E2E-04 — Roadmap-to-Curriculum Design....245
E2E-05 — Design-to-Delivery....250
E2E-06 — Learner-Journey-to-Engagement....256
E2E-13 — Content-Curate-to-Retire....264
E2E-14 — Extended-Enterprise-Training....268
Phase 5 — Evaluation, compliance & impact....271
E2E-07 — Assessment-to-Evaluation....271
E2E-08 — Learning-to-ROI....275
E2E-09 — Compliance-to-Certification....279
AUTO-E2E-01 — Automotive Compliance-to-Certification Readiness....282
Phase 6 — Talent, knowledge & continuous improvement....285
E2E-10 — Talent-to-Mobility....285
E2E-11 — Onboarding-to-Productivity....291
E2E-12 — Knowledge-Capture-to-Transfer....294
E2E-31 — Engagement-to-Roadmap....297
5. Scenario 3 — Souss BTP Solutions....303
Context....303
Phase 0 — Enablers (run across all phases)....303
E2E-15 — Data-AI-Integration....303
E2E-17 — Change-to-Adoption....306
E2E-18 — Quality-Risk-Improvement....310
Phase 1 — Scope & evidence....314
E2E-32 — Scope-of-Work-to-Engineering-Plan....314
E2E-33 — Questionnaire-to-Response-Collection....317
E2E-19 — Consulting Engagement-to-Closure....321
E2E-24 — Competitive Intelligence-to-Strategy....327
SME-E2E-01 — SME Snapshot-to-Plan in 30 days....331
Phase 2 — Diagnosis....333
E2E-20 — Multi-Axis Diagnostic-to-Maturity Report....333
E2E-25 — Job Architecture-to-Competency Map....338
E2E-26 — GPEC-to-Training Plan....343
E2E-27 — Demand Collection-to-Consolidation....347
E2E-28 — Performance Assessment-to-RAG Dashboard....350
E2E-29 — Functional SWOT-to-Improvement Axes....354
E2E-02 — Skills-to-Gap Diagnosis....358
E2E-21 — Previous Plan Impact-to-Strategy Update....362

Phase 3 — Training Engineering Report & plan....366
E2E-01 — Strategy-to-Learning Plan....366
E2E-03 — Needs-to-Training Engineering Report & Roadmap....371
E2E-30 — Prioritization-to-Resource Plan....377
E2E-22 — Multi-Site Plan-to-Deployment....381
E2E-23 — Regulatory Submission-to-Validation....385
E2E-16 — Vendor-to-Finance....388
AEC-E2E-02 — AEC & Construction Critical-Skills-to-Transformation Plan....391
SME-E2E-02 — SME Funding-to-Refund....394
Phase 4 — Design & delivery....396
E2E-04 — Roadmap-to-Curriculum Design....396
E2E-05 — Design-to-Delivery....400
E2E-06 — Learner-Journey-to-Engagement....407
E2E-13 — Content-Curate-to-Retire....415
E2E-14 — Extended-Enterprise-Training....418
SME-E2E-03 — SME Upskill-to-Adoption....421
Phase 5 — Evaluation, compliance & impact....423
E2E-07 — Assessment-to-Evaluation....423
E2E-08 — Learning-to-ROI....427
E2E-09 — Compliance-to-Certification....431
AEC-E2E-01 — AEC & Construction Compliance-to-Certification Readiness....434
Phase 6 — Talent, knowledge & continuous improvement....437
E2E-10 — Talent-to-Mobility....437
E2E-11 — Onboarding-to-Productivity....442
E2E-12 — Knowledge-Capture-to-Transfer....445
E2E-31 — Engagement-to-Roadmap....449

6. Scenario 4 — Coopérative Laitière Al Baraka....454

Context....454
Phase 0 — Enablers (run across all phases)....454
E2E-15 — Data-AI-Integration....454
E2E-17 — Change-to-Adoption....457
E2E-18 — Quality-Risk-Improvement....461
Phase 1 — Scope & evidence....465
E2E-32 — Scope-of-Work-to-Engineering-Plan....465
E2E-33 — Questionnaire-to-Response-Collection....469
E2E-19 — Consulting Engagement-to-Closure....473
E2E-24 — Competitive Intelligence-to-Strategy....479
SME-E2E-01 — SME Snapshot-to-Plan in 30 days....483
Phase 2 — Diagnosis....485

E2E-20 — Multi-Axis Diagnostic-to-Maturity Report....485
E2E-25 — Job Architecture-to-Competency Map....490
E2E-26 — GPEC-to-Training Plan....494
E2E-27 — Demand Collection-to-Consolidation....498
E2E-28 — Performance Assessment-to-RAG Dashboard....501
E2E-29 — Functional SWOT-to-Improvement Axes....505
E2E-02 — Skills-to-Gap Diagnosis....509
E2E-21 — Previous Plan Impact-to-Strategy Update....513
Phase 3 — Training Engineering Report & plan....517
E2E-01 — Strategy-to-Learning Plan....517
E2E-03 — Needs-to-Training Engineering Report & Roadmap....522

E2E-31 — Engagement-to-Roadmap 743

1. About this guide

This guide follows five complete runs of CortexSkills, from the first strategic objective to the last improvement action. Each run is a real scenario of the demonstration data: a large hospital group, a large car maker, a construction SME, a dairy cooperative and a multi-sector services group.

Every step is written the same way: the step, then, just after it, what to type. Values are the ones recorded in the demonstration data for that organization; type them as shown, or your own values in the same form.

A run has seven phases. Each phase holds end-to-end processes; each process holds user tasks; each task holds steps. Phase gates close phases 1 to 6.

The five scenarios

Scenario	Organization	Run	Sign in as
Scenario 1	Maghreb Hospitals Group — Healthcare Providers (Large company)	AI skills · Full run	headld@maghrebhospitalsgr.ma
Scenario 2	Atlas Motors Kénitra — Automotive (Large company)	Digital skills · Full run	headld@atlasmotorskenitra.ma
Scenario 3	Souss BTP Solutions — AEC & Construction (SME)	Digital skills · SME track	headld@soussbtpsolutions.ma
Scenario 4	Coopérative Laitière Al Baraka — Food & Beverage (SME)	AI skills · SME track	headld@cooperativelaitier.ma
Scenario 5	Horizon Services Group — Multi-sector services (Large company)	AI skills · Full run	headld@horizonservices.ma

How a step is written

- Step code and name — what the step asks, and the role that does it.
- Type: — the values to enter, field by field. For a table step, one line per row.
- Then — the button that closes the step.

Sign in at http://localhost:5173 with the e-mail shown and the password CortexSkills#2026

Sign in at http://localhost:5173 with the e-mail shown and the password CortexSkills#2026.

2. Before you start

1. Choose the organization and the project in the selectors at the top of the screen.
2. Open Projects, then the run. The workspace lists the seven phases and their processes.
3. Click a process to open it, then click a task in its list. The task panel opens on the right.
4. In the panel, the Steps section lists the steps of the task. Click a step to open it.

- A table step: click Add row, type in the first cell, press Tab to move to the next cell. A row is saved half a second after you leave it.
- To see one row with large fields, click the Open icon at the end of the row (Row Editor). Back returns to the table and keeps what you typed.
- A choice list offers the values of the organization; choose Custom value to type your own.
- A form step: fill the fields; each field is saved when you leave it.
- When the step is complete, click Complete the step. Its rows go to the register shown under the step.

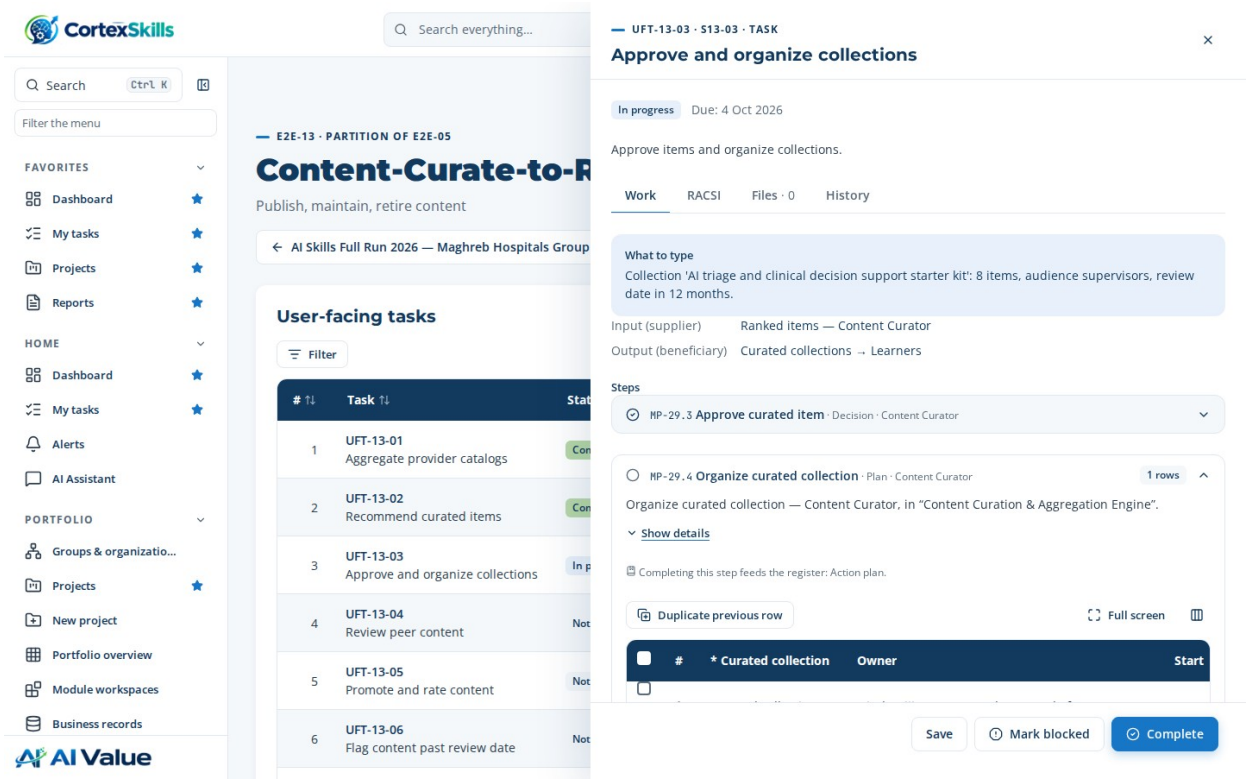

Figure 1 — Task panel with its typed steps

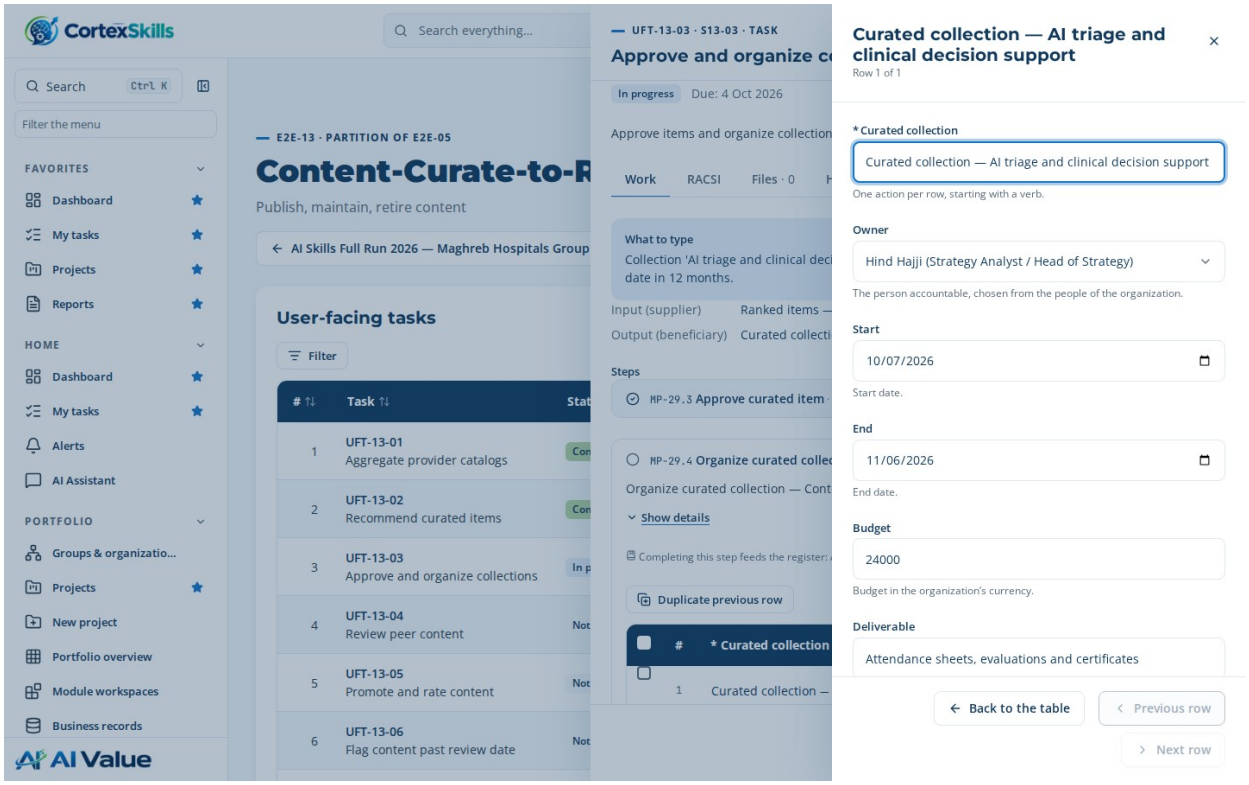

Figure 2 — Row Editor of a table step

Your password

1. Click the profile icon at the top right, then Change password.
2. Type the current password, then the new one twice: at least 12 characters with upper and lower case letters, a digit and a symbol (for example Rabat#Skills2026).
3. Click Save. If you forget it, ask the administrator of your organization for a temporary password.

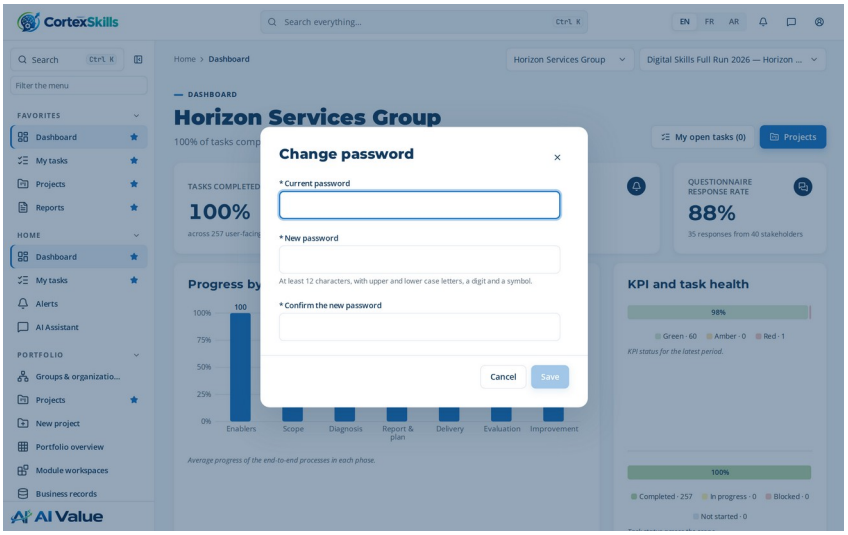

Figure 3 — Change password (profile menu)

3. Scenario 1 — Maghreb Hospitals Group

Context

Context	
Sector	Healthcare Providers
Size	Large company · 4700 employees · Casablanca
Run	AI Skills Full Run 2026 — Maghreb Hospitals Group — AI skills, Full run
Standards	ISO 7101, JCI Standards, ISO 15189
Themes	AI triage and clinical decision support · AI medical imaging assistance · AI bed and staff capacity planning · Electronic health records (EHR)
Sign in as	headld@maghrebhospitalsgr.ma · CortexSkills#2026
Scope of the run	35 end-to-end processes, 265 user tasks and 463 steps.

Phase 0 — Enablers (run across all phases)

Enablers run across all phases

E2E-15 — Data-AI-Integration

Goal: Govern data, AI, integrations

Starts when: New integration, data source or AI use case to govern. **Ends with:** Integrations, data and AI governed with health, retention and usage reviewed.

Task UFT-15-01 — Register external integration · done by Platform Administrator

Input: Integration request → **Output:** Integration record

Step MP-16.1 — Register external integration (Platform Administrator)

Type:

Row 1 — External integration: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Ghita Amrani · **Source:** Questionnaire results

Row 2 — External integration: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hamza Amrani · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "External integration register".

Result to record in the task: Register integration 'HRIS — Workday' (INT-HR-01); credential reference stored encrypted.

When every step is complete, click Complete in the task panel.

Task UFT-15-02 — Map fields and check health · done by IT Architect

Input: Integration record → **Output:** Healthy integration

Step MP-16.2 — Map integration fields (IT Architect)

Type:

Row 1 — Integration fields: AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hamza Amrani · **Source:** Annual performance review

Row 2 — Integration fields: AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Leila Sefrioui · **Source:** Audit report

Then click Complete the step. The rows go to the register "Integration fields register".

Step MP-16.3 — Check integration health (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Map fields: employee_id → matricule; position → poste. Health check: success.

When every step is complete, click Complete in the task panel.

Task UFT-15-03 — Run HRIS synchronisation · done by IT Architect

Input: Healthy integration → **Output:** Synchronised directory

Step MP-16.4 — Run HRIS synchronisation (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-16.5 — Review synchronisation rejections (IT Architect)

Type:

Synchronisation rejections: Synchronisation rejections

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-11-09

Then click Complete the step.

Result to record in the task: Sync run: 1,204 records updated, 3 rejected (missing position) — corrected.

When every step is complete, click Complete in the task panel.

Task UFT-15-04 — Set data retention rule · done by Data Protection Officer

Input: Synchronised directory → **Output:** Retention rules

Step MP-16.6 — Set data retention rule (Data Protection Officer)

Type:

Row 1 — Data retention rule: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Data retention rule: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Retention: questionnaire responses 3 years; training records 10 years.

When every step is complete, click Complete in the task panel.

Task UFT-15-05 — Maintain AI use case register · done by Platform Administrator

Input: Retention rules → **Output:** AI register

Step MP-16.7 — Maintain AI use case register (Platform Administrator)

Type:

AI use case register: AI use case register

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-07-16

Then click Complete the step.

Result to record in the task: Add custom use case 'Shift-report summarizer' (Assistive), version 1.

When every step is complete, click Complete in the task panel.

Task UFT-15-06 — Set AI activation per scope · done by Platform Administrator

Input: AI register → **Output:** AI activation state

Step MP-16.8 — Set AI activation per scope (Platform Administrator)

Type:

Row 1 — AI activation per scope: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — AI activation per scope: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Step MP-24.1 — Enable personalization per scope (Platform Administrator)

Type:

Row 1 — Personalization per scope: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Personalization per scope: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Activate AIUC-35 and AIUC-36 for the organization; override Off for pilot project B.

When every step is complete, click Complete in the task panel.

Task UFT-15-07 — Review AI usage log · done by IT Architect

Input: AI activation state → **Output:** AI usage & governance report

Step MP-16.9 — Review AI usage log (IT Architect)

Type:

AI usage log: AI usage log

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-08-03

Then click Complete the step.

Step MP-28.2 — Validate dataset quality (Performance Analyst)

Type:

Decision: Approved

Dataset quality: Dataset quality

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-08-02

Decided by: Meryem Sefrioui

Then click Complete the step.

Result to record in the task: Usage review: 412 suggestions — 71% accepted, 20% edited, 9% rejected.

When every step is complete, click Complete in the task panel.

E2E-17 — Change-to-Adoption

Goal: Drive sustained adoption and culture change

Starts when: Approved plan or new platform capability requiring adoption. **Ends with:** Sustained adoption reached with low-adoption groups reinforced.

Task UFT-17-01 — Assess change impact · done by Change Manager

Input: Approved plan → **Output:** Impact assessment

Step MP-19.1 — Assess change impact (Change Manager)

Type:

Row 1 — Change impact: AI triage and clinical decision support · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Change impact: AI medical imaging assistance · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 5 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Change impact: AI bed and staff capacity planning · **Criterion:** Cost · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Impact: Clinical Care & Nursing supervisors high, operators medium, support functions low.

When every step is complete, click Complete in the task panel.

Task UFT-17-02 — Build adoption plan · done by Change Manager

Input: Impact assessment → **Output:** Adoption plan

Step MP-19.2 — Build adoption plan (Change Manager)

Type:

Row 1 — Adoption plan: Adoption plan — AI triage and clinical decision support · **Owner:** Hajar Amrani · **Start:** 2026-11-03 · **End:** 2026-12-03 · **Budget:** 61000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Adoption plan: Adoption plan — AI medical imaging assistance · **Owner:** Omar Alaoui · **Start:** 2026-11-10 · **End:** 2026-12-10 · **Budget:** 80000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Adoption plan: sponsor message, 6 champions, weekly 15-minute huddles for 8 weeks.

When every step is complete, click Complete in the task panel.

Task UFT-17-03 — Launch communication campaign · done by Change Manager

Input: Adoption plan → **Output:** Campaign

Step MP-19.3 — Launch communication campaign (Change Manager)

Type:

Row 1 — Communication campaign: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-10-31

Row 2 — Communication campaign: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-11-07

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Campaign 'AI triage and clinical decision support — why it matters' on e-mail, intranet and screens.

When every step is complete, click Complete in the task panel.

Task UFT-17-04 — Open community space · done by Knowledge Manager

Input: Campaign → **Output:** Community space

Step MP-12.3 — Create community space (Knowledge Manager)

Type:

Row 1 — Community space: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Zineb Squalli · **Source:** Interview with the function head

Row 2 — Community space: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Omar Bouzidi · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Community space register".

Step MP-12.4 — Moderate community posts (Knowledge Manager)

Type:

Community posts: Community posts

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-08-04

Then click Complete the step.

Step MP-26.1 — Create learning cohort group (Knowledge Manager)

Type:

Row 1 — Learning cohort group: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Zineb Squalli · **Source:** Interview with the function head

Row 2 — Learning cohort group: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Omar Bouzidi · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Learning cohort group register".

Result to record in the task: Community space 'AI triage and clinical decision support Q&A' opened; moderation rules published.

When every step is complete, click Complete in the task panel.

Task UFT-17-05 — Track adoption usage · done by L&D Analyst

Input: Community space → **Output:** Usage indicators

Step MP-19.4 — Track adoption usage (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-08.5 — Monitor engagement indicators (L&D Analyst)

Type:

Row 1 — Engagement indicators: KPI-013 (Skill progression rate) · **Period:** 2026-Q1 · **Value:** 81 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — Engagement indicators: KPI-014 (Report on-time delivery) · **Period:** 2026-Q2 · **Value:** 78 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Weekly active users: 64% of the target population.

When every step is complete, click Complete in the task panel.

Task UFT-17-06 — Identify low-adoption groups · done by Change Manager

Input: Usage indicators → **Output:** Low-adoption list

Step MP-19.5 — Identify low-adoption groups (Change Manager)

Type:

Row 1 — Low-adoption groups: AI triage and clinical decision support · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Imane Berrada · **Source:** Annual performance review

Row 2 — Low-adoption groups: AI medical imaging assistance · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Hind Hajji · **Source:** Audit report

Then click Complete the step. The rows go to the register "Low-adoption groups register".

Result to record in the task: Low adoption confirmed for night shift (31%); one group rejected as false positive.

When every step is complete, click Complete in the task panel.

Task UFT-17-07 — Run reinforcement actions · done by Change Manager

Input: Low-adoption list → **Output:** Adoption dashboard

Step MP-19.6 — Run reinforcement actions (Change Manager)

Type:

Row 1 — Reinforcement actions: AI triage and clinical decision support — half-day workshop · **Date:** 2026-08-19 · **Trainer:** Atlas Formation Conseil · **Participants:** 12 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Reinforcement actions: AI medical imaging assistance — half-day workshop · **Date:** 2026-08-26 · **Trainer:** Maghreb Learning Partners · **Participants:** 11 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-08.6 — Trigger re-engagement nudge (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Reinforcement: night-shift coaching sessions; adoption reached 58% after 4 weeks.

When every step is complete, click Complete in the task panel.

E2E-18 — Quality-Risk-Improvement

Goal: Improve processes and mitigate risk

Starts when: Risk logged, periodic quality review due or control test scheduled. **Ends with:** Risks mitigated, actions evaluated by a different person, controls rated.

Task UFT-18-01 — Log risk or opportunity · done by Quality Manager

Input: Issue or signal → **Output:** Risk register entry

Step MP-20.1 — Log risk or opportunity (Quality Manager)

Type:

Row 1 — Risk or opportunity: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Meryem Sefrioui · **Source:** Audit report

Row 2 — Risk or opportunity: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Mehdi Hajji · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Risk or opportunity register".

Result to record in the task: Risk 'Trainers unavailable in Q3': likelihood 3, impact 4, score 12.

When every step is complete, click Complete in the task panel.

Task UFT-18-02 — Assign mitigation action · done by Quality Manager

Input: Risk register entry → **Output:** Mitigation action

Step MP-20.2 — Assign mitigation action (Quality Manager)

Type:

Row 1 — Role: Head of L&D · **Mitigation action:** AI triage and clinical decision support · **Person:** Mehdi Hajji · **Allocation (%):** 100 · **Start:** 2026-10-30 · **Holder type:** Holder

Row 2 — Role: L&D Analyst · **Mitigation action:** AI medical imaging assistance · **Person:** Hind Ouazzani · **Allocation (%):** 50 · **Start:** 2026-11-06 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Result to record in the task: Action: contract a second vendor; owner Purchasing Officer; evaluator Quality Manager.

When every step is complete, click Complete in the task panel.

Task UFT-18-03 — Execute improvement action · done by Action Owner

Input: Mitigation action → **Output:** Executed action

Step MP-20.3 — Execute improvement action (Action Owner)

Type:

Row 1 — Improvement action: AI triage and clinical decision support — half-day workshop · **Date:** 2026-11-21 · **Trainer:** Atlas Formation Conseil · **Participants:** 19 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Improvement action: AI medical imaging assistance — half-day workshop · **Date:** 2026-11-28 · **Trainer:** Maghreb Learning Partners · **Participants:** 19 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Action done: framework contract signed with vendor B; evidence attached.

When every step is complete, click Complete in the task panel.

Task UFT-18-04 — Evaluate action effectiveness · done by Action Evaluator

Input: Executed action → **Output:** Effectiveness verdict

Step MP-20.4 — Evaluate action effectiveness (Action Evaluator)

Type:

Row 1 — Action effectiveness: AI triage and clinical decision support · **Criterion:** Cost · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Action effectiveness: AI medical imaging assistance · **Criterion:** Risk · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Verdict: effective. The evaluator is a different user from the owner.

When every step is complete, click Complete in the task panel.

Task UFT-18-05 — Review access and security · done by IT Architect

Input: Security logs → **Output:** Access review

Step MP-17.4 — Review access violation log (IT Architect)

Type:

Access violation log: Access violation log

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-09-10

Then click Complete the step.

Step MP-17.6 — Enforce login rate limit (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-17.2 — Assign roles to user (Platform Administrator)

Type:

Row 1 — Role: Training Administrator · **Roles to user:** AI triage and clinical decision support · **Person:** Hamza Amrani · **Allocation (%):** 100 · **Start:** 2026-08-09 · **Holder type:** Holder

Row 2 — Role: Platform Administrator · **Roles to user:** AI medical imaging assistance · **Person:** Leila Sefrioui · **Allocation (%):** 50 · **Start:** 2026-08-16 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Step MP-17.3 — Edit permission matrix (Platform Administrator)

Type:

Permission matrix: Permission matrix

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-09-10

Then click Complete the step.

Step MP-17.5 — Issue signed session token (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Access review: 2 dormant accounts disabled; 0 cross-tenant attempts.

When every step is complete, click Complete in the task panel.

Task UFT-18-06 — Run periodic quality review · done by Quality Manager

Input: Access review → **Output:** Quality review minutes

Step MP-20.5 — Run periodic quality review (Quality Manager)

Type:

Row 1 — Periodic quality review: AI triage and clinical decision support — half-day workshop · **Date:** 2026-08-31 · **Trainer:** Atlas Formation Conseil · **Participants:** 17 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Periodic quality review: AI medical imaging assistance — half-day workshop · **Date:** 2026-09-07 · **Trainer:** Maghreb Learning Partners · **Participants:** 11 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-09.7 — Review evaluation results (L&D Analyst)

Type:

Evaluation results: Evaluation results

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-08-15

Then click Complete the step.

Result to record in the task: Quality review minutes: 3 KPIs red, 2 actions opened, next review in 30 days.

When every step is complete, click Complete in the task panel.

Task UFT-18-07 — Update control effectiveness · done by Quality Manager

Input: Quality review minutes → **Output:** Governance register & risk heat-map

Step MP-20.6 — Update control effectiveness rating (Quality Manager)

Type:

Control effectiveness rating: Control effectiveness rating

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-08-24

Then click Complete the step.

Result to record in the task: Control CTRL-002 effectiveness: Effective; CTRL-031: Partially effective.

When every step is complete, click Complete in the task panel.

Phase 1 — Scope & evidence

E2E-32 — Scope-of-Work-to-Engineering-Plan

Goal: Define and approve the structured scope of work and stakeholder register

Starts when: New training engineering engagement, annual plan cycle, or executive request.
Ends with: Approved Scope of Work with criteria matrix and stakeholder register released to questionnaire design (E2E-33) and needs analysis (E2E-03).

Task UFT-32-01 — Define scope frame · done by Head of L&D

Input: Engagement request → **Output:** Scope frame

Step MP-53.1 — Define scope frame (Group Yes/No) (Head of L&D)

Type:

Row 1 — Scope frame (Group Yes/No): AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hicham Naciri · **Source:** HRIS export

Row 2 — Scope frame (Group Yes/No): AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Zineb Squalli · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Scope frame (Group Yes/No) register".

Step MP-53.2 — Select Organization (Head of L&D)

Type:

Decision: Approved

Organization: Organization

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-05-11

Decided by: Meryem Sefrioui

Then click Complete the step.

Result to record in the task: Group scope: No. Organization: Maghreb Hospitals Group.

When every step is complete, click Complete in the task panel.

Task UFT-32-02 — Select sector · done by L&D Analyst

Input: Sector reference list → **Output:** Sector

Step MP-53.3 — Select sector (L&D Analyst)

Type:

Decision: Approved

Sector: Sector

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-05-20

Decided by: Meryem Sefrioui

Then click Complete the step.

Result to record in the task: Sector: Healthcare Providers.

When every step is complete, click Complete in the task panel.

Task UFT-32-03 — Select decision levels · done by L&D Analyst

Input: MS/MO/OP framework → **Output:** Decision levels

Step MP-53.4 — Select decision level (MS/MO/OP/Custom) (L&D Analyst)

Type:

Decision: Approved

Decision level (MS/MO/OP/Custom): Decision level (MS/MO/OP/Custom)

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-05-29

Decided by: Meryem Sefrioui

Then click Complete the step.

Result to record in the task: Decision levels: MS, MO, OP (no custom level).

When every step is complete, click Complete in the task panel.

Task UFT-32-04 — Map functions × decision levels · done by L&D Analyst

Input: Job architecture → **Output:** Criteria matrix

Step MP-53.5 — Map functions × decision level (L&D Analyst)

Type:

Row 1 — Functions × decision level: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Imane Berrada · **Source:** Annual performance review

Row 2 — Functions × decision level: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hind Hajji · **Source:** Audit report

Then click Complete the step. The rows go to the register "Functions × decision level register".

Result to record in the task: Matrix: Clinical Care & Nursing × MS/MO/OP; Quality × MO/OP; Finance × MS/MO; HR × MS/MO.

When every step is complete, click Complete in the task panel.

Task UFT-32-05 — Select focus and add custom criteria · done by Head of L&D

Input: Strategic objectives → **Output:** Focus and custom criteria

Step MP-53.6 — Select focus (All/Digital/AI/Custom) (Head of L&D)

Type:

Decision: Approved with conditions

Focus (All/Digital/AI/Custom): Focus (All/Digital/AI/Custom)

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2027-06-16

Decided by: Meryem Sefrioui

Then click Complete the step.

Step MP-53.7 — Add custom criteria (Consultant PM)

Type:

Row 1 — Custom criteria: AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hind Hajji · **Source:** Audit report

Row 2 — Custom criteria: AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Youssef Sefrioui · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Custom criteria register".

Result to record in the task: Focus: AI. Custom criterion: 'Readiness for AI triage and clinical decision support' (weight 2.00).

When every step is complete, click Complete in the task panel.

Task UFT-32-06 — Identify stakeholders · done by HR Business Partner

Input: Employee directory → **Output:** Stakeholder list

Step MP-53.8 — Identify stakeholders (HR Business Partner)

Type:

Row 1 — Stakeholders: AI triage and clinical decision support · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Youssef Sefrioui · **Source:** HRIS export

Row 2 — Stakeholders: AI medical imaging assistance · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Hicham Naciri · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Stakeholders register".

Result to record in the task: Register 40 stakeholders: name, role, function, level, site, preferred channel (Email, Face-to-Face or Hybrid).

When every step is complete, click Complete in the task panel.

Task UFT-32-07 — Validate scope · done by Head of L&D

Input: Draft scope → **Output:** Validated scope

Step MP-53.9 — Validate and approve scope (HR Director)

Type:

Decision: Approved

Approve scope: Approve scope

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-05-30

Decided by: Meryem Sefrioui

Then click Complete the step.

Result to record in the task: Validation: every function in scope has at least 3 stakeholders; completeness 100%.

When every step is complete, click Complete in the task panel.

Task UFT-32-08 — Approve scope · done by HR Director / Consultant PM

Input: Validated scope → **Output:** Approved Scope of Work

Step MP-53.9 — Validate and approve scope (HR Director)

Type:

Decision: Approved

Approve scope: Approve scope

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-06-08

Decided by: Meryem Sefrioui

Then click Complete the step.

Step MP-53.10 — Publish scope and register stakeholders (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Approval status: Approved (version 1). Justification: scope aligned with SO-1 and SO-2.

When every step is complete, click Complete in the task panel.

Task UFT-32-09 — Publish scope and register stakeholders · done by L&D Analyst

Input: Approved Scope of Work → **Output:** Published SOW and stakeholder register

Step MP-53.10 — Publish scope and register stakeholders (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Generate the SOW document (RPT-033) and release scope and stakeholders to the questionnaire studio.

When every step is complete, click Complete in the task panel.

E2E-33 — Questionnaire-to-Response-Collection

Goal: Design, distribute and collect questionnaire responses across channels

Starts when: An approved Scope of Work becomes available (end of E2E-32). **Ends with:** Consolidated, validated questionnaire response dataset feeding needs analysis (E2E-03), diagnostic (E2E-20) and demand collection (E2E-27).

Task UFT-33-01 — Select questionnaire template · done by L&D Analyst

Input: Approved SOW → **Output:** Selected template

Step MP-54.1 — Select questionnaire template by focus (L&D Analyst)

Type:

Decision: Approved with conditions

Questionnaire template by focus: Questionnaire template by focus

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2027-06-26

Decided by: Meryem Sefrioui

Then click Complete the step.

Result to record in the task: Template: 'AI needs — Healthcare Providers' in the user's language, 5 sections.

When every step is complete, click Complete in the task panel.

Task UFT-33-02 — Elaborate questionnaire · done by L&D Analyst

Input: Template, AI prompts → **Output:** Draft questionnaire

Step MP-54.2 — Elaborate questionnaire (Load/AI/Manual) (L&D Analyst)

Type:

Row 1 — Questionnaire (Load/AI/Manual): Questionnaire (Load/AI/Manual) — AI triage and clinical decision support · **Owner:** Leila Sefrioui · **Start:** 2027-06-07 · **End:** 2027-07-07 · **Budget:** 20000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Questionnaire (Load/AI/Manual): Questionnaire (Load/AI/Manual) — AI medical imaging assistance · **Owner:** Kawtar Bennani · **Start:** 2027-06-14 · **End:** 2027-07-14 · **Budget:** 57000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Elaboration mode: AI. 24 questions generated from the approved Scope of Work.

When every step is complete, click Complete in the task panel.

Task UFT-33-03 — Tailor and validate content · done by L&D Analyst

Input: Draft questionnaire → **Output:** Validated questionnaire

Step MP-54.3 — Tailor to sector and focus (L&D Analyst)

Type:

Row 1 — Sector and focus: Sector and focus — AI triage and clinical decision support · **Owner:** Kawtar Bennani · **Start:** 2027-06-09 · **End:** 2027-07-09 · **Budget:** 60000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Sector and focus: Sector and focus — AI medical imaging assistance · **Owner:** Loubna Fassi · **Start:** 2027-06-16 · **End:** 2027-07-16 · **Budget:** 42000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Validate each question; reword 5 with Clinical Care & Nursing vocabulary; delete 2 duplicates.

When every step is complete, click Complete in the task panel.

Task UFT-33-04 — Allocate RACSI · done by Head of L&D

Input: Validated questionnaire → **Output:** RACSI allocation

Step MP-54.4 — Allocate RACSI per section (Head of L&D)

Type:

Row 1 — RACSI per section: RACSI per section — AI triage and clinical decision support · **Owner:** Loubna Fassi · **Start:** 2027-06-11 · **End:** 2027-07-11 · **Budget:** 43000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — RACSI per section: RACSI per section — AI medical imaging assistance · **Owner:** Ayoub Naciri · **Start:** 2027-06-18 · **End:** 2027-07-18 · **Budget:** 52000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Section 'Digital practices': R L&D Analyst, A Head of L&D, C Consultant PM, S IT, I CHRO (one Accountable only).

When every step is complete, click Complete in the task panel.

Task UFT-33-05 — Select distribution channels · done by Survey Administrator

Input: Stakeholder register → **Output:** Channel plan

Step MP-54.5 — Select distribution channels (L&D Analyst)

Type:

Decision: Approved

Distribution channels: Distribution channels

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-06-27

Decided by: Meryem Sefrioui

Then click Complete the step.

Result to record in the task: Channels: MS and MO by Email; OP Face-to-Face with tablets; night shift Hybrid.

When every step is complete, click Complete in the task panel.

Task UFT-33-06 — Distribute questionnaire · done by Survey Administrator

Input: Channel plan → **Output:** Dispatch log

Step MP-54.6 — Distribute to stakeholders (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Distribute to 40 stakeholders; 40 dispatches logged.

When every step is complete, click Complete in the task panel.

Task UFT-33-07 — Send reminders · done by Survey Administrator

Input: Dispatch log → **Output:** Reminder log

Step MP-54.7 — Send reminders on cadence (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Reminder 1 on day 5 to 17 non-respondents; reminder 2 on day 10 to 8.

When every step is complete, click Complete in the task panel.

Task UFT-33-08 — Collect responses · done by Stakeholders

Input: Questionnaire → **Output:** Raw responses

Step MP-54.8 — Collect responses (Stakeholder)

Type:

Row 1 — Responses: AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Kawtar Fassi · **Source:** Interview with the function head

Row 2 — Responses: AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Omar Berrada · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Responses register".

Result to record in the task: Responses: 34 collected (22 online, 12 offline synchronised).

When every step is complete, click Complete in the task panel.

Task UFT-33-09 — Validate completeness · done by L&D Analyst

Input: Raw responses → **Output:** Validated responses

Step MP-54.9 — Validate completeness and consent (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Completeness: 31 complete, 3 incomplete flagged.

When every step is complete, click Complete in the task panel.

Task UFT-33-10 — Consolidate responses · done by L&D Analyst

Input: Validated responses → **Output:** Consolidated dataset

Step MP-54.10 — Consolidate responses (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Consolidated dataset: 31 responses, 24 questions, by function and level.

When every step is complete, click Complete in the task panel.

Task UFT-33-11 — Check consent and release dataset · done by L&D Analyst

Input: Consolidated dataset → **Output:** Released dataset

Step MP-54.11 — Feed responses to needs analysis and diagnostic (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-54.12 — Report on response rate and engagement (L&D Analyst)

Type:

Row 1 — On response rate and engagement: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-06-20

Row 2 — On response rate and engagement: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-06-27

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Consent given for 31 of 31 stored responses; release to needs analysis, diagnostic and demand collection.

When every step is complete, click Complete in the task panel.

Task UFT-33-12 — Report on response and engagement · done by L&D Analyst

Input: Dispatch and response logs → **Output:** Response analytics report

Step MP-54.12 — Report on response rate and engagement (L&D Analyst)

Type:

Row 1 — On response rate and engagement: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-06-22

Row 2 — On response rate and engagement: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-06-29

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Response rate 85%; engagement rate 78%; completeness 91% (RPT-034).

When every step is complete, click Complete in the task panel.

E2E-19 — Consulting Engagement-to-Closure

Goal: Manage full consulting engagement lifecycle

Starts when: Client purchase order or engagement request received. **Ends with:** Engagement closed with client acceptance and REX recorded.

Task UFT-19-01 — Register engagement and purchase order · done by Consultant PM

Input: Client purchase order → **Output:** Engagement record

Step MP-36.1 — Register engagement and purchase order (Consultant PM)

Type:

Row 1 — Engagement and purchase order: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Tarik Amrani · **Source:** Questionnaire results

Row 2 — Engagement and purchase order: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Amine Hajji · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Engagement and purchase order register".

Result to record in the task: Engagement 'Training engineering 2026 — Maghreb Hospitals Group', PO-CL-221, 45 consulting days.

When every step is complete, click Complete in the task panel.

Task UFT-19-02 — Hold kickoff meeting · done by Consultant PM

Input: Engagement record → **Output:** Kickoff held

Step MP-36.2 — Hold kickoff meeting (Consultant PM)

Type:

Row 1 — Kickoff meeting: AI triage and clinical decision support — half-day workshop · **Date:** 2026-11-25 · **Trainer:** Atlas Formation Conseil · **Participants:** 11 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Kickoff meeting: AI medical imaging assistance — half-day workshop · **Date:** 2026-12-02 · **Trainer:** Maghreb Learning Partners · **Participants:** 18 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Kickoff held on 10 February with HR Director, Head of L&D and 4 function heads.

When every step is complete, click Complete in the task panel.

Task UFT-19-03 — Draft meeting minutes · done by Consultant PM

Input: Kickoff held → **Output:** Meeting minutes

Step MP-36.3 — Draft meeting minutes (Consultant PM)

Type:

Row 1 — Meeting minutes: Meeting minutes — AI triage and clinical decision support · **Owner:** Zineb Squalli · **Start:** 2026-11-17 · **End:** 2026-12-17 · **Budget:** 28000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Meeting minutes: Meeting minutes — AI medical imaging assistance · **Owner:** Hind Mansouri · **Start:** 2026-11-24 · **End:** 2026-12-24 · **Budget:** 34000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Review the AI minutes: 6 decisions, 9 actions, RACSI extracted; correct 1 owner name.

When every step is complete, click Complete in the task panel.

Task UFT-19-04 — Align with client strategy · done by Consultant PM

Input: Meeting minutes → **Output:** Strategic alignment

Step MP-01.1 — Record corporate strategic objectives (Head of L&D)

Type:

Row 1 — Corporate strategic objectives: Raise AI triage and clinical decision support proficiency of Operator — Clinical Care & Nursing teams to level 3 · **Indicator:** KPI-006 (License Compliance %) · **Baseline:** 39 % · **Target:** 75 % · **Deadline:** 2027-05-08 · **Owner:** Hind Mansouri

Row 2 — Corporate strategic objectives: Certify Supervisor — Clinical Care & Nursing staff on AI medical imaging assistance · **Indicator:** KPI-007 (Content publication lead time) · **Baseline:** 37 % · **Target:** 79 % · **Deadline:** 2027-05-15 · **Owner:** Meryem Mansouri

Row 3 — Corporate strategic objectives: Cut onboarding time on AI bed and staff capacity planning by 30 % · **Indicator:** KPI-008 (Session fill rate) · **Baseline:** 46 % · **Target:** 76 % · **Deadline:** 2027-05-22 · **Owner:** Reda Rami

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-01.2 — Link objectives to functions and sites (L&D Strategist)

Type:

Row 1 — Objectives to functions and sites: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hind Mansouri · **Source:** HRIS export

Row 2 — Objectives to functions and sites: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Meryem Mansouri · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Objectives to functions and sites register".

Result to record in the task: Client objectives recorded: AI triage and clinical decision support and ISO 7101 compliance for Clinical Care & Nursing.

When every step is complete, click Complete in the task panel.

Task UFT-19-05 — Plan engagement work breakdown · done by Consultant PM

Input: Strategic alignment → **Output:** Engagement WBS

Step MP-36.4 — Plan engagement work breakdown (Consultant PM)

Type:

Row 1 — Engagement work breakdown: Engagement work breakdown — AI triage and clinical decision support · **Owner:** Meryem Mansouri · **Start:** 2026-11-21 · **End:** 2026-12-21 · **Budget:** 75000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Engagement work breakdown: Engagement work breakdown — AI medical imaging assistance · **Owner:** Reda Rami · **Start:** 2026-11-28 · **End:** 2026-12-28 · **Budget:** 22000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: WBS: 6 phases, 14 deliverables, Gantt from February to November.

When every step is complete, click Complete in the task panel.

Task UFT-19-06 — Plan change support · done by Change Manager

Input: Engagement WBS → **Output:** Change plan

Step MP-19.1 — Assess change impact (Change Manager)

Type:

Row 1 — Change impact: AI triage and clinical decision support · **Criterion:** Feasibility · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Change impact: AI medical imaging assistance · **Criterion:** Cost · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Change impact: AI bed and staff capacity planning · **Criterion:** Risk · **Weight (%):** 20 · **Score (1–5):** 2 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-19.2 — Build adoption plan (Change Manager)

Type:

Row 1 — Adoption plan: Adoption plan — AI triage and clinical decision support · **Owner:** Reda Rami · **Start:** 2026-11-23 · **End:** 2026-12-23 · **Budget:** 61000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Adoption plan: Adoption plan — AI medical imaging assistance · **Owner:** Hicham Naciri · **Start:** 2026-11-30 · **End:** 2026-12-30 · **Budget:** 73000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Change plan: 3 sponsor messages, champion network, 2 town-halls.

When every step is complete, click Complete in the task panel.

