DYNAMICMS 1.0

Universal Case Study — One Full Run of DynamicMS

Twelve end-to-end processes, their macro processes, tasks and steps, as recorded in the application — prepared for healthcare organizations

POWERACT Consulting · October 2026

Agenda

01 The case: one organization, one full run

02 What it means for a healthcare organization

03 The twelve end-to-end processes, phase by phase

04 Evidence, measurement, documents and AI

05 Next steps for your organization

THE CASE

Horizon Universal Holdings: a full QMS run from context to innovation

Project HZ-UNI-QMS · ISO 9001 · 2025-10-01 to 2026-12-30 · 9,167 employees · universal profile

12
end-to-end processes, run as phases

111
macro processes activated

346
tasks

1,057
workflow steps with their recorded values

90%
of the run completed; 11 gates passed (Go)

19
people, each in a named role

All values come from the demonstration database of DynamicMS; names and figures are fictional.

Licence of the case: DMS-ENT with DMS-AI, DMS-CERT, DMS-ESG and add-ons ADD-01, ADD-04, ADD-06, ADD-07.

FOR HEALTHCARE

The same twelve processes run a hospital's management system

The universal run is the common core. For a healthcare provider (segment V-29), DynamicMS activates the following on top of it.

STANDARDS

JCI
ISO 9001
ISO/IEC 27001
HIPAA · GDPR
National Health Authority
HL7 FHIR

79 MACRO PROCESSES, INCLUDING

Medical Laboratory Management
Facility Management
IT Service Management
Cloud Security and Privacy
Anti-Bribery and Corruption

RECOMMENDED LICENCE

DMS-PRO
+ DMS-LSCI Life Sciences & Healthcare
+ DMS-CERT Certification
+ DMS-AI Intelligence & Assurance

Source: DynamicMS catalog (segment V-29 Healthcare Providers, Packs catalog 2.5).

FOR HEALTHCARE

How the run reads in a hospital

E2E	In the universal run	In a hospital (illustration)
E2E-01	Interested parties, context issues	Patients and families, regulator, medical staff, insurers
E2E-03	Risk and opportunity register	Patient safety risks, infection control, continuity of care
E2E-05	Competence, documents, measuring equipment	Clinical competences, care protocols, calibrated medical devices
E2E-08	Requirements to delivery	Care pathways from admission to discharge
E2E-09	Nonconformity, root cause, corrective action	Adverse events and near misses, analysis, lessons learned
E2E-10	KPIs, process and management reviews	Quality and safety indicators, accreditation readiness
E2E-11	Audits and assurance	Internal audits against JCI and ISO 9001, mock surveys

Illustration of how the same steps are used; the healthcare macro processes add their own steps.

PDCA

Twelve phases on one Plan-Do-Check-Act cycle

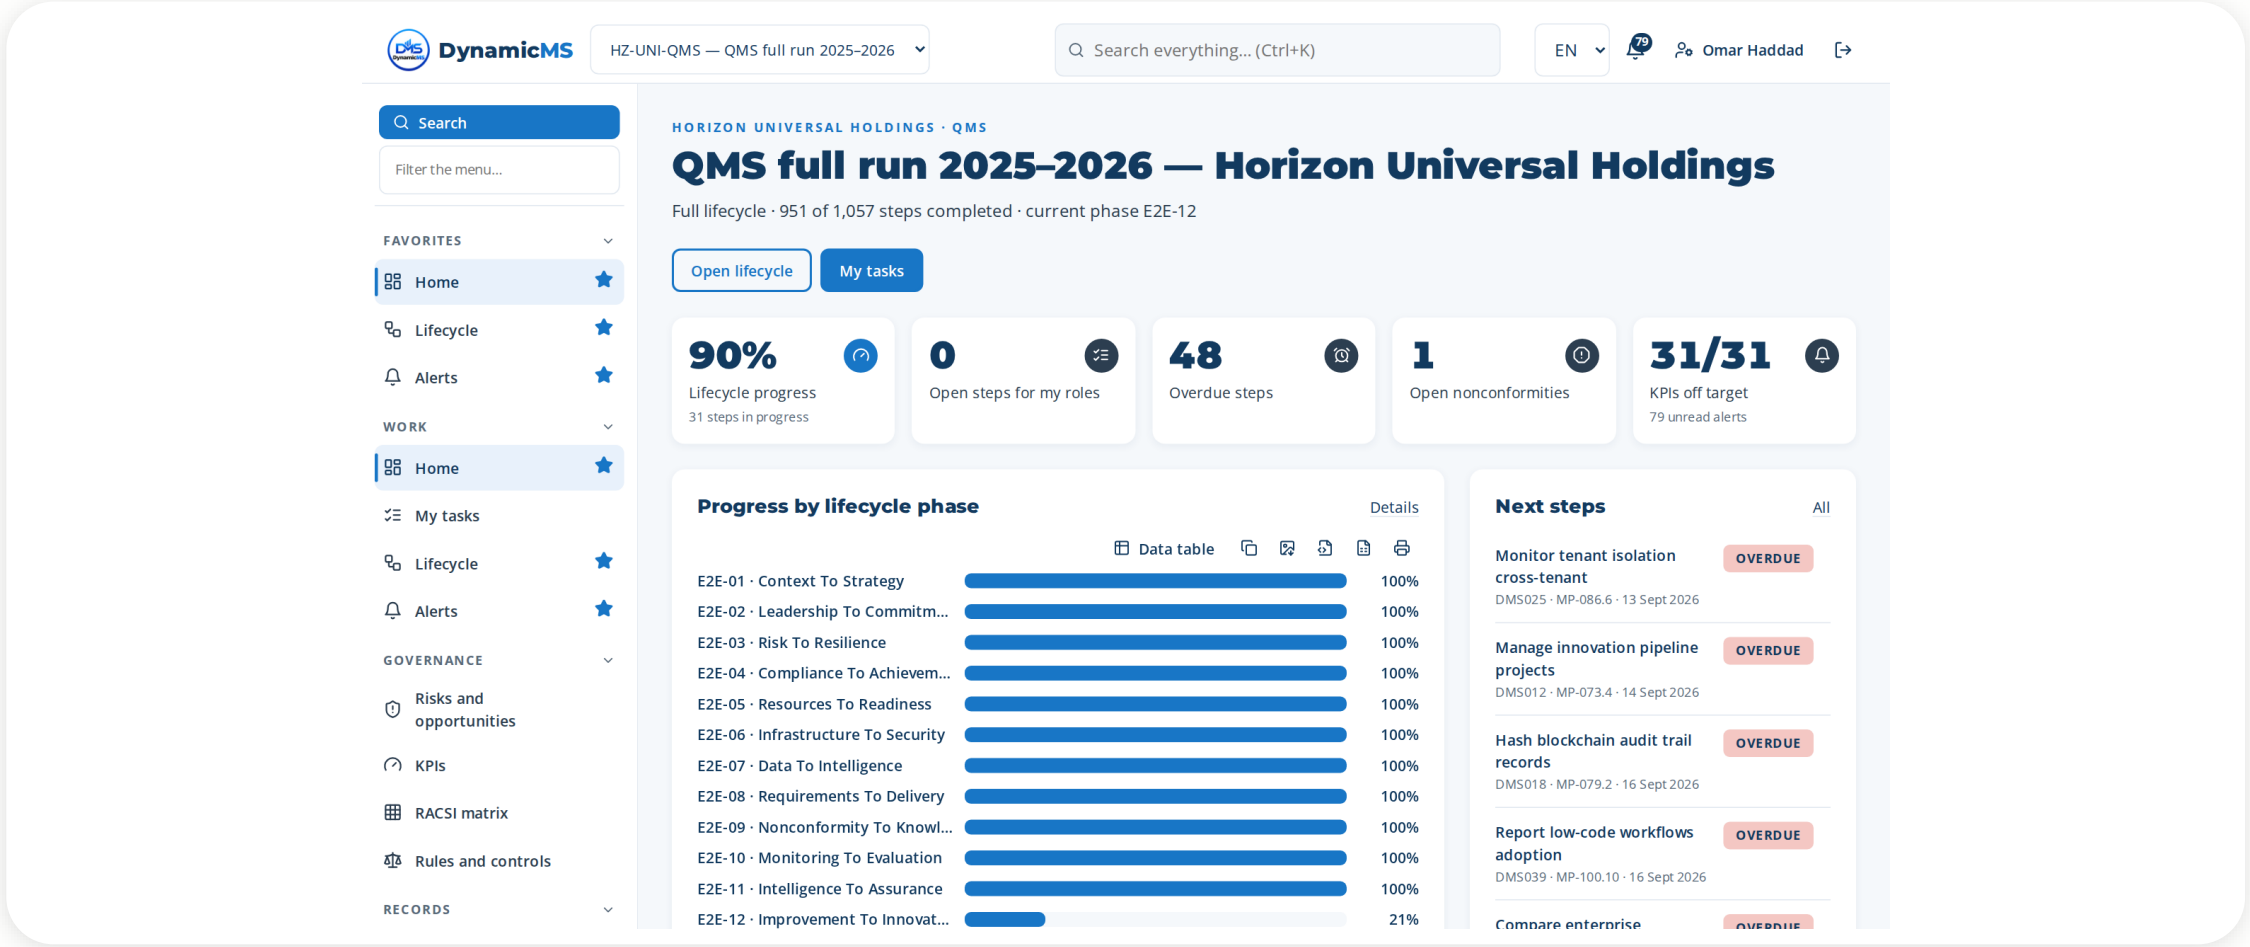

Act feeds the next Plan: management review and improvement restart E2E-01

E2E	Name	PDCA	MP	Steps	Gate
E2E-01	Context To Strategy	Plan	13	136	Go
E2E-02	Leadership To Commitment	Plan	5	52	Go
E2E-03	Risk To Resilience	Plan	6	58	Go
E2E-04	Compliance To Achievement	Plan	5	50	Go
E2E-05	Resources To Readiness	Do	4	50	Go
E2E-06	Infrastructure To Security	Do	11	102	Go
E2E-07	Data To Intelligence	Do	4	34	Go
E2E-08	Requirements To Delivery	Do	8	73	Go
E2E-09	Nonconformity To Knowledge	Check	12	109	Go
E2E-10	Monitoring To Evaluation	Check	17	163	Go
E2E-11	Intelligence To Assurance	Check	11	95	Go
E2E-12	Improvement To Innovation	Act	15	135	Active

Leadership To Commitment: the phase in the application

Lifecycle › E2E-02: macro processes of the phase with their progress and gate.

DELIVERS

Roles, RACSI, governance bodies, leadership commitments and communication.

FEEDS

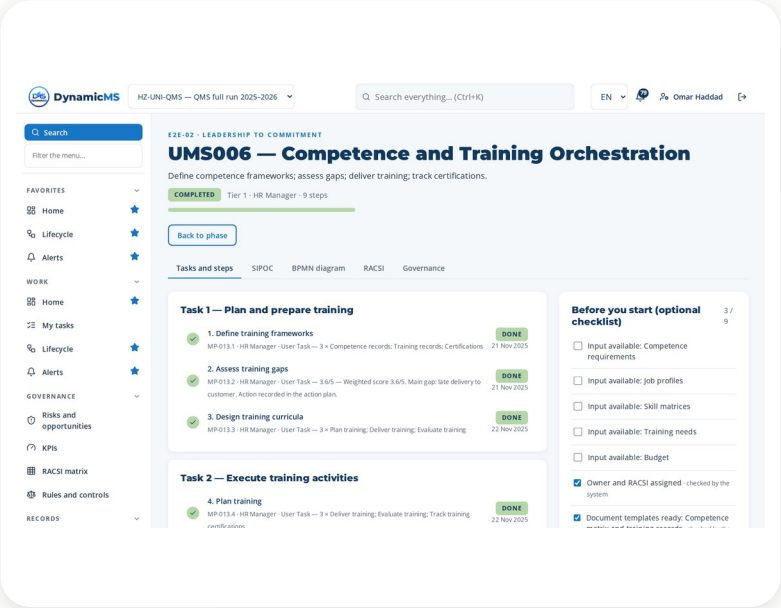

Every phase (owners and approvers); E2E-10 (management review).

