EXECUTIVE SUMMARY

A complete AI skills cycle, documented end to end

Santéora Private Clinics Group · 2,600 employees · AI Skills Full Run 2026 — Santéora Private Clinics Group

100 %
of the run completed — 35 end-to-end processes

35 / 40
people answered the questionnaires (88 %)

6
trainings in 2 programs, prioritized by impact

1,260,000
training budget; 1,238,497 spent

What the case shows

- Diagnosis: “Information systems” is the weakest axis (2 / 5); the largest skill gap is “AI bed and staff capacity planning” (average gap 3.0).
- 10 training needs were validated and grouped into 6 themes, deployed in 4 roadmap initiatives over three waves.
- Kirkpatrick results 77 % · 74 % · 75 %; training ROI 108 % (target ≥ 100%).
- 37 documents published, 1,077 pages; the Training Engineering Report alone has 193 pages.

CONTEXT

Santéora Private Clinics Group

Santéora Private Clinics Group operates in the Healthcare Providers sector, in Casablanca, with 2600 employees.

Topic	Content
Vision	Become the reference of Healthcare Providers in the region, with teams trained to the best standards.
Mission	Deliver safe, compliant service through skilled people and controlled processes.
Values	Commitment · Excellence · Sharing
Context	Strong competition, stricter ISO 7101 audits and the arrival of AI triage and clinical decision support.
Products — existing	Core services of Clinical Care & Nursing
Products — new	Digital services supported by AI triage and clinical decision support
Market segments	Large accounts · Public sector · Individual customers

Organization and headcount

Function	People
Operations	3
Quality & HSE	3
Finance	2
Human Resources	2
Sales & Marketing	2
Information Systems	2
Clinical Care & Nursing	2

Key dates and SWOT of the clinic group

2008

Company founded

2014

Second site opened

2019

ISO 7101 certification

2025

Digital transformation program launched

Strengths

- Experienced, committed team
- Good knowledge of the market
- Stable processes

Areas for improvement

- Low use of AI triage and clinical decision support
- Reporting kept in spreadsheets
- Low use of AI medical imaging assistance
- Little versatility between roles
- Low use of AI bed and staff capacity planning

Opportunities

- Demand for digital services
- Training contracts refunded by OFPPT

Threats

- Stricter ISO 7101 audits
- Departure of key experts

AI Skills Full Run 2026 — Santéora Private Clinics Group

Training engineering cycle focused on AI skills for Healthcare Providers: scope, evidence, diagnosis, report, delivery, evaluation and continuous improvement.

72
complexity score (out of 100): full run with gates

40
stakeholders registered and consulted

17
scope criteria approved in the Scope of Work

MS · MO · OP
decision levels covered (strategic, middle, operational)

Strategic objectives

- SO-1 — Adopt AI triage and clinical decision support across Clinical Care & Nursing by end 2027 (horizon 2027-12-31)
- SO-2 — Zero major findings in ISO 7101 audits (horizon 2026-12-31)

Functions and decision levels in scope

Focus: AI · Decision levels: MS, MO, OP · Approval: Approved (2026-04-30, Mehdi Lahlou)

Function	MS — strategic	MO — middle	OP — operational
Operations	●	●	●
Quality & HSE	●	●	—
Finance	●	—	●

Sales & Marketing	●	●	●
Information Systems	●	●	—
Clinical Care & Nursing	●	—	●

How the scope is set

Each function × decision-level cell is a weighted criterion of the Scope of Work. 16 criteria were approved by the sponsor before any questionnaire was sent; every later table of the report is filtered by this scope.

Source: TER section 1.8.

METHOD

Six phases, each closed by a gate with its deliverables

The training engineering mission follows the phases below, each closed by a gate with its deliverables.

