

CortexSkills

Training engineering, end to end — the application in action, sector by sector

What this presentation covers

01

The lifecycle

Seven phases, 33 end-to-end processes, five gates

02

The dynamics, step by step

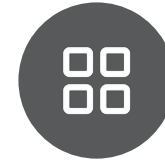

From the tenancy to the reports, on a large company

03

SMEs

Lighter tracks for smaller organizations

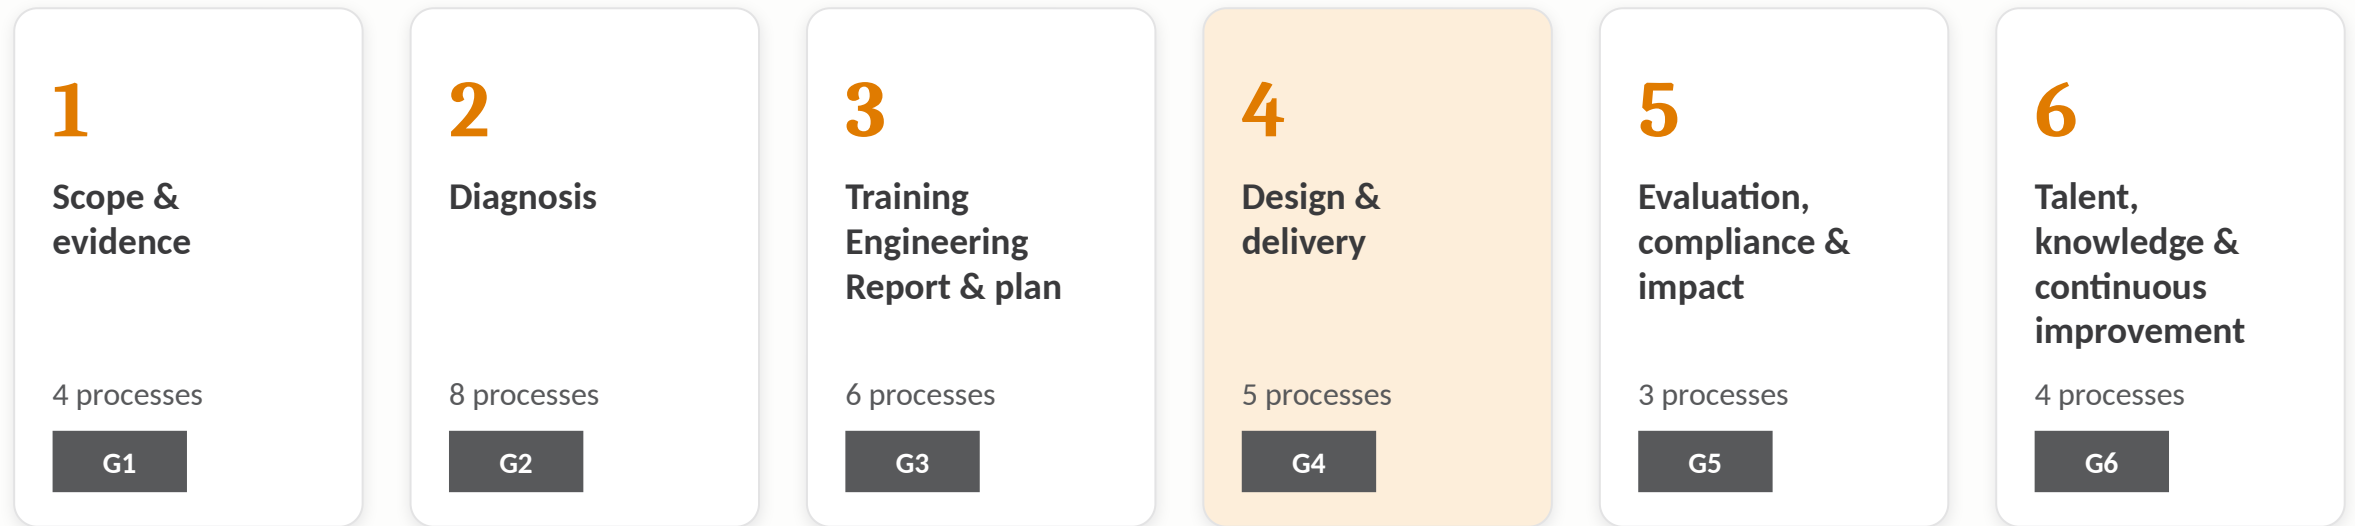

04

Sector by sector

29 sectors, each with its large company and its SME

One lifecycle, seven phases

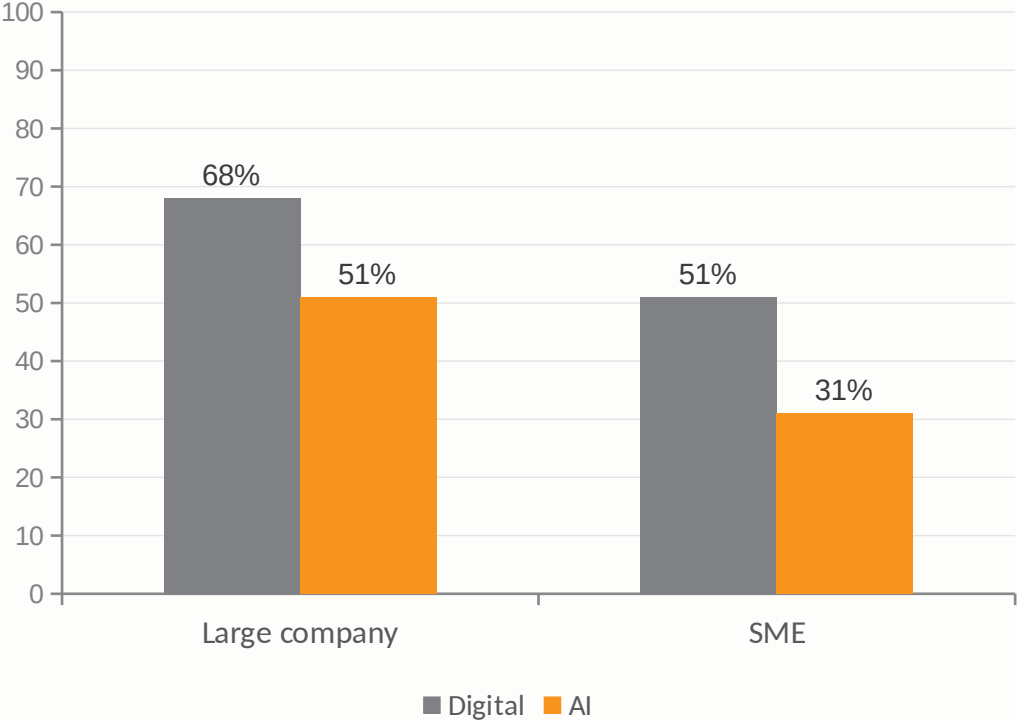

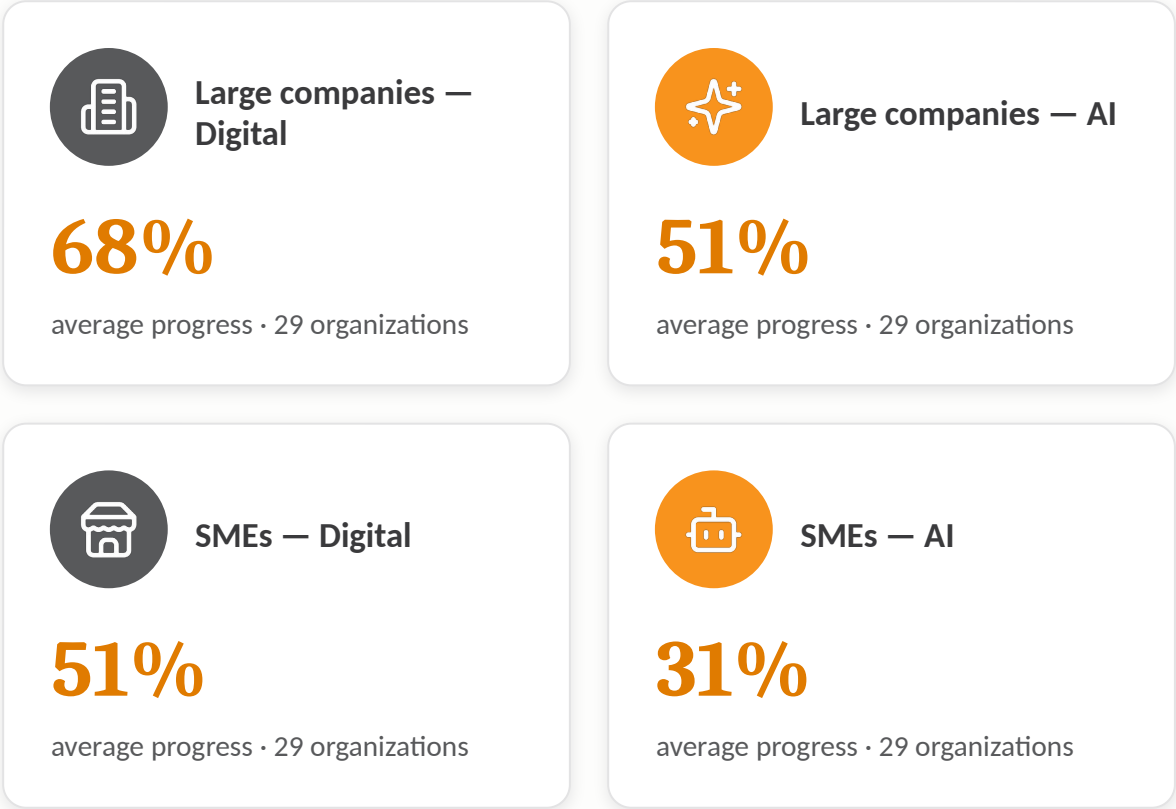

Each phase groups end-to-end processes; a gate closes each main phase.

