REVISION HISTORY

Version	Date	Change
4.0	September 2026	Consolidated version: 50 macro processes, 31 end-to-end processes, 5 composite chains.
5.0	28 September 2026	CR1 — Scope of Work & Questionnaire Management: MP-53 and MP-54 (fifth family), E2E-32 and E2E-33 with full specifications, E2E-COMP-06, new inputs to MP-03, MP-37 and MP-46, updated chain diagram, coverage 52/52.
6.0	16 October 2026	Aligned with CortexSkills release 1.15.0. Questionnaire channels are now Face-to-Face, Email, WhatsApp, Application and Combination (replacing Hybrid and Custom); respondent populations (DG, Management, Member) with a default channel plan each; assignment of sections, sub-sections and questions to respondents added to UFT-33-04; new Section 9 on how the application runs the architecture (catalog baseline, phases and gates, SME tracks, step execution, questionnaire campaign, administration and licensing). Macro processes, end-to-end processes, tasks and RACSI are unchanged.

READER GUIDE

1. How to Read This Document

This document describes the complete process architecture of CortexSkills, the Training Engineering application. It is written for L&D leaders, HR teams, consultants, and product teams who need to understand how the platform's capabilities connect — from strategy and diagnosis through delivery, evaluation, and continuous improvement.

1.1 Two Ways to Look at the Same Work

The architecture uses two complementary views. Think of them as the rows and columns of one grid:

- **Macro processes (MP)** are vertical capability domains — "what the organization must be good at" (for example, MP-46 Training Demand Collection). There are 52.
- **End-to-end processes (E2E)** are horizontal value streams — "how work flows from a trigger to a result" across several capabilities (for example, E2E-27 Demand Collection-to-Consolidation). There are 33, plus 6 composite chains.

1.2 Document Map

Section	What you will find	Read it when you want to…
2 Executive Summary	Scope of the architecture and the list of all E2E processes	Get the big picture in five minutes
3 Glossary	French-to-English terms, including GPEC	Understand local HR vocabulary
4 Macro Processes	All 52 capability domains; SIPOC for MP-43 to MP-50, MP-53 and MP-54	Check what a capability covers
5 Chain Relationships	How E2E processes consume and feed each other, with a diagram	Understand dependencies and sequencing
6 User-Facing Flow	Everyday user steps mapped to processes	Find where a user action lives
7 E2E Specifications	Triggers, tasks, RACSI, and BPMN flows for E2E-24 to E2E-33	Implement, configure, or audit a process
8 Coverage Statement	Proof that every macro process is covered	Validate completeness
9 Implementation in CortexSkills 1.15.0	How the application runs this architecture: catalog, phases and gates, SME tracks, steps, questionnaires, administration	Configure or run a project in the application

1.3 Key Terms

Term	Meaning
SIPOC	Suppliers, Inputs, Process, Outputs, Customers — the one-page summary used to describe each macro process.
User-Facing Task (UFT)	A step a platform user actually performs, numbered UFT-[E2E]-[step] (e.g., UFT-27-03).
RACSI	Responsible (does the work), Accountable (owns the result and signs off), Consulted (gives input before), Supported (provides help or resources), Informed (kept up to date after).
BPMN	Business Process Model and Notation. Each task is typed as a Start Event, Task, or End Event so the flow can be modelled in any BPMN tool.

Term	Meaning
Root / Partition / Composite / Enabler	A root chain starts its own value stream; a partition is a focused sub-stream of a root; a composite orchestrates several chains; an enabler supports all others.
Trigger / Terminal state	The event that starts an E2E process, and the verified result that ends it.
Flagship	E2E-03 Needs-to-Training Engineering Report & Roadmap — the central chain that most others feed into.
Scope of Work (SOW)	The approved frame of a training engineering engagement: Group or Organization, sector, decision levels (MS/MO/OP/Custom), functions, focus and custom criteria, plus the register of respondent stakeholders.
Focus	The thematic lens of an engagement and its questionnaires: All training needs, Digital, AI, or a named Custom focus.
Population	The respondent group a questionnaire form is written for: DG (top management), Management or Member (staff). Each population has its own form and default channel plan.
Channel plan	The ordered contacts planned for one respondent — invitation, reminders and, if needed, a face-to-face interview — each on a channel (Face-to-Face, Email, WhatsApp, Application) after a set number of days.
Assignment	The sections, sub-sections or questions given to named respondents. An assigned element is shown only to its respondents; an element left unassigned is shown to every respondent of the population.

SECTION 2

2. Executive Summary

2.1 Description

This document defines the complete process architecture for CortexSkills, the #1 market-leading Training Engineering application (tagline: "Training Engineering for a Stronger Tomorrow — Digital and AI-Driven"). It establishes the relationship between 52 macro processes (vertical capability domains) and 33 end-to-end processes (horizontal value streams), each documented with triggers, terminal states, user-facing tasks, RACSI matrices, and BPMN process flows.

The architecture is built on the four-phase Training Engineering cycle — Needs Analysis, Design, Implementation, Evaluation — and centers on the flagship end-to-end process E2E-03: Needs-to-Training Engineering Report & Roadmap.

Flagship process: E2E-03

Needs-to-Training Engineering Report & Roadmap produces the Training Engineering Report and the prioritized training roadmap. Most strategic, consulting, and diagnostic chains feed into it; design and delivery chains consume its output.

Version 5.0 consolidates all previous versions and adds structured Scope of Work definition and multi-channel questionnaire management (change request CR1). It includes 52 macro processes and 33 end-to-end processes, organized in five families:

Version 6.0 keeps this architecture unchanged and aligns the document with CortexSkills release 1.15.0: the questionnaire channels and populations used by the application, the assignment of questions to respondents, and a new Section 9 that describes how the application runs the architecture.

Family	Macro processes	Count
Core Training Engineering	MP-01 to MP-23	23
Innovation & Differentiation	MP-24 to MP-35	12
Consulting & Diagnostic Excellence	MP-36 to MP-42	7
Strategic & Organizational Excellence	MP-43 to MP-50	8
Scope & Questionnaire Excellence	MP-53, MP-54	2
Total		**52**

Note on numbering

MP-51 Platform Configuration & Licensing Administration and MP-52 Compliance & Security Standards Administration are standing administrative macro processes defined in the Deliverables Workbook (D01). They are not business value streams and are not covered by E2E processes in this document. The new macro processes therefore take the next free identifiers, MP-53 and MP-54, so that one numbering is shared across all deliverables.

2.2 End-to-End Process Summary

The table below lists all 33 end-to-end processes. The flagship row is highlighted. The six composite chains, which orchestrate groups of processes, follow in Table 2.3.

ID	Name	Type	Goal	Related MPs	Steps
E2E-01	Strategy-to-Learning Plan	Root / Master Chain	Translate corporate strategy into an approved annual L&D plan and budget	MP-01; MP-02; MP-03; MP-04; MP-18; MP-19	8
E2E-02	Skills-to-Gap Diagnosis	Partition of E2E-01	Produce a validated skills gap diagnosis	MP-02; MP-03; MP-28	7
E2E-03	**Needs-to-Training Engineering Report & Roadmap**	Root / Master Chain (Flagship)	Produce the Training Engineering Report and the prioritized training roadmap	MP-01; MP-03; MP-04; MP-18; MP-20	10
E2E-04	Roadmap-to-Curriculum Design	Partition of E2E-03	Convert roadmap into curriculum maps, learning paths, design documents	MP-04; MP-05; MP-06; MP-23	8
E2E-05	Design-to-Delivery	Root / Master Chain	Deliver training across all modalities	MP-05; MP-06; MP-07; MP-11; MP-17; MP-25; MP-30	9
E2E-06	Learner-Journey-to-Engagement	Partition of E2E-05	Deliver personalized, engaging learning experience	MP-08; MP-24; MP-25; MP-26; MP-27	8
E2E-07	Assessment-to-Evaluation	Root / Master Chain	Measure training effectiveness and skill progression	MP-09; MP-10; MP-20	8
E2E-08	Learning-to-ROI	Partition of E2E-07	Validate ROI and business impact	MP-09; MP-10; MP-18; MP-32	7
E2E-09	Compliance-to-Certification	Root / Master Chain	Ensure compliant workforce with valid certifications	MP-14; MP-07; MP-09; MP-10	7
E2E-10	Talent-to-Mobility	Root / Master Chain	Enable internal mobility and career progression	MP-13; MP-31; MP-02; MP-08	8
E2E-11	Onboarding-to-Productivity	Root / Master Chain	Accelerate time-to-productivity	MP-35; MP-07; MP-08; MP-13	7
E2E-12	Knowledge-Capture-to-Transfer	Root / Master Chain	Capture and transfer institutional knowledge	MP-34; MP-12; MP-33; MP-06	7
E2E-13	Content-Curate-to-Retire	Partition of E2E-05	Publish, maintain, retire content	MP-06; MP-29; MP-33	7
E2E-14	Extended-Enterprise-Training	Root / Master Chain	Certify partners and train customers	MP-22; MP-07; MP-14; MP-18	7
E2E-15	Data-AI-Integration	Root / Enabler	Govern data, AI, integrations	MP-16; MP-17; MP-10; MP-24; MP-28	7
E2E-16	Vendor-to-Finance	Partition of E2E-15	Manage vendors from selection to payment	MP-15; MP-18; MP-11	6