MACRO PROCESS · MP-013 (UMS006)

Competence and Training Orchestration

Define competence frameworks; assess gaps; deliver training; track certifications. · Owner: HR Manager · ISO 9001 §7.2, §7.3

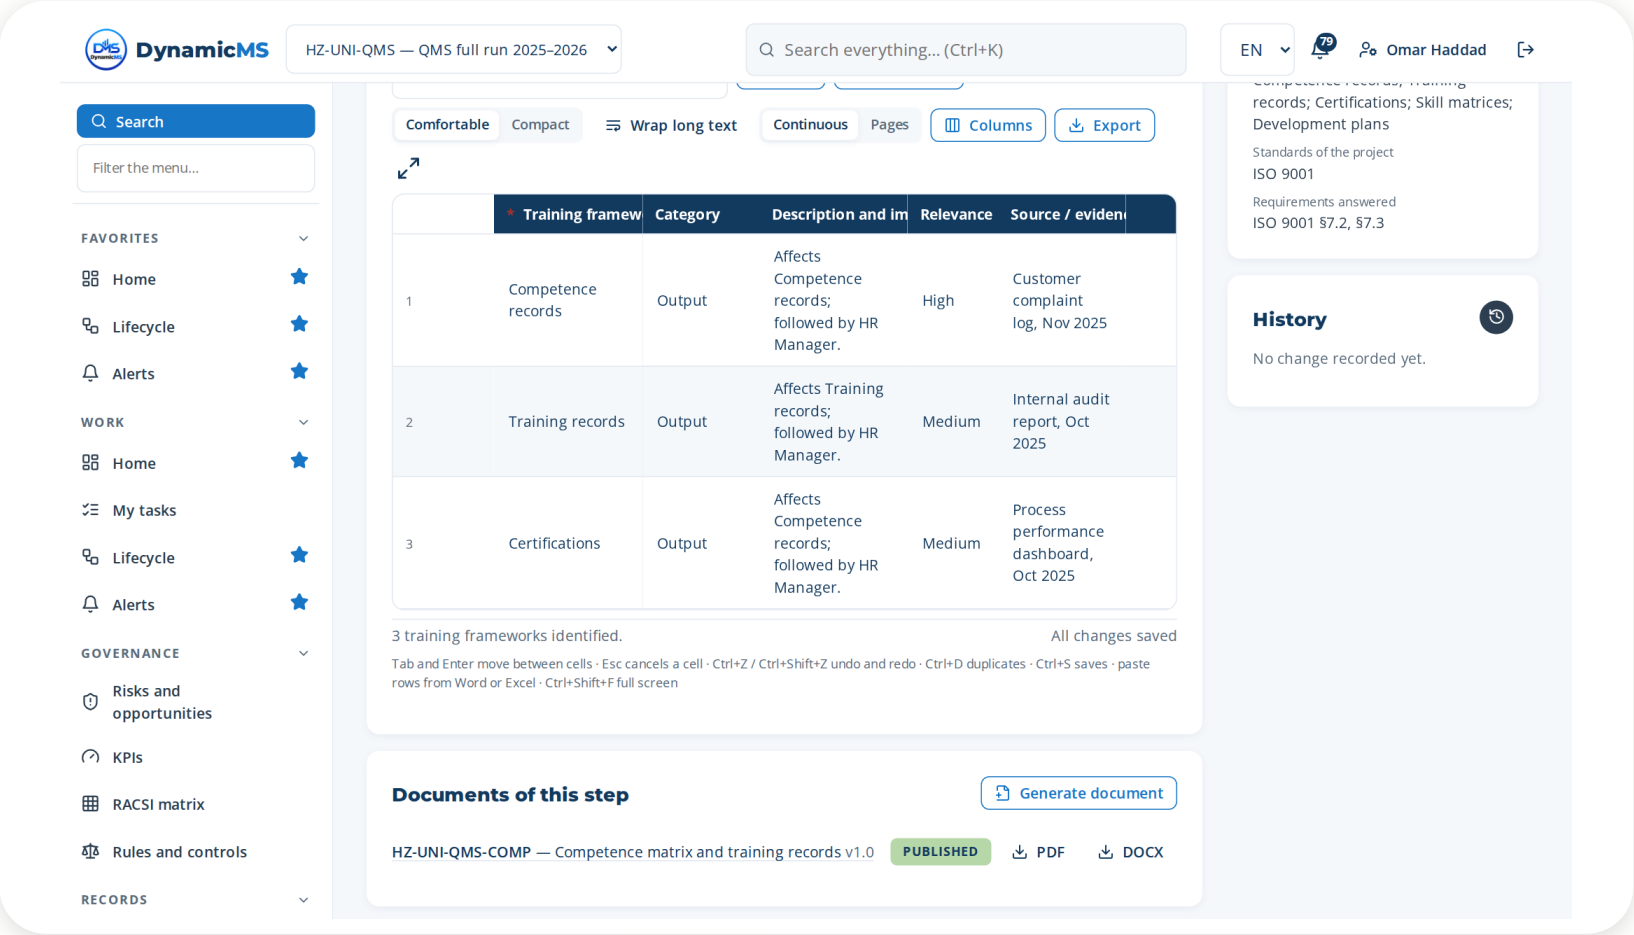

Step	Name	Role	What was recorded
MP-013.1	Define training frameworks	HR Manager	3 rows in “Training frameworks identified” — Competence records
MP-013.2	Assess training gaps	HR Manager	4 rows in “Decision matrix” — Competence records complete and up to…
MP-013.3	Design training curricula	HR Manager	3 rows in “Planned activities (become actions)” — Plan training
MP-013.4	Plan training	HR Manager	3 rows in “Planned activities (become actions)” — Deliver training
MP-013.5	Deliver training	HR Manager	Session / module: Deliver training — practice session
MP-013.6	Evaluate training	HR Manager	4 rows in “Decision matrix” — Competence records complete and up to…
MP-013.7	Track training certifications	HR Manager	1 rows in “Indicators measured” — KPI-04 — Competence gap closure rate
MP-013.8	Certify training	HR Manager	3 rows in “Decision criteria checked” — Competence records complete
MP-013.9	Update training	HR Manager	Change made: Competence records updated: Use of an obsolete document…

3 tasks · 9 steps
T1 Plan and prepare training
T2 Execute training activities
T3 Verify, record and close training

STEP · MP-013.1 · HR MANAGER

Define training frameworks

Step MP-013.1 (Register items): rows typed, pasted or imported, saved as they are entered.

WHAT WAS RECORDED

Training frameworks identified

- Competence records — Output
- Training records — Output
- Certifications — Output

PHASE 03 · PLAN

E2E-03 — Risk To Resilience

Manage controls, third-party risk, continuity, functional safety, process safety, crisis.

6	18	58
macro processes	tasks	steps

FROM TRIGGER TO RESULT

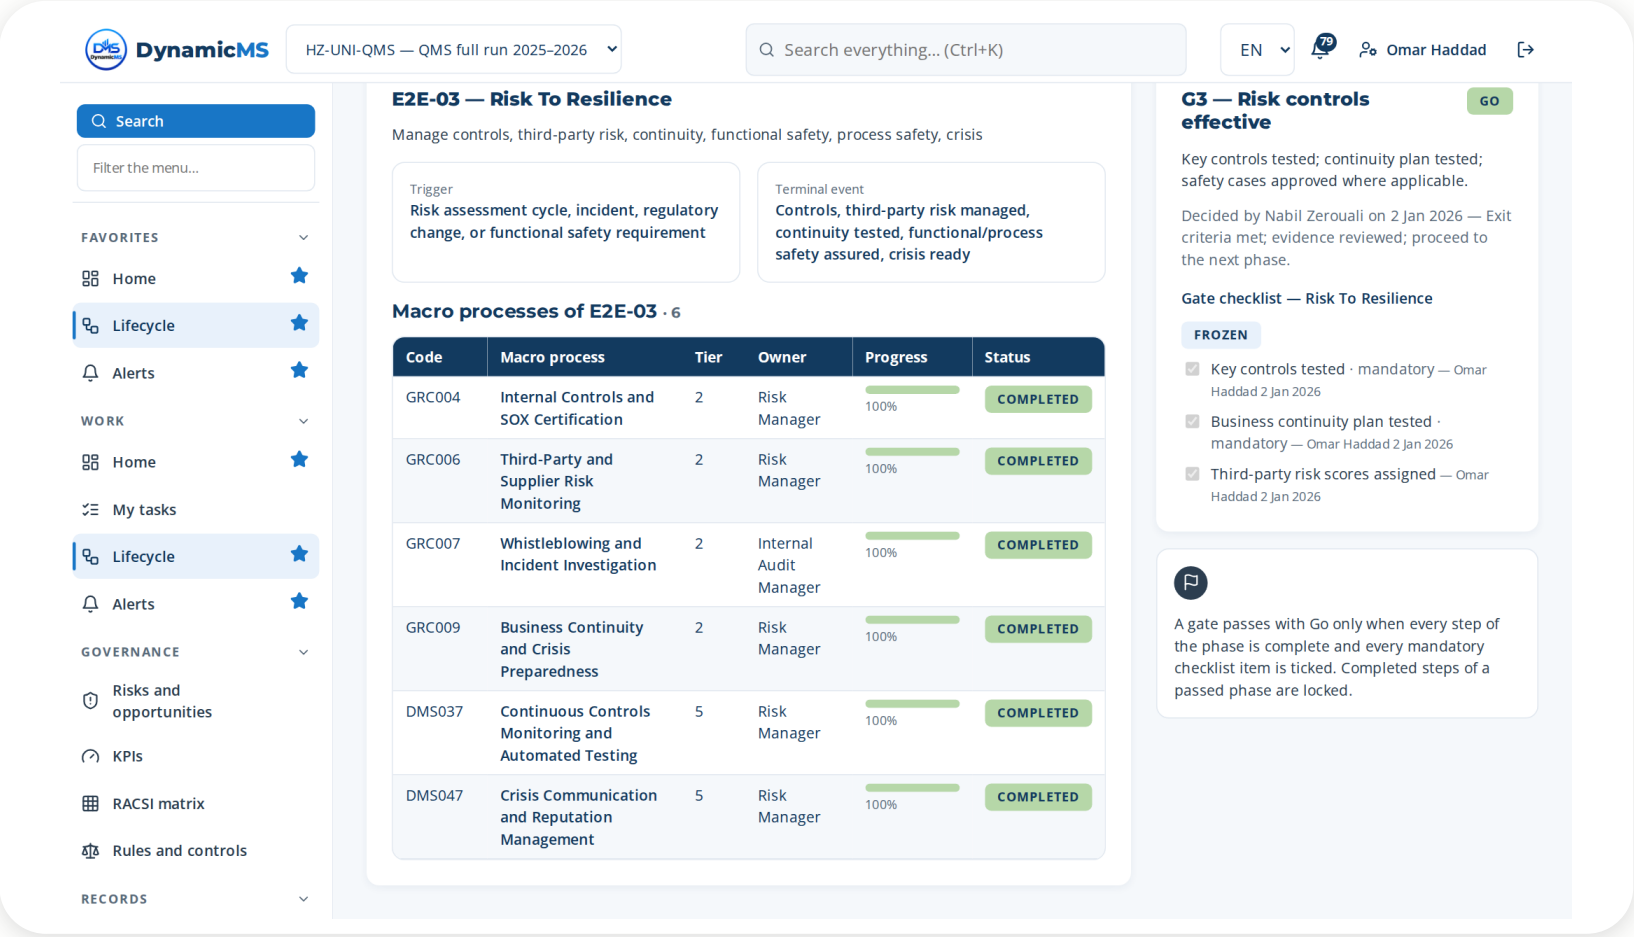

Trigger: Risk assessment cycle, incident, regulatory change, or functional safety requirement
Result: Controls, third-party risk managed, continuity tested, functional/process safety assured, crisis ready
Gate: G3 — Risk controls effective — Go

MACRO PROCESSES OF THIS PHASE

MP-049 Internal Controls and SOX Certification
MP-050 Third-Party and Supplier Risk Monitoring
MP-051 Whistleblowing and Incident Investigation
MP-052 Business Continuity and Crisis Preparedness
MP-098 Continuous Controls Monitoring and Automated Testing
MP-108 Crisis Communication and Reputation Management

E2E-03 · SCREEN

Risk To Resilience: the phase in the application

Lifecycle › E2E-03: macro processes of the phase with their progress and gate.