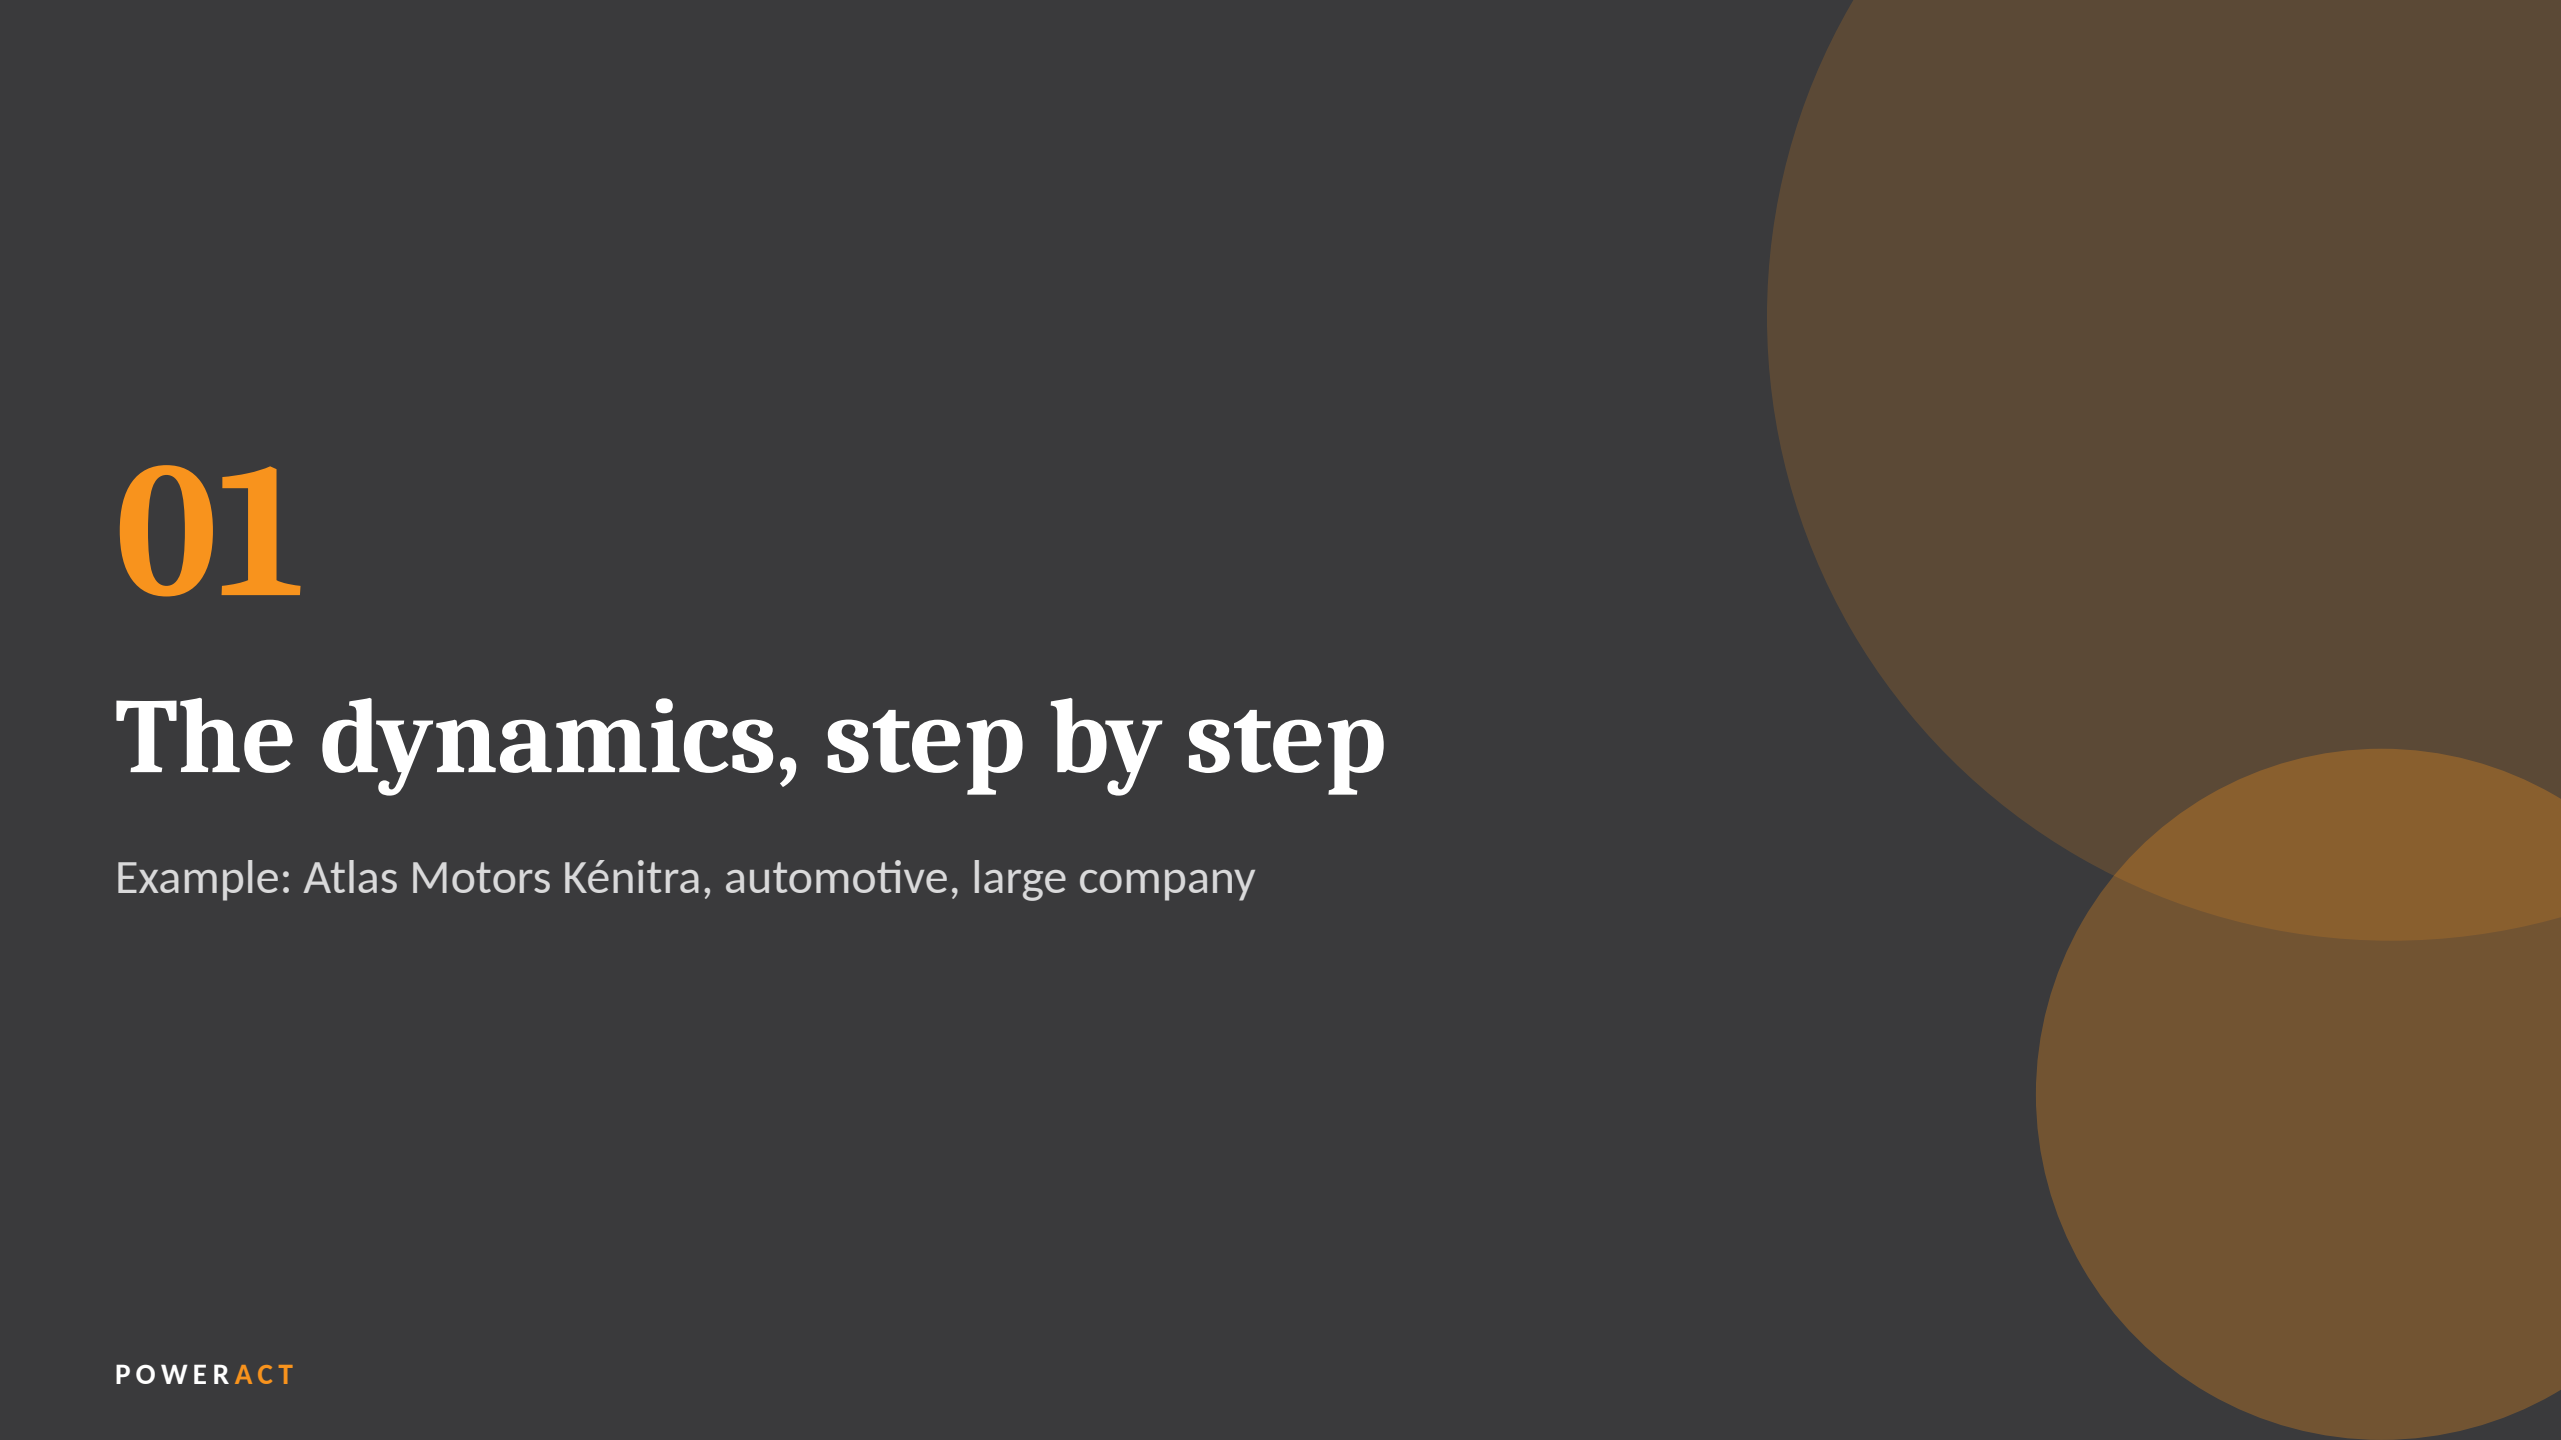

Enablers run across all phases — E2E-15 · E2E-17 · E2E-18

Every organization runs two full cycles

Digital skills and AI skills, for large companies and SMEs, in 29 sectors.

Average task completion by segment and run, across the 29 sectors (%)

01

The dynamics, step by step

Example: Atlas Motors Kénitra, automotive, large company

Start from the Group and the Organization

The screenshot displays the 'Groups & organizations' interface in CortexSkills. The main content area is divided into two columns: 'Atlas Industries Holding' (Group: Yes) and 'Independent organizations' (Group: No). Under 'Atlas Industries Holding', there are six organizations listed: Atlas Motors Kénitra, Aero Atlas Nouaceur, Maghreb Machines Industries, Atlas Electronics Group, Chantiers Navals du Détroit, and Atlas Steel Structures. Each organization has associated progress bars for 'Digital Skills Full Run 2026' and 'AI Skills Full Run 2026'. The left sidebar shows a navigation menu with options like Dashboard, My tasks, Projects, Reports, Alerts, AI Assistant, and Portfolio overview. The top header features a search bar, language selection (EN, FR, AR), and a notification bell.

Choose the Group (Yes or No), then the Organization.

Each organization is a closed tenant: its data is never visible to another.

Group members can read sister organizations; they cannot change them.

Create the run from the catalog, by hand or with AI

NEW PROJECT

The project is created in Atlas Motors Kénitra. Choose how to start.

Organization: Atlas Motors Kénitra · Group: Yes — Atlas Industries Holding

From the catalog | Manual | With AI

Choose a published template

Search | Filter | Comfortable | Compact

	Name ↑↓	Scope ↑↓	Focus ↑↓	Phases ↑↓	Uses ↑↓
☐	Automotive — full run — AI (copy)	Vertical · AUTO	AI	7	0

1 rows

Project details

Name: Example: Digital Skills Full Run 2027 | Focus: Digital

Description:

Complexity score

- Strategic impact · 20%: 3 — Moderate
- Technical novelty · 15%: 3 — Moderate
- Regulatory burden · 15%: 3 — Moderate
- Investment size · 15%: 3 — Moderate
- Cross-functional scope · 15%: 3 — Moderate

Rate seven weighted criteria: the score recommends Full mode or an SME track.