ID	Name	Type	Goal	Related MPs	Steps
E2E-17	Change-to-Adoption	Root / Enabler	Drive sustained adoption and culture change	MP-19; MP-12; MP-08; MP-26	7
E2E-18	Quality-Risk-Improvement	Root / Enabler	Improve processes and mitigate risk	MP-20; MP-16; MP-17; MP-09	7
E2E-19	Consulting Engagement-to-Closure	Root (Consulting)	Manage full consulting engagement lifecycle	MP-36; MP-01; MP-19; MP-20	9
E2E-20	Multi-Axis Diagnostic-to-Maturity Report	Root (Diagnostic)	Conduct 5-axis diagnostic + CMM maturity + leadership assessment	MP-37; MP-38; MP-42; MP-02; MP-03	10
E2E-21	Previous Plan Impact-to-Strategy Update	Root	Evaluate N-1 plan impact and update strategy	MP-39; MP-09; MP-32; MP-01; MP-04	8
E2E-22	Multi-Site Plan-to-Deployment	Partition of E2E-03	Adapt and deploy plans across sites	MP-40; MP-04; MP-07; MP-11; MP-23	8
E2E-23	Regulatory Submission-to-Validation	Root	Submit and validate training plans with regulatory bodies	MP-41; MP-14; MP-18; MP-20	7
E2E-24	Competitive Intelligence-to-Strategy	Root (Strategic)	Analyze external environment and feed L&D strategy	MP-43; MP-01; MP-37; MP-04	7
E2E-25	Job Architecture-to-Competency Map	Root (Organizational)	Manage organizational charts, position descriptions, gap analysis	MP-44; MP-02; MP-13; MP-37	8
E2E-26	GPEC-to-Training Plan	Root (HR Integration)	Integrate Forward Planning of Jobs and Skills into L&D	MP-45; MP-13; MP-04; MP-03; MP-18	8
E2E-27	Demand Collection-to-Consolidation	Root (Demand)	Collect individual and collective training demands	MP-46; MP-03; MP-04; MP-08	7
E2E-28	Performance Assessment-to-RAG Dashboard	Root (Performance)	Assess MS/MO/OP performance with RAG ratings	MP-47; MP-10; MP-37; MP-04	7
E2E-29	Functional SWOT-to-Improvement Axes	Root (Diagnostic)	Conduct function-level SWOT and define improvement axes	MP-48; MP-37; MP-04; MP-20	7
E2E-30	Prioritization-to-Resource Plan	Root (Planning)	Prioritize themes and plan days, groups, trainers, budget	MP-49; MP-04; MP-18; MP-11; MP-07	7
E2E-31	Engagement-to-Roadmap	Root (Roadmap)	Define post-engagement roadmap and continuous improvement	MP-50; MP-36; MP-19; MP-12; MP-16	8
E2E-32	Scope-of-Work-to-Engineering-Plan	Root — Strategic	Define and approve the structured scope of work and stakeholder register	MP-53; MP-01; MP-44; MP-45; MP-03	9

ID	Name	Type	Goal	Related MPs	Steps
E2E-33	Questionnaire-to-Response-Collection	Root — Diagnostic	Design, distribute and collect questionnaire responses across channels	MP-54; MP-03; MP-37; MP-46	12

Table 2.2 — The 33 end-to-end processes, their type, goal, related macro processes, and number of user-facing steps.

2.3 Composite Chains

ID	Name	Orchestrates	Macro processes	Steps
E2E-COMP-01	Learning Lifecycle Composite	E2E-01 → E2E-08	MP-01 to MP-10	60+
E2E-COMP-02	Talent Development Composite	E2E-10, E2E-11, E2E-12	MP-13, MP-31, MP-35, MP-34, MP-12, MP-33	22
E2E-COMP-03	Enterprise Governance Composite	E2E-15 → E2E-18	MP-15 to MP-20	27
E2E-COMP-04	Consulting & Diagnostic Composite	E2E-19, E2E-20, E2E-21, E2E-23	MP-36 to MP-42	34
E2E-COMP-05	Strategic & Organizational Composite	E2E-24 → E2E-31	MP-43 to MP-50	59
E2E-COMP-06	Scope & Questionnaire Composite	E2E-32, E2E-33	MP-53, MP-54	21

Table 2.3 — Composite chains. E2E-COMP-06 is new in version 5.0; E2E-COMP-05 is unchanged.

SECTION 3

3. Glossary of French-to-English Terms

3.1 GPEC — Translation and Definition

GPEC is a French acronym that stands for *Gestion Prévisionnelle des Emplois et des Compétences*, translated as **Forward Planning of Jobs and Skills**.

Alternative English translations

English translation	Usage context
Forward Planning of Jobs and Skills	Most accurate and complete translation
Strategic Workforce Planning	Common in Anglo-Saxon HR literature
Human Resource Planning	Broader HR term
Manpower Planning	Older terminology
Jobs and Skills Forecasting	Focus on the forecasting dimension

Definition

GPEC (Forward Planning of Jobs and Skills) is a strategic HR management approach that anticipates future workforce needs by analyzing four elements:

- **Jobs (Emplois)** — current and future positions required by the organization.
- **Skills (Compétences)** — current and future competencies required to perform those jobs.
- **Gaps** — the difference between current capabilities and future requirements.
- **Actions** — recruitment, training, mobility, and development plans to close gaps.

Why GPEC matters for Training Engineering

GPEC is the bridge between HR strategy and Training Engineering. It ensures that training investments are aligned with future job requirements, career path development, succession planning, and organizational transformation.

3.2 Complete Glossary

French term	English translation
Ingénierie de Formation	Training Engineering
GPEC (Gestion Prévisionnelle des Emplois et des Compétences)	Forward Planning of Jobs and Skills
Fiche de poste	Position Description / Job Description
Organigramme	Organizational Chart
Axes d'amélioration	Improvement Axes
Management Stratégique (MS)	Strategic Management
Management Opérationnel (MO)	Operational Management
Opérationnel (OP)	Operational Level
Demande de formation	Training Request / Training Demand
Plan de formation	Training Plan
Répertoire Emplois et Compétences (REC)	Jobs and Skills Directory
Orientations GRH	HR Strategic Orientations
Socle de développement	Development Foundation

French term	English translation
Chemin de carrière	Career Path
Évaluation périodique	Periodic Evaluation / Performance Review
Rémunération collective	Collective Compensation
Gestion de changement	Change Management
Processus transverses	Cross-Functional Processes
Tableau de bord	Dashboard / Scorecard
Feuille de route	Roadmap
Rapport d'Ingénierie de Formation	Training Engineering Report
Échantillon	Sample
Entretien semi-directif	Semi-Structured Interview
PV de réunion	Meeting Minutes
Bon de commande	Purchase Order
Réunion Kickoff	Kickoff Meeting
Pilote / Copilote	Process Owner / Co-Owner
Comité de Pilotage	Steering Committee
Bilan d'impact	Impact Assessment
Forces de Porter	Porter's Five Forces
Concurrence directe	Direct Competition
Nouveaux entrants	New Entrants
Produits de substitution	Substitute Products
Pouvoir de négociation	Bargaining Power
Vert / Jaune / Rouge	Green / Amber / Red (RAG)
Excellence Opérationnelle	Operational Excellence
Lean Management	Lean Management
Méthode de résolution de problèmes	Problem-Solving Method
Métrologie Industrielle	Industrial Metrology
SMQ (Système de Management de la Qualité)	QMS (Quality Management System)
BPM (Business Process Management)	BPM (Business Process Management)
Système d'Information (SI)	Information System (IS/IT)
OFPPT	OFPPT (Moroccan Vocational Training Office)
GIAC-Agro	GIAC-Agro (Moroccan Interprofessional Group for Agro-Food)
HACCP	HACCP (Hazard Analysis Critical Control Point)
Périmètre de la mission / Cahier des charges	Scope of Work (SOW)
Parties prenantes	Stakeholders
Niveau de décision	Decision level (MS / MO / OP)
Questionnaire / Enquête	Questionnaire / Survey
Relance	Reminder
Taux de réponse	Response rate
Affectation des questions	Question assignment
Plan de canaux	Channel plan
Direction Générale (DG) / Encadrement / Collaborateur	Top management (DG) / Management / Member — the respondent populations

SECTION 4

4. Macro Processes Repository (MP-01 to MP-50, MP-53, MP-54)

4.1 Summary of All 52 Macro Processes

Each macro process belongs to one category. MP-04 is the flagship capability that produces the Training Engineering Report and Roadmap.

ID	Macro process name	Category
MP-01	Strategy & Governance Alignment	Foundation
MP-02	Skills & Competency Management	Foundation
MP-03	Needs Analysis & Diagnosis	Core
MP-04	**Training Engineering Report & Roadmap Elaboration**	Flagship
MP-05	Learning Design & Curriculum Engineering	Core
MP-06	Content & Resource Management	Core
MP-07	Learning Delivery & Implementation	Core
MP-08	Learner Experience & Engagement	Core
MP-09	Assessment & Evaluation	Core
MP-10	Reporting & Analytics	Core
MP-11	Administration & Operations	Operations
MP-12	Learning Culture & Knowledge Management	Culture
MP-13	Talent & Career Development	Talent
MP-14	Compliance & Certification Management	Compliance
MP-15	Vendor & Partner Ecosystem Management	Ecosystem
MP-16	Data, AI & Integration Governance	Governance
MP-17	Identity, Access & Security Management	Governance
MP-18	Financial & Budget Management	Governance
MP-19	Change Management & Adoption	Transformation
MP-20	Quality, Risk & Continuous Improvement	Governance
MP-21	Learning Support & Coaching	Support
MP-22	Extended Enterprise & External Training	Extended Enterprise
MP-23	Localization, Accessibility & Inclusion	Inclusion
MP-24	AI-Powered Personalization & Adaptive Learning	Innovation
MP-25	Microlearning & Learning in the Flow of Work	Innovation
MP-26	Social & Collaborative Learning Networks	Innovation
MP-27	Gamification & Engagement Mechanics	Innovation
MP-28	Predictive Learning Analytics & Intelligence	Innovation
MP-29	Content Curation & Aggregation Engine	Innovation
MP-30	Immersive Learning (VR/AR/Simulation)	Innovation
MP-31	Skills-Based Talent Marketplace & Internal Mobility	Innovation
MP-32	Learning ROI & Business Impact Measurement	Innovation
MP-33	User-Generated Content & Peer Knowledge Sharing	Innovation
MP-34	Expert Knowledge Capture & Transfer	Innovation
MP-35	Onboarding & Rapid Upskilling	Innovation
MP-36	Consulting Engagement Management	Consulting

ID	Macro process name	Category
MP-37	Multi-Axis Organizational Diagnostic	Consulting
MP-38	Organizational Maturity Assessment (CMM-Based)	Consulting
MP-39	Training Plan Impact Study (N-1)	Consulting
MP-40	Multi-Site / Multi-Entity Training Plan Deployment	Consulting
MP-41	External Training Plan Validation & Regulatory Compliance	Consulting
MP-42	Leadership Maturity Assessment & Development	Consulting
MP-43	Strategic & Competitive Intelligence	Strategic
MP-44	Job Architecture & Position Description Management	Strategic
MP-45	GPEC & HR Strategic Integration (Forward Planning of Jobs and Skills)	Strategic
MP-46	Training Demand Collection & Consolidation	Strategic
MP-47	Performance Level Assessment & Visualization (MS/MO/OP)	Strategic
MP-48	Functional SWOT & Improvement Axes Analysis	Strategic
MP-49	Training Plan Prioritization & Resource Planning	Strategic
MP-50	Post-Engagement Roadmap & Continuous Improvement	Strategic
MP-53	Scope of Work Definition & Management	Scope & Questionnaire
MP-54	Questionnaire Design, Distribution & Response Collection	Scope & Questionnaire

Table 4.1 — Macro process repository, grouped by category. MP-51 and MP-52 (administrative) are defined in the Deliverables Workbook.

