

CortexSkills for Healthcare

Training engineering for hospitals and clinics —
from accreditation requirements to certified,
evaluated staff

What this presentation covers

01

The healthcare challenge

Accreditation, patient safety and new skills

02

The solution

Lifecycle, gates, healthcare processes

03

Case study: hospital group

A full AI skills run, phase by phase

04

Case study: a clinic

The same method on an SME track

05

The health ecosystem

Life sciences and pharma

06

Trust and next steps

Security, deployment, packs, plan

One hospital group, one AI skills run, measured end to end

Maghreb Hospitals Group · 4,700 employees · Casablanca · figures from the seeded demonstration run

65%

of 265 tasks completed in the AI skills run

3 of 6

phase gates signed off with a “Go” decision

28

questionnaire responses, 91% average completeness

1,260,000

training budget in the locked 2026 plan

What the run shows

Diagnosis flagged 5 of 21 function × decision-level cells as Red; Clinical Care & Nursing is Red at strategic and operational levels.

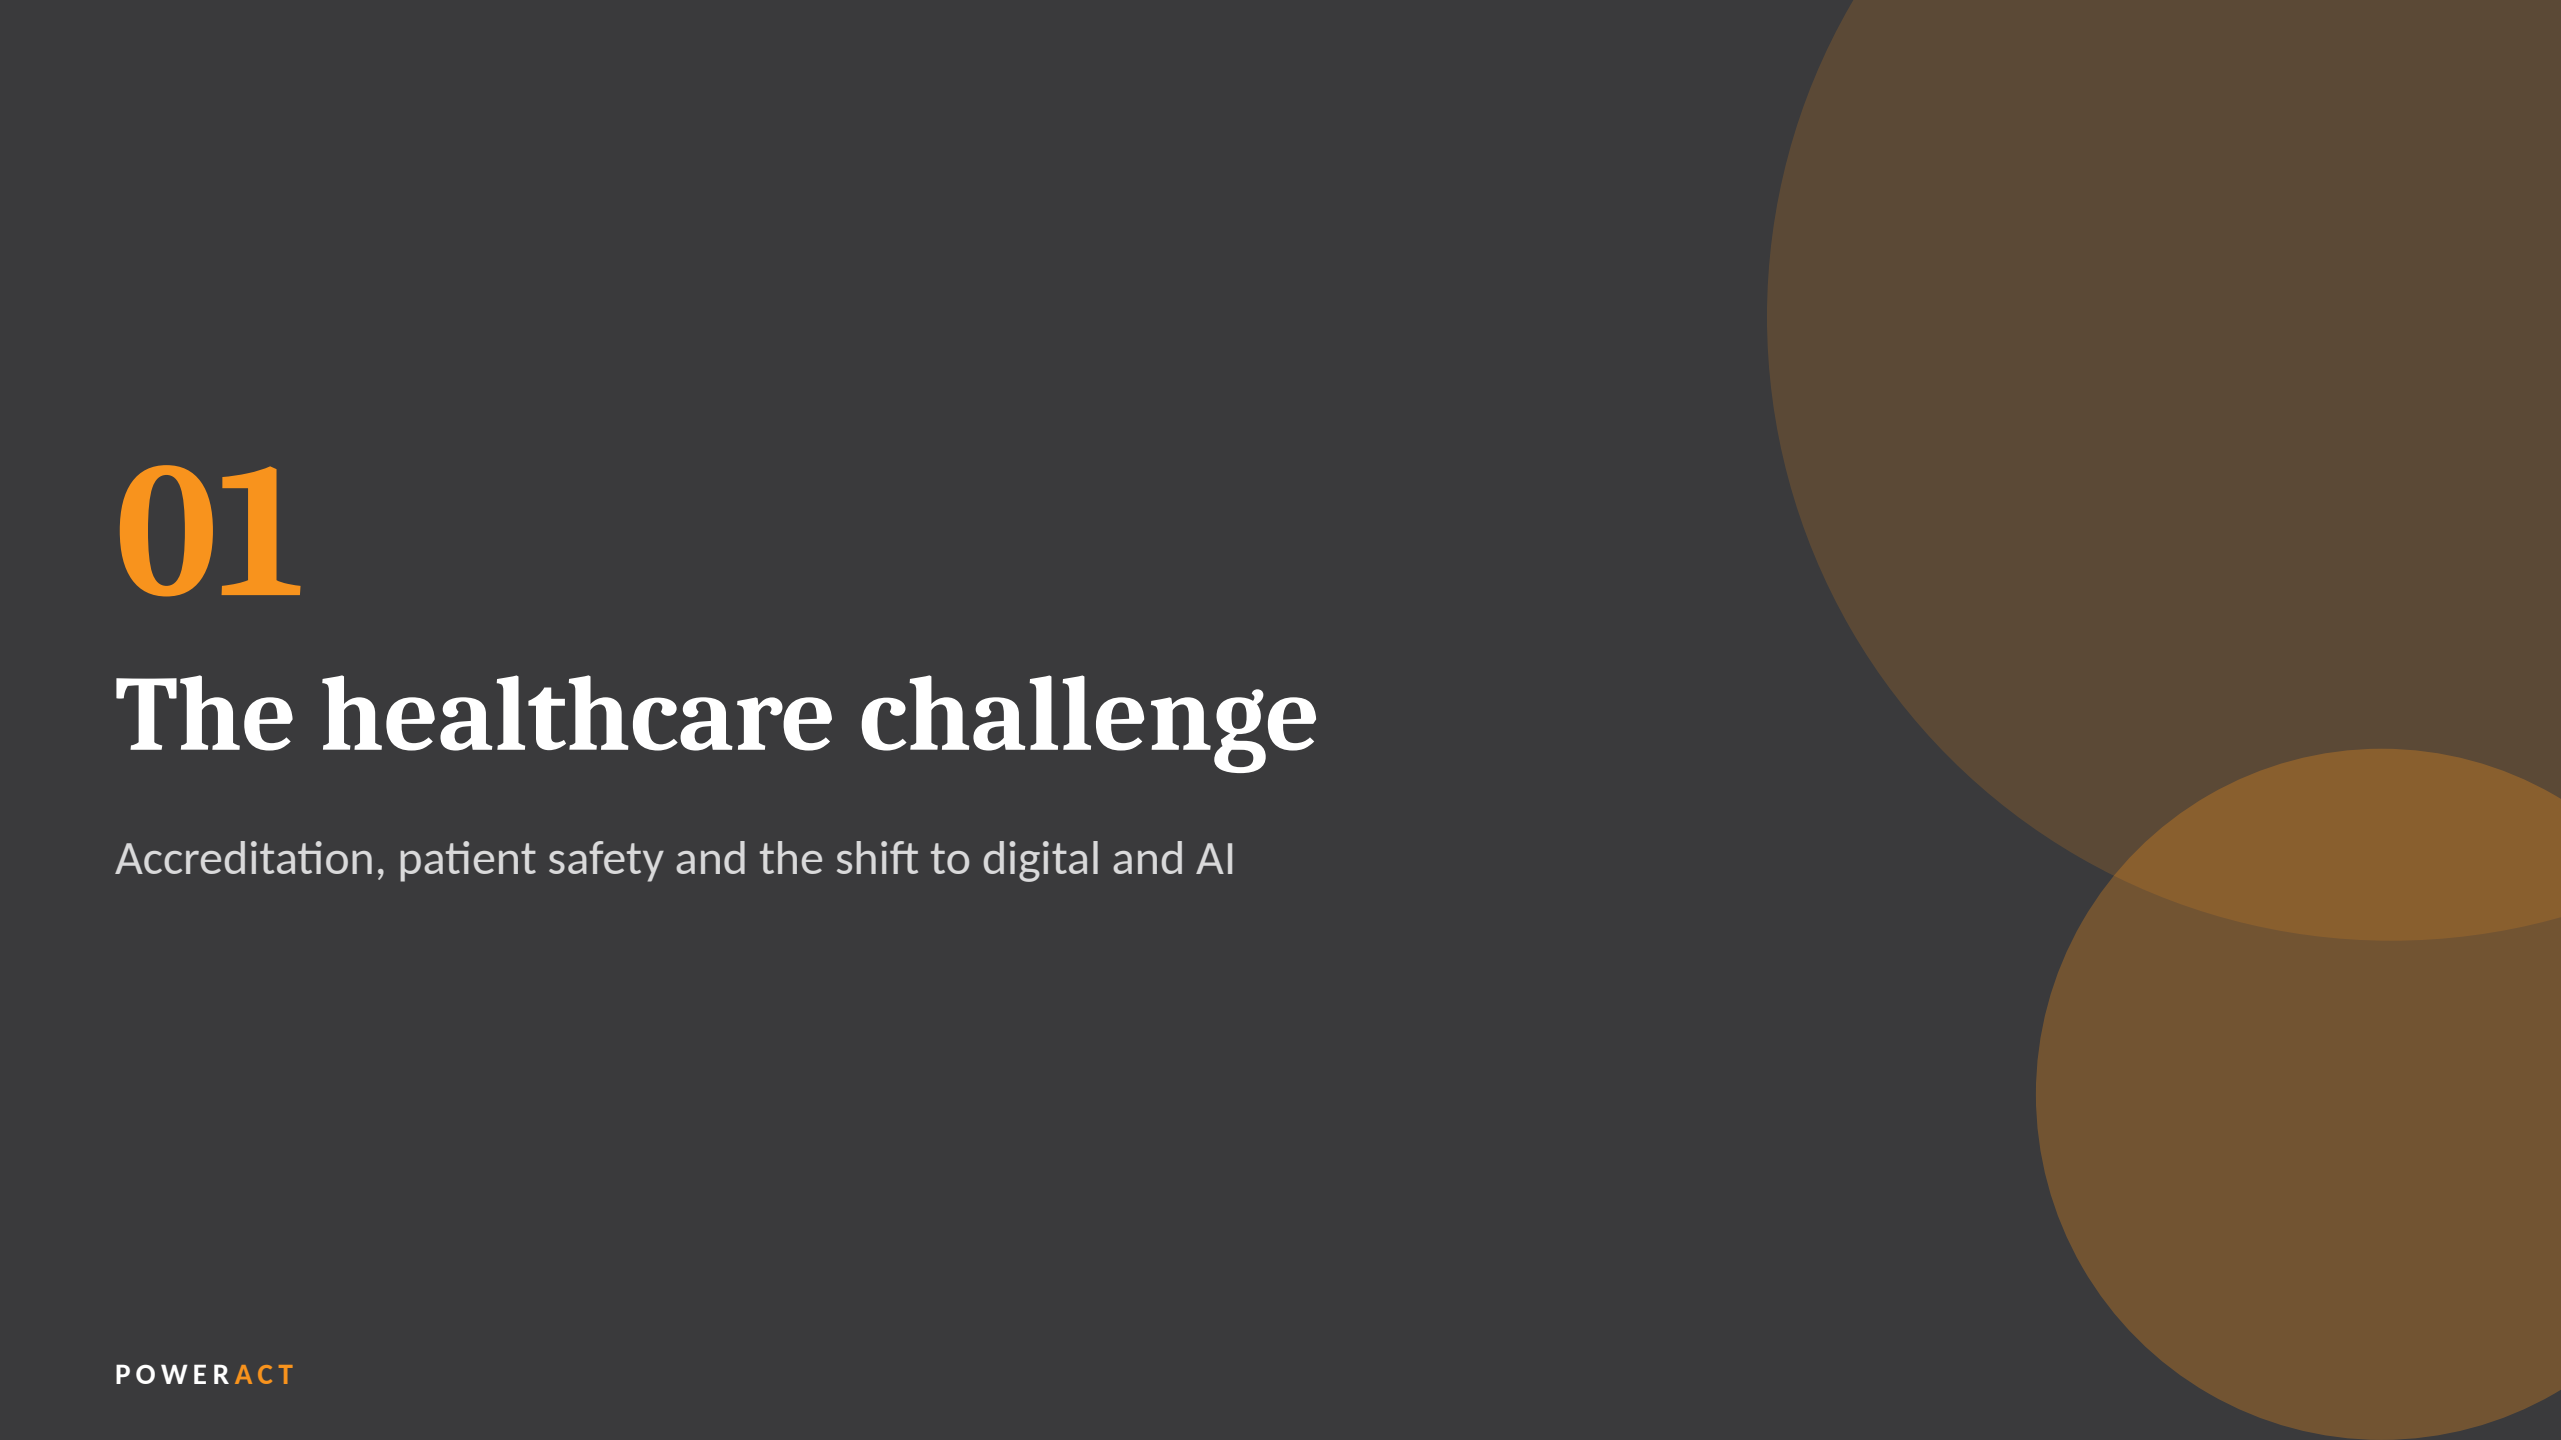

Six AI themes were prioritized by impact and urgency; “AI triage and clinical decision support” ranks first (impact 5, urgency 4).

Kirkpatrick evaluations range from 74% to 93%; one ISO 7101 awareness certificate has expired and one is expiring.

Every one of the 279 RACSI activities has exactly one Accountable; 385 audit entries trace the changes.

01

The healthcare challenge

Accreditation, patient safety and the shift to digital and AI

Patient safety depends on proven competence

The accreditation bodies ask for evidence that each role is trained, assessed and current.

ISO 7101

Healthcare quality management: competence determined per role, training records kept, effectiveness evaluated.

JCI Standards

Accreditation surveys check staff qualification and education, with evidence at the level of each practitioner.

ISO 15189

Medical laboratories: competence of laboratory personnel, assessed and recorded.

SECTOR DRIVER

Patient-safety accreditation burden

Every accreditation cycle requires competence evidence for regulated roles.

SECTOR RISK

Adverse clinical event linked to a training gap

Reviewed at each gate through the healthcare readiness checklist.

What Learning & Development teams in hospitals must solve

Clinical competence

Map every Clinical Care & Nursing position to its obligations and keep certificates valid.

Audit-ready evidence

Attendance, results and manager observations kept per step, retrievable for a survey.

Digital and AI adoption

Electronic records, telemedicine, AI triage and imaging change daily practice.

Multi-site, multilingual

Several sites and three working languages — English, French and Arabic.

Four healthcare verticals, each with its own standards

Each vertical brings its macro processes, end-to-end processes and readiness checklist.

Priority skills themes, digital and AI

Seeded for the Healthcare Providers vertical; each organization adjusts them during diagnosis.