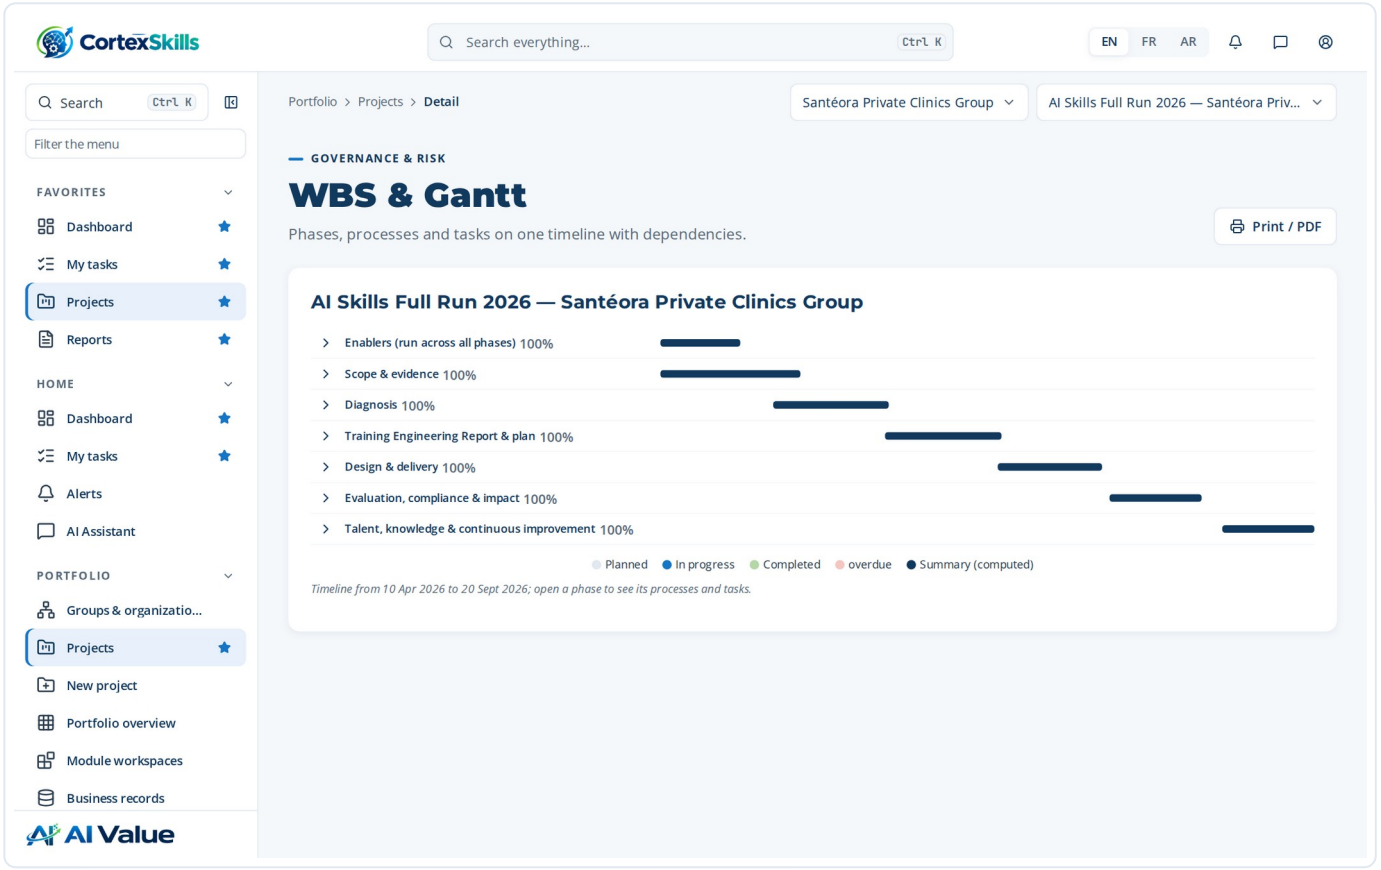

Phase	End-to-end processes	Progress
1. Scope & evidence	E2E-32 · E2E-33 · E2E-19 · E2E-24	100%
2. Diagnosis	E2E-20 · E2E-25 · E2E-26 · E2E-27 · E2E-28 · E2E-29 · E2E-02 · E2E-21	100%
3. Training Engineering Report & plan	E2E-01 · E2E-03 · E2E-30 · E2E-22 · E2E-23 · E2E-16 · HCPR-E2E-02	100%
4. Design & delivery	E2E-04 · E2E-05 · E2E-06 · E2E-13 · E2E-14	100%
5. Evaluation, compliance & impact	E2E-07 · E2E-08 · E2E-09 · HCPR-E2E-01	100%
6. Talent, knowledge & continuous improvement	E2E-10 · E2E-11 · E2E-12 · E2E-31	100%

What the teams said about the last training plan

What did you notice about the n-1 training plan?

• Good participation, but little follow-up after the sessions.
• Trainings were chosen late in the year and with little link to our objectives.

What were the strengths of the n-1 plan?

• Sessions held on site, close to the teams.
• Practical trainers who knew our sector.

What improvements did the n-1 plan bring?

• Supervisors use the new procedures.
• Fewer errors on ISO 7101 records.

What were the challenges of the n-1 plan?

• Measuring the effect of the trainings.
• Releasing people from the job during peaks.

What did you appreciate and like about the n-1 plan?