4.2 Detailed SIPOC for Macro Processes MP-43 to MP-50, MP-53 and MP-54

The eight macro processes MP-43 to MP-50 were added in Version 3.0 to cover strategic and organizational excellence; MP-53 and MP-54 were added in Version 5.0 to cover Scope of Work and questionnaire management. Each is described with its SIPOC (Suppliers, Inputs, Process, Outputs, Customers).

MP-43: Strategic & Competitive Intelligence

Goals	Analyze the external business environment (competitive forces, market trends, regulatory changes, technological shifts) to inform training strategy and ensure L&D aligns with market realities.
Suppliers (S)	Executive leadership, strategy team, market research firms, industry associations, regulatory bodies, competitive intelligence tools
Inputs (I)	Porter's Five Forces data, market segmentation data, competitor analysis, industry benchmarks, regulatory updates, technology trends, customer insights
Process (P)	**1.** Define intelligence scope **2.** Conduct Porter's Five Forces analysis **3.** Map market segments **4.** Analyze competitor positioning **5.** Monitor regulatory changes **6.** Track technology trends **7.** Benchmark against industry **8.** Identify strategic implications for L&D **9.** Produce intelligence report **10.** Feed into strategy and diagnostic **11.** Update intelligence continuously **12.** Report to executive leadership
Outputs (O)	Competitive intelligence report, Porter's Five Forces analysis, market segment map, competitor benchmark, regulatory watch report, technology trend report, strategic implications for L&D

Customers (C)	Executive leadership, L&D strategists, business leaders, Steering Committee

MP-44: Job Architecture & Position Description Management

Goals	Design, maintain, and update the organization's job architecture (organizational charts, position descriptions, role profiles) and conduct gap analysis between existing descriptions and reality.
Suppliers (S)	HR teams, department heads, managers, job analysts, organizational design consultants
Inputs (I)	Organizational charts, existing position descriptions, role requirements, task inventories, competency models, regulatory requirements
Process (P)	**1.** Map organizational structure **2.** Design organizational charts **3.** Conduct job analysis **4.** Draft position descriptions **5.** Validate with managers **6.** Conduct gap analysis (existing vs. real) **7.** Identify roles to develop **8.** Update job architecture **9.** Align with competency framework **10.** Publish approved position descriptions **11.** Track job architecture changes **12.** Report on architecture health
Outputs (O)	Organizational charts, position descriptions, role profiles, gap analysis reports, roles-to-develop list, job architecture maps
Customers (C)	HR teams, managers, employees, L&D teams, recruiters, job analysts

MP-45: GPEC & HR Strategic Integration (Forward Planning of Jobs and Skills)

Goals	Integrate GPEC (Gestion Prévisionnelle des Emplois et des Compétences — Forward Planning of Jobs and Skills) and HR strategic orientations into the training engineering process to ensure L&D supports workforce planning and HR strategy.
Suppliers (S)	HR leadership, GPEC specialists, executive leadership, managers, employees
Inputs (I)	GPEC framework, HR strategic orientations, workforce plans, career path models, evaluation systems, compensation frameworks, Jobs and Skills Directory (REC)
Process (P)	**1.** Define GPEC scope **2.** Map HR strategic orientations **3.** Align training with GPEC **4.** Update development foundation (position descriptions, objectives, evaluation) **5.** Support human capital development **6.** Update Jobs and Skills Directory (REC) **7.** Redynamize periodic evaluations **8.** Design career paths **9.** Document career management process **10.** Implement collective compensation **11.** Feed GPEC into training needs **12.** Report on GPEC integration
Outputs (O)	GPEC integration report, updated Jobs and Skills Directory (REC), career path models, evaluation system updates, HR orientation alignment matrix, training-GPEC alignment report
Customers (C)	HR teams, L&D teams, managers, employees, executive leadership

MP-46: Training Demand Collection & Consolidation

Goals	Collect individual and collective training demands from all levels of the organization and consolidate them into a structured demand repository.

Suppliers (S)	Employees, managers, department heads, HR teams, L&D teams
Inputs (I)	Individual demand forms, collective demand forms, manager recommendations, function/position matrix, training catalog, Approved Scope of Work (MP-53), Consolidated Questionnaire Responses (MP-54)
Process (P)	**1.** Design demand collection forms **2.** Deploy individual demand collection **3.** Deploy collective demand collection **4.** Collect manager recommendations **5.** Consolidate demands by function **6.** Map demands to competencies **7.** Prioritize demands **8.** Validate with managers **9.** Integrate into needs analysis **10.** Report on demand patterns **11.** Track demand fulfillment **12.** Continuously improve collection
Outputs (O)	Individual demand repository, collective demand repository, consolidated demand matrix, demand prioritization report, demand fulfillment tracking
Customers (C)	Employees, managers, L&D teams, HR teams

MP-47: Performance Level Assessment & Visualization (MS/MO/OP)

Goals	Assess and visualize organizational performance across three management levels: Strategic Management (MS — Management Stratégique), Operational Management (MO — Management Opérationnel), and Operational Level (OP — Opérationnel), using a Green/Amber/Red (RAG) rating system.
Suppliers (S)	Executive leadership, managers, function heads, performance analysts
Inputs (I)	Performance data by function, MS/MO/OP framework, RAG criteria, KPI data, manager assessments
Process (P)	**1.** Define MS/MO/OP framework **2.** Define RAG criteria **3.** Collect performance data by function **4.** Assess MS performance **5.** Assess MO performance **6.** Assess OP performance **7.** Apply RAG ratings **8.** Visualize performance dashboards **9.** Identify performance gaps **10.** Feed into diagnostic report **11.** Track performance progression **12.** Report to leadership
Outputs (O)	MS/MO/OP performance assessment, RAG dashboards, performance gap analysis, function-level performance reports
Customers (C)	Executive leadership, function heads, managers, L&D teams, Steering Committee

MP-48: Functional SWOT & Improvement Axes Analysis

Goals	Conduct SWOT (Strengths, Weaknesses, Opportunities, Threats) analysis at the function/department level and define improvement axes for each function.
Suppliers (S)	Function heads, managers, employees, subject matter experts, external benchmarks
Inputs (I)	Function-level data, interview data, performance data, process documentation, best practices

Process (P)	**1.** Define function scope **2.** Conduct function SWOT **3.** Identify strengths **4.** Identify weaknesses **5.** Identify opportunities **6.** Identify threats **7.** Define improvement axes **8.** Validate with function heads **9.** Prioritize improvement axes **10.** Feed into diagnostic report **11.** Track improvement implementation **12.** Report on function performance
Outputs (O)	Functional SWOT reports, improvement axes per function, prioritized improvement plans, function diagnostic summaries
Customers (C)	Function heads, managers, L&D teams, executive leadership, Steering Committee

MP-49: Training Plan Prioritization & Resource Planning

Goals	Prioritize training themes and plan resources (days per theme, number of groups, trainers, budget) for the training plan.
Suppliers (S)	L&D teams, finance, function heads, training providers, managers
Inputs (I)	Identified training themes, competency gaps, budget constraints, trainer availability, learner availability
Process (P)	**1.** Consolidate training themes **2.** Define prioritization criteria **3.** Prioritize themes **4.** Estimate days per theme **5.** Define number of groups per theme **6.** Allocate trainers **7.** Estimate budget **8.** Sequence delivery **9.** Validate with governance **10.** Publish prioritized plan **11.** Track plan execution **12.** Report on resource utilization
Outputs (O)	Prioritized training plan, days per theme, group planning, trainer allocation, budget estimate, delivery sequence
Customers (C)	L&D teams, finance, function heads, managers, executive leadership

MP-50: Post-Engagement Roadmap & Continuous Improvement

Goals	Define the long-term roadmap beyond the current training engineering engagement, including future missions, organizational optimization, and continuous improvement.
Suppliers (S)	Executive leadership, L&D teams, HR teams, consultants, function heads
Inputs (I)	Current engagement deliverables, strategic orientations, SWOT findings, HR orientations, employee recommendations, market best practices

Process (P)	**1.** Consolidate engagement findings **2.** Define future perspectives **3.** Plan One-to-One coaching **4.** Plan organizational optimization **5.** Plan IS rehabilitation/reengineering **6.** Define KPIs and dashboards **7.** Prioritize future missions **8.** Validate with leadership **9.** Publish roadmap **10.** Track roadmap execution **11.** Continuously improve roadmap **12.** Report on roadmap progress
Outputs (O)	Post-engagement roadmap, future mission plans, One-to-One coaching plan, organizational optimization plan, IS rehabilitation plan, KPI framework
Customers (C)	Executive leadership, L&D teams, HR teams, function heads, Steering Committee