DELIVERS

Risk and opportunity register, treatments, business continuity.

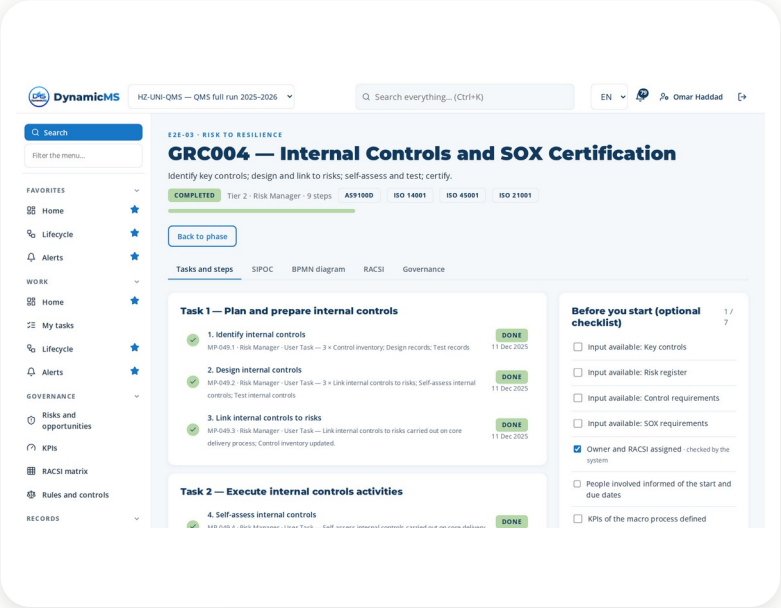

FEEDS

E2E-05 to E2E-08 (controls in operations); E2E-11 (audit universe).

Internal Controls and SOX Certification

Identify key controls; design and link to risks; self-assess and test; certify. · Owner: Risk Manager

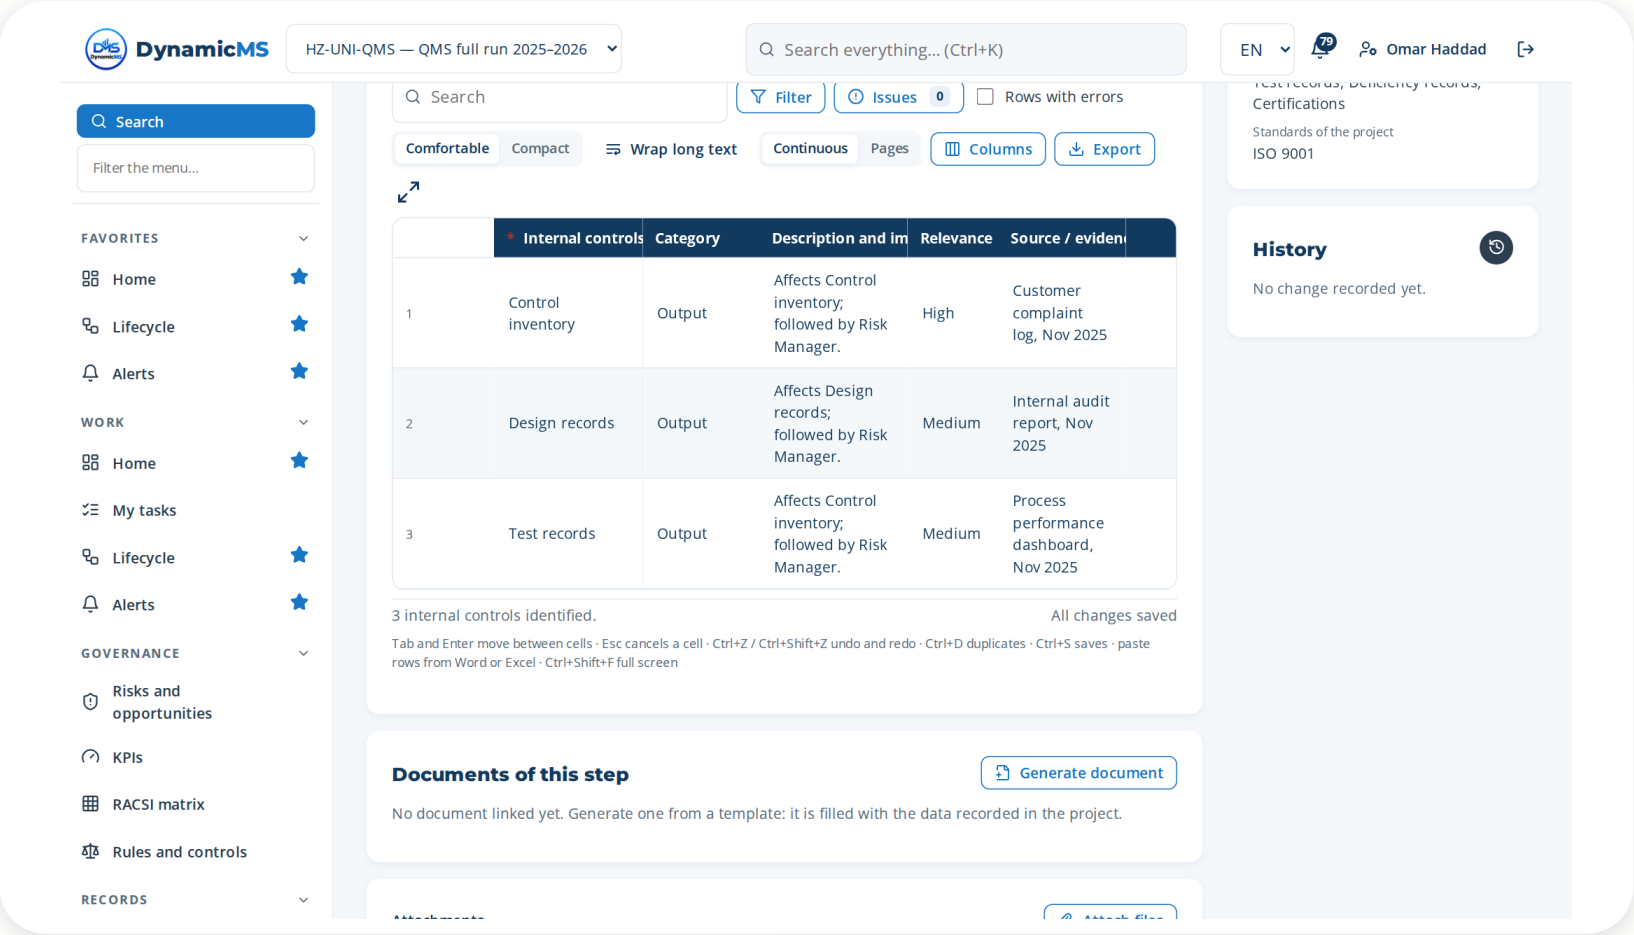

Step	Name	Role	What was recorded

MP-018.8	Identify quality problem standards	Quality Manager	1 rows in “Quality problem standards identified” — ISO 9001
MP-018.9	Classify quality problem polarity	Quality Manager	4 rows in “Decision matrix” — NC record complete and up to date
MP-018.10	Review quality problem	Quality Manager	3 rows in “Inputs reviewed” — Problem data
MP-018.11	Approve quality problem	Quality Manager	3 rows in “Decision criteria checked” — NC record complete
MP-018.12	Transmit quality problem	Quality Manager	2 rows in “Communication records” — Quality team

3 tasks · 12 steps
T1 Plan and prepare quality problem
T2 Execute quality problem activities
T3 Verify, record and close quality problem

Define quality problem criticality

Step MP-018.3 (Register items): rows typed, pasted or imported, saved as they are entered.

WHAT WAS RECORDED

Quality problem criticality identified

- NC record — Output
- Problem definition — Output
- Priority classification — Output

PHASE 10 · CHECK

E2E-10 — Monitoring To Evaluation

Monitor performance, evaluate results, steer the organization.