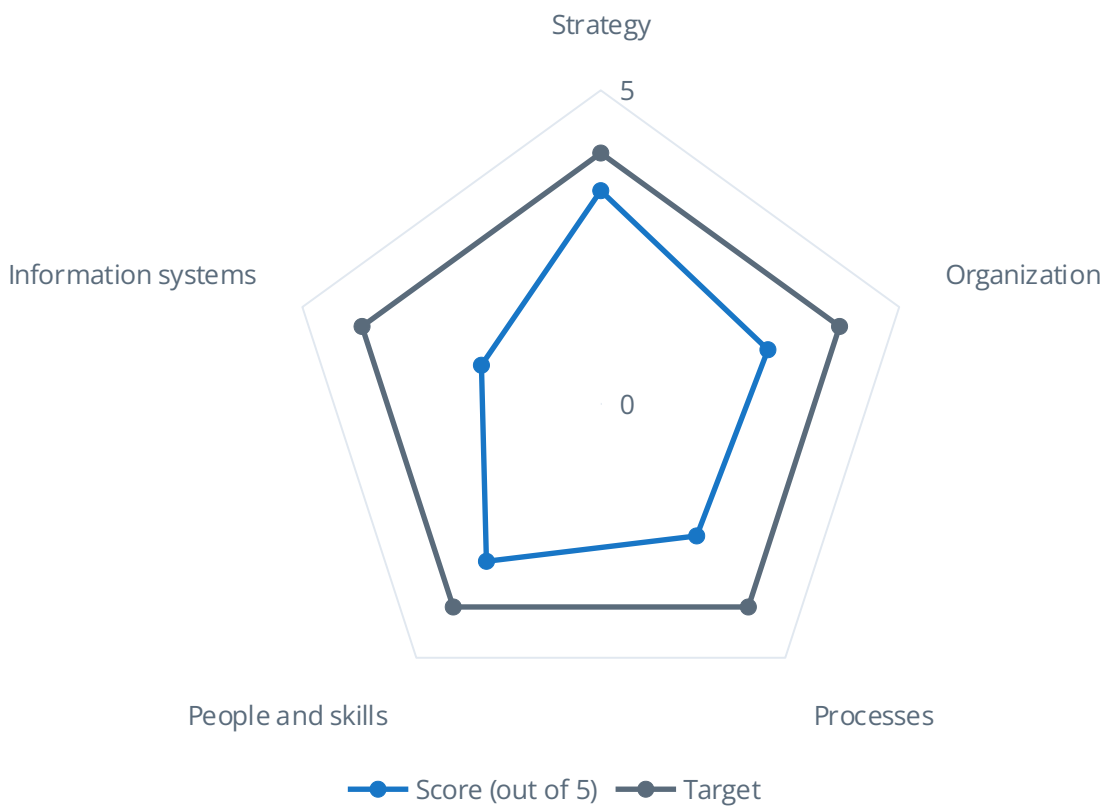

• The workshops on real cases.
• The exchange between sites.

For a new training plan, what would you like to see done differently?

• Shorter half-day formats with a workshop each time.
• A plan built from the needs of each function.

Source: TER chapter 2 — 62 trainings attended are listed in section 2.1.

Five axes scored, maturity one level below target

Diagnostic score by axis against target level 4 (TER 1.9).

Axis	Score	Reading
Strategy	3.4	Strength to build on
Organization	2.8	Partly in place
Processes	2.6	Partly in place
People and skills	3.1	Partly in place
Information systems	2	Priority for development

Model	Current	Target	Gap
CMM maturity (CMM)	3	4	1
Leadership maturity (Leadership)	3	4	1

Maturity models (TER 1.10).

