

journi Academy

A Detailed Curriculum for Human Change Management

Delivered through hands-on workshops in journi

3

LEVELS

9

TRAININGS

36

HALF-DAYS

36

WORKSHOPS

12

EXAMS

Three levels, one continuous certification pathway

Each level builds on the credential before it — Foundation fluency, Practitioner ownership, Advanced portfolio leadership.

Foundation

Change Management Foundations with journi

- › Change Management Foundations & the journi Platform
- › Individual & Emotional Readiness — ADKAR and the Human Journey
- › Sponsorship, Communication & Risk Basics

6 days · 3 trainings · 12 half-days

Practitioner

Running a Change Program in journi

- › Program Governance — Charters, WBS & Phase Gates
- › Training, Resistance & Coaching
- › Governed AI in Change Management

6 days · 3 trainings · 12 half-days

Advanced

Leading Change Portfolios & Sustaining Impact

- › Portfolio Analytics, Benchmarking & Executive Reporting
- › Sustainment, Governance & Platform Administration
- › Capstone — Leading a Full Transformation Program End-to-End

6 days · 3 trainings · 12 half-days

METHODOLOGY

The Golden Rule: every half-day, one quiz, one workshop

Content is always immediately checked, then immediately applied — no half-day passes without both.

Content

60–75 min per session.
Concepts taught directly
against the live journi
application, not slides alone.

Quiz

15 min, 8 items. A short
formative check — did the
concept land before we apply
it?

Workshop

90–150 min. Hands-on in
journi against a realistic
scenario. This is where the
skill is actually built.

Debrief

15 min. What worked, what
didn't, and how it connects to
the next half-day.

Assessment stack: formative Quiz (per half-day) → summative Training Exam (per training) → integrative Level Exam (per level, gates progression to the next level).

Pass marks, retakes and credentials

Assessment	Frequency	Typical Format	Pass Mark	Retake Policy
Quiz	1 per half-day (36 total)	8 MCQ, closed-book, 15 min	Formative — no pass mark	N/A — for facilitator pacing only
Training Exam	1 per training (9 total)	35–45 MCQ + 1 practical/case	75%	One free retake after 48h review
Level Exam	1 per level (3 total)	60–80 MCQ + integrated practical	80%	One retake after a 1-week remediation plan
Capstone Rubric	TRN-A3 only	Facilitator-scored, 4 × 25 pts	75 / 100	Re-attempt at next capstone cohort

Credentials awarded: journi Certified Change Practitioner — Foundation / Practitioner, and journi Certified Change Management Practitioner — Advanced, each on passing that level's Level Exam.

Foundation

Change Management Foundations with journi

TARGET AUDIENCE

New Change Managers, HR Business Partners, PMO members, People Managers — no prior journi experience required

LEARNING OUTCOME

Navigate journi with fluency, explain the 4 core frameworks, and read a project's stakeholder, ADKAR and emotional-readiness data correctly

TRAININGS IN THIS LEVEL

TRN-F1 Change Management Foundations & the journi Platform

TRN-F2 Individual & Emotional Readiness — ADKAR and the Human Journey

TRN-F3 Sponsorship, Communication & Risk Basics

EXM-LVL-F 80 MCQ (drawn from TRN-F1-F3) + 1 guided practical in journi · 4h · pass mark 80% · unlocks Practitioner enrollment

Change Management Foundations & the journi Platform

GOALS

- › Explain why ~70% of transformations fail on the human side and how ADKAR, Kotter, Lewin and Bridges/Kübler-Ross address it
- › Navigate journi's tenant hierarchy (Group / Organization / Project) and role-based access
- › Read the Organizational Breakdown Structure (OBS) and the Macro Process / SIPOC / RACSI registry
- › Explain the Assistive / Augmented AI governance model and why Autonomous AI is out of scope

TARGET AUDIENCE

New Change Managers, HR Business Partners, PMO members, People Managers

DETAILED AGENDA

Day 1 · AM Why Change Management, Why journi

- The human side of transformation — the ~70% stat, root causes, the 4 frameworks at a glance (75m)
- Platform tour — scope switcher, Sidebar sections, multilingual UI (EN/FR/AR) (45m)

QZ-F1-1 Quiz — Framework definitions + platform navigation (8 items, 15m)

WS-F1-1 Workshop — Stand Up a Tenant (90m)

