REVISION HISTORY

Version	Date	Change
1.0	September 2026	Initial commercial architecture: 8 packs, 17 integrations in 6 families, 10 add-ons.
2.0	28 September 2026	CR1 — Scope of Work & Questionnaire Management: M53 and M54 added to PK-01, PK-07 and PK-08 (MP-53, MP-54); new integration INT-SUR-01 (family 4.7 Survey & Feedback); new add-on AD-11 ($49/month); pricing notes and differentiators updated. No base price change.
3.0	16 October 2026	Aligned with CortexSkills release 1.15.0: SME packs (6.5), compliance and security standards (6.6), entitlements, quotas and AI tiers per offer (6.7), deployment, licensing and customer edition (6.8). AD-11 channels updated to Face-to-Face, Email, WhatsApp, Application and Combination; bundle user terms stated. No change to pack, add-on or bundle prices.

SECTION 1

1. Executive Summary

This document defines the commercial architecture for CortexSkills, the #1 market-leading Training Engineering application. It presents three building blocks:

- **8 optimized Packs** designed to cover the full spectrum of customer needs, from SMB to Enterprise, and from operational L&D to strategic consulting.
- **A comprehensive Integration Catalog** mapping external applications to the packs that benefit from them, with clear value propositions tied to customer behavior, pain points, and hopes.
- **A curated Add-On Catalog** enabling customers to extend their packs with specialized capabilities.

Packaging rules applied

- The number of Packs is optimized to 8, balancing simplicity for buyers with coverage of the 52 macro processes.
- The minimum price is 40 USD/month, ensuring every pack delivers tangible value.
- Each Pack targets a specific segment, has a clear value proposition, maps to specific macro processes, and includes related modules.
- Integrations and Add-Ons are mapped to the Packs that benefit most from them.

What is new in version 2.0

Version 2.0 adds structured Scope of Work definition and multi-channel questionnaire management to CortexSkills. Two new modules — M53 Scope of Work Studio and M54 Questionnaire Studio — are included in PK-01, PK-07 and PK-08 and support two new macro processes, MP-53 and MP-54. One integration (INT-SUR-01 Survey / Questionnaire Platform Integration) and one add-on (AD-11 Questionnaire Library & Multi-Channel Distribution) are added. The catalog now counts 8 packs, 18 integrations in 7 families and 11 add-ons. No pack base price changes.

What is new in version 3.0

Version 3.0 aligns the catalog with CortexSkills release 1.15.0. It adds the three SME packs, the compliance and security standards, the quotas and AI tier of each offer, and the licensing rules of private-cloud and on-premises installations, where the plan, the users and the add-ons come from a licence signed by POWERACT. Pack, add-on and bundle prices are unchanged.

1.1 How to Read This Document

Section	What you will find
2 Pack Architecture Overview	All 8 packs on one page, the positioning map and a price comparison.
3 Detailed Pack Specifications	One page per pack: segment, value proposition, modules, macro processes, price, and the integrations and add-ons that fit it.
4 Integration Catalog	18 integrations in 7 families, with a pack-compatibility matrix.
5 Add-On Catalog	11 optional add-ons with prices and a pack-compatibility matrix.
6 Pricing Summary & Packaging Rules	Prices, user limits, overage, packaging rules, bundle discounts, SME packs, compliance standards, entitlements and licensing.

Section	What you will find
7 Strategic Conclusion	Key differentiators.

Value propositions are presented in three parts throughout: **Behavior** (what customers do today), **Pain point** (what hurts), and **Hope** (what they want).

SECTION 2

2. Pack Architecture Overview

2.1 Pack Summary

Pack ID	Pack name	Target segment	Price (USD/month)	Related macro processes
PK-01	Core Training Engineering Pack	SMB, Mid-Market	**$99**	MP-01 to MP-06, MP-18, MP-20, MP-53, MP-54
PK-02	Learning Delivery & Experience Pack	SMB, Mid-Market, Enterprise	**$149**	MP-07 to MP-12, MP-21, MP-24 to MP-27
PK-03	Assessment, Analytics & ROI Pack	Mid-Market, Enterprise	**$129**	MP-09, MP-10, MP-20, MP-28, MP-32
PK-04	Compliance & Certification Pack	Regulated Industries	**$99**	MP-14, MP-41, MP-09, MP-10
PK-05	Talent & Mobility Pack	Mid-Market, Enterprise	**$119**	MP-13, MP-31, MP-35, MP-02, MP-08
PK-06	Extended Enterprise Pack	Training Providers, Enterprises	**$109**	MP-22, MP-07, MP-14, MP-18, MP-29
PK-07	Consulting & Diagnostic Pack	Consulting Firms, Enterprises	**$249**	MP-36 to MP-42, MP-53, MP-54
PK-08	Strategic Workforce & Governance Pack	Enterprise, Large Organizations	**$199**	MP-43 to MP-50, MP-16, MP-17, MP-19, MP-20, MP-53, MP-54

Table 2.1 — The eight CortexSkills packs.

2.2 Pack Positioning Map

The map places each pack on two axes, from operational to strategic. Orange-tint cards mark the three key differentiators named in the Strategic Conclusion: PK-01, PK-07 and PK-08.