17	53	163
macro processes	tasks	steps

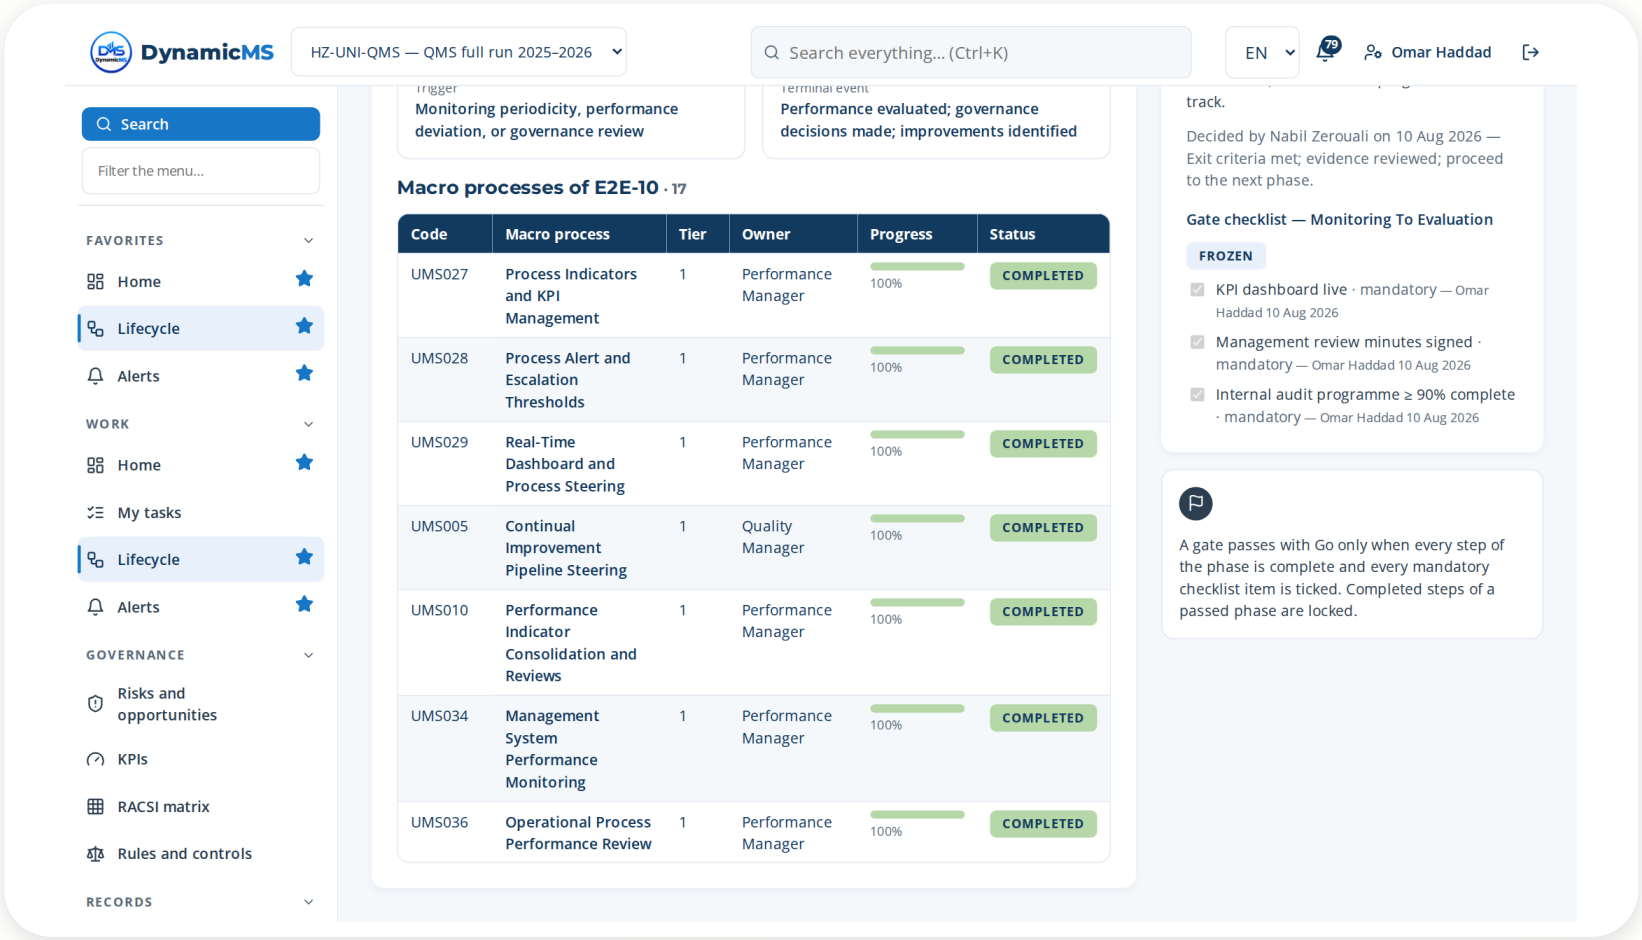

FROM TRIGGER TO RESULT

Trigger: Monitoring periodicity, performance deviation, or governance review
Result: Performance evaluated; governance decisions made; improvements identified
Gate: G10 — Performance reviewed — Go

Monitoring To Evaluation: the phase in the application

Lifecycle › E2E-10: macro processes of the phase with their progress and gate.

DELIVERS

KPI results, process reviews, management review decisions and actions.

FEEDS

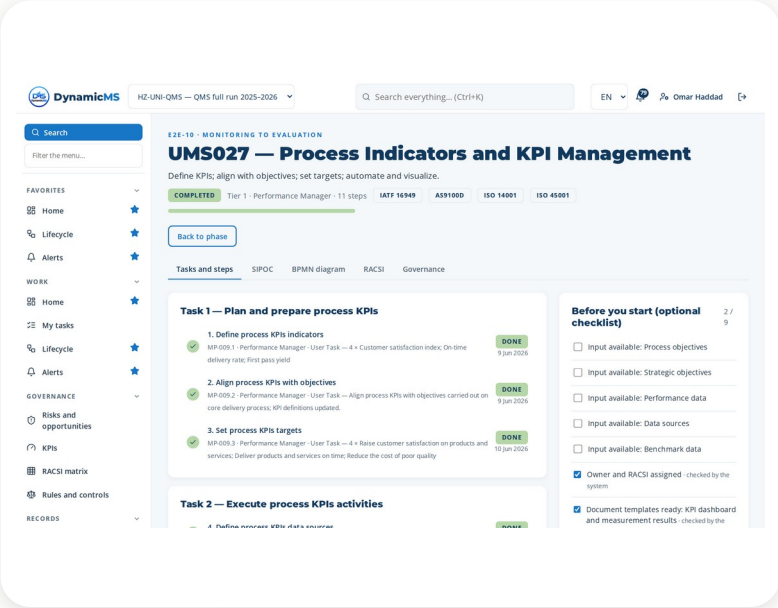

E2E-11 (audit focus); E2E-12 (improvement); E2E-01 (next cycle).

MACRO PROCESS · MP-009 (UMS027)

Process Indicators and KPI Management

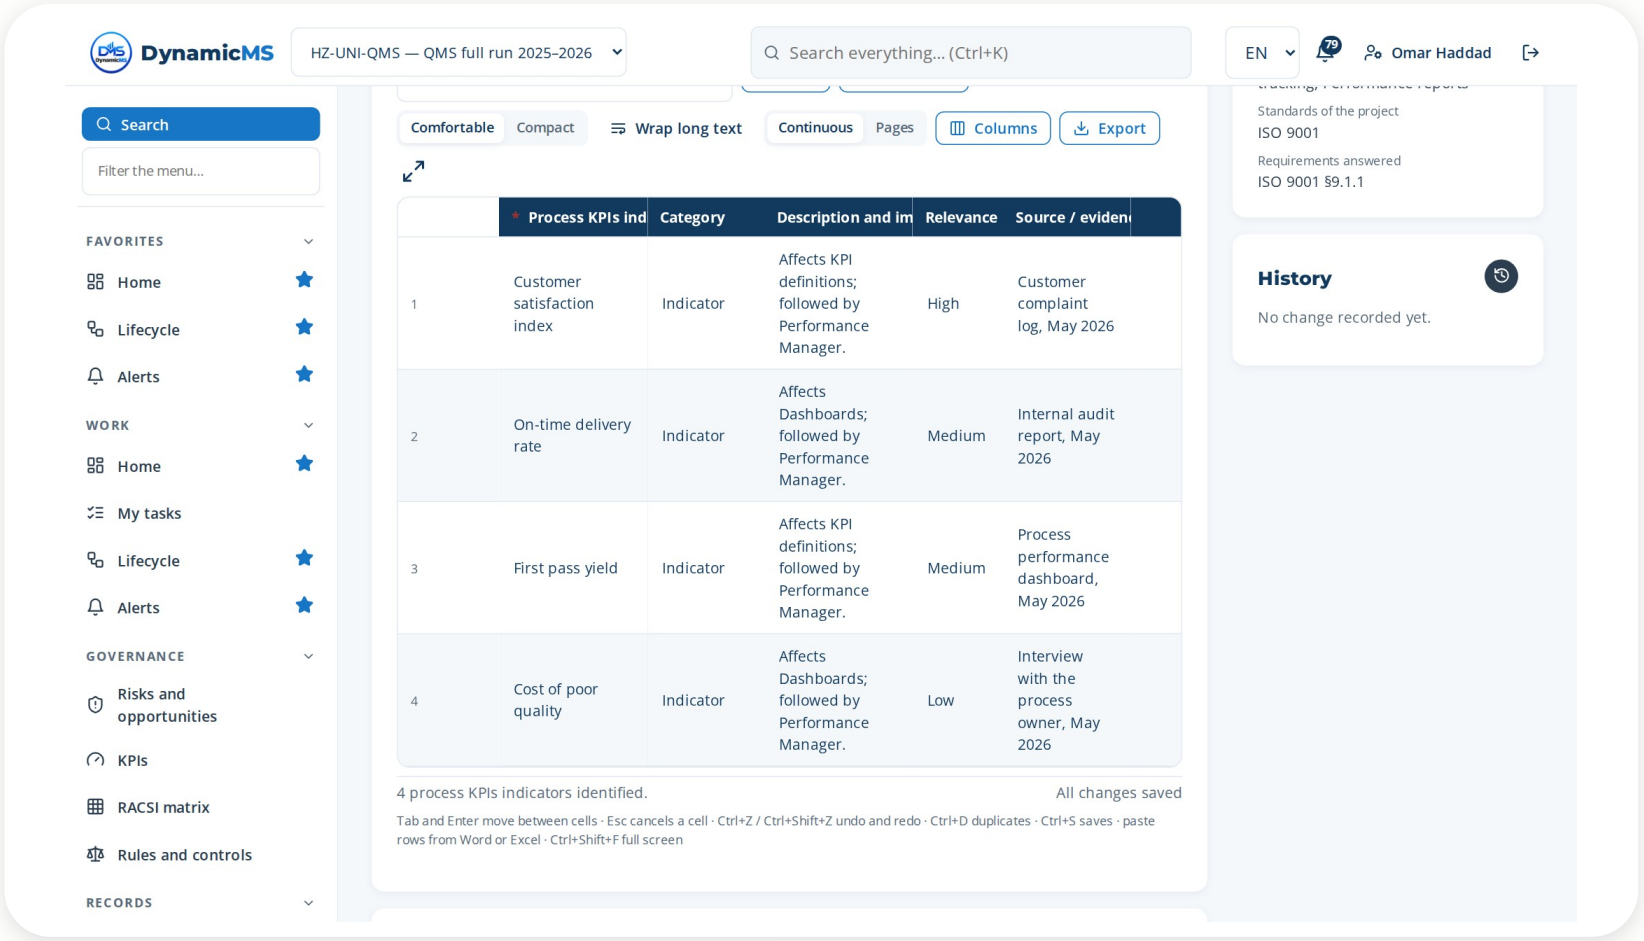

Define KPIs; align with objectives; set targets; automate and visualize. · *Owner: Performance Manager* · *ISO 9001 §9.1.1*

Step	Name	Role	What was recorded
MP-009.1	Define process KPIs indicators	Performance Manager	4 rows in “Process KPIs indicators identified” — Customer satisfactio…
MP-009.2	Align process KPIs with objectives	Performance Manager	What was done: Align process KPIs with objectives carried out on core…
MP-009.3	Set process KPIs targets	Performance Manager	4 rows in “Objectives (become entries of the objectives register)” —…
MP-009.4	Define process KPIs data sources	Performance Manager	3 rows in “Process KPIs data sources identified” — KPI definitions
MP-009.5	Establish process KPIs frequency	Performance Manager	Frequency: Monthly
MP-009.6	Designate owners of process KPIs	Performance Manager	3 rows in “Planned activities (become actions)” — Review process KPIs…
MP-009.7	Review process KPIs relevance	Performance Manager	3 rows in “Inputs reviewed” — Process objectives
MP-009.8	Automate process KPIs	DynamicMS Engine	System result confirmed: Automate process KPIs: done by the DynamicMS…
MP-009.9	Visualize process KPIs	Performance Manager	What was done: Visualize process KPIs carried out on core delivery pr…
MP-009.10	Set KPI measurement and analysis freque…	Performance Manager	What was done: Set KPI measurement and analysis frequencies carried o…
MP-009.11	Assign KPI RACSI	Performance Manager	1 rows in “RACSI of the macro process” — Performance Manager

4 tasks · 11 steps
T1 Plan and prepare process KPIs
T2 Execute process KPIs activities
T3 Verify, record and close process KPIs
T4 Govern KPI Frequencies & RACSI

Define process KPIs indicators

Step MP-009.1 (Register items): rows typed, pasted or imported, saved as they are entered.

WHAT WAS RECORDED

Process KPIs indicators identified

- Customer satisfaction index — Indicator
- On-time delivery rate — Indicator
- First pass yield — Indicator
- Cost of poor quality — Indicator

PHASE 11 · CHECK

E2E-11 — Intelligence To Assurance

Provide assurance through AI, foresight, IoT, ESG, analytics.