Digital skills

- 1 Electronic health records (EHR)
- 2 Telemedicine and remote consultation
- 3 Digital patient scheduling and billing

AI skills

- 1 AI triage and clinical decision support
- 2 AI medical imaging assistance
- 3 AI bed and staff capacity planning

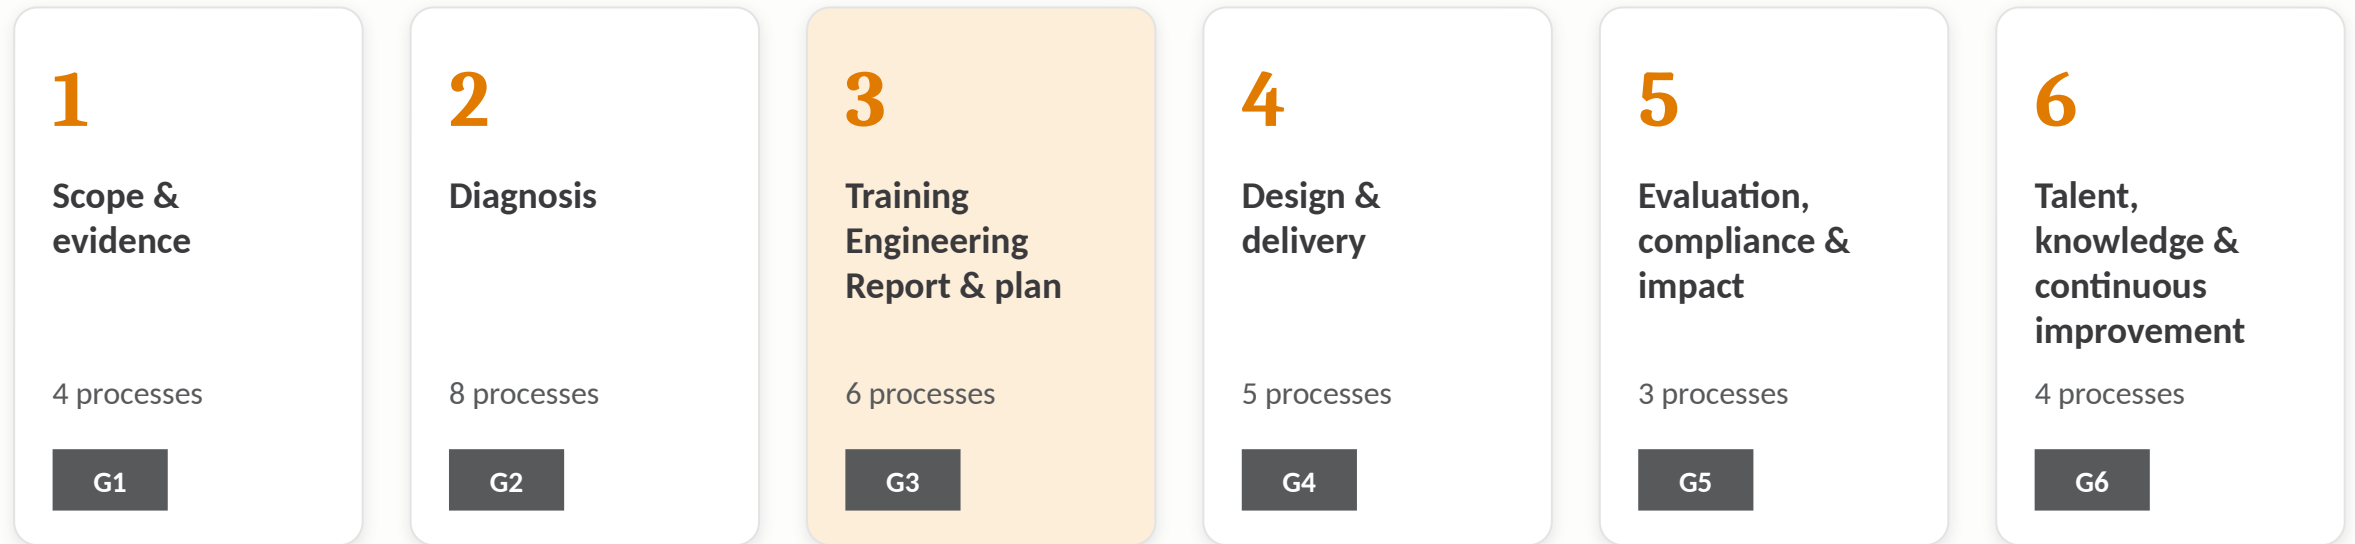

02

The solution

One lifecycle, seven phases, gates, and healthcare-specific processes

One lifecycle, seven phases

Each phase groups end-to-end processes; a gate closes each main phase.

Enablers run across all phases — data, AI and integration • change and adoption • quality, risk and improvement

Six gates, each with a checklist and named approvers

A phase closes only when the mandatory items are met and the decision is recorded.

Gate	Purpose	Approvers
G1 — Scope & evidence approved	Confirm the approved Scope of Work and a consolidated questionnaire dataset.	HR Director, Consultant PM
G2 — Diagnostic validated	Validate diagnostic findings, gaps, demands, RAG and SWOT.	Head of L&D, HR Director
G3 — Report & roadmap approved	Approve the Training Engineering Report, prioritized plan and budget.	HR Director, Steering Committee
G4 — Delivery readiness	Confirm designs, content, trainers and logistics before delivery.	Head of L&D
G5 — Evaluation & impact validated	Validate effectiveness, ROI and compliance status.	Head of L&D, Finance Manager
G6 — Closure & continuous improvement	Close the cycle with REX and the post-engagement roadmap.	HR Director, Partner

Three healthcare macro processes on top of the core model

Added automatically when the organization's sector is Healthcare Providers.

HCPR-MP-01

Regulatory & Safety Training Compliance

Keep every regulated role in Healthcare Providers trained and certified against ISO 7101.

Owner: Compliance Officer

HCPR-MP-02

Critical Skills & Certification Framework

Define the critical Clinical Care & Nursing skills and their certification paths.

Owner: Head of L&D

HCPR-MP-03

Digital & AI Skills Transformation

Plan the digital and AI skills that Healthcare Providers operations will need.

Owner: L&D Strategist

Two healthcare end-to-end processes

Each has a trigger, an end state, the macro processes it crosses and its user-facing tasks.

HCPR-E2E-01

Compliance-to-Certification Readiness

Goal	Keep Healthcare Providers regulated roles certified against ISO 7101.
Trigger	New ISO 7101 requirement or certification expiry.
End state	Sector compliance extract issued with every critical role certified.
Crosses	MP-01 · MP-02 · MP-14 · HCPR-MP-01
Tasks	4 user-facing tasks

HCPR-E2E-02

Critical-Skills-to-Transformation Plan

Goal	Turn critical-skill gaps and digital and AI use cases into a transformation plan.
Trigger	Annual plan cycle or technology change in Healthcare Providers.
End state	Transformation learning paths approved.
Crosses	MP-02 · MP-03 · MP-05 · HCPR-MP-02
Tasks	4 user-facing tasks

A readiness checklist for Healthcare Providers

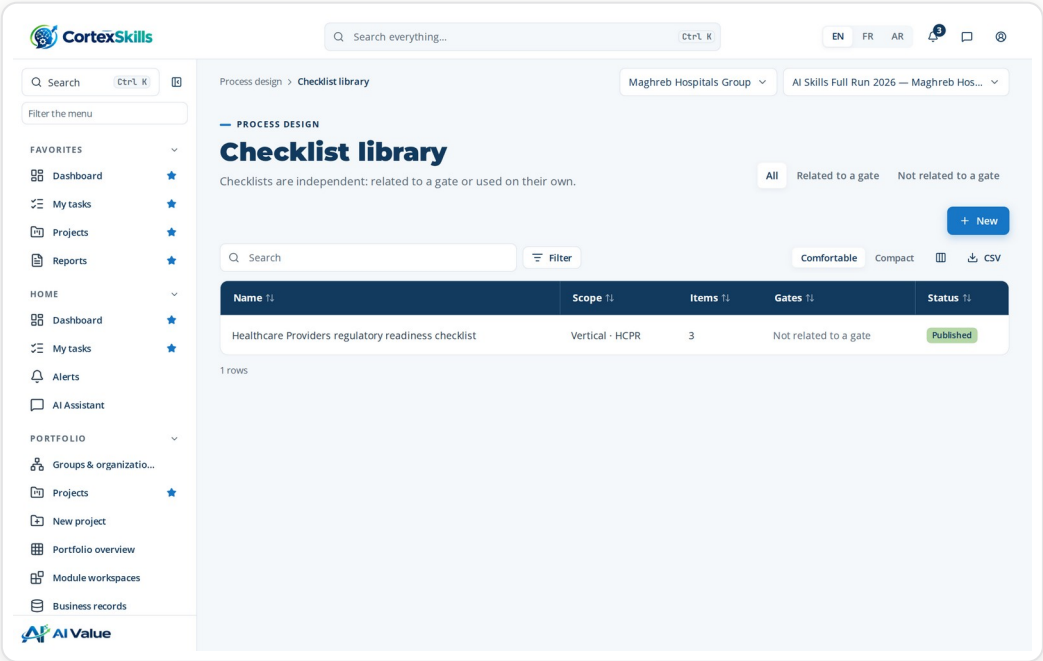

Published once for the vertical; used at the gates and in the compliance extract.

Checklist item	Mandatory	Evidence
ISO 7101 training requirements mapped to positions	Yes	Required
Critical Clinical Care & Nursing roles certified	Yes	Required
Sector risk reviewed: Adverse clinical event linked to a training gap	Yes	—

Readiness support, not certification

The application organizes evidence and checks readiness against ISO 7101, JCI and ISO 15189. The certification decision stays with the accreditation body.

29 roles, one Accountable per activity

RACSI: Responsible, Accountable, Consulted, Supported, Informed — allocated for every activity of the run.

- L&D Strategist
- L&D Business Partner
- L&D Planner
- Instructional Designer
- Training Administrator

279

activities in the hospital run, each with exactly one Accountable

36 AI use cases, each reviewed by a person

AI drafts; a named role accepts, edits or rejects. Every suggestion is logged with its outcome.

Number of catalog AI use cases by risk level

Use case	Risk	Human checkpoint
Training Engineering Report drafting	High	L&D Strategist edits every section; Quality Manager reviews before approval.
Diagnostic findings drafting	High	Consultant PM validates findings with the client sponsor.
Theme prioritization scoring	High	L&D Strategist confirms the ranking; Steering Committee validates the plan.
Skill gap forecasting (6-18 months)	High	Head of L&D accepts or rejects each prediction before any action.
Content translation draft (FR/AR)	Medium	Subject Matter Expert validates terminology before publication.

03

Case study: a hospital group

Maghreb Hospitals Group — 4,700 employees, Casablanca. Demonstration data, fictional organization.

Maghreb Hospitals Group

Member of Maghreb Health & Life Group • Healthcare Providers • large company

**4,700**
employees

**7**
functions in the organization structure

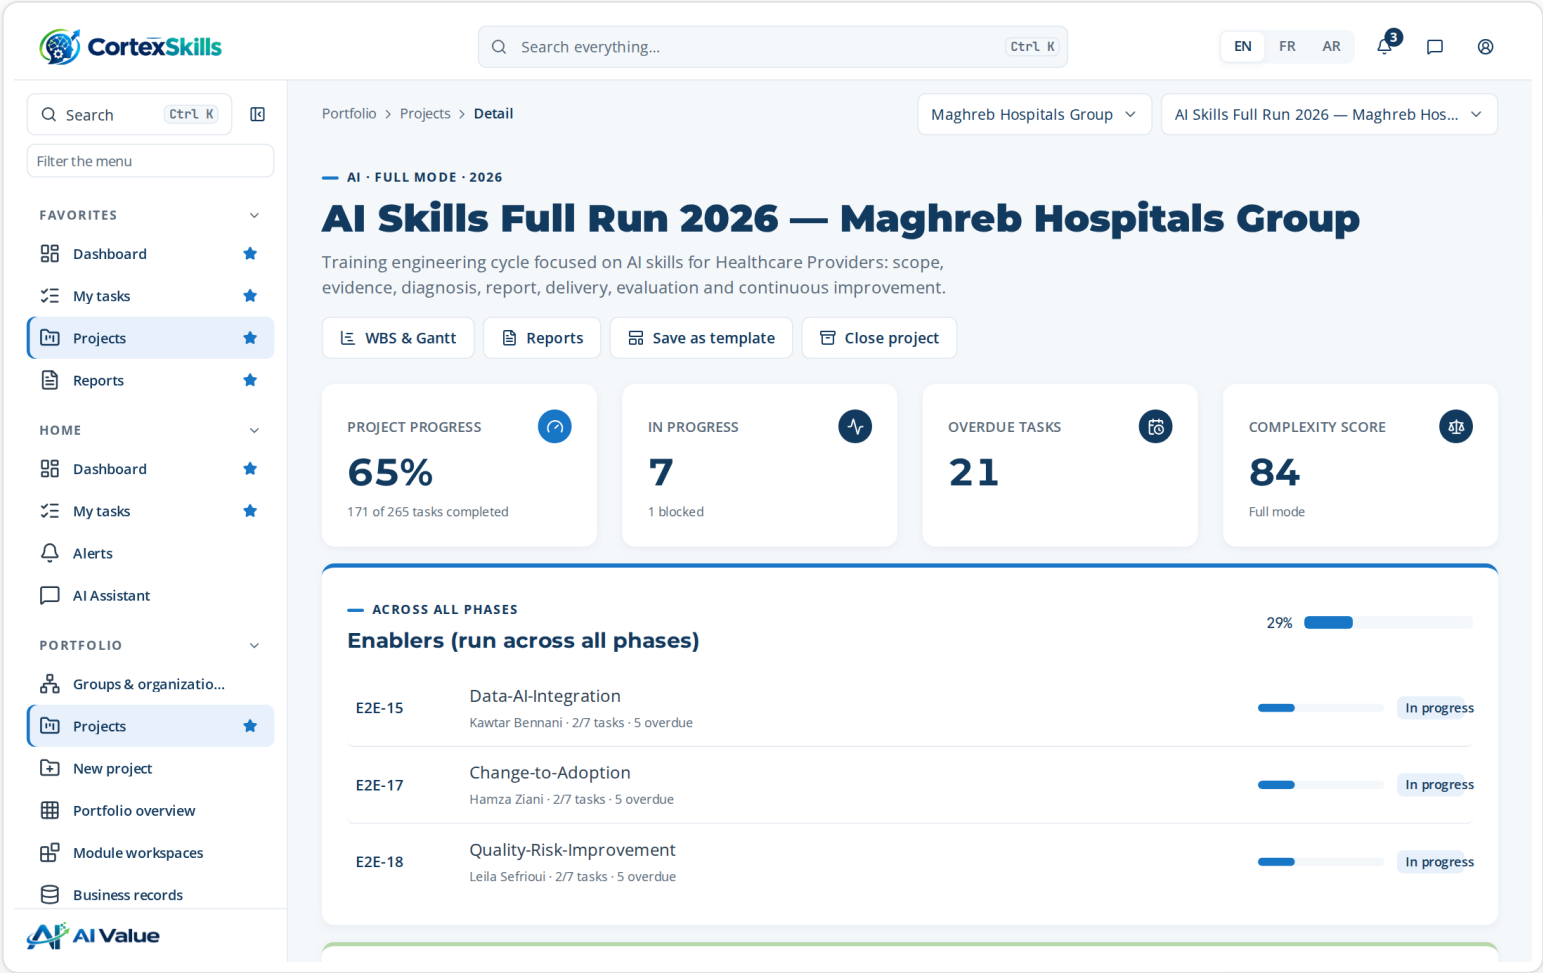

**29**
named users, one per role

**2**
full runs in 2026: Digital and AI

Setting	Value
Functions	Operations, Quality & HSE, Finance, Human Resources, Sales & Marketing, Information Systems, Clinical Care & Nursing
Solution	BND-05 Full Suite (PK-01 to PK-08)
Add-ons	Multi-Site / Multi-Entity Deployment; Questionnaire Library & Multi-Channel Distribution
Data protection frameworks	GDPR, Law 09-08 (CNDP, Morocco), ISO 9001
Deployment • seats	SaaS • 600 seats
Justification on governed changes	Required

The AI skills run on one screen

AI Skills Full Run 2026 — Maghreb Hospitals Group

65% of 265 tasks completed; 7 in progress, 1 blocked.