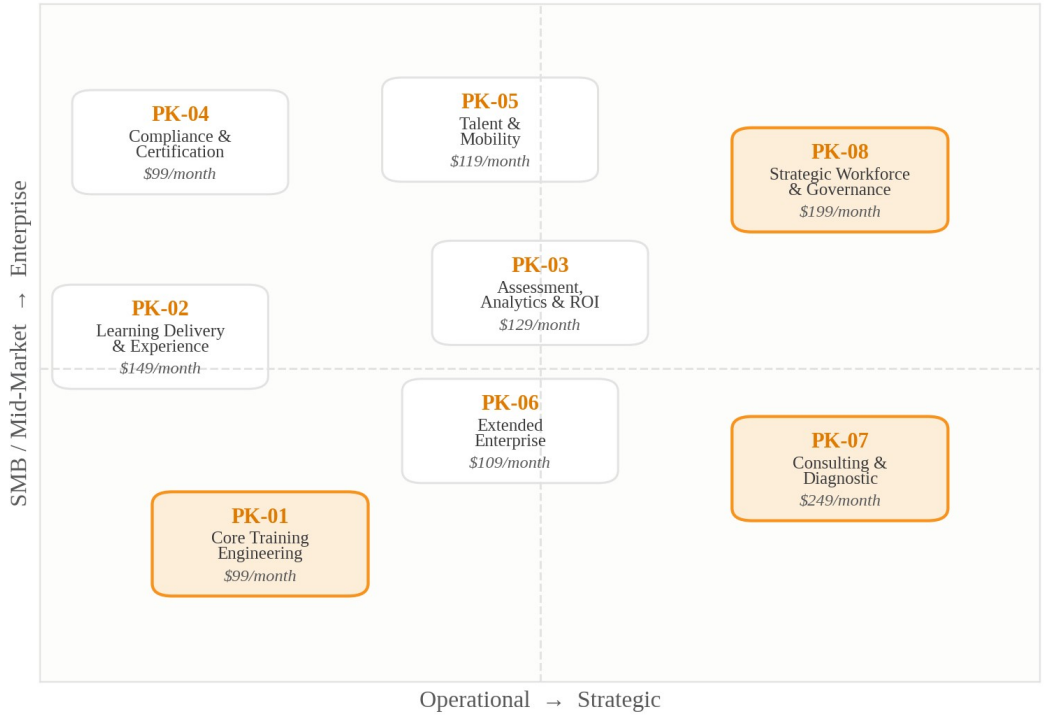

Figure 2.2 — Pack positioning map, with base monthly price.

2.3 Price Comparison

Base prices range from 99 to 249 USD per month. PK-07 is priced per engagement and PK-06 per external user; all other packs are priced per internal user.

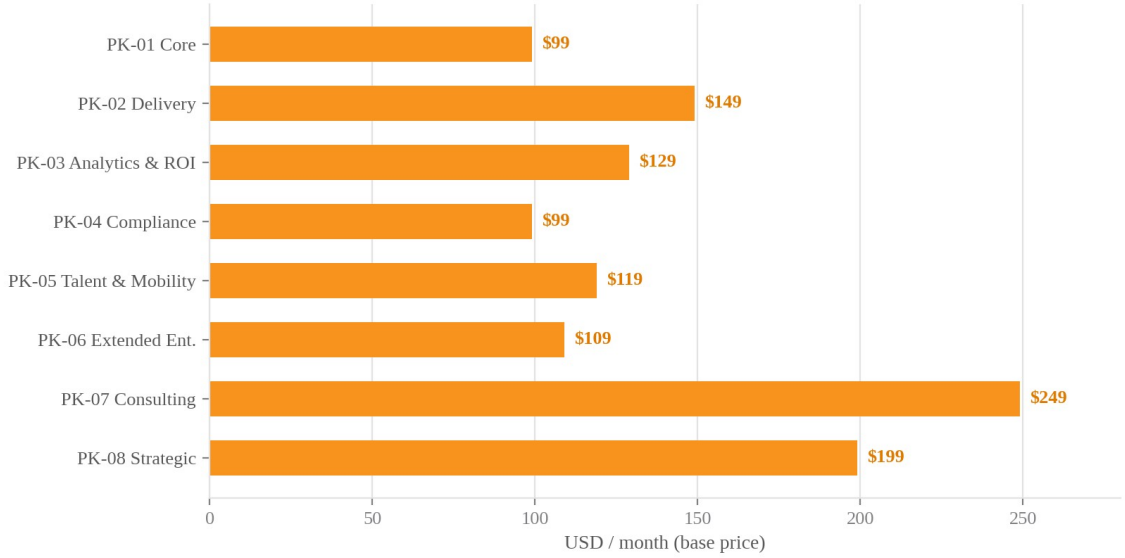

Figure 2.3 — Suggested base price per pack (USD/month, before overage).

SECTION 3

3. Detailed Pack Specifications

Each pack is described on its own page. The "Works best with" block is derived from the Integration and Add-On catalogs (Sections 4 and 5).

PACK · PK-01

PK-01: Core Training Engineering Pack

Pack ID	PK-01
Pack name	Core Training Engineering Pack
Target segment	SMB (50–500 employees), Mid-Market (500–5,000 employees), L&D teams starting their Training Engineering journey
Suggested price	**$99 USD/month (up to 100 users); $0.75/user/month beyond 100 users**

Value proposition

Behavior *What customers do today*	L&D teams currently manage training needs with spreadsheets and disconnected tools.
Pain point *What hurts*	They struggle to produce a formal Training Engineering Report and prioritized training roadmap, leading to reactive, ad-hoc training investments.
Hope *What they want*	A single platform that starts from a structured Scope of Work, collects evidence through multi-channel questionnaires, automates needs analysis, produces the flagship Training Engineering Report, and generates a prioritized roadmap aligned to business strategy.

Add-ons	AD-08 Multi-Site / Multi-Entity Deployment ($55/month) AD-11 Questionnaire Library & Multi-Channel Distribution ($49/month)

PACK · PK-02

PK-02: Learning Delivery & Experience Pack

Pack ID	PK-02
Pack name	Learning Delivery & Experience Pack
Target segment	SMB, Mid-Market, Enterprise; organizations focused on learner engagement and modern delivery
Suggested price	**$149 USD/month (up to 250 users); $0.60/user/month beyond 250 users**

Value proposition

Behavior *What customers do today*	Employees are disengaged from traditional LMS-driven training; learning is seen as a checkbox exercise.
Pain point *What hurts*	Low completion rates, poor learner experience, and inability to deliver learning in the flow of work.
Hope *What they want*	A modern, personalized, engaging learning experience with microlearning, gamification, social learning, and AI-powered recommendations — driving measurable engagement and completion.

