EXECUTIVE SUMMARY

A complete AI skills cycle, documented end to end

Santéora Private Clinics Group · 2,600 employees · AI Skills Full Run 2026 — Santéora Private Clinics Group

100 %
of the run completed — 35 end-to-end processes

35 / 40
people answered the questionnaires (88 %)

6
trainings in 2 programs, prioritized by impact

training

What the case shows

- Diagnosis: “Information systems” is the weakest axis (2 / 5); the largest skill gap is “AI bed and staff capaci (average gap 3.0).
- 10 training needs were validated and grouped into 6 themes, deployed in 4 roadmap initiatives over thre
- Kirkpatrick results 77 % · 74 % · 75 %; training ROI 108 % (target ≥ 100%).
- 37 documents published, 1,077 pages; the Training Engineering Report alone has 193 pages.

01. The clinic group and the project

5. Santéora Private Clinics Group

CONTEXT

Santéora Private Clinics Group

Santéora Private Clinics Group operates in the Healthcare Providers sector, in Casablanca, with 2600 employees

Topic	Content
Vision	Become the reference of Healthcare Providers in the region, with teams trained to the best standards.
Mission	Deliver safe, compliant service through skilled people and controlled processes.
Values	Commitment · Excellence · Sharing
Context	Strong competition, stricter ISO 7101 audits and the arrival of AI triage and clinical decision support.
Products — existing	Core services of Clinical Care & Nursing
Products — new	Digital services supported by AI triage and clinical decision support
Market segments	Large accounts · Public sector · Individual customers

6. Key dates and SWOT of the clinic group

GROUP PROFILE

Key dates and SWOT of the clinic group

2008
Company founded

2014
Second site opened

2019
ISO 7101 certification

202
Digital t
launche

Strengths

- Experienced, committed team
- Good knowledge of the market
- Stable processes

Areas for improvement

- Low use of AI triage and clinical decision support
- Reporting kept in spreadsheets
- Low use of AI medical imaging assistance
- Little versatility between roles
- Low use of AI bed and staff capacity planning

Opportunities

- Demand for digital services
- Training contracts refunded by OFPPT

Threat

- Stricter
- Depart

14. What the teams said about the last training plan

THE PREVIOUS PLAN

What the teams said about the last training plan

What did you notice about the n-1 training plan?

• Good participation, but little follow-up after the sessions.
• Trainings were chosen late in the year and with little link to our objectives.

What were the strengths of the n-1 plan?

• Sessions held on site, close to the teams.
• Practical trainers who knew our sector.

What improvemen bring?

• Supervisors use the
• Fewer errors on ISO

What were the challenges of the n-1 plan?

• Measuring the effect of the trainings.
• Releasing people from the job during peaks.

What did you appreciate and like about the n-1 plan?

• The workshops on real cases.
• The exchange between sites.

For a new training you like to see dor

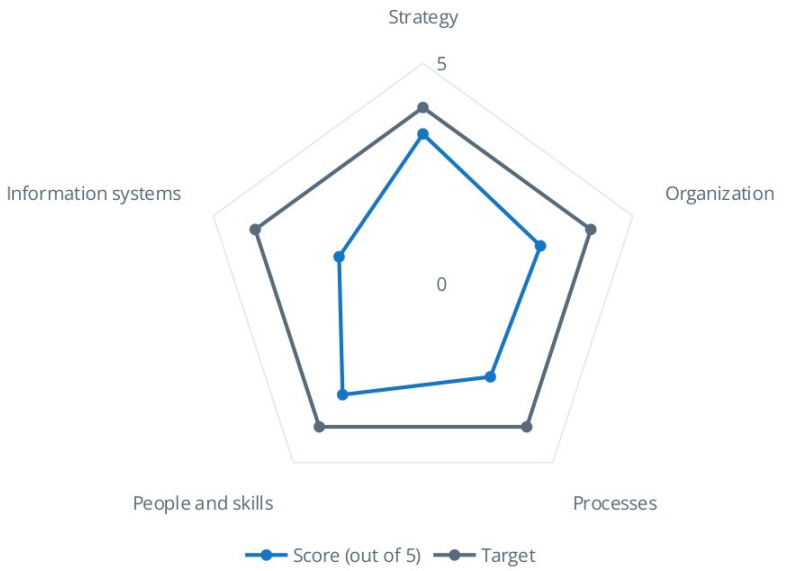

• Shorter half-day forn each time.
• A plan built from the function.