11	33	95
macro processes	tasks	steps

FROM TRIGGER TO RESULT

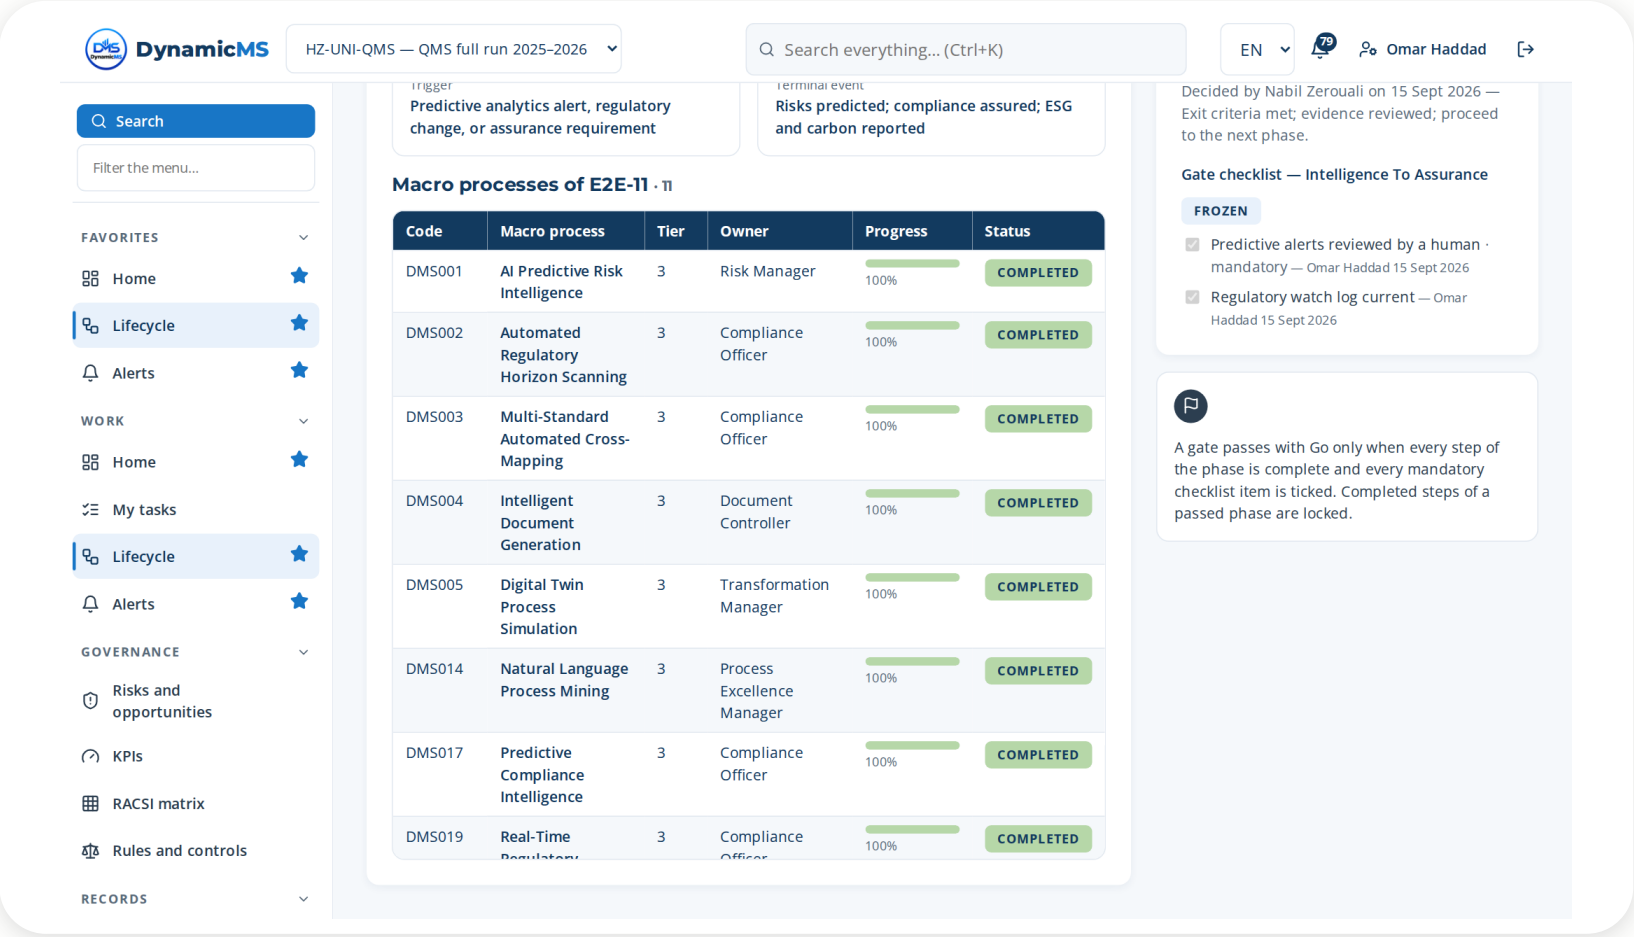

Trigger: Predictive analytics alert, regulatory change, or assurance requirement
Result: Risks predicted; compliance assured; ESG and carbon reported
Gate: G11 — Assurance in place — Go

MACRO PROCESSES OF THIS PHASE

MP-062 AI Predictive Risk Intelligence
MP-063 Automated Regulatory Horizon Scanning
MP-064 Multi-Standard Automated Cross-Mapping
MP-065 Intelligent Document Generation
MP-066 Digital Twin Process Simulation

MP-041.4	Assess AI management system impacts	Transformation Manager	4 rows in “Decision matrix” — AI policy complete and up to date
MP-041.5	Define AI management system roles	Transformation Manager	3 rows in “AI management system roles identified” — AI policy
MP-041.6	Apply AI management system controls	Transformation Manager	2 rows in “Settings” — Apply AI management system controls
MP-041.7	Monitor AI management system	Transformation Manager	2 rows in “Indicators measured” — Q-KPI-01 — Customer satisfaction in…
MP-041.8	Audit AI management system	Transformation Manager	2 rows in “Indicators measured” — Q-KPI-01 — Customer satisfaction in…
MP-041.9	Correct AI management system	Transformation Manager	Change made: AI policy updated: specification not met.
MP-041.10	Update AI management system	Transformation Manager	Change made: AI policy updated: Use of an obsolete document version.
MP-041.11	Activate AI use cases by scope	Transformation Manager	2 rows in “Settings” — Activate AI use cases by scope
MP-041.12	Approve custom AI use cases	Transformation Manager	3 rows in “Decision criteria checked” — AI policy complete

4 tasks · 12 steps
T1 Plan and prepare AI management system
T2 Execute AI management system activities
T3 Verify, record and close AI management sy…
T4 Administer AI Use Cases

Define AI management system scope

Step MP-041.2 (Register items): rows typed, pasted or imported, saved as they are entered.

WHAT WAS RECORDED

AI management system scope identified

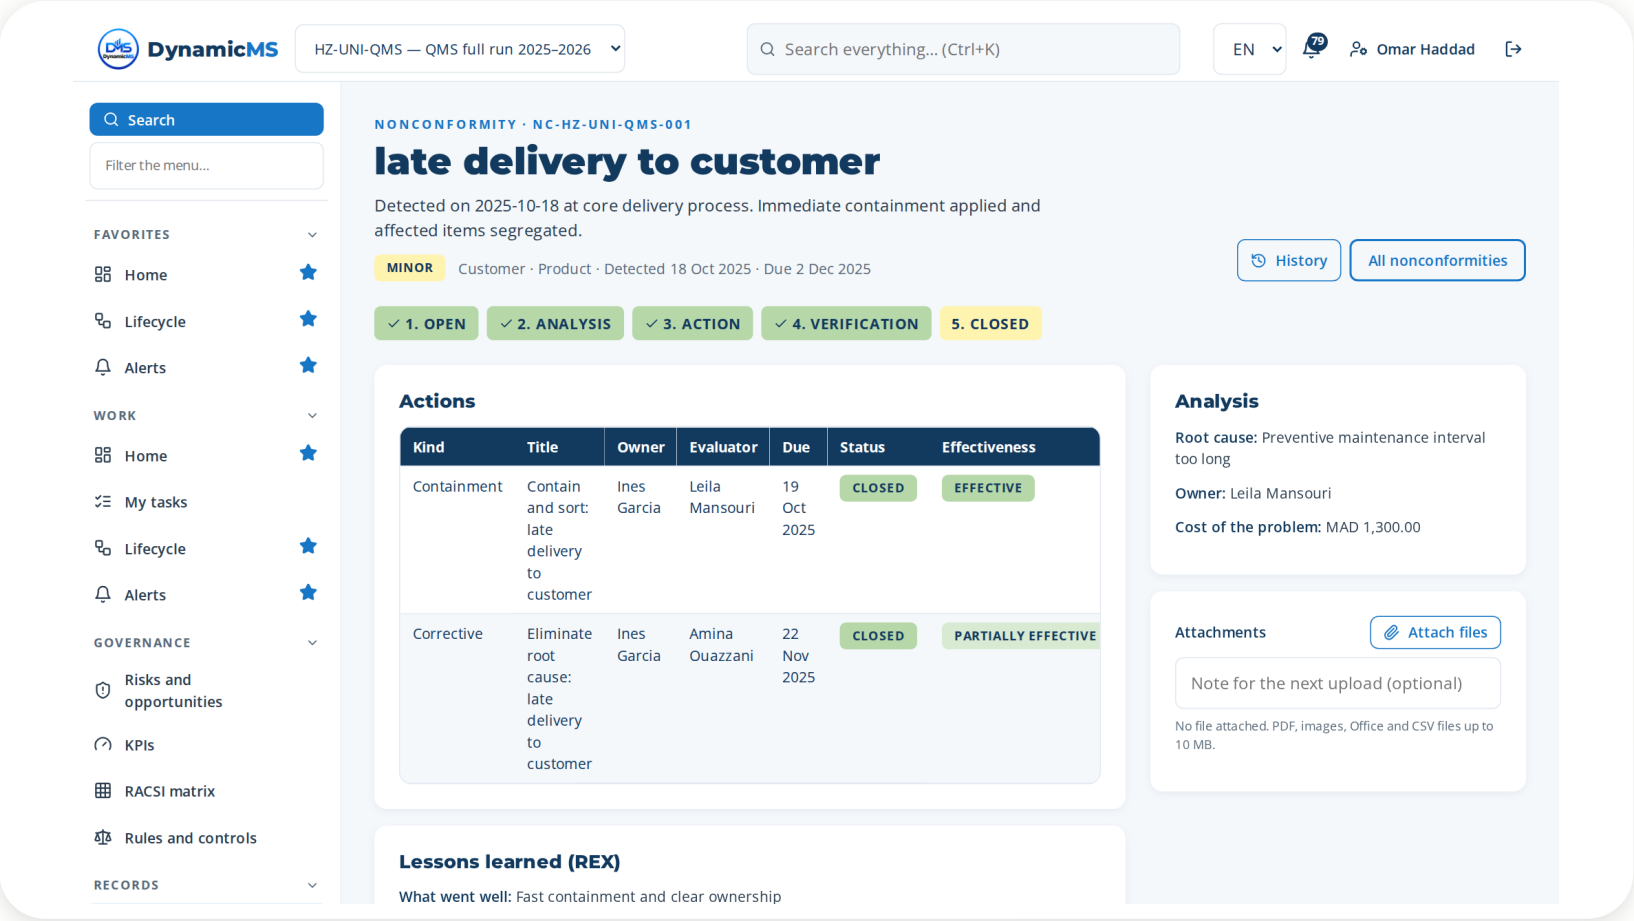

- AI policy — Output
- Risk register — Output
- Impact assessment — Output

Evidence, measurement and AI

What the run produces for audits, reviews and accreditation.