MP-53: Scope of Work Definition & Management

Goals	Define and approve the structured scope of a training engineering engagement — organizational frame, sector, decision levels, functions, focus and custom criteria — and identify the stakeholders who will respond to questionnaires.
Suppliers (S)	Executive leadership, HR Director, Head of L&D, Consultant PM, function heads, HR business partners
Inputs (I)	Engagement request or annual plan cycle, Group and Organization structure, sector reference list, MS/MO/OP decision-level framework, functions from the job architecture (MP-44), strategic objectives (MP-01), GPEC orientations (MP-45), employee directory (HRIS)
Process (P)	**1.** Define scope frame (Group Yes/No) **2.** Select Organization **3.** Select sector **4.** Select decision level (MS/MO/OP/Custom) **5.** Map functions × decision level **6.** Select focus (All/Digital/AI/Custom) **7.** Add custom criteria **8.** Identify stakeholders **9.** Validate scope **10.** Approve scope **11.** Publish scope **12.** Track scope changes
Outputs (O)	Approved Scope of Work (SOW document), scope criteria matrix (functions × decision levels), focus definition, custom criteria register, stakeholder register, scope change log
Customers (C)	Head of L&D, L&D Analyst, Consultant PM, HR Director, Steering Committee, questionnaire design (MP-54), needs analysis (MP-03)

MP-54: Questionnaire Design, Distribution & Response Collection

Goals	Design questionnaires tailored to the focus and sector of the approved Scope of Work, allocate RACSI, distribute them across channels, and collect, validate and consolidate responses into a dataset that feeds needs analysis, diagnostic and the Training Engineering Report.
Suppliers (S)	L&D Analyst, Head of L&D, Consultant PM, instructional designers, Survey Administrator, stakeholders (respondents), AI Assistant, external survey platforms (INT-SUR-01)
Inputs (I)	Approved Scope of Work and stakeholder register (MP-53), questionnaire template library (focus All/Digital/AI/Custom, sector), AI generation prompts, RACSI roles, channel configuration (Face-to-Face, Email, WhatsApp, Application, Combination), respondent populations (DG, Management, Member), consent policy

Process (P)	**1.** Select template by focus **2.** Elaborate questionnaire (Load / AI / Manual) **3.** Tailor to sector and focus **4.** Allocate RACSI and assign questions to respondents **5.** Select distribution channels **6.** Distribute **7.** Send reminders **8.** Collect responses **9.** Validate completeness **10.** Consolidate **11.** Check consent **12.** Feed to needs analysis, diagnostic and report
Outputs (O)	Validated questionnaire(s), RACSI allocation per section, respondent assignment per section, sub-section or question, distribution log per channel, reminder log, consolidated questionnaire response dataset, response-rate and engagement report
Customers (C)	Needs analysis (MP-03), multi-axis diagnostic (MP-37), demand collection (MP-46), Training Engineering Report (MP-04), Head of L&D, Consultant PM

4.3 New Inputs to Existing Macro Processes

The outputs of MP-53 and MP-54 become inputs of three existing macro processes. Their SIPOC inputs are extended as follows:

MP ID	Macro process	New inputs (Version 5.0)	Supplied by
MP-03	Needs Analysis & Diagnosis	Approved Scope of Work; Consolidated Questionnaire Responses	MP-53; MP-54
MP-37	Multi-Axis Organizational Diagnostic	Approved Scope of Work; Consolidated Questionnaire Responses	MP-53; MP-54
MP-46	Training Demand Collection & Consolidation	Approved Scope of Work; Consolidated Questionnaire Responses	MP-53; MP-54

Table 4.3 — Inputs added to existing macro processes.

SECTION 5

5. Chain Relationships Between End-to-End Processes

End-to-end processes rarely stand alone. Each one either starts a value stream (root), refines part of another (partition), orchestrates a group (composite), or supports the rest (enabler). This section shows who consumes whose output.

5.1 Chain Dependency Diagram

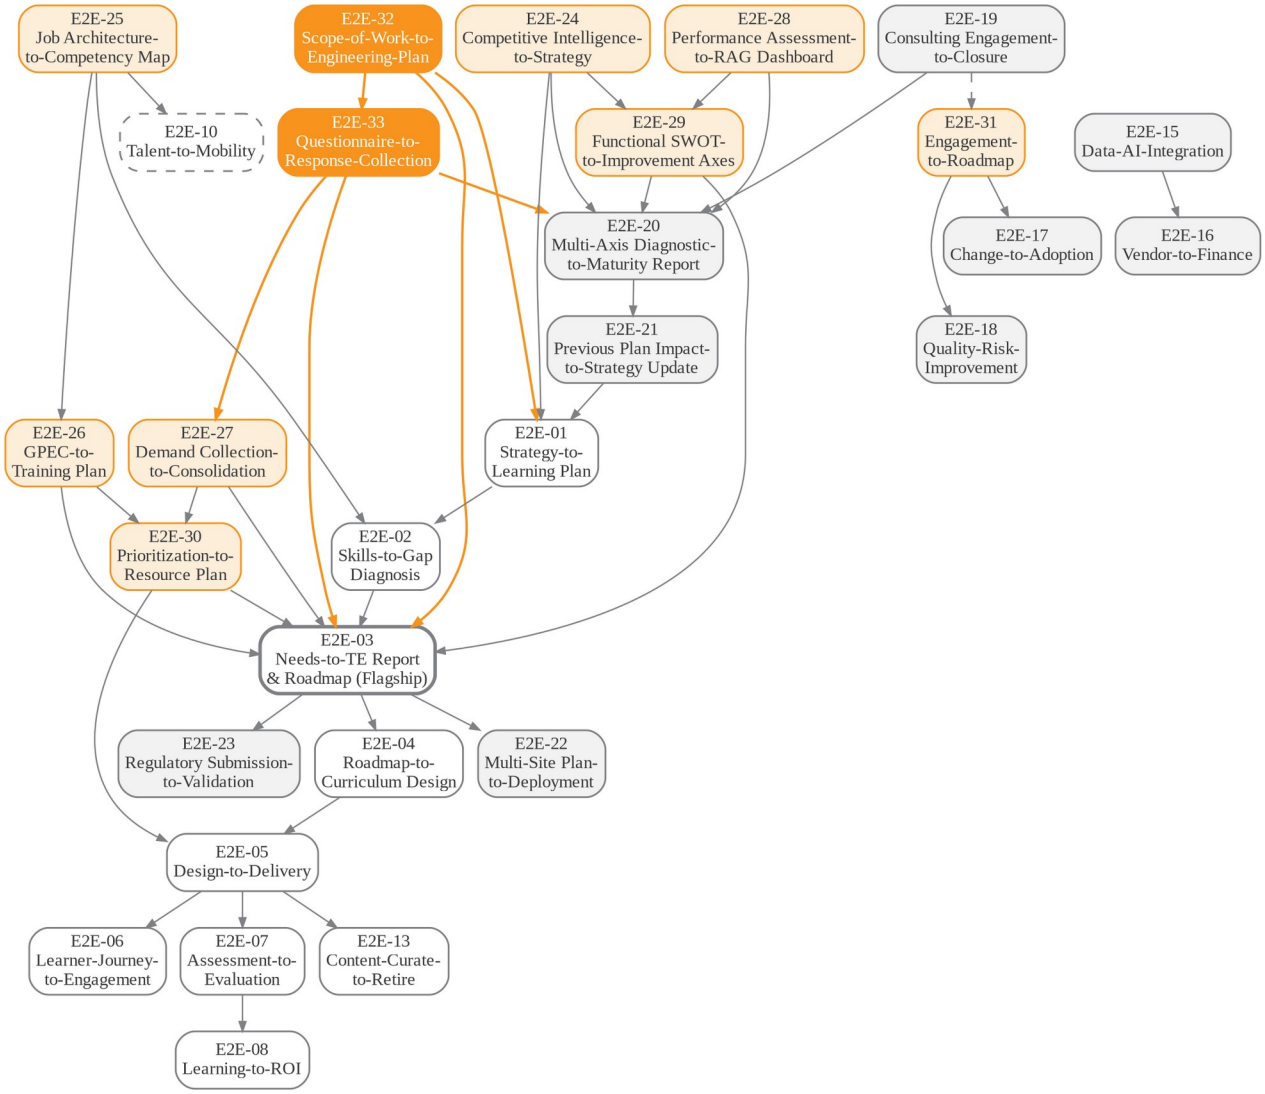

Figure 5.1 — Main dependency chains. Orange-tint boxes: Strategic & Organizational layer; grey boxes: Consulting layer and enablers; white boxes: Core layer; orange boxes: Scope & Questionnaire layer (new in v5.0). Dashed arrow: E2E-31 starts at the closure of E2E-19.

Five parallel roots — E2E-09 Compliance-to-Certification, E2E-10 Talent-to-Mobility, E2E-11 Onboarding-to-Productivity, E2E-12 Knowledge-Capture-to-Transfer, and E2E-14 Extended-Enterprise-Training — run alongside the core chain. E2E-15 Data-AI-Integration (with its partition E2E-16 Vendor-to-Finance) supports every process.

Reading the chain in layers

- **Strategic & Organizational layer:** E2E-24 feeds E2E-01, E2E-20 and E2E-29. E2E-25 feeds E2E-02, E2E-10 and E2E-26; E2E-26 then feeds E2E-03 and E2E-30. E2E-27 feeds E2E-03 and

E2E-30. E2E-28 feeds E2E-20 and E2E-29; E2E-29 feeds E2E-20 and E2E-03. E2E-30 feeds E2E-03 and E2E-05. E2E-31 feeds E2E-17 and E2E-18.

- **Scope & Questionnaire layer (v5.0):** E2E-32 feeds E2E-33, E2E-03 and E2E-01. E2E-33 consumes E2E-32 and feeds E2E-03, E2E-20 and E2E-27.
- **Consulting layer:** E2E-19 → E2E-20 → E2E-21 → E2E-01 → E2E-02 → E2E-03 (flagship), which branches to E2E-04, E2E-22 and E2E-23.
- **Core layer:** E2E-04 → E2E-05, which branches to E2E-06, E2E-13 and E2E-07; E2E-07 → E2E-08.
- **Enablers:** E2E-15 (with E2E-16), E2E-17 and E2E-18.