Day 1 · PM The Process Backbone & Governed AI

- Macro Processes, SIPOC & RACSI — the 10 macro processes, E2E registry, reading a RACSI grid (60m)
- OBS and the AI Use Case Library — resourcing roster vs. RBAC users; Assistive vs. Augmented tiers (60m)

QZ-F1-2 Quiz — RACSI role codes + AI tier definitions (8 items, 15m)

WS-F1-2 Workshop — Read the Process Backbone (90m)

Day 2 · AM Reading the Program Layer

- Initiative Registry & CM Charters — how a program is registered and chartered, reading (not yet editing) a charter (60m)
- WBS, Gantt & Phase Gates at a glance — reading a program's schedule and phase-gate status (45m)

QZ-F1-3 Quiz — Program layer terms (8 items, 15m)

WS-F1-3 Workshop — Read a Program's Status (90m)

Day 2 · PM Metrics, Dashboards & the Field Notebook

- Metrics & Analytics Dashboard — reading the ADKAR heatmap and adoption curve (reference-only at this level) (45m)
- Field Notes — the practitioner's scratchpad, and the multilingual UI (EN/FR/AR) (45m)

QZ-F1-4 Quiz — Dashboard reading + Field Notes scope (8 items, 15m)

WS-F1-4 Workshop — Read a Dashboard, Log a Field Note (90m)

EXM-F1 40 MCQ + 2 short-answer · 75 min · pass mark 75%

Change Management Foundations & the journi Platform

WS-F1-1

90m

Stand Up a Tenant

1. Create a Group and an Organization for a new manufacturing client scenario
2. Register a Main Project and a linked Change Management Project
3. Set the Organization's Default Language and explain the precedence rule

WS-F1-3

90m

Read a Program's Status

1. Open a seeded Initiative Registry entry and its CM Charter, identify the Lewin macro-state and top charter action
2. Open the linked WBS/Gantt view and identify 2 tasks with a schedule gap
3. Identify the current Phase Gate status and who owns the next decision

WS-F1-2

90m

Read the Process Backbone

1. Build a 4-role OBS roster with a reporting chain for the scenario project
2. Trace one End-to-End process chain through its ordered Macro Processes
3. Review 3 AI Use Case Library entries and classify tier + human checkpoint

WS-F1-4

90m

Read a Dashboard, Log a Field Note

1. Open the Metrics & Analytics Dashboard for the seeded project and identify the ADKAR heatmap's weakest block
2. Identify the adoption curve's current trend
3. Add a Field Note capturing an observation from the review (not a structured record)

Individual & Emotional Readiness — ADKAR and the Human Journey

GOALS

- › Score and interpret the 5 ADKAR blocks with barrier diagnosis
- › Map stakeholder impact / influence and identify high-impact / low-influence risk populations
- › Read Bridges Transition and Kübler-Ross sentiment positions and recognize the Divergence Pattern
- › Interpret the Journey Map as a synthesis of ADKAR, Bridges and Kübler-Ross

TARGET AUDIENCE

Change Managers, People Managers / Coaches, Training Leads

DETAILED AGENDA

Day 3 · AM Stakeholder Mapping & ADKAR

- Stakeholder & Impact Mapping — 5-dimension scoring, influence, the High-Impact/Low-Influence flag (60m)
- ADKAR Engine — 5 blocks, barrier diagnosis, stalled-block escalation, the Desire-diagnosis AI coach (60m)

QZ-F2-1 Quiz — ADKAR blocks + impact scoring (8 items, 15m)

WS-F2-1 Workshop — Map and Score a Cohort (90m)

Day 3 · PM Emotional Readiness & the Journey Map

- Emotional & Transition Layer — Bridges position, Kübler-Ross sentiment inference, the Divergence Pattern (60m)
- Journey Map — reading the visual timeline, event types, organization-level zoom (60m)

QZ-F2-2 Quiz — Bridges/Kübler-Ross + Divergence Pattern (8 items, 15m)

WS-F2-2 Workshop — Diagnose a Divergence Case (90m)

Day 4 · AM Journeys & Touchpoints

- Journeys & Analytics — the 8 seeded journeys, touchpoint completion, reference dashboards (60m)
- Sentiment & the AI Annotation Assistant — reading and accepting an AI-suggested journey annotation (45m)

QZ-F2-3 Quiz — Journeys + AI annotation tier (8 items, 15m)