Where each function stands at each decision level

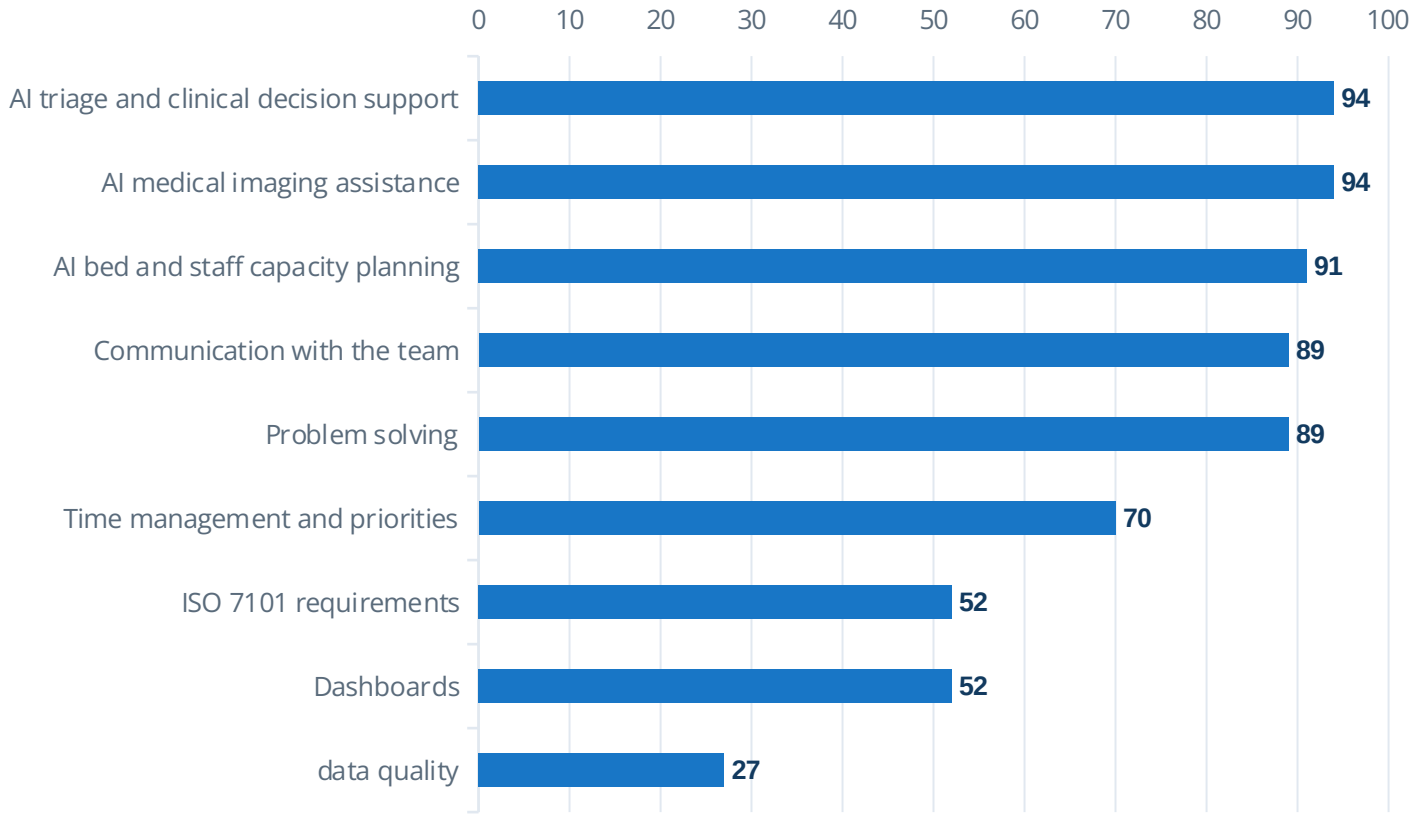

Performance by decision level: MS strategic management, MO operational management, OP operational.

Source: TER sections 3.36 to 3.39.

How the teams use AI and what holds them back

Current use

Daily, for triage and reports. (31)

Barriers

Lack of training and unclear rules. (31)

Risks to manage

Data protection and validation of results. (31)

Priorities

AI medical imaging assistance; data quality (11)

AI triage and clinical decision support; data quality (10)

Preferred format

Short workshops on the job, then coaching. (31)

Strategic planning practice	Yes	No
Is there a strategic plan with macro business plans at company level?	1	0
Are this strategic plan and the macro business plans implemented?	1	0
Are they monitored?	1	0
Are they subject to continuous improvement?	1	0

Most frequent answers of 35 respondents (TER 3.45, 3.46).

What the respondents want the training to change

Objective	SMART formulation	Mentions
Improve customer satisfaction	Satisfaction score ≥ 85% by end of year	28
Reduce non-quality costs	-20% rework in 12 months	28
Develop human capital	80% of critical roles certified	8

Expected results

- Fewer errors and faster service.
- Teams able to use AI medical imaging assistance safely.
- Better audit results and staff retention.
- Teams able to use AI bed and staff capacity planning safely.
- Teams able to use AI triage and clinical decision support safely.

Needs linked to the strategy and to the HR orientations

Priority axes named by the General Management: Leadership and performance · AI triage and clinical decision support · ISO 7101 compliance · Dashboards

ID	Objective	Horizon
SO-1	Adopt AI triage and clinical decision support across Clinical Care & Nursing by end 2027	2027-12-31
SO-2	Zero major findings in ISO 7101 audits	2026-12-31

HR orientations

• Update job descriptions, individual objectives and the yearly assessment; build career paths.

Change management

1) Focus and prioritization · 2) Stay positive · 3) Persevere and follow up with short daily repetitions · Patience · Lead by example · Progressiveness.

Source: TER sections 3.1, 3.5 and 3.6.

Four initiatives deployed in three waves

The perspectives take into account the strategic orientations, the SWOT and improvement axes, the HR orientations and the recommendations made in the face-to-face meetin...