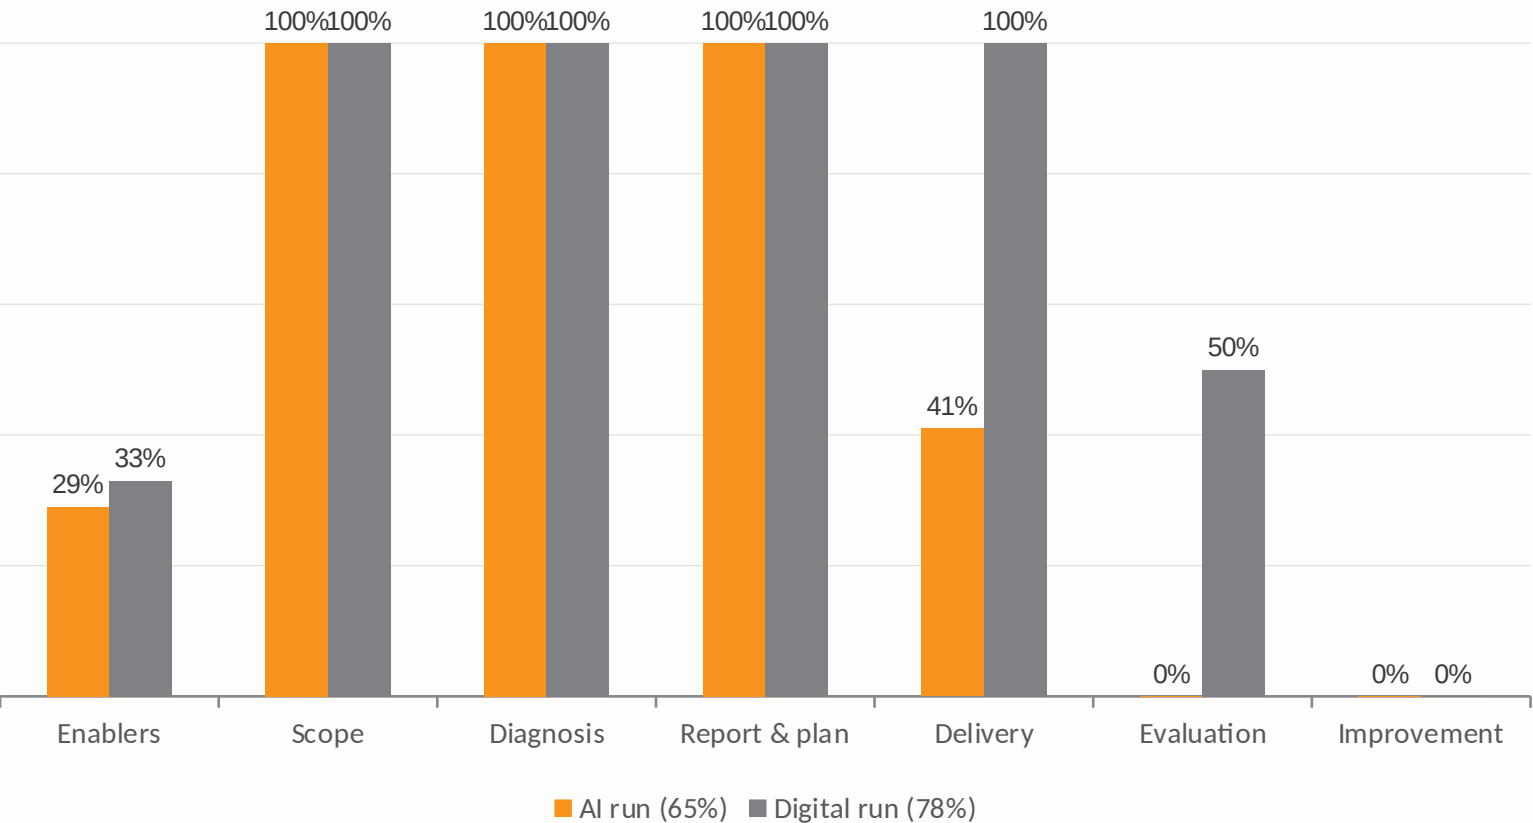

21 tasks overdue — each raises an alert with an escalation chain.

Complexity score 84: Full mode, all seven phases and six gates.

Two runs: the Digital run leads on delivery and evaluation

Share of tasks completed per phase, same organization, same template.

Tasks completed / tasks planned in each phase (%)

208 / 265

tasks completed in the Digital run

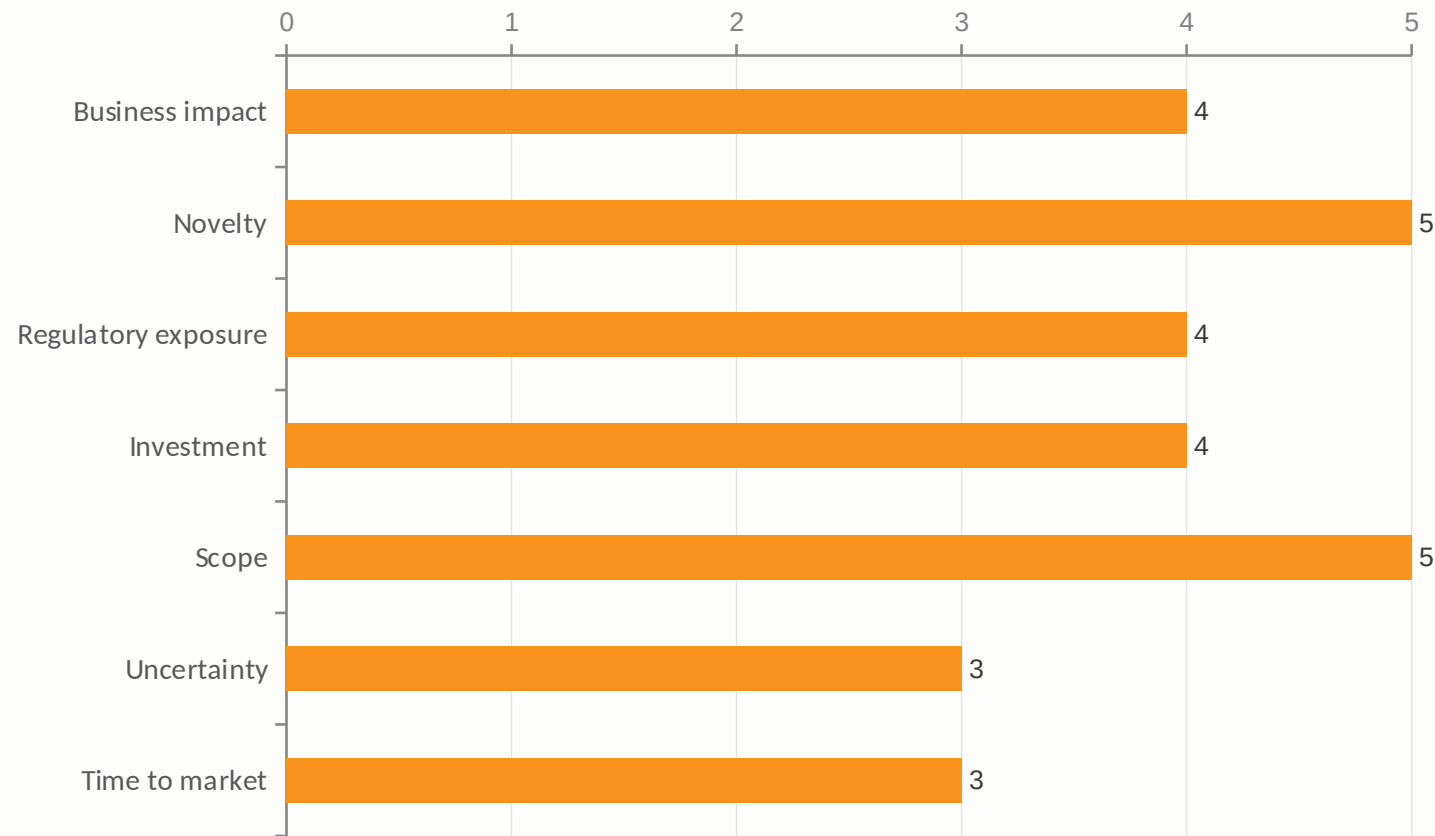

171 / 265

tasks completed in the AI run

Scope, diagnosis and the report are complete in both runs; the gap opens in delivery and evaluation.

Complexity score 84 out of 100: Full mode

Seven weighted criteria rated 1-5 when the project is created; the score recommends the mode.

Rating of each complexity criterion (1 = low, 5 = high)

84

Full mode: score of 70 or more

Below 70, the score recommends SME mode and one of three tracks (T1, T2, T3). Choosing a different track requires a written justification.

A scope approved before any data is collected

Gap: AI bed and staff capacity planning

Four improvement axes, ranked

Functional SWOT validated for Operations and Quality & HSE.

Strengths

Experienced team; stable processes

Weaknesses

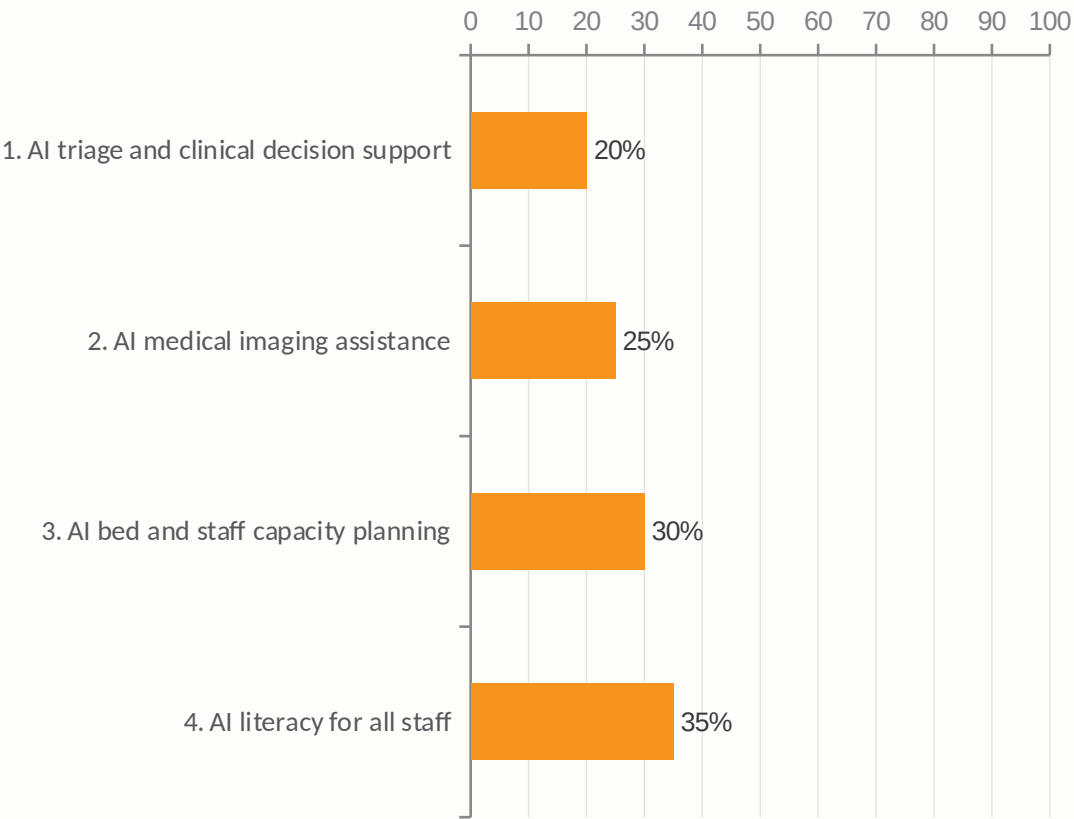

Low use of AI triage and clinical decision support

Opportunities

AI bed and staff capacity planning

Threats

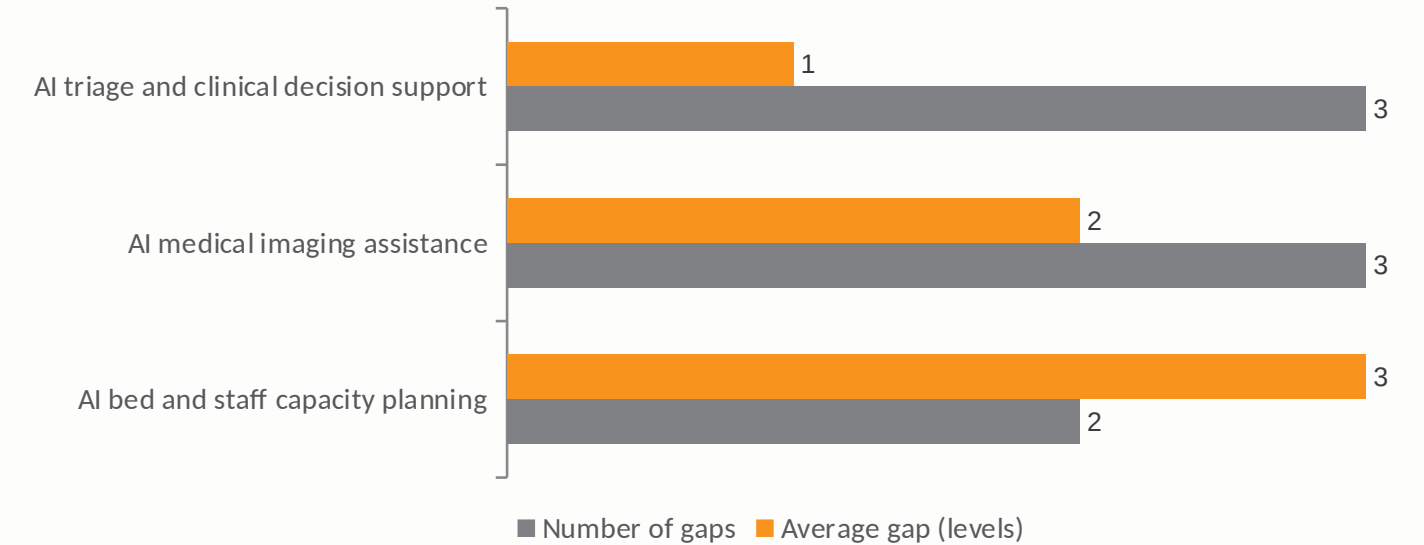

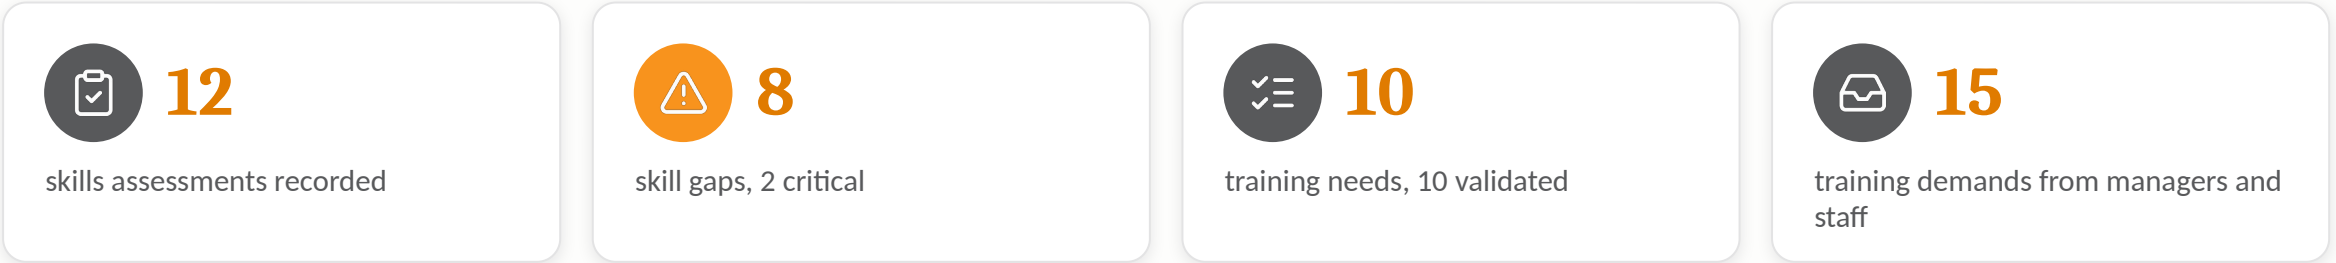

Stricter ISO 7101 audits

Implementation progress of each improvement axis, by priority rank (%)

From individual gaps to validated training demands

Gaps come from skills assessments; needs and demands are validated before prioritization.