WS-F2-3 Workshop — Read a Journey, Accept an AI Suggestion (90m)

Day 4 · PM Recognizing Resistance Early

- Resistance Management — the type taxonomy, at recognition level (not yet coding it) (45m)
- Manager-as-Coach — the team-scoped view a People Manager sees, and how it links to ADKAR (45m)

QZ-F2-4 Quiz — Resistance types + Manager-as-Coach view (8 items, 15m)

WS-F2-4 Workshop — Recognize a Resistance Type (90m)

EXM-F2 40 MCQ + 2 case-based scenarios · 90 min · pass mark 75%

Individual & Emotional Readiness — ADKAR and the Human Journey

WS-F2-1

90m

Map and Score a Cohort

1. Add a new stakeholder group to the seeded ERP scenario
2. Score its 5-dimension impact and influence
3. Confirm the High-Impact / Low-Influence flag fires correctly

WS-F2-3

90m

Read a Journey, Accept an AI Suggestion

1. Open a seeded journey and identify its touchpoint-completion percentage
2. Identify which touchpoint has the lowest completion
3. Use the Journey Map Annotation Assistant, accept the suggestion, edit it, and log the source annotation

WS-F2-2

90m

Diagnose a Divergence Case

1. Given strong Knowledge/Ability but an "Ending" Bridges read, confirm the Divergence Alert
2. Log a justified sentiment update citing specific evidence
3. Add an annotated Journey Map event for the diagnosis

WS-F2-4

90m

Recognize a Resistance Type

1. Read 3 short resistance scenarios and classify each by type (recognition only, no logging)
2. Open the Manager-as-Coach team-scoped view for a seeded manager
3. Identify the team member with the lowest ADKAR score and the linked resistance entry

Sponsorship, Communication & Risk Basics

GOALS

- › Track sponsor visibility and log sponsor actions
- › Build a communication matrix and recognize saturation risk
- › Log and score change risk distinct from generic project risk
- › Use the Notification Center to monitor live alert conditions

TARGET AUDIENCE

Change Managers, Communications Practitioners, PMO

DETAILED AGENDA

Day 5 · AM Sponsor & Coalition, Communications

- Sponsor & Coalition — visibility tracker, coalition roster, sponsor actions, the weak-visibility alert (60m)
- Communications — the message × audience × channel × timing matrix, saturation detection (60m)

QZ-F3-1 Quiz — Sponsorship visibility + communication matrix (8 items, 15m)

WS-F3-1 Workshop — Plan a Communication Wave (90m)

Day 5 · PM Risk & the Notification Center

- Change Risk Register — adoption/sponsorship/capacity/saturation categories, risk score, mitigation (60m)
- Notification Center — the 9 live alert conditions, dismiss/restore, tracing an alert to its module (60m)

QZ-F3-2 Quiz — Risk categories + live alert conditions (8 items, 15m)

WS-F3-2 Workshop — Close the Loop on a Risk (90m)

Day 6 · AM Training & Capability, at a Glance

- Training & Capability — curriculum records, the trained-vs-capable distinction (reading level) (45m)
- The Codebook — how resistance and communication data get tagged consistently (45m)

QZ-F3-3 Quiz — Training records + codebook (8 items, 15m)

WS-F3-3 Workshop — Read a Curriculum Record (90m)

Day 6 · PM Sustainment Basics

- Reinforcement & Sustainment — the 30/60/90-day checkpoint cadence (recognition level) (45m)
- Putting It Together — reading a project's overall readiness across sponsor, comms, risk and training signals (45m)

QZ-F3-4 Quiz — Sustainment cadence + readiness synthesis (8 items, 15m)

WS-F3-4 Workshop — Assemble a Readiness Snapshot (90m)

EXM-F3 40 MCQ · 90 min · pass mark 75%

Sponsorship, Communication & Risk Basics

WS-F3-1

90m

Plan a Communication Wave

1. Build a 3-message communication matrix for a target cohort
2. Run the Change Saturation Advisor AI use case and interpret its flag
3. Log a sponsor action addressing an identified visibility gap

WS-F3-3

90m

Read a Curriculum Record

1. Open a seeded curriculum record and identify completion % vs. certification status
2. Identify one trainee marked "attended" but not yet "capable" and explain the gap
3. Look up 2 tags in the organization's default Codebook and explain what each is used for