Add-ons	AD-01 Immersive Learning (VR/AR/Simulation) ($49/month) AD-02 AI Personalization Engine ($59/month) AD-04 Social & Collaborative Learning ($40/month) AD-05 Gamification Engine ($40/month) AD-06 Content Curation & Aggregation Engine ($49/month)

PACK · PK-03

PK-03: Assessment, Analytics & ROI Pack

Pack ID	PK-03
Pack name	Assessment, Analytics & ROI Pack
Target segment	Mid-Market, Enterprise; data-driven L&D organizations focused on proving impact
Suggested price	**$129 USD/month (up to 500 users); $0.50/user/month beyond 500 users**

Value proposition

Behavior *What customers do today*	L&D leaders are under pressure to prove the business impact of training but rely on lagging indicators (completion rates, satisfaction scores).
Pain point *What hurts*	Inability to connect training to business KPIs, calculate ROI, or predict future skill gaps.
Hope *What they want*	A robust analytics suite that measures Kirkpatrick Levels 1–4, calculates ROI using the Phillips methodology, and uses predictive analytics to anticipate future skill needs — transforming L&D into a strategic business partner.

Add-ons	AD-02 AI Personalization Engine ($59/month) AD-03 Predictive Analytics ($69/month)

PACK · PK-04

PK-04: Compliance & Certification Pack

Pack ID	PK-04
Pack name	Compliance & Certification Pack
Target segment	Regulated industries (healthcare, finance, pharma, agro-food, aviation, energy); organizations with mandatory training requirements
Suggested price	**$99 USD/month (up to 300 users); $0.55/user/month beyond 300 users**

Value proposition

Behavior *What customers do today*	Compliance officers and L&D teams manage mandatory training and certifications manually, with high risk of non-compliance.
Pain point *What hurts*	Audit failures, expired certifications, regulatory fines, and inability to track completion across sites.
Hope *What they want*	An automated compliance engine that assigns, tracks, and renews certifications, with full audit trails, regulatory validation workflows (e.g., OFPPT, GIAC-Agro), and real-time compliance dashboards.

Add-ons	AD-05 Gamification Engine ($40/month) AD-09 External Training Plan Validation (Regulatory) ($45/month)

PACK · PK-05

PK-05: Talent & Mobility Pack

Pack ID	PK-05
Pack name	Talent & Mobility Pack
Target segment	Mid-Market, Enterprise; organizations focused on retention, internal mobility, and career development
Suggested price	**$119 USD/month (up to 300 users); $0.65/user/month beyond 300 users**

Value proposition

Behavior *What customers do today*	Employees feel stuck in their roles; managers struggle to fill critical positions internally.
Pain point *What hurts*	High turnover, lack of career visibility, and inability to match internal talent to opportunities.
Hope *What they want*	A skills-based talent marketplace that connects employees to internal opportunities, automates onboarding and rapid upskilling, and provides clear career paths — improving retention and reducing external hiring costs.

Add-ons	AD-02 AI Personalization Engine ($59/month) AD-04 Social & Collaborative Learning ($40/month) AD-07 Expert Knowledge Capture & Transfer ($45/month) AD-10 Leadership Maturity Assessment & Development ($69/month)

PACK · PK-06

PK-06: Extended Enterprise Pack

Pack ID	PK-06
Pack name	Extended Enterprise Pack
Target segment	Training providers, consulting firms, enterprises training partners, resellers, and customers
Suggested price	**$109 USD/month (up to 200 external users); $0.80/external user/month beyond 200 users**

Value proposition

Behavior *What customers do today*	Organizations want to monetize training for external audiences but lack the infrastructure.
Pain point *What hurts*	Manual enrollment, payment processing, and certification tracking for partners and customers; inability to scale external training.
Hope *What they want*	A multi-tenant, branded portal with e-commerce, certification tracking, and content curation — turning training into a revenue stream and strengthening partner/customer relationships.

Add-ons	AD-06 Content Curation & Aggregation Engine ($49/month) AD-08 Multi-Site / Multi-Entity Deployment ($55/month)

PACK · PK-07

PK-07: Consulting & Diagnostic Pack

Pack ID	PK-07
Pack name	Consulting & Diagnostic Pack
Target segment	L&D consulting firms, training engineering consultancies, enterprise L&D teams running diagnostic engagements
Suggested price	**$249 USD/month (up to 50 concurrent engagements); $5/engagement/month beyond 50**

Value proposition

Behavior *What customers do today*	Consulting firms manage Training Engineering engagements with Word documents, Excel spreadsheets, and manual interviews.
Pain point *What hurts*	Lack of structured diagnostic frameworks, manual report generation, and difficulty scaling consulting engagements.
Hope *What they want*	A purpose-built consulting platform with multi-axis diagnostic, CMM maturity assessment, leadership maturity assessment, N-1 impact study, automated Training Engineering Report generation, and consulting-grade questionnaire libraries by sector and focus — enabling consultants to deliver faster, higher-quality engagements at scale.

PACK · PK-08

PK-08: Strategic Workforce & Governance Pack

Pack ID	PK-08
Pack name	Strategic Workforce & Governance Pack
Target segment	Large enterprises, multinationals, holding companies, government agencies
Suggested price	**$199 USD/month (up to 500 users); $0.45/user/month beyond 500 users**

Value proposition

Behavior *What customers do today*	L&D is disconnected from strategic workforce planning, job architecture, and governance.
Pain point *What hurts*	No visibility into future skills needs, fragmented job descriptions, no GPEC integration, and weak governance over data, AI, and change.
Hope *What they want*	A strategic platform that integrates Forward Planning of Jobs and Skills (GPEC), job architecture, competitive intelligence, MS/MO/OP performance assessment, functional SWOT, and enterprise governance — positioning L&D as a strategic driver of organizational transformation.

Table 4.0 — Which packs benefit from each integration (● = related pack).