Wave 1

- AI triage and clinical decision support — impact 5
- AI literacy for all staff — impact 5

Wave 2

- AI medical imaging assistance — impact 4

Wave 3

- AI bed and staff capacity planning — impact 3

#	Improvement axis	Implemented	Wave
1	AI triage and clinical decision support	60%	1
2	AI medical imaging assistance	65%	2
3	AI bed and staff capacity planning	70%	3
4	AI literacy for all staff	75%	1

KPI-013	Skill progression rate	≥ 70%	2026-10: 75.6	Green
KPI-015	Training record correction rate	≤ 1%	2026-10: 0.82	Green

10 of the 61 indicators of TER section 6.1.

04

Training Plan

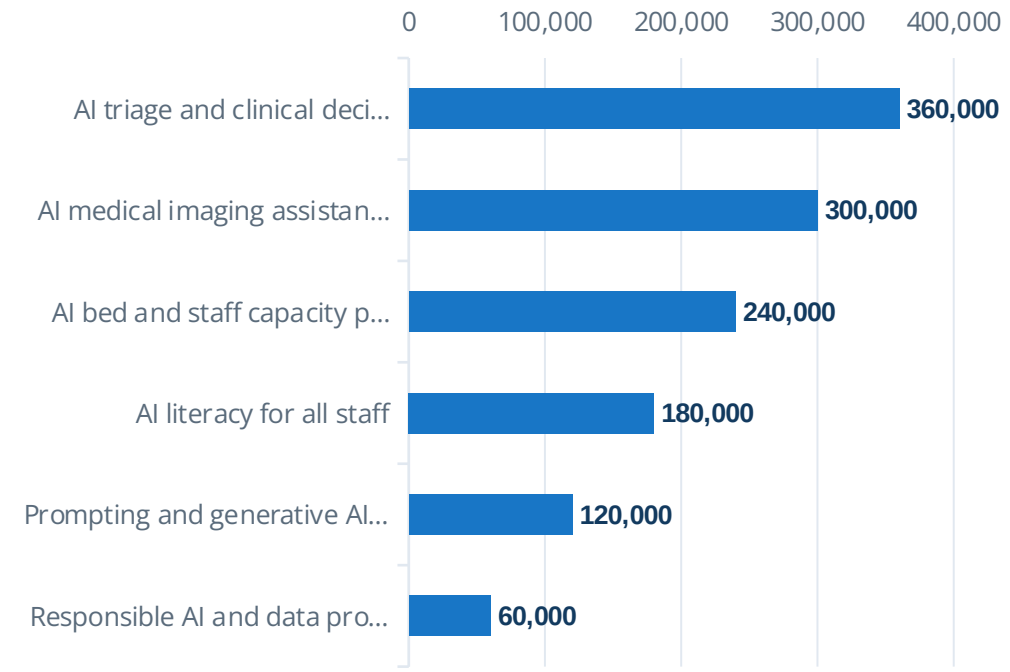

The plan 2026 holds 2 programs and 6 trainings, 12 days per group in total and 44 group-days to deliver, for a budget of 1,260,000.

AI Value
Digital & AI Transformation

Six themes ranked by impact and urgency

Plan 2026 — status Locked — budget 1,260,000.

#	Theme	Days	Groups	Budget
1	AI triage and clinical decision support	3	6	360,000
2	AI medical imaging assistance	2	4	300,000
3	AI bed and staff capacity planning	2.5	3	240,000
4	AI literacy for all staff	1.5	3	180,000
5	Prompting and generative AI at work	1	2	120,000
6	Responsible AI and data protection	2	2	60,000

Budget by theme.

Two programs, six trainings, clear prerequisites

Code	Program	Strategic axis	Trainings
PRG-1	AI skills for Clinical Care & Nursing	Execution of the core function	TR-AI-01, TR-AI-02, TR-AI-03
PRG-2	AI foundations for all staff	Leadership, performance and responsible use	TR-AI-04, TR-AI-05, TR-AI-06

ID	Training	Level	Duration	Prerequisites
TR-AI-01	AI triage and clinical decision support	Intermediate	3 day(s)	Basic digital literacy; the Foundation training is recommended
TR-AI-02	AI medical imaging assistance	Intermediate	2 day(s)	Basic digital literacy; the Foundation training is recommended
TR-AI-03	AI bed and staff capacity planning	Advanced	2.5 day(s)	TR-AI-01 or equivalent experience
TR-AI-04	AI literacy for all staff	Foundation	1.5 day(s)	None — open to all staff
TR-AI-05	Prompting and generative AI at work	Foundation	1 day(s)	None — open to all staff
TR-AI-06	Responsible AI and data protection	Intermediate	2 day(s)	Basic digital literacy; the Foundation training is recommended

Source: Training Plan "Programs" and TER section 5.1.