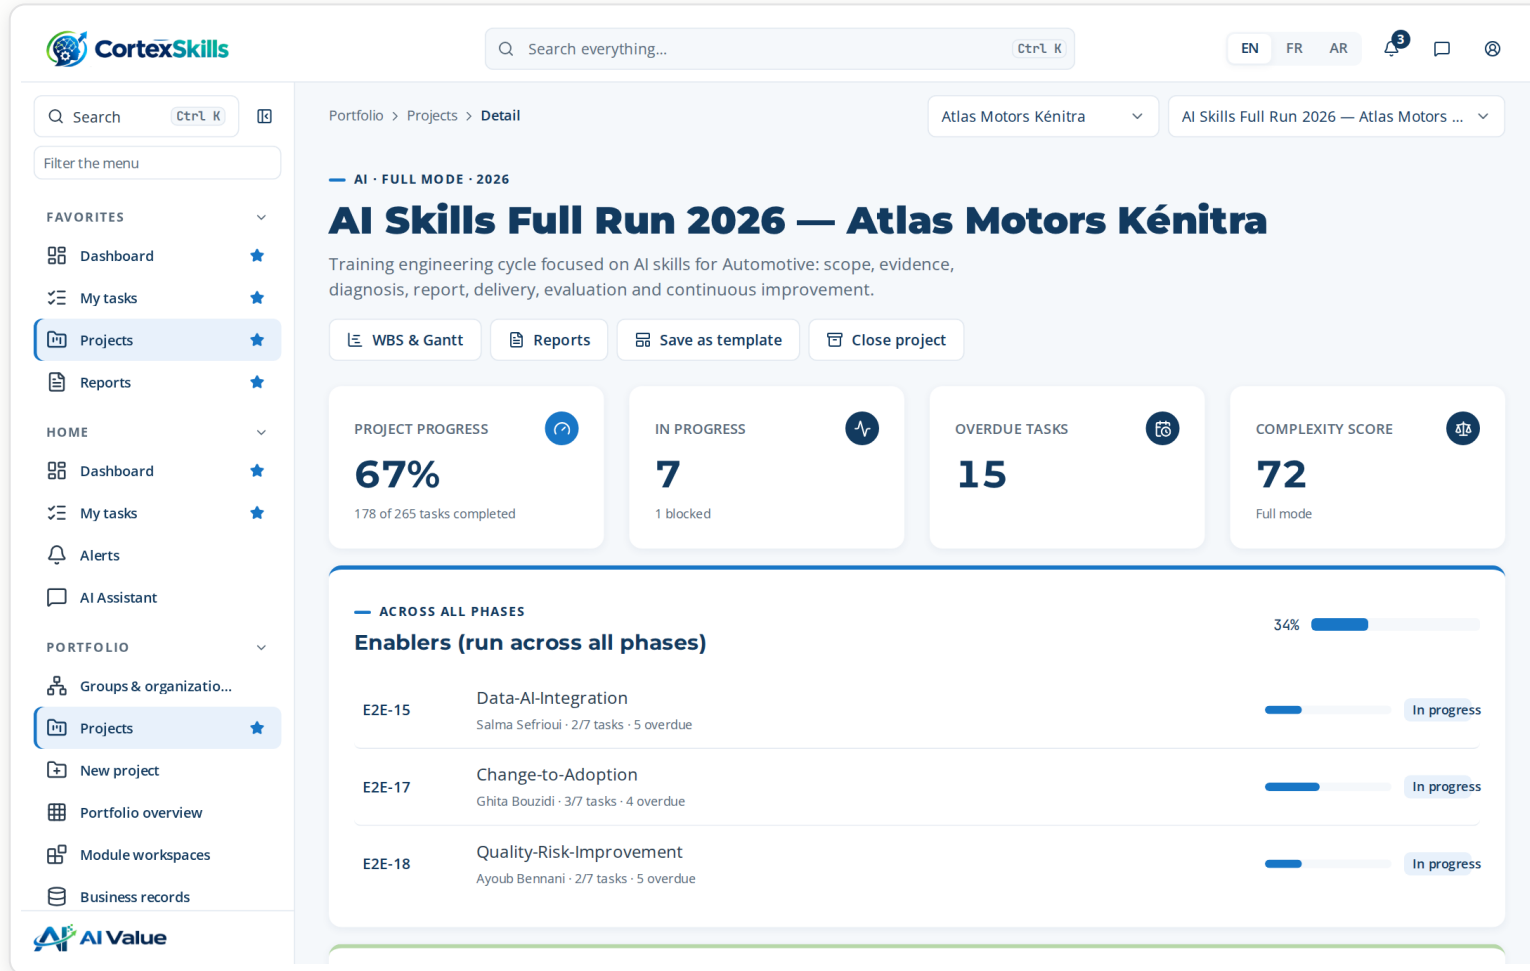

With AI: type a short description; accept, change or reject each proposed item.

Phases, gates, checklists and roles come from the chosen template.

Seven phases, processes and gates on one screen

Progress per phase and per process, overdue tasks, complexity score.