Task UFT-19-07 — Track engagement deliverables · done by Consultant PM

Input: Change plan → **Output:** Deliverable tracker

Step MP-36.5 — Track engagement deliverables (Consultant PM)

Type:

Row 1 — Engagement deliverables: KPI-009 (Plan realization rate) · **Period:** 2026-Q3 · **Value:** 82 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — Engagement deliverables: KPI-010 (Learner completion rate) · **Period:** 2026-Q1 · **Value:** 84 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-20.5 — Run periodic quality review (Quality Manager)

Type:

Row 1 — Periodic quality review: AI triage and clinical decision support — half-day workshop · **Date:** 2026-12-05 · **Trainer:** Atlas Formation Conseil · **Participants:** 14 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Periodic quality review: AI medical imaging assistance — half-day workshop · **Date:** 2026-12-12 · **Trainer:** Maghreb Learning Partners · **Participants:** 16 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Deliverables: 9 of 14 delivered on time, 1 late (SWOT), 4 planned.

When every step is complete, click Complete in the task panel.

Task UFT-19-08 — Deliver final report and obtain acceptance · done by Consultant PM

Input: Deliverable tracker → **Output:** Client acceptance

Step MP-36.6 — Deliver final report (Consultant PM)

Type:

Row 1 — Final report: AI triage and clinical decision support — half-day workshop · **Date:** 2026-12-07 · **Trainer:** Atlas Formation Conseil · **Participants:** 14 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Final report: AI medical imaging assistance — half-day workshop · **Date:** 2026-12-14 · **Trainer:** Maghreb Learning Partners · **Participants:** 18 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-36.7 — Obtain client acceptance (HR Director)

Type:

Row 1 — Client acceptance: AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Zineb Squalli · **Source:** Audit report

Row 2 — Client acceptance: AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Omar Bouzidi · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Client acceptance register".

Result to record in the task: Final report delivered; acceptance signed by the HR Director on 28 November.

When every step is complete, click Complete in the task panel.

Task UFT-19-09 — Record engagement REX · done by Consultant PM

Input: Client acceptance → **Output:** Engagement REX

Step MP-36.8 — Record engagement REX (Consultant PM)

Type:

Row 1 — Engagement REX: AI triage and clinical decision support · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Omar Bouzidi · **Source:** HRIS export

Row 2 — Engagement REX: AI medical imaging assistance · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Imane Berrada · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Engagement REX register".

Step MP-12.6 — Record REX entry (L&D Business Partner)

Type:

Row 1 — REX entry: AI triage and clinical decision support · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Omar Bouzidi · **Source:** HRIS export

Row 2 — REX entry: AI medical imaging assistance · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Imane Berrada · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "REX entry register".

Step MP-12.5 — Prompt REX at closure (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: REX: went well — stakeholder register; did not — late SWOT inputs; root cause — no function-head backup; rating 4/5.

When every step is complete, click Complete in the task panel.

E2E-24 — Competitive Intelligence-to-Strategy

Goal: Analyze external environment and feed L&D strategy

Starts when: Annual strategy cycle or executive request for market positioning analysis.
Ends with: Validated competitive intelligence report feeding into L&D strategy and organizational diagnostic.

Task UFT-24-01 — Define intelligence scope · done by Strategy Analyst

Input: Strategy docs → **Output:** Scope document

Step MP-43.1 — Define intelligence scope (Strategy Analyst)

Type:

Row 1 — Intelligence scope: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Kawtar Kettani · **Source:** Audit report

Row 2 — Intelligence scope: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Ghita Amrani · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Intelligence scope register".

Result to record in the task: Scope: Healthcare Providers market in Morocco and export markets; horizon 3 years; focus on AI triage and clinical decision support and AI medical imaging assistance.

When every step is complete, click Complete in the task panel.

Task UFT-24-02 — Conduct Porter's Five Forces · done by Strategy Analyst

Input: Market data → **Output:** Porter report

Step MP-43.2 — Conduct Porter's Five Forces analysis (Strategy Analyst)

Type:

Row 1 — Porter's Five Forces analysis: AI triage and clinical decision support — half-day workshop · **Date:** 2027-02-17 · **Trainer:** Atlas Formation Conseil · **Participants:** 15 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Porter's Five Forces analysis: AI medical imaging assistance — half-day workshop · **Date:** 2027-02-24 · **Trainer:** Maghreb Learning Partners · **Participants:** 19 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Rivalry 4/5; new entrants 3/5; substitutes 2/5; supplier power 3/5; buyer power 4/5.

When every step is complete, click Complete in the task panel.

Task UFT-24-03 — Map market segments · done by Market Analyst

Input: Market data → **Output:** Segment map

Step MP-43.3 — Map market segments (Market Analyst)

Type:

Row 1 — Market segments: AI triage and clinical decision support · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hamza Amrani · **Source:** Interview with the function head

Row 2 — Market segments: AI medical imaging assistance · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Leila Sefrioui · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Market segments register".

Result to record in the task: Segments: key accounts (55% revenue), resellers (30%), direct small customers (15%).

When every step is complete, click Complete in the task panel.

Task UFT-24-04 — Analyze competitor positioning · done by Market Analyst

Input: Competitor data → **Output:** Competitor benchmark

Step MP-43.4 — Analyze competitor positioning (Market Analyst)

Type:

Row 1 — Competitor positioning: AI triage and clinical decision support · **Criterion:** Feasibility · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Competitor positioning: AI medical imaging assistance · **Criterion:** Cost · **Weight (%):** 30 · **Score (1–5):** 5 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Competitor positioning: AI bed and staff capacity planning · **Criterion:** Risk · **Weight (%):** 20 · **Score (1–5):** 2 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Competitor A leads on AI triage and clinical decision support; competitor B cheaper but weaker on ISO 7101.

When every step is complete, click Complete in the task panel.

Task UFT-24-05 — Monitor regulatory and technology trends · done by Regulatory Analyst

Input: Regulations → **Output:** Trend report

Step MP-43.5 — Monitor regulatory changes (Regulatory Analyst)

Type:

Row 1 — Regulatory changes: KPI-009 (Plan realization rate) · **Period:** 2026-Q1 · **Value:** 60 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Regulatory changes: KPI-010 (Learner completion rate) · **Period:** 2026-Q2 · **Value:** 75 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-43.6 — Track technology trends (Strategy Analyst)

Type:

Row 1 — Technology trends: KPI-009 (Plan realization rate) · **Period:** 2026-Q1 · **Value:** 87 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — Technology trends: KPI-010 (Learner completion rate) · **Period:** 2026-Q2 · **Value:** 63 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-43.7 — Benchmark against industry (Strategy Analyst)

Type:

Row 1 — Against industry: AI triage and clinical decision support · **Criterion:** Cost · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Against industry: AI medical imaging assistance · **Criterion:** Risk · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Against industry: AI bed and staff capacity planning · **Criterion:** Business impact · **Weight (%):** 20 · **Score (1–5):** 3 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Trends: revision of ISO 7101 expected next year; fast growth of AI bed and staff capacity planning.

When every step is complete, click Complete in the task panel.

Task UFT-24-06 — Identify L&D implications · done by L&D Strategist

Input: All findings → **Output:** L&D implications

Step MP-43.8 — Identify strategic implications for L&D (L&D Strategist)

Type:

Row 1 — Strategic implications for L&D: AI triage and clinical decision support · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Loubna Fassi · **Source:** Audit report

Row 2 — Strategic implications for L&D: AI medical imaging assistance · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Ayoub Naciri · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Strategic implications for L&D register".

Result to record in the task: L&D implication: build AI triage and clinical decision support skills for key-account teams before competitor A scales.

When every step is complete, click Complete in the task panel.

Task UFT-24-07 — Publish intelligence report · done by Strategy Analyst

Input: All outputs → **Output:** Intelligence report

Step MP-43.9 — Produce intelligence report (Strategy Analyst)

Type:

Row 1 — Intelligence report: Intelligence report — AI triage and clinical decision support · **Owner:** Ayoub Naciri · **Start:** 2027-02-17 · **End:** 2027-03-19 · **Budget:** 37000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Intelligence report: Intelligence report — AI medical imaging assistance · **Owner:** Hamza Ziani · **Start:** 2027-02-24 · **End:** 2027-03-26 · **Budget:** 32000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-43.10 — Feed intelligence into strategy and diagnostic (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-43.11 — Update intelligence continuously (Strategy Analyst)

Type:

Intelligence continuously: Intelligence continuously

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-02-11

Then click Complete the step.

Step MP-43.12 — Report to executive leadership (Head of Strategy)

Type:

Row 1 — Executive leadership: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-02-12

Row 2 — Executive leadership: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-02-19

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish RPT-007 Competitive Intelligence Report to the executive committee.

When every step is complete, click Complete in the task panel.

Gate G1 — G1 — Scope & evidence approved: close the phase

1. Open the project workspace and click the gate button of the phase.
1. Tick each checklist item once its evidence is attached, then click Submit for decision.
1. Click Go. Type the justification: All mandatory items met; evidence attached.

1. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

Phase 2 — Diagnosis

E2E-20 — Multi-Axis Diagnostic-to-Maturity Report

Goal: Conduct 5-axis diagnostic + CMM maturity + leadership assessment

Starts when: Engagement kickoff or approved Scope of Work requesting a diagnostic. **Ends with:** 5-axis diagnostic, CMM maturity and leadership maturity report validated with the sponsor.

Task UFT-20-01 — Define diagnostic axes and sample · done by Consultant PM

Input: Approved Scope of Work → **Output:** Axes and sample

Step MP-37.1 — Define diagnostic axes and sample (Consultant PM)

Type:

Row 1 — Diagnostic axes and sample: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Imane Berrada · **Source:** Interview with the function head

Row 2 — Diagnostic axes and sample: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hind Hajji · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Diagnostic axes and sample register".

Result to record in the task: Axes: strategy, organization, processes, people, information systems. Sample: 40 people (MS 8, MO 16, OP 16).

When every step is complete, click Complete in the task panel.

Task UFT-20-02 — Deploy diagnostic questionnaire · done by Consultant PM

Input: Axes and sample → **Output:** Questionnaire responses

Step MP-37.2 — Deploy diagnostic questionnaire (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-37.4 — Collect questionnaire responses (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Diagnostic questionnaire deployed to 40 people; 34 responses (85%).

When every step is complete, click Complete in the task panel.

Task UFT-20-03 — Conduct semi-structured interviews · done by Consultant

Input: Axes and sample → **Output:** Interview findings

Step MP-37.3 — Conduct semi-structured interviews (Consultant)

Type:

Row 1 — Semi-structured interviews: AI triage and clinical decision support — half-day workshop · **Date:** 2026-12-15 · **Trainer:** Atlas Formation Conseil · **Participants:** 17 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Semi-structured interviews: AI medical imaging assistance — half-day workshop · **Date:** 2026-12-22 · **Trainer:** Maghreb Learning Partners · **Participants:** 18 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Interview notes (OP, Clinical Care & Nursing): 'Procedures exist but are not updated since 2023.'

When every step is complete, click Complete in the task panel.

Task UFT-20-04 — Score diagnostic axes · done by Consultant

Input: Interview findings, responses → **Output:** Axis scores

Step MP-37.5 — Score diagnostic axes (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Axis scores (1-5): strategy 3.4, organization 2.8, processes 2.6, people 3.1, IS 2.2.

When every step is complete, click Complete in the task panel.

Task UFT-20-05 — Select maturity model · done by Consultant

Input: Axis scores → **Output:** Maturity model

Step MP-38.1 — Select maturity model levels (Consultant)

Type:

Decision: Approved

Maturity model levels: Maturity model levels

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-12-02

Decided by: Meryem Sefrioui

Then click Complete the step.

Step MP-38.2 — Define evidence criteria per level (Consultant)

Type:

Row 1 — Evidence criteria per level: Raise AI triage and clinical decision support proficiency of Operator — Clinical Care & Nursing teams to level 3 · **Indicator:** KPI-016 (Knowledge reuse rate) · **Baseline:** 48 % · **Target:** 78 % · **Deadline:** 2027-05-28 · **Owner:** Kawtar Kettani

Row 2 — Evidence criteria per level: Certify Supervisor — Clinical Care & Nursing staff on AI medical imaging assistance · **Indicator:** KPI-017 (IDP coverage) · **Baseline:** 45 % · **Target:** 90 % · **Deadline:** 2027-06-04 · **Owner:** Ghita Amrani

Row 3 — Evidence criteria per level: Cut onboarding time on AI bed and staff capacity planning by 30 % · **Indicator:** KPI-018 (Mandatory certification compliance) · **Baseline:** 33 % · **Target:** 78 % · **Deadline:** 2027-06-11 · **Owner:** Hamza Amrani

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Maturity model: CMM 5 levels; evidence for level 3 = documented and applied process.

When every step is complete, click Complete in the task panel.

Task UFT-20-06 — Rate process maturity · done by Consultant

Input: Maturity model → **Output:** Maturity profile

Step MP-38.3 — Rate maturity per process area (Consultant)

Type:

Row 1 — Maturity per process area: AI triage and clinical decision support · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Maturity per process area: AI medical imaging assistance · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Maturity per process area: AI bed and staff capacity planning · **Criterion:** Cost · **Weight (%):** 20 · **Score (1–5):** 4 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-38.4 — Compute maturity profile (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Maturity: training management level 2; Clinical Care & Nursing processes level 3.

When every step is complete, click Complete in the task panel.

Task UFT-20-07 — Assess leadership maturity · done by HR Business Partner

Input: Maturity profile → **Output:** Leadership maturity

Step MP-42.1 — Launch leadership 360 assessment (HR Business Partner)

Type:

Row 1 — Leadership 360 assessment: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-12-08

Row 2 — Leadership 360 assessment: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-12-15

Then click Complete the step. The rows go to the register "Communications log".

Step MP-42.2 — Compute leadership maturity level (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Leadership 360: average level 3 (Team Leadership) across 18 managers.

When every step is complete, click Complete in the task panel.

Task UFT-20-08 — Cross-check skills and needs · done by L&D Analyst

Input: Leadership maturity → **Output:** Consolidated evidence

Step MP-02.7 — Validate skills inventory (Head of L&D)

Type:

Decision: Approved

Skills inventory: Skills inventory

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2026-12-29

Decided by: Meryem Sefrioui

Then click Complete the step.

Step MP-03.2 — Review gap matrix by site and function (L&D Analyst)

Type:

Gap matrix by site and function: Gap matrix by site and function

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-12-30

Then click Complete the step.

Result to record in the task: Cross-check: IS axis weakness confirmed by the AI triage and clinical decision support gap (-1.4).

When every step is complete, click Complete in the task panel.

Task UFT-20-09 — Draft diagnostic findings · done by Consultant

Input: Consolidated evidence → **Output:** Draft findings

Step MP-37.6 — Draft diagnostic findings (Consultant)

Type:

Row 1 — Diagnostic findings: Diagnostic findings — AI triage and clinical decision support · **Owner:** Kawtar Bennani · **Start:** 2026-12-17 · **End:** 2027-01-16 · **Budget:** 77000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Diagnostic findings: Diagnostic findings — AI medical imaging assistance · **Owner:** Loubna Fassi · **Start:** 2026-12-24 · **End:** 2027-01-23 · **Budget:** 75000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-38.5 — Produce maturity report (Consultant PM)

Type:

Row 1 — Maturity report: Maturity report — AI triage and clinical decision support · **Owner:** Kawtar Bennani · **Start:** 2026-12-17 · **End:** 2027-01-16 · **Budget:** 71000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Maturity report: Maturity report — AI medical imaging assistance · **Owner:** Loubna Fassi · **Start:** 2026-12-24 · **End:** 2027-01-23 · **Budget:** 69000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Edit AI findings: keep 5, merge 2, add one on ISO 7101 documentation.

When every step is complete, click Complete in the task panel.

Task UFT-20-10 — Validate findings with sponsor · done by Consultant PM

Input: Draft findings → **Output:** Diagnostic & maturity report

Step MP-37.7 — Validate findings with sponsor (Consultant PM)

Type:

Decision: Approved

Findings with sponsor: Findings with sponsor

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-12-12

Decided by: Meryem Sefrioui

Then click Complete the step.

Step MP-38.6 — Agree target maturity (HR Director)

Type:

Decision: Approved

Target maturity: Target maturity

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-12-12

Decided by: Meryem Sefrioui

Then click Complete the step.

Result to record in the task: Findings validated with the sponsor; target maturity level 3 by 2026+1.

When every step is complete, click Complete in the task panel.

E2E-25 — Job Architecture-to-Competency Map

Goal: Manage organizational charts, position descriptions, gap analysis

Starts when: Organizational change, new role creation, or annual job architecture review.

Ends with: Approved organizational charts, position descriptions, and competency maps with gap analysis.

Task UFT-25-01 — Map organizational structure · done by HR Analyst

Input: Org data → **Output:** Structure map

Step MP-44.1 — Map organizational structure (HR Analyst)

Type:

Row 1 — Organizational structure: AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hamza Ziani · **Source:** Interview with the function head

Row 2 — Organizational structure: AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Soukaina Berrada · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Organizational structure register".

Result to record in the task: Structure: 6 functions, 14 departments, 3 sites; 212 positions.

When every step is complete, click Complete in the task panel.

Task UFT-25-02 — Design organizational charts · done by Org Design Consultant

Input: Structure map → **Output:** Org charts

Step MP-44.2 — Design organizational charts (Org Design Consultant)

Type:

Row 1 — Organizational charts: Organizational charts — AI triage and clinical decision support · **Owner:** Soukaina Berrada · **Start:** 2027-02-21 · **End:** 2027-03-23 · **Budget:** 61000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Organizational charts: Organizational charts — AI medical imaging assistance · **Owner:** Kawtar Fassi · **Start:** 2027-02-28 · **End:** 2027-03-30 · **Budget:** 66000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Org chart 'Clinical Care & Nursing': director → 3 managers → 9 supervisors → operators.

When every step is complete, click Complete in the task panel.

Task UFT-25-03 — Conduct job analysis · done by Job Analyst

Input: Org charts → **Output:** Job analysis

Step MP-44.3 — Conduct job analysis (Job Analyst)

Type:

Row 1 — Job analysis: AI triage and clinical decision support — half-day workshop · **Date:** 2027-03-05 · **Trainer:** Atlas Formation Conseil · **Participants:** 18 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Job analysis: AI medical imaging assistance — half-day workshop · **Date:** 2027-03-12 · **Trainer:** Maghreb Learning Partners · **Participants:** 13 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Job analysis 'Clinical Care & Nursing supervisor': 8 main activities, 2 of them now supported by AI triage and clinical decision support.

When every step is complete, click Complete in the task panel.

Task UFT-25-04 — Draft position descriptions · done by Job Analyst

Input: Job analysis → **Output:** Draft descriptions

Step MP-44.4 — Draft position descriptions (Job Analyst)

Type:

Row 1 — Position descriptions: Position descriptions — AI triage and clinical decision support · **Owner:** Omar Berrada · **Start:** 2027-02-25 · **End:** 2027-03-27 · **Budget:** 51000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Position descriptions: Position descriptions — AI medical imaging assistance · **Owner:** Hajar Amrani · **Start:** 2027-03-04 · **End:** 2027-04-03 · **Budget:** 43000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Position description drafted: mission, activities, competencies (AI triage and clinical decision support level 3, ISO 7101 level 3), KPIs.

When every step is complete, click Complete in the task panel.

Task UFT-25-05 — Validate with managers · done by HR Business Partner

Input: Draft descriptions → **Output:** Validated descriptions

Step MP-44.5 — Validate descriptions with managers (HR Business Partner)

Type:

Decision: Approved

Descriptions with managers: Descriptions with managers

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-02-20

Decided by: Meryem Sefrioui

Then click Complete the step.

Result to record in the task: Validated by the Clinical Care & Nursing manager with 2 changes on activities.

When every step is complete, click Complete in the task panel.

Task UFT-25-06 — Conduct gap analysis · done by Job Analyst

Input: Validated descriptions → **Output:** Gap analysis

Step MP-44.6 — Conduct gap analysis existing versus real (Job Analyst)

Type:

Row 1 — Gap analysis existing versus real: AI triage and clinical decision support — half-day workshop · **Date:** 2027-03-11 · **Trainer:** Atlas Formation Conseil · **Participants:** 16 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Gap analysis existing versus real: AI medical imaging assistance — half-day workshop · **Date:** 2027-03-18 · **Trainer:** Maghreb Learning Partners · **Participants:** 18 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Gap existing vs real: 11 descriptions outdated; 4 roles with new AI triage and clinical decision support tasks.

When every step is complete, click Complete in the task panel.

Task UFT-25-07 — Identify roles to develop · done by HR Business Partner

Input: Gap analysis → **Output:** Roles to develop

Step MP-44.7 — Identify roles to develop (HR Business Partner)

Type:

Row 1 — Roles to develop: AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Meryem Sefrioui · **Source:** Questionnaire results

Row 2 — Roles to develop: AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Mehdi Hajji · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Roles to develop register".

Step MP-44.8 — Update job architecture (Job Analyst)

Type:

Job architecture: Job architecture

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-03-11

Then click Complete the step.

Step MP-44.9 — Align with competency framework (Job Analyst)

Type:

Row 1 — With competency framework: AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Meryem Sefrioui · **Source:** Questionnaire results

Row 2 — With competency framework: AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Mehdi Hajji · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "With competency framework register".

Result to record in the task: Roles 'To develop': data-literate supervisor, maintenance technician 4.0.

When every step is complete, click Complete in the task panel.

Task UFT-25-08 — Publish approved architecture · done by HR Director

Input: All outputs → **Output:** Approved architecture

Step MP-44.10 — Publish approved position descriptions (HR Director)

Type:

Row 1 — Approved position descriptions: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-02-28

Row 2 — Approved position descriptions: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-03-07

Then click Complete the step. The rows go to the register "Communications log".

Step MP-44.11 — Track job architecture changes (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-44.12 — Report on architecture health (HR Director)

Type:

Row 1 — On architecture health: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-02-28

Row 2 — On architecture health: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-03-07

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish 212 approved descriptions and the architecture map to all employees.

When every step is complete, click Complete in the task panel.

E2E-26 — GPEC-to-Training Plan

Goal: Integrate Forward Planning of Jobs and Skills into L&D

Starts when: Annual HR strategic planning cycle or GPEC (Forward Planning of Jobs and Skills) review. **Ends with:** Training plan aligned with GPEC and HR strategic orientations.

Task UFT-26-01 — Define GPEC scope · done by GPEC Specialist

Input: HR strategy → **Output:** GPEC scope

Step MP-45.1 — Define GPEC scope (GPEC Specialist)

Type:

Row 1 — GPEC scope: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hind Ouazzani · **Source:** Audit report

Row 2 — GPEC scope: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Tarik Amrani · **Source:** HRIS export

Then click Complete the step. The rows go to the register "GPEC scope register".

Result to record in the task: GPEC scope: Clinical Care & Nursing and Information Systems jobs; horizon 3 years.

When every step is complete, click Complete in the task panel.

Task UFT-26-02 — Map HR strategic orientations · done by HR Director

Input: Strategy docs → **Output:** Orientation map

Step MP-45.2 — Map HR strategic orientations (HR Director)

Type:

Row 1 — HR strategic orientations: AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Tarik Amrani · **Source:** HRIS export

Row 2 — HR strategic orientations: AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Amine Hajji · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "HR strategic orientations register".

Step MP-45.3 — Align training with GPEC (L&D Strategist)

Type:

Row 1 — Training with GPEC: AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Tarik Amrani · **Source:** HRIS export

Row 2 — Training with GPEC: AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Amine Hajji · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Training with GPEC register".

Result to record in the task: HR orientations: internal mobility first; 30% of promotions from internal talent.

When every step is complete, click Complete in the task panel.

Task UFT-26-03 — Update development foundation · done by HR Business Partner

Input: Position descriptions → **Output:** Updated foundation

Step MP-45.4 — Update development foundation (HR Business Partner)

Type:

Development foundation: Development foundation

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-03-12

Then click Complete the step.

Step MP-45.5 — Support human capital development (HR Director)

Type:

Row 1 — Human capital development: AI triage and clinical decision support · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Amine Hajji · **Source:** Interview with the function head

Row 2 — Human capital development: AI medical imaging assistance · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Zineb Squalli · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Human capital development register".

Result to record in the task: Development foundation updated: descriptions, annual objectives, evaluation grid.

When every step is complete, click Complete in the task panel.

Task UFT-26-04 — Update Jobs and Skills Directory (REC) · done by GPEC Specialist

Input: Job data → **Output:** Updated REC

Step MP-45.6 — Update Jobs and Skills Directory (REC) (GPEC Specialist)

Type:

Jobs and Skills Directory (REC): Jobs and Skills Directory (REC)

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-03-21

Then click Complete the step.

Result to record in the task: REC updated: 42 jobs, 3 new jobs linked to AI triage and clinical decision support.

When every step is complete, click Complete in the task panel.

Task UFT-26-05 — Redynamize periodic evaluations · done by HR Business Partner

Input: Eval system → **Output:** Eval updates

Step MP-45.7 — Redynamize periodic evaluations (HR Business Partner)

Type:

Row 1 — Periodic evaluations: AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hind Mansouri · **Source:** Annual performance review

Row 2 — Periodic evaluations: AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Meryem Mansouri · **Source:** Audit report

Then click Complete the step. The rows go to the register "Periodic evaluations register".

Result to record in the task: Periodic evaluation redesigned: 2 reviews per year, competency section added.

When every step is complete, click Complete in the task panel.

Task UFT-26-06 — Design career paths · done by HR Director

Input: Job architecture → **Output:** Career paths

Step MP-45.8 — Design career paths (HR Director)

Type:

Row 1 — Career paths: Career paths — AI triage and clinical decision support · **Owner:** Meryem Mansouri · **Start:** 2027-03-17 · **End:** 2027-04-16 · **Budget:** 31000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Career paths: Career paths — AI medical imaging assistance · **Owner:** Reda Rami · **Start:** 2027-03-24 · **End:** 2027-04-23 · **Budget:** 72000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Career path: operator → team leader → supervisor → Clinical Care & Nursing manager.

When every step is complete, click Complete in the task panel.

Task UFT-26-07 — Document career management · done by HR Director

Input: Career paths → **Output:** Career process doc

Step MP-45.9 — Document career management process (HR Director)

Type:

Row 1 — Career management process: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Reda Rami · **Source:** HRIS export

Row 2 — Career management process: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hicham Naciri · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Career management process register".

Step MP-45.10 — Implement collective compensation (HR Director)

Type:

Row 1 — Collective compensation: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Reda Rami · **Source:** HRIS export

Row 2 — Collective compensation: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hicham Naciri · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Collective compensation register".

Result to record in the task: Career management procedure documented (v1): eligibility, committee, calendar.

When every step is complete, click Complete in the task panel.

Task UFT-26-08 — Align training with GPEC · done by L&D Strategist

Input: GPEC outputs → **Output:** Training-GPEC alignment

Step MP-45.11 — Feed GPEC into training needs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-45.12 — Report on GPEC integration (GPEC Specialist)

Type:

Row 1 — On GPEC integration: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-03-16

Row 2 — On GPEC integration: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-03-23

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Training aligned with GPEC: 4 themes cover the 3 new jobs; 2 themes removed.

When every step is complete, click Complete in the task panel.

E2E-27 — Demand Collection-to-Consolidation

Goal: Collect individual and collective training demands

Starts when: Annual training plan cycle or ad-hoc demand collection request. **Ends with:** Consolidated and prioritized demand repository integrated into the training needs analysis.

Task UFT-27-01 — Design demand collection forms · done by L&D Analyst

Input: Templates → **Output:** Forms

Step MP-46.1 — Design demand collection forms (L&D Analyst)

Type:

Row 1 — Demand collection forms: Demand collection forms — AI triage and clinical decision support · **Owner:** Zineb Squalli · **Start:** 2027-03-23 · **End:** 2027-04-22 · **Budget:** 42000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Demand collection forms: Demand collection forms — AI medical imaging assistance · **Owner:** Omar Bouzidi · **Start:** 2027-03-30 · **End:** 2027-04-29 · **Budget:** 32000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Forms: individual form (5 questions) and collective form per team (3 questions).

When every step is complete, click Complete in the task panel.

Task UFT-27-02 — Deploy individual demand collection · done by L&D Analyst

Input: Forms → **Output:** Individual demands

Step MP-46.2 — Deploy individual demand collection (L&D Analyst)

Type:

Row 1 — Individual demand collection: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Individual demand collection: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Individual collection open 1-20 March; 146 demands received.

When every step is complete, click Complete in the task panel.

Task UFT-27-03 — Deploy collective demand collection · done by L&D Analyst

Input: Forms → **Output:** Collective demands

Step MP-46.3 — Deploy collective demand collection (L&D Analyst)

Type:

Row 1 — Collective demand collection: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Collective demand collection: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Collective collection: 18 team demands received.

When every step is complete, click Complete in the task panel.

Task UFT-27-04 — Collect manager recommendations · done by L&D Business Partner

Input: Managers → **Output:** Recommendations

Step MP-46.4 — Collect manager recommendations (L&D Business Partner)

Type:

Row 1 — Manager recommendations: AI triage and clinical decision support · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hind Hajji · **Source:** HRIS export

Row 2 — Manager recommendations: AI medical imaging assistance · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Youssef Sefrioui · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Manager recommendations register".

Result to record in the task: Manager recommendations: 24 received, 9 flagged as priority.

When every step is complete, click Complete in the task panel.

Task UFT-27-05 — Consolidate demands by function · done by L&D Analyst

Input: Demands → **Output:** Consolidated demands

Step MP-46.5 — Consolidate demands by function (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Consolidated: Clinical Care & Nursing 64 demands, Operations 41, Quality 22, others 37.

When every step is complete, click Complete in the task panel.

Task UFT-27-06 — Map demands to competencies · done by L&D Analyst

Input: Consolidated demands → **Output:** Demand-competency map

Step MP-46.6 — Map demands to competencies (L&D Analyst)

Type:

Row 1 — Demands to competencies: AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hicham Naciri · **Source:** Questionnaire results

Row 2 — Demands to competencies: AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Kawtar Kettani · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Demands to competencies register".

Step MP-46.7 — Prioritize demands (L&D Business Partner)

Type:

Row 1 — Demands: AI triage and clinical decision support · **Criterion:** Feasibility · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Demands: AI medical imaging assistance · **Criterion:** Cost · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Demands: AI bed and staff capacity planning · **Criterion:** Risk · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Accept AI mapping for 139 demands; map 7 manually to 'AI medical imaging assistance'.

When every step is complete, click Complete in the task panel.

Task UFT-27-07 — Prioritize and validate demands · done by L&D Business Partner

Input: Demand map → **Output:** Validated demands

Step MP-46.8 — Validate demands with managers (L&D Business Partner)

Type:

Decision: Approved

Demands with managers: Demands with managers

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-04-18

Decided by: Meryem Sefrioui

Then click Complete the step.

Step MP-46.9 — Integrate demands into needs analysis (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-46.10 — Report on demand patterns (L&D Analyst)

Type:

Row 1 — On demand patterns: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-03-30

Row 2 — On demand patterns: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-04-06

Then click Complete the step. The rows go to the register "Communications log".

Step MP-46.11 — Track demand fulfillment (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-46.12 — Improve demand collection (L&D Analyst)

Type:

Demand collection: Demand collection

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-04-19

Then click Complete the step.

Result to record in the task: Validated: 112 demands (High 38, Medium 51, Low 23); 34 rejected with reason.

When every step is complete, click Complete in the task panel.

E2E-28 — Performance Assessment-to-RAG Dashboard

Goal: Assess MS/MO/OP performance with RAG ratings

Starts when: Annual performance cycle or management request for performance visualization. **Ends with:** Validated MS/MO/OP (Strategic Management / Operational

Management / Operational Level) performance assessment with RAG (Green/Amber/Red) dashboards.

Task UFT-28-01 — Define MS/MO/OP framework · done by Performance Analyst

Input: Strategy docs → **Output:** Framework

Step MP-47.1 — Define MS/MO/OP framework (Performance Analyst)

Type:

Row 1 — MS/MO/OP framework: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Ghita Amrani · **Source:** Audit report

Row 2 — MS/MO/OP framework: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hamza Amrani · **Source:** HRIS export

Then click Complete the step. The rows go to the register "MS/MO/OP framework register".

Result to record in the task: MS = executive committee; MO = managers and supervisors; OP = operators and technicians.

When every step is complete, click Complete in the task panel.

Task UFT-28-02 — Define RAG criteria · done by Performance Analyst

Input: Framework → **Output:** RAG criteria

Step MP-47.2 — Define RAG criteria (Performance Analyst)

Type:

Row 1 — RAG criteria: Raise AI triage and clinical decision support proficiency of Operator — Clinical Care & Nursing teams to level 3 · **Indicator:** KPI-016 (Knowledge reuse rate) · **Baseline:** 34 % · **Target:** 90 % · **Deadline:** 2027-09-25 · **Owner:** Hamza Amrani

Row 2 — RAG criteria: Certify Supervisor — Clinical Care & Nursing staff on AI medical imaging assistance · **Indicator:** KPI-017 (IDP coverage) · **Baseline:** 40 % · **Target:** 81 % · **Deadline:** 2027-10-02 · **Owner:** Leila Sefrioui

Row 3 — RAG criteria: Cut onboarding time on AI bed and staff capacity planning by 30 % · **Indicator:** KPI-018 (Mandatory certification compliance) · **Baseline:** 30 % · **Target:** 75 % · **Deadline:** 2027-10-09 · **Owner:** Kawtar Bennani

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Green ≥ 90% of target; Amber 70-89%; Red < 70%.

When every step is complete, click Complete in the task panel.

Task UFT-28-03 — Collect performance data by function · done by Performance Analyst

Input: Function data → **Output:** Data set

Step MP-47.3 — Collect performance data by function (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Data collected for 6 functions: 18 KPIs, last 12 months.

When every step is complete, click Complete in the task panel.

Task UFT-28-04 — Assess MS performance · done by Performance Analyst

Input: Data set → **Output:** MS assessment

Step MP-47.4 — Assess MS performance (Performance Analyst)

Type:

Row 1 — MS performance: AI triage and clinical decision support · **Criterion:** Feasibility · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — MS performance: AI medical imaging assistance · **Criterion:** Cost · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — MS performance: AI bed and staff capacity planning · **Criterion:** Risk · **Weight (%):** 20 · **Score (1–5):** 4 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: MS: strategy deployment Amber (78%); governance Green (92%).

When every step is complete, click Complete in the task panel.

Task UFT-28-05 — Assess MO performance · done by Performance Analyst

Input: Data set → **Output:** MO assessment

Step MP-47.5 — Assess MO performance (Performance Analyst)

Type:

Row 1 — MO performance: AI triage and clinical decision support · **Criterion:** Cost · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — MO performance: AI medical imaging assistance · **Criterion:** Risk · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — MO performance: AI bed and staff capacity planning · **Criterion:** Business impact · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: MO: Clinical Care & Nursing team management Red (64%); planning Amber (81%).

When every step is complete, click Complete in the task panel.

Task UFT-28-06 — Assess OP performance · done by Performance Analyst

Input: Data set → **Output:** OP assessment

Step MP-47.6 — Assess OP performance (Performance Analyst)

Type:

Row 1 — OP performance: AI triage and clinical decision support · **Criterion:** Risk · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — OP performance: AI medical imaging assistance · **Criterion:** Business impact · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — OP performance: AI bed and staff capacity planning · **Criterion:** Urgency · **Weight (%):** 20 · **Score (1–5):** 2 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-47.7 — Apply RAG ratings (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: OP: ISO 7101 compliance Amber (85%); productivity Green (93%).

When every step is complete, click Complete in the task panel.

Task UFT-28-07 — Publish RAG dashboard · done by Performance Analyst

Input: All assessments → **Output:** RAG dashboard

Step MP-47.8 — Visualize performance dashboards (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-47.9 — Identify performance gaps (Performance Analyst)

Type:

Row 1 — Performance gaps: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hamza Ziani · **Source:** HRIS export

Row 2 — Performance gaps: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Soukaina Berrada · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Performance gaps register".

Step MP-47.10 — Feed performance into diagnostic report (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-47.11 — Track performance progression (Performance Analyst)

Type:

Row 1 — Performance progression: KPI-001 (Strategic objective coverage) · **Period:** 2026-Q3 · **Value:** 73 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Performance progression: KPI-002 (Skills inventory validation rate) · **Period:** 2026-Q1 · **Value:** 89 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-47.12 — Report performance to leadership (Performance Analyst)

Type:

Row 1 — Performance to leadership: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-04-13

Row 2 — Performance to leadership: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-04-20

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish RPT-005 MS/MO/OP RAG dashboard to the executive committee.

When every step is complete, click Complete in the task panel.

E2E-29 — Functional SWOT-to-Improvement Axes

Goal: Conduct function-level SWOT and define improvement axes

Starts when: Diagnostic phase of a training engineering engagement or annual functional review. **Ends with:** Validated functional SWOT reports with prioritized improvement axes per function.

Task UFT-29-01 — Define function scope · done by L&D Analyst

Input: Org data → **Output:** Scope

Step MP-48.1 — Define function scope (L&D Analyst)

Type:

Row 1 — Function scope: AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Soukaina Berrada · **Source:** Interview with the function head

Row 2 — Function scope: AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Kawtar Fassi · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Function scope register".

Result to record in the task: Function in scope: Clinical Care & Nursing (3 sites, 96 people).

When every step is complete, click Complete in the task panel.

Task UFT-29-02 — Conduct function SWOT · done by L&D Analyst

Input: Function data → **Output:** SWOT

Step MP-48.2 — Conduct function SWOT (L&D Analyst)

Type:

Row 1 — Function SWOT: AI triage and clinical decision support — half-day workshop · **Date:** 2027-05-02 · **Trainer:** Atlas Formation Conseil · **Participants:** 15 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Function SWOT: AI medical imaging assistance — half-day workshop · **Date:** 2027-05-09 · **Trainer:** Maghreb Learning Partners · **Participants:** 12 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: SWOT workshop held with the function head and 6 supervisors.

When every step is complete, click Complete in the task panel.

Task UFT-29-03 — Identify strengths and weaknesses · done by L&D Analyst

Input: Interview data → **Output:** Internal factors

Step MP-48.3 — Identify strengths (L&D Analyst)

Type:

Row 1 — Strengths: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Omar Berrada · **Source:** Annual performance review

Row 2 — Strengths: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hajar Amrani · **Source:** Audit report

Then click Complete the step. The rows go to the register "Strengths register".

Step MP-48.4 — Identify weaknesses (L&D Analyst)

Type:

Row 1 — Weaknesses: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Omar Berrada · **Source:** Annual performance review

Row 2 — Weaknesses: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hajar Amrani · **Source:** Audit report

Then click Complete the step. The rows go to the register "Weaknesses register".

Result to record in the task: Strength: experienced team. Weakness: low AI triage and clinical decision support usage, paper records.

When every step is complete, click Complete in the task panel.

Task UFT-29-04 — Identify opportunities and threats · done by L&D Analyst

Input: Market data → **Output:** External factors

Step MP-48.5 — Identify opportunities (L&D Analyst)

Type:

Row 1 — Opportunities: AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hajar Amrani · **Source:** Audit report

Row 2 — Opportunities: AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Omar Alaoui · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Opportunities register".

Step MP-48.6 — Identify threats (L&D Analyst)

Type:

Row 1 — Threats: AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hajar Amrani · **Source:** Audit report

Row 2 — Threats: AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Omar Alaoui · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Threats register".

Result to record in the task: Opportunity: AI bed and staff capacity planning. Threat: stricter ISO 7101 audits.

When every step is complete, click Complete in the task panel.

Task UFT-29-05 — Define improvement axes · done by L&D Business Partner

Input: SWOT → **Output:** Improvement axes

Step MP-48.7 — Define improvement axes (L&D Business Partner)

Type:

Row 1 — Improvement axes: AI triage and clinical decision support · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Omar Alaoui · **Source:** HRIS export

Row 2 — Improvement axes: AI medical imaging assistance · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Meryem Sefrioui · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Improvement axes register".

Result to record in the task: Axis 1: digitalise shift records with AI triage and clinical decision support. Axis 2: certify supervisors on ISO 7101.

When every step is complete, click Complete in the task panel.

Task UFT-29-06 — Validate with function heads · done by L&D Business Partner

Input: Improvement axes → **Output:** Validated axes

Step MP-48.8 — Validate axes with function heads (L&D Business Partner)

Type:

Decision: Approved

Axes with function heads: Axes with function heads

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-04-30

Decided by: Meryem Sefrioui

Then click Complete the step.

Result to record in the task: Validated by the function head on 18 April; axis 2 deadline moved to Q3.

When every step is complete, click Complete in the task panel.

Task UFT-29-07 — Prioritize improvement axes · done by L&D Strategist

Input: Validated axes → **Output:** Prioritized axes

Step MP-48.9 — Prioritize improvement axes (L&D Strategist)

Type:

Row 1 — Improvement axes: AI triage and clinical decision support · **Criterion:** Feasibility · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Improvement axes: AI medical imaging assistance · **Criterion:** Cost · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Improvement axes: AI bed and staff capacity planning · **Criterion:** Risk · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-48.10 — Feed SWOT into diagnostic report (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-48.11 — Track improvement implementation (L&D Business Partner)

Type:

Row 1 — Improvement implementation: KPI-008 (Session fill rate) · **Period:** 2026-Q1 · **Value:** 93 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — Improvement implementation: KPI-009 (Plan realization rate) · **Period:** 2026-Q2 · **Value:** 80 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-48.12 — Report on function performance (L&D Analyst)

Type:

Row 1 — On function performance: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-04-27

Row 2 — On function performance: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-05-04

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Priority: axis 1 (impact 5), axis 2 (impact 4).

When every step is complete, click Complete in the task panel.

E2E-02 — Skills-to-Gap Diagnosis

Goal: Produce a validated skills gap diagnosis

Starts when: Approved annual L&D plan or a scheduled skills assessment campaign. **Ends with:** Validated skills gap diagnosis released to needs analysis.

Task UFT-02-01 — Maintain competency framework · done by L&D Analyst

Input: Job architecture → **Output:** Competency framework

Step MP-02.1 — Define competency families and levels (L&D Analyst)

Type:

Row 1 — Competency families and levels: Raise AI triage and clinical decision support proficiency of Operator — Clinical Care & Nursing teams to level 3 · **Indicator:** KPI-010 (Learner completion rate) · **Baseline:** 38 % · **Target:** 75 % · **Deadline:** 2027-01-16 · **Owner:** Reda Rami

Row 2 — Competency families and levels: Certify Supervisor — Clinical Care & Nursing staff on AI medical imaging assistance · **Indicator:** KPI-011 (API Availability) · **Baseline:** 34 % · **Target:** 81 % · **Deadline:** 2027-01-23 · **Owner:** Hicham Naciri

Row 3 — Competency families and levels: Cut onboarding time on AI bed and staff capacity planning by 30 % · **Indicator:** KPI-012 (Average Level 1 satisfaction) · **Baseline:** 32 % · **Target:** 70 % · **Deadline:** 2027-01-30 · **Owner:** Zineb Squalli

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Family 'AI triage and clinical decision support': 4 competencies on the 1-4 scale (Aware, Practitioner, Autonomous, Expert).

When every step is complete, click Complete in the task panel.

Task UFT-02-02 — Set target levels per position · done by HR Business Partner

Input: Competency framework → **Output:** Position targets

Step MP-02.2 — Set target levels per position (HR Business Partner)

Type:

Row 1 — Target levels per position: Raise AI triage and clinical decision support proficiency of Operator — Clinical Care & Nursing teams to level 3 · **Indicator:** KPI-011 (API Availability) · **Baseline:** 39 % · **Target:** 80 % · **Deadline:** 2027-01-18 · **Owner:** Hicham Naciri

Row 2 — Target levels per position: Certify Supervisor — Clinical Care & Nursing staff on AI medical imaging assistance · **Indicator:** KPI-012 (Average Level 1 satisfaction) · **Baseline:** 41 % · **Target:** 75 % · **Deadline:** 2027-01-25 · **Owner:** Zineb Squalli

Row 3 — Target levels per position: Cut onboarding time on AI bed and staff capacity planning by 30 % · **Indicator:** KPI-013 (Skill progression rate) · **Baseline:** 31 % · **Target:** 73 % · **Deadline:** 2027-02-01 · **Owner:** Omar Bouzidi

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Clinical Care & Nursing supervisor: AI triage and clinical decision support = 3; ISO 7101 = 3. Clinical Care & Nursing operator: AI triage and clinical decision support = 2.

When every step is complete, click Complete in the task panel.

Task UFT-02-03 — Launch assessment campaign · done by L&D Analyst

Input: Position targets → **Output:** Open campaign

Step MP-02.3 — Launch assessment campaign (L&D Analyst)

Type:

Row 1 — Assessment campaign: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-07-29

Row 2 — Assessment campaign: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-08-05

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Campaign 'Skills 2026': population Clinical Care & Nursing and Operations (212 people), 12 competencies, close date 30 April.

When every step is complete, click Complete in the task panel.

Task UFT-02-04 — Collect self and manager assessments · done by Manager

Input: Open campaign → **Output:** Consolidated assessments

Step MP-02.4 — Submit self and manager assessments (Manager)

Type:

Row 1 — Self and manager assessments: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-07-31

Row 2 — Self and manager assessments: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-08-07

Then click Complete the step. The rows go to the register "Communications log".

Step MP-02.5 — Consolidate assessment results (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Self-assessment AI triage and clinical decision support: 2; manager validation: 2 with comment 'needs practice on live cases'.

When every step is complete, click Complete in the task panel.

Task UFT-02-05 — Suggest proficiency from evidence · done by L&D Analyst

Input: Consolidated assessments → **Output:** Suggested levels

Step MP-02.6 — Suggest proficiency from evidence (L&D Analyst)

Type:

Row 1 — Proficiency from evidence: AI triage and clinical decision support · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Imane Berrada · **Source:** Annual performance review

Row 2 — Proficiency from evidence: AI medical imaging assistance · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Hind Hajji · **Source:** Audit report

Then click Complete the step. The rows go to the register "Proficiency from evidence register".

Result to record in the task: Accept 38 suggested levels, edit 4 (evidence too old), reject 1. Every change carries a note.

When every step is complete, click Complete in the task panel.

Task UFT-02-06 — Validate skills inventory · done by Head of L&D

Input: Suggested levels → **Output:** Validated inventory

Step MP-02.7 — Validate skills inventory (Head of L&D)

Type:

Decision: Approved with conditions

Skills inventory: Skills inventory

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2026-08-30

Decided by: Meryem Sefrioui

Then click Complete the step.

Result to record in the task: Inventory validated: 212 employees, 96% assessments complete. Justification: sample checked by site.