Source: TER chapter 2 — 62 trainings attended are listed in section 2.1.

15. Five axes scored, maturity one level below target

DIAGNOSIS AND MATURITY

Five axes scored, maturity one level below target

Diagnostic score by axis against target level 4 (TER 1.9).

Axis	Score	Reading
Strategy	3.4	Strength
Organization	2.8	Partly in
Processes	2.6	Partly in
People and skills	3.1	Partly in
Information systems	2	Priority f

Model	Current
CMM maturity (CMM)	3
Leadership maturity (Leadership)	3

Maturity models (TER 1.10).

16. Where each function stands at each decision level

PERFORMANCE BY FUNCTION

Where each function stands at each decision level

Performance by decision level: MS strategic management, MO operational management, OP operational.

Function	MS	MO	OP	Main gaps
Operations	88% Amber	83% Amber	76% Amber	AI triage and clinical decision support · AI medical imagin cap...

Clinical Care & Nursing	88% Amber	73% Amber	53% Red	AI triage and clinical decision support · AI medical imagin cap...

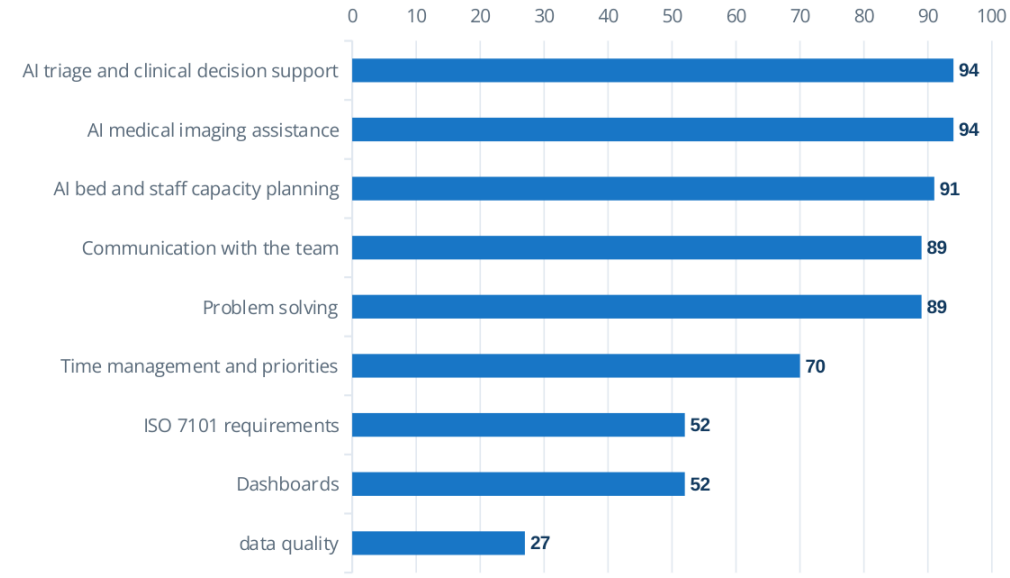

Maturity heatmap on the fixed red → green status scale (TER 3.2).

17. The competences people asked for, by number of mentions

COMPETENCES NAMED IN THE INTERVIEWS

The competences people asked for, by number of mentions

Consolidated from 30 responses.

Mentions across all answers (TER 3.3).

Reading

The two AI clinical them
mentions), followed by
and problem solving: th
training with practical w
clinics' own cases.