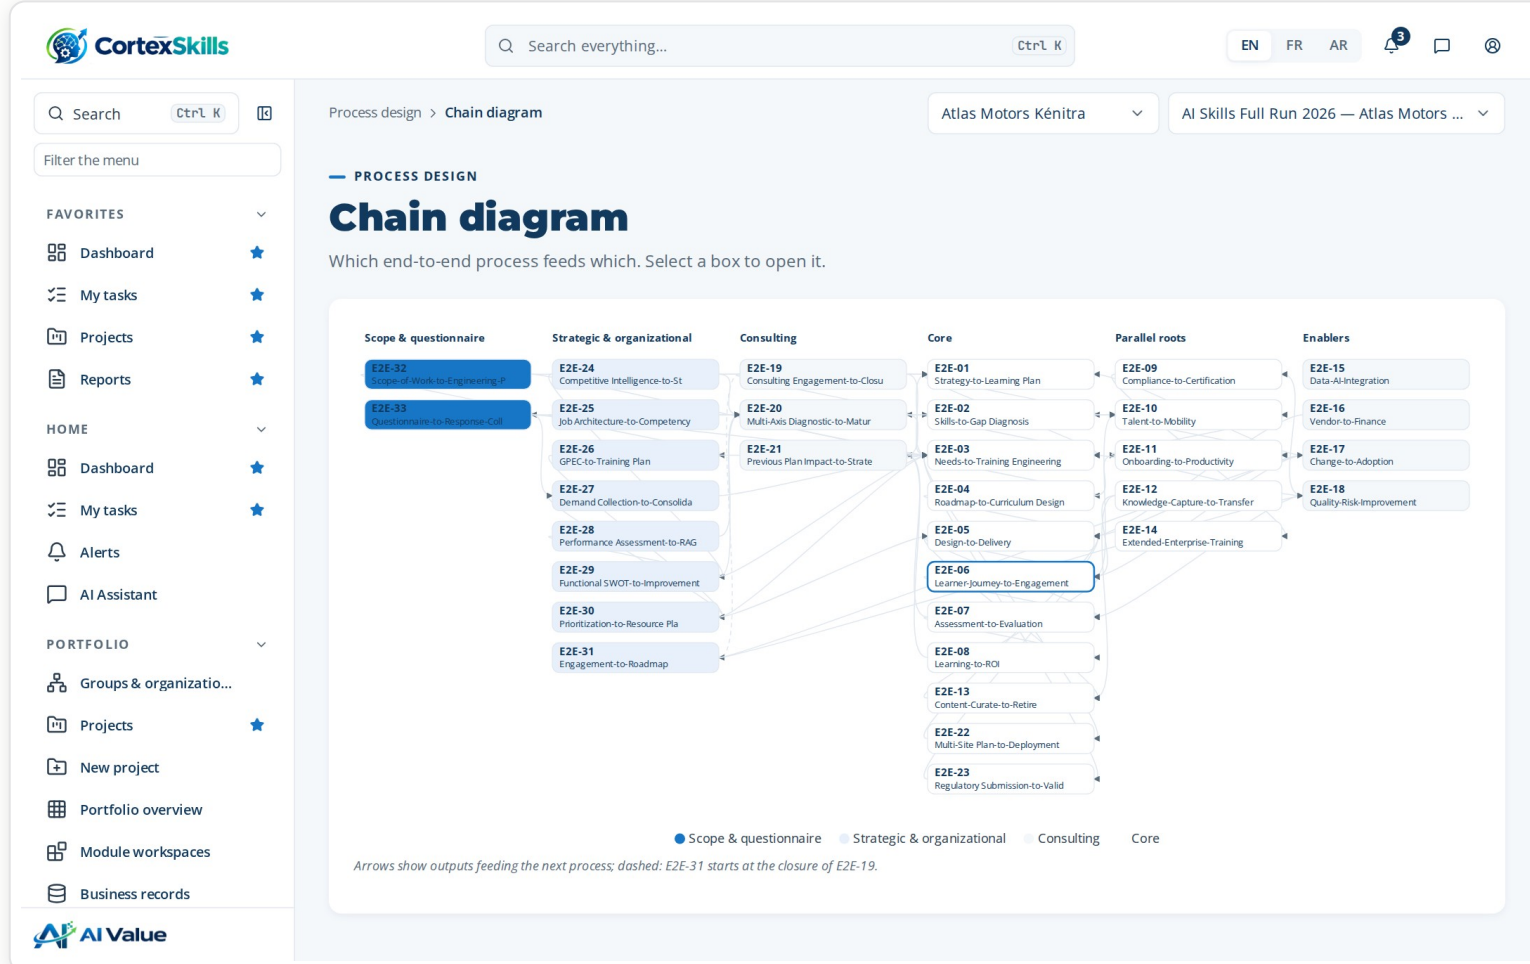

Enablers (data, change, quality) run across all phases.

A gate checklist must be complete before the next phase starts.

Processes feed each other

Each end-to-end process has a trigger, an end state and its inputs and outputs.

The chain shows which process consumes which output.

BPMN diagrams can be viewed, edited, imported and exported.

Documents written from the run's data

The screenshot shows the CortexSkills web application interface. On the left is a sidebar with navigation options: FAVORITES (Dashboard, My tasks, Projects, Reports), HOME (Dashboard, My tasks, Alerts, AI Assistant), and PORTFOLIO (Groups & organization, Projects, New project, Portfolio overview, Module workspaces, Business records). The main content area displays a document titled 'Rapport de clôture de mission de conseil — Atlas Motors Kénitra' under the breadcrumb 'Reports > Documents > Detail'. The document is identified as 'DT-E2E-19 · V1 · FR'. It lists 'Author Omar Benjelloun · approver Tarik Lahlou · data as of 6 Oct 2026'. Action buttons include 'Documents', 'DOCX', 'PDF', 'XLSX', 'Published', 'Regenerate', 'New version', and 'Retire'. Below these are tabs for 'Content', 'Sections', 'Metadata', 'Versions · 1', and 'Sources'. The 'Content' tab is active, showing sections: 'Objet et périmètre', 'Références et définitions', 'Références', 'Définitions', and 'Méthode et échelles de notation'. The 'Objet et périmètre' section contains text about the mission completion process for Atlas Motors Kénitra. The 'Méthode et échelles de notation' section mentions a 9-task, 15-step process.

37 templates: one per process deliverable, the report, the plan, the audit and the master list.

Overrides stay through regeneration; versions are compared and restored.

Published by a second person; Word, PDF and Excel.

Code	Role	Functions	Held by	
OR-01	Platform Administrator	Operations	Ghita Ziani · 80%	Assign
OR-02	HR Director / Steering Committee Chair	Quality & HSE	Tarik Lahlou · 80%	Assign
OR-03	Head of L&D	Finance	Sara Lahlou (Deputy) · 20% · Omar Benjelloun · 80%	Assign

Functions group roles; each role has its holders, deputies and allocation.

The organization chart and vacant roles, on any date.

RACSI per step, by role, with exactly one Accountable.

02

SMEs: lighter tracks

Example: Clinique Al Amal, healthcare provider

Three SME tracks, sized by complexity

The complexity score recommends the track; a different choice needs a justification.