WS-F3-2

90m

Close the Loop on a Risk

1. Log a saturation risk with likelihood/impact scoring
2. Add a mitigation action with an owner and due date
3. Verify the corresponding alert fires in the Notification Center

WS-F3-4

90m

Assemble a Readiness Snapshot

1. Open the sustainment checkpoint tracker and identify the next due checkpoint
2. Pull one signal each from sponsor visibility, communication saturation, risk register, and training completion
3. Draft a 4-line readiness snapshot combining all signals

Practitioner

Running a Change Program in journi

TARGET AUDIENCE

Assigned or certified Change Managers who will own a real Change Management Project end-to-end. Prerequisite: Foundation credential.

LEARNING OUTCOME

Govern a program from charter through Phase Gate decisions, manage training/resistance/coaching data, and operate governed AI safely

TRAININGS IN THIS LEVEL

TRN-P1 Program Governance — Charters, WBS & Phase Gates

TRN-P2 Training, Resistance & Coaching

TRN-P3 Governed AI in Change Management

EXM-LVL-P 80 MCQ (drawn from TRN-P1-P3) + 1 integrated practical (Phase Gate + resistance pattern + AI activation decision) · 4.5h · pass mark 80% · unlocks Advanced enrollment

Program Governance — Charters, WBS & Phase Gates

GOALS

- › Register and manage a Change Management Project and its Initiative Registry record
- › Load a Phase Template and build a WBS spanning PM / CM / Framework tracks
- › Record and interpret a Phase Gate Joint Decision
- › Author and manage CM Charter definitions and their compliance log

TARGET AUDIENCE

Change Managers, PMO / Program Managers (Foundation credential required)

DETAILED AGENDA

Day 1 · AM Initiative Registry & Charters

- Initiative Registry — metadata, Lewin macro-state, the justified-change pattern, Composite Readiness Index (60m)
- CM Charter Registry — the 8 charters, action mapping, compliance logging, Mentoring Progression reference (60m)

QZ-P1-1 Quiz — Lewin phases + charter structure (8 items, 15m)

WS-P1-1 Workshop — Register and Charter a New Initiative (90m)

Day 1 · PM WBS, Gantt & Phase Gates

- WBS & Gantt — 3 tracks, baseline vs. actual, schedule gap, Load Phase Template (60m)
- Phase Checklists & Phase Gates — checklist weighting, the Joint Decision Record, PM↔CM bridge (60m)

QZ-P1-2 Quiz — WBS tracks + Phase Gate mechanics (8 items, 15m)

WS-P1-2 Workshop — Run a Phase Gate (90m)

Day 2 · AM Risk & Stakeholder Integration at Program Level

- Change Risk Register — scoring, mitigation action plans, linking risk to Phase Gate readiness (60m)
- Stakeholder & Impact Mapping — refreshing the map at each Phase Gate (45m)

QZ-P1-3 Quiz — Risk scoring + stakeholder refresh cadence (8 items, 15m)

WS-P1-3 Workshop — Build a Mitigation Action Plan (90m)

Day 2 · PM Communications Planning for a Gate

- Communications — building a wave plan timed to a Phase Gate decision (60m)
- Sponsor & Coalition — briefing the sponsor before a gate (45m)

QZ-P1-4 Quiz — Communication wave planning + sponsor briefing (8 items, 15m)

WS-P1-4 Workshop — Time a Communication Wave to a Gate (90m)

EXM-P1 45 MCQ + 1 practical (record a Phase Gate end-to-end) · 120 min · pass mark 75%

Program Governance — Charters, WBS & Phase Gates

WS-P1-1

90m

Register and Charter a New Initiative

1. Create a CM Project linked to a Main Project
2. Set its Lewin macro-state with a written justification
3. Log 2 charter-action compliance instances against CHTR-01 and CHTR-03

WS-P1-3

90m

Build a Mitigation Action Plan

1. Log a new change risk with a full 4-category score
2. Build a Mitigation Action Plan with at least 2 actions and owners
3. Link the risk to the upcoming Phase Gate decision

WS-P1-2

90m

Run a Phase Gate

1. Load TPL-ERP-8 into a project's WBS from a chosen start date
2. Mark 2 tasks with actual dates to generate a schedule gap
3. Complete a weighted Phase Checklist