Skill gaps by competency: average gap in proficiency levels and number of gaps

Training demands by priority

Priority	Demands
High	5
Medium	5
Low	5

Six AI themes, ranked by impact and urgency

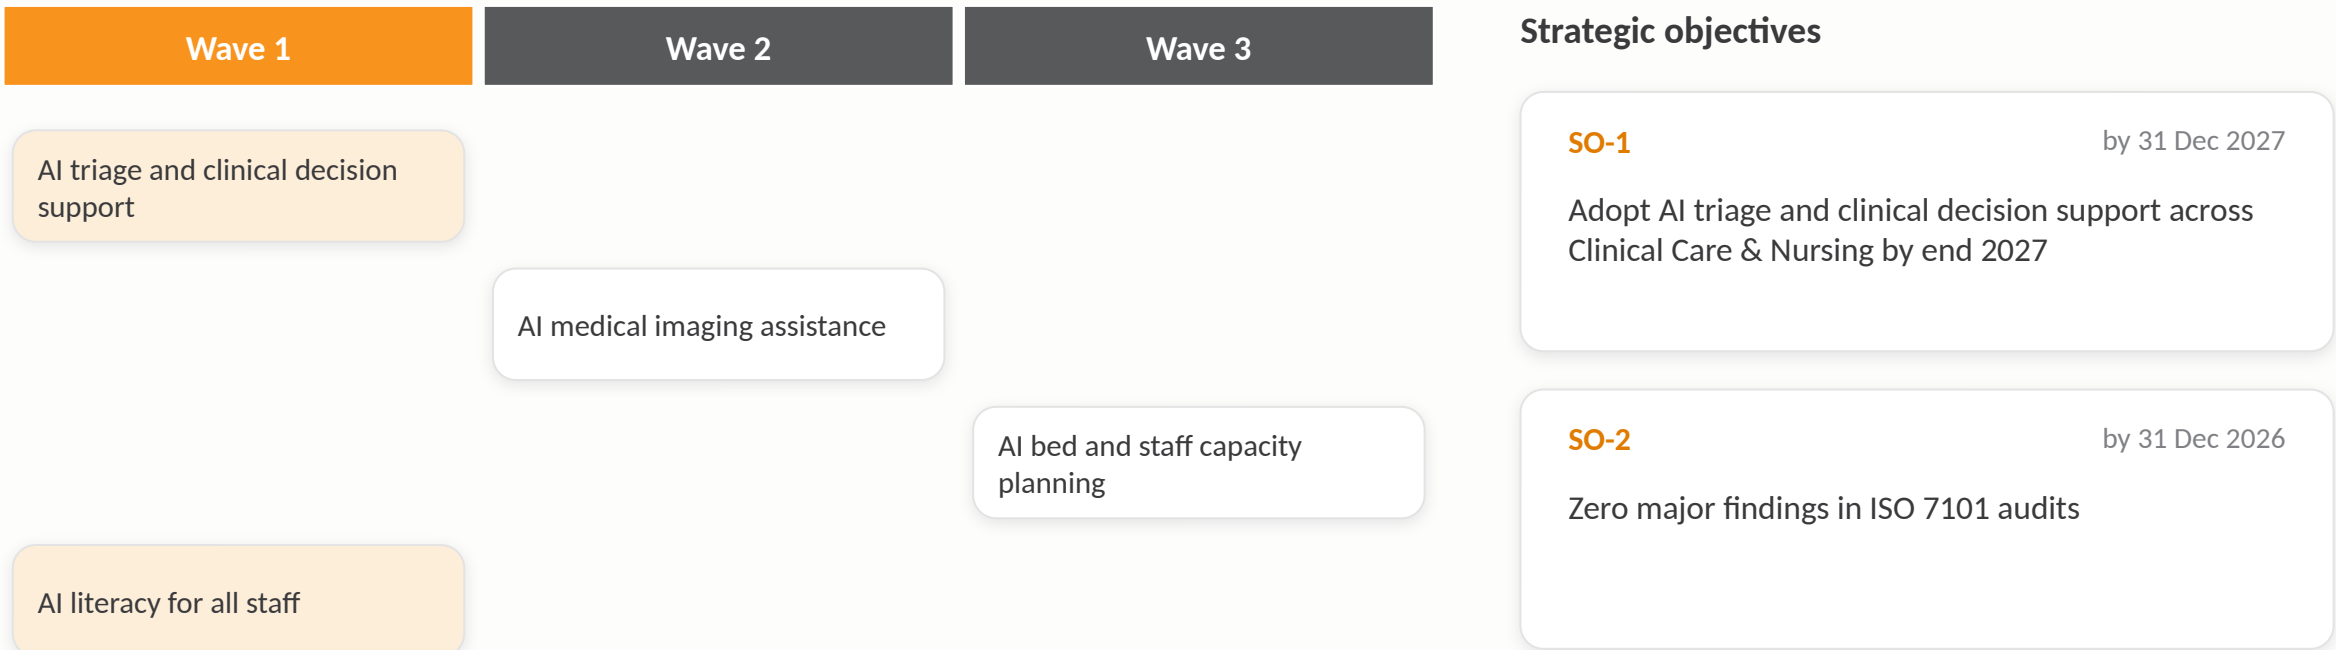

AI proposes a priority score; the L&D Strategist accepts or changes it with a justification.

#	Theme	Impact	Urgency	Days × groups	Trainer	Budget
1	AI triage and clinical decision support	5	4	3 × 6	Internal	360,000
2	AI medical imaging assistance	4	3	2 × 4	Vendor A	300,000
3	AI bed and staff capacity planning	3	4	2.5 × 3	Internal	240,000
4	AI literacy for all staff	5	3	1.5 × 3	Vendor A	180,000
5	Prompting and generative AI at work	4	4	1 × 2	Internal	120,000
6	Responsible AI and data protection	3	3	2 × 2	Vendor A	60,000

Impact and urgency on a 1-5 scale; cell fill follows the status scale (red = 1, dark green = 5). Budget as recorded in the plan.

The Training Engineering Report, published and versioned

Status Published • version 2 • 4 sections drafted by AI and reviewed by the Quality Manager

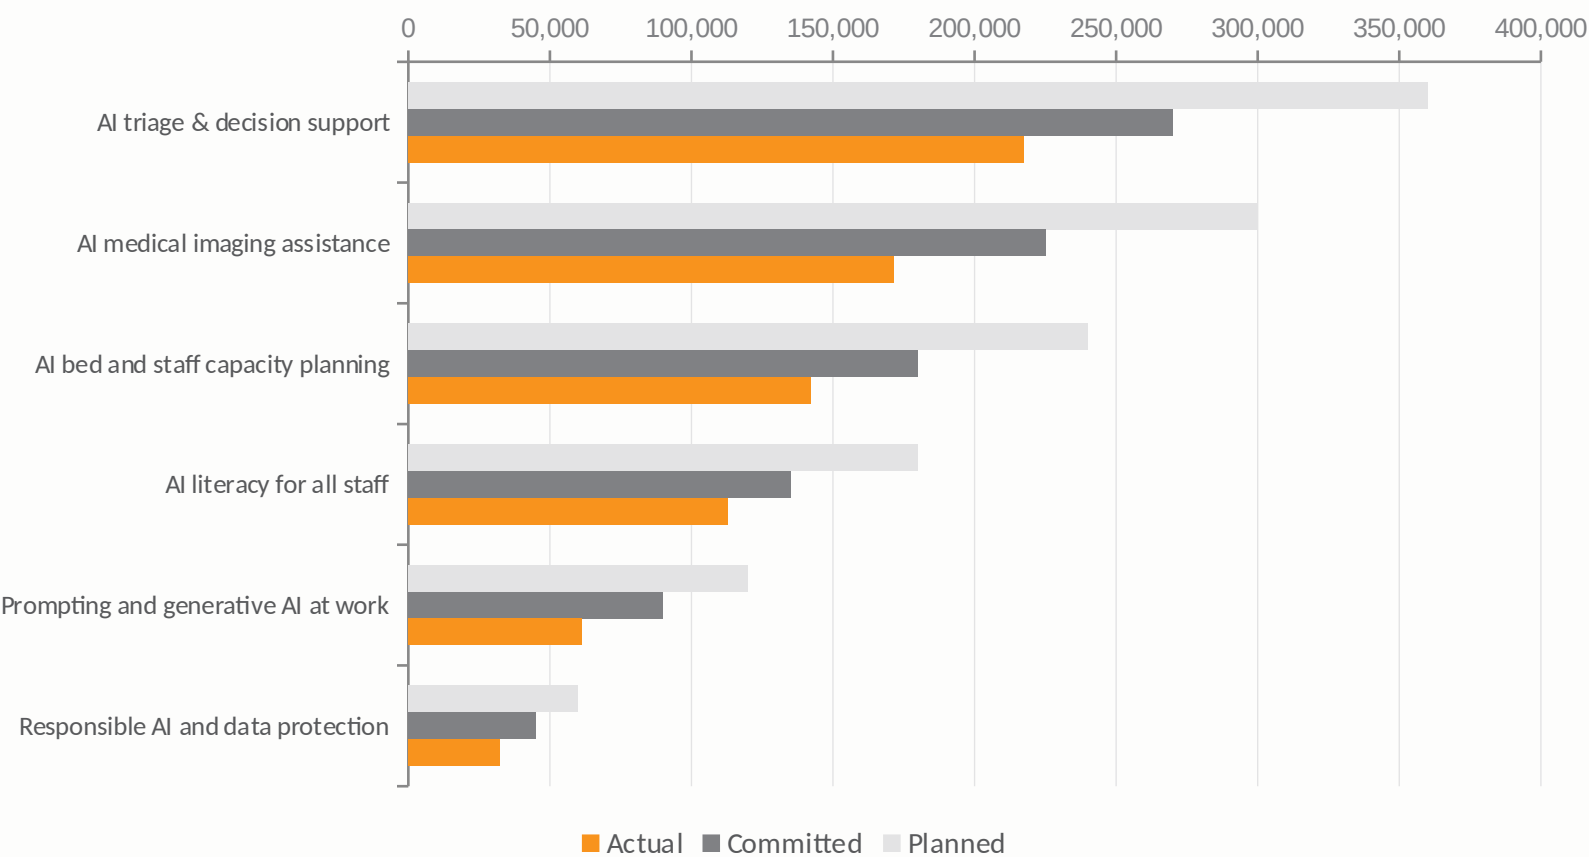

Roadmap initiatives by wave

Input: Healthcare Providers competitive intelligence 2026, updated 1 Oct 2026.

2026 plan locked: 1,260,000 budgeted, 35% realized

Planned, committed and actual amounts per theme, as recorded (currency set per organization).

Planned, committed and actual spend per theme

945,000
committed (75% of planned)

737,197
actual spend (59% of planned)

352,800
refund forecast from training contracts

Training contract refunds, tracked to the deadline

OFPPT special training contracts file • regulator OFPPT • deadline 30 Oct 2026 • status Approved

Theme	Planned	Actual	Refund forecast	Refund / planned
AI triage and clinical decision support	360,000	217,250	100,800	28%
AI medical imaging assistance	300,000	171,599	84,000	28%
AI bed and staff capacity planning	240,000	142,133	67,200	28%
AI literacy for all staff	180,000	112,764	50,400	28%
Prompting and generative AI at work	120,000	61,149	33,600	28%
Responsible AI and data protection	60,000	32,302	16,800	28%

Deadline alerts

A missed submission deadline means a lost refund. The run records the file, its deadline and its status, and the risk register tracks “Missed regulatory submission deadline and lost refund”.

Learning paths, modules and sessions

2 learning paths • 4 modules • 4 sessions • 12 enrollments

Module	Modality	Hours	Design status
M1 AI triage and clinical decision support	E-learning	2	Approved

S-04 AI medical imaging assistance	31 Oct 2026	12

4

content assets tagged to competencies

48

seats scheduled across the sessions

Attendance is recorded per session; a missing attendance record raises an alert to the Training Administrator.

The screenshot displays the CortexSkills AI Value platform interface. On the left is a sidebar navigation menu with sections: FAVORITES (Dashboard, My tasks), HOME (Dashboard, My tasks, Alerts, AI Assistant), and PORTFOLIO (Groups & organization..., Projects, New project, Portfolio overview, Module workspaces, Business records). The main area shows a breadcrumb trail: E2E-03 · ROOT / MASTER CHAIN (FLAGSHIP) > Needs-to-Training Engineering Report and the production of training engineering inputs. Below this is a filter button labeled "AI Skills Full Run 2026 — Maghreb Hospitals Group". A table titled "User-facing tasks" lists six tasks:

#	Task	Status
1	UFT-03-01 Plan diagnostic interviews	Completed
2	UFT-03-02 Record interview findings	In Progress
3	UFT-03-03 Cluster needs into themes	Pending Review
4	UFT-03-04 Prioritize needs by impact	Pending Review
5	UFT-03-05 Validate needs register	Pending Review
6	UFT-03-06 Consolidate engineering inputs	Pending Review

A detailed view of task UFT-03-04 "Prioritize needs by impact" is shown on the right. It includes a header bar with the task ID and name, a status indicator "Completed" with a due date of "8 Sept 2026", and tabs for Work, RACSI, Files (0), and History. The "What to type" section describes the task as AI triage and clinical decision support. The "Steps" section indicates that the gate for this phase is passed and steps are read-only. The "Your output" section shows the results of the task.

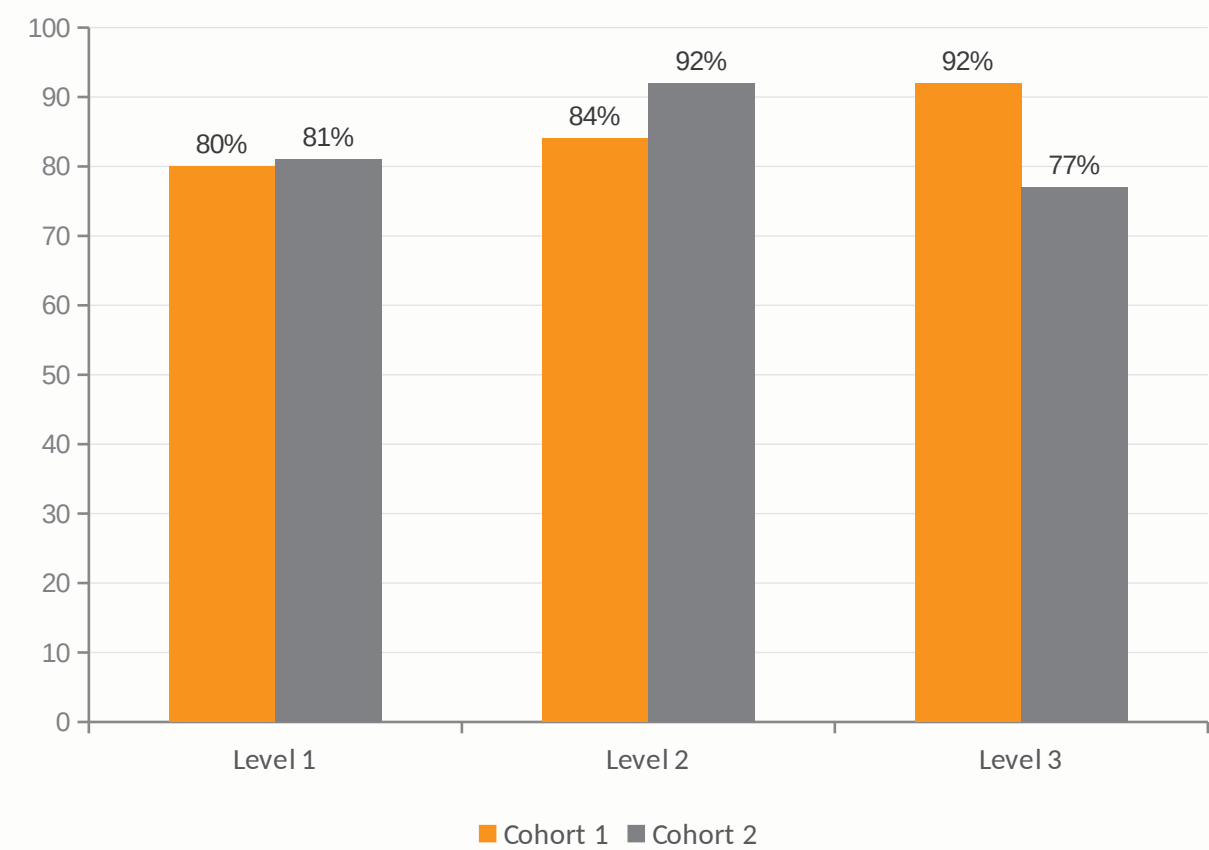

“What to type” is specific to the organization, its sector and the focus of the run.

AI help proposes a draft, labelled with its confidence and sources.

Owner and evaluator are two different people: segregation of duties is enforced.

Kirkpatrick levels 1 to 3, and certificate validity

Evaluation results per enrollment; certificates tracked against their expiry date.