T1 · Essential

Score 0-29

Fewer gates, short checklists, about 6 weeks

T2 · Standard

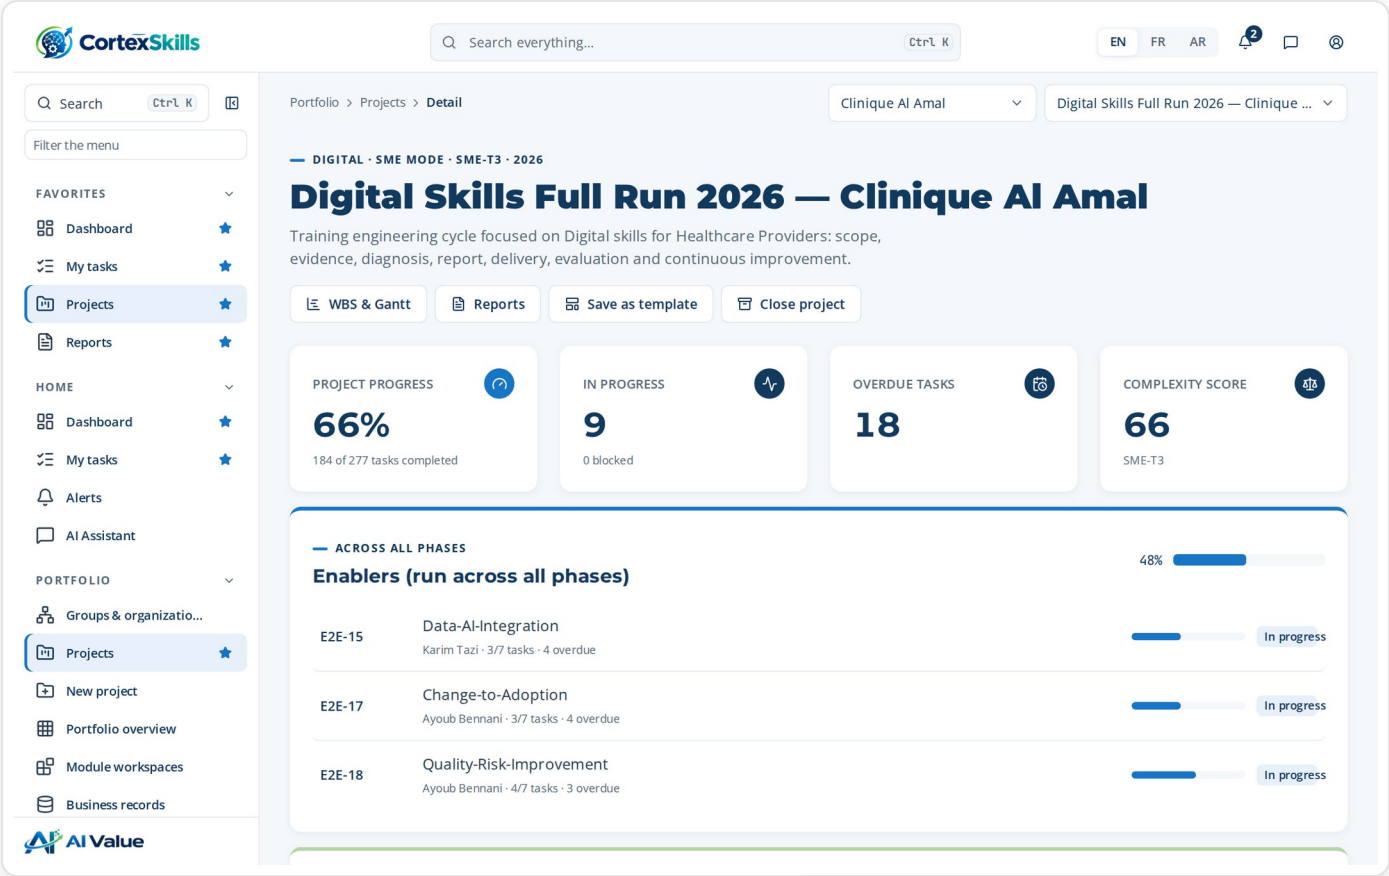

Score 30-49

Core processes with three gates

T3 · Extended

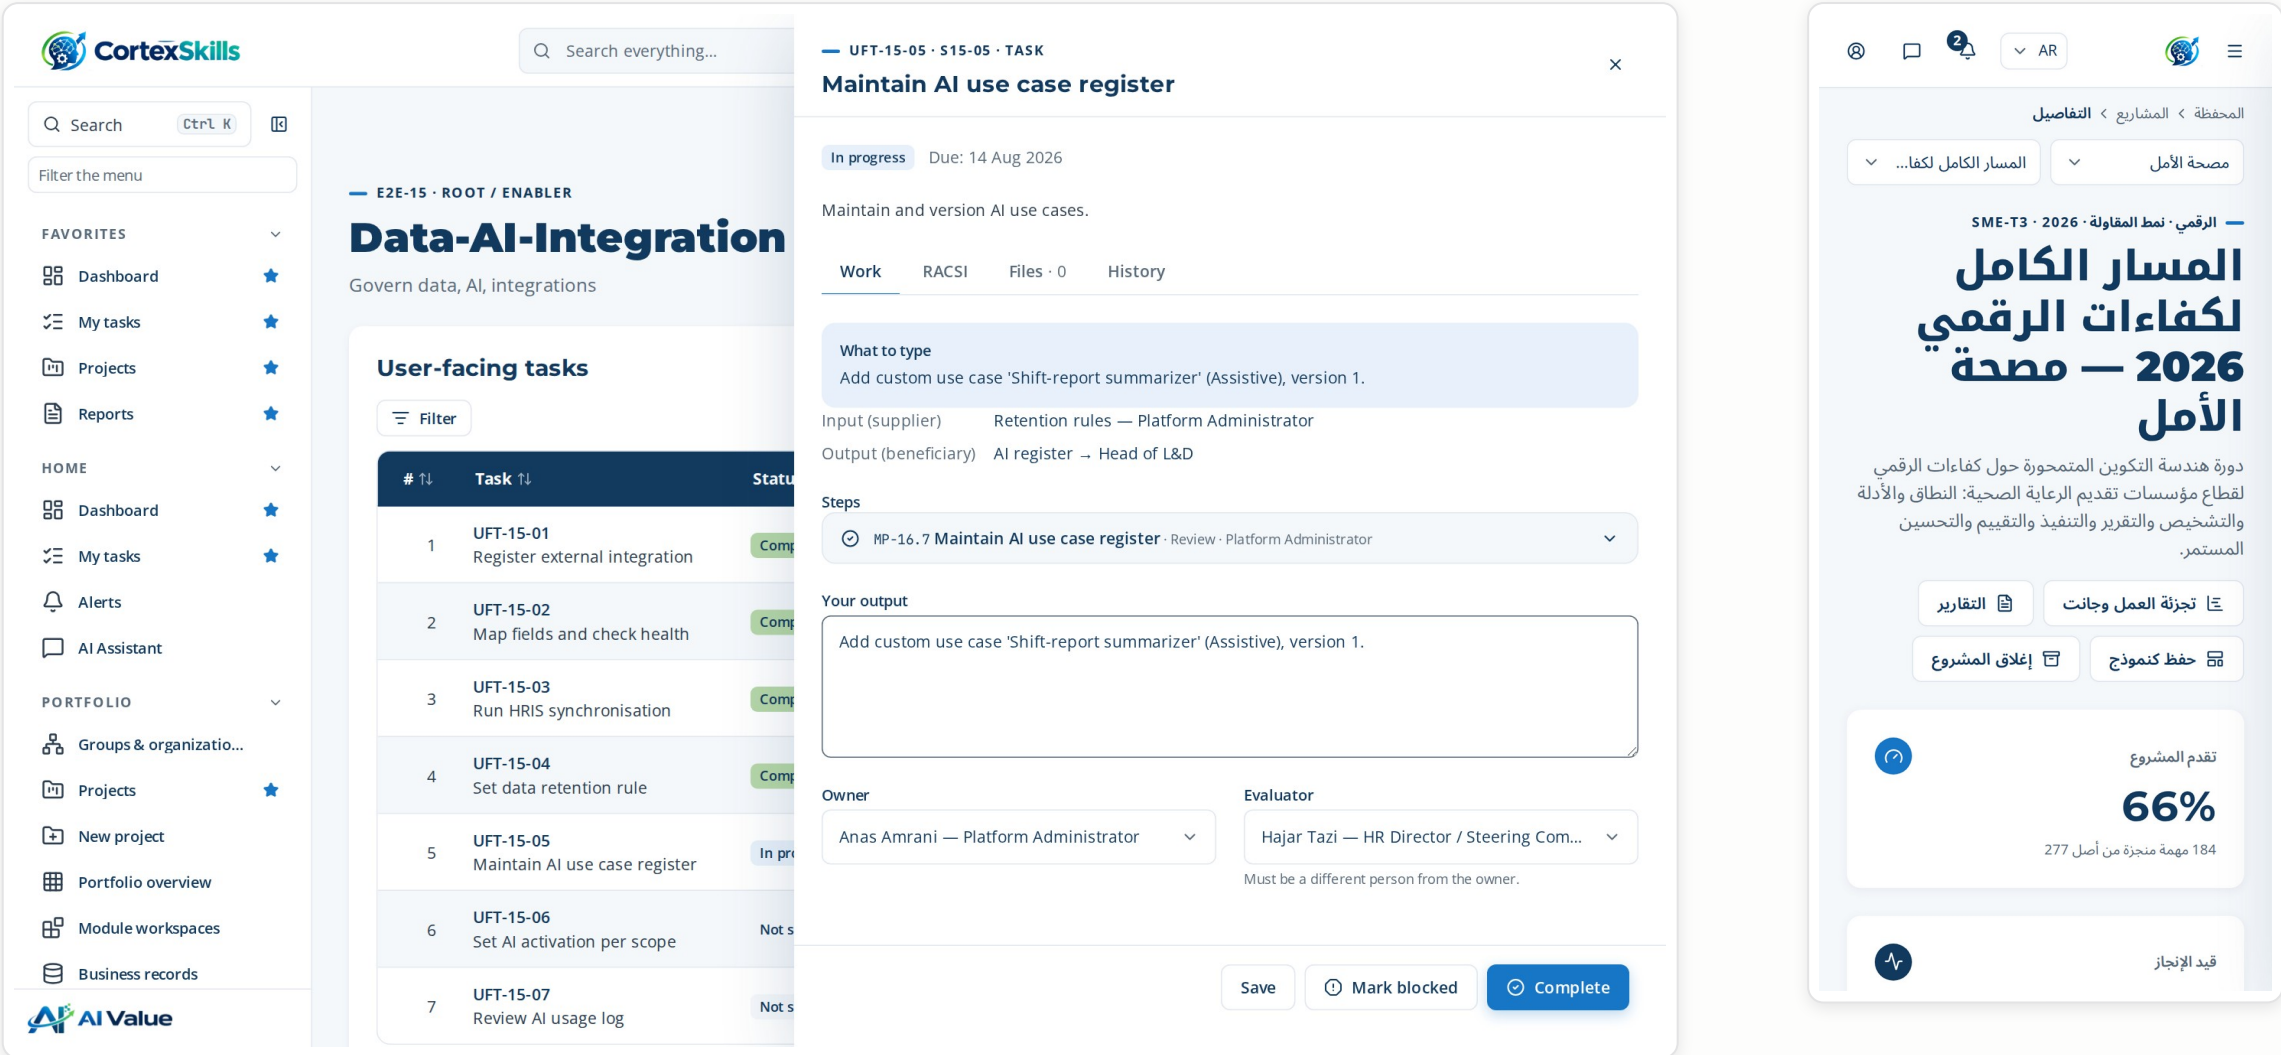