5.2 Chain Relationship Table

E2E ID	Relationship type	Related to	Steps in chain
E2E-01	Root	—	8
E2E-02	Partition of	E2E-01	7
E2E-03	Root (Flagship)	Consumes output of E2E-02	10
E2E-04	Partition of	E2E-03	8
E2E-05	Root	Consumes output of E2E-04	9
E2E-06	Partition of	E2E-05	8
E2E-07	Root	Consumes output of E2E-05	8
E2E-08	Partition of	E2E-07	7
E2E-09	Root	Parallel to E2E-05 and E2E-07	7
E2E-10	Root	Consumes output of E2E-02 and E2E-06	8
E2E-11	Root	Consumes output of E2E-04 and E2E-05	7
E2E-12	Root	Feeds into E2E-13 and E2E-06	7
E2E-13	Partition of	E2E-05	7
E2E-14	Root	Consumes output of E2E-05 and E2E-09	7
E2E-15	Root / Enabler	Supports all E2E processes	7
E2E-16	Partition of	E2E-15	6
E2E-17	Root / Enabler	Supports E2E-01, E2E-05, E2E-06	7
E2E-18	Root / Enabler	Supports E2E-03, E2E-07, E2E-09	7
E2E-19	Root (Consulting)	Triggers E2E-20; Feeds into E2E-03	9
E2E-20	Root (Diagnostic)	Feeds into E2E-03 and E2E-21	10
E2E-21	Root	Consumes E2E-20; Feeds into E2E-01 and E2E-03	8
E2E-22	Partition of E2E-03	Consumes E2E-03; Feeds into E2E-05	8
E2E-23	Root (Regulatory)	Consumes E2E-03; Feeds into E2E-05	7
E2E-24	Root (Strategic)	Feeds into E2E-01, E2E-20, E2E-29	7
E2E-25	Root (Organizational)	Feeds into E2E-02, E2E-10, E2E-26	8
E2E-26	Root (HR Integration)	Consumes E2E-25; Feeds into E2E-03 and E2E-30	8
E2E-27	Root (Demand)	Feeds into E2E-03 and E2E-30	7
E2E-28	Root (Performance)	Feeds into E2E-20 and E2E-29	7
E2E-29	Root (Diagnostic)	Consumes E2E-24 and E2E-28; Feeds into E2E-20 and E2E-03	7
E2E-30	Root (Planning)	Consumes E2E-26, E2E-27, E2E-29; Feeds into E2E-03 and E2E-05	7
E2E-31	Root (Roadmap)	Consumes E2E-19; Feeds into E2E-17 and E2E-18	8

E2E ID	Relationship type	Related to	Steps in chain
E2E-32	Root — Strategic	Feeds into E2E-33, E2E-03, E2E-01	9
E2E-33	Root — Diagnostic	Consumes E2E-32; Feeds into E2E-03, E2E-20, E2E-27	12
E2E-COMP-01	Composite	E2E-01 → E2E-08	60+
E2E-COMP-02	Composite	E2E-10, E2E-11, E2E-12	22
E2E-COMP-03	Composite	E2E-15 → E2E-18	27
E2E-COMP-04	Composite	E2E-19, E2E-20, E2E-21, E2E-23	34
E2E-COMP-05	Composite	E2E-24 → E2E-31	59
E2E-COMP-06	Composite	E2E-32, E2E-33	21

SECTION 6

6. User-Facing Flow

Users do not think in process IDs. The table below starts from what a user wants to do and points to the macro process that provides the capability and the end-to-end process that runs it.

6.1 User-Facing Step Mapping

User-facing step	Internal macro process(es)	Represented by (E2E)
Define scope of work	MP-53 Scope of Work Definition & Management	E2E-32 Scope-of-Work-to-Engineering-Plan
Design, distribute and collect questionnaires	MP-54 Questionnaire Design, Distribution & Response Collection	E2E-33 Questionnaire-to-Response-Collection
Analyze external environment	MP-43 Strategic & Competitive Intelligence	E2E-24 Competitive Intelligence-to-Strategy
Manage organizational charts and position descriptions	MP-44 Job Architecture & Position Description Management	E2E-25 Job Architecture-to-Competency Map
Integrate GPEC (Forward Planning of Jobs and Skills) and HR strategy	MP-45 GPEC & HR Strategic Integration	E2E-26 GPEC-to-Training Plan
Collect training demands	MP-46 Training Demand Collection & Consolidation	E2E-27 Demand Collection-to-Consolidation
Assess MS/MO/OP performance	MP-47 Performance Level Assessment & Visualization	E2E-28 Performance Assessment-to-RAG Dashboard
Conduct functional SWOT	MP-48 Functional SWOT & Improvement Axes	E2E-29 Functional SWOT-to-Improvement Axes
Prioritize training plan	MP-49 Training Plan Prioritization & Resource Planning	E2E-30 Prioritization-to-Resource Plan
Define post-engagement roadmap	MP-50 Post-Engagement Roadmap	E2E-31 Engagement-to-Roadmap
Engage consulting firm	MP-36 Consulting Engagement Management	E2E-19 Consulting Engagement-to-Closure
Conduct organizational diagnostic	MP-37; MP-38; MP-42	E2E-20 Multi-Axis Diagnostic-to-Maturity Report
Evaluate previous year's plan	MP-39 Training Plan Impact Study (N-1)	E2E-21 Previous Plan Impact-to-Strategy Update
Define strategy and budget	MP-01; MP-18	E2E-01 Strategy-to-Learning Plan
Assess skills and diagnose gaps	MP-02; MP-03	E2E-02 Skills-to-Gap Diagnosis
Generate Training Engineering Report	MP-04	E2E-03 Needs-to-Training Engineering Report & Roadmap
Approve training roadmap	MP-04; MP-01; MP-18	E2E-03
Design curriculum and learning paths	MP-05; MP-23	E2E-04 Roadmap-to-Curriculum Design
Adapt plan per site	MP-40 Multi-Site Deployment	E2E-22 Multi-Site Plan-to-Deployment
Submit to regulatory bodies	MP-41 External Training Plan Validation	E2E-23 Regulatory Submission-to-Validation
Develop and publish content	MP-06	E2E-04
Deliver training	MP-07; MP-11	E2E-05 Design-to-Delivery
Engage learners	MP-08; MP-24; MP-27	E2E-06 Learner-Journey-to-Engagement
Assess and evaluate	MP-09; MP-10	E2E-07 Assessment-to-Evaluation
Measure ROI	MP-32; MP-18	E2E-08 Learning-to-ROI

User-facing step	Internal macro process(es)	Represented by (E2E)
Ensure compliance	MP-14	E2E-09 Compliance-to-Certification
Develop talent and career	MP-13; MP-31	E2E-10 Talent-to-Mobility
Onboard and upskill	MP-35	E2E-11 Onboarding-to-Productivity
Capture and transfer knowledge	MP-34; MP-12	E2E-12 Knowledge-Capture-to-Transfer
Curate and retire content	MP-29; MP-06	E2E-13 Content-Curate-to-Retire
Train external audiences	MP-22	E2E-14 Extended-Enterprise-Training
Govern data and AI	MP-16; MP-17	E2E-15 Data-AI-Integration
Manage vendors and finance	MP-15; MP-18	E2E-16 Vendor-to-Finance
Manage change and adoption	MP-19; MP-12	E2E-17 Change-to-Adoption
Ensure quality and improvement	MP-20	E2E-18 Quality-Risk-Improvement

Table 6.1 — Everyday user steps mapped to macro processes and end-to-end processes.

SECTION 7

7. End-to-End Process Specifications

Scope of this section

Full specifications for E2E-01 through E2E-33 are part of the architecture. This section details the newest processes: E2E-24 to E2E-31, added in Version 3.0, and E2E-32 and E2E-33, added in Version 5.0. E2E-01 through E2E-23 follow the same structure and are documented in the platform's full repository.

Each specification follows the same five-part layout: an at-a-glance card, a short description, the user-facing tasks, the RACSI matrix, and the BPMN process flow.

END-TO-END PROCESS · E2E-24

E2E-24: Competitive Intelligence-to-Strategy

Trigger	Annual strategy cycle or executive request for market positioning analysis.
Terminal state	Validated competitive intelligence report feeding into L&D strategy and organizational diagnostic.
Feeds into	E2E-01, E2E-20, E2E-29
Supported by	E2E-15, E2E-18
Related macro processes	MP-43, MP-01, MP-37, MP-04
Related modules	M43 Competitive Intelligence Hub; M01 Strategy Console; M37 Diagnostic Studio; M04 Report & Roadmap Studio

Description

This root chain analyzes the external business environment using Porter's Five Forces, market segmentation, and competitor benchmarking. It produces strategic implications for L&D and feeds into the strategy, diagnostic, and functional SWOT processes.

User-facing tasks

Task ID	Task name	Description
UFT-24-01	Define intelligence scope	Define the external environment scope to analyze.
UFT-24-02	Conduct Porter's Five Forces	Analyze competitive forces.
UFT-24-03	Map market segments	Segment the market (e.g., Breeders, Resellers).
UFT-24-04	Analyze competitor positioning	Benchmark against competitors.
UFT-24-05	Monitor regulatory and technology trends	Track external changes.
UFT-24-06	Identify L&D implications	Translate intelligence into L&D implications.
UFT-24-07	Publish intelligence report	Distribute report to leadership.