4.1 Enterprise Systems

INTEGRATION · INT-HR-01

INT-HR-01: HRIS/HCM Integration

Goals	Synchronize employee data (profiles, roles, org charts, hierarchies) automatically; ensure user provisioning/deprovisioning is seamless and accurate.
Example applications	Workday, SAP SuccessFactors, Oracle HCM, ADP, BambooHR, Personio, DarwinBox
Related pack(s)	**PK-01, PK-02, PK-05, PK-08**

Behavior *What customers do today*	HR and L&D work in silos with manual data transfers.
Pain point *What hurts*	Constant battle to keep user lists updated; error-prone reporting; security risks from former employees retaining access.
Hope *What they want*	A single source of truth where employee changes in the HRIS automatically update the learning platform, freeing L&D to focus on strategy.

INTEGRATION · INT-FIN-01

INT-FIN-01: ERP/Finance System Integration

Goals	Automate budget tracking, cost allocation, and vendor invoice processing related to training activities.
Example applications	SAP ERP, Oracle Financials, Microsoft Dynamics 365, NetSuite
Related pack(s)	**PK-01, PK-03, PK-06, PK-08**

Behavior *What customers do today*	L&D leaders manage training budgets with complex, static spreadsheets.
Pain point *What hurts*	Nearly impossible to get a real-time view of spending vs. budget; reconciling vendor invoices is a major headache.
Hope *What they want*	Real-time financial visibility and automated reconciliation, enabling data-driven budget decisions.

INTEGRATION · INT-CRM-01

INT-CRM-01: CRM Integration

Goals	Manage and track training programs for customers, partners, and resellers; connect sales performance data to training outcomes.
Example applications	Salesforce, HubSpot, Microsoft Dynamics CRM
Related pack(s)	**PK-06**

Behavior *What customers do today*	Sales and training teams operate independently.
Pain point *What hurts*	Company invests in partner/customer training but cannot correlate it with improved sales, satisfaction, or reduced churn.
Hope *What they want*	Direct line of sight from training completion to revenue generated, proving the business value of extended enterprise training.

4.2 Talent & Performance Management

INTEGRATION · INT-TM-01

INT-TM-01: Performance Management Integration

Goals	Pull performance review data (ratings, manager feedback, goal progress) to trigger training needs analysis, personalize learning paths, and measure training impact on performance.
Example applications	Cornerstone Performance, Lattice, 15Five, ClearCompany
Related pack(s)	**PK-01, PK-03, PK-05**

Behavior *What customers do today*	Performance reviews identify skill gaps, but follow-up training is disconnected and manual.
Pain point *What hurts*	Training feels disconnected from performance outcomes; managers struggle to use learning as an improvement tool.
Hope *What they want*	A closed-loop system where a performance improvement plan automatically triggers a targeted learning path, and subsequent performance gains are measured.

INTEGRATION · INT-TM-02

INT-TM-02: Talent Management / Succession Planning Integration

Goals	Align training and development with career paths, succession plans, and internal mobility opportunities.
Example applications	Workday Talent & Succession, SAP SuccessFactors Succession, 365Talents, Fuel50
Related pack(s)	**PK-05, PK-08**

Behavior *What customers do today*	Career pathing and succession planning are often theoretical exercises.
Pain point *What hurts*	Employees feel they lack clear development paths; managers have no ready pipeline for critical roles.
Hope *What they want*	A dynamic talent marketplace where employees see skills required for their desired next role and are automatically recommended the training to get there.

INTEGRATION · INT-TM-03

INT-TM-03: Skills Intelligence / Talent Marketplace

Goals	Enrich the platform's skills ontology with real-time data from the market; power internal talent matching.
Example applications	Degreed (Skills Intelligence), Gloat, 365Talents
Related pack(s)	**PK-03, PK-05, PK-08**

Behavior *What customers do today*	L&D is disconnected from the real-time skills landscape of the business and external market.
Pain point *What hurts*	Skills taxonomy becomes stale quickly; training is designed based on outdated assumptions.
Hope *What they want*	A self-updating skills database that reflects current business needs and market trends, ensuring training investments are always relevant.

INTEGRATION · INT-REC-01

INT-REC-01: Recruitment / ATS Integration

Goals	Connect job requisitions to the skills framework; enable "build vs. buy" analysis; align onboarding with pre-hire expectations.
Example applications	SAP SuccessFactors Recruiting, Oracle Taleo, Workday Recruiting, Greenhouse
Related pack(s)	**PK-05, PK-08**

Behavior *What customers do today*	Recruitment and L&D teams do not communicate, leading to hiring for skills that could have been developed internally.
Pain point *What hurts*	Organization spends heavily on external hiring when a more cost-effective option could be reskilling an internal candidate.
Hope *What they want*	Ability to instantly see if skills for a new job opening exist internally, prompting a reskilling initiative instead of an external hire.

4.3 Learning Content & Ecosystem

INTEGRATION · INT-CON-01

INT-CON-01: Content Provider Aggregation

Goals	Seamlessly integrate external content libraries directly into the learning platform, providing a vast and diverse catalog without manual import.
Example applications	LinkedIn Learning, Coursera, Udemy Business, Pluralsight, Skillsoft, O'Reilly, OpenSesame, getAbstract
Related pack(s)	**PK-02, PK-06**

Behavior *What customers do today*	L&D teams struggle to find and curate high-quality external content, often resulting in outdated or unengaging courses.
Pain point *What hurts*	Purchasing individual courses is expensive; managing multiple vendor platforms is chaotic.
Hope *What they want*	A single, unified search experience that pulls content from multiple world-class providers, giving learners choice and L&D powerful curation tools.

INTEGRATION · INT-LMS-01

INT-LMS-01: LMS/LXP Integration

Goals	Act as an operational layer for scheduling, resource planning, and reporting for training activities managed in another LMS, or vice versa.
Example applications	Docebo, Cornerstone OnDemand, 360Learning, Absorb LMS
Related pack(s)	**PK-01, PK-02, PK-06**

Behavior *What customers do today*	Many organizations have multiple learning platforms, creating a fragmented experience.
Pain point *What hurts*	Learner data and completion records are scattered across systems, making it impossible to get a holistic view.
Hope *What they want*	A single operational hub that orchestrates all training, regardless of where content is hosted, creating a seamless experience for learners and admins.