TRAINING SHEET

TR-AI-01 — AI triage and clinical decision support

Level Intermediate · 3 day(s) · program PRG-1

Learning objectives

• Explain the key concepts of AI triage and clinical decision support and how they apply to Clinical Care & Nursing
• Apply the methods and tools of AI triage and clinical decision support to a real case from Santéora Private Clinics Group
• Plan the deployment of AI triage and clinical decision support with its indicators and controls (ISO 7101)

Prerequisites

Basic digital literacy; the Foundation training is recommended

Delivery

M1 AI triage and clinical decision support · E-learning · 2 h
M3 AI triage and clinical decision support · Virtual classroom · 3.5 h

DETAILED AGENDA

AI triage and clinical decision support — half-day by half-day

22 activities over 3 day(s): lectures, quizzes and workshops on the clinics' own cases.

Day 1 — morning

Lecture · Foundations of AI triage and clinical decision support: key c... (75 min)
Lecture · Why AI triage and clinical decision support matters for Clini... (45 min)
Quiz — key concepts of AI triage and clinical decision support (20 min)
Workshop — map today's practices in Clinical Care & Nursing a... (75 min)

Day 1 — afternoon

Lecture · Methods and tools of AI triage and clinical decision support (75 min)
Lecture · Worked example from the Healthcare Providers sector (40 min)
Quiz — choosing the right method (20 min)
Workshop — apply the method to a real case from Santéora Priv... (80 min)

Day 2 — morning

Lecture · Governance, risks and ISO 7101 requirements (60 min)
Lecture · Data, quality and evidence to keep (45 min)
Quiz — compliance and risk scenarios (20 min)
Workshop — build the control checklist of your process (80 min)

Day 2 — afternoon

Lecture · Deploying AI triage and clinical decision support: roles, cha... (60 min)
Lecture · Indicators that measure the results (45 min)
Quiz — adoption and indicator cases (20 min)
Workshop — design the indicator dashboard of your team (80 min)

Day 3 — morning

Lecture · Advanced practices and lessons learned in Clinical Care & Nur... (75 min)
Quiz — advanced cases (25 min)
Workshop — solve a critical incident scenario (100 min)

Day 3 — afternoon

Lecture · Transfer to the workplace: the 30-60-90-day plan (60 min)
Quiz · Final assessment (Kirkpatrick level 2) (30 min)
Workshop — individual action plan and peer review (90 min)

Why each audience should take the training

Training TR-AI-01 — behaviour, pain points and hopes of each persona

Executive sponsor — General Manager

Decides on facts presented in short steering meetings; delegates execution to the management team; follows a few indicators.

Training spend with no visible link to the strategic objectives; results of the previous plan hard to prove; ISO 7101 audits that expose competence gaps.

A prioritized plan that serves the strategy, a measurable return, and a management team able to lead the change.

Manager — director, head of department, process owner

Balances daily operations and improvement projects; prefers practical, short formats; relies on key people in the team.

Team absent from the job during long trainings; skills gaps on critical activities of Clinical Care & Nursing; processes not documented or without an owner.

Trainings that solve the function's real problems, applied on the job the following week, with indicators the manager can follow.

Team member — Clinical Care & Nursing

Learns by doing and from peers; uses a phone more than a computer; wants to know what changes in daily work.

New tools introduced without explanation; theoretical trainings far from the tasks; fear of making mistakes with AI triage and clinical decision support.

Practical skills recognized by a certificate, less rework, and a clear path to the next position.

Paths, modules and content assets

Audit report — Santéora Private Clinics Group

Conforming with one minor nonconformity to correct within 60 days.

Findings by grade.

ID	Grade	Requirement	Statement
F-1	Minor nonconformity	ISO 7101 7.2	Two trainers have no evidence of competence on file.
F-2	Observation	ISO 7101 9.1	Level 3 evaluations are planned but not yet scheduled.
F-3	Opportunity for improvement	ISO 7101 7.1.6	Capture lessons learned at the end of each session.
F-4	Strength	ISO 7101 7.2	Needs analysis fully traced from strategic objectives.

Strengths: Clear needs analysis; strong management involvement; complete attendance records.
Follow-up: Verification of the corrective action at the next steering committee.

REX — AI triage and clinical decision support

What went well

The stakeholder register and multi-channel distribution lifted the response rate.

What did not

SWOT inputs arrived late from one function.

Root cause

No backup nominated for the function head.

What we will do next time

Name a backup for every function head at kickoff.

Governance of the documents

Author Hicham Naciri, approver Mehdi Lahlou: two different people.