RACSI matrix

Task ID	Responsible	Accountable	Consulted	Supported	Informed
UFT-24-01	Strategy Analyst	Head of Strategy	CEO	Analyst	CHRO
UFT-24-02	Strategy Analyst	Head of Strategy	Business Leaders	Analyst	CHRO
UFT-24-03	Market Analyst	Head of Strategy	Sales	Analyst	CHRO
UFT-24-04	Market Analyst	Head of Strategy	Sales	Analyst	CHRO
UFT-24-05	Regulatory Analyst	Head of Strategy	Legal	Analyst	CHRO
UFT-24-06	L&D Strategist	Head of L&D	Strategy	Analyst	CHRO
UFT-24-07	Strategy Analyst	Head of Strategy	Communication	Analyst	Executive Leadership

BPMN process flow

User-facing task	Input (supplier)	Sequential task	Step	Output (beneficiary)	MP	BPMN element
UFT-24-01 Define intelligence scope *Goal: Define scope*	Strategy docs *from Strategy Analyst*	**MP43-T01** Define intelligence scope	**S24-01** Define	Scope document *to CHRO*	MP-43	**Start Event**

User-facing task	Input (supplier)	Sequential task	Step	Output (beneficiary)	MP	BPMN element
UFT-24-02 Conduct Porter's Five Forces *Goal: Analyze forces*	Market data *from Strategy Analyst*	**MP43-T02** Conduct Porter's Five Forces	**S24-02** Analyze	Porter report *to CHRO*	MP-43	Task
UFT-24-03 Map market segments *Goal: Map segments*	Market data *from Market Analyst*	**MP43-T03** Map market segments	**S24-03** Map	Segment map *to Sales*	MP-43	Task
UFT-24-04 Analyze competitor positioning *Goal: Benchmark*	Competitor data *from Market Analyst*	**MP43-T04** Analyze competitor positioning	**S24-04** Analyze	Competitor benchmark *to CHRO*	MP-43	Task
UFT-24-05 Monitor regulatory and technology trends *Goal: Track trends*	Regulations *from Regulatory Analyst*	**MP43-T05** Monitor trends	**S24-05** Monitor	Trend report *to CHRO*	MP-43	Task
UFT-24-06 Identify L&D implications *Goal: Translate implications*	All findings *from L&D Strategist*	**MP43-T08** Identify L&D implications	**S24-06** Identify	L&D implications *to CHRO*	MP-43	Task
UFT-24-07 Publish intelligence report *Goal: Publish report*	All outputs *from Strategy Analyst*	**MP43-T09** Produce intelligence report	**S24-07** Publish	Intelligence report *to Executive Leadership*	MP-43	**End Event**

Table — BPMN flow for E2E-24: each user-facing task mapped to its sequential task, step, output, and BPMN element type.

END-TO-END PROCESS · E2E-25

E2E-25: Job Architecture-to-Competency Map

Trigger	Organizational change, new role creation, or annual job architecture review.
Terminal state	Approved organizational charts, position descriptions, and competency maps with gap analysis.
Feeds into	E2E-02, E2E-10, E2E-26
Supported by	E2E-15, E2E-18
Related macro processes	MP-44, MP-02, MP-13, MP-37
Related modules	M44 Job Architecture Hub; M02 Skills Hub; M13 Career Center; M37 Diagnostic Studio

Description

This root chain manages the organization's job architecture (organizational charts, position descriptions, role profiles), conducts gap analysis between existing descriptions and reality, and aligns the architecture with the competency framework.

User-facing tasks

Task ID	Task name	Description
UFT-25-01	Map organizational structure	Map the current organizational structure.
UFT-25-02	Design organizational charts	Create organizational charts per function.
UFT-25-03	Conduct job analysis	Analyze tasks and roles.
UFT-25-04	Draft position descriptions	Draft position descriptions (fiches de poste).
UFT-25-05	Validate with managers	Validate descriptions with managers.
UFT-25-06	Conduct gap analysis	Compare existing vs. real descriptions.
UFT-25-07	Identify roles to develop	Flag roles marked "To develop."
UFT-25-08	Publish approved architecture	Publish approved organizational charts and descriptions.

RACSI matrix

Task ID	Responsible	Accountable	Consulted	Supported	Informed
UFT-25-01	HR Analyst	HR Director	Executive Leadership	Analyst	CHRO
UFT-25-02	Org Design Consultant	HR Director	Function Heads	Analyst	CHRO
UFT-25-03	Job Analyst	HR Director	Managers	Analyst	CHRO

UFT-25-07 Identify roles to develop *Goal: Identify roles*	Gap analysis *from HR Business Partner*	**MP44-T07** Identify roles to develop	**S25-07** Identify	Roles to develop *to CHRO*	MP-44	Task
UFT-25-08 Publish approved architecture *Goal: Publish architecture*	All outputs *from HR Director*	**MP44-T10** Publish approved architecture	**S25-08** Publish	Approved architecture *to All Employees*	MP-44	**End Event**

Table — BPMN flow for E2E-25: each user-facing task mapped to its sequential task, step, output, and BPMN element type.

END-TO-END PROCESS · E2E-26

E2E-26: GPEC-to-Training Plan (Forward Planning of Jobs and Skills)

Trigger	Annual HR strategic planning cycle or GPEC (Forward Planning of Jobs and Skills) review.
Terminal state	Training plan aligned with GPEC and HR strategic orientations.
Consumes	E2E-25
Feeds into	E2E-03, E2E-30
Supported by	E2E-15, E2E-18
Related macro processes	MP-45, MP-13, MP-04, MP-03, MP-18
Related modules	M45 GPEC Hub; M13 Career Center; M04 Report & Roadmap Studio; M03 Needs Analyzer; M18 Finance Console

Description

This root chain integrates GPEC (Gestion Prévisionnelle des Emplois et des Compétences — Forward Planning of Jobs and Skills) and HR strategic orientations into the training engineering process. It ensures L&D supports workforce planning, career paths, and HR strategy.

User-facing tasks

Task ID	Task name	Description
UFT-26-01	Define GPEC scope	Define the Forward Planning of Jobs and Skills scope.
UFT-26-02	Map HR strategic orientations	Map HR strategic orientations.
UFT-26-03	Update development foundation	Update development foundation (position descriptions, objectives, evaluation).
UFT-26-04	Update Jobs and Skills Directory (REC)	Update the Jobs and Skills Directory.
UFT-26-05	Redynamize periodic evaluations	Redynamize periodic evaluations.
UFT-26-06	Design career paths	Design career paths.
UFT-26-07	Document career management	Document the career management process.
UFT-26-08	Align training with GPEC	Align training plan with GPEC outcomes.

RACSI matrix

Task ID	Responsible	Accountable	Consulted	Supported	Informed
UFT-26-01	GPEC Specialist	HR Director	Executive Leadership	Analyst	CHRO
UFT-26-02	HR Director	CHRO	Executive Leadership	Analyst	Board
UFT-26-03	HR Business Partner	HR Director	Managers	HR Ops	Employees
UFT-26-04	GPEC Specialist	HR Director	Managers	HR Ops	CHRO
UFT-26-05	HR Business Partner	HR Director	Managers	HR Ops	Employees
UFT-26-06	HR Director	CHRO	Managers	Analyst	Employees
UFT-26-07	HR Director	CHRO	Legal	Analyst	CHRO
UFT-26-08	L&D Strategist	Head of L&D	HR Director	Analyst	CHRO

BPMN process flow

User-facing task	Input (supplier)	Sequential task	Step	Output (beneficiary)	MP	BPMN element
UFT-26-01 Define GPEC scope *Goal: Define scope*	HR strategy *from GPEC Specialist*	**MP45-T01** Define GPEC scope	**S26-01** Define	GPEC scope *to CHRO*	MP-45	**Start Event**

END-TO-END PROCESS · E2E-27

E2E-27: Demand Collection-to-Consolidation

Trigger	Annual training plan cycle or ad-hoc demand collection request.
Terminal state	Consolidated and prioritized demand repository integrated into the training needs analysis.
Feeds into	E2E-03, E2E-30
Related macro processes	MP-46, MP-03, MP-04, MP-08
Related modules	M46 Demand Collection Hub; M03 Needs Analyzer; M04 Report & Roadmap Studio; M08 Learner Portal

Description

This root chain collects individual and collective training demands from all levels of the organization and consolidates them into a structured demand repository. It is the bottom-up complement to the top-down needs analysis.

User-facing tasks

Task ID	Task name	Description
UFT-27-01	Design demand collection forms	Create individual and collective forms.
UFT-27-02	Deploy individual demand collection	Launch individual demand collection.
UFT-27-03	Deploy collective demand collection	Launch collective demand collection.
UFT-27-04	Collect manager recommendations	Gather manager recommendations.
UFT-27-05	Consolidate demands by function	Consolidate demands by function/position.
UFT-27-06	Map demands to competencies	Map demands to competency framework.
UFT-27-07	Prioritize and validate demands	Prioritize and validate with managers.

RACSI matrix

END-TO-END PROCESS · E2E-28

E2E-28: Performance Assessment-to-RAG Dashboard

Trigger	Annual performance cycle or management request for performance visualization.
Terminal state	Validated MS/MO/OP (Strategic Management / Operational Management / Operational Level) performance assessment with RAG (Green/Amber/Red) dashboards.
Feeds into	E2E-20, E2E-29
Supported by	E2E-15, E2E-18
Related macro processes	MP-47, MP-10, MP-37, MP-04
Related modules	M47 Performance Assessment Hub; M10 Analytics Dashboard; M37 Diagnostic Studio; M04 Report & Roadmap Studio

Description

This root chain assesses and visualizes organizational performance across three management levels — Strategic Management (MS), Operational Management (MO), and Operational Level (OP) — using a Green/Amber/Red (RAG) rating system. It feeds into the multi-axis diagnostic and functional SWOT.

User-facing tasks

Task ID	Task name	Description
UFT-28-01	Define MS/MO/OP framework	Define the three management levels.
UFT-28-02	Define RAG criteria	Define Green/Amber/Red criteria.
UFT-28-03	Collect performance data by function	Gather data by function.
UFT-28-04	Assess MS performance	Assess Strategic Management performance.
UFT-28-05	Assess MO performance	Assess Operational Management performance.
UFT-28-06	Assess OP performance	Assess Operational Level performance.
UFT-28-07	Publish RAG dashboard	Publish the RAG visualization.

END-TO-END PROCESS · E2E-29

E2E-29: Functional SWOT-to-Improvement Axes

Trigger	Diagnostic phase of a training engineering engagement or annual functional review.
Terminal state	Validated functional SWOT reports with prioritized improvement axes per function.
Consumes	E2E-24, E2E-28
Feeds into	E2E-20, E2E-03
Supported by	E2E-18
Related macro processes	MP-48, MP-37, MP-04, MP-20
Related modules	M48 Functional SWOT Hub; M37 Diagnostic Studio; M04 Report & Roadmap Studio; M20 Quality Center

Description

This root chain conducts SWOT (Strengths, Weaknesses, Opportunities, Threats) analysis at the function/department level and defines improvement axes for each function. It feeds into the multi-axis diagnostic and the Training Engineering Report.