When every step is complete, click Complete in the task panel.

Task UFT-02-07 — Compute and forecast gaps · done by L&D Analyst

Input: Validated inventory → **Output:** Skills gap diagnosis

Step MP-03.1 — Compute gap matrix (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-03.2 — Review gap matrix by site and function (L&D Analyst)

Type:

Gap matrix by site and function: Gap matrix by site and function

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-08-05

Then click Complete the step.

Step MP-28.3 — Forecast skill gaps (Performance Analyst)

Type:

Row 1 — Skill gaps: KPI-016 (Knowledge reuse rate) · **Period:** 2026-Q1 · **Value:** 90 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — Skill gaps: KPI-017 (IDP coverage) · **Period:** 2026-Q2 · **Value:** 87 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-28.1 — Build analytics dataset (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Critical gaps: AI triage and clinical decision support (-1.4 average on supervisors), AI medical imaging assistance (-1.1). Forecast: AI bed and staff capacity planning becomes critical within 12 months.

When every step is complete, click Complete in the task panel.

E2E-21 — Previous Plan Impact-to-Strategy Update

Goal: Evaluate N-1 plan impact and update strategy

Starts when: Start of a new plan cycle with N-1 execution data available. **Ends with:** N-1 impact conclusions fed into the strategy update.

Task UFT-21-01 — Load N-1 plan execution data · done by L&D Analyst

Input: N-1 plan → **Output:** N-1 dataset

Step MP-39.1 — Load N-1 plan execution data (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Load N-1 plan: 28 sessions planned, 23 delivered, 1,410,000 MAD spent.

When every step is complete, click Complete in the task panel.

Task UFT-21-02 — Define impact criteria · done by L&D Analyst

Input: N-1 dataset → **Output:** Impact criteria

Step MP-39.2 — Define impact criteria (L&D Analyst)

Type:

Row 1 — Impact criteria: Raise AI triage and clinical decision support proficiency of Operator — Clinical Care & Nursing teams to level 3 · **Indicator:** KPI-003 (Critical gap rate) · **Baseline:** 44 % · **Target:** 83 % · **Deadline:** 2027-06-11 · **Owner:** Hamza Ziani

Row 2 — Impact criteria: Certify Supervisor — Clinical Care & Nursing staff on AI medical imaging assistance · **Indicator:** KPI-004 (Training Engineering Report cycle time) · **Baseline:** 47 % · **Target:** 88 % · **Deadline:** 2027-06-18 · **Owner:** Soukaina Berrada

Row 3 — Impact criteria: Cut onboarding time on AI bed and staff capacity planning by 30 % · **Indicator:** KPI-005 (Design approval lead time) · **Baseline:** 44 % · **Target:** 77 % · **Deadline:** 2027-06-25 · **Owner:** Kawtar Fassi

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Impact criteria: application on the job, KPI change, satisfaction, cost per learner.

When every step is complete, click Complete in the task panel.

Task UFT-21-03 — Survey participants and managers · done by L&D Analyst

Input: Impact criteria → **Output:** Survey results

Step MP-39.3 — Survey participants and managers (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-09.5 — Record on-the-job observation (Level 3) (Manager)

Type:

Row 1 — On-the-job observation (Level 3): AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Soukaina Berrada · **Source:** Annual performance review

Row 2 — On-the-job observation (Level 3): AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Kawtar Fassi · **Source:** Audit report

Then click Complete the step. The rows go to the register "On-the-job observation (Level 3) register".

Result to record in the task: Survey sent to 190 participants and 34 managers; 61% responded.

When every step is complete, click Complete in the task panel.

Task UFT-21-04 — Compare planned against realized · done by L&D Analyst

Input: Survey results → **Output:** Plan-vs-actual analysis

Step MP-39.4 — Compare planned against realized (L&D Analyst)

Type:

Row 1 — Planned against realized: AI triage and clinical decision support · **Criterion:** Risk · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Planned against realized: AI medical imaging assistance · **Criterion:** Business impact · **Weight (%):** 30 · **Score (1–5):** 5 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Planned against realized: AI bed and staff capacity planning · **Criterion:** Urgency · **Weight (%):** 20 · **Score (1–5):** 4 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-32.3 — Isolate training effect (Performance Analyst)

Type:

Row 1 — Training effect: AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Kawtar Fassi · **Source:** Audit report

Row 2 — Training effect: AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Omar Berrada · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Training effect register".

Result to record in the task: Planned vs realized: 82% of sessions, 94% of budget; 2 themes not delivered.

When every step is complete, click Complete in the task panel.

Task UFT-21-05 — Review N-1 ROI · done by Performance Analyst

Input: Plan-vs-actual analysis → **Output:** N-1 ROI

Step MP-32.4 — Compute Phillips ROI (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-32.5 — Review ROI with finance (Finance Manager)

Type:

ROI with finance: ROI with finance

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-12-23

Then click Complete the step.

Result to record in the task: N-1 ROI: AI medical imaging assistance 18%; safety theme 35%.

When every step is complete, click Complete in the task panel.

Task UFT-21-06 — Draft impact conclusions · done by L&D Analyst

Input: N-1 ROI → **Output:** Draft conclusions

Step MP-39.5 — Draft impact study conclusions (L&D Analyst)

Type:

Row 1 — Impact study conclusions: Impact study conclusions — AI triage and clinical decision support · **Owner:** Hajar Amrani · **Start:** 2026-12-31 · **End:** 2027-01-30 · **Budget:** 35000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Impact study conclusions: Impact study conclusions — AI medical imaging assistance · **Owner:** Omar Alaoui · **Start:** 2027-01-07 · **End:** 2027-02-06 · **Budget:** 69000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Accept AI conclusions 1-3; rewrite conclusion 4 (sample too small).

When every step is complete, click Complete in the task panel.

Task UFT-21-07 — Feed conclusions to strategy · done by Head of L&D

Input: Draft conclusions → **Output:** Strategy inputs

Step MP-39.6 — Feed conclusions to strategy update (Head of L&D)

Type:

Row 1 — Conclusions to strategy update: KPI-008 (Session fill rate) · **Period:** 2026-Q1 · **Value:** 59 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Conclusions to strategy update: KPI-009 (Plan realization rate) · **Period:** 2026-Q2 · **Value:** 67 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-01.1 — Record corporate strategic objectives (Head of L&D)

Type:

Row 1 — Corporate strategic objectives: Raise AI triage and clinical decision support proficiency of Operator — Clinical Care & Nursing teams to level 3 · **Indicator:** KPI-008 (Session fill rate) · **Baseline:** 31 % · **Target:** 74 % · **Deadline:** 2027-06-21 · **Owner:** Omar Alaoui

Row 2 — Corporate strategic objectives: Certify Supervisor — Clinical Care & Nursing staff on AI medical imaging assistance · **Indicator:** KPI-009 (Plan realization rate) · **Baseline:** 50 % · **Target:** 77 % · **Deadline:** 2027-06-28 · **Owner:** Meryem Sefrioui

Row 3 — Corporate strategic objectives: Cut onboarding time on AI bed and staff capacity planning by 30 % · **Indicator:** KPI-010 (Learner completion rate) · **Baseline:** 44 % · **Target:** 89 % · **Deadline:** 2027-07-05 · **Owner:** Mehdi Hajji

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Feed to strategy: keep blended format; stop long classroom courses on AI medical imaging assistance.

When every step is complete, click Complete in the task panel.

Task UFT-21-08 — Update roadmap priorities · done by L&D Strategist

Input: Strategy inputs → **Output:** Updated roadmap priorities

Step MP-04.6 — Sequence roadmap initiatives (L&D Strategist)

Type:

Row 1 — Roadmap initiatives: Roadmap initiatives — AI triage and clinical decision support · **Owner:** Meryem Sefrioui · **Start:** 2027-01-04 · **End:** 2027-02-03 · **Budget:** 69000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Roadmap initiatives: Roadmap initiatives — AI medical imaging assistance · **Owner:** Mehdi Hajji · **Start:** 2027-01-11 · **End:** 2027-02-10 · **Budget:** 43000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Roadmap priority updated: AI triage and clinical decision support moved to Q2; AI medical imaging assistance to microlearning.

When every step is complete, click Complete in the task panel.

Gate G2 — G2 — Diagnostic validated: close the phase

1. Open the project workspace and click the gate button of the phase.
1. Tick each checklist item once its evidence is attached, then click Submit for decision.
1. Click Go. Type the justification: All mandatory items met; evidence attached.
1. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

Phase 3 — Training Engineering Report & plan

E2E-01 — Strategy-to-Learning Plan

Goal: Translate corporate strategy into an approved annual L&D plan and budget

Starts when: Annual strategy cycle opened or revised corporate objectives published by the board. **Ends with:** Annual L&D plan and budget envelope approved by the Steering Committee and locked.

Task UFT-01-01 — Record strategic objectives · done by Head of L&D

Input: Corporate strategy → **Output:** Strategic objectives register

Step MP-01.1 — Record corporate strategic objectives (Head of L&D)

Type:

Row 1 — Corporate strategic objectives: Raise AI triage and clinical decision support proficiency of Operator — Clinical Care & Nursing teams to level 3 · **Indicator:** KPI-002 (Skills inventory validation rate) · **Baseline:** 39 % · **Target:** 79 % · **Deadline:** 2026-12-31 · **Owner:** Meryem Sefrioui

Row 2 — Corporate strategic objectives: Certify Supervisor — Clinical Care & Nursing staff on AI medical imaging assistance · **Indicator:** KPI-003 (Critical gap rate) · **Baseline:** 40 % · **Target:** 86 % · **Deadline:** 2027-01-07 · **Owner:** Mehdi Hajji

Row 3 — Corporate strategic objectives: Cut onboarding time on AI bed and staff capacity planning by 30 % · **Indicator:** KPI-004 (Training Engineering Report cycle time) · **Baseline:** 41 % · **Target:** 89 % · **Deadline:** 2027-01-14 · **Owner:** Hind Ouazzani

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: SO-1: AI triage and clinical decision support used by 80% of Clinical Care & Nursing staff by end 2026 (owner: Operations Director, measured quarterly). SO-2: zero major audit findings on ISO 7101.

When every step is complete, click Complete in the task panel.

Task UFT-01-02 — Link objectives to functions and sites · done by L&D Strategist

Input: Strategic objectives register → **Output:** Objective-function map

Step MP-01.2 — Link objectives to functions and sites (L&D Strategist)

Type:

Row 1 — Objectives to functions and sites: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Mehdi Hajji · **Source:** Questionnaire results

Row 2 — Objectives to functions and sites: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hind Ouazzani · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Objectives to functions and sites register".

Result to record in the task: SO-1 → Clinical Care & Nursing, Operations, Information Systems (all sites). SO-2 → Quality & HSE, Clinical Care & Nursing.

When every step is complete, click Complete in the task panel.

Task UFT-01-03 — Frame skills priorities · done by L&D Analyst

Input: Objective-function map → **Output:** Priority competency list

Step MP-02.1 — Define competency families and levels (L&D Analyst)

Type:

Row 1 — Competency families and levels: Raise AI triage and clinical decision support proficiency of Operator — Clinical Care & Nursing teams to level 3 · **Indicator:** KPI-004 (Training Engineering Report cycle time) · **Baseline:** 31 % · **Target:** 73 % · **Deadline:** 2027-01-04 · **Owner:** Hind Ouazzani

Row 2 — Competency families and levels: Certify Supervisor — Clinical Care & Nursing staff on AI medical imaging assistance · **Indicator:** KPI-005 (Design approval lead time) · **Baseline:** 49 % · **Target:** 82 % · **Deadline:** 2027-01-11 · **Owner:** Tarik Amrani

Row 3 — Competency families and levels: Cut onboarding time on AI bed and staff capacity planning by 30 % · **Indicator:** KPI-006 (License Compliance %) · **Baseline:** 41 % · **Target:** 77 % · **Deadline:** 2027-01-18 · **Owner:** Amine Hajji

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-02.2 — Set target levels per position (HR Business Partner)

Type:

Row 1 — Target levels per position: Raise AI triage and clinical decision support proficiency of Operator — Clinical Care & Nursing teams to level 3 · **Indicator:** KPI-004 (Training Engineering Report cycle time) · **Baseline:** 46 % · **Target:** 84 % · **Deadline:** 2027-01-04 · **Owner:** Hind Ouazzani

Row 2 — Target levels per position: Certify Supervisor — Clinical Care & Nursing staff on AI medical imaging assistance · **Indicator:** KPI-005 (Design approval lead time) · **Baseline:** 39 % · **Target:** 84 % · **Deadline:** 2027-01-11 · **Owner:** Tarik Amrani

Row 3 — Target levels per position: Cut onboarding time on AI bed and staff capacity planning by 30 % · **Indicator:** KPI-006 (License Compliance %) · **Baseline:** 44 % · **Target:** 73 % · **Deadline:** 2027-01-18 · **Owner:** Amine Hajji

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Priority competency families: AI triage and clinical decision support; AI medical imaging assistance; ISO 7101 compliance. Target level 3 (Autonomous) for supervisors.

When every step is complete, click Complete in the task panel.

Task UFT-01-04 — Pre-scope training needs · done by L&D Analyst

Input: Priority competency list → **Output:** Pre-scoped needs

Step MP-03.1 — Compute gap matrix (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-03.2 — Review gap matrix by site and function (L&D Analyst)

Type:

Gap matrix by site and function: Gap matrix by site and function

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-08-11

Then click Complete the step.

Result to record in the task: Pre-scoped needs: 42% of Clinical Care & Nursing supervisors below target on AI triage and clinical decision support; 18 employees below target on ISO 7101.

When every step is complete, click Complete in the task panel.

Task UFT-01-05 — Define budget envelope · done by Finance Manager

Input: Pre-scoped needs → **Output:** Budget envelope

Step MP-01.3 — Define L&D budget envelope (Finance Manager)

Type:

Row 1 — L&D budget envelope: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Amine Hajji · **Source:** HRIS export

Row 2 — L&D budget envelope: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Zineb Squalli · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "L&D budget envelope register".

Step MP-18.1 — Allocate budget by theme and site (Finance Manager)

Type:

Row 1 — Budget by theme and site: Budget by theme and site — AI triage and clinical decision support · **Owner:** Amine Hajji · **Start:** 2026-07-22 · **End:** 2026-08-21 · **Budget:** 48000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Budget by theme and site: Budget by theme and site — AI medical imaging assistance · **Owner:** Zineb Squalli · **Start:** 2026-07-29 · **End:** 2026-08-28 · **Budget:** 28000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-18.2 — Forecast OFPPT refunds (Finance Manager)

Type:

Row 1 — OFPPT refunds: KPI-006 (License Compliance %) · **Period:** 2026-Q3 · **Value:** 80 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — OFPPT refunds: KPI-007 (Content publication lead time) · **Period:** 2026-Q1 · **Value:** 77 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Gross L&D budget 2026: 1,850,000 MAD; forecast refund (OFPPT/CSF): 520,000 MAD; net envelope: 1,330,000 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-01-06 — Plan change and adoption · done by Change Manager

Input: Budget envelope → **Output:** Adoption plan

Step MP-19.1 — Assess change impact (Change Manager)

Type:

Row 1 — Change impact: AI triage and clinical decision support · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Change impact: AI medical imaging assistance · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Change impact: AI bed and staff capacity planning · **Criterion:** Cost · **Weight (%):** 20 · **Score (1–5):** 3 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-19.2 — Build adoption plan (Change Manager)

Type:

Row 1 — Adoption plan: Adoption plan — AI triage and clinical decision support · **Owner:** Zineb Squalli · **Start:** 2026-07-24 · **End:** 2026-08-23 · **Budget:** 61000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Adoption plan: Adoption plan — AI medical imaging assistance · **Owner:** Hind Mansouri · **Start:** 2026-07-31 · **End:** 2026-08-30 · **Budget:** 44000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Change impact: high for Clinical Care & Nursing supervisors (new AI triage and clinical decision support routines). Sponsors: Operations Director. Champions: one per site.

When every step is complete, click Complete in the task panel.

Task UFT-01-07 — Compile plan approval pack · done by Head of L&D

Input: Adoption plan → **Output:** Approval pack

Step MP-01.4 — Schedule Steering Committee milestones (Head of L&D)

Type:

Row 1 — Steering Committee milestones: Steering Committee milestones — AI triage and clinical decision support · **Owner:** Hind Mansouri · **Start:** 2026-07-26 · **End:** 2026-08-25 · **Budget:** 51000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Steering Committee milestones: Steering Committee milestones — AI medical imaging assistance · **Owner:** Meryem Mansouri · **Start:** 2026-08-02 · **End:** 2026-09-01 · **Budget:** 73000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-01.5 — Compile plan approval pack (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-04.1 — Consolidate feeder outputs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Approval pack: 2 objectives, net budget 1,330,000 MAD, 6 priority themes, committee date 15 March 2026.

When every step is complete, click Complete in the task panel.

Task UFT-01-08 — Approve and lock annual L&D plan · done by HR Director

Input: Approval pack → **Output:** Approved annual L&D plan

Step MP-01.6 — Record Steering Committee decision (HR Director)

Type:

Row 1 — Steering Committee decision: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Meryem Mansouri · **Source:** Annual performance review

Row 2 — Steering Committee decision: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Reda Rami · **Source:** Audit report

Then click Complete the step. The rows go to the register "Steering Committee decision register".

Step MP-01.7 — Lock and distribute approved plan (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Decision: Approve. Justification: aligned with SO-1 and SO-2; budget within envelope. Plan locked as version 1.

When every step is complete, click Complete in the task panel.

E2E-03 — Needs-to-Training Engineering Report & Roadmap

Goal: Produce the Training Engineering Report and the prioritized training roadmap

Starts when: Validated skills gap diagnosis, consolidated demands, approved Scope of Work or diagnostic findings available. **Ends with:** Training Engineering Report and prioritized roadmap approved and published.

Task UFT-03-01 — Plan diagnostic interviews · done by L&D Analyst

Input: Approved Scope of Work → **Output:** Interview plan

Step MP-03.3 — Plan diagnostic interviews (L&D Analyst)

Type:

Row 1 — Diagnostic interviews: Diagnostic interviews — AI triage and clinical decision support · **Owner:** Hicham Naciri · **Start:** 2026-08-13 · **End:** 2026-09-12 · **Budget:** 74000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Diagnostic interviews: Diagnostic interviews — AI medical imaging assistance · **Owner:** Kawtar Kettani · **Start:** 2026-08-20 · **End:** 2026-09-19 · **Budget:** 68000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Interview plan: 14 semi-structured interviews (4 MS, 6 MO, 4 OP), 45 minutes each, weeks 10-11.

When every step is complete, click Complete in the task panel.

Task UFT-03-02 — Record interview findings · done by L&D Analyst

Input: Interview plan → **Output:** Interview findings

Step MP-03.4 — Record interview findings (L&D Analyst)

Type:

Row 1 — Interview findings: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Kawtar Kettani · **Source:** Questionnaire results

Row 2 — Interview findings: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Ghita Amrani · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Interview findings register".

Result to record in the task: Finding (MO, Clinical Care & Nursing): 'Supervisors do not trust AI triage and clinical decision support data; they re-enter figures on paper.'

When every step is complete, click Complete in the task panel.

Task UFT-03-03 — Cluster needs into themes · done by L&D Analyst

Input: Interview findings, gaps, responses → **Output:** Training themes

Step MP-03.5 — Cluster needs into training themes (L&D Analyst)

Type:

Row 1 — Needs into training themes: AI triage and clinical decision support · **Criterion:** Cost · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Needs into training themes: AI medical imaging assistance · **Criterion:** Risk · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Needs into training themes: AI bed and staff capacity planning · **Criterion:** Business impact · **Weight (%):** 20 · **Score (1–5):** 3 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Accept theme 'AI triage and clinical decision support for supervisors'; merge two duplicate themes on AI medical imaging assistance; split 'ISO 7101' into awareness and auditor tracks.

When every step is complete, click Complete in the task panel.

Task UFT-03-04 — Prioritize needs by impact · done by L&D Strategist

Input: Training themes → **Output:** Prioritized needs

Step MP-03.6 — Prioritize needs by business impact (L&D Strategist)

Type:

Row 1 — Needs by business impact: AI triage and clinical decision support · **Criterion:** Risk · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Needs by business impact: AI medical imaging assistance · **Criterion:** Business impact · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Needs by business impact: AI bed and staff capacity planning · **Criterion:** Urgency · **Weight (%):** 20 · **Score (1–5):** 4 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: AI triage and clinical decision support: impact 5, urgency 4. AI medical imaging assistance: impact 4, urgency 3. ISO 7101: impact 4, urgency 5.

When every step is complete, click Complete in the task panel.

Task UFT-03-05 — Validate needs register · done by Head of L&D

Input: Prioritized needs → **Output:** Validated needs register

Step MP-03.7 — Validate needs register (Head of L&D)

Type:

Decision: Approved

Needs register: Needs register

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-08-14

Decided by: Meryem Sefrioui

Then click Complete the step.

Result to record in the task: Needs register validated: 23 needs, 6 themes. Justification: covers SO-1 and SO-2; sponsor reviewed.

When every step is complete, click Complete in the task panel.

Task UFT-03-06 — Consolidate engineering inputs · done by L&D Analyst

Input: Validated needs register → **Output:** Input completeness check

Step MP-04.1 — Consolidate feeder outputs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-04.2 — Check input completeness (L&D Analyst)

Type:

Input completeness: Input completeness

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-08-24

Then click Complete the step.

Result to record in the task: Inputs complete: Scope of Work, 187 responses, gap matrix, RAG dashboard, SWOT, demands. Missing: none.

When every step is complete, click Complete in the task panel.

Task UFT-03-07 — Draft Training Engineering Report · done by L&D Strategist

Input: Input completeness check → **Output:** Report draft

Step MP-04.3 — Generate report draft (L&D Strategist)

Type:

Row 1 — Report draft: Report draft — AI triage and clinical decision support · **Owner:** Loubna Fassi · **Start:** 2026-08-25 · **End:** 2026-09-24 · **Budget:** 53000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Report draft: Report draft — AI medical imaging assistance · **Owner:** Ayoub Naciri · **Start:** 2026-09-01 · **End:** 2026-10-01 · **Budget:** 42000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-04.4 — Edit and complete report sections (L&D Strategist)

Type:

Complete report sections: Complete report sections

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-09-02

Then click Complete the step.

Result to record in the task: Section 3 'Diagnostic': edit the AI draft, add the interview quote on AI triage and clinical decision support, keep the RAG table.

When every step is complete, click Complete in the task panel.

Task UFT-03-08 — Run quality review · done by Quality Manager

Input: Report draft → **Output:** Reviewed report

Step MP-04.5 — Run quality review of report (Quality Manager)

Type:

Row 1 — Quality review of report: AI triage and clinical decision support — half-day workshop · **Date:** 2026-09-06 · **Trainer:** Atlas Formation Conseil · **Participants:** 18 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Quality review of report: AI medical imaging assistance — half-day workshop · **Date:** 2026-09-13 · **Trainer:** Maghreb Learning Partners · **Participants:** 15 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-20.5 — Run periodic quality review (Quality Manager)

Type:

Row 1 — Periodic quality review: AI triage and clinical decision support — half-day workshop · **Date:** 2026-09-06 · **Trainer:** Atlas Formation Conseil · **Participants:** 13 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Periodic quality review: AI medical imaging assistance — half-day workshop · **Date:** 2026-09-13 · **Trainer:** Maghreb Learning Partners · **Participants:** 15 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Quality review: 11/12 checklist items met; fix item 'sources cited for every figure'. Result: pass after correction.

When every step is complete, click Complete in the task panel.

Task UFT-03-09 — Sequence and budget roadmap · done by L&D Strategist

Input: Reviewed report → **Output:** Draft roadmap

Step MP-04.6 — Sequence roadmap initiatives (L&D Strategist)

Type:

Row 1 — Roadmap initiatives: Roadmap initiatives — AI triage and clinical decision support · **Owner:** Hamza Ziani · **Start:** 2026-08-29 · **End:** 2026-09-28 · **Budget:** 24000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Roadmap initiatives: Roadmap initiatives — AI medical imaging assistance · **Owner:** Soukaina Berrada · **Start:** 2026-09-05 · **End:** 2026-10-05 · **Budget:** 62000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-18.1 — Allocate budget by theme and site (Finance Manager)

Type:

Row 1 — Budget by theme and site: Budget by theme and site — AI triage and clinical decision support · **Owner:** Hamza Ziani · **Start:** 2026-08-29 · **End:** 2026-09-28 · **Budget:** 40000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Budget by theme and site: Budget by theme and site — AI medical imaging assistance · **Owner:** Soukaina Berrada · **Start:** 2026-09-05 · **End:** 2026-10-05 · **Budget:** 34000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Roadmap: Q2 AI triage and clinical decision support (6 groups); Q3 ISO 7101 (4 groups); Q4 AI medical imaging assistance (3 groups). Total 1,240,000 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-03-10 — Approve and publish report and roadmap · done by Head of L&D

Input: Draft roadmap → **Output:** Approved Training Engineering Report and roadmap

Step MP-04.7 — Submit roadmap for approval (Head of L&D)

Type:

Row 1 — Roadmap for approval: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-08-26

Row 2 — Roadmap for approval: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-09-02

Then click Complete the step. The rows go to the register "Communications log".

Step MP-04.8 — Record roadmap approval (HR Director)

Type:

Row 1 — Roadmap approval: AI triage and clinical decision support · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Soukaina Berrada · **Source:** HRIS export

Row 2 — Roadmap approval: AI medical imaging assistance · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Kawtar Fassi · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Roadmap approval register".

Step MP-04.9 — Publish approved report and roadmap (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-01.6 — Record Steering Committee decision (HR Director)

Type:

Row 1 — Steering Committee decision: AI triage and clinical decision support · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Soukaina Berrada · **Source:** HRIS export

Row 2 — Steering Committee decision: AI medical imaging assistance · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Kawtar Fassi · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Steering Committee decision register".

Result to record in the task: Decision: Approve report and roadmap v1. Justification: within budget, linked to SO-1/SO-2. Publish to all stakeholders.

When every step is complete, click Complete in the task panel.

E2E-30 — Prioritization-to-Resource Plan

Goal: Prioritize themes and plan days, groups, trainers, budget

Starts when: Consolidated training themes requiring prioritization and resource planning.
Ends with: Approved prioritized training plan with days per theme, group planning, trainer allocation, and budget.

Task UFT-30-01 — Consolidate training themes · done by L&D Analyst

Input: Themes → **Output:** Theme list

Step MP-49.1 — Consolidate training themes (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Consolidated list: 9 themes from needs, demands, GPEC and SWOT.

When every step is complete, click Complete in the task panel.

Task UFT-30-02 — Define prioritization criteria · done by L&D Strategist

Input: Strategy → **Output:** Criteria

Step MP-49.2 — Define prioritization criteria (L&D Strategist)

Type:

Row 1 — Prioritization criteria: Raise AI triage and clinical decision support proficiency of Operator — Clinical Care & Nursing teams to level 3 · **Indicator:** KPI-010 (Learner completion rate) · **Baseline:** 42 % · **Target:** 90 % · **Deadline:** 2027-10-23 · **Owner:** Tarik Amrani

Row 2 — Prioritization criteria: Certify Supervisor — Clinical Care & Nursing staff on AI medical imaging assistance · **Indicator:** KPI-011 (API Availability) · **Baseline:** 35 % · **Target:** 84 % · **Deadline:** 2027-10-30 · **Owner:** Amine Hajji

Row 3 — Prioritization criteria: Cut onboarding time on AI bed and staff capacity planning by 30 % · **Indicator:** KPI-012 (Average Level 1 satisfaction) · **Baseline:** 35 % · **Target:** 76 % · **Deadline:** 2027-11-06 · **Owner:** Zineb Squalli

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Criteria: strategic impact 40%, urgency 30%, number of learners 20%, cost 10%.

When every step is complete, click Complete in the task panel.

Task UFT-30-03 — Prioritize themes · done by L&D Strategist

Input: Criteria → **Output:** Prioritized themes

Step MP-49.3 — Prioritize themes (L&D Strategist)

Type:

Row 1 — Themes: AI triage and clinical decision support · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Themes: AI medical imaging assistance · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Themes: AI bed and staff capacity planning · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 4 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Rank 1 AI triage and clinical decision support (score 86); rank 2 ISO 7101 (81); rank 3 AI medical imaging assistance (74).

When every step is complete, click Complete in the task panel.

Task UFT-30-04 — Estimate days per theme · done by L&D Planner

Input: Prioritized themes → **Output:** Days per theme

Step MP-49.4 — Estimate days per theme (L&D Planner)

Type:

Row 1 — Days per theme: AI triage and clinical decision support · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Days per theme: AI medical imaging assistance · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Days per theme: AI bed and staff capacity planning · **Criterion:** Cost · **Weight (%):** 20 · **Score (1–5):** 3 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: AI triage and clinical decision support: 3 days per group; ISO 7101: 2 days; AI medical imaging assistance: 1.5 days.

When every step is complete, click Complete in the task panel.

Task UFT-30-05 — Define groups per theme · done by L&D Planner

Input: Days per theme → **Output:** Group plan

Step MP-49.5 — Define number of groups per theme (L&D Planner)

Type:

Row 1 — Number of groups per theme: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hind Mansouri · **Source:** Questionnaire results

Row 2 — Number of groups per theme: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Meryem Mansouri · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Number of groups per theme register".

Step MP-49.6 — Allocate trainers (L&D Planner)

Type:

Row 1 — Role: Instructional Designer · **Trainers:** AI triage and clinical decision support · **Person:** Hind Mansouri · **Allocation (%):** 100 · **Start:** 2027-05-02 · **Holder type:** Holder

Row 2 — Role: Content Developer / Curator · **Trainers:** AI medical imaging assistance · **Person:** Meryem Mansouri · **Allocation (%):** 50 · **Start:** 2027-05-09 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Result to record in the task: AI triage and clinical decision support: 6 groups of 12; ISO 7101: 4 groups; AI medical imaging assistance: 3 groups.

When every step is complete, click Complete in the task panel.

Task UFT-30-06 — Allocate trainers and budget · done by Finance Manager

Input: Group plan → **Output:** Resource plan

Step MP-49.7 — Estimate plan budget (Finance Manager)

Type:

Row 1 — Plan budget: AI triage and clinical decision support · **Criterion:** Cost · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Plan budget: AI medical imaging assistance · **Criterion:** Risk · **Weight (%):** 30 · **Score (1–5):** 5 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Plan budget: AI bed and staff capacity planning · **Criterion:** Business impact · **Weight (%):** 20 · **Score (1–5):** 4 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-49.8 — Sequence delivery (L&D Planner)

Type:

Row 1 — Delivery: Delivery — AI triage and clinical decision support · **Owner:** Meryem Mansouri · **Start:** 2027-05-14 · **End:** 2027-06-13 · **Budget:** 57000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Delivery: Delivery — AI medical imaging assistance · **Owner:** Reda Rami · **Start:** 2027-05-21 · **End:** 2027-06-20 · **Budget:** 56000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-49.9 — Validate plan with governance (Head of L&D)

Type:

Decision: Approved

Plan with governance: Plan with governance

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-05-28

Decided by: Meryem Sefrioui

Then click Complete the step.

Result to record in the task: Trainers: 2 internal, vendor A; budget 1,240,000 MAD (within envelope).

When every step is complete, click Complete in the task panel.

Task UFT-30-07 — Publish prioritized training plan · done by L&D Leader

Input: All outputs → **Output:** Prioritized Plan

Step MP-49.10 — Publish prioritized plan (Head of L&D)

Type:

Row 1 — Prioritized plan: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-05-11

Row 2 — Prioritized plan: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-05-18

Then click Complete the step. The rows go to the register "Communications log".

Step MP-49.11 — Track plan execution (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-49.12 — Report on resource utilization (L&D Planner)

Type:

Row 1 — On resource utilization: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-05-11

Row 2 — On resource utilization: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-05-18

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish RPT-002 Prioritized Training Plan 2026 to all stakeholders.

When every step is complete, click Complete in the task panel.

E2E-22 — Multi-Site Plan-to-Deployment

Goal: Adapt and deploy plans across sites

Starts when: Approved roadmap for an organization with several sites or entities. **Ends with:** Site plans adapted, validated and deployed, with deviations escalated.

Task UFT-22-01 — Split plan by site · done by Head of L&D

Input: Approved roadmap → **Output:** Site plans

Step MP-40.1 — Split plan by site (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Split plan into 3 sites: Casablanca 55%, Tanger 30%, Agadir 15%.

When every step is complete, click Complete in the task panel.

Task UFT-22-02 — Adapt site plan to local constraints · done by Site L&D Coordinator

Input: Site plans → **Output:** Adapted site plans

Step MP-40.2 — Adapt site plan to local constraints (Site L&D Coordinator)

Type:

Row 1 — Site plan to local constraints: Site plan to local constraints — AI triage and clinical decision support · **Owner:** Hind Ouazzani · **Start:** 2027-01-08 · **End:** 2027-02-07 · **Budget:** 21000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Site plan to local constraints: Site plan to local constraints — AI medical imaging assistance · **Owner:** Tarik Amrani · **Start:** 2027-01-15 · **End:** 2027-02-14 · **Budget:** 73000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Tanger: shift constraints → sessions of 4 hours instead of full days.

When every step is complete, click Complete in the task panel.

Task UFT-22-03 — Localize site materials · done by Instructional Designer

Input: Adapted site plans → **Output:** Localized materials

Step MP-23.1 — Request translation (Instructional Designer)

Type:

Row 1 — Translation: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-01-05

Row 2 — Translation: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-01-12

Then click Complete the step. The rows go to the register "Communications log".

Step MP-23.3 — Validate translation (Subject Matter Expert)

Type:

Decision: Approved

Translation: Translation

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-01-10

Decided by: Meryem Sefrioui

Then click Complete the step.

Step MP-23.6 — Review participation equity (HR Business Partner)

Type:

Participation equity: Participation equity

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-01-11

Then click Complete the step.

Step MP-23.7 — Record inclusion actions (HR Business Partner)

Type:

Row 1 — Inclusion actions: AI triage and clinical decision support · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Tarik Amrani · **Source:** Interview with the function head

Row 2 — Inclusion actions: AI medical imaging assistance · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Amine Hajji · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Inclusion actions register".

Result to record in the task: Agadir materials translated to AR; validated by the site expert.

When every step is complete, click Complete in the task panel.

Task UFT-22-04 — Validate site plan · done by Head of L&D

Input: Adapted site plans → **Output:** Validated site plans

Step MP-40.3 — Validate site plan (Head of L&D)

Type:

Decision: Approved

Site plan: Site plan

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-01-19

Decided by: Meryem Sefrioui

Then click Complete the step.

Result to record in the task: Site plans validated centrally; budget deviation within ±5%.

When every step is complete, click Complete in the task panel.

Task UFT-22-05 — Schedule site sessions · done by Training Administrator

Input: Validated site plans → **Output:** Site schedules

Step MP-07.1 — Create training session (Training Administrator)

Type:

Row 1 — Training session: AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Zineb Squalli · **Source:** Annual performance review

Row 2 — Training session: AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hind Mansouri · **Source:** Audit report

Then click Complete the step. The rows go to the register "Training session register".

Step MP-11.1 — Book rooms and equipment (Training Administrator)

Type:

Row 1 — Rooms and equipment: Rooms and equipment — AI triage and clinical decision support · **Owner:** Zineb Squalli · **Start:** 2027-01-14 · **End:** 2027-02-13 · **Budget:** 67000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Rooms and equipment: Rooms and equipment — AI medical imaging assistance · **Owner:** Hind Mansouri · **Start:** 2027-01-21 · **End:** 2027-02-20 · **Budget:** 66000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Tanger schedule: 8 sessions, rooms booked, 2 trainers.

When every step is complete, click Complete in the task panel.

Task UFT-22-06 — Deploy site schedule · done by Site L&D Coordinator

Input: Site schedules → **Output:** Deployed schedules

Step MP-40.4 — Deploy site schedule (Site L&D Coordinator)

Type:

Row 1 — Site schedule: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Site schedule: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Schedules deployed and communicated to site managers.

When every step is complete, click Complete in the task panel.

Task UFT-22-07 — Consolidate site status · done by Head of L&D

Input: Deployed schedules → **Output:** Site status

Step MP-40.5 — Consolidate site status (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Status: Casablanca 70%, Tanger 45%, Agadir 20% delivered.

When every step is complete, click Complete in the task panel.

Task UFT-22-08 — Escalate site deviation · done by Head of L&D

Input: Site status → **Output:** Multi-site deployment status

Step MP-40.6 — Escalate site deviation (Head of L&D)

Type:

Row 1 — Site deviation: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-01-15

Row 2 — Site deviation: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-01-22

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Escalate Agadir deviation (-25%) to the HR Director with a recovery plan.

When every step is complete, click Complete in the task panel.

E2E-23 — Regulatory Submission-to-Validation

Goal: Submit and validate training plans with regulatory bodies

Starts when: Approved plan requiring external validation or funding (e.g. OFPPT, GIAC-Agro).
Ends with: Plan validated by the regulatory body and evidence archived.

Task UFT-23-01 — Select regulatory template · done by Compliance Officer

Input: Approved plan → **Output:** Selected template

Step MP-41.1 — Select regulatory template (Compliance Officer)

Type:

Decision: Approved

Regulatory template: Regulatory template

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-01-29

Decided by: Meryem Sefrioui

Then click Complete the step.

Result to record in the task: Template: OFPPT special training contracts (CSF) — plan file.

When every step is complete, click Complete in the task panel.

Task UFT-23-02 — Generate submission file · done by Compliance Officer

Input: Selected template → **Output:** Submission file

Step MP-41.2 — Generate submission file (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-20.5 — Run periodic quality review (Quality Manager)

Type:

Row 1 — Periodic quality review: AI triage and clinical decision support — half-day workshop · **Date:** 2027-02-03 · **Trainer:** Atlas Formation Conseil · **Participants:** 11 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Periodic quality review: AI medical imaging assistance — half-day workshop · **Date:** 2027-02-10 · **Trainer:** Maghreb Learning Partners · **Participants:** 12 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Submission file generated: plan, themes, providers, costs; quality check passed.

When every step is complete, click Complete in the task panel.

Task UFT-23-03 — Submit plan to regulatory body · done by Compliance Officer

Input: Submission file → **Output:** Submitted plan

Step MP-41.3 — Submit plan to regulatory body (Compliance Officer)

Type:

Row 1 — Plan to regulatory body: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-01-21

Row 2 — Plan to regulatory body: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-01-28

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Submitted to the regional funding committee on 5 March; reference GSF-2026-118.

When every step is complete, click Complete in the task panel.

Task UFT-23-04 — Track submission status · done by Compliance Officer

Input: Submitted plan → **Output:** Status log

Step MP-41.4 — Track submission status (Compliance Officer)

Type:

Row 1 — Submission status: KPI-001 (Strategic objective coverage) · **Period:** 2026-Q2 · **Value:** 72 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Submission status: KPI-002 (Skills inventory validation rate) · **Period:** 2026-Q3 · **Value:** 94 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Status: additional document requested (provider accreditation) — sent on 12 March.

When every step is complete, click Complete in the task panel.

Task UFT-23-05 — Record regulator decision · done by Compliance Officer

Input: Status log → **Output:** Regulator decision

Step MP-41.5 — Record regulator decision (Compliance Officer)

Type:

Row 1 — Regulator decision: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hind Hajji · **Source:** Interview with the function head

Row 2 — Regulator decision: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Youssef Sefrioui · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Regulator decision register".

Step MP-14.1 — Register regulatory requirement (Compliance Officer)

Type:

Row 1 — Regulatory requirement: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hind Hajji · **Source:** Interview with the function head

Row 2 — Regulatory requirement: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Youssef Sefrioui · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Regulatory requirement register".

Result to record in the task: Decision: approved with a cap of 520,000 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-23-06 — Submit refund claims · done by Finance Manager

Input: Regulator decision → **Output:** Refund claims

Step MP-18.5 — Submit refund claims (Finance Manager)

Type:

Row 1 — Refund claims: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-01-27

Row 2 — Refund claims: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-02-03

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Refund claims submitted for 12 delivered actions: 318,000 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-23-07 — Archive submission evidence · done by Compliance Officer

Input: Refund claims → **Output:** Regulatory submission tracker

Step MP-41.6 — Archive submission evidence (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-18.6 — Close budget period (Finance Manager)

Type:

Decision: Approved

Budget period: Budget period

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-02-17

Decided by: Meryem Sefrioui

Then click Complete the step.

Result to record in the task: Archive file, decision and claims; retention 10 years.

When every step is complete, click Complete in the task panel.

E2E-16 — Vendor-to-Finance

Goal: Manage vendors from selection to payment

Starts when: Training need requiring an external provider. **Ends with:** Vendor selected, order issued and payment approved against attendance.

Task UFT-16-01 — Issue request for proposal · done by Purchasing Officer

Input: Training need → **Output:** RFP

Step MP-15.1 — Issue request for proposal (Purchasing Officer)

Type:

Row 1 — Request for proposal: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-10-15

Row 2 — Request for proposal: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-10-22

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: RFP 'Training on AI triage and clinical decision support' sent to 4 vendors, answers due 15 May.

When every step is complete, click Complete in the task panel.

Task UFT-16-02 — Score vendor proposals · done by Purchasing Officer

Input: RFP → **Output:** Scored proposals

Step MP-15.2 — Score vendor proposals (Purchasing Officer)

Type:

Row 1 — Vendor proposals: AI triage and clinical decision support · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Vendor proposals: AI medical imaging assistance · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Vendor proposals: AI bed and staff capacity planning · **Criterion:** Cost · **Weight (%):** 20 · **Score (1–5):** 3 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Scores: vendor A 82, vendor B 76, vendor C 64 (price 40%, expertise 40%, references 20%).

When every step is complete, click Complete in the task panel.

Task UFT-16-03 — Register and verify vendor · done by Purchasing Officer

Input: Scored proposals → **Output:** Accredited vendor

Step MP-15.3 — Register vendor record (Purchasing Officer)

Type:

Row 1 — Vendor record: AI triage and clinical decision support · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Ayoub Naciri · **Source:** Questionnaire results

Row 2 — Vendor record: AI medical imaging assistance · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Hamza Ziani · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Vendor record register".

Step MP-15.4 — Verify vendor accreditation (Compliance Officer)

Type:

Vendor accreditation: Vendor accreditation

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-11-01

Then click Complete the step.

Result to record in the task: Register vendor A; accreditation OFPPT verified, valid until December.

When every step is complete, click Complete in the task panel.

Task UFT-16-04 — Issue purchase order · done by Purchasing Officer

Input: Accredited vendor → **Output:** Purchase order

Step MP-15.5 — Issue purchase order (Purchasing Officer)

Type:

Row 1 — Purchase order: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-10-21

Row 2 — Purchase order: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-10-28

Then click Complete the step. The rows go to the register "Communications log".

Step MP-18.3 — Record committed and actual costs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Purchase order PO-2026-044: 180,000 MAD on budget line 'AI triage and clinical decision support'.

When every step is complete, click Complete in the task panel.

Task UFT-16-05 — Match invoice to order and attendance · done by Training Administrator

Input: Purchase order → **Output:** Matched invoice

Step MP-15.6 — Match invoice to order and attendance (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-11.5 — Reconcile attendance with invoices (Training Administrator)

Type:

Attendance with invoices: Attendance with invoices

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-11-19

Then click Complete the step.

Result to record in the task: Invoice matched with PO and attendance (3 days × 12 learners): OK.

When every step is complete, click Complete in the task panel.

Task UFT-16-06 — Approve vendor payment · done by Finance Manager

Input: Matched invoice → **Output:** Vendor performance & spend report

Step MP-15.7 — Approve vendor payment (Finance Manager)

Type:

Decision: Approved

Vendor payment: Vendor payment

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-10-23

Decided by: Meryem Sefrioui

Then click Complete the step.

Step MP-18.4 — Compare spend against budget (Finance Manager)

Type:

Row 1 — Spend against budget: AI triage and clinical decision support · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Spend against budget: AI medical imaging assistance · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Spend against budget: AI bed and staff capacity planning · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 2 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Approve payment 180,000 MAD; vendor performance rating 4/5.

When every step is complete, click Complete in the task panel.

HCPR-E2E-02 — Healthcare Providers Critical-Skills-to-Transformation Plan

Goal: Turn critical-skill gaps and digital and AI use cases into a transformation plan.

Starts when: Annual plan cycle or technology change in Healthcare Providers. **Ends with:** Transformation learning paths approved.

Task UFT-HCPR-E2-01 — List critical Clinical Care & Nursing skills · done by L&D Analyst

Input: Sector obligations → **Output:** Record each critical skill with its level.

Step MP-02.1 — Define competency families and levels (L&D Analyst)

Type:

Row 1 — Competency families and levels: Raise AI triage and clinical decision support proficiency of Operator — Clinical Care & Nursing teams to level 3 · **Indicator:** KPI-017 (IDP coverage) · **Baseline:** 49 % · **Target:** 77 % · **Deadline:** 2027-12-16 · **Owner:** Mehdi Hajji

Row 2 — Competency families and levels: Certify Supervisor — Clinical Care & Nursing staff on AI medical imaging assistance · **Indicator:** KPI-018 (Mandatory certification compliance) · **Baseline:** 43 % · **Target:** 78 % · **Deadline:** 2027-12-23 · **Owner:** Hind Ouazzani

Row 3 — Competency families and levels: Cut onboarding time on AI bed and staff capacity planning by 30 % · **Indicator:** KPI-019 (Vendor invoice match rate) · **Baseline:** 34 % · **Target:** 75 % · **Deadline:** 2027-12-30 · **Owner:** Tarik Amrani

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-03.1 — Compute gap matrix (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Critical skills: 6 for Clinical Care & Nursing, each with target level 3.

When every step is complete, click Complete in the task panel.

Task UFT-HCPR-E2-02 — List digital and AI use cases · done by L&D Strategist

Input: Sector obligations → **Output:** Record the use cases that change jobs.

Step MP-03.3 — Plan diagnostic interviews (L&D Analyst)

Type:

Row 1 — Diagnostic interviews: Diagnostic interviews — AI triage and clinical decision support · **Owner:** Hind Ouazzani · **Start:** 2027-07-01 · **End:** 2027-07-31 · **Budget:** 60000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Diagnostic interviews: Diagnostic interviews — AI medical imaging assistance · **Owner:** Tarik Amrani · **Start:** 2027-07-08 · **End:** 2027-08-07 · **Budget:** 24000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Use cases: AI triage and clinical decision support; AI medical imaging assistance; AI bed and staff capacity planning.