WS-P1-4

90m

Time a Communication Wave to a Gate

1. Build a 3-message communication wave ending 2 days before the Phase Gate
2. Check the wave against saturation risk
3. Log a sponsor briefing action ahead of the gate

Training, Resistance & Coaching

GOALS

- › Manage curriculum records and the trained-vs-capable distinction
- › Log, classify and resolve resistance; use the Qualitative Coding Workbench
- › Operate the Manager-as-Coach team-scoped view
- › Apply the 3-stage Mentoring Progression model (Trainee → Observer → Autonomous)

TARGET AUDIENCE

Change Managers, Trainers, People Managers / Coaches (Foundation credential required)

DETAILED AGENDA

Day 3 · AM Training & Capability

- Training & Capability Building — curriculum fields, completion vs. certification, the needs banner (60m)
- Mentoring Progression model — 3 stages, entry/exit criteria, the one-stage-back regression path (60m)

QZ-P2-1 Quiz — Trained vs. capable + mentoring stages (8 items, 15m)

WS-P2-1 Workshop — Build a Curriculum and Mentor a Trainee (90m)

Day 3 · PM Resistance & Coaching

- Resistance Management — type classification, systemic-pattern detection, Coding Workbench (60m)
- Manager-as-Coach — team-scoped heatmap, manager readiness, coaching scripts (60m)

QZ-P2-2 Quiz — Resistance types + coaching model (8 items, 15m)

WS-P2-2 Workshop — Code a Pattern, Coach a Manager (90m)

Day 4 · AM Systemic Pattern Detection at Scale

- Qualitative Coding Workbench — batch-coding a set of resistance entries, not just one (60m)
- Linking Resistance to Training Gaps — using the trained-vs-capable data to explain a resistance pattern (45m)

QZ-P2-3 Quiz — Batch coding + resistance-training linkage (8 items, 15m)

WS-P2-3 Workshop — Batch-Code a Resistance Set (90m)

Day 4 · PM Coaching a Team, Not Just a Manager

- Manager-as-Coach at team scale — reading a full team heatmap and prioritizing coaching effort (60m)
- Mentoring Progression — advancing multiple mentees and handling a regression (45m)

QZ-P2-4 Quiz — Team-scale coaching + mentee regression (8 items, 15m)

WS-P2-4 Workshop — Prioritize and Coach a Team (90m)

EXM-P2 40 MCQ + 1 case study · 90 min · pass mark 75%

Training, Resistance & Coaching

WS-P2-1

90m

Build a Curriculum and Mentor a Trainee

1. Add a curriculum record and track completion percentage
2. Certify it with a justification distinct from completion
3. Move a mentee from Trainee to Observer with logged competency evidence

WS-P2-3

90m

Batch-Code a Resistance Set

1. Code 5 seeded resistance entries against the organization's Codebook
2. Confirm the systemic-pattern banner fires correctly
3. Cross-reference the pattern against the curriculum's completion data for the affected team

WS-P2-2

90m

Code a Pattern, Coach a Manager

1. Log 2 systemic-type resistance entries to trigger the pattern-detection banner
2. Tag both entries against the organization's codebook
3. Cross-reference one tag to an existing resistance-log barrier

WS-P2-4

90m

Prioritize and Coach a Team

1. Open the team-scoped Manager-as-Coach heatmap and rank 4 team members by coaching priority
2. Log a coaching script action for the top-priority member
3. Advance one mentee from Observer to Autonomous with logged evidence

Governed AI in Change Management

GOALS

- › Operate the AI Use Case Library's activation / override model (organization vs. project)
- › Apply the Assistive / Augmented tier discipline correctly to a new use case
- › Review and audit the AI Usage Log
- › Configure — safely — the optional Real LLM Provider Connection

TARGET AUDIENCE

Change Managers, Organization Admins (Foundation credential required)

DETAILED AGENDA

Day 5 · AM AI Governance Model

- Tiers & catalog structure — Assistive vs. Augmented vs. out-of-scope Autonomous; prompt templates (60m)
- Activation & override — organization-level activation, project-level override, deactivation behavior (60m)

QZ-P3-1 Quiz — AI tiers + activation model (8 items, 15m)

WS-P3-1 Workshop — Govern a Use Case Rollout (90m)