INTEGRATION · INT-ASM-01

INT-ASM-01: Assessment & Certification Systems

Goals	Integrate advanced assessment engines and issue verifiable digital badges and certifications.
Example applications	Questionmark, Credly, ProctorU, PSI
Related pack(s)	**PK-03, PK-04, PK-06**

Behavior *What customers do today*	Assessment is often a basic quiz function within an LMS.
Pain point *What hurts*	Inability to conduct high-stakes or remotely proctored exams; lack of standardized way to issue and track credentials.
Hope *What they want*	Ability to deliver robust, secure assessments and issue digital badges that employees can share on LinkedIn, enhancing the value of the certification.

INTEGRATION · INT-VC-01

INT-VC-01: Virtual Classroom & Webinar Tools

Goals	Schedule, launch, and track attendance for live instructor-led training sessions (ILT/VILT) directly from the platform.
Example applications	Zoom, Microsoft Teams, Google Meet, Webex, GoToMeeting
Related pack(s)	**PK-02, PK-06**

Behavior *What customers do today*	Training administrators manually schedule sessions in a separate tool and share links via email.
Pain point *What hurts*	Easy to make mistakes in scheduling and communication, leading to low attendance and frustrating experiences.
Hope *What they want*	A one-click workflow where scheduling a VILT session in the platform automatically creates the Zoom/Teams meeting, invites all learners, and syncs attendance data back.

4.4 Learning in the Flow of Work

INTEGRATION · INT-COM-01

INT-COM-01: Communication & Collaboration Platforms

Goals	Deliver contextual microlearning, notifications, and AI-powered learning recommendations directly within the tools employees use daily.
Example applications	Slack, Microsoft Teams, WhatsApp
Related pack(s)	**PK-02, PK-05**

Behavior *What customers do today*	Employees are often too busy to log into a separate learning portal.
Pain point *What hurts*	Learning is perceived as a separate activity from "real work," leading to low engagement and forgotten knowledge.
Hope *What they want*	Learning becomes an integrated part of the workflow. An employee can get a quick answer or a relevant learning nudge without leaving their communication tool.

INTEGRATION · INT-PROD-01

INT-PROD-01: Productivity & Workflow Tools

Goals	Provide just-in-time performance support and microlearning within the applications where tasks are executed.
Example applications	Microsoft 365, Google Workspace, Salesforce, Jira
Related pack(s)	**PK-02, PK-05**

Behavior *What customers do today*	Employees often struggle with a specific feature in software they are using.
Pain point *What hurts*	Searching for help externally is slow and disruptive.
Hope *What they want*	A learning sidebar or integration that provides relevant, bite-sized tutorials or guidance directly within the software, solving the problem in the moment and improving productivity.

4.5 Data & Analytics

INTEGRATION · INT-BI-01

INT-BI-01: Business Intelligence (BI) Tools

Goals	Export rich, structured learning and skills data to enterprise BI platforms for advanced analytics, custom reporting, and correlation with business KPIs.
Example applications	Tableau, Microsoft Power BI, Looker, Qlik
Related pack(s)	**PK-03, PK-08**

Behavior *What customers do today*	L&D reports are often basic and siloed within the LMS, disconnected from business metrics.
Pain point *What hurts*	Inability to answer critical questions like "What is the correlation between this sales training and our quarterly revenue?"
Hope *What they want*	Ability to combine learning data with business data in a single dashboard, providing undeniable proof of L&D's strategic impact and ROI.

INTEGRATION · INT-DATA-01

INT-DATA-01: Data Warehouses & Data Lakes

Goals	Create a centralized, scalable repository of all learning and talent data for advanced AI/ML modeling and long-term trend analysis.
Example applications	Snowflake, Databricks, Google BigQuery, Amazon Redshift
Related pack(s)	**PK-03, PK-08**

Behavior *What customers do today*	Data is stuck in operational systems and difficult to access for advanced data science projects.
Pain point *What hurts*	Organization wants to build predictive models for attrition or future skills needs but lacks a unified data foundation.
Hope *What they want*	A future-proof data architecture where all people data can be aggregated and analyzed, unlocking powerful predictive capabilities for strategic workforce planning.

4.6 Core Platform & Security

INTEGRATION · INT-SSO-01

INT-SSO-01: Identity & Access Management (IAM) / SSO

Goals	Provide secure, streamlined login and automated user provisioning/deprovisioning (SCIM) for all employees.
Example applications	Okta, Microsoft Entra ID (formerly Azure AD), Ping Identity
Related pack(s)	**PK-01 to PK-08 (all packs)**

Behavior *What customers do today*	Users manage multiple passwords; IT administers accounts manually across systems.
Pain point *What hurts*	Poor user experience with forgotten passwords; security vulnerabilities from orphaned accounts.
Hope *What they want*	A seamless, secure login experience where users can access all applications with a single set of credentials, and user access is automatically managed based on HR status.

INTEGRATION · INT-PAY-01

INT-PAY-01: E-Commerce & Payment Gateways

Goals	Enable monetization of training for external audiences (partners, customers) by providing secure payment processing.
Example applications	Stripe, PayPal, Adyen
Related pack(s)	**PK-06**

Behavior *What customers do today*	Company wants to sell its training programs to external partners but lacks a secure way to collect payments.
Pain point *What hurts*	Managing payments, invoices, and sales tax manually is a massive barrier to scaling an extended enterprise training business.
Hope *What they want*	A fully integrated e-commerce capability that makes selling training as simple as selling any other product, opening up a new revenue stream.