When every step is complete, click Complete in the task panel.

Task UFT-HCPR-E2-03 — Forecast impacted roles · done by Performance Analyst

Input: Sector obligations → **Output:** Review the AI forecast of impacted roles.

Step MP-03.5 — Cluster needs into training themes (L&D Analyst)

Type:

Row 1 — Needs into training themes: AI triage and clinical decision support · **Criterion:** Cost · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Needs into training themes: AI medical imaging assistance · **Criterion:** Risk · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Needs into training themes: AI bed and staff capacity planning · **Criterion:** Business impact · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-28.3 — Forecast skill gaps (Performance Analyst)

Type:

Row 1 — Skill gaps: KPI-019 (Vendor invoice match rate) · **Period:** 2026-Q2 · **Value:** 76 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Skill gaps: KPI-020 (Integration synchronisation success rate) · **Period:** 2026-Q3 · **Value:** 74 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Impacted roles: supervisors (high), operators (medium); accept the AI forecast.

When every step is complete, click Complete in the task panel.

Task UFT-HCPR-E2-04 — Approve transformation paths · done by Instructional Designer

Input: Sector obligations → **Output:** Approve the learning paths per role.

Step MP-05.2 — Define learning path and modules (Instructional Designer)

Type:

Row 1 — Learning path and modules: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Amine Hajji · **Source:** Audit report

Row 2 — Learning path and modules: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Zineb Squalli · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Learning path and modules register".

Step MP-05.7 — Approve design document (Head of L&D)

Type:

Decision: Approved with conditions

Design document: Design document

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2027-07-26

Decided by: Meryem Sefrioui

Then click Complete the step.

Result to record in the task: Approve 2 transformation paths: 'AI triage and clinical decision support for supervisors', 'AI medical imaging assistance for operators'.

When every step is complete, click Complete in the task panel.

Gate G3 — G3 — Report & roadmap approved: close the phase

1. Open the project workspace and click the gate button of the phase.
1. Tick each checklist item once its evidence is attached, then click Submit for decision.
1. Click Go. Type the justification: All mandatory items met; evidence attached.
1. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

Phase 4 — Design & delivery

E2E-04 — Roadmap-to-Curriculum Design

Goal: Convert roadmap into curriculum maps, learning paths, design documents

Starts when: Approved Training Engineering Report and roadmap published. **Ends with:** Approved curriculum maps, learning paths and design documents.

Task UFT-04-01 — Create curriculum map · done by Instructional Designer

Input: Approved roadmap → **Output:** Curriculum map

Step MP-05.1 — Create curriculum map from roadmap (Instructional Designer)

Type:

Row 1 — Curriculum map from roadmap: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Kawtar Fassi · **Source:** Interview with the function head

Row 2 — Curriculum map from roadmap: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Omar Berrada · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Curriculum map from roadmap register".

Result to record in the task: Curriculum map 'AI triage and clinical decision support': 3 learning paths (operators, supervisors, managers), 9 modules.

When every step is complete, click Complete in the task panel.

Task UFT-04-02 — Define learning paths and modules · done by Instructional Designer

Input: Curriculum map → **Output:** Learning paths

Step MP-05.2 — Define learning path and modules (Instructional Designer)

Type:

Row 1 — Learning path and modules: AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Omar Berrada · **Source:** Questionnaire results

Row 2 — Learning path and modules: AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hajar Amrani · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Learning path and modules register".

Result to record in the task: Path 'Supervisors — AI triage and clinical decision support': 4 modules, 3 days blended (1 day e-learning, 2 days workshop).

When every step is complete, click Complete in the task panel.

Task UFT-04-03 — Write learning objectives · done by Instructional Designer

Input: Learning paths → **Output:** Learning objectives

Step MP-05.3 — Write learning objectives per module (Instructional Designer)

Type:

Row 1 — Learning objectives per module: Raise AI triage and clinical decision support proficiency of Operator — Clinical Care & Nursing teams to level 3 · **Indicator:** KPI-009 (Plan realization rate) · **Baseline:** 44 % · **Target:** 87 % · **Deadline:** 2027-02-23 · **Owner:** Hajar Amrani

Row 2 — Learning objectives per module: Certify Supervisor — Clinical Care & Nursing staff on AI medical imaging assistance · **Indicator:** KPI-010 (Learner completion rate) · **Baseline:** 42 % · **Target:** 78 % · **Deadline:** 2027-03-02 · **Owner:** Omar Alaoui

Row 3 — Learning objectives per module: Cut onboarding time on AI bed and staff capacity planning by 30 % · **Indicator:** KPI-011 (API Availability) · **Baseline:** 49 % · **Target:** 78 % · **Deadline:** 2027-03-09 · **Owner:** Meryem Sefrioui

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Objective M1: 'By the end, the supervisor reads the AI triage and clinical decision support dashboard and decides the shift action in 5 minutes.'

When every step is complete, click Complete in the task panel.

Task UFT-04-04 — Propose module structure · done by Instructional Designer

Input: Learning objectives → **Output:** Module structure

Step MP-05.4 — Propose module structure (Instructional Designer)

Type:

Row 1 — Module structure: Module structure — AI triage and clinical decision support · **Owner:** Omar Alaoui · **Start:** 2027-06-25 · **End:** 2027-07-25 · **Budget:** 42000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Module structure: Module structure — AI medical imaging assistance · **Owner:** Meryem Sefrioui · **Start:** 2027-07-02 · **End:** 2027-08-01 · **Budget:** 56000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Accept the proposed structure (intro, demo, practice, quiz); replace the quiz by a live case from Clinical Care & Nursing.

When every step is complete, click Complete in the task panel.

Task UFT-04-05 — Set assessment strategy · done by Instructional Designer

Input: Module structure → **Output:** Assessment strategy

Step MP-05.5 — Set assessment strategy (Instructional Designer)

Type:

Row 1 — Assessment strategy: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Assessment strategy: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Assessment: pre/post test (Level 2) and manager observation after 30 days (Level 3).

When every step is complete, click Complete in the task panel.

Task UFT-04-06 — Develop and tag content · done by Content Developer

Input: Assessment strategy → **Output:** Tagged content assets

Step MP-06.1 — Upload content assets (Content Developer)

Type:

Row 1 — Content assets: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Content assets: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Step MP-06.2 — Validate package format (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-06.5 — Tag content with competencies (Content Developer)

Type:

Row 1 — Content with competencies: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Mehdi Hajji · **Source:** Interview with the function head

Row 2 — Content with competencies: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hind Ouazzani · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Content with competencies register".

Result to record in the task: Upload 'M1_AI triage and clinical decision support.pptx' and 'M1_video.mp4'; tag competency 'AI triage and clinical decision support' level 3.

When every step is complete, click Complete in the task panel.

Task UFT-04-07 — Localize and check accessibility · done by Instructional Designer

Input: Tagged content assets → **Output:** Localized accessible content

Step MP-23.1 — Request translation (Instructional Designer)

Type:

Row 1 — Translation: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-06-26

Row 2 — Translation: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-07-03

Then click Complete the step. The rows go to the register "Communications log".

Step MP-23.2 — Draft machine translation (Instructional Designer)

Type:

Row 1 — Machine translation: Machine translation — AI triage and clinical decision support · **Owner:** Hind Ouazzani · **Start:** 2027-07-01 · **End:** 2027-07-31 · **Budget:** 35000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Machine translation: Machine translation — AI medical imaging assistance · **Owner:** Tarik Amrani · **Start:** 2027-07-08 · **End:** 2027-08-07 · **Budget:** 62000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-23.3 — Validate translation (Subject Matter Expert)

Type:

Decision: Approved

Translation: Translation

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-07-08

Decided by: Meryem Sefrioui

Then click Complete the step.

Step MP-23.4 — Run accessibility check (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-23.5 — Fix accessibility issues (Content Developer)

Type:

Accessibility issues: Accessibility issues

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-07-09

Then click Complete the step.

Result to record in the task: Request FR and AR versions; validate the AI draft translation; accessibility check: 0 blocking issues.

When every step is complete, click Complete in the task panel.

Task UFT-04-08 — Approve design document · done by Head of L&D

Input: Localized accessible content → **Output:** Approved design document

Step MP-05.6 — Review design with subject matter expert (Subject Matter Expert)

Type:

Design with subject matter expert: Design with subject matter expert

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-07-18

Then click Complete the step.

Step MP-05.7 — Approve design document (Head of L&D)

Type:

Decision: Approved

Design document: Design document

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-07-17

Decided by: Meryem Sefrioui

Then click Complete the step.

Result to record in the task: Decision: design approved. Comment: SME review done on 12 May; ready for delivery.

When every step is complete, click Complete in the task panel.

E2E-05 — Design-to-Delivery

Goal: Deliver training across all modalities

Starts when: Approved design document and prioritized training plan. **Ends with:** Training delivered across all modalities with attendance and completion recorded.

Task UFT-05-01 — Publish content to catalog · done by Content Developer

Input: Approved design → **Output:** Published catalog

Step MP-06.3 — Route content for expert review (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-06.4 — Record review decision (Subject Matter Expert)

Type:

Row 1 — Review decision: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Omar Alaoui · **Source:** Audit report

Row 2 — Review decision: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Meryem Sefrioui · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Review decision register".

Step MP-06.6 — Publish content to catalog (Content Developer)

Type:

Row 1 — Content to catalog: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-09-03

Row 2 — Content to catalog: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-09-10

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish module 'M1 AI triage and clinical decision support' to the catalog; audience: supervisors; languages EN/FR/AR.

When every step is complete, click Complete in the task panel.

Task UFT-05-02 — Book logistics · done by Training Administrator

Input: Published catalog → **Output:** Logistics plan

Step MP-11.1 — Book rooms and equipment (Training Administrator)

Type:

Row 1 — Rooms and equipment: Rooms and equipment — AI triage and clinical decision support · **Owner:** Meryem Sefrioui · **Start:** 2026-09-10 · **End:** 2026-10-10 · **Budget:** 33000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Rooms and equipment: Rooms and equipment — AI medical imaging assistance · **Owner:** Mehdi Hajji · **Start:** 2026-09-17 · **End:** 2026-10-17 · **Budget:** 34000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-11.2 — Manage trainer calendars (Training Administrator)

Type:

Row 1 — Trainer calendars: AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Meryem Sefrioui · **Source:** HRIS export

Row 2 — Trainer calendars: AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Mehdi Hajji · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Trainer calendars register".

Result to record in the task: Room 'Training A' (20 seats) 3-5 June; projector; trainer calendar blocked.

When every step is complete, click Complete in the task panel.

Task UFT-05-03 — Schedule sessions · done by Training Administrator

Input: Logistics plan → **Output:** Session schedule

Step MP-07.1 — Create training session (Training Administrator)

Type:

Row 1 — Training session: AI triage and clinical decision support · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Mehdi Hajji · **Source:** Interview with the function head

Row 2 — Training session: AI medical imaging assistance · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Hind Ouazzani · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Training session register".

Step MP-07.2 — Check scheduling conflicts (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Session S-01 'AI triage and clinical decision support — supervisors', 3-5 June, 12 seats, no conflict reported.

When every step is complete, click Complete in the task panel.

Task UFT-05-04 — Enroll learners and send convocations · done by Training Administrator

Input: Session schedule → **Output:** Enrollments

Step MP-07.3 — Enroll learners into session (Training Administrator)

Type:

Row 1 — Learners into session: AI triage and clinical decision support — half-day workshop · **Date:** 2026-09-24 · **Trainer:** Atlas Formation Conseil · **Participants:** 11 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Learners into session: AI medical imaging assistance — half-day workshop · **Date:** 2026-10-01 · **Trainer:** Maghreb Learning Partners · **Participants:** 14 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-07.4 — Send convocations (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-17.1 — Provision users via SSO (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Enroll 12 supervisors; convocations sent by e-mail and SMS in each learner's language.

When every step is complete, click Complete in the task panel.

Task UFT-05-05 — Push microlearning capsules · done by Instructional Designer

Input: Enrollments → **Output:** Capsules in flow of work

Step MP-25.1 — Author microlearning capsule (Instructional Designer)

Type:

Row 1 — Microlearning capsule: Microlearning capsule — AI triage and clinical decision support · **Owner:** Tarik Amrani · **Start:** 2026-09-16 · **End:** 2026-10-16 · **Budget:** 31000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Microlearning capsule: Microlearning capsule — AI medical imaging assistance · **Owner:** Amine Hajji · **Start:** 2026-09-23 · **End:** 2026-10-23 · **Budget:** 46000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-25.2 — Generate capsule draft from source (Instructional Designer)

Type:

Row 1 — Capsule draft from source: Capsule draft from source — AI triage and clinical decision support · **Owner:** Tarik Amrani · **Start:** 2026-09-16 · **End:** 2026-10-16 · **Budget:** 28000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Capsule draft from source: Capsule draft from source — AI medical imaging assistance · **Owner:** Amine Hajji · **Start:** 2026-09-23 · **End:** 2026-10-23 · **Budget:** 60000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-25.3 — Push capsule to collaboration channel (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-25.4 — Consume capsule on mobile (Learner)

Type:

Row 1 — Capsule on mobile: AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Tarik Amrani · **Source:** Annual performance review

Row 2 — Capsule on mobile: AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Amine Hajji · **Source:** Audit report

Then click Complete the step. The rows go to the register "Capsule on mobile register".

Step MP-25.5 — Track capsule completion (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Capsule '5-minute AI medical imaging assistance check' pushed to the Teams channel of Clinical Care & Nursing; 48 views in week 1.

When every step is complete, click Complete in the task panel.

Task UFT-05-06 — Run immersive simulations · done by Trainer

Input: Enrollments → **Output:** Simulation results

Step MP-30.1 — Define simulation scenario (Instructional Designer)

Type:

Row 1 — Simulation scenario: AI triage and clinical decision support · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Amine Hajji · **Source:** Audit report

Row 2 — Simulation scenario: AI medical imaging assistance · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Zineb Squalli · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Simulation scenario register".

Step MP-30.2 — Configure simulation scoring (Instructional Designer)

Type:

Row 1 — Simulation scoring: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Simulation scoring: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Step MP-30.3 — Launch simulation session (Trainer)

Type:

Row 1 — Simulation session: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-09-13

Row 2 — Simulation session: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-09-20

Then click Complete the step. The rows go to the register "Communications log".

Step MP-30.4 — Capture simulation performance (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-30.5 — Debrief learner (Trainer)

Type:

Row 1 — Learner: AI triage and clinical decision support — half-day workshop · **Date:** 2026-09-28 · **Trainer:** Atlas Formation Conseil · **Participants:** 17 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Learner: AI medical imaging assistance — half-day workshop · **Date:** 2026-10-05 · **Trainer:** Maghreb Learning Partners · **Participants:** 13 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-30.6 — Record simulation evidence (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Simulation 'Clinical Care & Nursing incident': score 78/100; debrief notes recorded; evidence saved.

When every step is complete, click Complete in the task panel.

Task UFT-05-07 — Record attendance · done by Trainer

Input: Session schedule → **Output:** Attendance records

Step MP-07.5 — Record attendance (Trainer)

Type:

Row 1 — Attendance: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Zineb Squalli · **Source:** HRIS export

Row 2 — Attendance: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hind Mansouri · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Attendance register".

Result to record in the task: Attendance S-01: 11 present, 1 absent (justified). Signature sheet attached.

When every step is complete, click Complete in the task panel.

Task UFT-05-08 — Close sessions · done by Training Administrator

Input: Attendance records → **Output:** Completion records

Step MP-07.6 — Close session and record completion (Training Administrator)

Type:

Decision: Approved

Session and record completion: Session and record completion

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-07-19

Decided by: Meryem Sefrioui

Then click Complete the step.

Result to record in the task: Close S-01: 11 completions recorded; certificate issued to each participant.

When every step is complete, click Complete in the task panel.

Task UFT-05-09 — Reconcile and archive period · done by Training Administrator

Input: Completion records → **Output:** Closed delivery period

Step MP-11.5 — Reconcile attendance with invoices (Training Administrator)

Type:

Attendance with invoices: Attendance with invoices

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-07-29

Then click Complete the step.

Step MP-11.6 — Archive period records (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-11.3 — Import external training records (Training Administrator)

Type:

Row 1 — External training records: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — External training records: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Step MP-11.4 — Correct training record with justification (Training Administrator)

Type:

Training record with justification: Training record with justification

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-07-29

Then click Complete the step.

Result to record in the task: Reconcile invoice INV-2026-118 (3 days × 12 learners) with attendance; archive period Q2.

When every step is complete, click Complete in the task panel.

E2E-06 — Learner-Journey-to-Engagement

Goal: Deliver personalized, engaging learning experience

Starts when: Learner enrolled in a learning path or session. **Ends with:** Personalized learning journey completed with engagement measured.

Task UFT-06-01 — Generate personal learning plan · done by L&D Analyst

Input: Enrollments → **Output:** Personal learning plans

Step MP-08.1 — Generate personal learning plan (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Personal plan generated for each learner: 3 items on AI triage and clinical decision support, 1 capsule on AI medical imaging assistance.

When every step is complete, click Complete in the task panel.

Task UFT-06-02 — Recommend learning items · done by Learner

Input: Personal learning plans → **Output:** Recommendations

Step MP-08.2 — Recommend learning items (Learner)

Type:

Row 1 — Learning items: AI triage and clinical decision support · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Meryem Mansouri · **Source:** Questionnaire results

Row 2 — Learning items: AI medical imaging assistance · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Reda Rami · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Learning items register".

Step MP-24.1 — Enable personalization per scope (Platform Administrator)

Type:

Row 1 — Personalization per scope: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Personalization per scope: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Accept 2 recommendations, reject 1 ('already mastered'). The outcome is logged.

When every step is complete, click Complete in the task panel.

Task UFT-06-03 — Adapt path to performance · done by Instructional Designer

Input: Recommendations → **Output:** Adapted paths

Step MP-24.2 — Set adaptation rules (Instructional Designer)

Type:

Row 1 — Adaptation rules: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Adaptation rules: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Step MP-24.3 — Adapt path to learner performance (Learner)

Type:

Row 1 — Path to learner performance: Path to learner performance — AI triage and clinical decision support · **Owner:** Reda Rami · **Start:** 2026-09-26 · **End:** 2026-10-26 · **Budget:** 39000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Path to learner performance: Path to learner performance — AI medical imaging assistance · **Owner:** Hicham Naciri · **Start:** 2026-10-03 · **End:** 2026-11-02 · **Budget:** 43000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-24.4 — Record learner response to adaptation (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Rule: if the quiz score < 60%, add the remedial capsule 'AI triage and clinical decision support basics'.

When every step is complete, click Complete in the task panel.

Task UFT-06-04 — Animate social learning · done by Knowledge Manager

Input: Adapted paths → **Output:** Active cohorts

Step MP-26.1 — Create learning cohort group (Knowledge Manager)

Type:

Row 1 — Learning cohort group: AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hicham Naciri · **Source:** Audit report

Row 2 — Learning cohort group: AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Zineb Squalli · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Learning cohort group register".

Step MP-26.2 — Invite group members (Knowledge Manager)

Type:

Row 1 — Group members: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-09-23

Row 2 — Group members: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-09-30

Then click Complete the step. The rows go to the register "Communications log".

Step MP-26.3 — Post question or answer (Learner)

Type:

Row 1 — Question or answer: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-09-23

Row 2 — Question or answer: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-09-30

Then click Complete the step. The rows go to the register "Communications log".

Step MP-26.4 — Endorse expert answer (Subject Matter Expert)

Type:

Decision: Approved with conditions

Expert answer: Expert answer

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2026-10-19

Decided by: Meryem Sefrioui

Then click Complete the step.

Step MP-26.5 — Flag inappropriate content (Learner)

Type:

Row 1 — Inappropriate content: AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hicham Naciri · **Source:** Audit report

Row 2 — Inappropriate content: AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Zineb Squalli · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Inappropriate content register".

Step MP-26.6 — Resolve moderation flag (Knowledge Manager)

Type:

Moderation flag: Moderation flag

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-10-20

Then click Complete the step.

Result to record in the task: Create cohort 'AI triage and clinical decision support supervisors 2026' and invite 12 members; first question posted.

When every step is complete, click Complete in the task panel.

Task UFT-06-05 — Run gamification · done by Instructional Designer

Input: Active cohorts → **Output:** Awards

Step MP-27.1 — Define points and badge rules (Instructional Designer)

Type:

Row 1 — Points and badge rules: AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Ghita Amrani · **Source:** Questionnaire results

Row 2 — Points and badge rules: AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hamza Amrani · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Points and badge rules register".

Step MP-27.2 — Configure leaderboard scope (Instructional Designer)

Type:

Row 1 — Leaderboard scope: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Leaderboard scope: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Step MP-27.3 — Award points on completion (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-27.4 — Unlock badge (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-27.6 — Adjust gamification rules (Instructional Designer)

Type:

Gamification rules: Gamification rules

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-08-08

Then click Complete the step.

Result to record in the task: Badge 'AI triage and clinical decision support Practitioner' for completing 3 modules; 10 points per capsule.

When every step is complete, click Complete in the task panel.

Task UFT-06-06 — Match and run coaching · done by L&D Business Partner

Input: Learner requests → **Output:** Coaching sessions

Step MP-21.1 — Request coaching (Learner)

Type:

Row 1 — Coaching: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-07-28

Row 2 — Coaching: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-08-04

Then click Complete the step. The rows go to the register "Communications log".

Step MP-21.2 — Match coach to learner (L&D Business Partner)

Type:

Row 1 — Coach to learner: AI triage and clinical decision support · **Criterion:** Cost · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Coach to learner: AI medical imaging assistance · **Criterion:** Risk · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-21.3 — Schedule coaching sessions (Coach)

Type:

Row 1 — Coaching sessions: Coaching sessions — AI triage and clinical decision support · **Owner:** Hamza Amrani · **Start:** 2027-08-02 · **End:** 2027-09-01 · **Budget:** 76000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Coaching sessions: Coaching sessions — AI medical imaging assistance · **Owner:** Leila Sefrioui · **Start:** 2027-08-09 · **End:** 2027-09-08 · **Budget:** 22000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-21.4 — Log coaching session notes (Coach)

Type:

Row 1 — Coaching session notes: AI triage and clinical decision support · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hamza Amrani · **Source:** Annual performance review

Row 2 — Coaching session notes: AI medical imaging assistance · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Leila Sefrioui · **Source:** Audit report

Then click Complete the step. The rows go to the register "Coaching session notes register".

Step MP-21.5 — Evaluate coaching outcomes (Manager)

Type:

Row 1 — Coaching outcomes: AI triage and clinical decision support · **Criterion:** Cost · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Coaching outcomes: AI medical imaging assistance · **Criterion:** Risk · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-21.6 — Close coaching engagement (Coach)

Type:

Decision: Approved

Coaching engagement: Coaching engagement

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-08-16

Decided by: Meryem Sefrioui

Then click Complete the step.

Result to record in the task: Match coach 'Senior Clinical Care & Nursing supervisor' to 3 learners; 4 sessions of 1 hour.

When every step is complete, click Complete in the task panel.

Task UFT-06-07 — Collect learner feedback · done by Learner

Input: Coaching sessions → **Output:** Learner feedback

Step MP-08.3 — Enroll in recommended item (Learner)

Type:

Row 1 — In recommended item: AI triage and clinical decision support — half-day workshop · **Date:** 2027-08-14 · **Trainer:** Atlas Formation Conseil · **Participants:** 19 · **Hours:** 3.5 · **Modality:** On site

Row 2 — In recommended item: AI medical imaging assistance — half-day workshop · **Date:** 2027-08-21 · **Trainer:** Maghreb Learning Partners · **Participants:** 10 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-08.4 — Submit learning feedback (Learner)

Type:

Row 1 — Learning feedback: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-07-30

Row 2 — Learning feedback: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-08-06

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Feedback: 4.4/5; comment 'more real cases from Clinical Care & Nursing'.

When every step is complete, click Complete in the task panel.

Task UFT-06-08 — Monitor engagement and nudge · done by L&D Analyst

Input: Learner feedback → **Output:** Engagement report

Step MP-08.5 — Monitor engagement indicators (L&D Analyst)

Type:

Row 1 — Engagement indicators: KPI-016 (Knowledge reuse rate) · **Period:** 2026-Q1 · **Value:** 90 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — Engagement indicators: KPI-017 (IDP coverage) · **Period:** 2026-Q2 · **Value:** 65 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-08.6 — Trigger re-engagement nudge (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-24.5 — Review recommendation acceptance (L&D Analyst)

Type:

Recommendation acceptance: Recommendation acceptance

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-07-31

Then click Complete the step.

Step MP-27.5 — Review engagement uplift (L&D Analyst)

Type:

Engagement uplift: Engagement uplift

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-07-31

Then click Complete the step.

Step MP-24.6 — Tune personalization settings (L&D Analyst)

Type:

Row 1 — Personalization settings: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Personalization settings: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Step MP-28.4 — Predict learner drop-out risk (Performance Analyst)

Type:

Row 1 — Learner drop-out risk: KPI-016 (Knowledge reuse rate) · **Period:** 2026-Q1 · **Value:** 64 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Learner drop-out risk: KPI-017 (IDP coverage) · **Period:** 2026-Q2 · **Value:** 71 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-28.5 — Review predictions with L&D (Head of L&D)

Type:

Predictions with L&D: Predictions with L&D

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-07-31

Then click Complete the step.

Step MP-28.6 — Create preventive action (L&D Analyst)

Type:

Row 1 — Preventive action: AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Kawtar Bennani · **Source:** HRIS export

Row 2 — Preventive action: AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Loubna Fassi · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Preventive action register".

Result to record in the task: Engagement 81%; nudge sent to 9 inactive learners; drop-out risk high for 2 learners.

When every step is complete, click Complete in the task panel.

E2E-13 — Content-Curate-to-Retire

Goal: Publish, maintain, retire content

Starts when: New content published or content past its review date. **Ends with:** Catalog curated, maintained and outdated content retired.

Task UFT-13-01 — Aggregate provider catalogs · done by Content Curator

Input: Provider catalogs → **Output:** Aggregated catalog

Step MP-29.1 — Aggregate provider catalogs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Aggregate 2 provider catalogs (LinkedIn Learning, Coursera): 1,240 items imported.

When every step is complete, click Complete in the task panel.

Task UFT-13-02 — Recommend curated items · done by Content Curator

Input: Aggregated catalog → **Output:** Ranked items

Step MP-29.2 — Recommend curated items (Content Curator)

Type:

Row 1 — Curated items: AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Imane Berrada · **Source:** Questionnaire results

Row 2 — Curated items: AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hind Hajji · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Curated items register".

Result to record in the task: Keep the 15 top-ranked items on AI triage and clinical decision support; reject 3 items older than 3 years.

When every step is complete, click Complete in the task panel.

Task UFT-13-03 — Approve and organize collections · done by Content Curator

Input: Ranked items → **Output:** Curated collections

Step MP-29.3 — Approve curated item (Content Curator)

Type:

Decision: Approved

Curated item: Curated item

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2026-10-20

Decided by: Meryem Sefrioui

Then click Complete the step.

Step MP-29.4 — Organize curated collection (Content Curator)

Type:

Row 1 — Curated collection: Curated collection — AI triage and clinical decision support · **Owner:** Hind Hajji · **Start:** 2026-10-06 · **End:** 2026-11-05 · **Budget:** 24000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Collection 'AI triage and clinical decision support starter kit': 8 items, audience supervisors, review date in 12 months.

When every step is complete, click Complete in the task panel.

Task UFT-13-04 — Review peer content · done by Subject Matter Expert

Input: User submissions → **Output:** Approved peer content

Step MP-33.1 — Submit user-generated content (Employee)

Type:

Row 1 — User-generated content: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-08-09

Row 2 — User-generated content: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-08-16

Then click Complete the step. The rows go to the register "Communications log".

Step MP-33.2 — Check content against policy (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-33.3 — Peer review content (Subject Matter Expert)

Type:

Row 1 — Review content: AI triage and clinical decision support — half-day workshop · **Date:** 2027-08-24 · **Trainer:** Atlas Formation Conseil · **Participants:** 18 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Review content: AI medical imaging assistance — half-day workshop · **Date:** 2027-08-31 · **Trainer:** Maghreb Learning Partners · **Participants:** 17 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Peer video 'How we use AI medical imaging assistance on shift' reviewed by an expert: approved with 1 correction.

When every step is complete, click Complete in the task panel.

Task UFT-13-05 — Promote and rate content · done by Knowledge Manager

Input: Approved peer content → **Output:** Rated content

Step MP-33.5 — Send approved content to curation (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-33.6 — Rate user-generated item (Learner)

Type:

Row 1 — User-generated item: AI triage and clinical decision support · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — User-generated item: AI medical imaging assistance · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Send approved peer content to curation; average learner rating 4.5/5.

When every step is complete, click Complete in the task panel.

Task UFT-13-06 — Flag content past review date · done by Content Curator

Input: Rated content → **Output:** Review queue

Step MP-29.5 — Flag content past review date (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: 14 items past review date flagged; owners notified.

When every step is complete, click Complete in the task panel.

Task UFT-13-07 — Retire outdated content · done by Content Curator

Input: Review queue → **Output:** Content library health report

Step MP-29.6 — Retire outdated content (Content Curator)

Type:

Row 1 — Outdated content: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Outdated content: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Step MP-25.6 — Retire low-value capsule (Content Curator)

Type:

Row 1 — Low-value capsule: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Low-value capsule: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Retire 6 outdated items and 2 low-value capsules; library health 92%.

When every step is complete, click Complete in the task panel.

E2E-14 — Extended-Enterprise-Training

Goal: Certify partners and train customers

Starts when: Partner, reseller or customer training program launched. **Ends with:** External learners trained, paid and certified.

Task UFT-14-01 — Create external sub-portal · done by Extended Enterprise Manager

Input: Program brief → **Output:** External portal

Step MP-22.1 — Create external sub-portal (Extended Enterprise Manager)

Type:

Row 1 — External sub-portal: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Youssef Sefrioui · **Source:** Audit report

Row 2 — External sub-portal: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hicham Naciri · **Source:** HRIS export

Then click Complete the step. The rows go to the register "External sub-portal register".

Result to record in the task: Sub-portal 'Partners Academy — Maghreb Hospitals Group' created for distributors and installers.

When every step is complete, click Complete in the task panel.

Task UFT-14-02 — Configure catalog and pricing · done by Extended Enterprise Manager

Input: External portal → **Output:** Priced catalog

Step MP-22.2 — Configure external catalog and pricing (Extended Enterprise Manager)

Type:

Row 1 — External catalog and pricing: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — External catalog and pricing: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Step MP-18.1 — Allocate budget by theme and site (Finance Manager)

Type:

Row 1 — Budget by theme and site: Budget by theme and site — AI triage and clinical decision support · **Owner:** Hicham Naciri · **Start:** 2026-10-10 · **End:** 2026-11-09 · **Budget:** 45000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Budget by theme and site: Budget by theme and site — AI medical imaging assistance · **Owner:** Kawtar Kettani · **Start:** 2026-10-17 · **End:** 2026-11-16 · **Budget:** 42000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Catalog: 'ISO 7101 for partners' 1,200 MAD; 'AI triage and clinical decision support certification' 2,400 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-14-03 — Process payment and enroll · done by Extended Enterprise Manager

Input: Priced catalog → **Output:** External enrollments

Step MP-22.3 — Process online payment (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-22.4 — Enroll external learner (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: 18 online payments processed; 18 external learners enrolled.

When every step is complete, click Complete in the task panel.

Task UFT-14-04 — Deliver external sessions · done by Training Administrator

Input: External enrollments → **Output:** Attendance

Step MP-07.1 — Create training session (Training Administrator)

Type:

Row 1 — Training session: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hind Ouazzani · **Source:** Interview with the function head

Row 2 — Training session: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Tarik Amrani · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Training session register".

Step MP-07.5 — Record attendance (Trainer)

Type:

Row 1 — Attendance: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hind Ouazzani · **Source:** Interview with the function head

Row 2 — Attendance: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Tarik Amrani · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Attendance register".

Result to record in the task: Session P-01 (virtual), 18 invited, 16 present.

When every step is complete, click Complete in the task panel.

Task UFT-14-05 — Track external completion · done by Extended Enterprise Manager

Input: Attendance → **Output:** Completion status

Step MP-22.5 — Track external completion (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Completion: 15 of 16 passed the final quiz.

When every step is complete, click Complete in the task panel.

Task UFT-14-06 — Issue partner certification · done by Extended Enterprise Manager

Input: Completion status → **Output:** Partner certificates

Step MP-22.6 — Issue partner certification (Extended Enterprise Manager)

Type:

Row 1 — Partner certification: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-08-27

Row 2 — Partner certification: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-09-03

Then click Complete the step. The rows go to the register "Communications log".

Step MP-14.4 — Issue certificate on completion (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Issue 15 partner certificates valid 2 years.

When every step is complete, click Complete in the task panel.

Task UFT-14-07 — Reconcile external revenue · done by Finance Manager

Input: Partner certificates → **Output:** Revenue reconciliation

Step MP-18.3 — Record committed and actual costs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-18.4 — Compare spend against budget (Finance Manager)

Type:

Row 1 — Spend against budget: AI triage and clinical decision support · **Criterion:** Risk · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Spend against budget: AI medical imaging assistance · **Criterion:** Business impact · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Revenue 43,200 MAD reconciled with the ERP; 0 unpaid.

When every step is complete, click Complete in the task panel.

Gate G4 — G4 — Delivery readiness: close the phase

1. Open the project workspace and click the gate button of the phase.
1. Tick each checklist item once its evidence is attached, then click Submit for decision.
1. Click Go. Type the justification: All mandatory items met; evidence attached.
1. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

Phase 5 — Evaluation, compliance & impact

E2E-07 — Assessment-to-Evaluation

Goal: Measure training effectiveness and skill progression

Starts when: Training session or path completed. **Ends with:** Effectiveness measured on Kirkpatrick levels 1-3 and skill progression computed.

Task UFT-07-01 — Create assessment instrument · done by Instructional Designer

Input: Assessment strategy → **Output:** Assessment instrument

Step MP-09.1 — Create assessment instrument (Instructional Designer)

Type:

Row 1 — Assessment instrument: AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hind Mansouri · **Source:** HRIS export

Row 2 — Assessment instrument: AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Meryem Mansouri · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Assessment instrument register".

Result to record in the task: Instrument 'Test AI triage and clinical decision support M1': 15 questions, pass mark 70%.

When every step is complete, click Complete in the task panel.

Task UFT-07-02 — Draft question bank · done by Instructional Designer

Input: Assessment instrument → **Output:** Question bank

Step MP-09.2 — Generate question bank draft (Instructional Designer)

Type:

Row 1 — Question bank draft: Question bank draft — AI triage and clinical decision support · **Owner:** Meryem Mansouri · **Start:** 2027-09-07 · **End:** 2027-10-07 · **Budget:** 52000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Question bank draft: Question bank draft — AI medical imaging assistance · **Owner:** Reda Rami · **Start:** 2027-09-14 · **End:** 2027-10-14 · **Budget:** 58000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Keep 12 AI-drafted questions, rewrite 3 with Clinical Care & Nursing vocabulary; validate each one.

When every step is complete, click Complete in the task panel.

Task UFT-07-03 — Collect reaction survey (Level 1) · done by L&D Analyst

Input: Completion records → **Output:** Level 1 results

Step MP-09.3 — Collect reaction survey (Level 1) (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Reaction survey S-01: 11 responses, satisfaction 4.3/5.

When every step is complete, click Complete in the task panel.

Task UFT-07-04 — Record learning results (Level 2) · done by Trainer

Input: Level 1 results → **Output:** Level 2 results

Step MP-09.4 — Record learning results (Level 2) (Trainer)

Type:

Row 1 — Learning results (Level 2): AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hicham Naciri · **Source:** Annual performance review

Row 2 — Learning results (Level 2): AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Zineb Squalli · **Source:** Audit report

Then click Complete the step. The rows go to the register "Learning results (Level 2) register".

Result to record in the task: Level 2: average pre-test 48%, post-test 81% (+33 points).

When every step is complete, click Complete in the task panel.

Task UFT-07-05 — Record on-the-job observation (Level 3) · done by Manager

Input: Level 2 results → **Output:** Level 3 results

Step MP-09.5 — Record on-the-job observation (Level 3) (Manager)

Type:

Row 1 — On-the-job observation (Level 3): AI triage and clinical decision support · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Zineb Squalli · **Source:** Audit report

Row 2 — On-the-job observation (Level 3): AI medical imaging assistance · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Omar Bouzidi · **Source:** HRIS export

Then click Complete the step. The rows go to the register "On-the-job observation (Level 3) register".

Result to record in the task: Level 3 (day 30): 9 of 11 supervisors apply the AI triage and clinical decision support routine daily.

When every step is complete, click Complete in the task panel.

Task UFT-07-06 — Compute skill progression · done by L&D Analyst

Input: Level 3 results → **Output:** Skill progression

Step MP-09.6 — Compute skill progression (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-10.3 — Refresh KPI computation (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Skill progression: AI triage and clinical decision support from 1.8 to 2.7 (target 3).

When every step is complete, click Complete in the task panel.

Task UFT-07-07 — Review evaluation results · done by L&D Analyst

Input: Skill progression → **Output:** Evaluation review

Step MP-09.7 — Review evaluation results (L&D Analyst)

Type:

Evaluation results: Evaluation results

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-09-18

Then click Complete the step.

Step MP-20.5 — Run periodic quality review (Quality Manager)

Type:

Row 1 — Periodic quality review: AI triage and clinical decision support — half-day workshop · **Date:** 2027-09-27 · **Trainer:** Atlas Formation Conseil · **Participants:** 16 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Periodic quality review: AI medical imaging assistance — half-day workshop · **Date:** 2027-10-04 · **Trainer:** Maghreb Learning Partners · **Participants:** 17 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Review: module M3 below 70% pass rate → improvement action assigned to the designer.

When every step is complete, click Complete in the task panel.

Task UFT-07-08 — Publish evaluation report · done by L&D Analyst

Input: Evaluation review → **Output:** Kirkpatrick evaluation report

Step MP-10.4 — Export report (L&D Analyst)

Type:

Row 1 — Report: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Report: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Step MP-10.6 — Share insight with stakeholders (L&D Analyst)

Type:

Row 1 — Insight with stakeholders: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-09-14

Row 2 — Insight with stakeholders: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-09-21

Then click Complete the step. The rows go to the register "Communications log".

Step MP-10.2 — Configure dashboard widgets (L&D Analyst)

Type:

Row 1 — Dashboard widgets: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Dashboard widgets: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Export RPT-016 Kirkpatrick report (PDF) and share with the Steering Committee.

When every step is complete, click Complete in the task panel.

E2E-08 — Learning-to-ROI

Goal: Validate ROI and business impact

Starts when: Evaluation results available for a theme selected for an ROI study. **Ends with:** Phillips ROI validated with finance and business impact report published.

Task UFT-08-01 — Select theme for ROI study · done by Performance Analyst

Input: Evaluation review → **Output:** ROI scope

Step MP-32.1 — Select theme for ROI study (Performance Analyst)

Type:

Decision: Approved

Theme for ROI study: Theme for ROI study

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-10-05

Decided by: Meryem Sefrioui

Then click Complete the step.

Result to record in the task: ROI study on theme 'AI triage and clinical decision support' — population: 36 supervisors, 3 sites.

When every step is complete, click Complete in the task panel.

Task UFT-08-02 — Define business indicators · done by Performance Analyst

Input: ROI scope → **Output:** Indicator set

Step MP-32.2 — Define business indicators (Performance Analyst)

Type:

Row 1 — Business indicators: Raise AI triage and clinical decision support proficiency of Operator — Clinical Care & Nursing teams to level 3 · **Indicator:** KPI-020 (Integration synchronisation success rate) · **Baseline:** 42 % · **Target:** 88 % · **Deadline:** 2028-03-11 · **Owner:** Hicham Naciri

Row 2 — Business indicators: Certify Supervisor — Clinical Care & Nursing staff on AI medical imaging assistance · **Indicator:** KPI-001 (Strategic objective coverage) · **Baseline:** 42 % · **Target:** 86 % · **Deadline:** 2028-03-18 · **Owner:** Kawtar Kettani

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-10.1 — Define KPI set per audience (L&D Analyst)

Type:

Row 1 — KPI set per audience: Raise AI triage and clinical decision support proficiency of Operator — Clinical Care & Nursing teams to level 3 · **Indicator:** KPI-020 (Integration synchronisation success rate) · **Baseline:** 50 % · **Target:** 71 % · **Deadline:** 2028-03-11 · **Owner:** Hicham Naciri

Row 2 — KPI set per audience: Certify Supervisor — Clinical Care & Nursing staff on AI medical imaging assistance · **Indicator:** KPI-001 (Strategic objective coverage) · **Baseline:** 47 % · **Target:** 76 % · **Deadline:** 2028-03-18 · **Owner:** Kawtar Kettani

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Indicators: rework rate, downtime minutes per shift, data re-entry hours.

When every step is complete, click Complete in the task panel.

Task UFT-08-03 — Collect cost data · done by Finance Manager

Input: Indicator set → **Output:** Cost data

Step MP-18.3 — Record committed and actual costs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-18.4 — Compare spend against budget (Finance Manager)

Type:

Row 1 — Spend against budget: AI triage and clinical decision support · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Spend against budget: AI medical imaging assistance · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Costs: design 60,000 MAD; delivery 180,000 MAD; participants' time 95,000 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-08-04 — Isolate training effect · done by Performance Analyst

Input: Cost data → **Output:** Isolated benefits

Step MP-32.3 — Isolate training effect (Performance Analyst)

Type:

Row 1 — Training effect: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Ghita Amrani · **Source:** Interview with the function head

Row 2 — Training effect: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hamza Amrani · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Training effect register".

Step MP-09.6 — Compute skill progression (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Control group: site B (not trained). Isolated benefit: 410,000 MAD per year.

When every step is complete, click Complete in the task panel.

Task UFT-08-05 — Compute Phillips ROI · done by Performance Analyst

Input: Isolated benefits → **Output:** ROI figures

Step MP-32.4 — Compute Phillips ROI (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: ROI = (410,000 − 335,000) / 335,000 = 22%; benefit-cost ratio 1.22.

When every step is complete, click Complete in the task panel.

Task UFT-08-06 — Review ROI with finance · done by Finance Manager

Input: ROI figures → **Output:** Validated ROI

Step MP-32.5 — Review ROI with finance (Finance Manager)

Type:

ROI with finance: ROI with finance

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-10-16

Then click Complete the step.

Result to record in the task: Finance review: assumptions accepted; downtime valued at 180 MAD per minute.

When every step is complete, click Complete in the task panel.

Task UFT-08-07 — Publish business impact report · done by Head of L&D

Input: Validated ROI → **Output:** ROI & business impact report

Step MP-32.6 — Publish business impact report (Head of L&D)

Type:

Row 1 — Business impact report: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-09-28

Row 2 — Business impact report: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-10-05

Then click Complete the step. The rows go to the register "Communications log".

Step MP-10.4 — Export report (L&D Analyst)

Type:

Row 1 — Report: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Report: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Step MP-10.5 — Query data via AI Assistant (Head of L&D)

Type:

Row 1 — Data via AI Assistant: KPI-005 (Design approval lead time) · **Period:** 2026-Q3 · **Value:** 88 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — Data via AI Assistant: KPI-006 (License Compliance %) · **Period:** 2026-Q1 · **Value:** 67 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Publish RPT-012 ROI & Business Impact Report to executive leadership.

When every step is complete, click Complete in the task panel.

E2E-09 — Compliance-to-Certification

Goal: Ensure compliant workforce with valid certifications

Starts when: New regulatory requirement or certification nearing expiry. **Ends with:** Compliant workforce with valid certifications and an audit extract available.

Task UFT-09-01 — Register regulatory requirement · done by Compliance Officer

Input: Regulation → **Output:** Requirement record

Step MP-14.1 — Register regulatory requirement (Compliance Officer)

Type:

Row 1 — Regulatory requirement: AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Loubna Fassi · **Source:** HRIS export

Row 2 — Regulatory requirement: AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Ayoub Naciri · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Regulatory requirement register".

Result to record in the task: Requirement 'ISO 7101 awareness', every 24 months, source: ISO 7101 clause on competence.

When every step is complete, click Complete in the task panel.

Task UFT-09-02 — Assign mandatory training · done by Compliance Officer

Input: Requirement record → **Output:** Mandatory assignments

Step MP-14.2 — Assign mandatory training by position (Compliance Officer)

Type:

Row 1 — Role: L&D Planner · **Mandatory training by position:** AI triage and clinical decision support · **Person:** Ayoub Naciri · **Allocation (%):** 100 · **Start:** 2027-09-27 · **Holder type:** Holder

Row 2 — Role: Instructional Designer · **Mandatory training by position:** AI medical imaging assistance · **Person:** Hamza Ziani · **Allocation (%):** 50 · **Start:** 2027-10-04 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Result to record in the task: Assign to positions: Clinical Care & Nursing operator, Clinical Care & Nursing supervisor, quality inspector.

When every step is complete, click Complete in the task panel.

Task UFT-09-03 — Deliver mandatory sessions · done by Training Administrator

Input: Mandatory assignments → **Output:** Attendance

Step MP-07.3 — Enroll learners into session (Training Administrator)

Type:

Row 1 — Learners into session: AI triage and clinical decision support — half-day workshop · **Date:** 2027-10-19 · **Trainer:** Atlas Formation Conseil · **Participants:** 13 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Learners into session: AI medical imaging assistance — half-day workshop · **Date:** 2027-10-26 · **Trainer:** Maghreb Learning Partners · **Participants:** 10 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-07.5 — Record attendance (Trainer)

Type:

Row 1 — Attendance: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hamza Ziani · **Source:** Questionnaire results

Row 2 — Attendance: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Soukaina Berrada · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Attendance register".

Result to record in the task: Enroll 24 employees in session 'ISO 7101 awareness'; attendance recorded.

When every step is complete, click Complete in the task panel.

Task UFT-09-04 — Assess and certify · done by Trainer

Input: Attendance → **Output:** Certificates

Step MP-09.4 — Record learning results (Level 2) (Trainer)

Type:

Row 1 — Learning results (Level 2): AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Soukaina Berrada · **Source:** Annual performance review

Row 2 — Learning results (Level 2): AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Kawtar Fassi · **Source:** Audit report

Then click Complete the step. The rows go to the register "Learning results (Level 2) register".