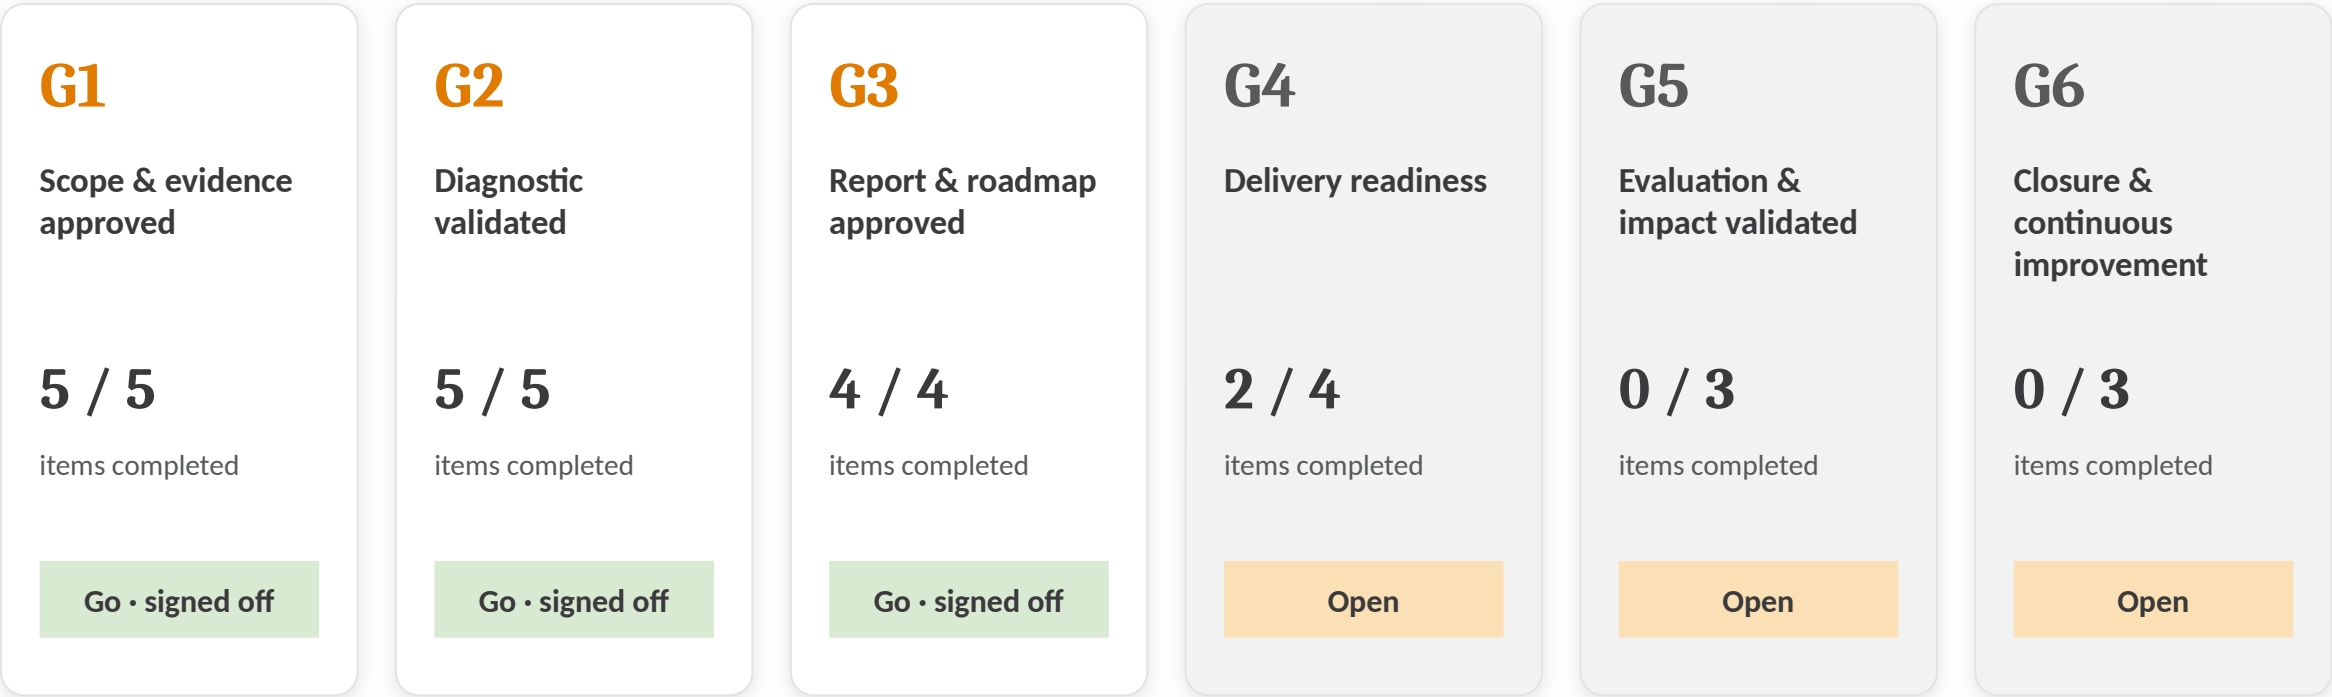

Evaluation score by Kirkpatrick level: 1 reaction, 2 learning, 3 behaviour (%)

Certificate	Valid until	Status
ISO 7101 awareness	17 Aug 2026	Valid
ISO 7101 awareness	15 Nov 2026	Expired
ISO 7101 awareness	13 Feb 2027	Valid
ISO 7101 awareness	14 May 2027	Expiring
ISO 7101 awareness	12 Aug 2027	Valid
ISO 7101 awareness	10 Nov 2027	Valid

4 valid • 1 expiring • 1 expired. Expiry raises an alert before the date.

3 gates signed off, 3 open

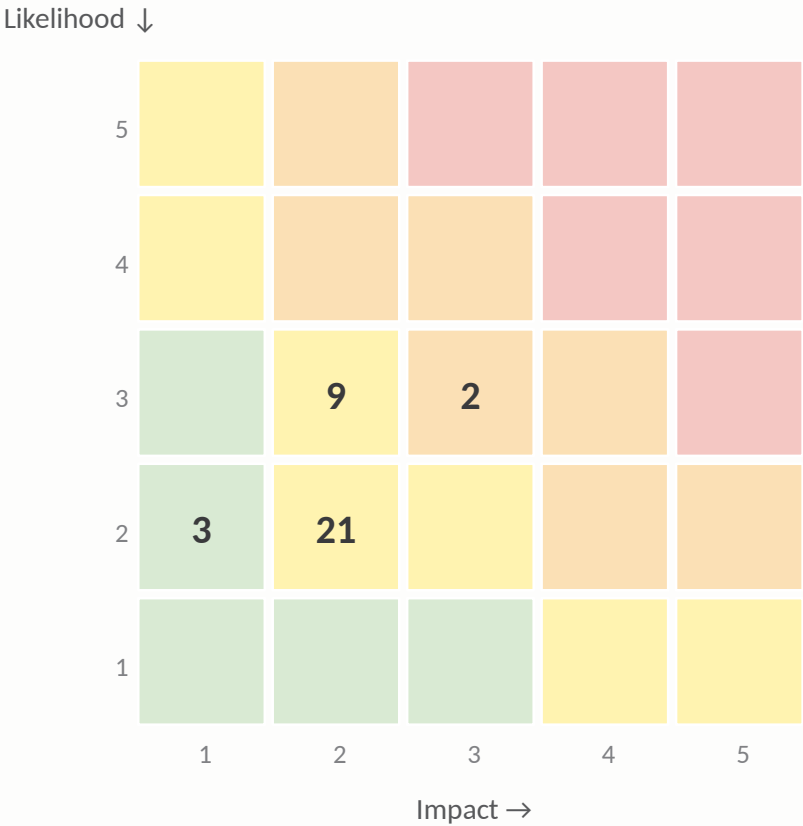

Where the run stands: mandatory items completed at each gate.

Each gate has its own checklist; the sign-off records the decision, the approver and the date.

35 risks scored by likelihood and impact

Each risk is linked to its controls, a key risk indicator and an owner.

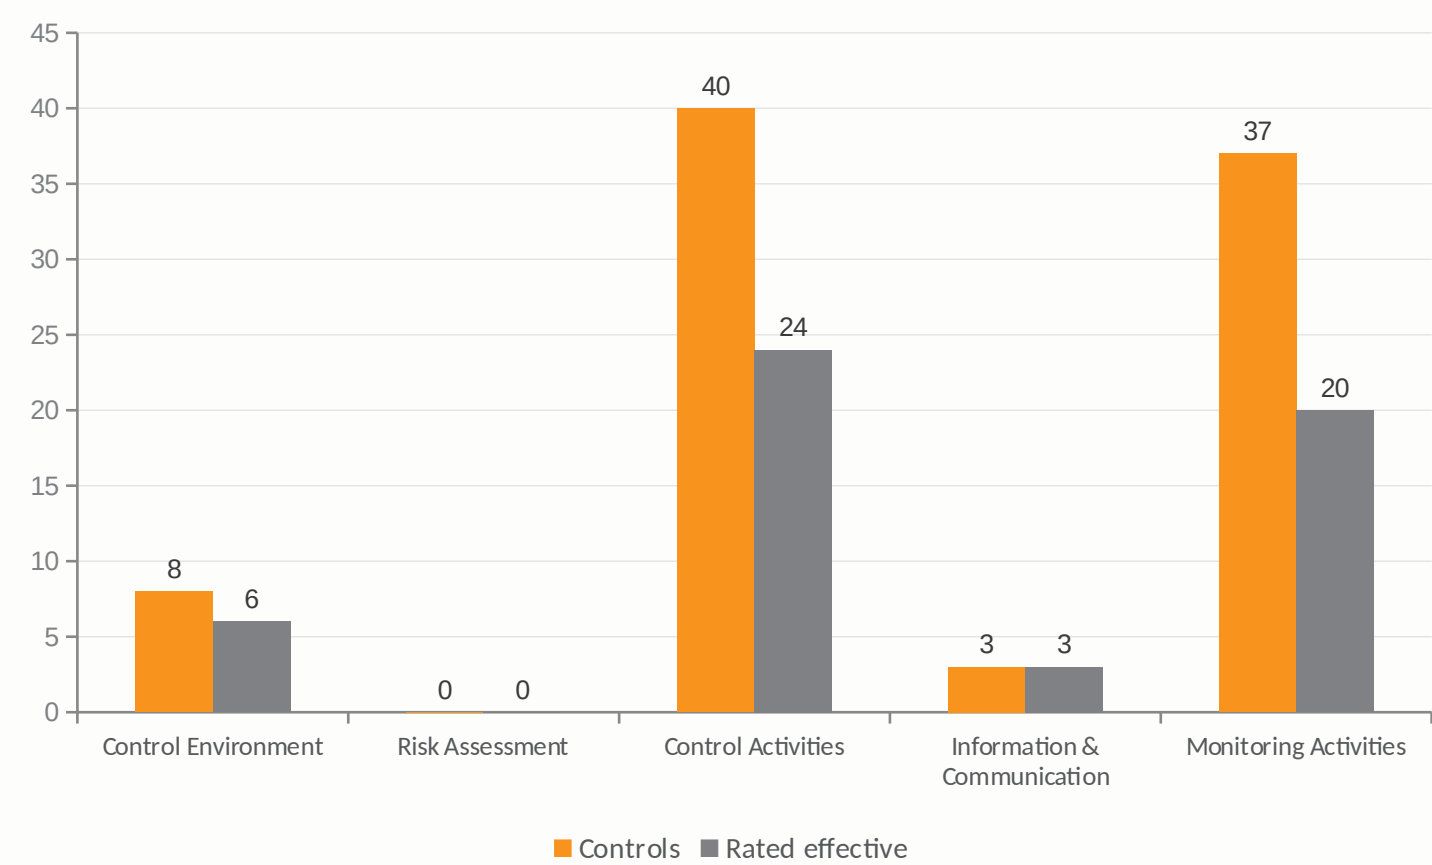

Code	Risk	Category	Score
RISK-014	Low learner and user adoption	Adoption	9
RISK-017	Critical knowledge lost with expert departure	Operational	9
RISK-001	Unauthorized access to tenant data	Security	6
RISK-005	Training plan misaligned with strategy	Strategic	6
RISK-006	Inaccurate skills data leading to wrong needs	Data quality	6
RISK-007	Unverified AI content in the Training Engineering Report	AI	6
RISK-009	Expired mandatory certification	Compliance	6

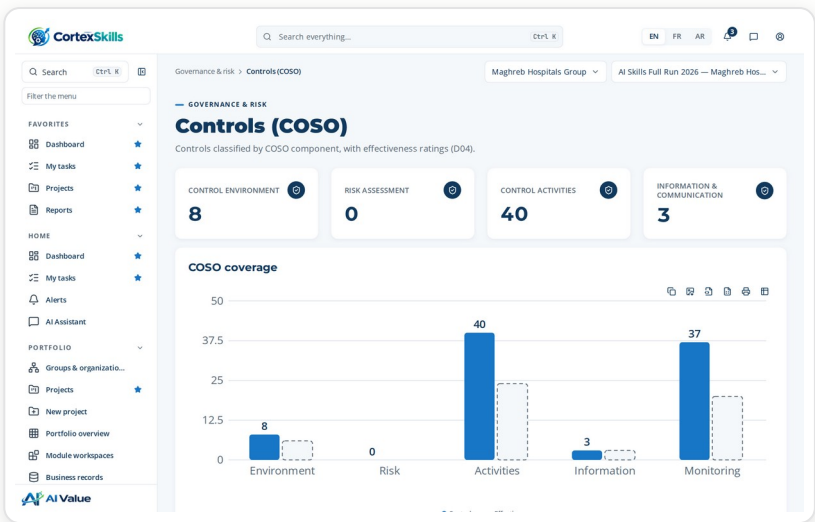

Number of risks per likelihood × impact cell

88 controls mapped to the COSO components

53 rated effective • 89 business rules enforce them in the workflow

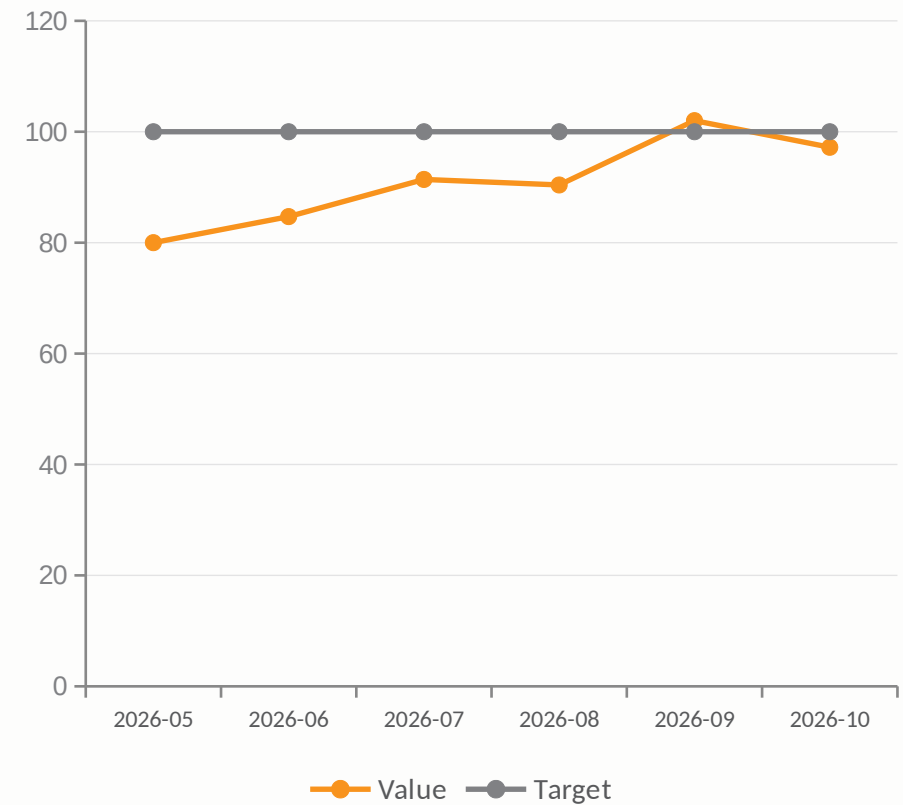

Controls and effective controls per COSO component

61 standard KPIS, measured monthly

Plus 2 custom KPIS, e.g. “Share of Clinical Care & Nursing supervisors certified”.