NONCONFORMITY

From detection to lessons learned

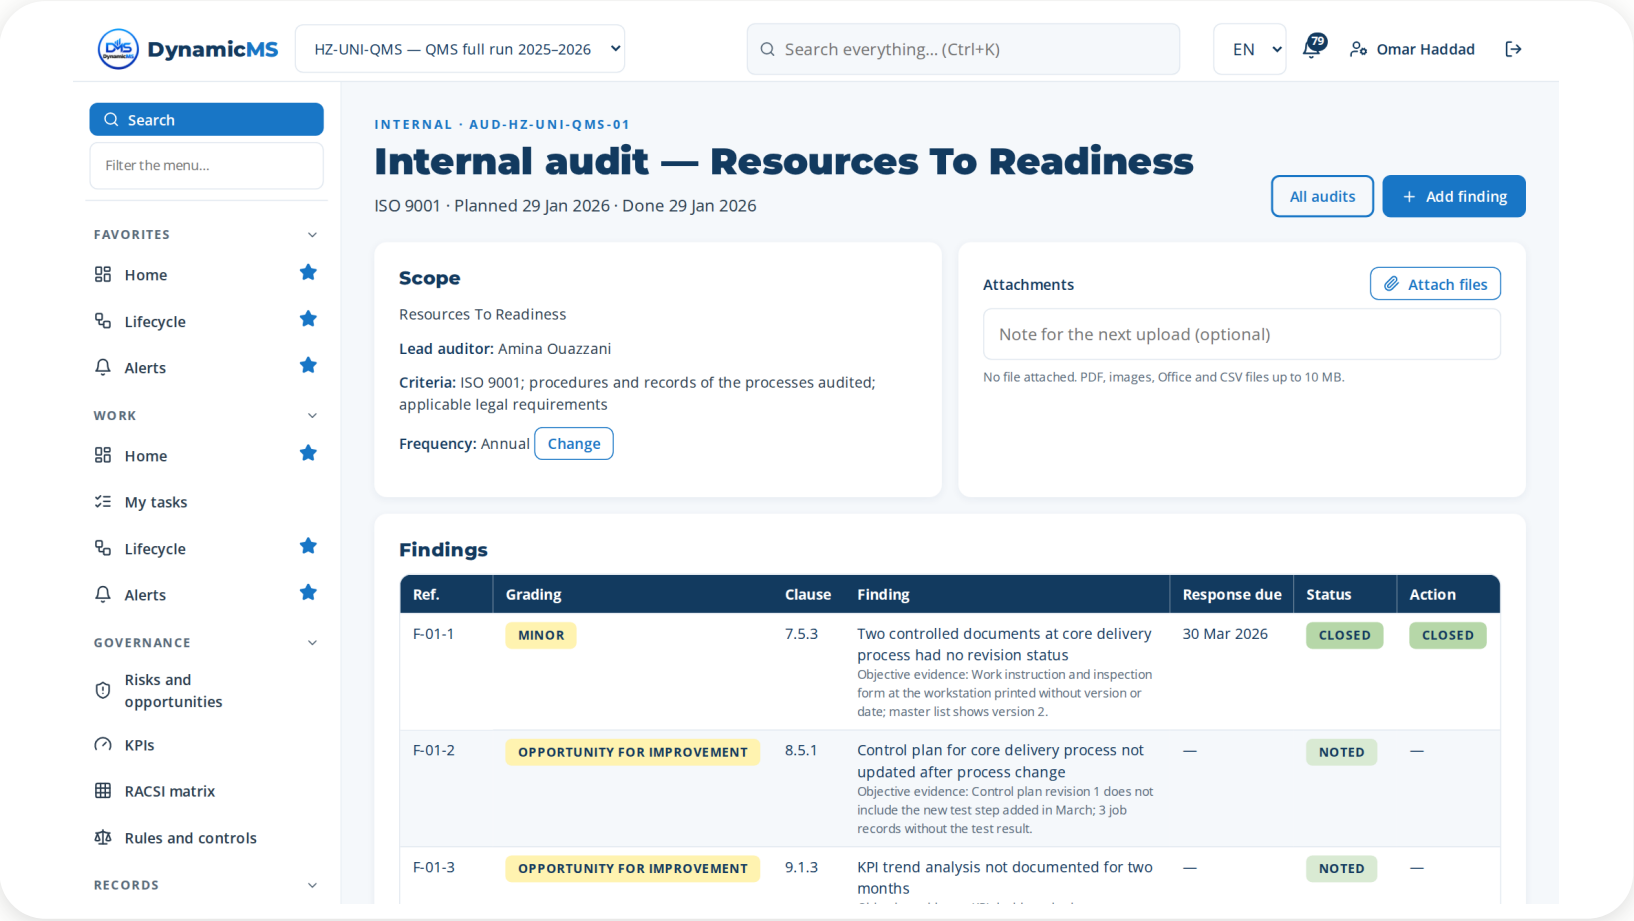

Containment, root cause, corrective actions

Effectiveness checked by another person

Cost recorded with its currency

AUDIT

Audits with findings and conclusions

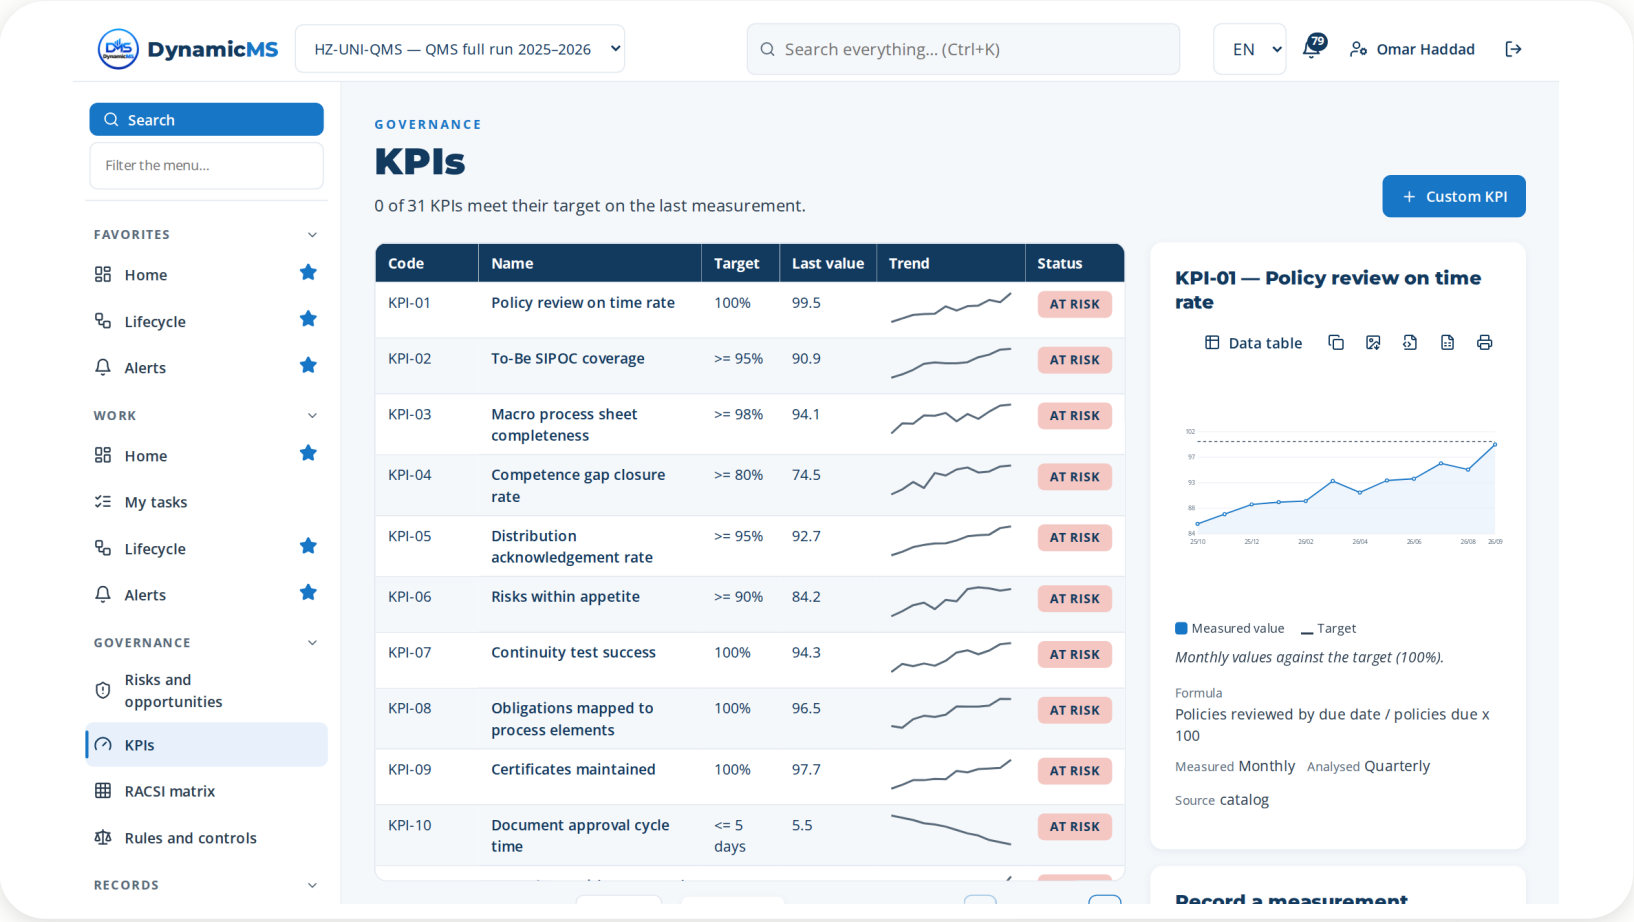

Programme, checklist, findings

Findings become nonconformities

Ready for JCI and ISO surveys

KPI

Indicators against their targets

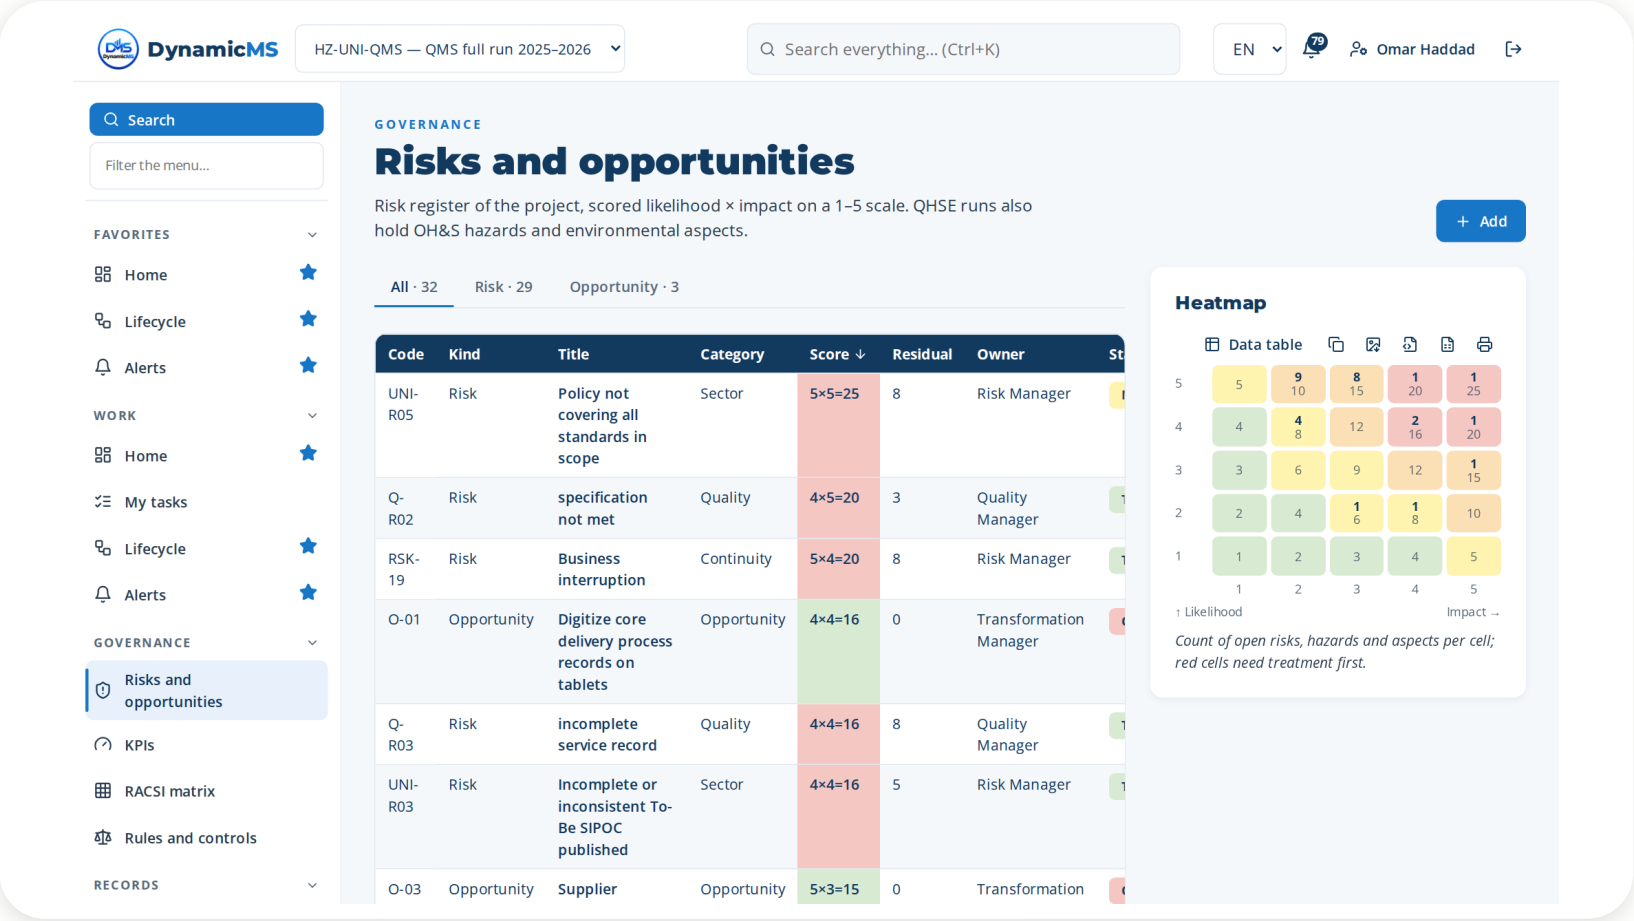

Monthly values and trend

Data table, CSV and image export

Feed the management review

RISKS

Risks and opportunities by score

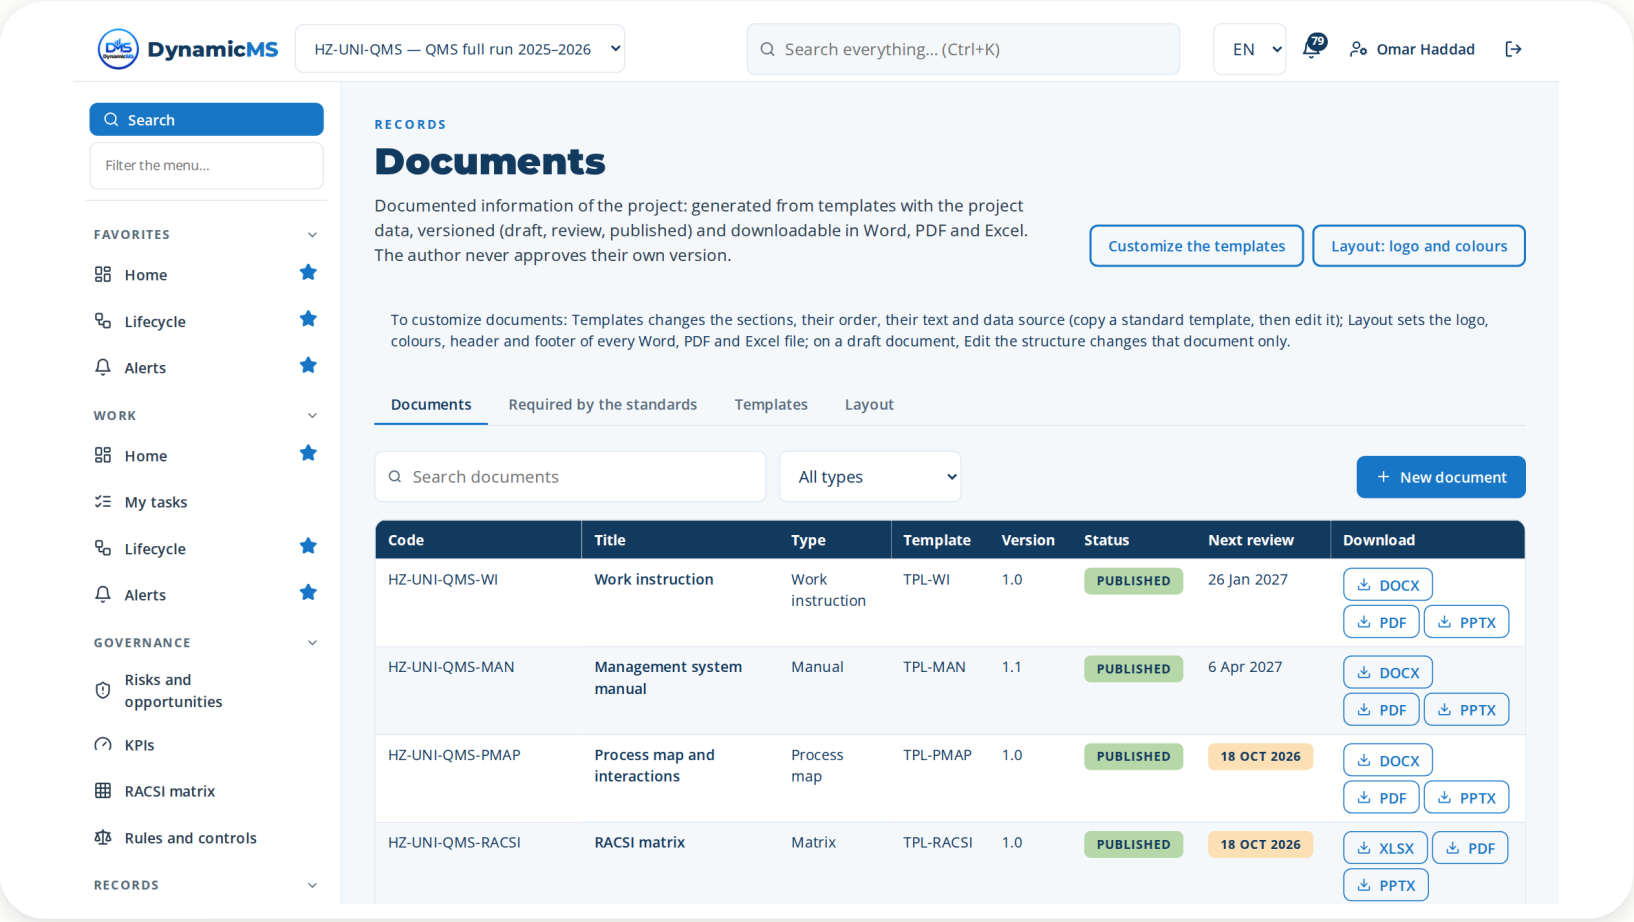