Step MP-14.4 — Issue certificate on completion (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Result 86%; certificate 'ISO 7101 awareness' issued, valid until 2026+2.

When every step is complete, click Complete in the task panel.

Task UFT-09-05 — Compute certification validity · done by Compliance Officer

Input: Certificates → **Output:** Validity status

Step MP-14.3 — Compute certification validity (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Validity: 212 valid, 9 expire within 60 days, 3 expired.

When every step is complete, click Complete in the task panel.

Task UFT-09-06 — Manage renewals · done by Compliance Officer

Input: Validity status → **Output:** Renewed certificates

Step MP-14.5 — Launch renewal enrollment (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-14.6 — Confirm renewal completion (Compliance Officer)

Type:

Decision: Approved

Renewal completion: Renewal completion

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-10-08

Decided by: Meryem Sefrioui

Then click Complete the step.

Result to record in the task: Launch renewal for the 12 employees; confirm 10 completions, 2 rescheduled.

When every step is complete, click Complete in the task panel.

Task UFT-09-07 — Produce compliance audit extract · done by Compliance Officer

Input: Renewed certificates → **Output:** Compliance audit extract

Step MP-14.7 — Produce compliance audit extract (Compliance Officer)

Type:

Row 1 — Compliance audit extract: Compliance audit extract — AI triage and clinical decision support · **Owner:** Hajar Amrani · **Start:** 2027-10-17 · **End:** 2027-11-16 · **Budget:** 44000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Compliance audit extract: Compliance audit extract — AI medical imaging assistance · **Owner:** Omar Alaoui · **Start:** 2027-10-24 · **End:** 2027-11-23 · **Budget:** 42000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-10.4 — Export report (L&D Analyst)

Type:

Row 1 — Report: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Report: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Export compliance audit extract for ISO 7101 (XLSX) for the external auditor.

When every step is complete, click Complete in the task panel.

HCPR-E2E-01 — Healthcare Providers Compliance-to-Certification Readiness

Goal: Keep Healthcare Providers regulated roles certified against ISO 7101.

Starts when: New ISO 7101 requirement or certification expiry. **Ends with:** Sector compliance extract issued with every critical role certified.

Task UFT-HCPR-E1-01 — Register ISO 7101 obligations · done by Compliance Officer

Input: Sector obligations → **Output:** Record each obligation with its period.

Step MP-01.1 — Record corporate strategic objectives (Head of L&D)

Type:

Row 1 — Corporate strategic objectives: Raise AI triage and clinical decision support proficiency of Operator — Clinical Care & Nursing teams to level 3 · **Indicator:** KPI-013 (Skill progression rate) · **Baseline:** 49 % · **Target:** 86 % · **Deadline:** 2028-04-06 · **Owner:** Omar Alaoui

Row 2 — Corporate strategic objectives: Certify Supervisor — Clinical Care & Nursing staff on AI medical imaging assistance · **Indicator:** KPI-014 (Report on-time delivery) · **Baseline:** 49 % · **Target:** 84 % · **Deadline:** 2028-04-13 · **Owner:** Meryem Sefrioui

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-14.1 — Register regulatory requirement (Compliance Officer)

Type:

Row 1 — Regulatory requirement: AI triage and clinical decision support · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Omar Alaoui · **Source:** Questionnaire results

Row 2 — Regulatory requirement: AI medical imaging assistance · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Meryem Sefrioui · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Regulatory requirement register".

Result to record in the task: Obligation 'ISO 7101 training', every 12 months, owner Compliance Officer.

When every step is complete, click Complete in the task panel.

Task UFT-HCPR-E1-02 — Link obligations to positions · done by HR Business Partner

Input: Sector obligations → **Output:** Link each obligation to the Clinical Care & Nursing positions.

Step MP-01.2 — Link objectives to functions and sites (L&D Strategist)

Type:

Row 1 — Objectives to functions and sites: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Meryem Sefrioui · **Source:** Annual performance review

Row 2 — Objectives to functions and sites: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Mehdi Hajji · **Source:** Audit report

Then click Complete the step. The rows go to the register "Objectives to functions and sites register".

Step MP-14.2 — Assign mandatory training by position (Compliance Officer)

Type:

Row 1 — Role: L&D Analyst · **Mandatory training by position:** AI triage and clinical decision support · **Person:** Meryem Sefrioui · **Allocation (%):** 100 · **Start:** 2027-10-11 · **Holder type:** Holder

Row 2 — Role: L&D Strategist · **Mandatory training by position:** AI medical imaging assistance · **Person:** Mehdi Hajji · **Allocation (%):** 50 · **Start:** 2027-10-18 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Result to record in the task: Linked to 5 Clinical Care & Nursing positions (38 employees).

When every step is complete, click Complete in the task panel.

Task UFT-HCPR-E1-03 — Track certification validity · done by Compliance Officer

Input: Sector obligations → **Output:** Check expiry dates and renewals.

Step MP-02.1 — Define competency families and levels (L&D Analyst)

Type:

Row 1 — Competency families and levels: Raise AI triage and clinical decision support proficiency of Operator — Clinical Care & Nursing teams to level 3 · **Indicator:** KPI-015 (Training record correction rate) · **Baseline:** 47 % · **Target:** 74 % · **Deadline:** 2028-04-10 · **Owner:** Mehdi Hajji

Row 2 — Competency families and levels: Certify Supervisor — Clinical Care & Nursing staff on AI medical imaging assistance · **Indicator:** KPI-016 (Knowledge reuse rate) · **Baseline:** 30 % · **Target:** 85 % · **Deadline:** 2028-04-17 · **Owner:** Hind Ouazzani

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-14.3 — Compute certification validity (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Validity: 33 valid, 5 expire within 60 days.

When every step is complete, click Complete in the task panel.

Task UFT-HCPR-E1-04 — Issue sector compliance extract · done by Compliance Officer

Input: Sector obligations → **Output:** Produce the extract for auditors.

Step MP-02.2 — Set target levels per position (HR Business Partner)

Type:

Row 1 — Target levels per position: Raise AI triage and clinical decision support proficiency of Operator — Clinical Care & Nursing teams to level 3 · **Indicator:** KPI-016 (Knowledge reuse rate) · **Baseline:** 33 % · **Target:** 81 % · **Deadline:** 2028-04-12 · **Owner:** Hind Ouazzani

Row 2 — Target levels per position: Certify Supervisor — Clinical Care & Nursing staff on AI medical imaging assistance · **Indicator:** KPI-017 (IDP coverage) · **Baseline:** 35 % · **Target:** 80 % · **Deadline:** 2028-04-19 · **Owner:** Tarik Amrani

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-14.7 — Produce compliance audit extract (Compliance Officer)

Type:

Row 1 — Compliance audit extract: Compliance audit extract — AI triage and clinical decision support · **Owner:** Hind Ouazzani · **Start:** 2027-10-25 · **End:** 2027-11-24 · **Budget:** 53000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Compliance audit extract: Compliance audit extract — AI medical imaging assistance · **Owner:** Tarik Amrani · **Start:** 2027-11-01 · **End:** 2027-12-01 · **Budget:** 46000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Extract issued for the ISO 7101 audit on 15 October.

When every step is complete, click Complete in the task panel.

Gate G5 — G5 — Evaluation & impact validated: close the phase

1. Open the project workspace and click the gate button of the phase.
1. Tick each checklist item once its evidence is attached, then click Submit for decision.
1. Click Go. Type the justification: All mandatory items met; evidence attached.
1. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

Phase 6 — Talent, knowledge & continuous improvement

E2E-10 — Talent-to-Mobility

Goal: Enable internal mobility and career progression

Starts when: Internal opening published or annual career review. **Ends with:** Internal move decided with a reskilling plan assigned.

Task UFT-10-01 — Model career paths · done by HR Director

Input: Job architecture → **Output:** Career paths

Step MP-13.1 — Model career path (HR Director)

Type:

Row 1 — Career path: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Career path: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Step MP-13.2 — Link path steps to competency targets (HR Business Partner)

Type:

Row 1 — Path steps to competency targets: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Tarik Amrani · **Source:** Interview with the function head

Row 2 — Path steps to competency targets: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Amine Hajji · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Path steps to competency targets register".

Result to record in the task: Career path: Clinical Care & Nursing operator → team leader → supervisor, with competency targets per step.

When every step is complete, click Complete in the task panel.

Task UFT-10-02 — Publish internal opening · done by HR Business Partner

Input: Career paths → **Output:** Internal opening

Step MP-31.1 — Publish internal opening (HR Business Partner)

Type:

Row 1 — Internal opening: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-10-24

Row 2 — Internal opening: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-10-31

Then click Complete the step. The rows go to the register "Communications log".

Step MP-31.2 — Define required skills (Hiring Manager)

Type:

Row 1 — Required skills: AI triage and clinical decision support · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Amine Hajji · **Source:** Questionnaire results

Row 2 — Required skills: AI medical imaging assistance · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Zineb Squalli · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Required skills register".

Result to record in the task: Opening 'Clinical Care & Nursing team leader', required skills: AI triage and clinical decision support level 3, leadership level 2.

When every step is complete, click Complete in the task panel.

Task UFT-10-03 — Match employees to opening · done by HR Business Partner

Input: Internal opening → **Output:** Match list

Step MP-31.3 — Match employees to opening (HR Business Partner)

Type:

Row 1 — Employees to opening: AI triage and clinical decision support · **Criterion:** Cost · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Employees to opening: AI medical imaging assistance · **Criterion:** Risk · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-02.7 — Validate skills inventory (Head of L&D)

Type:

Decision: Approved

Skills inventory: Skills inventory

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-11-14

Decided by: Meryem Sefrioui

Then click Complete the step.

Result to record in the task: Review 6 AI matches; keep 4 candidates with match score above 75%.

When every step is complete, click Complete in the task panel.

Task UFT-10-04 — Apply to internal opening · done by Employee

Input: Match list → **Output:** Applications

Step MP-31.4 — Apply to internal opening (Employee)

Type:

Row 1 — Internal opening: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Internal opening: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Application with motivation note and consent of the current manager.

When every step is complete, click Complete in the task panel.

Task UFT-10-05 — Shortlist candidates · done by Hiring Manager

Input: Applications → **Output:** Shortlist

Step MP-31.5 — Shortlist candidates (Hiring Manager)

Type:

Decision: Approved

Candidates: Candidates

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-10-28

Decided by: Meryem Sefrioui

Then click Complete the step.

Result to record in the task: Shortlist: 2 candidates; interviews on 20 and 21 June.

When every step is complete, click Complete in the task panel.

Task UFT-10-06 — Plan individual development · done by Manager

Input: Shortlist → **Output:** Development plans

Step MP-13.3 — Create individual development plan (Manager)

Type:

Row 1 — Individual development plan: AI triage and clinical decision support · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Reda Rami · **Source:** Interview with the function head

Row 2 — Individual development plan: AI medical imaging assistance · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Hicham Naciri · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Individual development plan register".

Step MP-13.4 — Suggest development actions (Manager)

Type:

Row 1 — Development actions: AI triage and clinical decision support · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Reda Rami · **Source:** Interview with the function head

Row 2 — Development actions: AI medical imaging assistance · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Hicham Naciri · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Development actions register".

Step MP-42.3 — Build leadership development plan (HR Business Partner)

Type:

Row 1 — Leadership development plan: Leadership development plan — AI triage and clinical decision support · **Owner:** Reda Rami · **Start:** 2027-11-06 · **End:** 2027-12-06 · **Budget:** 39000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Leadership development plan: Leadership development plan — AI medical imaging assistance · **Owner:** Hicham Naciri · **Start:** 2027-11-13 · **End:** 2027-12-13 · **Budget:** 49000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-42.4 — Suggest leadership development actions (HR Business Partner)

Type:

Row 1 — Leadership development actions: AI triage and clinical decision support · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Reda Rami · **Source:** Interview with the function head

Row 2 — Leadership development actions: AI medical imaging assistance · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Hicham Naciri · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Leadership development actions register".

Result to record in the task: Development plan: 2 modules AI triage and clinical decision support, 1 leadership workshop, 3 months mentoring.

When every step is complete, click Complete in the task panel.

Task UFT-10-07 — Assign reskilling plan · done by HR Business Partner

Input: Development plans → **Output:** Reskilling plan

Step MP-31.6 — Assign reskilling plan (HR Business Partner)

Type:

Row 1 — Role: Head of L&D · **Reskilling plan:** AI triage and clinical decision support · **Person:** Hicham Naciri · **Allocation (%):** 100 · **Start:** 2027-10-29 · **Holder type:** Holder

Row 2 — Role: L&D Analyst · **Reskilling plan:** AI medical imaging assistance · **Person:** Zineb Squalli · **Allocation (%):** 50 · **Start:** 2027-11-05 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Step MP-08.1 — Generate personal learning plan (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Assign reskilling path 'AI triage and clinical decision support for team leaders' to the selected candidate.

When every step is complete, click Complete in the task panel.

Task UFT-10-08 — Review career and succession · done by HR Director

Input: Reskilling plan → **Output:** Talent mobility report

Step MP-13.5 — Run career review (HR Business Partner)

Type:

Row 1 — Career review: AI triage and clinical decision support — half-day workshop · **Date:** 2027-11-20 · **Trainer:** Atlas Formation Conseil · **Participants:** 15 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Career review: AI medical imaging assistance — half-day workshop · **Date:** 2027-11-27 · **Trainer:** Maghreb Learning Partners · **Participants:** 18 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-13.6 — Update succession readiness (HR Director)

Type:

Succession readiness: Succession readiness

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-11-25

Then click Complete the step.

Step MP-42.5 — Review leadership pipeline (HR Director)

Type:

Leadership pipeline: Leadership pipeline

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-11-25

Then click Complete the step.

Step MP-42.6 — Reassess leadership maturity (HR Business Partner)

Type:

Row 1 — Leadership maturity: AI triage and clinical decision support · **Criterion:** Cost · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Leadership maturity: AI medical imaging assistance · **Criterion:** Risk · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Succession readiness updated: 2 ready now, 3 ready within 12 months.

When every step is complete, click Complete in the task panel.

E2E-11 — Onboarding-to-Productivity

Goal: Accelerate time-to-productivity

Starts when: New hire or internal mover confirmed. **Ends with:** Employee productive within target time and onboarding closed.

Task UFT-11-01 — Create onboarding record · done by Hiring Manager

Input: Hiring decision → **Output:** Onboarding record

Step MP-35.1 — Create onboarding record (Hiring Manager)

Type:

Row 1 — Onboarding record: AI triage and clinical decision support · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Omar Bouzidi · **Source:** Audit report

Row 2 — Onboarding record: AI medical imaging assistance · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Imane Berrada · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Onboarding record register".

Result to record in the task: Onboarding record for the new Clinical Care & Nursing technician, start date 1 July, buddy assigned.

When every step is complete, click Complete in the task panel.

Task UFT-11-02 — Generate 30-60-90 day path · done by HR Business Partner

Input: Onboarding record → **Output:** 30-60-90 path

Step MP-35.2 — Generate 30-60-90 day path (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-08.1 — Generate personal learning plan (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: 30-60-90 path: day 30 safety and ISO 7101; day 60 AI triage and clinical decision support; day 90 autonomy on shift.

When every step is complete, click Complete in the task panel.

Task UFT-11-03 — Enroll in onboarding sessions · done by Training Administrator

Input: 30-60-90 path → **Output:** Enrollments

Step MP-07.3 — Enroll learners into session (Training Administrator)

Type:

Row 1 — Learners into session: AI triage and clinical decision support — half-day workshop · **Date:** 2027-11-26 · **Trainer:** Atlas Formation Conseil · **Participants:** 11 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Learners into session: AI medical imaging assistance — half-day workshop · **Date:** 2027-12-03 · **Trainer:** Maghreb Learning Partners · **Participants:** 19 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-07.4 — Send convocations (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Enroll in the induction session of 2 July; convocation sent.

When every step is complete, click Complete in the task panel.

Task UFT-11-04 — Complete onboarding tasks · done by Employee

Input: Enrollments → **Output:** Completed tasks

Step MP-35.3 — Complete onboarding tasks (Employee)

Type:

Row 1 — Onboarding tasks: AI triage and clinical decision support · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Youssef Sefrioui · **Source:** Questionnaire results

Row 2 — Onboarding tasks: AI medical imaging assistance · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Hicham Naciri · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Onboarding tasks register".

Result to record in the task: Tasks done: badge, IT account, safety tour, meeting with the team.

When every step is complete, click Complete in the task panel.

Task UFT-11-05 — Hold milestone check-ins · done by Hiring Manager

Input: Completed tasks → **Output:** Check-in notes

Step MP-35.4 — Hold milestone check-in (Hiring Manager)

Type:

Row 1 — Milestone check-in: AI triage and clinical decision support — half-day workshop · **Date:** 2027-11-30 · **Trainer:** Atlas Formation Conseil · **Participants:** 13 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Milestone check-in: AI medical imaging assistance — half-day workshop · **Date:** 2027-12-07 · **Trainer:** Maghreb Learning Partners · **Participants:** 14 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-21.3 — Schedule coaching sessions (Coach)

Type:

Row 1 — Coaching sessions: Coaching sessions — AI triage and clinical decision support · **Owner:** Hicham Naciri · **Start:** 2027-11-20 · **End:** 2027-12-20 · **Budget:** 75000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Coaching sessions: Coaching sessions — AI medical imaging assistance · **Owner:** Kawtar Kettani · **Start:** 2027-11-27 · **End:** 2027-12-27 · **Budget:** 53000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Day-30 check-in: on track; coaching needed on AI triage and clinical decision support data entry.

When every step is complete, click Complete in the task panel.

Task UFT-11-06 — Assess time to productivity · done by Hiring Manager

Input: Check-in notes → **Output:** Productivity assessment

Step MP-35.5 — Assess time to productivity (Hiring Manager)

Type:

Row 1 — Time to productivity: AI triage and clinical decision support · **Criterion:** Risk · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Time to productivity: AI medical imaging assistance · **Criterion:** Business impact · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Time to productivity: 74 days (target 90).

When every step is complete, click Complete in the task panel.

Task UFT-11-07 — Close onboarding · done by HR Business Partner

Input: Productivity assessment → **Output:** Closed onboarding

Step MP-35.6 — Close onboarding (HR Business Partner)

Type:

Decision: Approved

Onboarding: Onboarding

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-11-17

Decided by: Meryem Sefrioui

Then click Complete the step.

Step MP-13.3 — Create individual development plan (Manager)

Type:

Row 1 — Individual development plan: AI triage and clinical decision support · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Ghita Amrani · **Source:** HRIS export

Row 2 — Individual development plan: AI medical imaging assistance · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Hamza Amrani · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Individual development plan register".

Result to record in the task: Close onboarding; link the individual development plan for year 1.

When every step is complete, click Complete in the task panel.

E2E-12 — Knowledge-Capture-to-Transfer

Goal: Capture and transfer institutional knowledge

Starts when: Critical expert identified as leaving, retiring or holding at-risk knowledge. **Ends with:** Knowledge captured, published and transferred to a validated successor.

Task UFT-12-01 — Identify critical experts · done by HR Business Partner

Input: Workforce data → **Output:** Critical expert list

Step MP-34.1 — Identify critical experts (HR Business Partner)

Type:

Row 1 — Critical experts: AI triage and clinical decision support · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hamza Amrani · **Source:** Interview with the function head

Row 2 — Critical experts: AI medical imaging assistance · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Leila Sefrioui · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Critical experts register".

Result to record in the task: Critical expert: senior Clinical Care & Nursing engineer retiring in 8 months; knowledge risk: high.

When every step is complete, click Complete in the task panel.

Task UFT-12-02 — Plan capture sessions · done by Knowledge Manager

Input: Critical expert list → **Output:** Capture plan

Step MP-34.2 — Plan capture sessions (Knowledge Manager)

Type:

Row 1 — Capture sessions: Capture sessions — AI triage and clinical decision support · **Owner:** Leila Sefrioui · **Start:** 2027-11-28 · **End:** 2027-12-28 · **Budget:** 23000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Capture sessions: Capture sessions — AI medical imaging assistance · **Owner:** Kawtar Bennani · **Start:** 2027-12-05 · **End:** 2028-01-04 · **Budget:** 25000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Capture plan: 4 sessions of 90 minutes on troubleshooting and ISO 7101 practices.

When every step is complete, click Complete in the task panel.

Task UFT-12-03 — Record expert interview · done by Knowledge Manager

Input: Capture plan → **Output:** Interview transcript

Step MP-34.3 — Record expert interview (Knowledge Manager)

Type:

Row 1 — Expert interview: AI triage and clinical decision support · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Kawtar Bennani · **Source:** Annual performance review

Row 2 — Expert interview: AI medical imaging assistance · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Loubna Fassi · **Source:** Audit report

Then click Complete the step. The rows go to the register "Expert interview register".

Result to record in the task: Interview 1 recorded (82 minutes); transcript attached.

When every step is complete, click Complete in the task panel.

Task UFT-12-04 — Structure knowledge · done by Knowledge Manager

Input: Interview transcript → **Output:** Structured knowledge

Step MP-34.4 — Structure knowledge from transcript (Knowledge Manager)

Type:

Row 1 — Knowledge from transcript: Knowledge from transcript — AI triage and clinical decision support · **Owner:** Loubna Fassi · **Start:** 2027-12-02 · **End:** 2028-01-01 · **Budget:** 43000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Knowledge from transcript: Knowledge from transcript — AI medical imaging assistance · **Owner:** Ayoub Naciri · **Start:** 2027-12-09 · **End:** 2028-01-08 · **Budget:** 37000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Accept the AI structure: 5 failure modes, 12 checks, 3 decision rules; correct 2 technical terms.

When every step is complete, click Complete in the task panel.

Task UFT-12-05 — Publish knowledge article · done by Knowledge Manager

Input: Structured knowledge → **Output:** Published article

Step MP-12.1 — Publish knowledge article (Knowledge Manager)

Type:

Row 1 — Knowledge article: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-11-29

Row 2 — Knowledge article: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-12-06

Then click Complete the step. The rows go to the register "Communications log".

Step MP-12.2 — Index article for retrieval (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-33.4 — Approve publication (Knowledge Manager)

Type:

Decision: Approved

Publication: Publication

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-11-27

Decided by: Meryem Sefrioui

Then click Complete the step.

Result to record in the task: Publish article 'Troubleshooting guide — Clinical Care & Nursing' in EN/FR/AR; indexed for search.

When every step is complete, click Complete in the task panel.

Task UFT-12-06 — Assign successor learning path · done by Manager

Input: Published article → **Output:** Successor path

Step MP-34.5 — Assign successor learning path (Manager)

Type:

Row 1 — Role: L&D Planner · **Successor learning path:** AI triage and clinical decision support · **Person:** Hamza Ziani · **Allocation (%):** 100 · **Start:** 2027-11-26 · **Holder type:** Holder

Row 2 — Role: Instructional Designer · **Successor learning path:** AI medical imaging assistance · **Person:** Soukaina Berrada · **Allocation (%):** 50 · **Start:** 2027-12-03 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Step MP-06.6 — Publish content to catalog (Content Developer)

Type:

Row 1 — Content to catalog: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-12-01

Row 2 — Content to catalog: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-12-08

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Assign the successor path: article + 3 shadowing sessions with the expert.

When every step is complete, click Complete in the task panel.

Task UFT-12-07 — Validate transfer completion · done by Subject Matter Expert

Input: Successor path → **Output:** Validated transfer

Step MP-34.6 — Validate transfer completion (Subject Matter Expert)

Type:

Decision: Approved

Transfer completion: Transfer completion

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-12-15

Decided by: Meryem Sefrioui

Then click Complete the step.

Result to record in the task: Transfer validated: successor solved 4 of 5 test cases alone.

When every step is complete, click Complete in the task panel.

E2E-31 — Engagement-to-Roadmap

Goal: Define post-engagement roadmap and continuous improvement

Starts when: Closure of the current training engineering engagement (E2E-19). **Ends with:** Approved post-engagement roadmap with future missions and continuous improvement plan.

Task UFT-31-01 — Consolidate engagement findings · done by Consultant PM

Input: Engagement outputs → **Output:** Findings

Step MP-50.1 — Consolidate engagement findings (Consultant PM)

Type:

Row 1 — Engagement findings: KPI-019 (Vendor invoice match rate) · **Period:** 2026-Q1 · **Value:** 57 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Engagement findings: KPI-020 (Integration synchronisation success rate) · **Period:** 2026-Q2 · **Value:** 61 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Findings: 6 deliverables, 3 lessons learned, 2 open topics (IS, org design).

When every step is complete, click Complete in the task panel.

Task UFT-31-02 — Define future perspectives · done by Consultant PM

Input: Findings → **Output:** Perspectives

Step MP-50.2 — Define future perspectives (Consultant PM)

Type:

Row 1 — Future perspectives: AI triage and clinical decision support · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Omar Berrada · **Source:** Audit report

Row 2 — Future perspectives: AI medical imaging assistance · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Hajar Amrani · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Future perspectives register".

Result to record in the task: Perspectives: AI bed and staff capacity planning programme, second wave for OP level.

When every step is complete, click Complete in the task panel.

Task UFT-31-03 — Plan One-to-One coaching · done by L&D Strategist

Input: Perspectives → **Output:** Coaching plan

Step MP-50.3 — Plan One-to-One coaching (L&D Strategist)

Type:

Row 1 — One-to-One coaching: One-to-One coaching — AI triage and clinical decision support · **Owner:** Hajar Amrani · **Start:** 2027-12-14 · **End:** 2028-01-13 · **Budget:** 53000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — One-to-One coaching: One-to-One coaching — AI medical imaging assistance · **Owner:** Omar Alaoui · **Start:** 2027-12-21 · **End:** 2028-01-20 · **Budget:** 55000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: One-to-One coaching: 6 managers, 6 sessions each over 6 months.

When every step is complete, click Complete in the task panel.

Task UFT-31-04 — Plan organizational optimization · done by Org Design Consultant

Input: Perspectives → **Output:** Optimization plan

Step MP-50.4 — Plan organizational optimization (Org Design Consultant)

Type:

Row 1 — Organizational optimization: Organizational optimization — AI triage and clinical decision support · **Owner:** Omar Alaoui · **Start:** 2027-12-16 · **End:** 2028-01-15 · **Budget:** 63000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Organizational optimization: Organizational optimization — AI medical imaging assistance · **Owner:** Meryem Sefrioui · **Start:** 2027-12-23 · **End:** 2028-01-22 · **Budget:** 56000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Organizational optimization: merge 2 planning cells; update 11 descriptions.

When every step is complete, click Complete in the task panel.

Task UFT-31-05 — Plan IS rehabilitation · done by IT Architect

Input: Perspectives → **Output:** IS plan

Step MP-50.5 — Plan IS rehabilitation (IT Architect)

Type:

Row 1 — IS rehabilitation: IS rehabilitation — AI triage and clinical decision support · **Owner:** Meryem Sefrioui · **Start:** 2027-12-18 · **End:** 2028-01-17 · **Budget:** 35000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — IS rehabilitation: IS rehabilitation — AI medical imaging assistance · **Owner:** Mehdi Hajji · **Start:** 2027-12-25 · **End:** 2028-01-24 · **Budget:** 50000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: IS rehabilitation: connect HRIS and training platform; retire 2 spreadsheets.

When every step is complete, click Complete in the task panel.

Task UFT-31-06 — Define KPIs and dashboards · done by Performance Analyst

Input: Perspectives → **Output:** KPI framework

Step MP-50.6 — Define KPIs and dashboards (Performance Analyst)

Type:

Row 1 — KPIs and dashboards: Raise AI triage and clinical decision support proficiency of Operator — Clinical Care & Nursing teams to level 3 · **Indicator:** KPI-004 (Training Engineering Report cycle time) · **Baseline:** 31 % · **Target:** 87 % · **Deadline:** 2028-06-07 · **Owner:** Mehdi Hajji

Row 2 — KPIs and dashboards: Certify Supervisor — Clinical Care & Nursing staff on AI medical imaging assistance · **Indicator:** KPI-005 (Design approval lead time) · **Baseline:** 31 % · **Target:** 84 % · **Deadline:** 2028-06-14 · **Owner:** Hind Ouazzani

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: KPIs: training coverage, time to competency, ROI per theme; monthly dashboard.

When every step is complete, click Complete in the task panel.

Task UFT-31-07 — Prioritize future missions · done by Consultant PM

Input: All plans → **Output:** Prioritized missions

Step MP-50.7 — Prioritize future missions (Consultant PM)

Type:

Row 1 — Future missions: AI triage and clinical decision support · **Criterion:** Risk · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Future missions: AI medical imaging assistance · **Criterion:** Business impact · **Weight (%):** 30 · **Score (1–5):** 5 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-50.8 — Validate roadmap with leadership (Partner)

Type:

Decision: Approved with conditions

Roadmap with leadership: Roadmap with leadership

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2028-01-12

Decided by: Meryem Sefrioui

Then click Complete the step.

Result to record in the task: Priority missions: 1 IS rehabilitation, 2 coaching, 3 org optimization.

When every step is complete, click Complete in the task panel.

Task UFT-31-08 — Publish roadmap · done by Consultant PM

Input: Prioritized missions → **Output:** Post-engagement roadmap

Step MP-50.9 — Publish post-engagement roadmap (Consultant PM)

Type:

Row 1 — Post-engagement roadmap: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-12-19

Row 2 — Post-engagement roadmap: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-12-26

Then click Complete the step. The rows go to the register "Communications log".

Step MP-50.10 — Track roadmap execution (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-50.11 — Improve roadmap continuously (Consultant PM)

Type:

Roadmap continuously: Roadmap continuously

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-12-18

Then click Complete the step.

Step MP-50.12 — Report on roadmap progress (Consultant PM)

Type:

Row 1 — On roadmap progress: Announce the program: AI triage and clinical decision support · **Audience:** Operator — Clinical Care & Nursing teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-12-19

Row 2 — On roadmap progress: Announce the program: AI medical imaging assistance · **Audience:** Supervisor — Clinical Care & Nursing teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-12-26

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish RPT-010 Post-Engagement Roadmap to the executive committee.

When every step is complete, click Complete in the task panel.

Gate G6 — G6 — Closure & continuous improvement: close the phase

1. Open the project workspace and click the gate button of the phase.
1. Tick each checklist item once its evidence is attached, then click Submit for decision.
1. Click Go. Type the justification: All mandatory items met; evidence attached.
1. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

4. Scenario 2 — Atlas Motors Kénitra

Context

Context	
Sector	Automotive
Size	Large company · 4200 employees · Kénitra
Run	Digital Skills Full Run 2026 — Atlas Motors Kénitra — Digital skills, Full run
Standards	IATF 16949, ISO 9001, ISO 45001
Themes	MES and digital shop-floor tracking · PLM and digital engineering change · Supplier portal and EDI · AI visual inspection of welds and paint
Sign in as	headld@atlasmotorskenitra.ma · CortexSkills#2026
Scope of the run	35 end-to-end processes, 265 user tasks and 463 steps.

Phase 0 — Enablers (run across all phases)

Enablers run across all phases

E2E-15 — Data-AI-Integration

Goal: Govern data, AI, integrations

Starts when: New integration, data source or AI use case to govern. **Ends with:** Integrations, data and AI governed with health, retention and usage reviewed.

Task UFT-15-01 — Register external integration · done by Platform Administrator

Input: Integration request → **Output:** Integration record

Step MP-16.1 — Register external integration (Platform Administrator)

Type:

Row 1 — External integration: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Omar Benjelloun · **Source:** Audit report

Row 2 — External integration: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Sara Lahlou · **Source:** HRIS export

Then click Complete the step. The rows go to the register "External integration register".

Result to record in the task: Register integration 'HRIS — Workday' (INT-HR-01); credential reference stored encrypted.

When every step is complete, click Complete in the task panel.

Task UFT-15-02 — Map fields and check health · done by IT Architect

Input: Integration record → **Output:** Healthy integration

Step MP-16.2 — Map integration fields (IT Architect)

Type:

Row 1 — Integration fields: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Sara Lahlou · **Source:** HRIS export

Row 2 — Integration fields: PLM and digital engineering change · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Zineb Lahlou · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Integration fields register".

Step MP-16.3 — Check integration health (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Map fields: employee_id → matricule; position → poste. Health check: success.

When every step is complete, click Complete in the task panel.

Task UFT-15-03 — Run HRIS synchronisation · done by IT Architect

Input: Healthy integration → **Output:** Synchronised directory

Step MP-16.4 — Run HRIS synchronisation (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-16.5 — Review synchronisation rejections (IT Architect)

Type:

Synchronisation rejections: Synchronisation rejections

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-12-14

Then click Complete the step.

Result to record in the task: Sync run: 1,204 records updated, 3 rejected (missing position) — corrected.

When every step is complete, click Complete in the task panel.

Task UFT-15-04 — Set data retention rule · done by Data Protection Officer

Input: Synchronised directory → **Output:** Retention rules

Step MP-16.6 — Set data retention rule (Data Protection Officer)

Type:

Row 1 — Data retention rule: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Data retention rule: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Retention: questionnaire responses 3 years; training records 10 years.

When every step is complete, click Complete in the task panel.

Task UFT-15-05 — Maintain AI use case register · done by Platform Administrator

Input: Retention rules → **Output:** AI register

Step MP-16.7 — Maintain AI use case register (Platform Administrator)

Type:

AI use case register: AI use case register

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-01-01

Then click Complete the step.

Result to record in the task: Add custom use case 'Shift-report summarizer' (Assistive), version 1.

When every step is complete, click Complete in the task panel.

Task UFT-15-06 — Set AI activation per scope · done by Platform Administrator

Input: AI register → **Output:** AI activation state

Step MP-16.8 — Set AI activation per scope (Platform Administrator)

Type:

Row 1 — AI activation per scope: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — AI activation per scope: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Step MP-24.1 — Enable personalization per scope (Platform Administrator)

Type:

Row 1 — Personalization per scope: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Activate AIUC-35 and AIUC-36 for the organization; override Off for pilot project B.

When every step is complete, click Complete in the task panel.

Task UFT-15-07 — Review AI usage log · done by IT Architect

Input: AI activation state → **Output:** AI usage & governance report

Step MP-16.9 — Review AI usage log (IT Architect)

Type:

AI usage log: AI usage log

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-07-06

Then click Complete the step.

Step MP-28.2 — Validate dataset quality (Performance Analyst)

Type:

Decision: Approved

Dataset quality: Dataset quality

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-07-05

Decided by: Tarik Lahlou

Then click Complete the step.

Result to record in the task: Usage review: 412 suggestions — 71% accepted, 20% edited, 9% rejected.

When every step is complete, click Complete in the task panel.

E2E-17 — Change-to-Adoption

Goal: Drive sustained adoption and culture change

Starts when: Approved plan or new platform capability requiring adoption. **Ends with:** Sustained adoption reached with low-adoption groups reinforced.

Task UFT-17-01 — Assess change impact · done by Change Manager

Input: Approved plan → **Output:** Impact assessment

Step MP-19.1 — Assess change impact (Change Manager)

Type:

Row 1 — Change impact: MES and digital shop-floor tracking · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Change impact: PLM and digital engineering change · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Change impact: Supplier portal and EDI · **Criterion:** Cost · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Impact: Assembly & Production supervisors high, operators medium, support functions low.

When every step is complete, click Complete in the task panel.

Task UFT-17-02 — Build adoption plan · done by Change Manager

Input: Impact assessment → **Output:** Adoption plan

Step MP-19.2 — Build adoption plan (Change Manager)

Type:

Row 1 — Adoption plan: Adoption plan — MES and digital shop-floor tracking · **Owner:** Hajar Mansouri · **Start:** 2027-01-04 · **End:** 2027-02-03 · **Budget:** 37000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Adoption plan: Adoption plan — PLM and digital engineering change · **Owner:** Adil Naciri · **Start:** 2027-01-11 · **End:** 2027-02-10 · **Budget:** 45000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Adoption plan: sponsor message, 6 champions, weekly 15-minute huddles for 8 weeks.

When every step is complete, click Complete in the task panel.

Task UFT-17-03 — Launch communication campaign · done by Change Manager

Input: Adoption plan → **Output:** Campaign

Step MP-19.3 — Launch communication campaign (Change Manager)

Type:

Row 1 — Communication campaign: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-01-01

Row 2 — Communication campaign: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers ·

Channel: WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-01-08

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Campaign 'MES and digital shop-floor tracking — why it matters' on e-mail, intranet and screens.

When every step is complete, click Complete in the task panel.

Task UFT-17-04 — Open community space · done by Knowledge Manager

Input: Campaign → **Output:** Community space

Step MP-12.3 — Create community space (Knowledge Manager)

Type:

Row 1 — Community space: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Yassine Hajji · **Source:** Audit report

Row 2 — Community space: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Zineb Rami · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Community space register".

Step MP-12.4 — Moderate community posts (Knowledge Manager)

Type:

Community posts: Community posts

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-01-30

Then click Complete the step.

Step MP-26.1 — Create learning cohort group (Knowledge Manager)

Type:

Row 1 — Learning cohort group: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Yassine Hajji · **Source:** Audit report

Row 2 — Learning cohort group: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Zineb Rami · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Learning cohort group register".

Result to record in the task: Community space 'MES and digital shop-floor tracking Q&A' opened; moderation rules published.

When every step is complete, click Complete in the task panel.

Task UFT-17-05 — Track adoption usage · done by L&D Analyst

Input: Community space → **Output:** Usage indicators

Step MP-19.4 — Track adoption usage (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-08.5 — Monitor engagement indicators (L&D Analyst)

Type:

Row 1 — Engagement indicators: KPI-006 (License Compliance %) · **Period:** 2026-Q1 · **Value:** 69 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Engagement indicators: KPI-007 (Content publication lead time) · **Period:** 2026-Q2 · **Value:** 89 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Weekly active users: 64% of the target population.

When every step is complete, click Complete in the task panel.

Task UFT-17-06 — Identify low-adoption groups · done by Change Manager

Input: Usage indicators → **Output:** Low-adoption list

Step MP-19.5 — Identify low-adoption groups (Change Manager)

Type:

Row 1 — Low-adoption groups: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Leila Sefrioui · **Source:** Interview with the function head

Row 2 — Low-adoption groups: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Ayoub Bennani · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Low-adoption groups register".

Result to record in the task: Low adoption confirmed for night shift (31%); one group rejected as false positive.

When every step is complete, click Complete in the task panel.

Task UFT-17-07 — Run reinforcement actions · done by Change Manager

Input: Low-adoption list → **Output:** Adoption dashboard

Step MP-19.6 — Run reinforcement actions (Change Manager)

Type:

Row 1 — Reinforcement actions: MES and digital shop-floor tracking — half-day workshop · **Date:** 2026-07-22 · **Trainer:** Atlas Formation Conseil · **Participants:** 18 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Reinforcement actions: PLM and digital engineering change — half-day workshop · **Date:** 2026-07-29 · **Trainer:** Maghreb Learning Partners · **Participants:** 14 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-08.6 — Trigger re-engagement nudge (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Reinforcement: night-shift coaching sessions; adoption reached 58% after 4 weeks.

When every step is complete, click Complete in the task panel.

E2E-18 — Quality-Risk-Improvement

Goal: Improve processes and mitigate risk

Starts when: Risk logged, periodic quality review due or control test scheduled. **Ends with:** Risks mitigated, actions evaluated by a different person, controls rated.

Task UFT-18-01 — Log risk or opportunity · done by Quality Manager

Input: Issue or signal → **Output:** Risk register entry

Step MP-20.1 — Log risk or opportunity (Quality Manager)

Type:

Row 1 — Risk or opportunity: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Ayoub Bennani · **Source:** Questionnaire results

Row 2 — Risk or opportunity: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Salma Sefrioui · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Risk or opportunity register".

Result to record in the task: Risk 'Trainers unavailable in Q3': likelihood 3, impact 4, score 12.

When every step is complete, click Complete in the task panel.

Task UFT-18-02 — Assign mitigation action · done by Quality Manager

Input: Risk register entry → **Output:** Mitigation action

Step MP-20.2 — Assign mitigation action (Quality Manager)

Type:

Row 1 — Role: IT Architect · **Mitigation action:** MES and digital shop-floor tracking · **Person:** Salma Sefrioui · **Allocation (%):** 100 · **Start:** 2027-01-06 · **Holder type:** Holder

Row 2 — Role: Consultant (PM / Partner) · **Mitigation action:** PLM and digital engineering change · **Person:** Hajar Benjelloun · **Allocation (%):** 50 · **Start:** 2027-01-13 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Result to record in the task: Action: contract a second vendor; owner Purchasing Officer; evaluator Quality Manager.

When every step is complete, click Complete in the task panel.

Task UFT-18-03 — Execute improvement action · done by Action Owner

Input: Mitigation action → **Output:** Executed action

Step MP-20.3 — Execute improvement action (Action Owner)

Type:

Row 1 — Improvement action: MES and digital shop-floor tracking — half-day workshop · **Date:** 2027-01-28 · **Trainer:** Atlas Formation Conseil · **Participants:** 16 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Improvement action: PLM and digital engineering change — half-day workshop · **Date:** 2027-02-04 · **Trainer:** Maghreb Learning Partners · **Participants:** 11 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Action done: framework contract signed with vendor B; evidence attached.

When every step is complete, click Complete in the task panel.

Task UFT-18-04 — Evaluate action effectiveness · done by Action Evaluator

Input: Executed action → **Output:** Effectiveness verdict

Step MP-20.4 — Evaluate action effectiveness (Action Evaluator)

Type:

Row 1 — Action effectiveness: MES and digital shop-floor tracking · **Criterion:** Cost · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Action effectiveness: PLM and digital engineering change · **Criterion:** Risk · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Verdict: effective. The evaluator is a different user from the owner.

When every step is complete, click Complete in the task panel.

Task UFT-18-05 — Review access and security · done by IT Architect

Input: Security logs → **Output:** Access review

Step MP-17.4 — Review access violation log (IT Architect)

Type:

Access violation log: Access violation log

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-08-13

Then click Complete the step.

Step MP-17.6 — Enforce login rate limit (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-17.2 — Assign roles to user (Platform Administrator)

Type:

Row 1 — Role: Training Administrator · **Roles to user:** MES and digital shop-floor tracking · **Person:** Leila Sefrioui · **Allocation (%):** 100 · **Start:** 2026-07-12 · **Holder type:** Holder

Row 2 — Role: Platform Administrator · **Roles to user:** PLM and digital engineering change · **Person:** Ayoub Bennani · **Allocation (%):** 50 · **Start:** 2026-07-19 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Step MP-17.3 — Edit permission matrix (Platform Administrator)

Type:

Permission matrix: Permission matrix

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-08-13

Then click Complete the step.

Step MP-17.5 — Issue signed session token (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Access review: 2 dormant accounts disabled; 0 cross-tenant attempts.

When every step is complete, click Complete in the task panel.

Task UFT-18-06 — Run periodic quality review · done by Quality Manager

Input: Access review → **Output:** Quality review minutes

Step MP-20.5 — Run periodic quality review (Quality Manager)

Type:

Row 1 — Periodic quality review: MES and digital shop-floor tracking — half-day workshop · **Date:** 2026-08-03 · **Trainer:** Atlas Formation Conseil · **Participants:** 11 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Periodic quality review: PLM and digital engineering change — half-day workshop · **Date:** 2026-08-10 · **Trainer:** Maghreb Learning Partners · **Participants:** 11 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-09.7 — Review evaluation results (L&D Analyst)

Type:

Evaluation results: Evaluation results

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-07-18

Then click Complete the step.

Result to record in the task: Quality review minutes: 3 KPIs red, 2 actions opened, next review in 30 days.

When every step is complete, click Complete in the task panel.

Task UFT-18-07 — Update control effectiveness · done by Quality Manager

Input: Quality review minutes → **Output:** Governance register & risk heat-map

Step MP-20.6 — Update control effectiveness rating (Quality Manager)

Type:

Control effectiveness rating: Control effectiveness rating

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-07-27

Then click Complete the step.

Result to record in the task: Control CTRL-002 effectiveness: Effective; CTRL-031: Partially effective.

When every step is complete, click Complete in the task panel.

Phase 1 — Scope & evidence

E2E-32 — Scope-of-Work-to-Engineering-Plan

Goal: Define and approve the structured scope of work and stakeholder register

Starts when: New training engineering engagement, annual plan cycle, or executive request.
Ends with: Approved Scope of Work with criteria matrix and stakeholder register released to questionnaire design (E2E-33) and needs analysis (E2E-03).

Task UFT-32-01 — Define scope frame · done by Head of L&D

Input: Engagement request → **Output:** Scope frame

Step MP-53.1 — Define scope frame (Group Yes/No) (Head of L&D)

Type:

Row 1 — Scope frame (Group Yes/No): MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Ghita Ziani · **Source:** Annual performance review

Row 2 — Scope frame (Group Yes/No): PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Tarik Lahlou · **Source:** Audit report

Then click Complete the step. The rows go to the register "Scope frame (Group Yes/No) register".

Step MP-53.2 — Select Organization (Head of L&D)

Type:

Decision: Approved

Organization: Organization

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-08-08

Decided by: Tarik Lahlou

Then click Complete the step.

Result to record in the task: Group scope: No. Organization: Atlas Motors Kénitra.

When every step is complete, click Complete in the task panel.

Task UFT-32-02 — Select sector · done by L&D Analyst

Input: Sector reference list → **Output:** Sector

Step MP-53.3 — Select sector (L&D Analyst)

Type:

Decision: Approved with conditions

Sector: Sector

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2027-08-17

Decided by: Tarik Lahlou

Then click Complete the step.

Result to record in the task: Sector: Automotive.

When every step is complete, click Complete in the task panel.

Task UFT-32-03 — Select decision levels · done by L&D Analyst

Input: MS/MO/OP framework → **Output:** Decision levels

Step MP-53.4 — Select decision level (MS/MO/OP/Custom) (L&D Analyst)

Type:

Decision: Approved

Decision level (MS/MO/OP/Custom): Decision level (MS/MO/OP/Custom)

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-07-22

Decided by: Tarik Lahlou

Then click Complete the step.

Result to record in the task: Decision levels: MS, MO, OP (no custom level).

When every step is complete, click Complete in the task panel.

Task UFT-32-04 — Map functions × decision levels · done by L&D Analyst

Input: Job architecture → **Output:** Criteria matrix

Step MP-53.5 — Map functions × decision level (L&D Analyst)

Type:

Row 1 — Functions × decision level: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Sara Lahlou · **Source:** Interview with the function head

Row 2 — Functions × decision level: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Zineb Lahlou · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Functions × decision level register".