KPI	Latest	Target	Status
KPI-001 • Strategic objective coverage	97.2	100%	Amber
KPI-002 • Skills inventory validation rate	94.7	≥ 95%	Amber
KPI-003 • Critical gap rate	8.9	≤ 10%	Green
KPI-010 • Learner completion rate	82.9	≥ 80%	Green
KPI-020 • Integration synchronisation success rate	104.6	≥ 99.5%	Green
KPI-061 • Stakeholder engagement rate	72.9	≥ 75%	Amber

Strategic objective coverage: monthly value against target

15 open alerts, each with an escalation chain

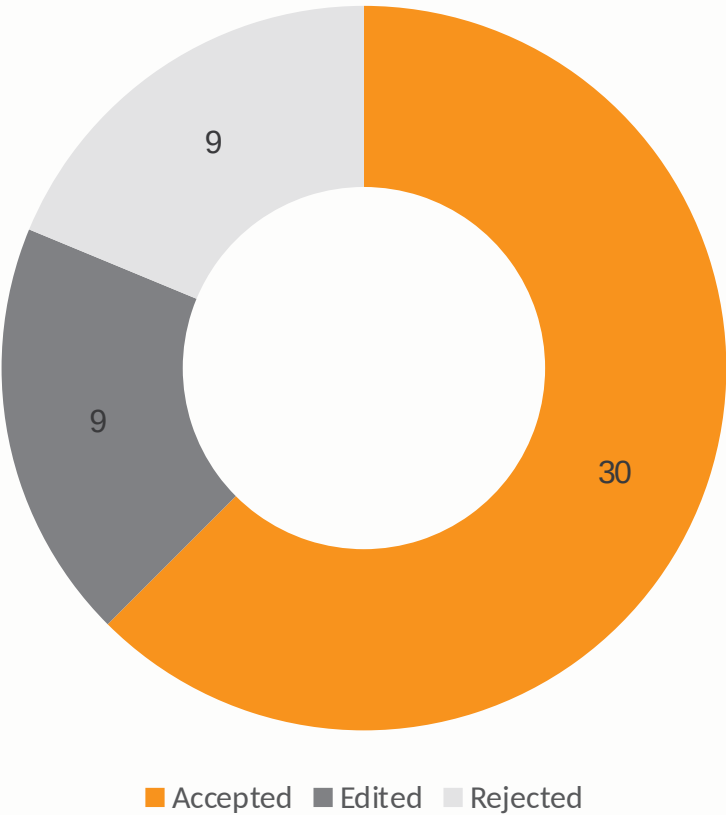

Alerts come from process rules; overdue steps escalate by role and by delay.

Alert	Step	Severity	Open	Escalation
ALR-006 • Record attendance	MP-07.5	Medium	1	Trainer → Training Administrator (24 h) → Head of L&D (72 h)
ALR-007 • Trigger re-engagement nudge	MP-08.6	Low	2	Learner → Manager (after second nudge)
ALR-008 • Review evaluation results	MP-09.7	Medium	2	L&D Analyst → Instructional Designer → Head of L&D
ALR-014 • Run HRIS synchronisation	MP-16.4	Medium	2	IT Architect → Platform Administrator
ALR-016 • Enforce login rate limit	MP-17.6	High	2	Platform Administrator → IT Architect
ALR-018 • Track adoption usage	MP-19.4	Medium	2	Change Manager → Head of L&D
ALR-020 • Execute improvement action	MP-20.3	High	2	Action Owner → Quality Manager (7 days) → Head of L&D
ALR-039 • Review access violation log	MP-17.4	Medium	2	IT Architect → Platform Administrator

Alerts, approvals and task notices are sent in the application and by e-mail (11 dispatches in the demonstration run).

48 AI suggestions logged: 30 accepted, 9 edited, 9 rejected

The usage log is append-only; each line keeps the use case, the user, the confidence and the decision.

The whole run on one timeline

Phases, processes and tasks with dependencies; summary bars are computed from the tasks.

34 standard reports and a data-aware assistant

Reports export to PDF, Excel and Word. The assistant answers within the user’s permissions.

Lessons learned feed the next cycle

Return on experience rated 4/5 • 4 knowledge base articles for the sector standards

What went well	The stakeholder register and multi-channel distribution lifted the response rate.
What did not	SWOT inputs arrived late from one function.
Root cause	No backup nominated for the function head.
Recommendation	Name a backup for every function head at kickoff.

Knowledge base
ISO 7101 — training and competence requirements
JCI Standards — practitioner notes
GPEC — Forward Planning of Jobs and Skills
Law 09-08 — personal data in questionnaires

04

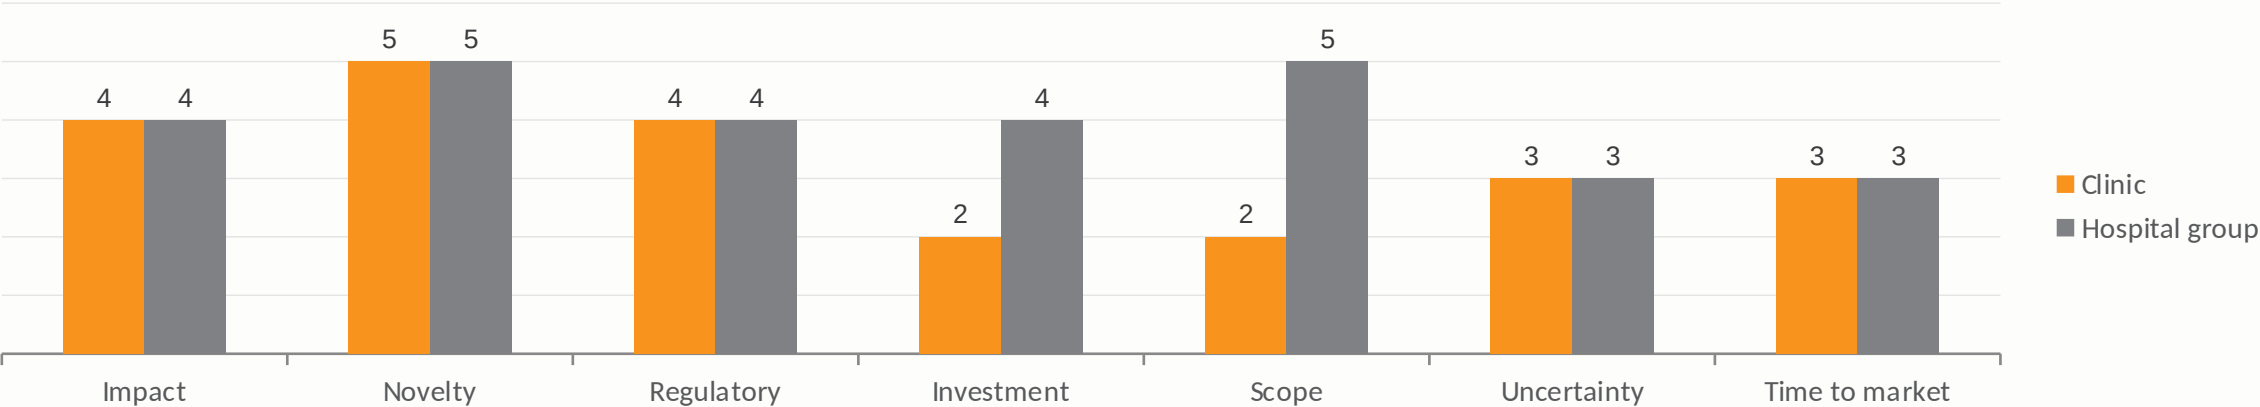

Case study: a clinic

Clinique Al Amal — 95 employees, Marrakech. The same method on a lighter track.

Complexity score 66: SME track T3

Clinique Al Amal • 95 employees • 11 users • Law 09-08 data protection

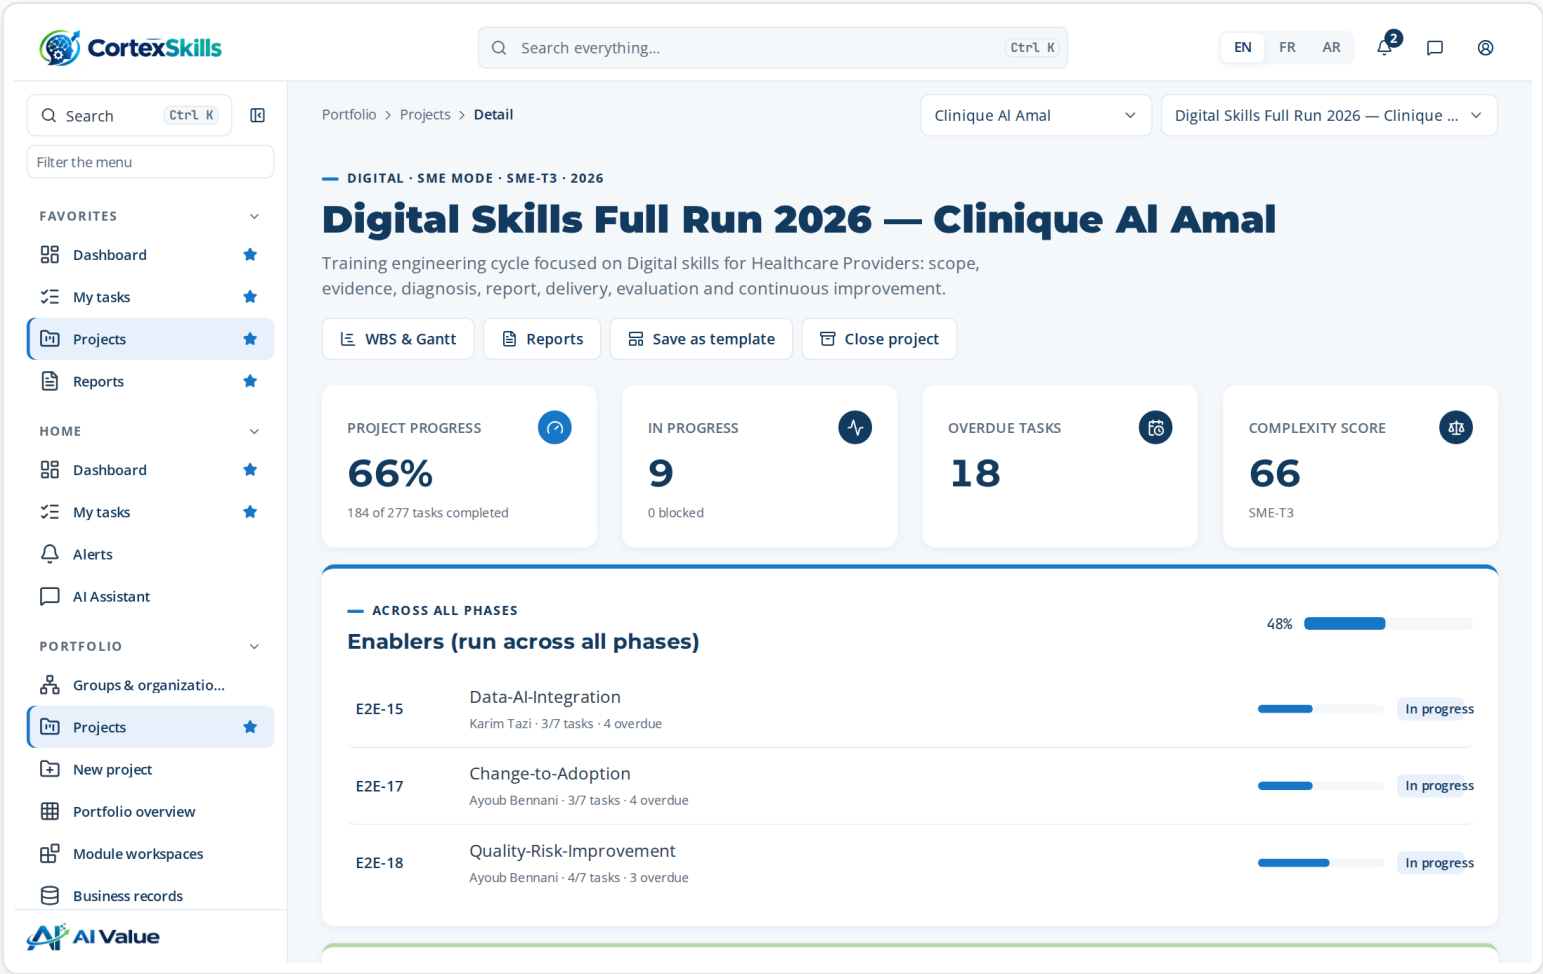

Track	For	Gates	Items per gate	Duration	Score
SME-T1 • Essential track	Micro	G1 • G3 • G6	3	about 30 days	0-35
SME-T2 • Standard track	Small	G1 • G3 • G5 • G6	4	about 60 days	35-60
SME-T3 • Advanced track	Medium	G1 • G2 • G3 • G4 • G5 • G6	5	about 90 days	60-100

Complexity ratings (1-5), clinic compared with the hospital group: investment and scope drive the difference

Same lifecycle, fewer items to complete

AI Skills Full Run 2026 — Clinique AI Amal • 50% of 277 tasks completed

Digital run: 66% of 277 tasks completed; AI run: 50%.