18. Self-assessment of the respondents, weakest first

SOFT SKILLS AND LEADERSHIP

Self-assessment of the respondents, weakest first

Competence	Average (1–5)	n
Rewards and motivation	3.2	30
Training and effectiveness	3.2	30
Positive thinking and positive results (focus on solutions, break a b...	3.3	30
Management by objectives and strategic vision applied to oneself	3.3	30
Communication with oneself	3.3	29
Communication with the team	3.3	29
Managing with flexibility	3.3	28
Management by objectives and strategic vision applied to others	3.4	29

Leadership levels reached (TER 3.7).

19. From measured gaps to a validated needs register

SKILL GAPS AND TRAINING NEEDS

From measured gaps to a validated needs register

Competency	People	Avg gap	Critical
AI medical imaging assistance	3	2.0	0
AI bed and staff capacity planning	2	3.0	2
AI triage and clinical decision support	3	1.0	0

Skill gaps by competency (TER 3.40).

#	Theme	Source
1	AI bed and staff capacity planning	Diagnostic
2	Responsible AI and data protection	Skills gap
3	AI bed and staff capacity planning	GPEC
4	AI medical imaging assistance	Demand
5	Prompting and generative AI at work	SWOT
6	AI medical imaging assistance	Diagnostic
7	AI triage and clinical decision support	Skills gap
8	AI literacy for all staff	GPEC
9	AI triage and clinical decision support	Demand
10	AI literacy for all staff	SWOT

Training needs register (TER 3.41): every need traced to its source.

20. Clinical Care & Nursing

FOCUS ON THE CORE FUNCTION

Clinical Care & Nursing

Needs, assessment and competences of the function that carries the strategic objective SO-1

21. How the teams use AI and what holds them back

USE OF AI TODAY

How the teams use AI and what holds them back

Strategic planning practice
Is there a strategic plan with macro business plans at company level?
Are this strategic plan and the macro business plans implemented?
Are they monitored?
Are they subject to continuous improvement?

Most frequent answers of 35 respondents (TER 3.45, 3.46).

22. What the respondents want the training to change

OBJECTIVES AND EXPECTED RESULTS

What the respondents want the training to change

Objective	SMART formulation	Mentions
Improve customer satisfaction	Satisfaction score ≥ 85% by end of year	28
Reduce non-quality costs	-20% rework in 12 months	28
Develop human capital	80% of critical roles certified	8

Expected results

• Fewer errors and faster s

• Teams able to use AI me assistance safely.

• Better audit results and s

• Teams able to use AI bec planning safely.

• Teams able to use AI tria support safely.

Source: TER 3.42 (64 objectives stated) and 3.9.

03. Training Engineering Report

24. Training Engineering Report and Training Plan

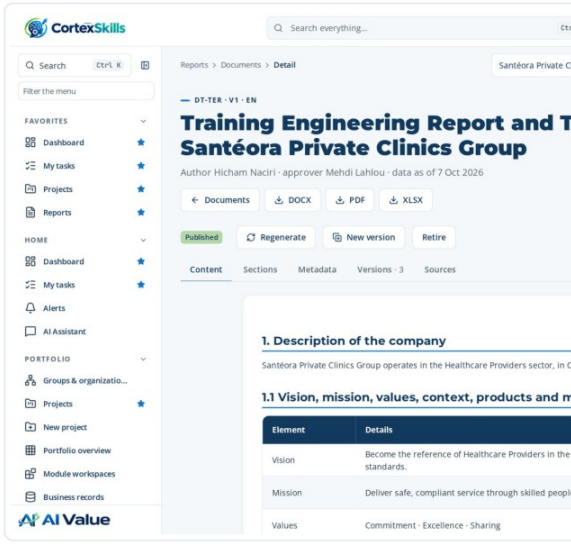

STRUCTURE OF THE REPORT

Training Engineering Report and Training Plan

Version 1 · author Hicham Naciri · approved by Mehdi Lahlou

Chapter	Sections
1. Description of the company	14
2. The previous training plan	2
3. Competence needs	50
4. Perspectives	3
5. The prioritized training plan	23
6. Risks, controls and indicators	2
7. Annexes — interview forms	36

Plus identification, data sources and approval.