4.7 Survey & Feedback

INTEGRATION · INT-SUR-01

INT-SUR-01: Survey / Questionnaire Platform Integration

Goals	Connect CortexSkills to external survey tools for questionnaire distribution, response collection and analytics, so that responses flow back into the needs analysis, diagnostic and Training Engineering Report.
Example applications	Qualtrics, SurveyMonkey, Microsoft Forms, Google Forms, LimeSurvey, Typeform
Related pack(s)	**PK-01, PK-03, PK-07, PK-08**

Behavior *What customers do today*	L&D teams and consultants build questionnaires in a separate survey tool, export the responses to spreadsheets and re-key them into the needs analysis.
Pain point *What hurts*	Responses are scattered across tools and channels, consolidation is manual and slow, consent is hard to prove, and results reach the needs analysis late.
Hope *What they want*	Questionnaires dispatched and collected through the survey tool the organization already uses, with responses flowing back automatically into CortexSkills — traced to the Scope of Work and ready for analysis.

SECTION 5

5. Add-On Catalog

Add-Ons are optional modules that can be purchased on top of any Pack to extend capabilities. They are designed for customers who need specialized functionality without upgrading to a higher-tier pack.

5.0 Add-On-to-Pack Matrix

ID	Add-on (price/month)	PK-01	PK-02	PK-03	PK-04	PK-05	PK-06	PK-07	PK-08
AD-01	Immersive Learning (VR/AR/Simulation) ($49)		●					●	
AD-02	AI Personalization Engine ($59)		●	●		●			
AD-03	Predictive Analytics ($69)			●					●
AD-04	Social & Collaborative Learning ($40)		●			●			
AD-05	Gamification Engine ($40)		●		●				
AD-06	Content Curation & Aggregation Engine ($49)		●				●		
AD-07	Expert Knowledge Capture & Transfer ($45)					●		●	
AD-08	Multi-Site / Multi-Entity Deployment ($55)	●					●		●
AD-09	External Training Plan Validation (Regulatory) ($45)				●			●	
AD-10	Leadership Maturity Assessment & Development ($69)					●		●	●
AD-11	Questionnaire Library & Multi-Channel Distribution ($49)	●						●	●

Table 5.0 — Packs that benefit most from each add-on (● = related pack). Add-ons can be bought with any pack.

5.1 Add-On Details

ADD-ON · AD-01

AD-01: Immersive Learning (VR/AR/Simulation)

Goals	Create experiential, safe-to-fail learning environments using VR, AR, and simulation technologies.
Related pack(s)	PK-02, PK-07
Suggested price	**$49 USD/month**

Behavior *What customers do today*	Learners need hands-on practice in high-risk or high-cost environments but cannot practice on real equipment.
Pain point *What hurts*	Training is theoretical; learners cannot safely practice dangerous or expensive tasks.
Hope *What they want*	A realistic, safe environment where learners can practice, fail, and improve without risk — accelerating mastery and reducing on-the-job errors.

ADD-ON · AD-02

AD-02: AI Personalization Engine

Goals	Deliver real-time adaptation to individual learner needs using AI; personalize content, pace, and pathways at scale.
Related pack(s)	PK-02, PK-03, PK-05
Suggested price	**$59 USD/month**

Behavior *What customers do today*	Learners receive generic, one-size-fits-all training that does not match their skill level or role.
Pain point *What hurts*	Low engagement and wasted time on irrelevant content.
Hope *What they want*	A personalized learning experience that adapts to each learner's knowledge, pace, and goals — maximizing engagement and time-to-competency.

ADD-ON · AD-03

AD-03: Predictive Analytics

Goals	Forecast skill gaps before they materialize; use predictive models to anticipate future learning needs.
Related pack(s)	PK-03, PK-08
Suggested price	**$69 USD/month**

Behavior *What customers do today*	L&D reacts to current skill gaps but cannot anticipate future ones.
Pain point *What hurts*	Constant firefighting; training investments are always behind business needs.
Hope *What they want*	A forward-looking capability that predicts which skills will be needed in 6–18 months, enabling proactive training investments.

ADD-ON · AD-04

AD-04: Social & Collaborative Learning

Goals	Build peer-to-peer knowledge ecosystems that enable social learning and collaboration.
Related pack(s)	PK-02, PK-05
Suggested price	**$40 USD/month**

Behavior *What customers do today*	Employees learn in isolation; knowledge stays trapped in silos.
Pain point *What hurts*	No easy way to share expertise, ask questions, or learn from peers.
Hope *What they want*	A vibrant community where employees help each other, share best practices, and collectively solve problems — accelerating learning and reducing dependence on formal training.

ADD-ON · AD-05

AD-05: Gamification Engine

Goals	Apply behavioral science-driven motivation to increase learner engagement and completion.
Related pack(s)	PK-02, PK-04
Suggested price	**$40 USD/month**

Behavior *What customers do today*	Learners lack motivation; training feels like a chore.
Pain point *What hurts*	Low completion rates, especially for mandatory or compliance training.
Hope *What they want*	A gamified experience with points, badges, leaderboards, and challenges that makes learning engaging, competitive, and fun — boosting completion and retention.

ADD-ON · AD-06

AD-06: Content Curation & Aggregation Engine

Goals	AI-driven discovery and curation of internal and external content to build a rich learning ecosystem.
Related pack(s)	PK-02, PK-06
Suggested price	**$49 USD/month**

Behavior *What customers do today*	L&D spends hours manually searching for and curating content.
Pain point *What hurts*	Content library is either too small or cluttered with low-quality resources.
Hope *What they want*	An intelligent engine that automatically discovers, classifies, and curates the best internal and external content — building a world-class learning library without manual effort.

ADD-ON · AD-07

AD-07: Expert Knowledge Capture & Transfer

Goals	Preserve institutional knowledge before it walks out the door; capture and transfer expert knowledge.
Related pack(s)	PK-05, PK-07
Suggested price	**$45 USD/month**

Behavior *What customers do today*	When experts leave or retire, critical knowledge is lost forever.
Pain point *What hurts*	New employees take months to become productive; repeated mistakes due to lost know-how.
Hope *What they want*	A structured process to capture expert knowledge, document it, and transfer it to successors — preserving institutional memory and accelerating onboarding.