Day 5 · PM Usage Audit & Provider Connection

- AI Usage Log — accepted / edited / rejected outcomes, what governance reporting looks for (60m)
- Real LLM Provider Connection — browser-local key storage, fallback behavior, when (not) to configure (60m)

QZ-P3-2 Quiz — Usage audit + provider connection (8 items, 15m)

WS-P3-2 Workshop — Audit and Decide (90m)

Day 6 · AM Governance at Scale — Conflicts & Escalation

- Resolving activation conflicts — when an org-level activation meets a project-level override (60m)
- AI Use Case prompt templates — reading and safely adapting a template (45m)

QZ-P3-3 Quiz — Activation conflicts + prompt templates (8 items, 15m)

WS-P3-3 Workshop — Resolve an Activation Conflict (90m)

Day 6 · PM Operating the Real LLM Provider Connection

- Key lifecycle — configuring, rotating and removing a Real LLM Provider key; browser-local storage implications (45m)
- Fallback behavior — what happens to AI suggestions when the connection is removed or fails (45m)

QZ-P3-4 Quiz — Key lifecycle + fallback behavior (8 items, 15m)

WS-P3-4 Workshop — Rotate a Provider Key and Verify Fallback (90m)

EXM-P3 35 MCQ + 1 governance-memo exercise · 90 min · pass mark 75%

Governed AI in Change Management

WS-P3-1

90m

Govern a Use Case Rollout

1. Activate 3 AI use cases for an Organization
2. Override one use case off for a single sensitive project
3. Write a short justification note for the override

WS-P3-3

90m

Resolve an Activation Conflict

1. Given an org-level activation and a conflicting project override, determine which wins and why
2. Document the resolution with a justification note
3. Open an AI Use Case prompt template and adapt it for a new scenario without changing its tier

WS-P3-2

90m

Audit and Decide

1. Review a sample AI Usage Log across several use cases
2. Identify the use case with the highest rejection rate
3. Draft a one-paragraph governance recommendation

WS-P3-4

90m

Rotate a Provider Key and Verify Fallback

1. Configure a Real LLM Provider key for a test Organization
2. Rotate the key and confirm the old key no longer works
3. Remove the connection entirely and generate an AI suggestion, confirming fallback behavior

Advanced

Leading Change Portfolios & Sustaining Impact

TARGET AUDIENCE

Senior Change Managers, Change Management Leads, PMO Directors, Organization/Group Admins managing multiple concurrent initiatives. Prerequisite: Practitioner credential.

LEARNING OUTCOME

Report portfolio-level readiness to executives, administer platform governance, and lead a full transformation program end-to-end

TRAININGS IN THIS LEVEL

TRN-A1 Portfolio Analytics, Benchmarking & Executive Reporting

TRN-A2 Sustainment, Governance & Platform Administration

TRN-A3 Capstone — Leading a Full Transformation Program End-to-End

EXM-LVL-A Capstone facilitator rubric (4 workshops, 25 pts each) + 60-MCQ integrative written exam (TRN-A1-A2) · pass: written $\geq 80\%$ AND rubric $\geq 75/100$

Portfolio Analytics, Benchmarking & Executive Reporting

GOALS

- › Roll up readiness at Project / Organization / Group level correctly per RBAC
- › Interpret the Composite Readiness Index and phase-based benchmarking standing
- › Use the Cross-Type Comparison Matrix to advise on a new transformation type
- › Produce and review an AI-drafted Executive Readiness Narrative

TARGET AUDIENCE

Senior Change Managers, Executive Viewers, PMO Directors (Practitioner credential required)

DETAILED AGENDA

Day 1 · AM Analytics & Benchmarking

- Metrics & Analytics Dashboard — roll-up levels, ADKAR heatmap, adoption curve, sentiment correlation (60m)
- Benchmarking tab — reference bands by Lewin phase, peer average, Behind / In Line / Ahead standing (60m)

QZ-A1-1 Quiz — Roll-up levels + benchmarking standing (8 items, 15m)

WS-A1-1 Workshop — Benchmark a Portfolio (90m)

Day 1 · PM Journeys, Touchpoints & Executive Narrative

- Journeys, Touchpoints & Analytics — the 8 journeys, live DASH-01/02 metrics, reference-only dashboards (60m)
- Cross-Type Comparison Matrix + the Executive Readiness Narrative Generator AI use case (60m)

QZ-A1-2 Quiz — Journey dashboards + cross-type matrix (8 items, 15m)

