Intelligence > AI use cases	23 / 23 / 23 / 23 / 23 / 23 / 23 per organization (23 of 23)	Covered
D15b Role Menus	Role menus reference; navigation filtered by role permissions	Reports > Role menus	309 of 309	Covered
D26 Modules & Tiers	Tiers, feature gating and quotas per subscription	Administration > Configuration	11 modules	Covered

4. Packs, Integrations & Add-Ons Catalog

Source file: CortexPLM_Packs_Integrations_AddOns_Catalog.docx

Source content	Implemented as	Where to see it	Measured	Status
Part 1 Executive summary, packaging philosophy, pack summary	Catalog page, principles	Administration > Catalog	Loaded	Covered
Part 2 Packs 01–11 (segment, behavior, pain points, hopes, fit, macro processes, price)	Pack cards; subscription entitlements drive features	Administration > Catalog > Packs; Configuration	11 of 11	Covered
Part 3 Integrations catalog (11 categories)	Integration registry; register, encrypted credentials, health check, mappings, sync, signed inbound events	Administration > Integrations	40 of 40	Covered
Part 4 Add-ons catalog (7 families)	Add-on toggles compatible with the subscription	Administration > Configuration; Catalog > Add-ons	28 of 28	Covered
Part 5 Pricing summary, bundles, volume discounts, differentiators	Bundles with stated and recalculated savings, quote builder	Administration > Catalog > Bundles & pricing / Quote builder	8 of 8 bundles, 6 discount bands	Covered
Appendix A review notes (confirmed, recalculated savings, points for decision)	Review notes shown with the bundles	Catalog > Bundles & pricing	7 review notes	Covered
Appendices B and C quick reference and glossary	Pack quick reference in the catalog	Administration > Catalog	Loaded	Covered

5. Dynamic Apps Standard SRS

Source file: Dynamic_Apps_Standard_SRS.docx

Source content	Implemented as	Where to see it	Measured	Status
Sections 1–3 introduction, principles, common platform architecture	Multi-tenant server, RBAC, commercial gating, AI governance, RAG, i18n, justification, versions, communication, REX	Whole application	Implemented	Covered
Section 4 functional requirements FR-DA-* (18 groups)	Each requirement assessed individually (see the SRS Gap Analysis)	Administration > Traceability	110 of 112 met; partial: FR-DA-TEN-08, FR-DA-I18N-01	Partial
Section 5 non-functional requirements NFR-DA-*	Measured: response times, 100 concurrent users, BPMN round trip, WCAG scan, phone width; tests in CI	Administration > Traceability	38 of 43 met; partial or hosting: NFR-DA-REL-02, NFR-DA-SCALE-03, NFR-DA-UX-03, NFR-DA-PORT-02, NFR-DA-MAINT-01	Partial
Sections 6–7 data model and interface conventions; Appendix A	REST JSON API, UI conventions, data model page	Data model; API /api/*	Implemented	Covered

6. D30 Licensing Implementation Schema

Source file: CD_D30_Licensing_Implementation_Schema.docx

Source content	Implemented as	Where to see it	Measured	Status
One LicenceProvider interface, SaaS and OnPrem implementations	SaaS LicenceProvider (signed record) and OnPrem LicenceProvider (Ed25519 .lic file)	Administration > Licensing	saas active 25/60 / saas active 24/40 / saas active 24/40 / saas active 24/30 / saas warning 24/30 / saas active 24/30 / saas active 24/40	Covered
Add-on licensing as independent toggles (compliance standards)	Compliance standards activation with non-certification disclosure	Administration > Configuration	Implemented	Covered
Hardware binding, licence file format, vendor signing tool	hardwareId field, npm run keys / npm run sign-licence	server/tools	Implemented	Covered
maxUsers enforcement and expiry warning (CTRL-003)	User creation blocked at the limit; banner 30 days before expiry	Users & roles; top banner	Orvane licence expires in 22 days	Covered

7. Seed data requirement

Source file: request

Source content	Implemented as	Where to see it	Measured	Status
Seven sectors: Public Sector, Manufacturing in Construction, Healthcare, Agro-Business – Dairy, Transportation, Oil/Gas/Energy, Construction	One organization per sector with 24–25 users and 21 projects	Organization switcher (platform admin)	Public Sector / Manufacturing in Construction / Healthcare / Agro-Business - Dairy Products / Transportation /	Covered

Source content	Implemented as	Where to see it	Measured	Status
			Oil, Gas & Energy / Construction	
Tenant model: Group (Yes/No), Organization, Project	Atlas Infrastructure Holding (Cedarline, Ridgeway, Orvane); Crescent Agro-Energy Group (Valdora, Kestrel); Metro City and Meridale independent	Administration > Organizations & OBS	2 groups, 5 members, 2 independent	Covered
Benchmarking within the organization and within the group (external out of scope)	Project type, track and department comparison; group comparison of aggregates with opt-out; 5 automated tests	Reports > Benchmarking	13 indicators	Covered
At least 10 instances of each E2E process per industry	E2E-01:21 02:19 03:16 04:14 05:16 06:12 07:12 08:10 09:13 in every organization	Dashboard, E2E pages	Minimum 10 met	Covered
Pin and slide menu; top, bottom, left and right positions	Navigation bar settings, saved per user; RTL aware	Sliders icon in the navigation bar	Implemented	Covered

8. End-to-End Verification

The five User Guide runs were replayed through the application on a fresh database. Each one ran to the end state below.

Run	Project	Track	Steps	End state
1	PUB-022 Online Parking Permit Renewal	Fast	29	Launched
2	TRN-022 Real-time Bus Crowding Indicator	Fast	32	Launched
3	DAI-022 Lactose-free Greek Yogurt 500 g	Light	78	Active
4	HLT-022 Remote Cardiac Monitoring Patch	Full	77	Retired
5	ENR-012 Green Hydrogen Electrolyser Pilot	Full	31	Active

- Server tests: tenant isolation suite passes (npm test).
- Web build: production build succeeds; every screen opened in a browser for administrator, product manager, executive, supplier and Arabic users without errors.
- Translations: 1,041 interface strings in English, French and Arabic, plus reference labels (statuses, processes, tasks, gates, roles).