ADD-ON · AD-08

AD-08: Multi-Site / Multi-Entity Deployment

Goals	Adapt and deploy training plans across multiple sites, entities, or business units, ensuring local relevance while maintaining strategic alignment.
Related pack(s)	PK-01, PK-06, PK-08
Suggested price	**$55 USD/month**

Behavior *What customers do today*	Organizations with multiple sites struggle to deploy consistent training while respecting local needs.
Pain point *What hurts*	Different sites use different processes, leading to inconsistency and compliance risks.
Hope *What they want*	A centralized platform with site-specific customization, enabling consistent strategic alignment while respecting local context.

ADD-ON · AD-09

AD-09: External Training Plan Validation (Regulatory)

Goals	Manage external validation and regulatory compliance for training plans, including submission to regulatory bodies (e.g., OFPPT, GIAC-Agro).
Related pack(s)	PK-04, PK-07
Suggested price	**$45 USD/month**

Behavior *What customers do today*	Compliance teams manage regulatory submissions manually, with high risk of errors and delays.
Pain point *What hurts*	Audit failures, rejected submissions, and wasted time on administrative back-and-forth.
Hope *What they want*	An automated regulatory submission workflow with templates, status tracking, and audit trails — ensuring compliance and reducing administrative burden.

ADD-ON · AD-10

AD-10: Leadership Maturity Assessment & Development

Goals	Assess and develop leadership maturity across five levels: Personal Productivity → Personal Leadership → Team Leadership → Organizational Unit Leadership → Whole Organization Leadership.
Related pack(s)	PK-05, PK-07, PK-08
Suggested price	**$69 USD/month**

Behavior *What customers do today*	Leadership development is ad-hoc, with no clear framework for assessing or developing leaders.
Pain point *What hurts*	High-potential leaders are promoted without the skills to lead effectively; leadership pipeline is weak.
Hope *What they want*	A structured leadership maturity framework that assesses current leaders, identifies development gaps, and delivers targeted development — building a strong leadership pipeline.

ADD-ON · AD-11

AD-11: Questionnaire Library & Multi-Channel Distribution

Goals	Provide pre-built questionnaire templates tailored to Focus (All training needs, Digital, AI, Custom) and sector, with multi-channel distribution (Face-to-Face, Email, WhatsApp, Application, or a Combination played in sequence), RACSI allocation per section and structured response collection. Lifts the per-Pack questionnaire volume limit.
Related pack(s)	PK-01, PK-07, PK-08
Suggested price	**$49 USD/month**

Behavior *What customers do today*	Teams rewrite questionnaires from scratch for every engagement and send them by e-mail only, missing shop-floor and field staff.
Pain point *What hurts*	Inconsistent questions across sites and sectors, low response rates from operational levels, and no clear ownership of each questionnaire section.
Hope *What they want*	A ready-to-use library of sector- and focus-specific questionnaires, distributed through the channel each respondent actually uses, with clear RACSI ownership and higher, comparable response rates.

SECTION 6

6. Pricing Summary & Packaging Rules

6.1 Pack Pricing

Pack ID	Pack name	Price (USD/month)	Included	Overage (USD/month)
PK-01	Core Training Engineering Pack	**$99**	100	$0.75 per user
PK-02	Learning Delivery & Experience Pack	**$149**	250	$0.60 per user
PK-03	Assessment, Analytics & ROI Pack	**$129**	500	$0.50 per user
PK-04	Compliance & Certification Pack	**$99**	300	$0.55 per user
PK-05	Talent & Mobility Pack	**$119**	300	$0.65 per user
PK-06	Extended Enterprise Pack	**$109**	200 external users	$0.80 per external user
PK-07	Consulting & Diagnostic Pack	**$249**	50 engagements	$5.00 per engagement
PK-08	Strategic Workforce & Governance Pack	**$199**	500	$0.45 per user

Table 6.1 — Base price, included users (or engagements) and overage per pack.

Note on version 2.0

No base price changes. M53 Scope of Work Studio and M54 Questionnaire Studio are included in PK-01, PK-07 and PK-08. Questionnaire volume limits per Pack apply (100 questionnaires per month per tenant); Add-On AD-11 removes the limit on any Pack.

6.2 Add-On Pricing

ID	Add-on	Price (USD/month)
AD-01	Immersive Learning (VR/AR/Simulation)	**$49**
AD-02	AI Personalization Engine	**$59**
AD-03	Predictive Analytics	**$69**
AD-04	Social & Collaborative Learning	**$40**
AD-05	Gamification Engine	**$40**
AD-06	Content Curation & Aggregation Engine	**$49**
AD-07	Expert Knowledge Capture & Transfer	**$45**
AD-08	Multi-Site / Multi-Entity Deployment	**$55**
AD-09	External Training Plan Validation (Regulatory)	**$45**
AD-10	Leadership Maturity Assessment & Development	**$69**
AD-11	Questionnaire Library & Multi-Channel Distribution	**$49**

6.3 Packaging Rules

Rule	Description
Optimized number of packs	8 packs cover the full spectrum of customer needs — from SMB to Enterprise, from operational to strategic, from internal to extended enterprise.

Rule	Description
Minimum price	Every pack and add-on is priced at or above $40 USD/month, ensuring tangible value delivery.
Scalability	Each pack has a base user limit and a per-user overage price, enabling growth without friction.
Modularity	Add-Ons allow customers to extend capabilities without upgrading packs.
Integration accessibility	All integrations are available across relevant packs, with SSO included in all packs.
Consulting-specific pricing	PK-07 uses engagement-based pricing to align with consulting firms' business models.
Extended enterprise pricing	PK-06 prices based on external users to align with monetization potential.

6.4 Bundle Discounts (Optional)

Bundle	Packs included	Discount	List price	Bundle price
Starter Bundle	PK-01 + PK-02	10% off	$248	**$223.20**
Growth Bundle	PK-01 + PK-02 + PK-03	15% off	$377	**$320.45**
Enterprise Bundle	PK-01 to PK-05	20% off	$595	**$476**
Strategic Bundle	PK-01 to PK-06 + PK-08	25% off	$903	**$677.25**
Full Suite	PK-01 to PK-08	30% off	$1,152	**$806.40**

Table 6.4 — Bundle discounts. List and bundle prices are calculated from base monthly prices (before overage) for illustration.