User-facing tasks

Task ID	Task name	Description
UFT-29-01	Define function scope	Define the function/department scope.
UFT-29-02	Conduct function SWOT	Conduct Strengths/Weaknesses/Opportunities/Threats analysis.
UFT-29-03	Identify strengths and weaknesses	Document internal factors.
UFT-29-04	Identify opportunities and threats	Document external factors.
UFT-29-05	Define improvement axes	Define improvement axes per function.
UFT-29-06	Validate with function heads	Validate with function leaders.
UFT-29-07	Prioritize improvement axes	Prioritize axes by impact.

RACSI matrix

END-TO-END PROCESS · E2E-30

E2E-30: Prioritization-to-Resource Plan

Trigger	Consolidated training themes requiring prioritization and resource planning.
Terminal state	Approved prioritized training plan with days per theme, group planning, trainer allocation, and budget.
Consumes	E2E-26, E2E-27, E2E-29
Feeds into	E2E-03, E2E-05
Supported by	E2E-16
Related macro processes	MP-49, MP-04, MP-18, MP-11, MP-07
Related modules	M49 Prioritization Hub; M04 Report & Roadmap Studio; M18 Finance Console; M11 Admin Console; M07 Delivery Center

Description

This root chain prioritizes training themes and plans resources (days per theme, number of groups, trainers, budget) for the training plan. It produces the "Plan de Formation Priorisé" (Prioritized Training Plan).

User-facing tasks

Task ID	Task name	Description
UFT-30-01	Consolidate training themes	Consolidate all identified themes.
UFT-30-02	Define prioritization criteria	Define criteria for prioritization.
UFT-30-03	Prioritize themes	Prioritize themes by impact.
UFT-30-04	Estimate days per theme	Estimate training days per theme.
UFT-30-05	Define groups per theme	Define number of groups per theme.
UFT-30-06	Allocate trainers and budget	Allocate trainers and budget.
UFT-30-07	Publish prioritized training plan	Publish the "Prioritized Training Plan."

Table — BPMN flow for E2E-30: each user-facing task mapped to its sequential task, step, output, and BPMN element type.

END-TO-END PROCESS · E2E-31

E2E-31: Engagement-to-Roadmap

Trigger	Closure of the current training engineering engagement (E2E-19).
Terminal state	Approved post-engagement roadmap with future missions and continuous improvement plan.
Consumes	E2E-19
Feeds into	E2E-17, E2E-18
Related macro processes	MP-50, MP-36, MP-19, MP-12, MP-16
Related modules	M50 Roadmap Hub; M36 Engagement Console; M19 Change Hub; M12 Community Hub; M16 Data Governance Console

Description

This root chain defines the long-term roadmap beyond the current training engineering engagement, including future missions (One-to-One coaching, organizational optimization, IS rehabilitation/reengineering), KPIs, and dashboards.

User-facing tasks

Task ID	Task name	Description
UFT-31-01	Consolidate engagement findings	Consolidate all engagement outputs.
UFT-31-02	Define future perspectives	Define future perspectives.
UFT-31-03	Plan One-to-One coaching	Plan One-to-One coaching for People Excellence.
UFT-31-04	Plan organizational optimization	Plan organizational optimization (charts, roles, descriptions, processes, KPIs).
UFT-31-05	Plan IS rehabilitation	Plan IS rehabilitation/reengineering.
UFT-31-06	Define KPIs and dashboards	Define KPI framework and dashboards.
UFT-31-07	Prioritize future missions	Prioritize future missions.
UFT-31-08	Publish roadmap	Publish the post-engagement roadmap.

END-TO-END PROCESS · E2E-32

E2E-32: Scope-of-Work-to-Engineering-Plan

Trigger	New training engineering engagement, annual plan cycle, or executive request.
Terminal state	Approved Scope of Work with criteria matrix and stakeholder register released to questionnaire design (E2E-33) and needs analysis (E2E-03).
Feeds into	E2E-33, E2E-03, E2E-01
Consumes	— (root chain; uses job architecture from E2E-25 and GPEC orientations from E2E-26 as reference data)
Supported by	E2E-15, E2E-18
Related macro processes	MP-53, MP-01, MP-44, MP-45, MP-03
Related modules	M53 Scope of Work Studio; M01 Strategy Console; M44 Job Architecture Hub; M45 GPEC Hub; M03 Needs Analyzer

Description

This root chain frames a training engineering engagement before any data is collected. It records whether the scope covers a Group or a single Organization, the sector, the decision levels (Strategic Management — MS, Operational Management — MO, Operational Level — OP, or a custom level), the functions in scope, the focus (all training needs, Digital, AI or custom) and any custom criteria. It then identifies the stakeholders who will respond, has the scope validated by the Head of L&D and approved by the HR Director or the Consultant PM, and publishes it to questionnaire design and needs analysis. Any change after approval requires re-validation.

User-facing tasks

Task ID	Task name	Description
UFT-32-01	Define scope frame	Choose Group scope (Yes/No) and select the Organization(s) in scope.
UFT-32-02	Select sector	Select the sector from the reference list.
UFT-32-03	Select decision levels	Select MS, MO, OP and/or a named custom level.
UFT-32-04	Map functions × decision levels	Build the scope criteria matrix from the job architecture.
UFT-32-05	Select focus and add custom criteria	Select All, Digital, AI or Custom focus; add weighted custom criteria.
UFT-32-06	Identify stakeholders	Register respondents with role, function, decision level, site and preferred channel.
UFT-32-07	Validate scope	Check completeness and coverage of the scope.
UFT-32-08	Approve scope	HR Director or Consultant PM approves the Scope of Work.
UFT-32-09	Publish scope and register stakeholders	Generate the SOW document and release scope and stakeholders downstream.

RACSI matrix

Task ID	Responsible	Accountable	Consulted	Supported	Informed

END-TO-END PROCESS · E2E-33

E2E-33: Questionnaire-to-Response-Collection

Trigger	An approved Scope of Work becomes available (end of E2E-32).
Terminal state	Consolidated, validated questionnaire response dataset feeding needs analysis (E2E-03), diagnostic (E2E-20) and demand collection (E2E-27).
Consumes	E2E-32
Feeds into	E2E-03, E2E-20, E2E-27
Supported by	E2E-15, E2E-18
Related macro processes	MP-54, MP-03, MP-37, MP-46
Related modules	M54 Questionnaire Studio; M03 Needs Analyzer; M37 Diagnostic Studio; M46 Demand Collection Hub

Description

This root chain turns the approved Scope of Work into evidence. The L&D Analyst selects a template by focus and sector and elaborates the questionnaire by loading a template, generating questions with AI, or writing them manually; every AI-generated or AI-tailored question is validated by a human before distribution. RACSI roles are allocated to each section, with exactly one Accountable, and sections, sub-sections or single questions can be assigned to one or more respondents. The questionnaire is then distributed through the channel plan of each respondent (Face-to-Face, Email, WhatsApp, the Application, or a Combination played in sequence), reminders follow a per-channel cadence, and responses are collected — offline for Face-to-Face, with later synchronisation. No response is stored without consent. Complete responses are consolidated into a tenant-scoped dataset that feeds the needs analysis, the diagnostic and the Training Engineering Report.

User-facing tasks

Task ID	Task name	Description
UFT-33-01	Select questionnaire template	Select a template by focus and sector.
UFT-33-02	Elaborate questionnaire	Load a template, generate with AI, or write manually.
UFT-33-03	Tailor and validate content	Tailor wording to sector and focus; validate every AI-generated question.
UFT-33-04	Allocate RACSI	Assign R/A/C/S/I per section, with exactly one Accountable; assign sections, sub-sections or questions to one or more respondents.
UFT-33-05	Select distribution channels	Choose Face-to-Face, Email, WhatsApp, Application or a Combination per respondent population (DG, Management, Member).
UFT-33-06	Distribute questionnaire	Dispatch to stakeholders; every dispatch is logged.
UFT-33-07	Send reminders	Remind non-respondents on the channel cadence.
UFT-33-08	Collect responses	Collect online, or offline with later synchronisation.
UFT-33-09	Validate completeness	Compute completeness and flag incomplete responses.
UFT-33-10	Consolidate responses	Build the consolidated response dataset.
UFT-33-11	Check consent and release dataset	Confirm consent for every stored response; release the dataset to E2E-03, E2E-20 and E2E-27.
UFT-33-12	Report on response and engagement	Publish response rate, engagement rate and completeness by channel, focus and segment.

SECTION 8

8. Coverage Statement

8.1 Coverage Declaration

52 of 52 macro processes covered — 100%

All 52 macro processes (MP-01 through MP-50, MP-53 and MP-54) and all their related tasks (P.SIPOC) are entirely covered by the 33 end-to-end processes (E2E-01 through E2E-33) defined in this document.

8.2 Coverage Matrix

MP ID	Macro process name	Covered by E2E(s)	Status
MP-01	Strategy & Governance Alignment	E2E-01, E2E-03, E2E-19, E2E-24, E2E-32	**Full**

MP-47	Performance Level Assessment & Visualization (MS/MO/OP)	E2E-28	**Full**
MP-48	Functional SWOT & Improvement Axes Analysis	E2E-29	**Full**
MP-49	Training Plan Prioritization & Resource Planning	E2E-30	**Full**
MP-50	Post-Engagement Roadmap & Continuous Improvement	E2E-31	**Full**
MP-53	Scope of Work Definition & Management	E2E-32, E2E-03, E2E-20	**Full**
MP-54	Questionnaire Design, Distribution & Response Collection	E2E-33, E2E-03, E2E-27	**Full**

Table 8.2 — Coverage matrix. Green status cells indicate full coverage. Result: 52/52 macro processes = 100% coverage.