Result to record in the task: Matrix: Assembly & Production × MS/MO/OP; Quality × MO/OP; Finance × MS/MO; HR × MS/MO.

When every step is complete, click Complete in the task panel.

Task UFT-32-05 — Select focus and add custom criteria · done by Head of L&D

Input: Strategic objectives → **Output:** Focus and custom criteria

Step MP-53.6 — Select focus (All/Digital/AI/Custom) (Head of L&D)

Type:

Decision: Approved

Focus (All/Digital/AI/Custom): Focus (All/Digital/AI/Custom)

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-08-09

Decided by: Tarik Lahlou

Then click Complete the step.

Step MP-53.7 — Add custom criteria (Consultant PM)

Type:

Row 1 — Custom criteria: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Zineb Lahlou · **Source:** Questionnaire results

Row 2 — Custom criteria: PLM and digital engineering change · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Leila Rami · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Custom criteria register".

Result to record in the task: Focus: Digital. Custom criterion: 'Readiness for MES and digital shop-floor tracking' (weight 2.00).

When every step is complete, click Complete in the task panel.

Task UFT-32-06 — Identify stakeholders · done by HR Business Partner

Input: Employee directory → **Output:** Stakeholder list

Step MP-53.8 — Identify stakeholders (HR Business Partner)

Type:

Row 1 — Stakeholders: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Leila Rami · **Source:** Annual performance review

Row 2 — Stakeholders: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Rachid Amrani · **Source:** Audit report

Then click Complete the step. The rows go to the register "Stakeholders register".

Result to record in the task: Register 40 stakeholders: name, role, function, level, site, preferred channel (Email, Face-to-Face or Hybrid).

When every step is complete, click Complete in the task panel.

Task UFT-32-07 — Validate scope · done by Head of L&D

Input: Draft scope → **Output:** Validated scope

Step MP-53.9 — Validate and approve scope (HR Director)

Type:

Decision: Approved with conditions

Approve scope: Approve scope

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2027-08-27

Decided by: Tarik Lahlou

Then click Complete the step.

Result to record in the task: Validation: every function in scope has at least 3 stakeholders; completeness 100%.

When every step is complete, click Complete in the task panel.

Task UFT-32-08 — Approve scope · done by HR Director / Consultant PM

Input: Validated scope → **Output:** Approved Scope of Work

Step MP-53.9 — Validate and approve scope (HR Director)

Type:

Decision: Approved

Approve scope: Approve scope

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-08-01

Decided by: Tarik Lahlou

Then click Complete the step.

Step MP-53.10 — Publish scope and register stakeholders (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Approval status: Approved (version 1). Justification: scope aligned with SO-1 and SO-2.

When every step is complete, click Complete in the task panel.

Task UFT-32-09 — Publish scope and register stakeholders · done by L&D Analyst

Input: Approved Scope of Work → **Output:** Published SOW and stakeholder register

Step MP-53.10 — Publish scope and register stakeholders (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Generate the SOW document (RPT-033) and release scope and stakeholders to the questionnaire studio.

When every step is complete, click Complete in the task panel.

E2E-33 — Questionnaire-to-Response-Collection

Goal: Design, distribute and collect questionnaire responses across channels

Starts when: An approved Scope of Work becomes available (end of E2E-32). **Ends with:** Consolidated, validated questionnaire response dataset feeding needs analysis (E2E-03), diagnostic (E2E-20) and demand collection (E2E-27).

Task UFT-33-01 — Select questionnaire template · done by L&D Analyst

Input: Approved SOW → **Output:** Selected template

Step MP-54.1 — Select questionnaire template by focus (L&D Analyst)

Type:

Decision: Approved

Questionnaire template by focus: Questionnaire template by focus

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-08-19

Decided by: Tarik Lahlou

Then click Complete the step.

Result to record in the task: Template: 'Digital needs — Automotive' in the user's language, 5 sections.

When every step is complete, click Complete in the task panel.

Task UFT-33-02 — Elaborate questionnaire · done by L&D Analyst

Input: Template, AI prompts → **Output:** Draft questionnaire

Step MP-54.2 — Elaborate questionnaire (Load/AI/Manual) (L&D Analyst)

Type:

Row 1 — Questionnaire (Load/AI/Manual): Questionnaire (Load/AI/Manual) — MES and digital shop-floor tracking · **Owner:** Meryem Lahlou · **Start:** 2027-08-14 · **End:** 2027-09-13 · **Budget:** 59000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Questionnaire (Load/AI/Manual): Questionnaire (Load/AI/Manual) — PLM and digital engineering change · **Owner:** Yassine Bouzidi · **Start:** 2027-08-21 · **End:** 2027-09-20 · **Budget:** 24000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Elaboration mode: AI. 24 questions generated from the approved Scope of Work.

When every step is complete, click Complete in the task panel.

Task UFT-33-03 — Tailor and validate content · done by L&D Analyst

Input: Draft questionnaire → **Output:** Validated questionnaire

Step MP-54.3 — Tailor to sector and focus (L&D Analyst)

Type:

Row 1 — Sector and focus: Sector and focus — MES and digital shop-floor tracking · **Owner:** Yassine Bouzidi · **Start:** 2027-08-16 · **End:** 2027-09-15 · **Budget:** 26000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Sector and focus: Sector and focus — PLM and digital engineering change · **Owner:** Hajar Bouzidi · **Start:** 2027-08-23 · **End:** 2027-09-22 · **Budget:** 40000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Validate each question; reword 5 with Assembly & Production vocabulary; delete 2 duplicates.

When every step is complete, click Complete in the task panel.

Task UFT-33-04 — Allocate RACSI · done by Head of L&D

Input: Validated questionnaire → **Output:** RACSI allocation

Step MP-54.4 — Allocate RACSI per section (Head of L&D)

Type:

Row 1 — RACSI per section: RACSI per section — MES and digital shop-floor tracking · **Owner:** Hajar Bouzidi · **Start:** 2027-08-18 · **End:** 2027-09-17 · **Budget:** 39000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — RACSI per section: RACSI per section — PLM and digital engineering change · **Owner:** Imane Tazi · **Start:** 2027-08-25 · **End:** 2027-09-24 · **Budget:** 27000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Section 'Digital practices': R L&D Analyst, A Head of L&D, C Consultant PM, S IT, I CHRO (one Accountable only).

When every step is complete, click Complete in the task panel.

Task UFT-33-05 — Select distribution channels · done by Survey Administrator

Input: Stakeholder register → **Output:** Channel plan

Step MP-54.5 — Select distribution channels (L&D Analyst)

Type:

Decision: Approved

Distribution channels: Distribution channels

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-08-20

Decided by: Tarik Lahlou

Then click Complete the step.

Result to record in the task: Channels: MS and MO by Email; OP Face-to-Face with tablets; night shift Hybrid.

When every step is complete, click Complete in the task panel.

Task UFT-33-06 — Distribute questionnaire · done by Survey Administrator

Input: Channel plan → **Output:** Dispatch log

Step MP-54.6 — Distribute to stakeholders (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Distribute to 40 stakeholders; 40 dispatches logged.

When every step is complete, click Complete in the task panel.

Task UFT-33-07 — Send reminders · done by Survey Administrator

Input: Dispatch log → **Output:** Reminder log

Step MP-54.7 — Send reminders on cadence (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Reminder 1 on day 5 to 17 non-respondents; reminder 2 on day 10 to 8.

When every step is complete, click Complete in the task panel.

Task UFT-33-08 — Collect responses · done by Stakeholders

Input: Questionnaire → **Output:** Raw responses

Step MP-54.8 — Collect responses (Stakeholder)

Type:

Row 1 — Responses: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Adil Naciri · **Source:** Audit report

Row 2 — Responses: PLM and digital engineering change · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Yassine Hajji · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Responses register".

Result to record in the task: Responses: 34 collected (22 online, 12 offline synchronised).

When every step is complete, click Complete in the task panel.

Task UFT-33-09 — Validate completeness · done by L&D Analyst

Input: Raw responses → **Output:** Validated responses

Step MP-54.9 — Validate completeness and consent (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Completeness: 31 complete, 3 incomplete flagged.

When every step is complete, click Complete in the task panel.

Task UFT-33-10 — Consolidate responses · done by L&D Analyst

Input: Validated responses → **Output:** Consolidated dataset

Step MP-54.10 — Consolidate responses (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Consolidated dataset: 31 responses, 24 questions, by function and level.

When every step is complete, click Complete in the task panel.

Task UFT-33-11 — Check consent and release dataset · done by L&D Analyst

Input: Consolidated dataset → **Output:** Released dataset

Step MP-54.11 — Feed responses to needs analysis and diagnostic (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-54.12 — Report on response rate and engagement (L&D Analyst)

Type:

Row 1 — On response rate and engagement: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-08-27

Row 2 — On response rate and engagement: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-09-03

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Consent given for 31 of 31 stored responses; release to needs analysis, diagnostic and demand collection.

When every step is complete, click Complete in the task panel.

Task UFT-33-12 — Report on response and engagement · done by L&D Analyst

Input: Dispatch and response logs → **Output:** Response analytics report

Step MP-54.12 — Report on response rate and engagement (L&D Analyst)

Type:

Row 1 — On response rate and engagement: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-08-29

Row 2 — On response rate and engagement: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-09-05

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Response rate 85%; engagement rate 78%; completeness 91% (RPT-034).

When every step is complete, click Complete in the task panel.

E2E-19 — Consulting Engagement-to-Closure

Goal: Manage full consulting engagement lifecycle

Starts when: Client purchase order or engagement request received. **Ends with:** Engagement closed with client acceptance and REX recorded.

Task UFT-19-01 — Register engagement and purchase order · done by Consultant PM

Input: Client purchase order → **Output:** Engagement record

Step MP-36.1 — Register engagement and purchase order (Consultant PM)

Type:

Row 1 — Engagement and purchase order: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Salma Sefrioui · **Source:** HRIS export

Row 2 — Engagement and purchase order: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Ghita Bouzidi · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Engagement and purchase order register".

Result to record in the task: Engagement 'Training engineering 2026 — Atlas Motors Kénitra', PO-CL-221, 45 consulting days.

When every step is complete, click Complete in the task panel.

Task UFT-19-02 — Hold kickoff meeting · done by Consultant PM

Input: Engagement record → **Output:** Kickoff held

Step MP-36.2 — Hold kickoff meeting (Consultant PM)

Type:

Row 1 — Kickoff meeting: MES and digital shop-floor tracking — half-day workshop · **Date:** 2027-02-01 · **Trainer:** Atlas Formation Conseil · **Participants:** 18 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Kickoff meeting: PLM and digital engineering change — half-day workshop · **Date:** 2027-02-08 · **Trainer:** Maghreb Learning Partners · **Participants:** 12 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Kickoff held on 10 February with HR Director, Head of L&D and 4 function heads.

When every step is complete, click Complete in the task panel.

Task UFT-19-03 — Draft meeting minutes · done by Consultant PM

Input: Kickoff held → **Output:** Meeting minutes

Step MP-36.3 — Draft meeting minutes (Consultant PM)

Type:

Row 1 — Meeting minutes: Meeting minutes — MES and digital shop-floor tracking · **Owner:** Loubna Chraibi · **Start:** 2027-01-24 · **End:** 2027-02-23 · **Budget:** 54000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Meeting minutes: Meeting minutes — PLM and digital engineering change · **Owner:** Anas Benjelloun · **Start:** 2027-01-31 · **End:** 2027-03-02 · **Budget:** 29000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Review the AI minutes: 6 decisions, 9 actions, RACSI extracted; correct 1 owner name.

When every step is complete, click Complete in the task panel.

Task UFT-19-04 — Align with client strategy · done by Consultant PM

Input: Meeting minutes → **Output:** Strategic alignment

Step MP-01.1 — Record corporate strategic objectives (Head of L&D)

Type:

Row 1 — Corporate strategic objectives: Raise MES and digital shop-floor tracking proficiency of Operator — Assembly & Production teams to level 3 · **Indicator:** KPI-014 (Report on-time delivery) · **Baseline:** 42 % · **Target:** 78 % · **Deadline:** 2027-07-15 · **Owner:** Anas Benjelloun

Row 2 — Corporate strategic objectives: Certify Supervisor — Assembly & Production staff on PLM and digital engineering change · **Indicator:** KPI-015 (Training record correction rate) · **Baseline:** 31 % · **Target:** 79 % · **Deadline:** 2027-07-22 · **Owner:** Loubna El Idrissi

Row 3 — Corporate strategic objectives: Cut onboarding time on Supplier portal and EDI by 30 % · **Indicator:** KPI-016 (Knowledge reuse rate) · **Baseline:** 39 % · **Target:** 77 % · **Deadline:** 2027-07-29 · **Owner:** Soukaina Berrada

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-01.2 — Link objectives to functions and sites (L&D Strategist)

Type:

Row 1 — Objectives to functions and sites: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Anas Benjelloun · **Source:** Annual performance review

Row 2 — Objectives to functions and sites: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Loubna El Idrissi · **Source:** Audit report

Then click Complete the step. The rows go to the register "Objectives to functions and sites register".

Result to record in the task: Client objectives recorded: MES and digital shop-floor tracking and IATF 16949 compliance for Assembly & Production.

When every step is complete, click Complete in the task panel.

Task UFT-19-05 — Plan engagement work breakdown · done by Consultant PM

Input: Strategic alignment → **Output:** Engagement WBS

Step MP-36.4 — Plan engagement work breakdown (Consultant PM)

Type:

Row 1 — Engagement work breakdown: Engagement work breakdown — MES and digital shop-floor tracking · **Owner:** Loubna El Idrissi · **Start:** 2027-01-28 · **End:** 2027-02-27 · **Budget:** 66000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Engagement work breakdown: Engagement work breakdown — PLM and digital engineering change · **Owner:** Soukaina Berrada · **Start:** 2027-02-04 · **End:** 2027-03-06 · **Budget:** 58000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: WBS: 6 phases, 14 deliverables, Gantt from February to November.

When every step is complete, click Complete in the task panel.

Task UFT-19-06 — Plan change support · done by Change Manager

Input: Engagement WBS → **Output:** Change plan

Step MP-19.1 — Assess change impact (Change Manager)

Type:

Row 1 — Change impact: MES and digital shop-floor tracking · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Change impact: PLM and digital engineering change · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Change impact: Supplier portal and EDI · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-19.2 — Build adoption plan (Change Manager)

Type:

Row 1 — Adoption plan: Adoption plan — MES and digital shop-floor tracking · **Owner:** Soukaina Berrada · **Start:** 2027-01-30 · **End:** 2027-03-01 · **Budget:** 44000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Adoption plan: Adoption plan — PLM and digital engineering change · **Owner:** Ghita Ziani · **Start:** 2027-02-06 · **End:** 2027-03-08 · **Budget:** 31000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Change plan: 3 sponsor messages, champion network, 2 town-halls.

When every step is complete, click Complete in the task panel.

Task UFT-19-07 — Track engagement deliverables · done by Consultant PM

Input: Change plan → **Output:** Deliverable tracker

Step MP-36.5 — Track engagement deliverables (Consultant PM)

Type:

Row 1 — Engagement deliverables: KPI-017 (IDP coverage) · **Period:** 2026-Q3 · **Value:** 92 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — Engagement deliverables: KPI-018 (Mandatory certification compliance) · **Period:** 2026-Q1 · **Value:** 78 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-20.5 — Run periodic quality review (Quality Manager)

Type:

Row 1 — Periodic quality review: MES and digital shop-floor tracking — half-day workshop · **Date:** 2027-02-11 · **Trainer:** Atlas Formation Conseil · **Participants:** 15 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Periodic quality review: PLM and digital engineering change — half-day workshop · **Date:** 2027-02-18 · **Trainer:** Maghreb Learning Partners · **Participants:** 16 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Deliverables: 9 of 14 delivered on time, 1 late (SWOT), 4 planned.

When every step is complete, click Complete in the task panel.

Task UFT-19-08 — Deliver final report and obtain acceptance · done by Consultant PM

Input: Deliverable tracker → **Output:** Client acceptance

Step MP-36.6 — Deliver final report (Consultant PM)

Type:

Row 1 — Final report: MES and digital shop-floor tracking — half-day workshop · **Date:** 2027-02-13 · **Trainer:** Atlas Formation Conseil · **Participants:** 18 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Final report: PLM and digital engineering change — half-day workshop · **Date:** 2027-02-20 · **Trainer:** Maghreb Learning Partners · **Participants:** 20 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-36.7 — Obtain client acceptance (HR Director)

Type:

Row 1 — Client acceptance: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Tarik Lahlou · **Source:** Questionnaire results

Row 2 — Client acceptance: PLM and digital engineering change · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Omar Benjelloun · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Client acceptance register".

Result to record in the task: Final report delivered; acceptance signed by the HR Director on 28 November.

When every step is complete, click Complete in the task panel.

Task UFT-19-09 — Record engagement REX · done by Consultant PM

Input: Client acceptance → **Output:** Engagement REX

Step MP-36.8 — Record engagement REX (Consultant PM)

Type:

Row 1 — Engagement REX: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Omar Benjelloun · **Source:** Annual performance review

Row 2 — Engagement REX: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Sara Lahlou · **Source:** Audit report

Then click Complete the step. The rows go to the register "Engagement REX register".

Step MP-12.6 — Record REX entry (L&D Business Partner)

Type:

Row 1 — REX entry: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Omar Benjelloun · **Source:** Annual performance review

Row 2 — REX entry: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Sara Lahlou · **Source:** Audit report

Then click Complete the step. The rows go to the register "REX entry register".

Step MP-12.5 — Prompt REX at closure (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: REX: went well — stakeholder register; did not — late SWOT inputs; root cause — no function-head backup; rating 4/5.

When every step is complete, click Complete in the task panel.

E2E-24 — Competitive Intelligence-to-Strategy

Goal: Analyze external environment and feed L&D strategy

Starts when: Annual strategy cycle or executive request for market positioning analysis.
Ends with: Validated competitive intelligence report feeding into L&D strategy and organizational diagnostic.

Task UFT-24-01 — Define intelligence scope · done by Strategy Analyst

Input: Strategy docs → **Output:** Scope document

Step MP-43.1 — Define intelligence scope (Strategy Analyst)

Type:

Row 1 — Intelligence scope: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Sara Rami · **Source:** Questionnaire results

Row 2 — Intelligence scope: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Youssef Lahlou · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Intelligence scope register".

Result to record in the task: Scope: Automotive market in Morocco and export markets; horizon 3 years; focus on MES and digital shop-floor tracking and PLM and digital engineering change.

When every step is complete, click Complete in the task panel.

Task UFT-24-02 — Conduct Porter's Five Forces · done by Strategy Analyst

Input: Market data → **Output:** Porter report

Step MP-43.2 — Conduct Porter's Five Forces analysis (Strategy Analyst)

Type:

Row 1 — Porter's Five Forces analysis: MES and digital shop-floor tracking — half-day workshop · **Date:** 2027-04-26 · **Trainer:** Atlas Formation Conseil · **Participants:** 11 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Porter's Five Forces analysis: PLM and digital engineering change — half-day workshop · **Date:** 2027-05-03 · **Trainer:** Maghreb Learning Partners · **Participants:** 19 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Rivalry 4/5; new entrants 3/5; substitutes 2/5; supplier power 3/5; buyer power 4/5.

When every step is complete, click Complete in the task panel.

Task UFT-24-03 — Map market segments · done by Market Analyst

Input: Market data → **Output:** Segment map

Step MP-43.3 — Map market segments (Market Analyst)

Type:

Row 1 — Market segments: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Ayoub Ziani · **Source:** Audit report

Row 2 — Market segments: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Meryem Lahlou · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Market segments register".

Result to record in the task: Segments: key accounts (55% revenue), resellers (30%), direct small customers (15%).

When every step is complete, click Complete in the task panel.

Task UFT-24-04 — Analyze competitor positioning · done by Market Analyst

Input: Competitor data → **Output:** Competitor benchmark

Step MP-43.4 — Analyze competitor positioning (Market Analyst)

Type:

Row 1 — Competitor positioning: MES and digital shop-floor tracking · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Competitor positioning: PLM and digital engineering change · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Competitor positioning: Supplier portal and EDI · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 3 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Competitor A leads on MES and digital shop-floor tracking; competitor B cheaper but weaker on IATF 16949.

When every step is complete, click Complete in the task panel.

Task UFT-24-05 — Monitor regulatory and technology trends · done by Regulatory Analyst

Input: Regulations → **Output:** Trend report

Step MP-43.5 — Monitor regulatory changes (Regulatory Analyst)

Type:

Row 1 — Regulatory changes: KPI-017 (IDP coverage) · **Period:** 2026-Q1 · **Value:** 55 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Regulatory changes: KPI-018 (Mandatory certification compliance) · **Period:** 2026-Q2 · **Value:** 95 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-43.6 — Track technology trends (Strategy Analyst)

Type:

Row 1 — Technology trends: KPI-017 (IDP coverage) · **Period:** 2026-Q1 · **Value:** 71 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Technology trends: KPI-018 (Mandatory certification compliance) · **Period:** 2026-Q2 · **Value:** 87 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-43.7 — Benchmark against industry (Strategy Analyst)

Type:

Row 1 — Against industry: MES and digital shop-floor tracking · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Against industry: PLM and digital engineering change · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Against industry: Supplier portal and EDI · **Criterion:** Cost · **Weight (%):** 20 · **Score (1–5):** 2 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Trends: revision of IATF 16949 expected next year; fast growth of Supplier portal and EDI.

When every step is complete, click Complete in the task panel.

Task UFT-24-06 — Identify L&D implications · done by L&D Strategist

Input: All findings → **Output:** L&D implications

Step MP-43.8 — Identify strategic implications for L&D (L&D Strategist)

Type:

Row 1 — Strategic implications for L&D: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hajar Bouzidi · **Source:** Questionnaire results

Row 2 — Strategic implications for L&D: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Imane Tazi · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Strategic implications for L&D register".

Result to record in the task: L&D implication: build MES and digital shop-floor tracking skills for key-account teams before competitor A scales.

When every step is complete, click Complete in the task panel.

Task UFT-24-07 — Publish intelligence report · done by Strategy Analyst

Input: All outputs → **Output:** Intelligence report

Step MP-43.9 — Produce intelligence report (Strategy Analyst)

Type:

Row 1 — Intelligence report: Intelligence report — MES and digital shop-floor tracking · **Owner:** Imane Tazi · **Start:** 2027-04-26 · **End:** 2027-05-26 · **Budget:** 39000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Intelligence report: Intelligence report — PLM and digital engineering change · **Owner:** Hicham Rami · **Start:** 2027-05-03 · **End:** 2027-06-02 · **Budget:** 47000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-43.10 — Feed intelligence into strategy and diagnostic (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-43.11 — Update intelligence continuously (Strategy Analyst)

Type:

Intelligence continuously: Intelligence continuously

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-05-11

Then click Complete the step.

Step MP-43.12 — Report to executive leadership (Head of Strategy)

Type:

Row 1 — Executive leadership: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-04-21

Row 2 — Executive leadership: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-04-28

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish RPT-007 Competitive Intelligence Report to the executive committee.

When every step is complete, click Complete in the task panel.

Gate G1 — G1 — Scope & evidence approved: close the phase

1. Open the project workspace and click the gate button of the phase.
1. Tick each checklist item once its evidence is attached, then click Submit for decision.
1. Click Go. Type the justification: All mandatory items met; evidence attached.

1. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

Phase 2 — Diagnosis

E2E-20 — Multi-Axis Diagnostic-to-Maturity Report

Goal: Conduct 5-axis diagnostic + CMM maturity + leadership assessment

Starts when: Engagement kickoff or approved Scope of Work requesting a diagnostic. **Ends with:** 5-axis diagnostic, CMM maturity and leadership maturity report validated with the sponsor.

Task UFT-20-01 — Define diagnostic axes and sample · done by Consultant PM

Input: Approved Scope of Work → **Output:** Axes and sample

Step MP-37.1 — Define diagnostic axes and sample (Consultant PM)

Type:

Row 1 — Diagnostic axes and sample: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Sara Lahlou · **Source:** Audit report

Row 2 — Diagnostic axes and sample: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Zineb Lahlou · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Diagnostic axes and sample register".

Result to record in the task: Axes: strategy, organization, processes, people, information systems. Sample: 40 people (MS 8, MO 16, OP 16).

When every step is complete, click Complete in the task panel.

Task UFT-20-02 — Deploy diagnostic questionnaire · done by Consultant PM

Input: Axes and sample → **Output:** Questionnaire responses

Step MP-37.2 — Deploy diagnostic questionnaire (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-37.4 — Collect questionnaire responses (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Diagnostic questionnaire deployed to 40 people; 34 responses (85%).

When every step is complete, click Complete in the task panel.

Task UFT-20-03 — Conduct semi-structured interviews · done by Consultant

Input: Axes and sample → **Output:** Interview findings

Step MP-37.3 — Conduct semi-structured interviews (Consultant)

Type:

Row 1 — Semi-structured interviews: MES and digital shop-floor tracking — half-day workshop · **Date:** 2027-02-21 · **Trainer:** Atlas Formation Conseil · **Participants:** 14 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Semi-structured interviews: PLM and digital engineering change — half-day workshop · **Date:** 2027-02-28 · **Trainer:** Maghreb Learning Partners · **Participants:** 20 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Interview notes (OP, Assembly & Production): 'Procedures exist but are not updated since 2023.'

When every step is complete, click Complete in the task panel.

Task UFT-20-04 — Score diagnostic axes · done by Consultant

Input: Interview findings, responses → **Output:** Axis scores

Step MP-37.5 — Score diagnostic axes (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Axis scores (1-5): strategy 3.4, organization 2.8, processes 2.6, people 3.1, IS 2.2.

When every step is complete, click Complete in the task panel.

Task UFT-20-05 — Select maturity model · done by Consultant

Input: Axis scores → **Output:** Maturity model

Step MP-38.1 — Select maturity model levels (Consultant)

Type:

Decision: Approved

Maturity model levels: Maturity model levels

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-03-01

Decided by: Tarik Lahlou

Then click Complete the step.

Step MP-38.2 — Define evidence criteria per level (Consultant)

Type:

Row 1 — Evidence criteria per level: Raise MES and digital shop-floor tracking proficiency of Operator — Assembly & Production teams to level 3 · **Indicator:** KPI-004 (Training Engineering Report cycle time) · **Baseline:** 45 % · **Target:** 77 % · **Deadline:** 2027-08-04 · **Owner:** Sara Rami

Row 2 — Evidence criteria per level: Certify Supervisor — Assembly & Production staff on PLM and digital engineering change · **Indicator:** KPI-005 (Design approval lead time) · **Baseline:** 40 % · **Target:** 86 % · **Deadline:** 2027-08-11 · **Owner:** Youssef Lahlou

Row 3 — Evidence criteria per level: Cut onboarding time on Supplier portal and EDI by 30 % · **Indicator:** KPI-006 (License Compliance %) · **Baseline:** 38 % · **Target:** 84 % · **Deadline:** 2027-08-18 · **Owner:** Ayoub Ziani

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Maturity model: CMM 5 levels; evidence for level 3 = documented and applied process.

When every step is complete, click Complete in the task panel.

Task UFT-20-06 — Rate process maturity · done by Consultant

Input: Maturity model → **Output:** Maturity profile

Step MP-38.3 — Rate maturity per process area (Consultant)

Type:

Row 1 — Maturity per process area: MES and digital shop-floor tracking · **Criterion:** Risk · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Maturity per process area: PLM and digital engineering change · **Criterion:** Business impact · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Maturity per process area: Supplier portal and EDI · **Criterion:** Urgency · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-38.4 — Compute maturity profile (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Maturity: training management level 2; Assembly & Production processes level 3.

When every step is complete, click Complete in the task panel.

Task UFT-20-07 — Assess leadership maturity · done by HR Business Partner

Input: Maturity profile → **Output:** Leadership maturity

Step MP-42.1 — Launch leadership 360 assessment (HR Business Partner)

Type:

Row 1 — Leadership 360 assessment: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-02-14

Row 2 — Leadership 360 assessment: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-02-21

Then click Complete the step. The rows go to the register "Communications log".

Step MP-42.2 — Compute leadership maturity level (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Leadership 360: average level 3 (Team Leadership) across 18 managers.

When every step is complete, click Complete in the task panel.

Task UFT-20-08 — Cross-check skills and needs · done by L&D Analyst

Input: Leadership maturity → **Output:** Consolidated evidence

Step MP-02.7 — Validate skills inventory (Head of L&D)

Type:

Decision: Approved

Skills inventory: Skills inventory

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-02-21

Decided by: Tarik Lahlou

Then click Complete the step.

Step MP-03.2 — Review gap matrix by site and function (L&D Analyst)

Type:

Gap matrix by site and function: Gap matrix by site and function

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-02-22

Then click Complete the step.

Result to record in the task: Cross-check: IS axis weakness confirmed by the MES and digital shop-floor tracking gap (-1.4).

When every step is complete, click Complete in the task panel.

Task UFT-20-09 — Draft diagnostic findings · done by Consultant

Input: Consolidated evidence → **Output:** Draft findings

Step MP-37.6 — Draft diagnostic findings (Consultant)

Type:

Row 1 — Diagnostic findings: Diagnostic findings — MES and digital shop-floor tracking · **Owner:** Yassine Bouzidi · **Start:** 2027-02-23 · **End:** 2027-03-25 · **Budget:** 44000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Diagnostic findings: Diagnostic findings — PLM and digital engineering change · **Owner:** Hajar Bouzidi · **Start:** 2027-03-02 · **End:** 2027-04-01 · **Budget:** 70000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-38.5 — Produce maturity report (Consultant PM)

Type:

Row 1 — Maturity report: Maturity report — MES and digital shop-floor tracking · **Owner:** Yassine Bouzidi · **Start:** 2027-02-23 · **End:** 2027-03-25 · **Budget:** 50000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Maturity report: Maturity report — PLM and digital engineering change · **Owner:** Hajar Bouzidi · **Start:** 2027-03-02 · **End:** 2027-04-01 · **Budget:** 41000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Edit AI findings: keep 5, merge 2, add one on IATF 16949 documentation.

When every step is complete, click Complete in the task panel.

Task UFT-20-10 — Validate findings with sponsor · done by Consultant PM

Input: Draft findings → **Output:** Diagnostic & maturity report

Step MP-37.7 — Validate findings with sponsor (Consultant PM)

Type:

Decision: Approved

Findings with sponsor: Findings with sponsor

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-03-11

Decided by: Tarik Lahlou

Then click Complete the step.

Step MP-38.6 — Agree target maturity (HR Director)

Type:

Decision: Approved

Target maturity: Target maturity

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-03-11

Decided by: Tarik Lahlou

Then click Complete the step.

Result to record in the task: Findings validated with the sponsor; target maturity level 3 by 2026+1.

When every step is complete, click Complete in the task panel.

E2E-25 — Job Architecture-to-Competency Map

Goal: Manage organizational charts, position descriptions, gap analysis

Starts when: Organizational change, new role creation, or annual job architecture review.

Ends with: Approved organizational charts, position descriptions, and competency maps with gap analysis.

Task UFT-25-01 — Map organizational structure · done by HR Analyst

Input: Org data → **Output:** Structure map

Step MP-44.1 — Map organizational structure (HR Analyst)

Type:

Row 1 — Organizational structure: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hicham Rami · **Source:** Audit report

Row 2 — Organizational structure: PLM and digital engineering change · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hajar Mansouri · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Organizational structure register".

Result to record in the task: Structure: 6 functions, 14 departments, 3 sites; 212 positions.

When every step is complete, click Complete in the task panel.

Task UFT-25-02 — Design organizational charts · done by Org Design Consultant

Input: Structure map → **Output:** Org charts

Step MP-44.2 — Design organizational charts (Org Design Consultant)

Type:

Row 1 — Organizational charts: Organizational charts — MES and digital shop-floor tracking · **Owner:** Hajar Mansouri · **Start:** 2027-04-30 · **End:** 2027-05-30 · **Budget:** 40000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Organizational charts: Organizational charts — PLM and digital engineering change · **Owner:** Adil Naciri · **Start:** 2027-05-07 · **End:** 2027-06-06 · **Budget:** 71000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Org chart 'Assembly & Production': director → 3 managers → 9 supervisors → operators.

When every step is complete, click Complete in the task panel.

Task UFT-25-03 — Conduct job analysis · done by Job Analyst

Input: Org charts → **Output:** Job analysis

Step MP-44.3 — Conduct job analysis (Job Analyst)

Type:

Row 1 — Job analysis: MES and digital shop-floor tracking — half-day workshop · **Date:** 2027-05-12 · **Trainer:** Atlas Formation Conseil · **Participants:** 14 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Job analysis: PLM and digital engineering change — half-day workshop · **Date:** 2027-05-19 · **Trainer:** Maghreb Learning Partners · **Participants:** 12 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Job analysis 'Assembly & Production supervisor': 8 main activities, 2 of them now supported by MES and digital shop-floor tracking.

When every step is complete, click Complete in the task panel.

Task UFT-25-04 — Draft position descriptions · done by Job Analyst

Input: Job analysis → **Output:** Draft descriptions

Step MP-44.4 — Draft position descriptions (Job Analyst)

Type:

Row 1 — Position descriptions: Position descriptions — MES and digital shop-floor tracking · **Owner:** Yassine Hajji · **Start:** 2027-05-04 · **End:** 2027-06-03 · **Budget:** 69000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Position descriptions: Position descriptions — PLM and digital engineering change · **Owner:** Zineb Rami · **Start:** 2027-05-11 · **End:** 2027-06-10 · **Budget:** 57000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Position description drafted: mission, activities, competencies (MES and digital shop-floor tracking level 3, IATF 16949 level 3), KPIs.

When every step is complete, click Complete in the task panel.

Task UFT-25-05 — Validate with managers · done by HR Business Partner

Input: Draft descriptions → **Output:** Validated descriptions

Step MP-44.5 — Validate descriptions with managers (HR Business Partner)

Type:

Decision: Approved

Descriptions with managers: Descriptions with managers

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-05-20

Decided by: Tarik Lahlou

Then click Complete the step.

Result to record in the task: Validated by the Assembly & Production manager with 2 changes on activities.

When every step is complete, click Complete in the task panel.

Task UFT-25-06 — Conduct gap analysis · done by Job Analyst

Input: Validated descriptions → **Output:** Gap analysis

Step MP-44.6 — Conduct gap analysis existing versus real (Job Analyst)

Type:

Row 1 — Gap analysis existing versus real: MES and digital shop-floor tracking — half-day workshop · **Date:** 2027-05-18 · **Trainer:** Atlas Formation Conseil · **Participants:** 12 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Gap analysis existing versus real: PLM and digital engineering change — half-day workshop · **Date:** 2027-05-25 · **Trainer:** Maghreb Learning Partners · **Participants:** 12 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Gap existing vs real: 11 descriptions outdated; 4 roles with new MES and digital shop-floor tracking tasks.

When every step is complete, click Complete in the task panel.

Task UFT-25-07 — Identify roles to develop · done by HR Business Partner

Input: Gap analysis → **Output:** Roles to develop

Step MP-44.7 — Identify roles to develop (HR Business Partner)

Type:

Row 1 — Roles to develop: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Ayoub Bennani · **Source:** HRIS export

Row 2 — Roles to develop: PLM and digital engineering change · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Salma Sefrioui · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Roles to develop register".

Step MP-44.8 — Update job architecture (Job Analyst)

Type:

Job architecture: Job architecture

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-05-04

Then click Complete the step.

Step MP-44.9 — Align with competency framework (Job Analyst)

Type:

Row 1 — With competency framework: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Ayoub Bennani · **Source:** HRIS export

Row 2 — With competency framework: PLM and digital engineering change · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Salma Sefrioui · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "With competency framework register".

Result to record in the task: Roles 'To develop': data-literate supervisor, maintenance technician 4.0.

When every step is complete, click Complete in the task panel.

Task UFT-25-08 — Publish approved architecture · done by HR Director

Input: All outputs → **Output:** Approved architecture

Step MP-44.10 — Publish approved position descriptions (HR Director)

Type:

Row 1 — Approved position descriptions: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-05-07

Row 2 — Approved position descriptions: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-05-14

Then click Complete the step. The rows go to the register "Communications log".

Step MP-44.11 — Track job architecture changes (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-44.12 — Report on architecture health (HR Director)

Type:

Row 1 — On architecture health: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-05-07

Row 2 — On architecture health: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers ·

Channel: WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-05-14

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish 212 approved descriptions and the architecture map to all employees.

When every step is complete, click Complete in the task panel.

E2E-26 — GPEC-to-Training Plan

Goal: Integrate Forward Planning of Jobs and Skills into L&D

Starts when: Annual HR strategic planning cycle or GPEC (Forward Planning of Jobs and Skills) review. **Ends with:** Training plan aligned with GPEC and HR strategic orientations.

Task UFT-26-01 — Define GPEC scope · done by GPEC Specialist

Input: HR strategy → **Output:** GPEC scope

Step MP-45.1 — Define GPEC scope (GPEC Specialist)

Type:

Row 1 — GPEC scope: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hajar Benjelloun · **Source:** Questionnaire results

Row 2 — GPEC scope: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Salma Sefrioui · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "GPEC scope register".

Result to record in the task: GPEC scope: Assembly & Production and Information Systems jobs; horizon 3 years.

When every step is complete, click Complete in the task panel.

Task UFT-26-02 — Map HR strategic orientations · done by HR Director

Input: Strategy docs → **Output:** Orientation map

Step MP-45.2 — Map HR strategic orientations (HR Director)

Type:

Row 1 — HR strategic orientations: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Salma Sefrioui · **Source:** Annual performance review

Row 2 — HR strategic orientations: PLM and digital engineering change · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Ghita Bouzidi · **Source:** Audit report

Then click Complete the step. The rows go to the register "HR strategic orientations register".

Step MP-45.3 — Align training with GPEC (L&D Strategist)

Type:

Row 1 — Training with GPEC: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Salma Sefrioui · **Source:** Annual performance review

Row 2 — Training with GPEC: PLM and digital engineering change · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Ghita Bouzidi · **Source:** Audit report

Then click Complete the step. The rows go to the register "Training with GPEC register".

Result to record in the task: HR orientations: internal mobility first; 30% of promotions from internal talent.

When every step is complete, click Complete in the task panel.

Task UFT-26-03 — Update development foundation · done by HR Business Partner

Input: Position descriptions → **Output:** Updated foundation

Step MP-45.4 — Update development foundation (HR Business Partner)

Type:

Development foundation: Development foundation

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-06-09

Then click Complete the step.

Step MP-45.5 — Support human capital development (HR Director)

Type:

Row 1 — Human capital development: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Ghita Bouzidi · **Source:** Audit report

Row 2 — Human capital development: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Loubna Chraibi · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Human capital development register".

Result to record in the task: Development foundation updated: descriptions, annual objectives, evaluation grid.

When every step is complete, click Complete in the task panel.

Task UFT-26-04 — Update Jobs and Skills Directory (REC) · done by GPEC Specialist

Input: Job data → **Output:** Updated REC

Step MP-45.6 — Update Jobs and Skills Directory (REC) (GPEC Specialist)

Type:

Jobs and Skills Directory (REC): Jobs and Skills Directory (REC)

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-05-14

Then click Complete the step.

Result to record in the task: REC updated: 42 jobs, 3 new jobs linked to MES and digital shop-floor tracking.

When every step is complete, click Complete in the task panel.

Task UFT-26-05 — Redynamize periodic evaluations · done by HR Business Partner

Input: Eval system → **Output:** Eval updates

Step MP-45.7 — Redynamize periodic evaluations (HR Business Partner)

Type:

Row 1 — Periodic evaluations: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Anas Benjelloun · **Source:** Interview with the function head

Row 2 — Periodic evaluations: PLM and digital engineering change · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Loubna El Idrissi · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Periodic evaluations register".

Result to record in the task: Periodic evaluation redesigned: 2 reviews per year, competency section added.

When every step is complete, click Complete in the task panel.

Task UFT-26-06 — Design career paths · done by HR Director

Input: Job architecture → **Output:** Career paths

Step MP-45.8 — Design career paths (HR Director)

Type:

Row 1 — Career paths: Career paths — MES and digital shop-floor tracking · **Owner:** Loubna El Idrissi · **Start:** 2027-05-24 · **End:** 2027-06-23 · **Budget:** 21000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Career paths: Career paths — PLM and digital engineering change · **Owner:** Soukaina Berrada · **Start:** 2027-05-31 · **End:** 2027-06-30 · **Budget:** 34000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Career path: operator → team leader → supervisor → Assembly & Production manager.

When every step is complete, click Complete in the task panel.

Task UFT-26-07 — Document career management · done by HR Director

Input: Career paths → **Output:** Career process doc

Step MP-45.9 — Document career management process (HR Director)

Type:

Row 1 — Career management process: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Soukaina Berrada · **Source:** Annual performance review

Row 2 — Career management process: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Ghita Ziani · **Source:** Audit report

Then click Complete the step. The rows go to the register "Career management process register".

Step MP-45.10 — Implement collective compensation (HR Director)

Type:

Row 1 — Collective compensation: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Soukaina Berrada · **Source:** Annual performance review

Row 2 — Collective compensation: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Ghita Ziani · **Source:** Audit report

Then click Complete the step. The rows go to the register "Collective compensation register".

Result to record in the task: Career management procedure documented (v1): eligibility, committee, calendar.

When every step is complete, click Complete in the task panel.

Task UFT-26-08 — Align training with GPEC · done by L&D Strategist

Input: GPEC outputs → **Output:** Training-GPEC alignment

Step MP-45.11 — Feed GPEC into training needs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-45.12 — Report on GPEC integration (GPEC Specialist)

Type:

Row 1 — On GPEC integration: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-05-23

Row 2 — On GPEC integration: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-05-30

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Training aligned with GPEC: 4 themes cover the 3 new jobs; 2 themes removed.

When every step is complete, click Complete in the task panel.

E2E-27 — Demand Collection-to-Consolidation

Goal: Collect individual and collective training demands

Starts when: Annual training plan cycle or ad-hoc demand collection request. **Ends with:** Consolidated and prioritized demand repository integrated into the training needs analysis.

Task UFT-27-01 — Design demand collection forms · done by L&D Analyst

Input: Templates → **Output:** Forms

Step MP-46.1 — Design demand collection forms (L&D Analyst)

Type:

Row 1 — Demand collection forms: Demand collection forms — MES and digital shop-floor tracking · **Owner:** Tarik Lahlou · **Start:** 2027-05-30 · **End:** 2027-06-29 · **Budget:** 20000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Demand collection forms: Demand collection forms — PLM and digital engineering change · **Owner:** Omar Benjelloun · **Start:** 2027-06-06 · **End:** 2027-07-06 · **Budget:** 56000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Forms: individual form (5 questions) and collective form per team (3 questions).

When every step is complete, click Complete in the task panel.

Task UFT-27-02 — Deploy individual demand collection · done by L&D Analyst

Input: Forms → **Output:** Individual demands

Step MP-46.2 — Deploy individual demand collection (L&D Analyst)

Type:

Row 1 — Individual demand collection: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Individual demand collection: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Individual collection open 1-20 March; 146 demands received.

When every step is complete, click Complete in the task panel.

Task UFT-27-03 — Deploy collective demand collection · done by L&D Analyst

Input: Forms → **Output:** Collective demands

Step MP-46.3 — Deploy collective demand collection (L&D Analyst)

Type:

Row 1 — Collective demand collection: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Collective demand collection: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Collective collection: 18 team demands received.

When every step is complete, click Complete in the task panel.

Task UFT-27-04 — Collect manager recommendations · done by L&D Business Partner

Input: Managers → **Output:** Recommendations

Step MP-46.4 — Collect manager recommendations (L&D Business Partner)

Type:

Row 1 — Manager recommendations: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Zineb Lahlou · **Source:** Annual performance review

Row 2 — Manager recommendations: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Leila Rami · **Source:** Audit report

Then click Complete the step. The rows go to the register "Manager recommendations register".

Result to record in the task: Manager recommendations: 24 received, 9 flagged as priority.

When every step is complete, click Complete in the task panel.

Task UFT-27-05 — Consolidate demands by function · done by L&D Analyst

Input: Demands → **Output:** Consolidated demands

Step MP-46.5 — Consolidate demands by function (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Consolidated: Assembly & Production 64 demands, Operations 41, Quality 22, others 37.

When every step is complete, click Complete in the task panel.

Task UFT-27-06 — Map demands to competencies · done by L&D Analyst

Input: Consolidated demands → **Output:** Demand-competency map

Step MP-46.6 — Map demands to competencies (L&D Analyst)

Type:

Row 1 — Demands to competencies: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Rachid Amrani · **Source:** HRIS export

Row 2 — Demands to competencies: PLM and digital engineering change · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Sara Rami · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Demands to competencies register".

Step MP-46.7 — Prioritize demands (L&D Business Partner)

Type:

Row 1 — Demands: MES and digital shop-floor tracking · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Demands: PLM and digital engineering change · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Demands: Supplier portal and EDI · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 2 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Accept AI mapping for 139 demands; map 7 manually to 'PLM and digital engineering change'.

When every step is complete, click Complete in the task panel.

Task UFT-27-07 — Prioritize and validate demands · done by L&D Business Partner

Input: Demand map → **Output:** Validated demands

Step MP-46.8 — Validate demands with managers (L&D Business Partner)

Type:

Decision: Approved

Demands with managers: Demands with managers

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-06-11

Decided by: Tarik Lahlou

Then click Complete the step.

Step MP-46.9 — Integrate demands into needs analysis (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-46.10 — Report on demand patterns (L&D Analyst)

Type:

Row 1 — On demand patterns: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-06-06

Row 2 — On demand patterns: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-06-13

Then click Complete the step. The rows go to the register "Communications log".

Step MP-46.11 — Track demand fulfillment (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-46.12 — Improve demand collection (L&D Analyst)

Type:

Demand collection: Demand collection

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-06-12

Then click Complete the step.

Result to record in the task: Validated: 112 demands (High 38, Medium 51, Low 23); 34 rejected with reason.

When every step is complete, click Complete in the task panel.

E2E-28 — Performance Assessment-to-RAG Dashboard

Goal: Assess MS/MO/OP performance with RAG ratings

Starts when: Annual performance cycle or management request for performance visualization. **Ends with:** Validated MS/MO/OP (Strategic Management / Operational Management / Operational Level) performance assessment with RAG (Green/Amber/Red) dashboards.