WS-A1-2 Workshop — Brief the Steering Committee (90m)

Day 2 · AM Group-Level Portfolio Rollups

- Rolling up readiness at Group level across multiple Organizations (60m)
- Cross-Type Matrix — advising on 2 different transformation types in the same portfolio (45m)

QZ-A1-3 Quiz — Group rollups + cross-type advising (8 items, 15m)

WS-A1-3 Workshop — Roll Up a Group Portfolio (90m)

Day 2 · PM Multi-Project Executive Briefing

- Assembling a multi-project executive narrative — combining several AI-drafted narratives into one briefing (60m)
- Handling executive questions — defending a readiness number under scrutiny (45m)

QZ-A1-4 Quiz — Multi-project narrative + defending a number (8 items, 15m)

WS-A1-4 Workshop — Brief on a Multi-Project Portfolio (90m)

EXM-A1 35 MCQ + 1 executive-memo practical · 90 min · pass mark 75%

Portfolio Analytics, Benchmarking & Executive Reporting

WS-A1-1

90m

Benchmark a Portfolio

1. At Organization level, compare 3 seeded projects' Readiness Index against their phase bands
2. Compare each against the peer average and record its standing
3. Identify the one project reading "Behind" and articulate why

WS-A1-3

90m

Roll Up a Group Portfolio

1. At Group level, roll up the Composite Readiness Index across 3 Organizations
2. Identify the weakest Organization and its phase-based benchmarking standing
3. For 2 different transformation types in the portfolio, pull the correct Cross-Type Matrix row for each

WS-A1-2

90m

Brief the Steering Committee

1. Compute JRN-01 touchpoint completion for a project
2. Generate an AI-drafted executive narrative and edit it for accuracy
3. Select the correct Cross-Type Matrix row to justify a timeline expectation

WS-A1-4

90m

Brief on a Multi-Project Portfolio

1. Generate AI-drafted executive narratives for 2 projects and merge them into one briefing
2. Edit the merged narrative for accuracy and tone
3. Prepare 2 backup data points to defend the lowest readiness figure

Sustainment, Governance & Platform Administration

GOALS

- › Run 30/60/90-day sustainment checkpoints and institutionalize lessons learned
- › Administer the runtime Permission Matrix and Justification Governance toggle
- › Configure multi-tenant hierarchy and manage cross-organization user scope
- › Use Field Notes appropriately as a practitioner scratchpad, not a system-of-record substitute

TARGET AUDIENCE

Senior Change Managers, Organization / Group Admins, Super Admins
(Practitioner credential required)

DETAILED AGENDA

Day 3 · AM Sustainment & Field Notes

- Reinforcement & Sustainment — checkpoints, regression risk, quick wins, the REX lessons-learned log (60m)
- Field Notes — when to use it vs. a structured module (45m)

QZ-A2-1 Quiz — Sustainment checkpoints + Field Notes scope (8 items, 15m)

WS-A2-1 Workshop — Close Out a Program (90m)

Day 3 · PM Platform Governance & Administration

- Permission Matrix & Governance Settings — 9 roles × 8 capabilities, the Super-Admin-only edit gate (60m)
- Multi-tenant hierarchy administration — Group/Organization scope, cascading delete, data isolation (60m)

QZ-A2-2 Quiz — Permission Matrix + tenant isolation (8 items, 15m)

WS-A2-2 Workshop — Administer a New Business Unit (90m)

Day 4 · AM Group & Tenant Lifecycle Administration

- Standing up a new Group and its first Organizations, RBAC seeding (60m)
- Deactivating and archiving a tenant safely — data retention and cascading effects (45m)

QZ-A2-3 Quiz — Group setup + safe deactivation (8 items, 15m)

WS-A2-3 Workshop — Stand Up a Group and Retire an Organization (90m)

Day 4 · PM Governance Policy Design

- Designing a Justification Governance toggle policy for a new client, and the Super-Admin-only edit gate (60m)
- Turning a REX lesson-learned into a permanent policy change (45m)

QZ-A2-4 Quiz — Justification policy design + REX-to-policy (8 items, 15m)

WS-A2-4 Workshop — Turn a Lesson Learned into Policy (90m)