The report in the document editor.

25. Needs linked to the strategy and to the HR orientations

STRATEGIC ORIENTATIONS AND HR

Needs linked to the strategy and to the HR orientations

Priority axes named by the General Management: Leadership and performance · AI triage and clinical decision support · Dashboards

ID	Objective
SO-1	Adopt AI triage and clinical decision support across Clinical Care & Nursing by end 2027
SO-2	Zero major findings in ISO 7101 audits

HR orientations

• Update job descriptions, individual objectives and the yearly assessment; build career paths.

Change management

1) Focus and prioritization · 2) Stay positive · 3
up with short daily repetitions · Patience · Lea
Progressiveness.

Source: TER sections 3.1, 3.5 and 3.6.

26. Four initiatives deployed in three waves

PERSPECTIVES AND ROADMAP

Four initiatives deployed in three waves

The perspectives take into account the strategic orientations, the SWOT and improvement axes, the HR orientations and made in the face-to-face meetin...

Wave 1

- AI triage and clinical decision support — impact 5
- AI literacy for all staff — impact 5

Wave 2

- AI medical imaging assistance — impact 4

Wave 3

- AI bed and staff c impact 3

#	Improvement axis	Implemented
1	AI triage and clinical decision support	60%
2	AI medical imaging assistance	65%
3	AI bed and staff capacity planning	70%
4	AI literacy for all staff	75%

Source: TER chapter 4 and section 4.1.

27. Each risk reduced by named controls

RISKS AND CONTROLS

Each risk reduced by named controls

ID	Risk or opportunity	Category	Inherent	Residual	Controls
RISK-014	Low learner and user adoption	Adoption	16	8	CTRL-081
RISK-017	Critical knowledge lost with expert departure	Operational	16	8	CTRL-070; CT
RISK-001	Unauthorized access to tenant data	Security	20	6	CTRL-001; CT
RISK-005	Training plan misaligned with strategy	Strategic	16	6	CTRL-049; CT
RISK-006	Inaccurate skills data leading to wrong needs	Data quality	15	6	CTRL-064; CT
RISK-030	Position descriptions diverge from reality	Organizational	12	6	CTRL-066
RISK-007	Unverified AI content in the Training Engineering Report	AI	16	5	CTRL-041; CT
RISK-009	Expired mandatory certification	Compliance	20	5	CTRL-053; CT
RISK-031	Site deployment deviates from group plan	Operational	12	5	CTRL-071

Top 9 of 35 risks by residual score (TER chapter 6).

28. Indicators followed every month during the run

PROJECT INDICATORS

Indicators followed every month during the run

ID	Indicator	Target	Latest value
KPI-003	Critical gap rate	≤ 10%	2026-10: 8.2
KPI-004	Training Engineering Report cycle time	≤ 30 days	2026-10: 24.6
KPI-005	Design approval lead time	≤ 20 days	2026-10: 16.4
KPI-007	Content publication lead time	≤ 15 days	2026-10: 12.3
KPI-008	Session fill rate	≥ 85%	2026-10: 91.8
KPI-009	Plan realization rate	≥ 90%	2026-10: 97.2
KPI-010	Learner completion rate	≥ 80%	2026-10: 86.4
KPI-012	Average Level 1 satisfaction	≥ 4.2	2026-10: 4.5
KPI-013	Skill progression rate	≥ 70%	2026-10: 75.6
KPI-015	Training record correction rate	≤ 1%	2026-10: 0.82

10 of the 61 indicators of TER section 6.1.