Task UFT-28-01 — Define MS/MO/OP framework · done by Performance Analyst

Input: Strategy docs → **Output:** Framework

Step MP-47.1 — Define MS/MO/OP framework (Performance Analyst)

Type:

Row 1 — MS/MO/OP framework: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Youssef Lahlou · **Source:** Questionnaire results

Row 2 — MS/MO/OP framework: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Ayoub Ziani · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "MS/MO/OP framework register".

Result to record in the task: MS = executive committee; MO = managers and supervisors; OP = operators and technicians.

When every step is complete, click Complete in the task panel.

Task UFT-28-02 — Define RAG criteria · done by Performance Analyst

Input: Framework → **Output:** RAG criteria

Step MP-47.2 — Define RAG criteria (Performance Analyst)

Type:

Row 1 — RAG criteria: Raise MES and digital shop-floor tracking proficiency of Operator — Assembly & Production teams to level 3 · **Indicator:** KPI-004 (Training Engineering Report cycle time) · **Baseline:** 50 % · **Target:** 83 % · **Deadline:** 2027-12-02 · **Owner:** Ayoub Ziani

Row 2 — RAG criteria: Certify Supervisor — Assembly & Production staff on PLM and digital engineering change · **Indicator:** KPI-005 (Design approval lead time) · **Baseline:** 36 % · **Target:** 78 % · **Deadline:** 2027-12-09 · **Owner:** Meryem Lahlou

Row 3 — RAG criteria: Cut onboarding time on Supplier portal and EDI by 30 % · **Indicator:** KPI-006 (License Compliance %) · **Baseline:** 39 % · **Target:** 87 % · **Deadline:** 2027-12-16 · **Owner:** Yassine Bouzidi

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Green ≥ 90% of target; Amber 70-89%; Red < 70%.

When every step is complete, click Complete in the task panel.

Task UFT-28-03 — Collect performance data by function · done by Performance Analyst

Input: Function data → **Output:** Data set

Step MP-47.3 — Collect performance data by function (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Data collected for 6 functions: 18 KPIs, last 12 months.

When every step is complete, click Complete in the task panel.

Task UFT-28-04 — Assess MS performance · done by Performance Analyst

Input: Data set → **Output:** MS assessment

Step MP-47.4 — Assess MS performance (Performance Analyst)

Type:

Row 1 — MS performance: MES and digital shop-floor tracking · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — MS performance: PLM and digital engineering change · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 5 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — MS performance: Supplier portal and EDI · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 2 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: MS: strategy deployment Amber (78%); governance Green (92%).

When every step is complete, click Complete in the task panel.

Task UFT-28-05 — Assess MO performance · done by Performance Analyst

Input: Data set → **Output:** MO assessment

Step MP-47.5 — Assess MO performance (Performance Analyst)

Type:

Row 1 — MO performance: MES and digital shop-floor tracking · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — MO performance: PLM and digital engineering change · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — MO performance: Supplier portal and EDI · **Criterion:** Cost · **Weight (%):** 20 · **Score (1–5):** 3 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: MO: Assembly & Production team management Red (64%); planning Amber (81%).

When every step is complete, click Complete in the task panel.

Task UFT-28-06 — Assess OP performance · done by Performance Analyst

Input: Data set → **Output:** OP assessment

Step MP-47.6 — Assess OP performance (Performance Analyst)

Type:

Row 1 — OP performance: MES and digital shop-floor tracking · **Criterion:** Feasibility · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — OP performance: PLM and digital engineering change · **Criterion:** Cost · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — OP performance: Supplier portal and EDI · **Criterion:** Risk · **Weight (%):** 20 · **Score (1–5):** 2 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-47.7 — Apply RAG ratings (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: OP: IATF 16949 compliance Amber (85%); productivity Green (93%).

When every step is complete, click Complete in the task panel.

Task UFT-28-07 — Publish RAG dashboard · done by Performance Analyst

Input: All assessments → **Output:** RAG dashboard

Step MP-47.8 — Visualize performance dashboards (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-47.9 — Identify performance gaps (Performance Analyst)

Type:

Row 1 — Performance gaps: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hicham Rami · **Source:** Annual performance review

Row 2 — Performance gaps: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hajar Mansouri · **Source:** Audit report

Then click Complete the step. The rows go to the register "Performance gaps register".

Step MP-47.10 — Feed performance into diagnostic report (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-47.11 — Track performance progression (Performance Analyst)

Type:

Row 1 — Performance progression: KPI-009 (Plan realization rate) · **Period:** 2026-Q3 · **Value:** 67 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Performance progression: KPI-010 (Learner completion rate) · **Period:** 2026-Q1 · **Value:** 85 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-47.12 — Report performance to leadership (Performance Analyst)

Type:

Row 1 — Performance to leadership: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-06-20

Row 2 — Performance to leadership: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-06-27

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish RPT-005 MS/MO/OP RAG dashboard to the executive committee.

When every step is complete, click Complete in the task panel.

E2E-29 — Functional SWOT-to-Improvement Axes

Goal: Conduct function-level SWOT and define improvement axes

Starts when: Diagnostic phase of a training engineering engagement or annual functional review. **Ends with:** Validated functional SWOT reports with prioritized improvement axes per function.

Task UFT-29-01 — Define function scope · done by L&D Analyst

Input: Org data → **Output:** Scope

Step MP-48.1 — Define function scope (L&D Analyst)

Type:

Row 1 — Function scope: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hajar Mansouri · **Source:** Audit report

Row 2 — Function scope: PLM and digital engineering change · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Adil Naciri · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Function scope register".

Result to record in the task: Function in scope: Assembly & Production (3 sites, 96 people).

When every step is complete, click Complete in the task panel.

Task UFT-29-02 — Conduct function SWOT · done by L&D Analyst

Input: Function data → **Output:** SWOT

Step MP-48.2 — Conduct function SWOT (L&D Analyst)

Type:

Row 1 — Function SWOT: MES and digital shop-floor tracking — half-day workshop · **Date:** 2027-07-09 · **Trainer:** Atlas Formation Conseil · **Participants:** 18 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Function SWOT: PLM and digital engineering change — half-day workshop · **Date:** 2027-07-16 · **Trainer:** Maghreb Learning Partners · **Participants:** 12 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: SWOT workshop held with the function head and 6 supervisors.

When every step is complete, click Complete in the task panel.

Task UFT-29-03 — Identify strengths and weaknesses · done by L&D Analyst

Input: Interview data → **Output:** Internal factors

Step MP-48.3 — Identify strengths (L&D Analyst)

Type:

Row 1 — Strengths: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Yassine Hajji · **Source:** Interview with the function head

Row 2 — Strengths: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Zineb Rami · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Strengths register".

Step MP-48.4 — Identify weaknesses (L&D Analyst)

Type:

Row 1 — Weaknesses: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Yassine Hajji · **Source:** Interview with the function head

Row 2 — Weaknesses: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Zineb Rami · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Weaknesses register".

Result to record in the task: Strength: experienced team. Weakness: low MES and digital shop-floor tracking usage, paper records.

When every step is complete, click Complete in the task panel.

Task UFT-29-04 — Identify opportunities and threats · done by L&D Analyst

Input: Market data → **Output:** External factors

Step MP-48.5 — Identify opportunities (L&D Analyst)

Type:

Row 1 — Opportunities: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Zineb Rami · **Source:** Questionnaire results

Row 2 — Opportunities: PLM and digital engineering change · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Leila Sefrioui · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Opportunities register".

Step MP-48.6 — Identify threats (L&D Analyst)

Type:

Row 1 — Threats: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Zineb Rami · **Source:** Questionnaire results

Row 2 — Threats: PLM and digital engineering change · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Leila Sefrioui · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Threats register".

Result to record in the task: Opportunity: Supplier portal and EDI. Threat: stricter IATF 16949 audits.

When every step is complete, click Complete in the task panel.

Task UFT-29-05 — Define improvement axes · done by L&D Business Partner

Input: SWOT → **Output:** Improvement axes

Step MP-48.7 — Define improvement axes (L&D Business Partner)

Type:

Row 1 — Improvement axes: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Leila Sefrioui · **Source:** Annual performance review

Row 2 — Improvement axes: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Ayoub Bennani · **Source:** Audit report

Then click Complete the step. The rows go to the register "Improvement axes register".

Result to record in the task: Axis 1: digitalise shift records with MES and digital shop-floor tracking. Axis 2: certify supervisors on IATF 16949.

When every step is complete, click Complete in the task panel.

Task UFT-29-06 — Validate with function heads · done by L&D Business Partner

Input: Improvement axes → **Output:** Validated axes

Step MP-48.8 — Validate axes with function heads (L&D Business Partner)

Type:

Decision: Approved with conditions

Axes with function heads: Axes with function heads

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2027-07-28

Decided by: Tarik Lahlou

Then click Complete the step.

Result to record in the task: Validated by the function head on 18 April; axis 2 deadline moved to Q3.

When every step is complete, click Complete in the task panel.

Task UFT-29-07 — Prioritize improvement axes · done by L&D Strategist

Input: Validated axes → **Output:** Prioritized axes

Step MP-48.9 — Prioritize improvement axes (L&D Strategist)

Type:

Row 1 — Improvement axes: MES and digital shop-floor tracking · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Improvement axes: PLM and digital engineering change · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 5 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Improvement axes: Supplier portal and EDI · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 4 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-48.10 — Feed SWOT into diagnostic report (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-48.11 — Track improvement implementation (L&D Business Partner)

Type:

Row 1 — Improvement implementation: KPI-016 (Knowledge reuse rate) · **Period:** 2026-Q1 · **Value:** 86 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — Improvement implementation: KPI-017 (IDP coverage) · **Period:** 2026-Q2 · **Value:** 79 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-48.12 — Report on function performance (L&D Analyst)

Type:

Row 1 — On function performance: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-07-04

Row 2 — On function performance: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-07-11

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Priority: axis 1 (impact 5), axis 2 (impact 4).

When every step is complete, click Complete in the task panel.

E2E-02 — Skills-to-Gap Diagnosis

Goal: Produce a validated skills gap diagnosis

Starts when: Approved annual L&D plan or a scheduled skills assessment campaign. **Ends with:** Validated skills gap diagnosis released to needs analysis.

Task UFT-02-01 — Maintain competency framework · done by L&D Analyst

Input: Job architecture → **Output:** Competency framework

Step MP-02.1 — Define competency families and levels (L&D Analyst)

Type:

Row 1 — Competency families and levels: Raise MES and digital shop-floor tracking proficiency of Operator — Assembly & Production teams to level 3 · **Indicator:** KPI-016 (Knowledge reuse rate) · **Baseline:** 36 % · **Target:** 89 % · **Deadline:** 2026-12-31 · **Owner:** Hajar Mansouri

Row 2 — Competency families and levels: Certify Supervisor — Assembly & Production staff on PLM and digital engineering change · **Indicator:** KPI-017 (IDP coverage) · **Baseline:** 49 % · **Target:** 77 % · **Deadline:** 2027-01-07 · **Owner:** Adil Naciri

Row 3 — Competency families and levels: Cut onboarding time on Supplier portal and EDI by 30 % · **Indicator:** KPI-018 (Mandatory certification compliance) · **Baseline:** 47 % · **Target:** 82 % · **Deadline:** 2027-01-14 · **Owner:** Yassine Hajji

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Family 'MES and digital shop-floor tracking': 4 competencies on the 1-4 scale (Aware, Practitioner, Autonomous, Expert).

When every step is complete, click Complete in the task panel.

Task UFT-02-02 — Set target levels per position · done by HR Business Partner

Input: Competency framework → **Output:** Position targets

Step MP-02.2 — Set target levels per position (HR Business Partner)

Type:

Row 1 — Target levels per position: Raise MES and digital shop-floor tracking proficiency of Operator — Assembly & Production teams to level 3 · **Indicator:** KPI-017 (IDP coverage) · **Baseline:** 38 % · **Target:** 81 % · **Deadline:** 2027-01-02 · **Owner:** Adil Naciri

Row 2 — Target levels per position: Certify Supervisor — Assembly & Production staff on PLM and digital engineering change · **Indicator:** KPI-018 (Mandatory certification compliance) · **Baseline:** 41 % · **Target:** 81 % · **Deadline:** 2027-01-09 · **Owner:** Yassine Hajji

Row 3 — Target levels per position: Cut onboarding time on Supplier portal and EDI by 30 % · **Indicator:** KPI-019 (Vendor invoice match rate) · **Baseline:** 45 % · **Target:** 76 % · **Deadline:** 2027-01-16 · **Owner:** Zineb Rami

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Assembly & Production supervisor: MES and digital shop-floor tracking = 3; IATF 16949 = 3. Assembly & Production operator: MES and digital shop-floor tracking = 2.

When every step is complete, click Complete in the task panel.

Task UFT-02-03 — Launch assessment campaign · done by L&D Analyst

Input: Position targets → **Output:** Open campaign

Step MP-02.3 — Launch assessment campaign (L&D Analyst)

Type:

Row 1 — Assessment campaign: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-07-13

Row 2 — Assessment campaign: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-07-20

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Campaign 'Skills 2026': population Assembly & Production and Operations (212 people), 12 competencies, close date 30 April.

When every step is complete, click Complete in the task panel.

Task UFT-02-04 — Collect self and manager assessments · done by Manager

Input: Open campaign → **Output:** Consolidated assessments

Step MP-02.4 — Submit self and manager assessments (Manager)

Type:

Row 1 — Self and manager assessments: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-07-15

Row 2 — Self and manager assessments: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-07-22

Then click Complete the step. The rows go to the register "Communications log".

Step MP-02.5 — Consolidate assessment results (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Self-assessment MES and digital shop-floor tracking: 2; manager validation: 2 with comment 'needs practice on live cases'.

When every step is complete, click Complete in the task panel.

Task UFT-02-05 — Suggest proficiency from evidence · done by L&D Analyst

Input: Consolidated assessments → **Output:** Suggested levels

Step MP-02.6 — Suggest proficiency from evidence (L&D Analyst)

Type:

Row 1 — Proficiency from evidence: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Leila Sefrioui · **Source:** Audit report

Row 2 — Proficiency from evidence: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Ayoub Bennani · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Proficiency from evidence register".

Result to record in the task: Accept 38 suggested levels, edit 4 (evidence too old), reject 1. Every change carries a note.

When every step is complete, click Complete in the task panel.

Task UFT-02-06 — Validate skills inventory · done by Head of L&D

Input: Suggested levels → **Output:** Validated inventory

Step MP-02.7 — Validate skills inventory (Head of L&D)

Type:

Decision: Approved

Skills inventory: Skills inventory

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-07-17

Decided by: Tarik Lahlou

Then click Complete the step.

Result to record in the task: Inventory validated: 212 employees, 96% assessments complete. Justification: sample checked by site.

When every step is complete, click Complete in the task panel.

Task UFT-02-07 — Compute and forecast gaps · done by L&D Analyst

Input: Validated inventory → **Output:** Skills gap diagnosis

Step MP-03.1 — Compute gap matrix (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-03.2 — Review gap matrix by site and function (L&D Analyst)

Type:

Gap matrix by site and function: Gap matrix by site and function

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-07-27

Then click Complete the step.

Step MP-28.3 — Forecast skill gaps (Performance Analyst)

Type:

Row 1 — Skill gaps: KPI-002 (Skills inventory validation rate) · **Period:** 2026-Q1 · **Value:** 58 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Skill gaps: KPI-003 (Critical gap rate) · **Period:** 2026-Q2 · **Value:** 92 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-28.1 — Build analytics dataset (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Critical gaps: MES and digital shop-floor tracking (-1.4 average on supervisors), PLM and digital engineering change (-1.1). Forecast: Supplier portal and EDI becomes critical within 12 months.

When every step is complete, click Complete in the task panel.

E2E-21 — Previous Plan Impact-to-Strategy Update

Goal: Evaluate N-1 plan impact and update strategy

Starts when: Start of a new plan cycle with N-1 execution data available. **Ends with:** N-1 impact conclusions fed into the strategy update.

Task UFT-21-01 — Load N-1 plan execution data · done by L&D Analyst

Input: N-1 plan → **Output:** N-1 dataset

Step MP-39.1 — Load N-1 plan execution data (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Load N-1 plan: 28 sessions planned, 23 delivered, 1,410,000 MAD spent.

When every step is complete, click Complete in the task panel.

Task UFT-21-02 — Define impact criteria · done by L&D Analyst

Input: N-1 dataset → **Output:** Impact criteria

Step MP-39.2 — Define impact criteria (L&D Analyst)

Type:

Row 1 — Impact criteria: Raise MES and digital shop-floor tracking proficiency of Operator — Assembly & Production teams to level 3 · **Indicator:** KPI-011 (API Availability) · **Baseline:** 44 % · **Target:** 82 % · **Deadline:** 2027-08-18 · **Owner:** Hicham Rami

Row 2 — Impact criteria: Certify Supervisor — Assembly & Production staff on PLM and digital engineering change · **Indicator:** KPI-012 (Average Level 1 satisfaction) · **Baseline:** 37 % · **Target:** 78 % · **Deadline:** 2027-08-25 · **Owner:** Hajar Mansouri

Row 3 — Impact criteria: Cut onboarding time on Supplier portal and EDI by 30 % · **Indicator:** KPI-013 (Skill progression rate) · **Baseline:** 39 % · **Target:** 83 % · **Deadline:** 2027-09-01 · **Owner:** Adil Naciri

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Impact criteria: application on the job, KPI change, satisfaction, cost per learner.

When every step is complete, click Complete in the task panel.

Task UFT-21-03 — Survey participants and managers · done by L&D Analyst

Input: Impact criteria → **Output:** Survey results

Step MP-39.3 — Survey participants and managers (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-09.5 — Record on-the-job observation (Level 3) (Manager)

Type:

Row 1 — On-the-job observation (Level 3): MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hajar Mansouri · **Source:** Interview with the function head

Row 2 — On-the-job observation (Level 3): PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Adil Naciri · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "On-the-job observation (Level 3) register".

Result to record in the task: Survey sent to 190 participants and 34 managers; 61% responded.

When every step is complete, click Complete in the task panel.

Task UFT-21-04 — Compare planned against realized · done by L&D Analyst

Input: Survey results → **Output:** Plan-vs-actual analysis

Step MP-39.4 — Compare planned against realized (L&D Analyst)

Type:

Row 1 — Planned against realized: MES and digital shop-floor tracking · **Criterion:** Feasibility · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Planned against realized: PLM and digital engineering change · **Criterion:** Cost · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Planned against realized: Supplier portal and EDI · **Criterion:** Risk · **Weight (%):** 20 · **Score (1–5):** 2 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-32.3 — Isolate training effect (Performance Analyst)

Type:

Row 1 — Training effect: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Adil Naciri · **Source:** Questionnaire results

Row 2 — Training effect: PLM and digital engineering change · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Yassine Hajji · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Training effect register".

Result to record in the task: Planned vs realized: 82% of sessions, 94% of budget; 2 themes not delivered.

When every step is complete, click Complete in the task panel.

Task UFT-21-05 — Review N-1 ROI · done by Performance Analyst

Input: Plan-vs-actual analysis → **Output:** N-1 ROI

Step MP-32.4 — Compute Phillips ROI (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-32.5 — Review ROI with finance (Finance Manager)

Type:

ROI with finance: ROI with finance

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-03-22

Then click Complete the step.

Result to record in the task: N-1 ROI: PLM and digital engineering change 18%; safety theme 35%.

When every step is complete, click Complete in the task panel.

Task UFT-21-06 — Draft impact conclusions · done by L&D Analyst

Input: N-1 ROI → **Output:** Draft conclusions

Step MP-39.5 — Draft impact study conclusions (L&D Analyst)

Type:

Row 1 — Impact study conclusions: Impact study conclusions — MES and digital shop-floor tracking · **Owner:** Zineb Rami · **Start:** 2027-03-09 · **End:** 2027-04-08 · **Budget:** 40000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Impact study conclusions: Impact study conclusions — PLM and digital engineering change · **Owner:** Leila Sefrioui · **Start:** 2027-03-16 · **End:** 2027-04-15 · **Budget:** 53000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Accept AI conclusions 1-3; rewrite conclusion 4 (sample too small).

When every step is complete, click Complete in the task panel.

Task UFT-21-07 — Feed conclusions to strategy · done by Head of L&D

Input: Draft conclusions → **Output:** Strategy inputs

Step MP-39.6 — Feed conclusions to strategy update (Head of L&D)

Type:

Row 1 — Conclusions to strategy update: KPI-016 (Knowledge reuse rate) · **Period:** 2026-Q1 · **Value:** 83 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — Conclusions to strategy update: KPI-017 (IDP coverage) · **Period:** 2026-Q2 · **Value:** 73 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-01.1 — Record corporate strategic objectives (Head of L&D)

Type:

Row 1 — Corporate strategic objectives: Raise MES and digital shop-floor tracking proficiency of Operator — Assembly & Production teams to level 3 · **Indicator:** KPI-016 (Knowledge reuse rate) · **Baseline:** 35 % · **Target:** 79 % · **Deadline:** 2027-08-28 · **Owner:** Leila Sefrioui

Row 2 — Corporate strategic objectives: Certify Supervisor — Assembly & Production staff on PLM and digital engineering change · **Indicator:** KPI-017 (IDP coverage) · **Baseline:** 33 % · **Target:** 83 % · **Deadline:** 2027-09-04 · **Owner:** Ayoub Bennani

Row 3 — Corporate strategic objectives: Cut onboarding time on Supplier portal and EDI by 30 % · **Indicator:** KPI-018 (Mandatory certification compliance) · **Baseline:** 32 % · **Target:** 81 % · **Deadline:** 2027-09-11 · **Owner:** Salma Sefrioui

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Feed to strategy: keep blended format; stop long classroom courses on PLM and digital engineering change.

When every step is complete, click Complete in the task panel.

Task UFT-21-08 — Update roadmap priorities · done by L&D Strategist

Input: Strategy inputs → **Output:** Updated roadmap priorities

Step MP-04.6 — Sequence roadmap initiatives (L&D Strategist)

Type:

Row 1 — Roadmap initiatives: Roadmap initiatives — MES and digital shop-floor tracking · **Owner:** Ayoub Bennani · **Start:** 2027-03-13 · **End:** 2027-04-12 · **Budget:** 22000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Roadmap initiatives: Roadmap initiatives — PLM and digital engineering change · **Owner:** Salma Sefrioui · **Start:** 2027-03-20 · **End:** 2027-04-19 · **Budget:** 55000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Roadmap priority updated: MES and digital shop-floor tracking moved to Q2; PLM and digital engineering change to microlearning.

When every step is complete, click Complete in the task panel.

Gate G2 — G2 — Diagnostic validated: close the phase

1. Open the project workspace and click the gate button of the phase.
1. Tick each checklist item once its evidence is attached, then click Submit for decision.
1. Click Go. Type the justification: All mandatory items met; evidence attached.
1. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

Phase 3 — Training Engineering Report & plan

E2E-01 — Strategy-to-Learning Plan

Goal: Translate corporate strategy into an approved annual L&D plan and budget

Starts when: Annual strategy cycle opened or revised corporate objectives published by the board. **Ends with:** Annual L&D plan and budget envelope approved by the Steering Committee and locked.

Task UFT-01-01 — Record strategic objectives · done by Head of L&D

Input: Corporate strategy → **Output:** Strategic objectives register

Step MP-01.1 — Record corporate strategic objectives (Head of L&D)

Type:

Row 1 — Corporate strategic objectives: Raise MES and digital shop-floor tracking proficiency of Operator — Assembly & Production teams to level 3 · **Indicator:** KPI-008 (Session fill rate) · **Baseline:** 44 % · **Target:** 84 % · **Deadline:** 2026-12-15 · **Owner:** Sara Rami

Row 2 — Corporate strategic objectives: Certify Supervisor — Assembly & Production staff on PLM and digital engineering change · **Indicator:** KPI-009 (Plan realization rate) · **Baseline:** 34 % · **Target:** 88 % · **Deadline:** 2026-12-22 · **Owner:** Youssef Lahlou

Row 3 — Corporate strategic objectives: Cut onboarding time on Supplier portal and EDI by 30 % · **Indicator:** KPI-010 (Learner completion rate) · **Baseline:** 39 % · **Target:** 87 % · **Deadline:** 2026-12-29 · **Owner:** Ayoub Ziani

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: SO-1: MES and digital shop-floor tracking used by 80% of Assembly & Production staff by end 2026 (owner: Operations Director, measured quarterly). SO-2: zero major audit findings on IATF 16949.

When every step is complete, click Complete in the task panel.

Task UFT-01-02 — Link objectives to functions and sites · done by L&D Strategist

Input: Strategic objectives register → **Output:** Objective-function map

Step MP-01.2 — Link objectives to functions and sites (L&D Strategist)

Type:

Row 1 — Objectives to functions and sites: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Youssef Lahlou · **Source:** Annual performance review

Row 2 — Objectives to functions and sites: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Ayoub Ziani · **Source:** Audit report

Then click Complete the step. The rows go to the register "Objectives to functions and sites register".

Result to record in the task: SO-1 → Assembly & Production, Operations, Information Systems (all sites). SO-2 → Quality & HSE, Assembly & Production.

When every step is complete, click Complete in the task panel.

Task UFT-01-03 — Frame skills priorities · done by L&D Analyst

Input: Objective-function map → **Output:** Priority competency list

Step MP-02.1 — Define competency families and levels (L&D Analyst)

Type:

Row 1 — Competency families and levels: Raise MES and digital shop-floor tracking proficiency of Operator — Assembly & Production teams to level 3 · **Indicator:** KPI-010 (Learner completion rate) · **Baseline:** 40 % · **Target:** 88 % · **Deadline:** 2026-12-19 · **Owner:** Ayoub Ziani

Row 2 — Competency families and levels: Certify Supervisor — Assembly & Production staff on PLM and digital engineering change · **Indicator:** KPI-011 (API Availability) · **Baseline:** 45 % · **Target:** 71 % · **Deadline:** 2026-12-26 · **Owner:** Meryem Lahlou

Row 3 — Competency families and levels: Cut onboarding time on Supplier portal and EDI by 30 % · **Indicator:** KPI-012 (Average Level 1 satisfaction) · **Baseline:** 46 % · **Target:** 86 % · **Deadline:** 2027-01-02 · **Owner:** Yassine Bouzidi

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-02.2 — Set target levels per position (HR Business Partner)

Type:

Row 1 — Target levels per position: Raise MES and digital shop-floor tracking proficiency of Operator — Assembly & Production teams to level 3 · **Indicator:** KPI-010 (Learner completion rate) · **Baseline:** 36 % · **Target:** 89 % · **Deadline:** 2026-12-19 · **Owner:** Ayoub Ziani

Row 2 — Target levels per position: Certify Supervisor — Assembly & Production staff on PLM and digital engineering change · **Indicator:** KPI-011 (API Availability) · **Baseline:** 42 % · **Target:** 79 % · **Deadline:** 2026-12-26 · **Owner:** Meryem Lahlou

Row 3 — Target levels per position: Cut onboarding time on Supplier portal and EDI by 30 % · **Indicator:** KPI-012 (Average Level 1 satisfaction) · **Baseline:** 46 % · **Target:** 85 % · **Deadline:** 2027-01-02 · **Owner:** Yassine Bouzidi

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Priority competency families: MES and digital shop-floor tracking; PLM and digital engineering change; IATF 16949 compliance. Target level 3 (Autonomous) for supervisors.

When every step is complete, click Complete in the task panel.

Task UFT-01-04 — Pre-scope training needs · done by L&D Analyst

Input: Priority competency list → **Output:** Pre-scoped needs

Step MP-03.1 — Compute gap matrix (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-03.2 — Review gap matrix by site and function (L&D Analyst)

Type:

Gap matrix by site and function: Gap matrix by site and function

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-06-28

Then click Complete the step.

Result to record in the task: Pre-scoped needs: 42% of Assembly & Production supervisors below target on MES and digital shop-floor tracking; 18 employees below target on IATF 16949.

When every step is complete, click Complete in the task panel.

Task UFT-01-05 — Define budget envelope · done by Finance Manager

Input: Pre-scoped needs → **Output:** Budget envelope

Step MP-01.3 — Define L&D budget envelope (Finance Manager)

Type:

Row 1 — L&D budget envelope: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Yassine Bouzidi · **Source:** Interview with the function head

Row 2 — L&D budget envelope: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hajar Bouzidi · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "L&D budget envelope register".

Step MP-18.1 — Allocate budget by theme and site (Finance Manager)

Type:

Row 1 — Budget by theme and site: Budget by theme and site — MES and digital shop-floor tracking · **Owner:** Yassine Bouzidi · **Start:** 2026-07-06 · **End:** 2026-08-05 · **Budget:** 57000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Budget by theme and site: Budget by theme and site — PLM and digital engineering change · **Owner:** Hajar Bouzidi · **Start:** 2026-07-13 · **End:** 2026-08-12 · **Budget:** 61000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-18.2 — Forecast OFPPT refunds (Finance Manager)

Type:

Row 1 — OFPPT refunds: KPI-012 (Average Level 1 satisfaction) · **Period:** 2026-Q3 · **Value:** 73 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — OFPPT refunds: KPI-013 (Skill progression rate) · **Period:** 2026-Q1 · **Value:** 64 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Gross L&D budget 2026: 1,850,000 MAD; forecast refund (OFPPT/CSF): 520,000 MAD; net envelope: 1,330,000 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-01-06 — Plan change and adoption · done by Change Manager

Input: Budget envelope → **Output:** Adoption plan

Step MP-19.1 — Assess change impact (Change Manager)

Type:

Row 1 — Change impact: MES and digital shop-floor tracking · **Criterion:** Feasibility · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Change impact: PLM and digital engineering change · **Criterion:** Cost · **Weight (%):** 30 · **Score (1–5):** 5 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Change impact: Supplier portal and EDI · **Criterion:** Risk · **Weight (%):** 20 · **Score (1–5):** 4 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-19.2 — Build adoption plan (Change Manager)

Type:

Row 1 — Adoption plan: Adoption plan — MES and digital shop-floor tracking · **Owner:** Hajar Bouzidi · **Start:** 2026-07-08 · **End:** 2026-08-07 · **Budget:** 47000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Adoption plan: Adoption plan — PLM and digital engineering change · **Owner:** Imane Tazi · **Start:** 2026-07-15 · **End:** 2026-08-14 · **Budget:** 28000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Change impact: high for Assembly & Production supervisors (new MES and digital shop-floor tracking routines). Sponsors: Operations Director. Champions: one per site.

When every step is complete, click Complete in the task panel.

Task UFT-01-07 — Compile plan approval pack · done by Head of L&D

Input: Adoption plan → **Output:** Approval pack

Step MP-01.4 — Schedule Steering Committee milestones (Head of L&D)

Type:

Row 1 — Steering Committee milestones: Steering Committee milestones — MES and digital shop-floor tracking · **Owner:** Imane Tazi · **Start:** 2026-07-10 · **End:** 2026-08-09 · **Budget:** 54000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Steering Committee milestones: Steering Committee milestones — PLM and digital engineering change · **Owner:** Hicham Rami · **Start:** 2026-07-17 · **End:** 2026-08-16 · **Budget:** 47000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-01.5 — Compile plan approval pack (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-04.1 — Consolidate feeder outputs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Approval pack: 2 objectives, net budget 1,330,000 MAD, 6 priority themes, committee date 15 March 2026.

When every step is complete, click Complete in the task panel.

Task UFT-01-08 — Approve and lock annual L&D plan · done by HR Director

Input: Approval pack → **Output:** Approved annual L&D plan

Step MP-01.6 — Record Steering Committee decision (HR Director)

Type:

Row 1 — Steering Committee decision: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hicham Rami · **Source:** Audit report

Row 2 — Steering Committee decision: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hajar Mansouri · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Steering Committee decision register".

Step MP-01.7 — Lock and distribute approved plan (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Decision: Approve. Justification: aligned with SO-1 and SO-2; budget within envelope. Plan locked as version 1.

When every step is complete, click Complete in the task panel.

E2E-03 — Needs-to-Training Engineering Report & Roadmap

Goal: Produce the Training Engineering Report and the prioritized training roadmap

Starts when: Validated skills gap diagnosis, consolidated demands, approved Scope of Work or diagnostic findings available. **Ends with:** Training Engineering Report and prioritized roadmap approved and published.

Task UFT-03-01 — Plan diagnostic interviews · done by L&D Analyst

Input: Approved Scope of Work → **Output:** Interview plan

Step MP-03.3 — Plan diagnostic interviews (L&D Analyst)

Type:

Row 1 — Diagnostic interviews: Diagnostic interviews — MES and digital shop-floor tracking · **Owner:** Hajar Benjelloun · **Start:** 2026-07-28 · **End:** 2026-08-27 · **Budget:** 52000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Diagnostic interviews: Diagnostic interviews — PLM and digital engineering change · **Owner:** Salma Sefrioui · **Start:** 2026-08-04 · **End:** 2026-09-03 · **Budget:** 58000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Interview plan: 14 semi-structured interviews (4 MS, 6 MO, 4 OP), 45 minutes each, weeks 10-11.

When every step is complete, click Complete in the task panel.

Task UFT-03-02 — Record interview findings · done by L&D Analyst

Input: Interview plan → **Output:** Interview findings

Step MP-03.4 — Record interview findings (L&D Analyst)

Type:

Row 1 — Interview findings: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Salma Sefrioui · **Source:** Annual performance review

Row 2 — Interview findings: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Ghita Bouzidi · **Source:** Audit report

Then click Complete the step. The rows go to the register "Interview findings register".

Result to record in the task: Finding (MO, Assembly & Production): 'Supervisors do not trust MES and digital shop-floor tracking data; they re-enter figures on paper.'

When every step is complete, click Complete in the task panel.

Task UFT-03-03 — Cluster needs into themes · done by L&D Analyst

Input: Interview findings, gaps, responses → **Output:** Training themes

Step MP-03.5 — Cluster needs into training themes (L&D Analyst)

Type:

Row 1 — Needs into training themes: MES and digital shop-floor tracking · **Criterion:** Risk · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Needs into training themes: PLM and digital engineering change · **Criterion:** Business impact · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Needs into training themes: Supplier portal and EDI · **Criterion:** Urgency · **Weight (%):** 20 · **Score (1–5):** 2 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Accept theme 'MES and digital shop-floor tracking for supervisors'; merge two duplicate themes on PLM and digital engineering change; split 'IATF 16949' into awareness and auditor tracks.

When every step is complete, click Complete in the task panel.

Task UFT-03-04 — Prioritize needs by impact · done by L&D Strategist

Input: Training themes → **Output:** Prioritized needs

Step MP-03.6 — Prioritize needs by business impact (L&D Strategist)

Type:

Row 1 — Needs by business impact: MES and digital shop-floor tracking · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Needs by business impact: PLM and digital engineering change · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Needs by business impact: Supplier portal and EDI · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: MES and digital shop-floor tracking: impact 5, urgency 4. PLM and digital engineering change: impact 4, urgency 3. IATF 16949: impact 4, urgency 5.

When every step is complete, click Complete in the task panel.

Task UFT-03-05 — Validate needs register · done by Head of L&D

Input: Prioritized needs → **Output:** Validated needs register

Step MP-03.7 — Validate needs register (Head of L&D)

Type:

Decision: Approved

Needs register: Needs register

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2026-08-05

Decided by: Tarik Lahlou

Then click Complete the step.

Result to record in the task: Needs register validated: 23 needs, 6 themes. Justification: covers SO-1 and SO-2; sponsor reviewed.

When every step is complete, click Complete in the task panel.

Task UFT-03-06 — Consolidate engineering inputs · done by L&D Analyst

Input: Validated needs register → **Output:** Input completeness check

Step MP-04.1 — Consolidate feeder outputs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-04.2 — Check input completeness (L&D Analyst)

Type:

Input completeness: Input completeness

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-08-15

Then click Complete the step.

Result to record in the task: Inputs complete: Scope of Work, 187 responses, gap matrix, RAG dashboard, SWOT, demands. Missing: none.

When every step is complete, click Complete in the task panel.

Task UFT-03-07 — Draft Training Engineering Report · done by L&D Strategist

Input: Input completeness check → **Output:** Report draft

Step MP-04.3 — Generate report draft (L&D Strategist)

Type:

Row 1 — Report draft: Report draft — MES and digital shop-floor tracking · **Owner:** Soukaina Berrada · **Start:** 2026-08-09 · **End:** 2026-09-08 · **Budget:** 38000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Report draft: Report draft — PLM and digital engineering change · **Owner:** Ghita Ziani · **Start:** 2026-08-16 · **End:** 2026-09-15 · **Budget:** 41000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-04.4 — Edit and complete report sections (L&D Strategist)

Type:

Complete report sections: Complete report sections

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-08-24

Then click Complete the step.

Result to record in the task: Section 3 'Diagnostic': edit the AI draft, add the interview quote on MES and digital shop-floor tracking, keep the RAG table.

When every step is complete, click Complete in the task panel.

Task UFT-03-08 — Run quality review · done by Quality Manager

Input: Report draft → **Output:** Reviewed report

Step MP-04.5 — Run quality review of report (Quality Manager)

Type:

Row 1 — Quality review of report: MES and digital shop-floor tracking — half-day workshop · **Date:** 2026-08-21 · **Trainer:** Atlas Formation Conseil · **Participants:** 15 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Quality review of report: PLM and digital engineering change — half-day workshop · **Date:** 2026-08-28 · **Trainer:** Maghreb Learning Partners · **Participants:** 15 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-20.5 — Run periodic quality review (Quality Manager)

Type:

Row 1 — Periodic quality review: MES and digital shop-floor tracking — half-day workshop · **Date:** 2026-08-21 · **Trainer:** Atlas Formation Conseil · **Participants:** 17 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Periodic quality review: PLM and digital engineering change — half-day workshop · **Date:** 2026-08-28 · **Trainer:** Maghreb Learning Partners · **Participants:** 13 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Quality review: 11/12 checklist items met; fix item 'sources cited for every figure'. Result: pass after correction.

When every step is complete, click Complete in the task panel.

Task UFT-03-09 — Sequence and budget roadmap · done by L&D Strategist

Input: Reviewed report → **Output:** Draft roadmap

Step MP-04.6 — Sequence roadmap initiatives (L&D Strategist)

Type:

Row 1 — Roadmap initiatives: Roadmap initiatives — MES and digital shop-floor tracking · **Owner:** Tarik Lahlou · **Start:** 2026-08-13 · **End:** 2026-09-12 · **Budget:** 28000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Roadmap initiatives: Roadmap initiatives — PLM and digital engineering change · **Owner:** Omar Benjelloun · **Start:** 2026-08-20 · **End:** 2026-09-19 · **Budget:** 55000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-18.1 — Allocate budget by theme and site (Finance Manager)

Type:

Row 1 — Budget by theme and site: Budget by theme and site — MES and digital shop-floor tracking · **Owner:** Tarik Lahlou · **Start:** 2026-08-13 · **End:** 2026-09-12 · **Budget:** 62000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Budget by theme and site: Budget by theme and site — PLM and digital engineering change · **Owner:** Omar Benjelloun · **Start:** 2026-08-20 · **End:** 2026-09-19 · **Budget:** 72000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Roadmap: Q2 MES and digital shop-floor tracking (6 groups); Q3 IATF 16949 (4 groups); Q4 PLM and digital engineering change (3 groups). Total 1,240,000 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-03-10 — Approve and publish report and roadmap · done by Head of L&D

Input: Draft roadmap → **Output:** Approved Training Engineering Report and roadmap

Step MP-04.7 — Submit roadmap for approval (Head of L&D)

Type:

Row 1 — Roadmap for approval: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-08-10

Row 2 — Roadmap for approval: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-08-17

Then click Complete the step. The rows go to the register "Communications log".

Step MP-04.8 — Record roadmap approval (HR Director)

Type:

Row 1 — Roadmap approval: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Omar Benjelloun · **Source:** Interview with the function head

Row 2 — Roadmap approval: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Sara Lahlou · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Roadmap approval register".

Step MP-04.9 — Publish approved report and roadmap (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-01.6 — Record Steering Committee decision (HR Director)

Type:

Row 1 — Steering Committee decision: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Omar Benjelloun · **Source:** Interview with the function head

Row 2 — Steering Committee decision: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Sara Lahlou · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Steering Committee decision register".

Result to record in the task: Decision: Approve report and roadmap v1. Justification: within budget, linked to SO-1/SO-2. Publish to all stakeholders.

When every step is complete, click Complete in the task panel.

E2E-30 — Prioritization-to-Resource Plan

Goal: Prioritize themes and plan days, groups, trainers, budget

Starts when: Consolidated training themes requiring prioritization and resource planning.
Ends with: Approved prioritized training plan with days per theme, group planning, trainer allocation, and budget.

Task UFT-30-01 — Consolidate training themes · done by L&D Analyst

Input: Themes → **Output:** Theme list

Step MP-49.1 — Consolidate training themes (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Consolidated list: 9 themes from needs, demands, GPEC and SWOT.

When every step is complete, click Complete in the task panel.

Task UFT-30-02 — Define prioritization criteria · done by L&D Strategist

Input: Strategy → **Output:** Criteria

Step MP-49.2 — Define prioritization criteria (L&D Strategist)

Type:

Row 1 — Prioritization criteria: Raise MES and digital shop-floor tracking proficiency of Operator — Assembly & Production teams to level 3 · **Indicator:** KPI-018 (Mandatory certification compliance) · **Baseline:** 45 % · **Target:** 87 % · **Deadline:** 2027-12-30 · **Owner:** Salma Sefrioui

Row 2 — Prioritization criteria: Certify Supervisor — Assembly & Production staff on PLM and digital engineering change · **Indicator:** KPI-019 (Vendor invoice match rate) · **Baseline:** 38 % · **Target:** 79 % · **Deadline:** 2028-01-06 · **Owner:** Ghita Bouzidi

Row 3 — Prioritization criteria: Cut onboarding time on Supplier portal and EDI by 30 % · **Indicator:** KPI-020 (Integration synchronisation success rate) · **Baseline:** 43 % · **Target:** 84 % · **Deadline:** 2028-01-13 · **Owner:** Loubna Chraibi

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Criteria: strategic impact 40%, urgency 30%, number of learners 20%, cost 10%.

When every step is complete, click Complete in the task panel.

Task UFT-30-03 — Prioritize themes · done by L&D Strategist

Input: Criteria → **Output:** Prioritized themes

Step MP-49.3 — Prioritize themes (L&D Strategist)

Type:

Row 1 — Themes: MES and digital shop-floor tracking · **Criterion:** Cost · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Themes: PLM and digital engineering change · **Criterion:** Risk · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Themes: Supplier portal and EDI · **Criterion:** Business impact · **Weight (%):** 20 · **Score (1–5):** 4 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Rank 1 MES and digital shop-floor tracking (score 86); rank 2 IATF 16949 (81); rank 3 PLM and digital engineering change (74).

When every step is complete, click Complete in the task panel.

Task UFT-30-04 — Estimate days per theme · done by L&D Planner

Input: Prioritized themes → **Output:** Days per theme

Step MP-49.4 — Estimate days per theme (L&D Planner)

Type:

Row 1 — Days per theme: MES and digital shop-floor tracking · **Criterion:** Risk · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Days per theme: PLM and digital engineering change · **Criterion:** Business impact · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Days per theme: Supplier portal and EDI · **Criterion:** Urgency · **Weight (%):** 20 · **Score (1–5):** 3 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: MES and digital shop-floor tracking: 3 days per group; IATF 16949: 2 days; PLM and digital engineering change: 1.5 days.

When every step is complete, click Complete in the task panel.

Task UFT-30-05 — Define groups per theme · done by L&D Planner

Input: Days per theme → **Output:** Group plan

Step MP-49.5 — Define number of groups per theme (L&D Planner)

Type:

Row 1 — Number of groups per theme: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Anas Benjelloun · **Source:** HRIS export

Row 2 — Number of groups per theme: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Loubna El Idrissi · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Number of groups per theme register".

Step MP-49.6 — Allocate trainers (L&D Planner)

Type:

Row 1 — Role: Site L&D Coordinator · **Trainers:** MES and digital shop-floor tracking · **Person:** Anas Benjelloun · **Allocation (%):** 100 · **Start:** 2027-07-09 · **Holder type:** Holder

Row 2 — Role: Subject Matter Expert · **Trainers:** PLM and digital engineering change · **Person:** Loubna El Idrissi · **Allocation (%):** 50 · **Start:** 2027-07-16 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Result to record in the task: MES and digital shop-floor tracking: 6 groups of 12; IATF 16949: 4 groups; PLM and digital engineering change: 3 groups.

When every step is complete, click Complete in the task panel.

Task UFT-30-06 — Allocate trainers and budget · done by Finance Manager

Input: Group plan → **Output:** Resource plan

Step MP-49.7 — Estimate plan budget (Finance Manager)

Type:

Row 1 — Plan budget: MES and digital shop-floor tracking · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Plan budget: PLM and digital engineering change · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Plan budget: Supplier portal and EDI · **Criterion:** Cost · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-49.8 — Sequence delivery (L&D Planner)

Type:

Row 1 — Delivery: Delivery — MES and digital shop-floor tracking · **Owner:** Loubna El Idrissi · **Start:** 2027-07-21 · **End:** 2027-08-20 · **Budget:** 46000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Delivery: Delivery — PLM and digital engineering change · **Owner:** Soukaina Berrada · **Start:** 2027-07-28 · **End:** 2027-08-27 · **Budget:** 74000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-49.9 — Validate plan with governance (Head of L&D)

Type:

Decision: Approved

Plan with governance: Plan with governance

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-07-21

Decided by: Tarik Lahlou

Then click Complete the step.

Result to record in the task: Trainers: 2 internal, vendor A; budget 1,240,000 MAD (within envelope).

When every step is complete, click Complete in the task panel.

Task UFT-30-07 — Publish prioritized training plan · done by L&D Leader

Input: All outputs → **Output:** Prioritized Plan

Step MP-49.10 — Publish prioritized plan (Head of L&D)

Type:

Row 1 — Prioritized plan: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-07-18

Row 2 — Prioritized plan: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-07-25

Then click Complete the step. The rows go to the register "Communications log".

Step MP-49.11 — Track plan execution (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-49.12 — Report on resource utilization (L&D Planner)

Type:

Row 1 — On resource utilization: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-07-18

Row 2 — On resource utilization: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-07-25

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish RPT-002 Prioritized Training Plan 2026 to all stakeholders.

When every step is complete, click Complete in the task panel.

E2E-22 — Multi-Site Plan-to-Deployment

Goal: Adapt and deploy plans across sites

Starts when: Approved roadmap for an organization with several sites or entities. **Ends with:** Site plans adapted, validated and deployed, with deviations escalated.