Score 50-69

Close to Full mode, lighter documentation

Same guidance, on any screen

Healthcare SME: the task panel in French, the workspace in Arabic on a phone.

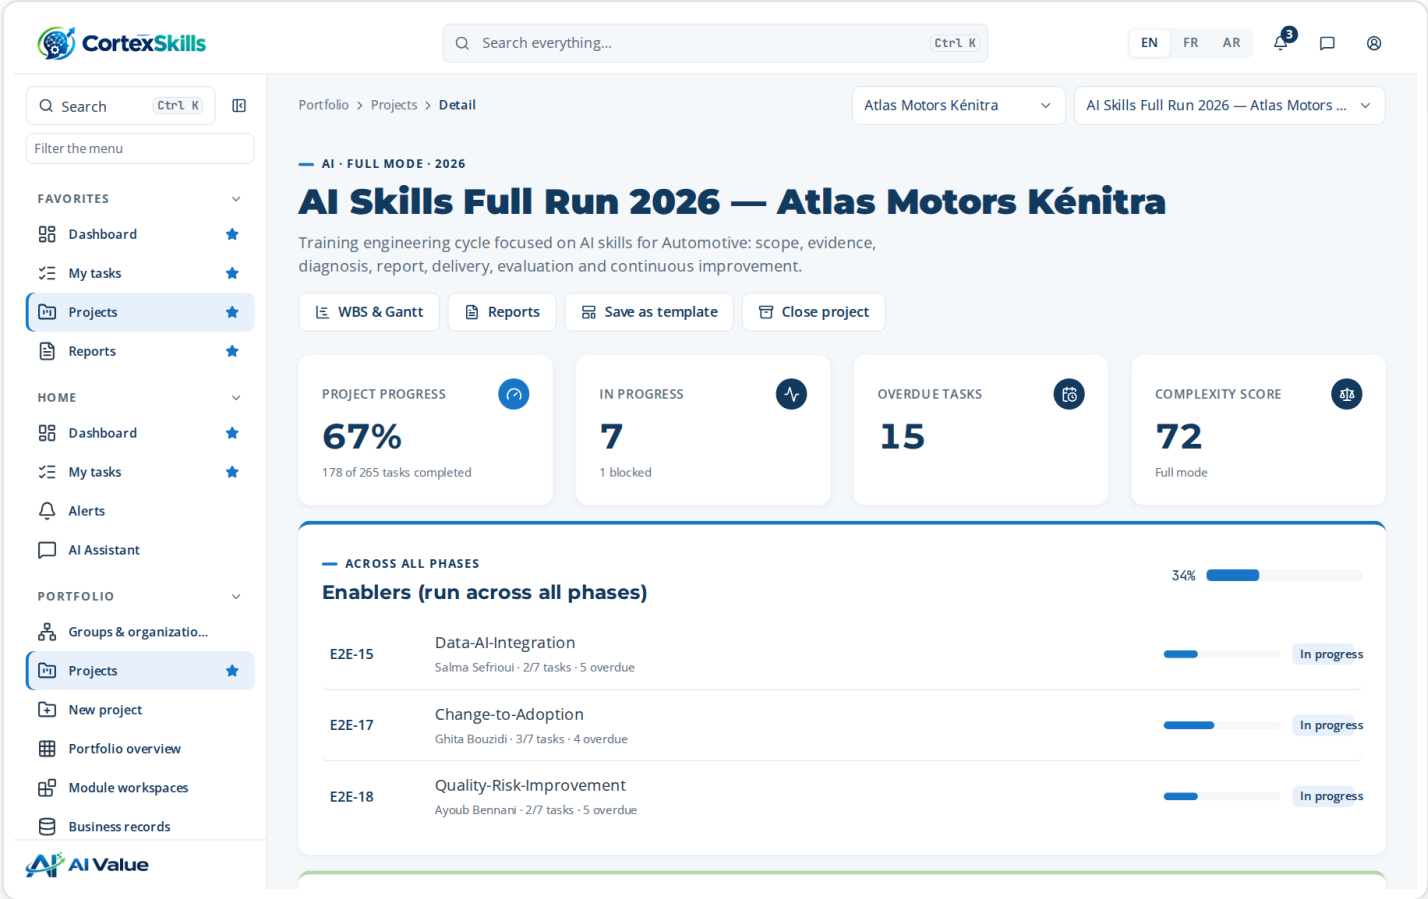

03