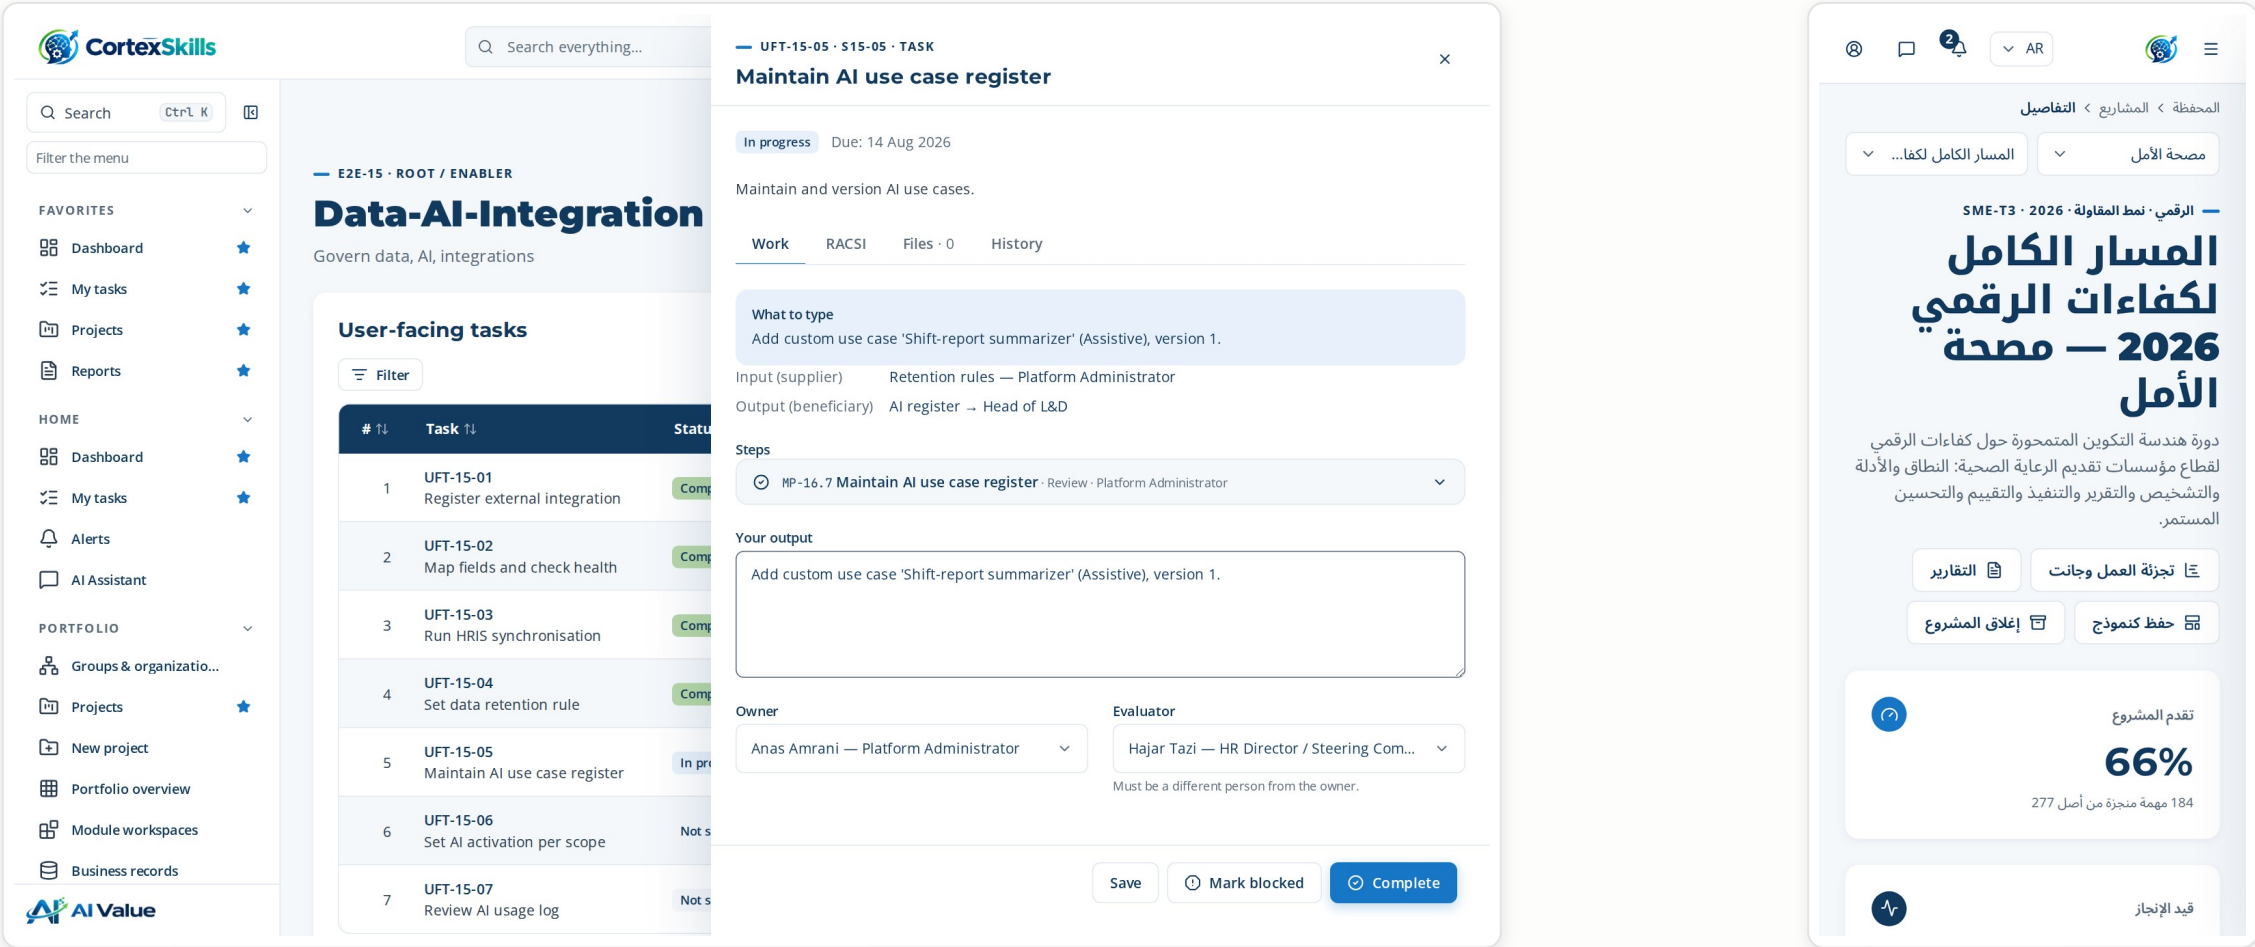

Six gates with five items each on track T3, instead of the Full-mode checklists.

The recommended track is kept; another choice needs a written justification.

The same guidance in English, French and Arabic

The task panel on a desktop, the workspace in Arabic on a phone (right-to-left layout).

One method, sized to the organization

Comparison of the two healthcare providers in the demonstration instance.

	Maghreb Hospitals Group	Clinique Al Amal
Employees • city	4,700 • Casablanca	95 • Marrakech
Complexity score • mode	84 • Full mode	66 • SME track T3
Tasks per run	265	277
AI run completed	65%	50%
Digital run completed	78%	66%
Users	29	11
Solution	BND-05 • 600 seats	SME-CMP • 100 seats
Data protection	GDPR, LAW0908, ISO9001	LAW0908

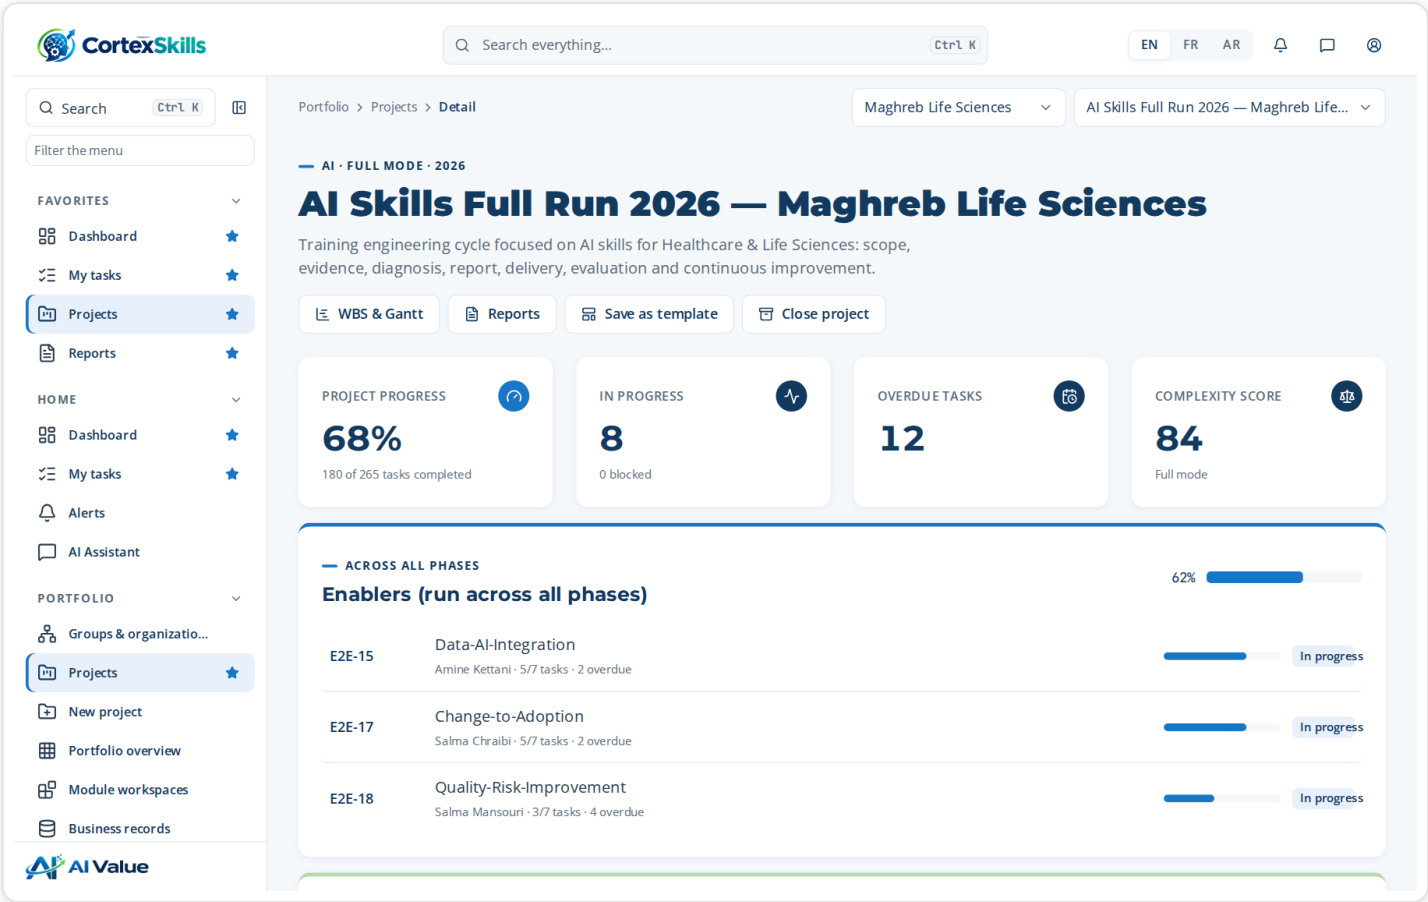

05

The health ecosystem

Life sciences, pharma distribution and pharmaceutical manufacturing

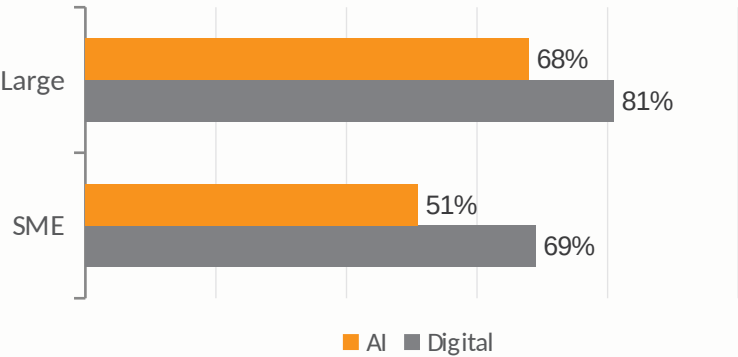

Healthcare & Life Sciences

Core function: Clinical & Laboratory Operations • ISO 13485, EU MDR, ISO 15189

Large company — Maghreb Life Sciences (3100)

SME — BioLab Diagnostics Rabat (60)

Task completion by run (%)

Priority AI themes

- AI-assisted diagnostics validation
- AI for pharmacovigilance signal detection
- Responsible AI and patient-data ethics

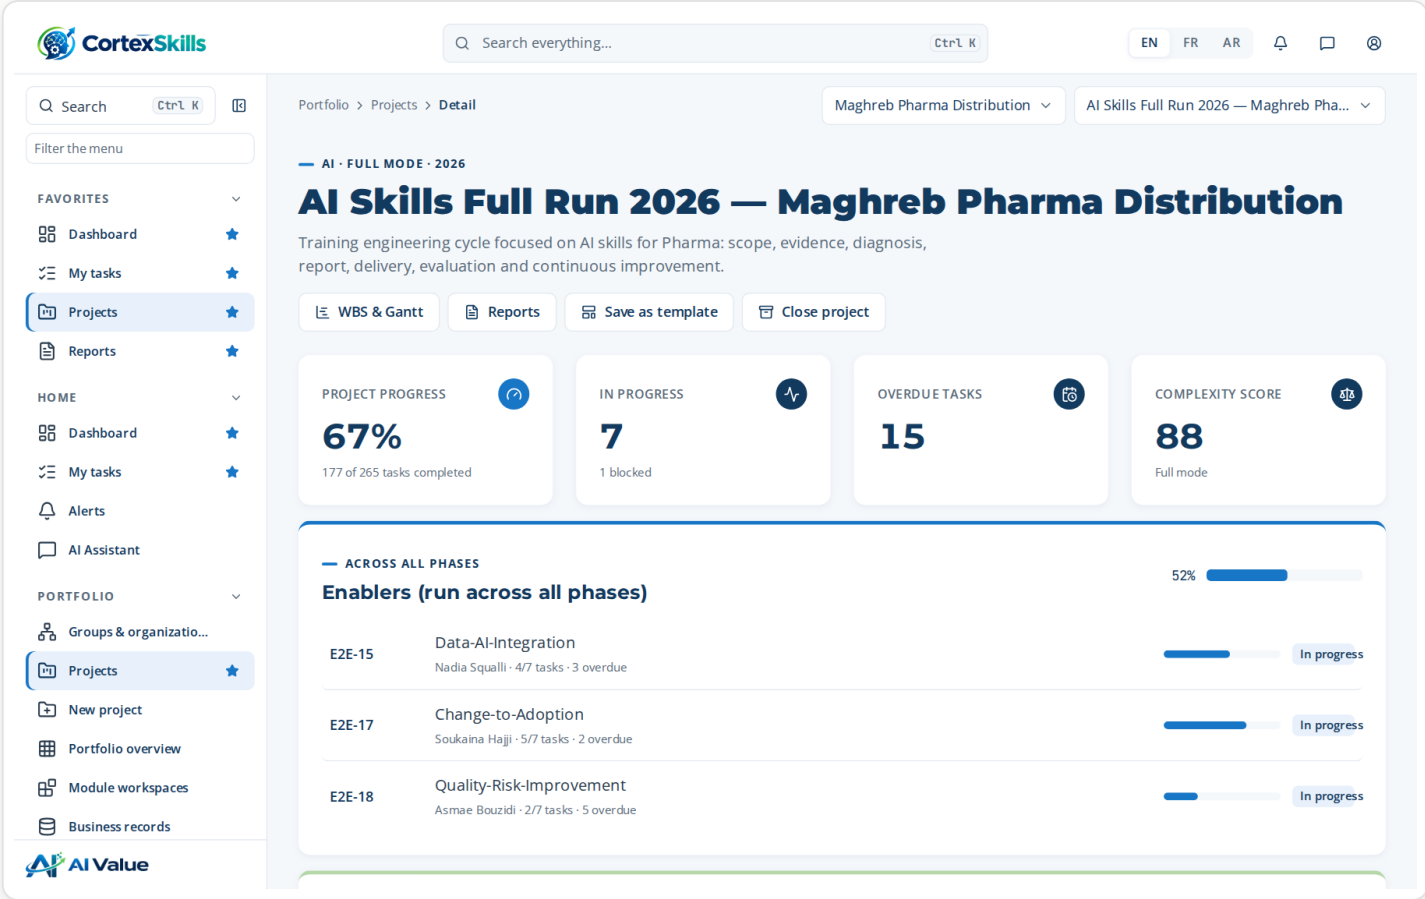

Priority digital themes

- Electronic lab notebooks and LIMS
- Electronic quality management (eQMS)
- Health data interoperability (HL7 FHIR)

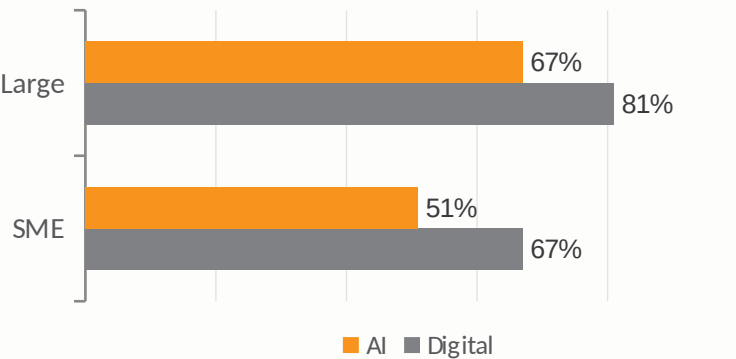

Pharma

Core function: Pharmaceutical Quality & Distribution • EU GMP, GDP, ICH Q9

Large company — Maghreb Pharma Distribution (1400)

SME — PharmaLog Services (44)

Task completion by run (%)

Priority AI themes

- AI regulatory-dossier drafting assistance
- AI demand sensing for medicines
- AI quality-risk management (ICH Q9)