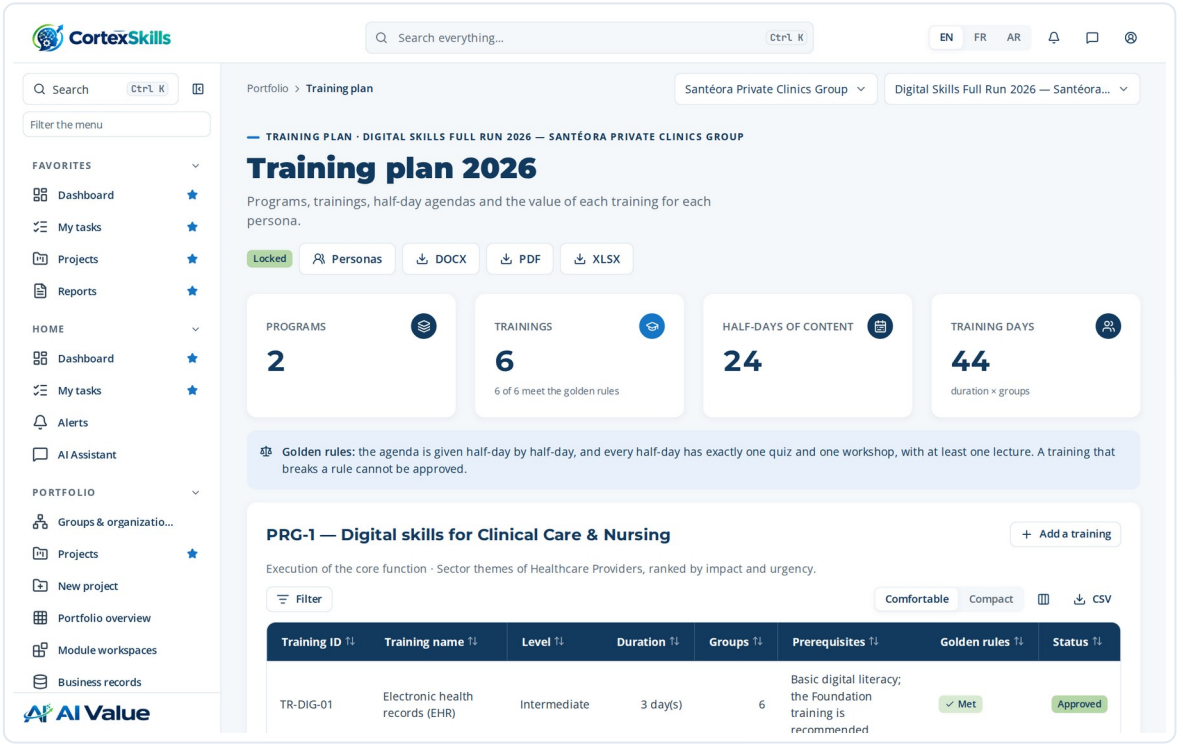

Each version is kept; a change of the data marks the document as stale.

20 data sources listed with their record counts and process.