04. Training Plan

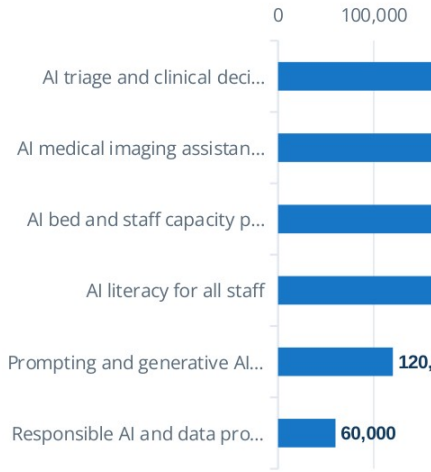

30. Six themes ranked by impact and urgency

PRIORITIZED PLAN

Six themes ranked by impact and urgency

Plan 2026 — status Locked — budget 1,260,000.

#	Theme	Days	Groups	Budget
1	AI triage and clinical decision support	3	6	360,000
2	AI medical imaging assistance	2	4	300,000
3	AI bed and staff capacity planning	2.5	3	240,000
4	AI literacy for all staff	1.5	3	180,000
5	Prompting and generative AI at work	1	2	120,000
6	Responsible AI and data protection	2	2	60,000

Budget by theme.

31. Two programs, six trainings, clear prerequisites

PROGRAMS AND TRAININGS

Two programs, six trainings, clear prerequisites

Code	Program	Strategic axis	Trainings
PRG-1	AI skills for Clinical Care & Nursing	Execution of the core function	TR-AI-01, TR-AI-02,
PRG-2	AI foundations for all staff	Leadership, performance and responsible use	TR-AI-04, TR-AI-05,

ID	Training	Level	Duration	Prerequisites
TR-AI-01	AI triage and clinical decision support	Intermediate	3 day(s)	Basic digital literacy; the Foundation t
TR-AI-02	AI medical imaging assistance	Intermediate	2 day(s)	Basic digital literacy; the Foundation t
TR-AI-03	AI bed and staff capacity planning	Advanced	2.5 day(s)	TR-AI-01 or equivalent experience
TR-AI-04	AI literacy for all staff	Foundation	1.5 day(s)	None — open to all staff
TR-AI-05	Prompting and generative AI at work	Foundation	1 day(s)	None — open to all staff
TR-AI-06	Responsible AI and data protection	Intermediate	2 day(s)	Basic digital literacy; the Foundation t

day plan (60 min)
Quiz · Final assessment
min)
Workshop — individual
review (90 min)

34. Why each audience should take the training

VALUE FOR EACH PERSONA

Why each audience should take the training

Training TR-AI-01 — behaviour, pain points and hopes of each persona

Executive sponsor — General Manager

Decides on facts presented in short steering meetings; delegates execution to the management team; follows a few indicators.

Training spend with no visible link to the strategic objectives; results of the previous plan hard to prove; ISO 7101 audits that expose competence gaps.

A prioritized plan that serves the strategy, a measurable return, and a management team able to lead the change.

Manager — director, head of department, process owner

Balances daily operations and improvement projects; prefers practical, short formats; relies on key people in the team.

Team absent from the job during long trainings; skills gaps on critical activities of Clinical Care & Nursing; processes not documented or without an owner.

Trainings that solve the function's real problems, applied on the job the following week, with indicators the manager can follow.

Team me… Care & Nu…

Learns by doing and fro… more than a computer; … changes in daily work.

New tools introduced w… theoretical trainings far … making mistakes with A… decision support.

Practical skills recognize… rework, and a clear path…

39. Results measured at three Kirkpatrick levels

EVALUATION

Results measured at three Kirkpatrick levels

77 %
1 — Reaction

74 %
2 — Learning

75 %
3 — Behaviour

Level	What is measured	When	Instrument
1 — Reaction	Satisfaction and perceived usefulness	End of each session	Satisfaction questionnaire
2 — Learning	Knowledge and skills acquired	End of the training	Pre- and post-test, case study
3 — Behaviour	Use of the skills at the workstation	Three months after	Manager observation grid
4 — Results	Effect on the indicators of the function	Six to twelve months after	Indicators of the function (KPI)

Certifications (TER 5.10): 4 valid, 1 expiring, 1 expired — the expired one triggers an alert and a renewal session.

41. Audit report — Santéora Private Clinics Group

INTERNAL AUDIT

Audit report — Santéora Private Clinics Group

Conforming with one minor nonconformity to correct within 60 days.