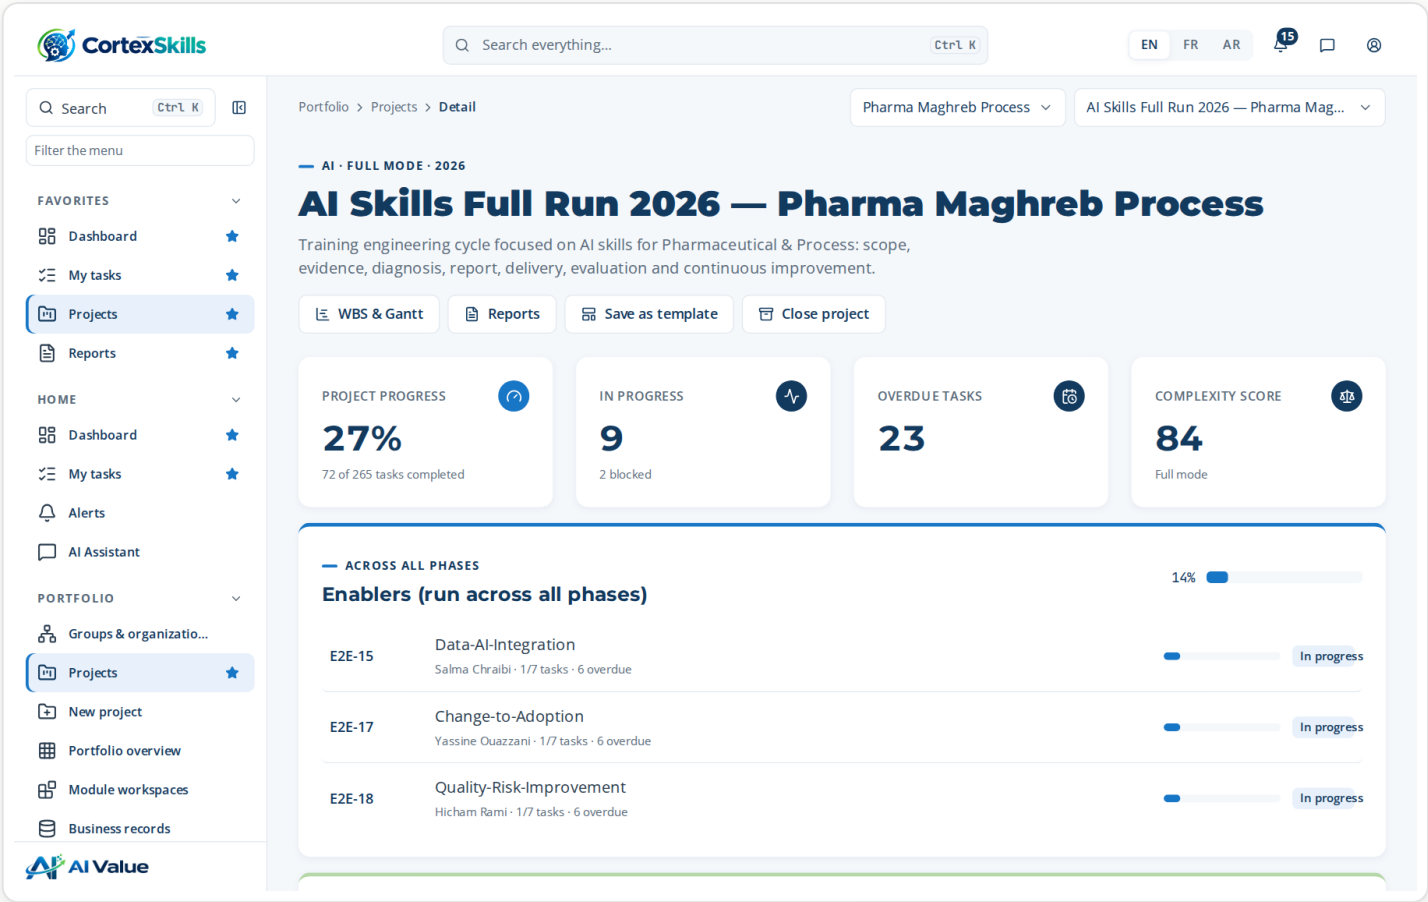

Priority digital themes

- Serialization and track-and-trace
- Digital GDP temperature monitoring
- Regulatory information management (RIM)

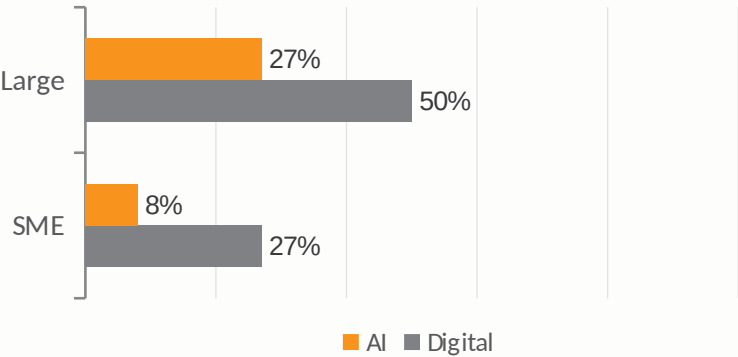

Pharmaceutical & Process

Core function: GMP Manufacturing • EU GMP, ICH Q10, FDA 21 CFR Part 11

Large company — Pharma Maghreb Process (2200)

SME — Galénix Laboratoires (90)

Task completion by run (%)

Priority AI themes

- AI process analytics for yield
- AI deviation and CAPA triage
- Validation of AI models in GxP

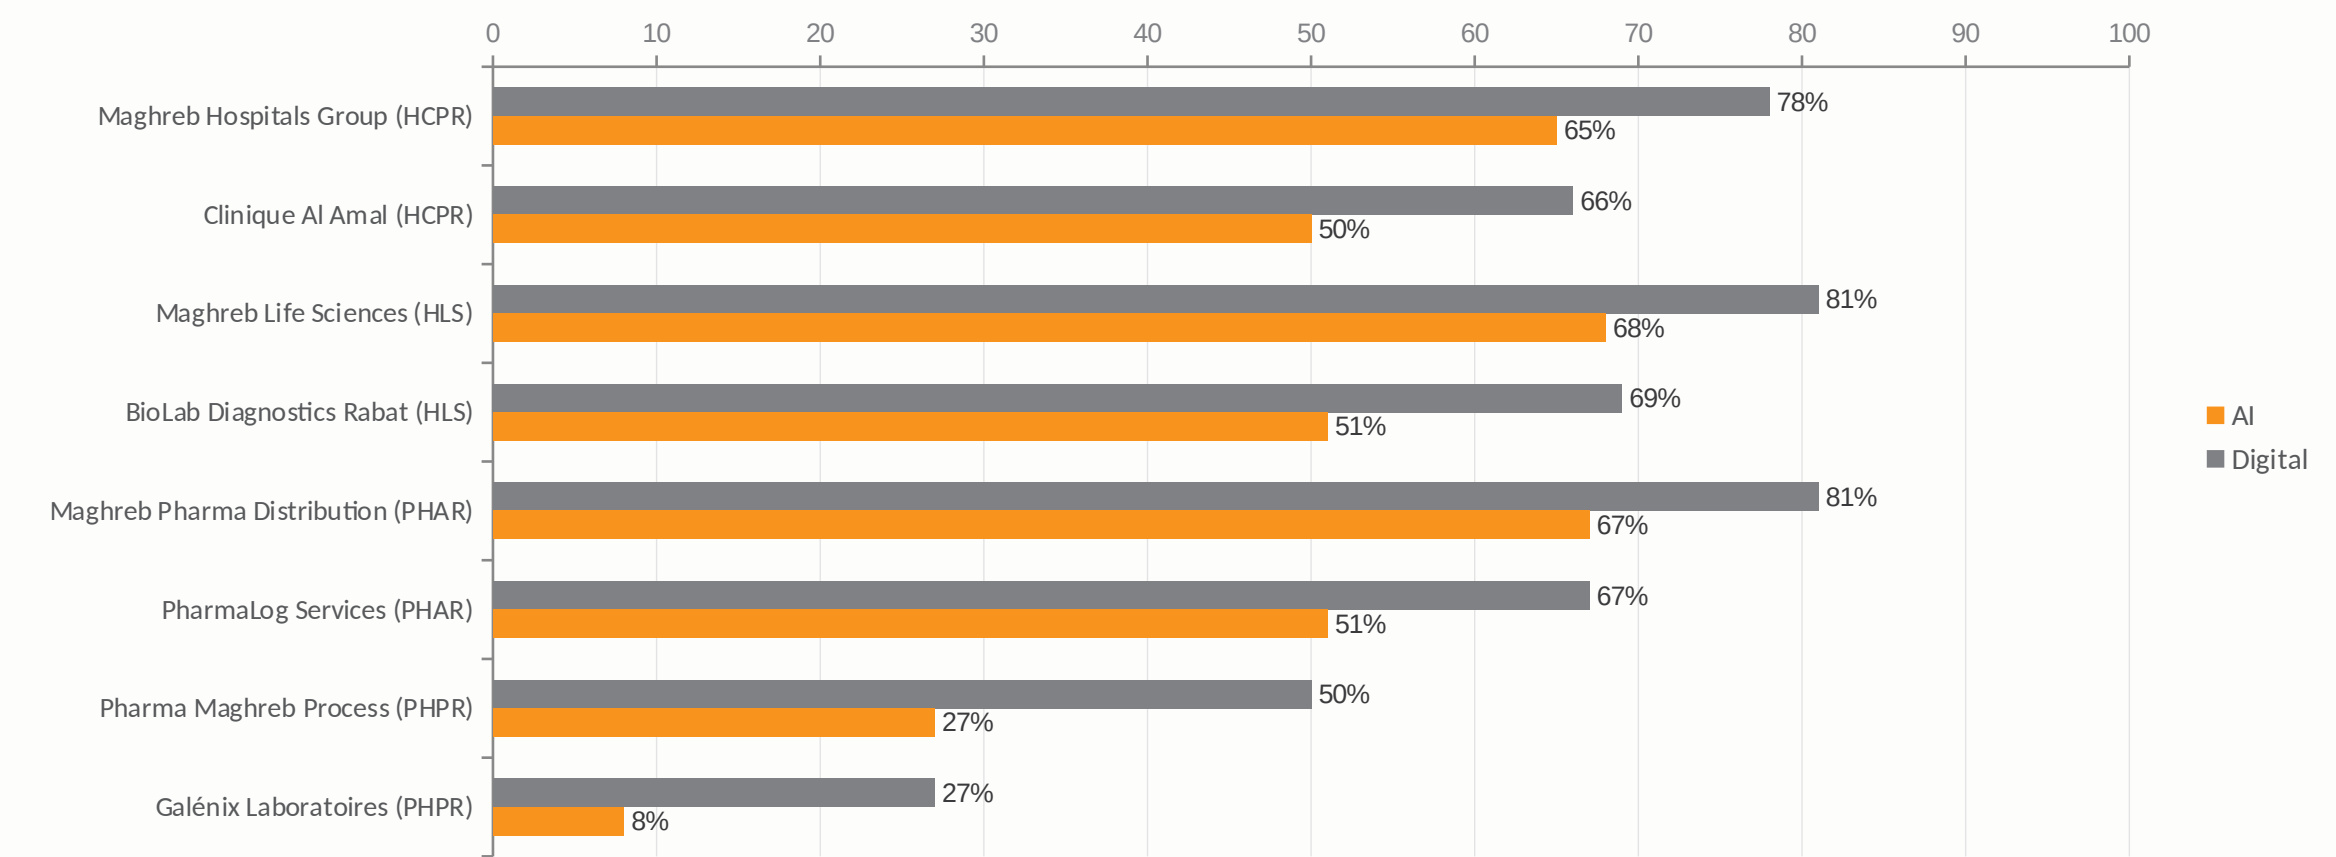

Priority digital themes

- Electronic batch records (EBR)
- Computer system validation (CSV)
- Data integrity and ALCOA+ practices

Eight health organizations, two runs each

Share of tasks completed in the Digital and AI runs of each demonstration organization.

Tasks completed in each run (%). Group members see these aggregates; records of sister organizations stay read-only.

06

Trust and next steps

Security, data protection, deployment and how to start

Patient-adjacent data, handled with strict boundaries

Staff data and training records stay inside the organization's tenant.

Tenant isolation

Each organization is a closed tenant; group members read sister organizations but cannot change them.

Role-based access

Permissions checked on the server for each of the 29 roles; pack entitlements enforced.

Audit trail

Every change to a governed field is justified and recorded in an append-only log.

Data-protection frameworks

GDPR, ISO/IEC 27001, SOC 2, ISO/IEC 27701, ISO 9001, Law 09-08 (CNDP, Morocco).

Governed AI

Each AI use case names its human checkpoint; the usage log keeps every outcome.

Consent

Consent recorded for every stored questionnaire response before gate G1.

18 integrations in the catalog

Three connections at the hospital group, each health-checked; the single sign-on check currently reports a failure.

Family	Integrations
Enterprise Systems	3
Talent & Performance Management	4
Learning Content & Ecosystem	4
Learning in the Flow of Work	2
Data & Analytics	2
Core Platform & Security	2
Survey & Feedback	1

Connected at the hospital group	Code	Last health check
HRIS / HCM	INT-HR-01	Success
Survey platform	INT-SUR-01	Success
SSO (Microsoft Entra ID)	INT-SSO-01	Auth failure

HRIS / HCM examples: Workday, SAP SuccessFactors, Oracle HCM, ADP, BambooHR, Personio, DarwinBox

SaaS or on-premises, same application

One licensing interface with two implementations, chosen when the server starts.

SaaS

- Hosted and updated centrally.
- Licence checked online per organization.
- Suited to clinics and groups without a local IT team.

On-premises

- Installed in the hospital's data centre.
- Signed licence file bound to the server, with expiry date and seat limit.
- Suited to strict data-residency policies.

Demonstration licence of the hospital group: plan BND-05, up to 600 users, features analytics, export, api, valid until 10 Nov 2027.

Recommended packs for a hospital or clinic

Catalog prices per month, in USD; each pack includes a number of users, with a per-user price beyond.

PK-01 Core Training Engineering Pack \$99 per month • 100 users included • \$0.75 per extra user Scope, evidence, diagnosis, the Training Engineering Report and the roadmap.	PK-04 Compliance & Certification Pack \$99 per month • 300 users included • \$0.55 per extra user Certificate tracking and readiness evidence for ISO 7101, JCI and ISO 15189.	PK-03 Assessment, Analytics & ROI Pack \$129 per month • 500 users included • \$0.5 per extra user Kirkpatrick evaluation, KPIs and return on investment.	PK-02 Learning Delivery & Experience Pack \$149 per month • 250 users included • \$0.6 per extra user Paths, modules, sessions and learner engagement.
---	--	---	--

Add-ons that fit hospital groups

Catalog prices per month, in USD.

Add-on	Price	What it adds
AD-08 • Multi-Site / Multi-Entity Deployment	\$55	Adapt and deploy training plans across multiple sites, entities, or business units, ensuring local relevance while maintaining strategic alignment.
AD-09 • External Training Plan Validation (Regulatory)	\$45	Manage external validation and regulatory compliance for training plans, including submission to regulatory bodies (e.g., OFPPT, GIAC-Agro).
AD-11 • Questionnaire Library & Multi-Channel Distribution	\$49	Provide pre-built questionnaire templates tailored to Focus (All training needs, Digital, AI, Custom) and sector, with multi-channel distribution (Face-to-Face, Email, Hybrid, Custom), RACSI allocation per section and structured response collection.
AD-01 • Immersive Learning (VR/AR/Simulation)	\$49	Create experiential, safe-to-fail learning environments using VR, AR, and simulation technologies.
AD-07 • Expert Knowledge Capture & Transfer	\$45	Preserve institutional knowledge before it walks out the door.

Bundle	Packs	Price
Starter Bundle	PK-01 + PK-02	\$223.2 (~10%)
Growth Bundle	PK-01 + PK-02 + PK-03	\$320.45 (~15%)
Enterprise Bundle	PK-01 to PK-05	\$476 (~20%)
Strategic Bundle	PK-01 to PK-06 + PK-08	\$677.25 (~25%)
Full Suite	PK-01 to PK-08	\$806.4 (~30%)

A first run in four steps

Sized by the complexity score: about 30, 60 or 90 days on an SME track; a full run for a hospital group.

01

Set up

Group, organization, functions, users and roles; connect the HR system.

02

Scope and evidence

Approve the Scope of Work, send questionnaires, pass gate G1.

03

Diagnose and plan

Five-axis diagnostic, gaps, prioritized themes, report, budget; gates G2 and G3.

04

Deliver and evaluate

Sessions, Kirkpatrick evaluation, certificates, return on experience; gates G4 to G6.

POWERACT supports each step: set-up, method coaching and the first gate reviews.

Start with one hospital, one run

Book a working session with POWERACT: your accreditation calendar, sites and priority roles.

See the demonstration: sign in to the healthcare tenant and follow a task from scope to certificate.

Run a pilot: one site or one clinic, Digital or AI focus, measured with the same KPIs.
