

NON-CONFORMITY MANAGEMENT, GOVERNED BY DESIGN

NCP Solver

DynamicMS Suite

One governed platform to detect, resolve, and learn from every non-conformity — combining disciplined S1–S7 problem solving, integrated governance & compliance, and AI assistance that always keeps a human in control.

End-to-End Process Rigor

A disciplined 7-stage path (S1–S7): detection, containment, root cause, corrective action, and capitalized lessons learned.

Integrated Governance & Compliance

COSO-aligned Controls, a live Risk Register, Business Rules, and RACSI accountability — audit-ready by default.

Governed AI Assistance

14 cataloged AI use cases, always reviewed by a human — suggestion, never autonomous action.

7 Process Stages · 14 Governed AI Use Cases · 24 RBAC Modules · 3 Languages incl. Arabic (RTL)

AI That Assists — Never Decides Alone

ASSISTIVE

The AI observes, analyzes, and suggests. A human performs the task and makes every decision.

Classification · Root Cause Mining · Evaluation

AUGMENTED

The AI drafts a substantial part of the work — but nothing is finalized without human review, edit, and approval.

Problem Structuring · REX Generation

Autonomous AI is deliberately out of scope — no AI use case may take an irreversible action on its own.

RAG-Grounded

Every suggestion cites real methodology references — never a fact outside the data.

Deterministic-First

A built-in engine always computes the result; a real LLM only augments it, with automatic fallback.

Full Usage Audit

Accepted, edited, or rejected — every outcome is logged, append-only, for compliance.

Governed Activation

Organization-wide control, with per-project override, so AI runs only where it's wanted.

14 AI Use Cases, Catalog to Roadmap

#	AI Use Case	Tier	Stage / Module	Status	What It Does
1	NCP Classification & Similar-Case Assistant	Assistive	S1	Production	Suggests initial criticality, priority, and similar past Sheets when a new problem is registered.
2	5W2H Problem-Structuring Assistant	Augmented	S2	Production	Drafts a starting 5W2H breakdown from the Sheet's title and description for the team to refine.
3	Immediate Containment Action Advisor	Assistive	S3	Production	Retrieves containment actions that worked on similar past problems in the organization.
4	Root Cause Mining Assistant	Assistive	S4	Production	Mines closed Sheets for candidate root causes and 6M categories like the current problem.
5	Corrective Action Recommendation Engine	Assistive	S5	Production	Recommends proven corrective actions for a root cause, drawn from the Capitalization Library.
6	Corrective Action Effectiveness Evaluation Assistant	Assistive	S6	Production	Surfaces the root cause to re-verify and the org's historical effectiveness rate.
7	REX (Lessons-Learned) Drafting Assistant	Augmented	S7	Production	Drafts the REX narrative — lessons learned and standardization — from the Sheet's S1-S6 content.
8	Data Query Assistant	Assistive	AI Assistant	Production	Answers plain-language questions about the org's own data, scoped to the user's role.
9	Application Help Assistant	Assistive	AI Assistant	Production	Answers "How do I...?" questions about NCP Solver from a built-in FAQ knowledge base.
10	BPMN Diagram Documentation Assistant	Assistive	BPMN	Roadmap	Generates a plain-language walkthrough of a BPMN diagram's flow, gateways, and loops.
11	Risk Narrative & Mitigation Drafting Assistant	Augmented	Risk & Opp.	Roadmap	Drafts a description, causes, and mitigation plan for a new Risk/Opportunity item.
12	Control Test Summary Assistant	Assistive	Control	Roadmap	Summarizes a Control's test history and effectiveness trend in one paragraph.
13	Business Rule Drafting Assistant	Augmented	Business Rule	Roadmap	Drafts an IF/THEN statement and severity for a new Business Rule.
14	RACSI Assignment Recommendation Assistant	Assistive	RACSI	Roadmap	Suggests Accountable/Responsible/Consulted/Support/Informed assignees for a new Activity.

Every Non-Conformity. A Governed Path to Improvement.

Process Discipline at Scale

Every non-conformity follows the same governed S1–S7 path, from detection to capitalized lessons learned.

Compliance Built In

COSO-aligned controls, a live risk register, and RACSI accountability — audit-ready from day one.

AI You Can Trust

Every suggestion is grounded, labeled, logged, and reviewed. Never autonomous.