Likelihood × impact heatmap

Treatment and owner

Linked to the steps they govern

DOCUMENTS

Controlled documents generated from the data

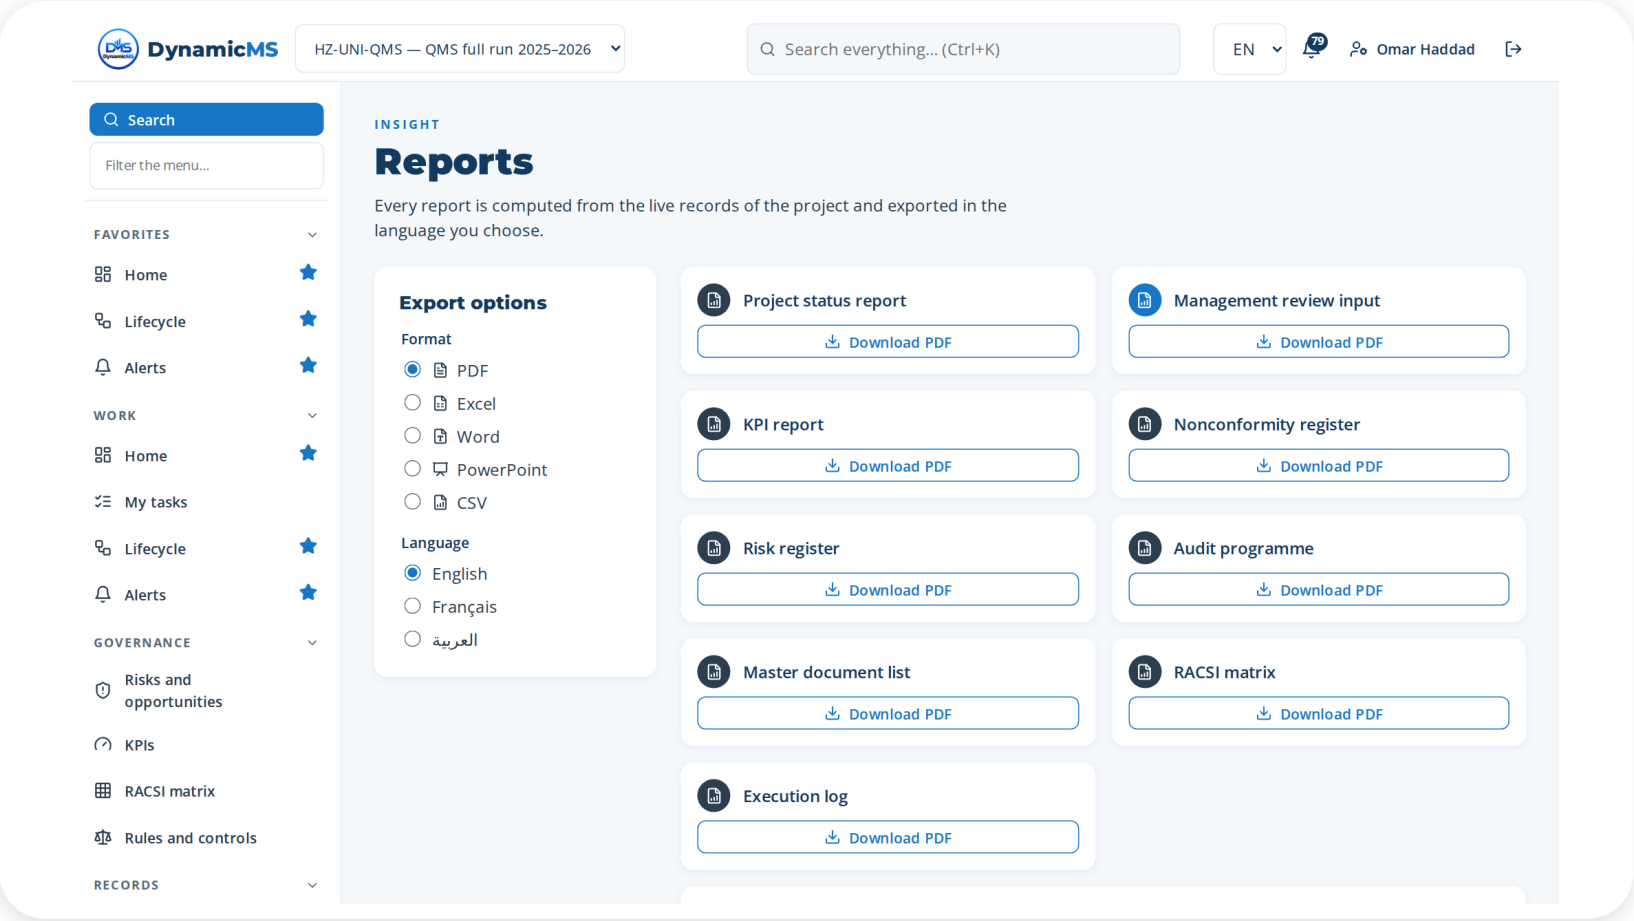

37 IMS templates

Versions, review and approval

PDF, Word, Excel, PowerPoint

REPORTS

Reports for every review

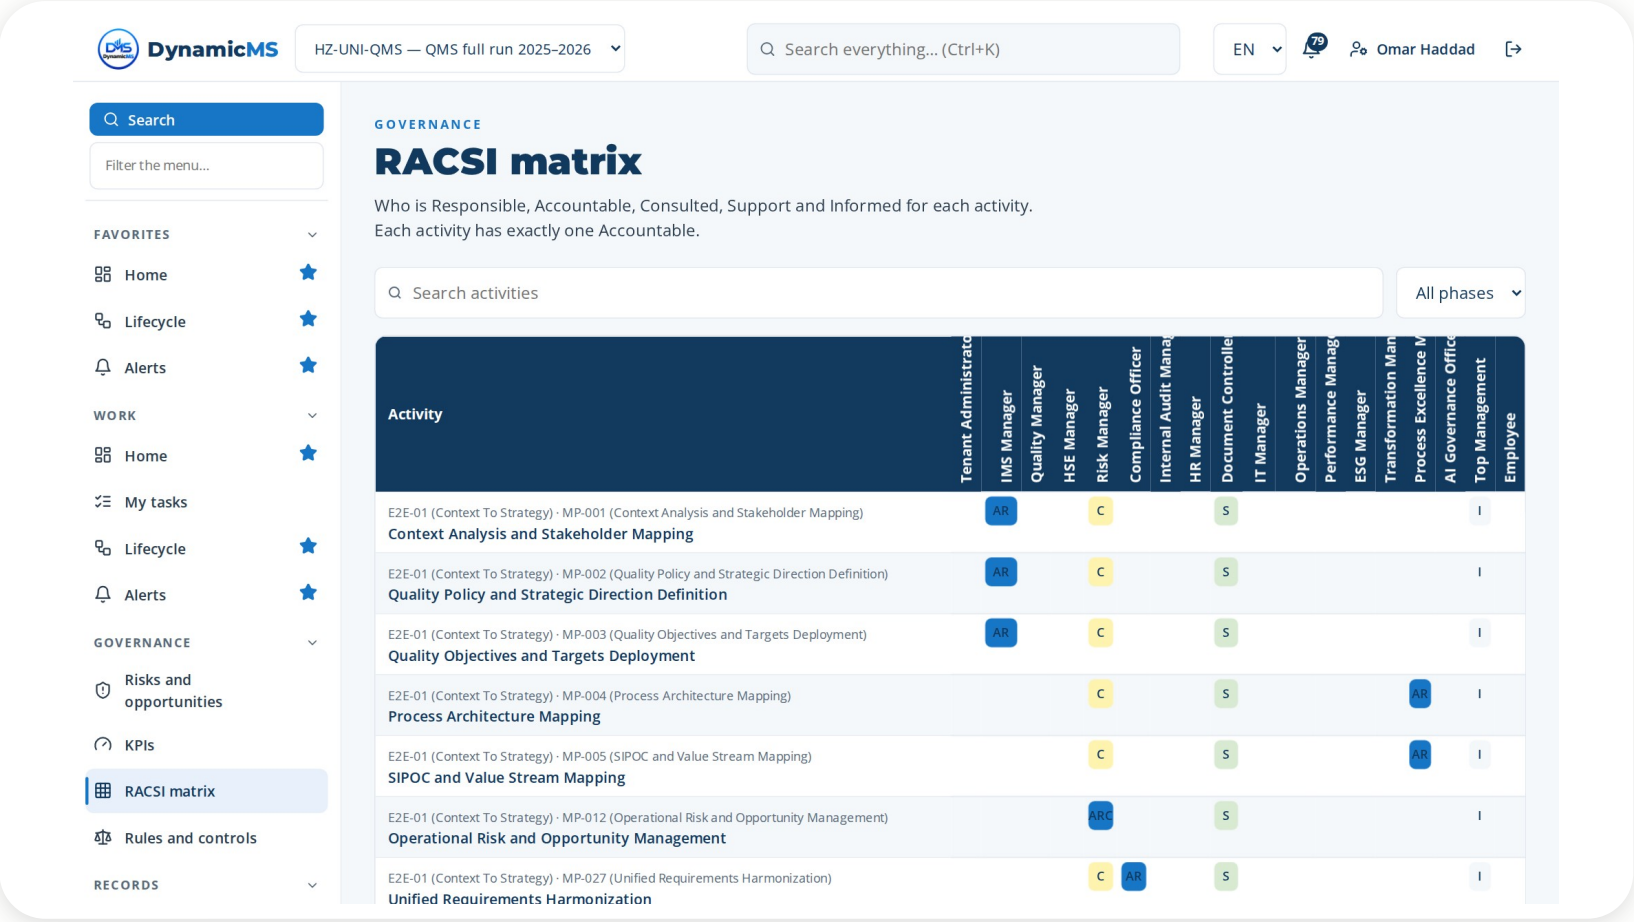

Management review inputs (ISO 9001 §9.3.2)

English, French, Arabic

PDF, Excel, Word, PowerPoint, CSV

Who is responsible for each step

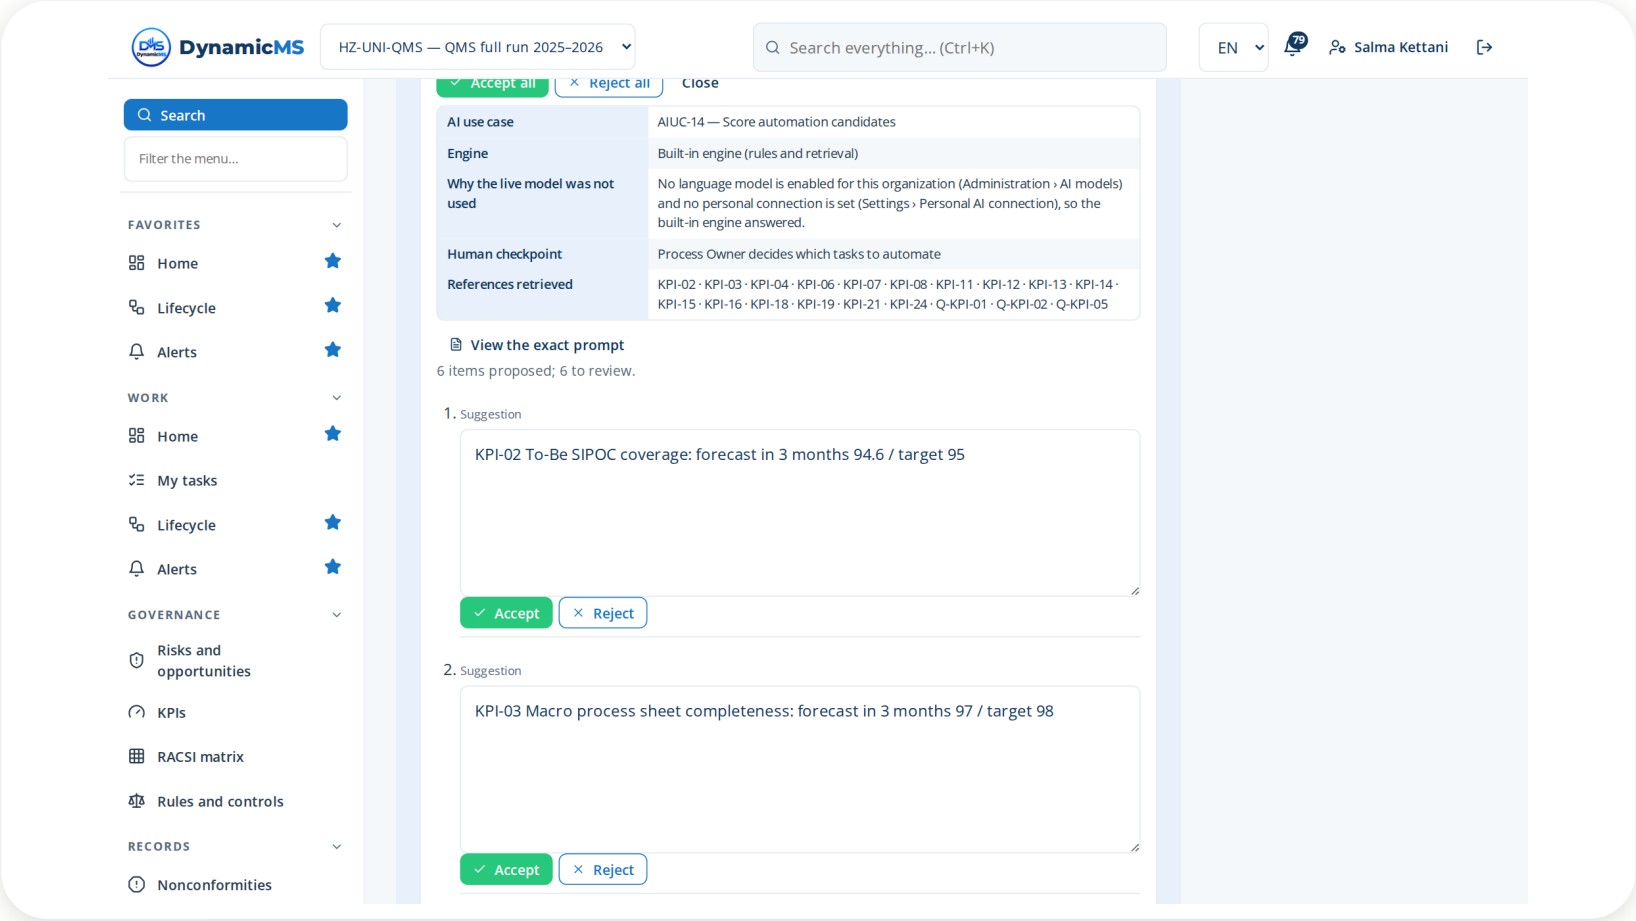

Responsible, Accountable, Support, Consulted, Informed

Linked to the organization chart

Exported for audits

GOVERNED AI

AI proposes, a person decides

Each suggestion comes from an approved AI use case

Each item accepted, edited or rejected

Every decision kept in an append-only log

NEXT STEPS

From this case to your organization

01 Scoping workshop: your sites, services, standards (JCI, ISO 9001, ISO 15189 for the laboratory) and priorities.

02 Configuration: healthcare segment V-29, licence, organization chart, roles and users.

03 Pilot: run E2E-01 to E2E-04 on one site with your data; first gate decision.

04 Deployment: the twelve phases across services, with reviews and reports in French and English.

The full step-by-step values of this run are in the DynamicMS user guide (full real run).