Each bundle includes 500 users, with $0.45 per additional user per month. The Full Suite opens every module of the platform.

6.5 SME Packs

Three packs priced for small and medium enterprises combine packs at a single price. They run the SME tracks of the application (Essential, Standard, Advanced), with fewer gates and a shorter duration than the full Training Engineering cycle.

ID	SME pack	Contents	Price (USD/month)	Included users	Overage	Segment
SME-ESS	SME Essentials Pack	PK-01 + AD-11	$49	25	$1.20 per user	Micro, Small
SME-GRO	SME Growth Pack	PK-01, PK-02, PK-03	$129	50	$1.00 per user	Small, Medium
SME-CMP	SME Complete Pack	PK-01 to PK-08 (every module)	$249	100	$0.90 per user	Medium

Table 6.5 — SME packs. Prices respect the $40 minimum; a minimum of 5 users applies.

6.6 Compliance & Security Standards

Compliance and security standards are switched on one by one, independently of the pack (module M52). Switching a standard on requires accepting its disclosure and adds its controls to the organization’s control register, each mapped to a COSO component. Standards are priced per standard on quotation; they are not part of the price list.

Standard	Controls added	Examples
GDPR	4	Records of processing activities; data-subject rights; breach notification within 72 hours; impact assessment
ISO/IEC 27001	4	Information security policy; access control review; supplier security; security risk assessment
SOC 2	4	Change management; logical access; system monitoring; incident communication
ISO/IEC 27701	2	Privacy information management roles; privacy by design
ISO 9001	3	Competence and awareness (clause 7.2); internal audit programme; corrective action
Law 09-08 (CNDP, Morocco)	3	Prior declaration to the CNDP; consent of data subjects; cross-border transfer authorisation

Table 6.6 — Compliance and security standards available in the application.

6.7 Entitlements, Quotas & AI Tiers

The offer an organization subscribes to decides the modules it can open, its quotas and its AI tier. The Platform Shell (M00) and the Configuration & Licensing Console (M51) are included in every offer. A creation beyond a quota is refused with a message naming the limit.

Offer	Projects	OBS nodes	Custom AI use cases	Questionnaires / month	AI tier
PK-01, PK-02, PK-04, PK-05, PK-06	25	200	5	100	Assistive
PK-03, PK-08	25	200	5	100	Assistive + Augmented
PK-07	50	200	5	100	Assistive + Augmented
Starter Bundle	100	1,000	20	100	Assistive
Growth, Enterprise and Strategic Bundles	100	1,000	20	100	Assistive + Augmented
Full Suite	200	1,000	20	100	Assistive + Augmented
SME-ESS	5	60	3	100	Assistive
SME-GRO	20	60	3	100	Assistive + Augmented
SME-CMP	20	60	10	100	Assistive + Augmented

Table 6.7 — Quotas and AI tier per offer. AD-11 removes the questionnaire limit; the number of users is set by the licence.

- **Assistive:** AI proposes content — questions, step entries, report sections — that a person reviews and validates before it is saved.
- **Assistive + Augmented:** also opens the AI use cases classed Augmented, which analyse the organization’s data; their results are validated by a person in the same way. No AI use case acts autonomously.
- **Platform limits (every offer):** 600 API requests per minute and 100 concurrent users per organization; 30 AI Assistant questions per minute per user.

6.8 Deployment, Licensing & Customer Edition

Topic	Rule
Deployment models	Private cloud or on-premises: the customer runs the CortexSkills package (Docker) on its own server. SaaS is not offered at this stage.
Licence	A licence file signed by POWERACT and bound to the customer’s organization. It carries the offer (pack, bundle or SME pack), the maximum number of users, the add-ons and the end date.
Changes	In an installation, the offer, the users and the add-ons cannot be changed locally. An upgrade, a renewal or an extra add-on is a new licence version issued by POWERACT and installed by the customer.
End date and revocation	After the end date the installation switches to read-only until a renewed licence is installed. A licence revoked by POWERACT (for example on contract termination) is removed from the installation.
Customer edition	The package delivered to customers shows no price and no commercial information: no price list, no quotation screen, no price in the catalog. The runtime is delivered without source code.
Quotation (POWERACT)	Monthly total = base price + (users beyond the included users × overage price). Bundles: list price minus the bundle discount.

Table 6.8 — Deployment and licensing rules.

SECTION 7

7. Strategic Conclusion

This commercial architecture positions CortexSkills as the most comprehensive, flexible, and value-driven Training Engineering solution on the market. The 8 optimized packs cover every segment from SMB to Enterprise, the integration catalog ensures the platform is the central nervous system of the customer's L&D ecosystem, and the add-on catalog provides endless extensibility.

Key differentiators

- **PK-01** delivers the flagship Training Engineering Report — no competitor owns this as a first-class capability.
- **PK-07** is the only consulting-grade Training Engineering platform on the market.
- **PK-08** integrates GPEC (Forward Planning of Jobs and Skills), job architecture, and strategic workforce planning — capabilities no LMS or LXP currently offers.
- **PK-01** now includes structured Scope of Work definition and multi-channel questionnaire management.
- **PK-07** adds consulting-grade questionnaire libraries by sector and focus.
- **AD-11** removes the monthly questionnaire limit on any Pack.
- **Three SME packs** from $49 per month bring the Training Engineering cycle to micro, small and medium enterprises.
- **Private-cloud and on-premises installations** run under a licence signed by POWERACT, with a customer edition free of prices and source code.
- **Integrations** are mapped to specific packs, making the value proposition crystal clear for each customer segment.
- **Add-Ons** enable customers to grow without friction.

> **In one sentence**
>
> This is the commercial blueprint for CortexSkills, the #1 Training Engineering application in the market.