8.3 Task-Level Coverage Statement

Every task defined in the P.SIPOC of each macro process is executed within at least one Sequential Activity (Step ID) of at least one end-to-end process. No macro process task is orphaned. The BPMN Process Flow Tables for each E2E process explicitly map the following chain, which guarantees full traceability from user-facing steps down to individual macro process tasks:

User-Facing Task → Sequential Task ID → Sequential Activity (Step ID) → Macro Process

The statement holds for all 52 macro processes and all 33 end-to-end processes. The twelve SIPOC tasks of MP-53 (MP53-T01 to MP53-T12) are executed in steps S32-01 to S32-09 of E2E-32, and the twelve SIPOC tasks of MP-54 (MP54-T01 to MP54-T12) in steps S33-01 to S33-12 of E2E-33.

8.4 Composite Coverage

The six composite end-to-end processes provide orchestration-level coverage:

Composite	Orchestrates	Macro processes covered
E2E-COMP-01	E2E-01 → E2E-08	MP-01 to MP-10
E2E-COMP-02	E2E-10, E2E-11, E2E-12	MP-13, MP-31, MP-35, MP-34, MP-12, MP-33
E2E-COMP-03	E2E-15 → E2E-18	MP-15 to MP-20
E2E-COMP-04	E2E-19, E2E-20, E2E-21, E2E-23	MP-36 to MP-42
E2E-COMP-05	E2E-24 → E2E-31	MP-43 to MP-50
E2E-COMP-06	E2E-32, E2E-33	MP-53, MP-54

8.5 Final Declaration

This architecture achieves 100% coverage of all 52 macro processes by all 33 end-to-end processes. The addition of MP-43 to MP-50 and E2E-24 to E2E-31 (Version 3.0), and of MP-53, MP-54, E2E-32 and E2E-33 (Version 5.0), ensures that the platform can handle not only the full Training Engineering lifecycle and consulting engagement model but also:

- **MP-43 —** External strategic and competitive intelligence (Porter's Five Forces, market segmentation)
- **MP-44 —** Job architecture and position description management (organizational charts, position descriptions, gap analysis)
- **MP-45 —** GPEC integration (Forward Planning of Jobs and Skills — Gestion Prévisionnelle des Emplois et des Compétences)
- **MP-46 —** Bottom-up training demand collection (individual and collective demands)
- **MP-47 —** MS/MO/OP performance assessment (Strategic Management / Operational Management / Operational Level) with RAG (Green/Amber/Red) ratings
- **MP-48 —** Functional SWOT and improvement axes
- **MP-49 —** Training plan prioritization and resource planning (days per theme, groups, trainers, budget)
- **MP-50 —** Post-engagement roadmap and continuous improvement (One-to-One coaching, organizational optimization, IS rehabilitation)
- **MP-53 —** Structured Scope of Work definition (Group/Organization, sector, MS/MO/OP decision levels, functions, focus All/Digital/AI/Custom, custom criteria) with a stakeholder register and an approval gate
- **MP-54 —** Questionnaire design (Load / AI / Manual), RACSI allocation, assignment of questions to respondents, multi-channel distribution (Face-to-Face, Email, WhatsApp, Application, Combination), consent-based response collection and consolidation into needs analysis, diagnostic and report

This is the complete, covered, and market-leading process architecture for CortexSkills, the #1 Training Engineering application.

SECTION 9

9. Implementation in CortexSkills 1.15.0

This section describes how CortexSkills release 1.15.0 runs the architecture defined above. The application loads the full repository — macro processes, tasks, steps, end-to-end processes and their user-facing tasks, RACSI and BPMN flows — and runs each project through it, in English, French and Arabic.

9.1 Repository Loaded in the Application

Element	In the application	Note
Macro processes	54	52 business macro processes (this document) + MP-51 Platform Configuration & Licensing and MP-52 Compliance & Security Standards (administration)
Tasks / steps	180 / 407	Every step carries its type (User Task, Service Task…), role and description
End-to-end processes	33 + 6 composites	With user-facing tasks, RACSI, inputs and outputs, as in Section 7
Modules	55	M00 Platform Shell to M54 Questionnaire Studio, including M51 and M52
Business rules / actions	89 / 75	Routing, validation and notification rules triggered by steps
Controls / risks	88 / 35	Controls mapped to COSO components; risks with inherent and residual scores
KPIs / alerts / reports	61 / 45 / 34	Including RPT-001 Training Engineering Report
Object classes / attributes	72 / 378	The data model behind the step forms
AI use cases	36	Each with its linked step, risk level and human-in-the-loop checkpoint
Sectors (verticals)	29	Sector-specific chains, checklists and question banks, plus the SME offer
Glossary	51 terms	French-English glossary of Section 3

Table 9.1 — Repository content loaded by CortexSkills 1.15.0.

9.2 Phases and Gates

A project follows six phases, each closed by a gate approved by its approvers against a checklist. Phase 0 groups the enablers, which run across all phases.

Phase	End-to-end processes	Closing gate
0 Enablers (all phases)	E2E-15, E2E-17, E2E-18	—
1 Scope & evidence	E2E-32, E2E-33, E2E-19, E2E-24	G1 — Scope & evidence approved
2 Diagnosis	E2E-20, E2E-25, E2E-26, E2E-27, E2E-28, E2E-29, E2E-02, E2E-21	G2 — Diagnostic validated
3 Training Engineering Report & plan	E2E-01, E2E-03, E2E-30, E2E-22, E2E-23, E2E-16	G3 — Report & roadmap approved
4 Design & delivery	E2E-04, E2E-05, E2E-06, E2E-13, E2E-14	G4 — Delivery readiness
5 Evaluation, compliance & impact	E2E-07, E2E-08, E2E-09	G5 — Evaluation & impact validated
6 Talent, knowledge & continuous improvement	E2E-10, E2E-11, E2E-12, E2E-31	G6 — Closure & continuous improvement

Table 9.2 — Phases, the end-to-end processes they run, and their gates.

9.3 SME Tracks

Small and medium enterprises run a shorter path: fewer gates, fewer checklist items per gate and a target duration. The track is chosen from the size of the enterprise.

Track	Segment	Gates	Items per gate	Target duration
SME-T1 Essential	Micro (1–10 employees)	G1, G3, G6	3	About 30 days
SME-T2 Standard	Small (10–50 employees)	G1, G3, G5, G6	4	About 60 days
SME-T3 Advanced	Medium (50–250 employees)	G1 to G6	5	About 90 days

Table 9.3 — SME tracks.

9.4 How a Step Runs

- **Typed step forms.** Each step opens a form chosen by its meaning (scope frame, sector, decision levels, stakeholders, competency framework, gaps, budget, sessions, evaluations…). The form works on the project's own records, not on free text.
- **Three ways to fill a step.** Manual entry or paste of a table, a template from the library, or an AI proposal. Every AI proposal is reviewed and validated by a person before it is saved.
- **Completion on evidence.** A step that produces a result (a questionnaire, a dispatch, a consolidated dataset) is complete only when that result exists.
- **Hand-over.** When a step is completed, the owner of the next step is notified. Enabler processes start when their start condition is met.
- **Multi-record entry.** Tables can be pasted from a spreadsheet, previewed, applied and undone; a full-screen workspace is available for large tables.
- **Real flow.** E2E-01 (plan), E2E-02 (skills diagnosis), E2E-05 (delivery), E2E-07 (evaluation), E2E-32 (scope) and E2E-33 (questionnaires) run on real records end to end.

9.5 Questionnaire Campaign (E2E-32 and E2E-33)

User-facing task	What the application does
UFT-32-06 Identify stakeholders	The stakeholders entered become the Stakeholder records the questionnaire is sent to, each with a population (DG, Management or Member), an e-mail address and a phone number.
UFT-33-01 Select questionnaire template	Creates the project questionnaire from the chosen templates, one form per population.
UFT-33-02 / 33-03 Elaborate, tailor and validate	Questions are loaded from a template, proposed by AI or written manually. Distribution is blocked while an AI question is not validated.
UFT-33-04 Allocate RACSI and assign questions	RACSI per section, with exactly one Accountable. Sections, sub-sections or single questions can be assigned to one or more respondents in three ways: tick respondents element by element, paste a table (element, respondents), or accept an automatic proposal built from each respondent's role and function.
UFT-33-05 Select distribution channels	A channel plan per respondent: one channel (Face-to-Face, Email, WhatsApp, Application) or a Combination played in sequence. Defaults: DG — e-mail then interview; Management — e-mail, reminder, interview; Member — WhatsApp or e-mail, reminders, then interview.
UFT-33-06 / 33-07 Distribute and remind	Each invitation and reminder is logged with its status. Failed messages are retried on the same channel. Without e-mail or WhatsApp settings, messages are composed and kept in the outbox (sandbox mode).

User-facing task	What the application does
UFT-33-08 Collect responses	Respondents answer on a personal response page, which shows only the elements assigned to them. Face-to-face answers can be captured later and synchronised.
UFT-33-09 to 33-12 Validate, consolidate, release, report	Completeness and consent are checked, responses are consolidated and released to E2E-03, E2E-20 and E2E-27; response rates are reported by channel and population.

Table 9.5 — How the application implements the scope and questionnaire tasks.

Checks before distribution

Distribution is refused while one of these is true: an AI question is not validated, a section has no Accountable or more than one, the questionnaire has no respondent or no due date, or a respondent named in the assignment receives no question. A missing e-mail address or phone number, and an assignment to a person who is no longer a respondent, are reported as warnings.

9.6 Administration: MP-51 and MP-52

Macro process	In the application
MP-51 Platform Configuration & Licensing (M51)	Organization settings, users and roles, channels, currencies and backups. In an on-premises installation the plan, the number of users and the add-ons come from a licence file signed by POWERACT and cannot be changed locally.
MP-52 Compliance & Security Standards (M52)	Standards switched on one by one, independently of the pack: GDPR, ISO/IEC 27001, SOC 2, ISO/IEC 27701, ISO 9001 and Law 09-08 (CNDP, Morocco). Switching a standard on requires accepting its disclosure and adds its controls to the control register.

Table 9.6 — The two administrative macro processes as implemented.

— End of Document —