EXM-A2 35 MCQ + 1 admin-configuration practical · 90 min · pass mark 75%

Sustainment, Governance & Platform Administration

WS-A2-1

90m

Close Out a Program

1. Record the 90-day sustainment checkpoint
2. Log 2 lessons learned — one linked to a Rule/Charter, one left pending
3. Toggle sustainment sign-off with a written justification

WS-A2-3

90m

Stand Up a Group and Retire an Organization

1. Create a new Group and 2 child Organizations
2. Seed each Organization with a Change Manager and a People Manager role
3. Deactivate a third, older Organization and record what happens to its data

WS-A2-2

90m

Administer a New Business Unit

1. Create a new Organization under an existing Group
2. Grant a Change Manager the manageTemplates capability via the Permission Matrix
3. Verify tenant data isolation from a sibling Organization

WS-A2-4

90m

Turn a Lesson Learned into Policy

1. Design a Justification Governance toggle policy for a new client scenario and document the rationale
2. Identify which capabilities should require justification and which should not
3. Take a seeded REX lesson-learned entry and translate it into a specific Permission Matrix change

Capstone — Leading a Full Transformation Program End-to-End

GOALS

- › Integrate every module from M1–M22 into one coherent program simulation
- › Defend a Phase Gate decision under Steering Committee questioning
- › Diagnose and resolve an injected multi-module crisis scenario
- › Present a portfolio-level readiness briefing synthesizing all four frameworks

TARGET AUDIENCE

Advanced-level candidates only — TRN-A1 and TRN-A2 completed

DETAILED AGENDA

Day 5 · AM Program Setup Simulation

- Scenario briefing — a new manufacturing client launching an ERP + culture dual transformation (75m)
- Team formation and role assignment (Change Manager, PMO, Sponsor-proxy) (45m)

QZ-A3-1 Quiz — Scenario comprehension (8 items, 15m)

WS-A3-1 Workshop — Stand Up the Program (90m)

Day 5 · PM Mid-Program Crisis Injection

- Facilitator injects a crisis packet: Divergence Pattern, 2 systemic resistance entries, a saturation risk, a weak-sponsor-visibility signal (60m)

QZ-A3-2 Quiz — Crisis diagnosis (8 items, 15m)

WS-A3-2 Workshop — Triage the Crisis (120m)

Day 6 · AM Phase Gate Defense

- Phase Gate mechanics recap and Steering Committee role-play briefing (45m)

QZ-A3-3 Quiz — Phase Gate defense readiness (8 items, 15m)

WS-A3-3 Workshop — Defend the Gate (150m)

Day 6 · PM Executive Briefing & Program Close

- Executive-briefing best practices recap (45m)

QZ-A3-4 Quiz — Executive communication (8 items, 15m)

WS-A3-4 Workshop — Brief and Close (150m)

EXM-A3 Facilitator rubric across the 4 capstone workshops (25 pts each, 100 total) · pass mark 75/100

Capstone — Leading a Full Transformation Program End-to-End

WS-A3-1

90m

Stand Up the Program

1. Build the M1–M9 chain: hierarchy, charter, OBS, stakeholder map
2. Set an initial ADKAR baseline for the scenario client
3. Assign and document team roles for the simulation

WS-A3-3

150m

Defend the Gate

1. Record a Phase Gate Joint Decision reflecting the crisis-adjusted data
2. Name and justify the Accountable role
3. Present the decision to a facilitator/peer panel

WS-A3-2

120m

Triage the Crisis

1. Diagnose the Divergence Pattern (M11) and the resistance entries (M16)
2. Assess the saturation risk (M12) and the sponsor-visibility signal (M13)
3. Log a justified response for each

WS-A3-4

150m

Brief and Close

1. Generate and edit an AI-assisted executive narrative
2. Present a 10-minute portfolio-level readiness briefing
3. Record a sustainment sign-off closing the simulated program

Facilitator logistics

Cohort size

Cap at 12 participants per journi environment so every workshop step is individually completable, not just observed.

Environment

Each cohort gets its own seeded Windows-installed journi instance (Atlas Industrial Group demo tenant); "Reset Demo Data" between cohorts, never mid-cohort.

Facilitator ratio

One lead facilitator per cohort; the Capstone (TRN-A3) requires a second facilitator to run the crisis-injection and panel-defense roles.

Pacing

Half-days run 3.5–4 hours including breaks; the golden-rule blocks (content → quiz → workshop → debrief) are not compressible.

Three credentials, one continuous journey