The Training Plan as the users see it

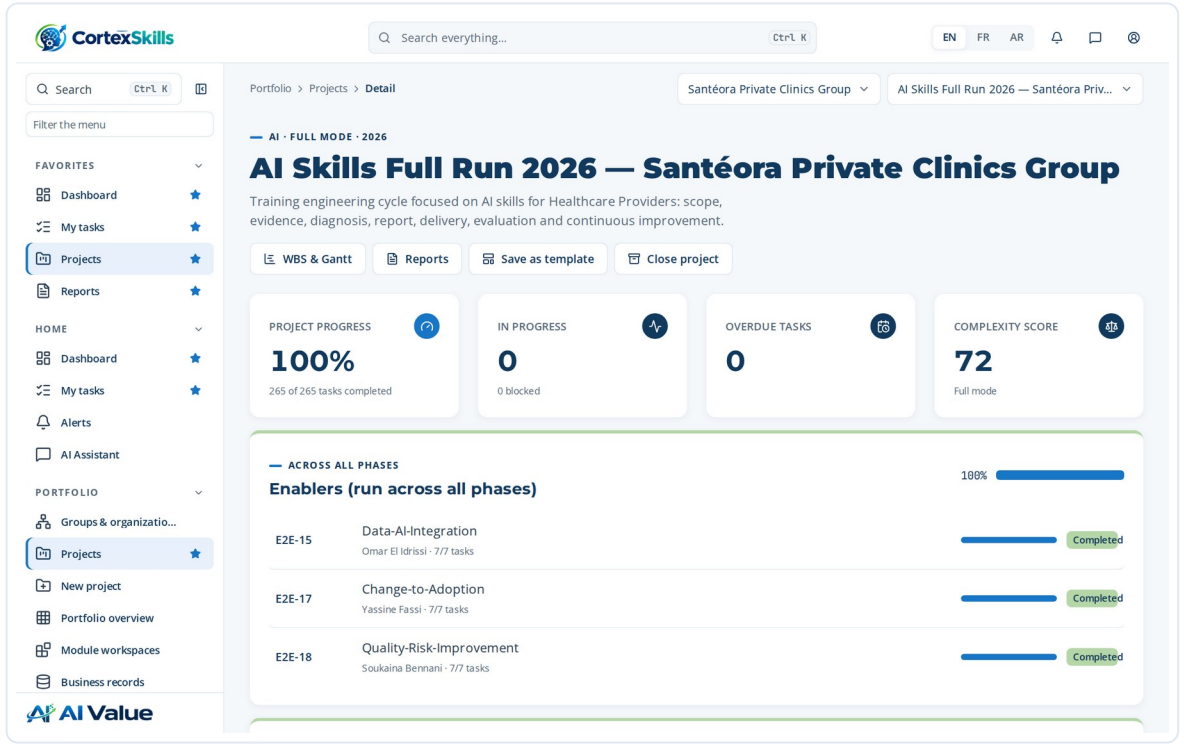

Training plan with detailed agendas — Santéora Private Clinics Group

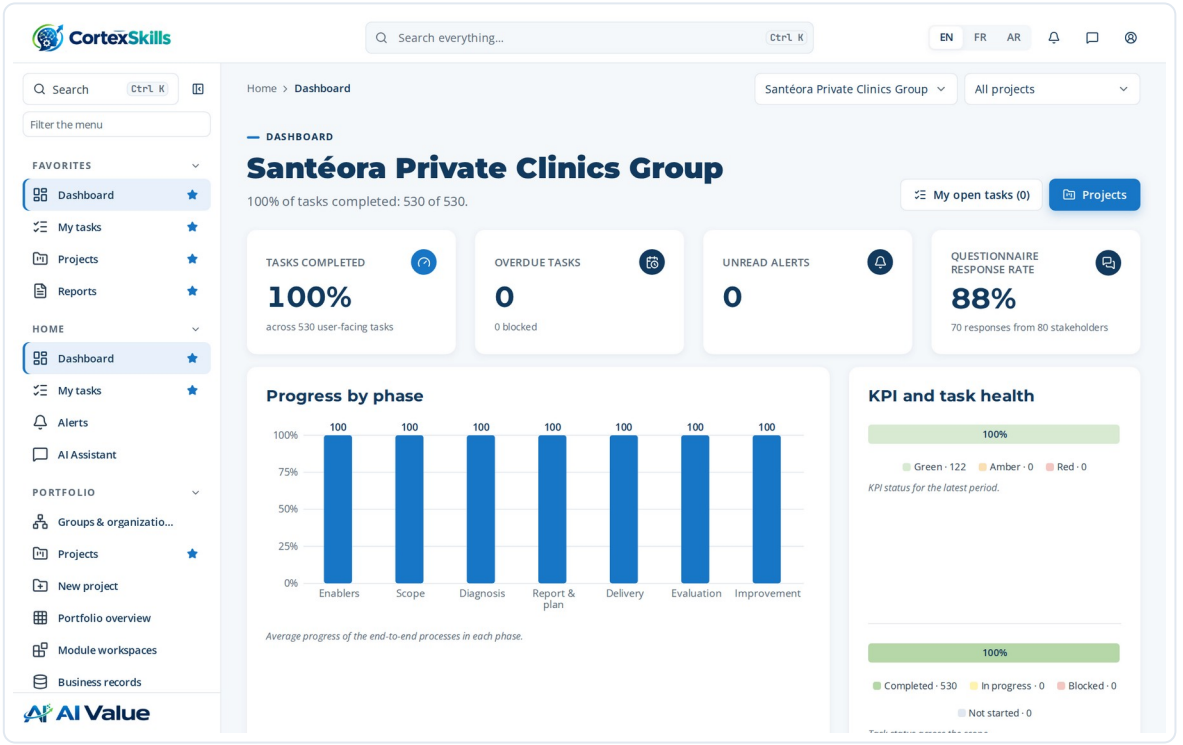

Training plan screen: programs, trainings and sessions.

The project workspace and the dashboard

Project workspace: phases, processes and progress.

Dashboard of the clinic group.

CONCLUSION

What the clinic group has at the end of the cycle

- A Training Engineering Report of 193 pages, built from 35 answers, 40 stakeholders and the diagnosis of every function.
- A locked Training Plan: 6 trainings, half-day agendas, a value proposition per persona and a budget of 1,260,000
- Evaluation at three Kirkpatrick levels, an ROI study, followed certifications and an internal audit with one minor nonconformity to correct.
- 37 published documents ready for an accreditation audit (ISO 7101, JCI), each traced to the data and the step that produced it.
- Next: waves 2 and 3 of the roadmap and the level-4 (results) evaluation six to twelve months after the trainings.