Findings by grade.

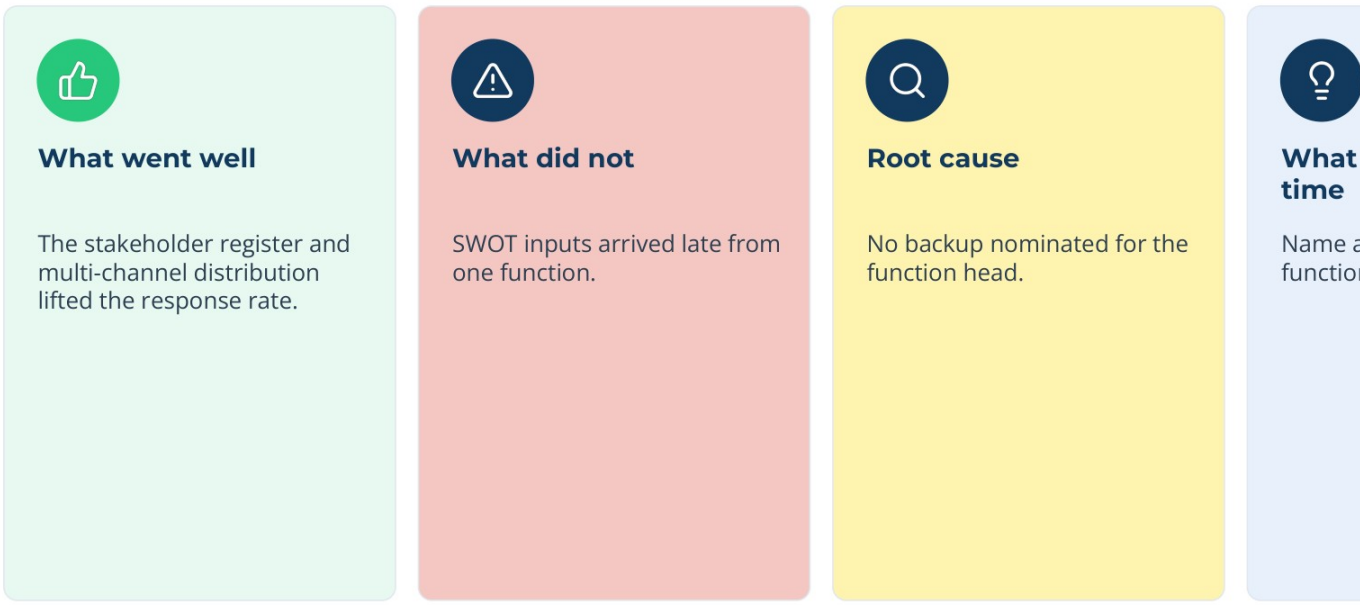

ID	Grade	Requirement	Statement
F-1	Minor nonconformity	ISO 7101 7.2	Two trainers have on file.
F-2	Observation	ISO 7101 9.1	Level 3 evaluation scheduled.
F-3	Opportunity for improvement	ISO 7101 7.1.6	Capture lessons le session.
F-4	Strength	ISO 7101 7.2	Needs analysis fu objectives.

Strengths: Clear needs analysis; strong management involvement; complete attendance records.
Follow-up: Verification of the corrective action at the next steering committee.

Dashboard of the clinic group.

49. What the clinic group has at the end of the cycle

CONCLUSION

What the clinic group has at the end of the cycle

- A Training Engineering Report of 193 pages, built from 35 answers, 40 stakeholders and the diagn function.
- A locked Training Plan: 6 trainings, half-day agendas, a value proposition per persona and a budge
- Evaluation at three Kirkpatrick levels, an ROI study, followed certifications and an internal audit wi nonconformity to correct.
- 37 published documents ready for an accreditation audit (ISO 7101, JCI), each traced to the data ar produced it.
- Next: waves 2 and 3 of the roadmap and the level-4 (results) evaluation six to twelve months after