Task UFT-22-01 — Split plan by site · done by Head of L&D

Input: Approved roadmap → **Output:** Site plans

Step MP-40.1 — Split plan by site (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Split plan into 3 sites: Casablanca 55%, Tanger 30%, Agadir 15%.

When every step is complete, click Complete in the task panel.

Task UFT-22-02 — Adapt site plan to local constraints · done by Site L&D Coordinator

Input: Site plans → **Output:** Adapted site plans

Step MP-40.2 — Adapt site plan to local constraints (Site L&D Coordinator)

Type:

Row 1 — Site plan to local constraints: Site plan to local constraints — MES and digital shop-floor tracking · **Owner:** Hajar Benjelloun · **Start:** 2027-03-17 · **End:** 2027-04-16 · **Budget:** 45000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Site plan to local constraints: Site plan to local constraints — PLM and digital engineering change · **Owner:** Salma Sefrioui · **Start:** 2027-03-24 · **End:** 2027-04-23 · **Budget:** 65000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Tanger: shift constraints → sessions of 4 hours instead of full days.

When every step is complete, click Complete in the task panel.

Task UFT-22-03 — Localize site materials · done by Instructional Designer

Input: Adapted site plans → **Output:** Localized materials

Step MP-23.1 — Request translation (Instructional Designer)

Type:

Row 1 — Translation: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-03-14

Row 2 — Translation: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-03-21

Then click Complete the step. The rows go to the register "Communications log".

Step MP-23.3 — Validate translation (Subject Matter Expert)

Type:

Decision: Approved with conditions

Translation: Translation

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2027-04-09

Decided by: Tarik Lahlou

Then click Complete the step.

Step MP-23.6 — Review participation equity (HR Business Partner)

Type:

Participation equity: Participation equity

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-04-10

Then click Complete the step.

Step MP-23.7 — Record inclusion actions (HR Business Partner)

Type:

Row 1 — Inclusion actions: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Salma Sefrioui · **Source:** Audit report

Row 2 — Inclusion actions: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Ghita Bouzidi · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Inclusion actions register".

Result to record in the task: Agadir materials translated to AR; validated by the site expert.

When every step is complete, click Complete in the task panel.

Task UFT-22-04 — Validate site plan · done by Head of L&D

Input: Adapted site plans → **Output:** Validated site plans

Step MP-40.3 — Validate site plan (Head of L&D)

Type:

Decision: Approved

Site plan: Site plan

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-03-14

Decided by: Tarik Lahlou

Then click Complete the step.

Result to record in the task: Site plans validated centrally; budget deviation within ±5%.

When every step is complete, click Complete in the task panel.

Task UFT-22-05 — Schedule site sessions · done by Training Administrator

Input: Validated site plans → **Output:** Site schedules

Step MP-07.1 — Create training session (Training Administrator)

Type:

Row 1 — Training session: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Loubna Chraibi · **Source:** Interview with the function head

Row 2 — Training session: PLM and digital engineering change · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Anas Benjelloun · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Training session register".

Step MP-11.1 — Book rooms and equipment (Training Administrator)

Type:

Row 1 — Rooms and equipment: Rooms and equipment — MES and digital shop-floor tracking · **Owner:** Loubna Chraibi · **Start:** 2027-03-23 · **End:** 2027-04-22 · **Budget:** 29000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Rooms and equipment: Rooms and equipment — PLM and digital engineering change · **Owner:** Anas Benjelloun · **Start:** 2027-03-30 · **End:** 2027-04-29 · **Budget:** 34000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Tanger schedule: 8 sessions, rooms booked, 2 trainers.

When every step is complete, click Complete in the task panel.

Task UFT-22-06 — Deploy site schedule · done by Site L&D Coordinator

Input: Site schedules → **Output:** Deployed schedules

Step MP-40.4 — Deploy site schedule (Site L&D Coordinator)

Type:

Row 1 — Site schedule: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Site schedule: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Schedules deployed and communicated to site managers.

When every step is complete, click Complete in the task panel.

Task UFT-22-07 — Consolidate site status · done by Head of L&D

Input: Deployed schedules → **Output:** Site status

Step MP-40.5 — Consolidate site status (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Status: Casablanca 70%, Tanger 45%, Agadir 20% delivered.

When every step is complete, click Complete in the task panel.

Task UFT-22-08 — Escalate site deviation · done by Head of L&D

Input: Site status → **Output:** Multi-site deployment status

Step MP-40.6 — Escalate site deviation (Head of L&D)

Type:

Row 1 — Site deviation: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-03-24

Row 2 — Site deviation: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-03-31

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Escalate Agadir deviation (-25%) to the HR Director with a recovery plan.

When every step is complete, click Complete in the task panel.

E2E-23 — Regulatory Submission-to-Validation

Goal: Submit and validate training plans with regulatory bodies

Starts when: Approved plan requiring external validation or funding (e.g. OFPPT, GIAC-Agro).
Ends with: Plan validated by the regulatory body and evidence archived.

Task UFT-23-01 — Select regulatory template · done by Compliance Officer

Input: Approved plan → **Output:** Selected template

Step MP-41.1 — Select regulatory template (Compliance Officer)

Type:

Decision: Approved

Regulatory template: Regulatory template

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-03-24

Decided by: Tarik Lahlou

Then click Complete the step.

Result to record in the task: Template: OFPPT special training contracts (CSF) — plan file.

When every step is complete, click Complete in the task panel.

Task UFT-23-02 — Generate submission file · done by Compliance Officer

Input: Selected template → **Output:** Submission file

Step MP-41.2 — Generate submission file (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-20.5 — Run periodic quality review (Quality Manager)

Type:

Row 1 — Periodic quality review: MES and digital shop-floor tracking — half-day workshop · **Date:** 2027-04-12 · **Trainer:** Atlas Formation Conseil · **Participants:** 12 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Periodic quality review: PLM and digital engineering change — half-day workshop · **Date:** 2027-04-19 · **Trainer:** Maghreb Learning Partners · **Participants:** 16 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Submission file generated: plan, themes, providers, costs; quality check passed.

When every step is complete, click Complete in the task panel.

Task UFT-23-03 — Submit plan to regulatory body · done by Compliance Officer

Input: Submission file → **Output:** Submitted plan

Step MP-41.3 — Submit plan to regulatory body (Compliance Officer)

Type:

Row 1 — Plan to regulatory body: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-03-30

Row 2 — Plan to regulatory body: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-04-06

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Submitted to the regional funding committee on 5 March; reference GSF-2026-118.

When every step is complete, click Complete in the task panel.

Task UFT-23-04 — Track submission status · done by Compliance Officer

Input: Submitted plan → **Output:** Status log

Step MP-41.4 — Track submission status (Compliance Officer)

Type:

Row 1 — Submission status: KPI-009 (Plan realization rate) · **Period:** 2026-Q2 · **Value:** 90 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — Submission status: KPI-010 (Learner completion rate) · **Period:** 2026-Q3 · **Value:** 78 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Status: additional document requested (provider accreditation) — sent on 12 March.

When every step is complete, click Complete in the task panel.

Task UFT-23-05 — Record regulator decision · done by Compliance Officer

Input: Status log → **Output:** Regulator decision

Step MP-41.5 — Record regulator decision (Compliance Officer)

Type:

Row 1 — Regulator decision: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Zineb Lahlou · **Source:** Audit report

Row 2 — Regulator decision: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Leila Rami · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Regulator decision register".

Step MP-14.1 — Register regulatory requirement (Compliance Officer)

Type:

Row 1 — Regulatory requirement: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Zineb Lahlou · **Source:** Audit report

Row 2 — Regulatory requirement: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Leila Rami · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Regulatory requirement register".

Result to record in the task: Decision: approved with a cap of 520,000 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-23-06 — Submit refund claims · done by Finance Manager

Input: Regulator decision → **Output:** Refund claims

Step MP-18.5 — Submit refund claims (Finance Manager)

Type:

Row 1 — Refund claims: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-04-05

Row 2 — Refund claims: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-04-12

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Refund claims submitted for 12 delivered actions: 318,000 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-23-07 — Archive submission evidence · done by Compliance Officer

Input: Refund claims → **Output:** Regulatory submission tracker

Step MP-41.6 — Archive submission evidence (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-18.6 — Close budget period (Finance Manager)

Type:

Decision: Approved

Budget period: Budget period

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-04-12

Decided by: Tarik Lahlou

Then click Complete the step.

Result to record in the task: Archive file, decision and claims; retention 10 years.

When every step is complete, click Complete in the task panel.

E2E-16 — Vendor-to-Finance

Goal: Manage vendors from selection to payment

Starts when: Training need requiring an external provider. **Ends with:** Vendor selected, order issued and payment approved against attendance.

Task UFT-16-01 — Issue request for proposal · done by Purchasing Officer

Input: Training need → **Output:** RFP

Step MP-15.1 — Issue request for proposal (Purchasing Officer)

Type:

Row 1 — Request for proposal: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-12-16

Row 2 — Request for proposal: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-12-23

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: RFP 'Training on MES and digital shop-floor tracking' sent to 4 vendors, answers due 15 May.

When every step is complete, click Complete in the task panel.

Task UFT-16-02 — Score vendor proposals · done by Purchasing Officer

Input: RFP → **Output:** Scored proposals

Step MP-15.2 — Score vendor proposals (Purchasing Officer)

Type:

Row 1 — Vendor proposals: MES and digital shop-floor tracking · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Vendor proposals: PLM and digital engineering change · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Vendor proposals: Supplier portal and EDI · **Criterion:** Cost · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Scores: vendor A 82, vendor B 76, vendor C 64 (price 40%, expertise 40%, references 20%).

When every step is complete, click Complete in the task panel.

Task UFT-16-03 — Register and verify vendor · done by Purchasing Officer

Input: Scored proposals → **Output:** Accredited vendor

Step MP-15.3 — Register vendor record (Purchasing Officer)

Type:

Row 1 — Vendor record: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Meryem Lahlou · **Source:** Questionnaire results

Row 2 — Vendor record: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Yassine Bouzidi · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Vendor record register".

Step MP-15.4 — Verify vendor accreditation (Compliance Officer)

Type:

Vendor accreditation: Vendor accreditation

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-01-02

Then click Complete the step.

Result to record in the task: Register vendor A; accreditation OFPPT verified, valid until December.

When every step is complete, click Complete in the task panel.

Task UFT-16-04 — Issue purchase order · done by Purchasing Officer

Input: Accredited vendor → **Output:** Purchase order

Step MP-15.5 — Issue purchase order (Purchasing Officer)

Type:

Row 1 — Purchase order: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-12-22

Row 2 — Purchase order: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-12-29

Then click Complete the step. The rows go to the register "Communications log".

Step MP-18.3 — Record committed and actual costs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Purchase order PO-2026-044: 180,000 MAD on budget line 'MES and digital shop-floor tracking'.

When every step is complete, click Complete in the task panel.

Task UFT-16-05 — Match invoice to order and attendance · done by Training Administrator

Input: Purchase order → **Output:** Matched invoice

Step MP-15.6 — Match invoice to order and attendance (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-11.5 — Reconcile attendance with invoices (Training Administrator)

Type:

Attendance with invoices: Attendance with invoices

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-01-20

Then click Complete the step.

Result to record in the task: Invoice matched with PO and attendance (3 days × 12 learners): OK.

When every step is complete, click Complete in the task panel.

Task UFT-16-06 — Approve vendor payment · done by Finance Manager

Input: Matched invoice → **Output:** Vendor performance & spend report

Step MP-15.7 — Approve vendor payment (Finance Manager)

Type:

Decision: Approved

Vendor payment: Vendor payment

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-12-24

Decided by: Tarik Lahlou

Then click Complete the step.

Step MP-18.4 — Compare spend against budget (Finance Manager)

Type:

Row 1 — Spend against budget: MES and digital shop-floor tracking · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Spend against budget: PLM and digital engineering change · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Spend against budget: Supplier portal and EDI · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Approve payment 180,000 MAD; vendor performance rating 4/5.

When every step is complete, click Complete in the task panel.

AUTO-E2E-02 — Automotive Critical-Skills-to-Transformation Plan

Goal: Turn critical-skill gaps and digital and AI use cases into a transformation plan.

Starts when: Annual plan cycle or technology change in Automotive. **Ends with:** Transformation learning paths approved.

Task UFT-AUTO-E2-01 — List critical Assembly & Production skills · done by L&D Analyst

Input: Sector obligations → **Output:** Record each critical skill with its level.

Step MP-02.1 — Define competency families and levels (L&D Analyst)

Type:

Row 1 — Competency families and levels: Raise MES and digital shop-floor tracking proficiency of Operator — Assembly & Production teams to level 3 · **Indicator:** KPI-004 (Training Engineering Report cycle time) · **Baseline:** 39 % · **Target:** 85 % · **Deadline:** 2026-12-07 · **Owner:** Sara Lahlou

Row 2 — Competency families and levels: Certify Supervisor — Assembly & Production staff on PLM and digital engineering change · **Indicator:** KPI-005 (Design approval lead time) · **Baseline:** 48 % · **Target:** 73 % · **Deadline:** 2026-12-14 · **Owner:** Zineb Lahlou

Row 3 — Competency families and levels: Cut onboarding time on Supplier portal and EDI by 30 % · **Indicator:** KPI-006 (License Compliance %) · **Baseline:** 37 % · **Target:** 88 % · **Deadline:** 2026-12-21 · **Owner:** Leila Rami

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-03.1 — Compute gap matrix (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Critical skills: 6 for Assembly & Production, each with target level 3.

When every step is complete, click Complete in the task panel.

Task UFT-AUTO-E2-02 — List digital and AI use cases · done by L&D Strategist

Input: Sector obligations → **Output:** Record the use cases that change jobs.

Step MP-03.3 — Plan diagnostic interviews (L&D Analyst)

Type:

Row 1 — Diagnostic interviews: Diagnostic interviews — MES and digital shop-floor tracking · **Owner:** Zineb Lahlou · **Start:** 2026-06-22 · **End:** 2026-07-22 · **Budget:** 68000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Diagnostic interviews: Diagnostic interviews — PLM and digital engineering change · **Owner:** Leila Rami · **Start:** 2026-06-29 · **End:** 2026-07-29 · **Budget:** 30000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Use cases: MES and digital shop-floor tracking; PLM and digital engineering change; Supplier portal and EDI.

When every step is complete, click Complete in the task panel.

Task UFT-AUTO-E2-03 — Forecast impacted roles · done by Performance Analyst

Input: Sector obligations → **Output:** Review the AI forecast of impacted roles.

Step MP-03.5 — Cluster needs into training themes (L&D Analyst)

Type:

Row 1 — Needs into training themes: MES and digital shop-floor tracking · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Needs into training themes: PLM and digital engineering change · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Needs into training themes: Supplier portal and EDI · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 2 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-28.3 — Forecast skill gaps (Performance Analyst)

Type:

Row 1 — Skill gaps: KPI-006 (License Compliance %) · **Period:** 2026-Q3 · **Value:** 73 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Skill gaps: KPI-007 (Content publication lead time) · **Period:** 2026-Q1 · **Value:** 67 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Impacted roles: supervisors (high), operators (medium); accept the AI forecast.

When every step is complete, click Complete in the task panel.

Task UFT-AUTO-E2-04 — Approve transformation paths · done by Instructional Designer

Input: Sector obligations → **Output:** Approve the learning paths per role.

Step MP-05.2 — Define learning path and modules (Instructional Designer)

Type:

Row 1 — Learning path and modules: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Rachid Amrani · **Source:** Interview with the function head

Row 2 — Learning path and modules: PLM and digital engineering change · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Sara Rami · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Learning path and modules register".

Step MP-05.7 — Approve design document (Head of L&D)

Type:

Decision: Approved

Design document: Design document

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2026-06-26

Decided by: Tarik Lahlou

Then click Complete the step.

Result to record in the task: Approve 2 transformation paths: 'MES and digital shop-floor tracking for supervisors', 'PLM and digital engineering change for operators'.

When every step is complete, click Complete in the task panel.

Gate G3 — G3 — Report & roadmap approved: close the phase

1. Open the project workspace and click the gate button of the phase.
1. Tick each checklist item once its evidence is attached, then click Submit for decision.
1. Click Go. Type the justification: All mandatory items met; evidence attached.
1. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

Phase 4 — Design & delivery

E2E-04 — Roadmap-to-Curriculum Design

Goal: Convert roadmap into curriculum maps, learning paths, design documents

Starts when: Approved Training Engineering Report and roadmap published. **Ends with:** Approved curriculum maps, learning paths and design documents.

Task UFT-04-01 — Create curriculum map · done by Instructional Designer

Input: Approved roadmap → **Output:** Curriculum map

Step MP-05.1 — Create curriculum map from roadmap (Instructional Designer)

Type:

Row 1 — Curriculum map from roadmap: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Sara Lahlou · **Source:** Questionnaire results

Row 2 — Curriculum map from roadmap: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Zineb Lahlou · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Curriculum map from roadmap register".

Result to record in the task: Curriculum map 'MES and digital shop-floor tracking': 3 learning paths (operators, supervisors, managers), 9 modules.

When every step is complete, click Complete in the task panel.

Task UFT-04-02 — Define learning paths and modules · done by Instructional Designer

Input: Curriculum map → **Output:** Learning paths

Step MP-05.2 — Define learning path and modules (Instructional Designer)

Type:

Row 1 — Learning path and modules: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Zineb Lahlou · **Source:** Annual performance review

Row 2 — Learning path and modules: PLM and digital engineering change · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Leila Rami · **Source:** Audit report

Then click Complete the step. The rows go to the register "Learning path and modules register".

Result to record in the task: Path 'Supervisors — MES and digital shop-floor tracking': 4 modules, 3 days blended (1 day e-learning, 2 days workshop).

When every step is complete, click Complete in the task panel.

Task UFT-04-03 — Write learning objectives · done by Instructional Designer

Input: Learning paths → **Output:** Learning objectives

Step MP-05.3 — Write learning objectives per module (Instructional Designer)

Type:

Row 1 — Learning objectives per module: Raise MES and digital shop-floor tracking proficiency of Operator — Assembly & Production teams to level 3 · **Indicator:** KPI-015 (Training record correction rate) · **Baseline:** 43 % · **Target:** 89 % · **Deadline:** 2027-02-07 · **Owner:** Leila Rami

Row 2 — Learning objectives per module: Certify Supervisor — Assembly & Production staff on PLM and digital engineering change · **Indicator:** KPI-016 (Knowledge reuse rate) · **Baseline:** 35 % · **Target:** 85 % · **Deadline:** 2027-02-14 · **Owner:** Rachid Amrani

Row 3 — Learning objectives per module: Cut onboarding time on Supplier portal and EDI by 30 % · **Indicator:** KPI-017 (IDP coverage) · **Baseline:** 47 % · **Target:** 79 % · **Deadline:** 2027-02-21 · **Owner:** Sara Rami

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Objective M1: 'By the end, the supervisor reads the MES and digital shop-floor tracking dashboard and decides the shift action in 5 minutes.'

When every step is complete, click Complete in the task panel.

Task UFT-04-04 — Propose module structure · done by Instructional Designer

Input: Learning objectives → **Output:** Module structure

Step MP-05.4 — Propose module structure (Instructional Designer)

Type:

Row 1 — Module structure: Module structure — MES and digital shop-floor tracking · **Owner:** Rachid Amrani · **Start:** 2026-08-23 · **End:** 2026-09-22 · **Budget:** 55000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Module structure: Module structure — PLM and digital engineering change · **Owner:** Sara Rami · **Start:** 2026-08-30 · **End:** 2026-09-29 · **Budget:** 55000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Accept the proposed structure (intro, demo, practice, quiz); replace the quiz by a live case from Assembly & Production.

When every step is complete, click Complete in the task panel.

Task UFT-04-05 — Set assessment strategy · done by Instructional Designer

Input: Module structure → **Output:** Assessment strategy

Step MP-05.5 — Set assessment strategy (Instructional Designer)

Type:

Row 1 — Assessment strategy: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Assessment strategy: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Assessment: pre/post test (Level 2) and manager observation after 30 days (Level 3).

When every step is complete, click Complete in the task panel.

Task UFT-04-06 — Develop and tag content · done by Content Developer

Input: Assessment strategy → **Output:** Tagged content assets

Step MP-06.1 — Upload content assets (Content Developer)

Type:

Row 1 — Content assets: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Content assets: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Step MP-06.2 — Validate package format (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-06.5 — Tag content with competencies (Content Developer)

Type:

Row 1 — Content with competencies: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Youssef Lahlou · **Source:** Questionnaire results

Row 2 — Content with competencies: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Ayoub Ziani · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Content with competencies register".

Result to record in the task: Upload 'M1_MES and digital shop-floor tracking.pptx' and 'M1_video.mp4'; tag competency 'MES and digital shop-floor tracking' level 3.

When every step is complete, click Complete in the task panel.

Task UFT-04-07 — Localize and check accessibility · done by Instructional Designer

Input: Tagged content assets → **Output:** Localized accessible content

Step MP-23.1 — Request translation (Instructional Designer)

Type:

Row 1 — Translation: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-08-24

Row 2 — Translation: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-08-31

Then click Complete the step. The rows go to the register "Communications log".

Step MP-23.2 — Draft machine translation (Instructional Designer)

Type:

Row 1 — Machine translation: Machine translation — MES and digital shop-floor tracking · **Owner:** Ayoub Ziani · **Start:** 2026-08-29 · **End:** 2026-09-28 · **Budget:** 29000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Machine translation: Machine translation — PLM and digital engineering change · **Owner:** Meryem Lahlou · **Start:** 2026-09-05 · **End:** 2026-10-05 · **Budget:** 27000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-23.3 — Validate translation (Subject Matter Expert)

Type:

Decision: Approved

Translation: Translation

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2026-09-12

Decided by: Tarik Lahlou

Then click Complete the step.

Step MP-23.4 — Run accessibility check (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-23.5 — Fix accessibility issues (Content Developer)

Type:

Accessibility issues: Accessibility issues

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-09-13

Then click Complete the step.

Result to record in the task: Request FR and AR versions; validate the AI draft translation; accessibility check: 0 blocking issues.

When every step is complete, click Complete in the task panel.

Task UFT-04-08 — Approve design document · done by Head of L&D

Input: Localized accessible content → **Output:** Approved design document

Step MP-05.6 — Review design with subject matter expert (Subject Matter Expert)

Type:

Design with subject matter expert: Design with subject matter expert

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-09-22

Then click Complete the step.

Step MP-05.7 — Approve design document (Head of L&D)

Type:

Decision: Approved with conditions

Design document: Design document

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2026-09-21

Decided by: Tarik Lahlou

Then click Complete the step.

Result to record in the task: Decision: design approved. Comment: SME review done on 12 May; ready for delivery.

When every step is complete, click Complete in the task panel.

E2E-05 — Design-to-Delivery

Goal: Deliver training across all modalities

Starts when: Approved design document and prioritized training plan. **Ends with:** Training delivered across all modalities with attendance and completion recorded.

Task UFT-05-01 — Publish content to catalog · done by Content Developer

Input: Approved design → **Output:** Published catalog

Step MP-06.3 — Route content for expert review (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-06.4 — Record review decision (Subject Matter Expert)

Type:

Row 1 — Review decision: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Yassine Bouzidi · **Source:** HRIS export

Row 2 — Review decision: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Hajar Bouzidi · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Review decision register".

Step MP-06.6 — Publish content to catalog (Content Developer)

Type:

Row 1 — Content to catalog: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-08-28

Row 2 — Content to catalog: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-09-04

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish module 'M1 MES and digital shop-floor tracking' to the catalog; audience: supervisors; languages EN/FR/AR.

When every step is complete, click Complete in the task panel.

Task UFT-05-02 — Book logistics · done by Training Administrator

Input: Published catalog → **Output:** Logistics plan

Step MP-11.1 — Book rooms and equipment (Training Administrator)

Type:

Row 1 — Rooms and equipment: Rooms and equipment — MES and digital shop-floor tracking · **Owner:** Hajar Bouzidi · **Start:** 2026-09-04 · **End:** 2026-10-04 · **Budget:** 73000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Rooms and equipment: Rooms and equipment — PLM and digital engineering change · **Owner:** Imane Tazi · **Start:** 2026-09-11 · **End:** 2026-10-11 · **Budget:** 35000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-11.2 — Manage trainer calendars (Training Administrator)

Type:

Row 1 — Trainer calendars: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hajar Bouzidi · **Source:** Interview with the function head

Row 2 — Trainer calendars: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Imane Tazi · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Trainer calendars register".

Result to record in the task: Room 'Training A' (20 seats) 3-5 June; projector; trainer calendar blocked.

When every step is complete, click Complete in the task panel.

Task UFT-05-03 — Schedule sessions · done by Training Administrator

Input: Logistics plan → **Output:** Session schedule

Step MP-07.1 — Create training session (Training Administrator)

Type:

Row 1 — Training session: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Imane Tazi · **Source:** Questionnaire results

Row 2 — Training session: PLM and digital engineering change · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hicham Rami · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Training session register".

Step MP-07.2 — Check scheduling conflicts (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Session S-01 'MES and digital shop-floor tracking — supervisors', 3-5 June, 12 seats, no conflict reported.

When every step is complete, click Complete in the task panel.

Task UFT-05-04 — Enroll learners and send convocations · done by Training Administrator

Input: Session schedule → **Output:** Enrollments

Step MP-07.3 — Enroll learners into session (Training Administrator)

Type:

Row 1 — Learners into session: MES and digital shop-floor tracking — half-day workshop · **Date:** 2026-09-18 · **Trainer:** Atlas Formation Conseil · **Participants:** 16 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Learners into session: PLM and digital engineering change — half-day workshop · **Date:** 2026-09-25 · **Trainer:** Maghreb Learning Partners · **Participants:** 19 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-07.4 — Send convocations (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-17.1 — Provision users via SSO (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Enroll 12 supervisors; convocations sent by e-mail and SMS in each learner's language.

When every step is complete, click Complete in the task panel.

Task UFT-05-05 — Push microlearning capsules · done by Instructional Designer

Input: Enrollments → **Output:** Capsules in flow of work

Step MP-25.1 — Author microlearning capsule (Instructional Designer)

Type:

Row 1 — Microlearning capsule: Microlearning capsule — MES and digital shop-floor tracking · **Owner:** Hajar Mansouri · **Start:** 2026-09-10 · **End:** 2026-10-10 · **Budget:** 30000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Microlearning capsule: Microlearning capsule — PLM and digital engineering change · **Owner:** Adil Naciri · **Start:** 2026-09-17 · **End:** 2026-10-17 · **Budget:** 69000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-25.2 — Generate capsule draft from source (Instructional Designer)

Type:

Row 1 — Capsule draft from source: Capsule draft from source — MES and digital shop-floor tracking · **Owner:** Hajar Mansouri · **Start:** 2026-09-10 · **End:** 2026-10-10 · **Budget:** 58000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Capsule draft from source: Capsule draft from source — PLM and digital engineering change · **Owner:** Adil Naciri · **Start:** 2026-09-17 · **End:** 2026-10-17 · **Budget:** 57000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-25.3 — Push capsule to collaboration channel (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-25.4 — Consume capsule on mobile (Learner)

Type:

Row 1 — Capsule on mobile: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hajar Mansouri · **Source:** Audit report

Row 2 — Capsule on mobile: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Adil Naciri · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Capsule on mobile register".

Step MP-25.5 — Track capsule completion (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Capsule '5-minute PLM and digital engineering change check' pushed to the Teams channel of Assembly & Production; 48 views in week 1.

When every step is complete, click Complete in the task panel.

Task UFT-05-06 — Run immersive simulations · done by Trainer

Input: Enrollments → **Output:** Simulation results

Step MP-30.1 — Define simulation scenario (Instructional Designer)

Type:

Row 1 — Simulation scenario: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Adil Naciri · **Source:** HRIS export

Row 2 — Simulation scenario: PLM and digital engineering change · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Yassine Hajji · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Simulation scenario register".

Step MP-30.2 — Configure simulation scoring (Instructional Designer)

Type:

Row 1 — Simulation scoring: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Simulation scoring: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Step MP-30.3 — Launch simulation session (Trainer)

Type:

Row 1 — Simulation session: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-09-07

Row 2 — Simulation session: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-09-14

Then click Complete the step. The rows go to the register "Communications log".

Step MP-30.4 — Capture simulation performance (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-30.5 — Debrief learner (Trainer)

Type:

Row 1 — Learner: MES and digital shop-floor tracking — half-day workshop · **Date:** 2026-09-22 · **Trainer:** Atlas Formation Conseil · **Participants:** 13 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Learner: PLM and digital engineering change — half-day workshop · **Date:** 2026-09-29 · **Trainer:** Maghreb Learning Partners · **Participants:** 14 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-30.6 — Record simulation evidence (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Simulation 'Assembly & Production incident': score 78/100; debrief notes recorded; evidence saved.

When every step is complete, click Complete in the task panel.

Task UFT-05-07 — Record attendance · done by Trainer

Input: Session schedule → **Output:** Attendance records

Step MP-07.5 — Record attendance (Trainer)

Type:

Row 1 — Attendance: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Yassine Hajji · **Source:** Interview with the function head

Row 2 — Attendance: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Zineb Rami · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Attendance register".

Result to record in the task: Attendance S-01: 11 present, 1 absent (justified). Signature sheet attached.

When every step is complete, click Complete in the task panel.

Task UFT-05-08 — Close sessions · done by Training Administrator

Input: Attendance records → **Output:** Completion records

Step MP-07.6 — Close session and record completion (Training Administrator)

Type:

Decision: Approved

Session and record completion: Session and record completion

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-09-23

Decided by: Tarik Lahlou

Then click Complete the step.

Result to record in the task: Close S-01: 11 completions recorded; certificate issued to each participant.

When every step is complete, click Complete in the task panel.

Task UFT-05-09 — Reconcile and archive period · done by Training Administrator

Input: Completion records → **Output:** Closed delivery period

Step MP-11.5 — Reconcile attendance with invoices (Training Administrator)

Type:

Attendance with invoices: Attendance with invoices

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-10-03

Then click Complete the step.

Step MP-11.6 — Archive period records (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-11.3 — Import external training records (Training Administrator)

Type:

Row 1 — External training records: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — External training records: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Step MP-11.4 — Correct training record with justification (Training Administrator)

Type:

Training record with justification: Training record with justification

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-10-03

Then click Complete the step.

Result to record in the task: Reconcile invoice INV-2026-118 (3 days × 12 learners) with attendance; archive period Q2.

When every step is complete, click Complete in the task panel.

E2E-06 — Learner-Journey-to-Engagement

Goal: Deliver personalized, engaging learning experience

Starts when: Learner enrolled in a learning path or session. **Ends with:** Personalized learning journey completed with engagement measured.

Task UFT-06-01 — Generate personal learning plan · done by L&D Analyst

Input: Enrollments → **Output:** Personal learning plans

Step MP-08.1 — Generate personal learning plan (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Personal plan generated for each learner: 3 items on MES and digital shop-floor tracking, 1 capsule on PLM and digital engineering change.

When every step is complete, click Complete in the task panel.

Task UFT-06-02 — Recommend learning items · done by Learner

Input: Personal learning plans → **Output:** Recommendations

Step MP-08.2 — Recommend learning items (Learner)

Type:

Row 1 — Learning items: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Salma Sefrioui · **Source:** HRIS export

Row 2 — Learning items: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hajar Benjelloun · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Learning items register".

Step MP-24.1 — Enable personalization per scope (Platform Administrator)

Type:

Row 1 — Personalization per scope: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Personalization per scope: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Accept 2 recommendations, reject 1 ('already mastered'). The outcome is logged.

When every step is complete, click Complete in the task panel.

Task UFT-06-03 — Adapt path to performance · done by Instructional Designer

Input: Recommendations → **Output:** Adapted paths

Step MP-24.2 — Set adaptation rules (Instructional Designer)

Type:

Row 1 — Adaptation rules: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Adaptation rules: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Step MP-24.3 — Adapt path to learner performance (Learner)

Type:

Row 1 — Path to learner performance: Path to learner performance — MES and digital shop-floor tracking · **Owner:** Hajar Benjelloun · **Start:** 2026-09-24 · **End:** 2026-10-24 · **Budget:** 76000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Path to learner performance: Path to learner performance — PLM and digital engineering change · **Owner:** Salma Sefrioui · **Start:** 2026-10-01 · **End:** 2026-10-31 · **Budget:** 24000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-24.4 — Record learner response to adaptation (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Rule: if the quiz score < 60%, add the remedial capsule 'MES and digital shop-floor tracking basics'.

When every step is complete, click Complete in the task panel.

Task UFT-06-04 — Animate social learning · done by Knowledge Manager

Input: Adapted paths → **Output:** Active cohorts

Step MP-26.1 — Create learning cohort group (Knowledge Manager)

Type:

Row 1 — Learning cohort group: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Salma Sefrioui · **Source:** Questionnaire results

Row 2 — Learning cohort group: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Ghita Bouzidi · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Learning cohort group register".

Step MP-26.2 — Invite group members (Knowledge Manager)

Type:

Row 1 — Group members: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-09-21

Row 2 — Group members: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-09-28

Then click Complete the step. The rows go to the register "Communications log".

Step MP-26.3 — Post question or answer (Learner)

Type:

Row 1 — Question or answer: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-09-21

Row 2 — Question or answer: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-09-28

Then click Complete the step. The rows go to the register "Communications log".

Step MP-26.4 — Endorse expert answer (Subject Matter Expert)

Type:

Decision: Approved

Expert answer: Expert answer

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-10-03

Decided by: Tarik Lahlou

Then click Complete the step.

Step MP-26.5 — Flag inappropriate content (Learner)

Type:

Row 1 — Inappropriate content: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Salma Sefrioui · **Source:** Questionnaire results

Row 2 — Inappropriate content: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Ghita Bouzidi · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Inappropriate content register".

Step MP-26.6 — Resolve moderation flag (Knowledge Manager)

Type:

Moderation flag: Moderation flag

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-10-04

Then click Complete the step.

Result to record in the task: Create cohort 'MES and digital shop-floor tracking supervisors 2026' and invite 12 members; first question posted.

When every step is complete, click Complete in the task panel.

Task UFT-06-05 — Run gamification · done by Instructional Designer

Input: Active cohorts → **Output:** Awards

Step MP-27.1 — Define points and badge rules (Instructional Designer)

Type:

Row 1 — Points and badge rules: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Ghita Bouzidi · **Source:** Annual performance review

Row 2 — Points and badge rules: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Loubna Chraibi · **Source:** Audit report

Then click Complete the step. The rows go to the register "Points and badge rules register".

Step MP-27.2 — Configure leaderboard scope (Instructional Designer)

Type:

Row 1 — Leaderboard scope: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Leaderboard scope: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Step MP-27.3 — Award points on completion (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-27.4 — Unlock badge (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-27.6 — Adjust gamification rules (Instructional Designer)

Type:

Gamification rules: Gamification rules

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-10-13

Then click Complete the step.

Result to record in the task: Badge 'MES and digital shop-floor tracking Practitioner' for completing 3 modules; 10 points per capsule.

When every step is complete, click Complete in the task panel.

Task UFT-06-06 — Match and run coaching · done by L&D Business Partner

Input: Learner requests → **Output:** Coaching sessions

Step MP-21.1 — Request coaching (Learner)

Type:

Row 1 — Coaching: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-09-25

Row 2 — Coaching: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-10-02

Then click Complete the step. The rows go to the register "Communications log".

Step MP-21.2 — Match coach to learner (L&D Business Partner)

Type:

Row 1 — Coach to learner: MES and digital shop-floor tracking · **Criterion:** Risk · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Coach to learner: PLM and digital engineering change · **Criterion:** Business impact · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Coach to learner: Supplier portal and EDI · **Criterion:** Urgency · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-21.3 — Schedule coaching sessions (Coach)

Type:

Row 1 — Coaching sessions: Coaching sessions — MES and digital shop-floor tracking · **Owner:** Loubna Chraibi · **Start:** 2026-09-30 · **End:** 2026-10-30 · **Budget:** 47000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Coaching sessions: Coaching sessions — PLM and digital engineering change · **Owner:** Anas Benjelloun · **Start:** 2026-10-07 · **End:** 2026-11-06 · **Budget:** 25000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-21.4 — Log coaching session notes (Coach)

Type:

Row 1 — Coaching session notes: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Loubna Chraibi · **Source:** Audit report

Row 2 — Coaching session notes: PLM and digital engineering change · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Anas Benjelloun · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Coaching session notes register".

Step MP-21.5 — Evaluate coaching outcomes (Manager)

Type:

Row 1 — Coaching outcomes: MES and digital shop-floor tracking · **Criterion:** Risk · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Coaching outcomes: PLM and digital engineering change · **Criterion:** Business impact · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Coaching outcomes: Supplier portal and EDI · **Criterion:** Urgency · **Weight (%):** 20 · **Score (1–5):** 2 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-21.6 — Close coaching engagement (Coach)

Type:

Decision: Approved with conditions

Coaching engagement: Coaching engagement

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2026-10-21

Decided by: Tarik Lahlou

Then click Complete the step.

Result to record in the task: Match coach 'Senior Assembly & Production supervisor' to 3 learners; 4 sessions of 1 hour.

When every step is complete, click Complete in the task panel.

Task UFT-06-07 — Collect learner feedback · done by Learner

Input: Coaching sessions → **Output:** Learner feedback

Step MP-08.3 — Enroll in recommended item (Learner)

Type:

Row 1 — In recommended item: MES and digital shop-floor tracking — half-day workshop · **Date:** 2026-10-12 · **Trainer:** Atlas Formation Conseil · **Participants:** 18 · **Hours:** 3.5 · **Modality:** On site

Row 2 — In recommended item: PLM and digital engineering change — half-day workshop · **Date:** 2026-10-19 · **Trainer:** Maghreb Learning Partners · **Participants:** 16 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-08.4 — Submit learning feedback (Learner)

Type:

Row 1 — Learning feedback: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-09-27

Row 2 — Learning feedback: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-10-04

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Feedback: 4.4/5; comment 'more real cases from Assembly & Production'.

When every step is complete, click Complete in the task panel.

Task UFT-06-08 — Monitor engagement and nudge · done by L&D Analyst

Input: Learner feedback → **Output:** Engagement report

Step MP-08.5 — Monitor engagement indicators (L&D Analyst)

Type:

Row 1 — Engagement indicators: KPI-017 (IDP coverage) · **Period:** 2026-Q3 · **Value:** 94 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — Engagement indicators: KPI-018 (Mandatory certification compliance) · **Period:** 2026-Q1 · **Value:** 89 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-08.6 — Trigger re-engagement nudge (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-24.5 — Review recommendation acceptance (L&D Analyst)

Type:

Recommendation acceptance: Recommendation acceptance

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-10-05

Then click Complete the step.

Step MP-27.5 — Review engagement uplift (L&D Analyst)

Type:

Engagement uplift: Engagement uplift

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-10-05

Then click Complete the step.

Step MP-24.6 — Tune personalization settings (L&D Analyst)

Type:

Row 1 — Personalization settings: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Personalization settings: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Step MP-28.4 — Predict learner drop-out risk (Performance Analyst)

Type:

Row 1 — Learner drop-out risk: KPI-017 (IDP coverage) · **Period:** 2026-Q3 · **Value:** 87 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — Learner drop-out risk: KPI-018 (Mandatory certification compliance) · **Period:** 2026-Q1 · **Value:** 60 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-28.5 — Review predictions with L&D (Head of L&D)

Type:

Predictions with L&D: Predictions with L&D

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-10-05

Then click Complete the step.

Step MP-28.6 — Create preventive action (L&D Analyst)

Type:

Row 1 — Preventive action: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Loubna El Idrissi · **Source:** Interview with the function head

Row 2 — Preventive action: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Soukaina Berrada · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Preventive action register".

Result to record in the task: Engagement 81%; nudge sent to 9 inactive learners; drop-out risk high for 2 learners.

When every step is complete, click Complete in the task panel.

E2E-13 — Content-Curate-to-Retire

Goal: Publish, maintain, retire content

Starts when: New content published or content past its review date. **Ends with:** Catalog curated, maintained and outdated content retired.

Task UFT-13-01 — Aggregate provider catalogs · done by Content Curator

Input: Provider catalogs → **Output:** Aggregated catalog

Step MP-29.1 — Aggregate provider catalogs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Aggregate 2 provider catalogs (LinkedIn Learning, Coursera): 1,240 items imported.

When every step is complete, click Complete in the task panel.

Task UFT-13-02 — Recommend curated items · done by Content Curator

Input: Aggregated catalog → **Output:** Ranked items

Step MP-29.2 — Recommend curated items (Content Curator)

Type:

Row 1 — Curated items: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Zineb Rami · **Source:** Interview with the function head

Row 2 — Curated items: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Leila Sefrioui · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Curated items register".

Result to record in the task: Keep the 15 top-ranked items on MES and digital shop-floor tracking; reject 3 items older than 3 years.

When every step is complete, click Complete in the task panel.

Task UFT-13-03 — Approve and organize collections · done by Content Curator

Input: Ranked items → **Output:** Curated collections

Step MP-29.3 — Approve curated item (Content Curator)

Type:

Decision: Approved

Curated item: Curated item

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-11-22

Decided by: Tarik Lahlou

Then click Complete the step.

Step MP-29.4 — Organize curated collection (Content Curator)

Type:

Row 1 — Curated collection: Curated collection — MES and digital shop-floor tracking · **Owner:** Leila Sefrioui · **Start:** 2026-11-15 · **End:** 2026-12-15 · **Budget:** 28000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Curated collection: Curated collection — PLM and digital engineering change · **Owner:** Ayoub Bennani · **Start:** 2026-11-22 · **End:** 2026-12-22 · **Budget:** 65000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Collection 'MES and digital shop-floor tracking starter kit': 8 items, audience supervisors, review date in 12 months.

When every step is complete, click Complete in the task panel.

Task UFT-13-04 — Review peer content · done by Subject Matter Expert

Input: User submissions → **Output:** Approved peer content

Step MP-33.1 — Submit user-generated content (Employee)

Type:

Row 1 — User-generated content: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-11-12

Row 2 — User-generated content: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-11-19

Then click Complete the step. The rows go to the register "Communications log".

Step MP-33.2 — Check content against policy (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-33.3 — Peer review content (Subject Matter Expert)

Type:

Row 1 — Review content: MES and digital shop-floor tracking — half-day workshop · **Date:** 2026-11-27 · **Trainer:** Atlas Formation Conseil · **Participants:** 16 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Review content: PLM and digital engineering change — half-day workshop · **Date:** 2026-12-04 · **Trainer:** Maghreb Learning Partners · **Participants:** 18 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Peer video 'How we use PLM and digital engineering change on shift' reviewed by an expert: approved with 1 correction.

When every step is complete, click Complete in the task panel.

Task UFT-13-05 — Promote and rate content · done by Knowledge Manager

Input: Approved peer content → **Output:** Rated content

Step MP-33.5 — Send approved content to curation (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-33.6 — Rate user-generated item (Learner)

Type:

Row 1 — User-generated item: MES and digital shop-floor tracking · **Criterion:** Risk · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — User-generated item: PLM and digital engineering change · **Criterion:** Business impact · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — User-generated item: Supplier portal and EDI · **Criterion:** Urgency · **Weight (%):** 20 · **Score (1–5):** 3 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Send approved peer content to curation; average learner rating 4.5/5.

When every step is complete, click Complete in the task panel.

Task UFT-13-06 — Flag content past review date · done by Content Curator

Input: Rated content → **Output:** Review queue

Step MP-29.5 — Flag content past review date (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: 14 items past review date flagged; owners notified.

When every step is complete, click Complete in the task panel.

Task UFT-13-07 — Retire outdated content · done by Content Curator

Input: Review queue → **Output:** Content library health report

Step MP-29.6 — Retire outdated content (Content Curator)

Type:

Row 1 — Outdated content: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Outdated content: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Step MP-25.6 — Retire low-value capsule (Content Curator)

Type:

Row 1 — Low-value capsule: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Low-value capsule: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Retire 6 outdated items and 2 low-value capsules; library health 92%.

When every step is complete, click Complete in the task panel.

E2E-14 — Extended-Enterprise-Training

Goal: Certify partners and train customers

Starts when: Partner, reseller or customer training program launched. **Ends with:** External learners trained, paid and certified.

Task UFT-14-01 — Create external sub-portal · done by Extended Enterprise Manager

Input: Program brief → **Output:** External portal

Step MP-22.1 — Create external sub-portal (Extended Enterprise Manager)

Type:

Row 1 — External sub-portal: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Ghita Bouzidi · **Source:** Questionnaire results

Row 2 — External sub-portal: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Loubna Chraibi · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "External sub-portal register".

Result to record in the task: Sub-portal 'Partners Academy — Atlas Motors Kénitra' created for distributors and installers.

When every step is complete, click Complete in the task panel.

Task UFT-14-02 — Configure catalog and pricing · done by Extended Enterprise Manager

Input: External portal → **Output:** Priced catalog

Step MP-22.2 — Configure external catalog and pricing (Extended Enterprise Manager)

Type:

Row 1 — External catalog and pricing: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — External catalog and pricing: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Step MP-18.1 — Allocate budget by theme and site (Finance Manager)

Type:

Row 1 — Budget by theme and site: Budget by theme and site — MES and digital shop-floor tracking · **Owner:** Loubna Chraibi · **Start:** 2026-11-27 · **End:** 2026-12-27 · **Budget:** 26000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Budget by theme and site: Budget by theme and site — PLM and digital engineering change · **Owner:** Anas Benjelloun · **Start:** 2026-12-04 · **End:** 2027-01-03 · **Budget:** 22000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Catalog: 'IATF 16949 for partners' 1,200 MAD; 'MES and digital shop-floor tracking certification' 2,400 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-14-03 — Process payment and enroll · done by Extended Enterprise Manager

Input: Priced catalog → **Output:** External enrollments

Step MP-22.3 — Process online payment (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-22.4 — Enroll external learner (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: 18 online payments processed; 18 external learners enrolled.

When every step is complete, click Complete in the task panel.

Task UFT-14-04 — Deliver external sessions · done by Training Administrator

Input: External enrollments → **Output:** Attendance

Step MP-07.1 — Create training session (Training Administrator)

Type:

Row 1 — Training session: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Loubna El Idrissi · **Source:** HRIS export

Row 2 — Training session: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Soukaina Berrada · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Training session register".

Step MP-07.5 — Record attendance (Trainer)

Type:

Row 1 — Attendance: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Loubna El Idrissi · **Source:** HRIS export

Row 2 — Attendance: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Soukaina Berrada · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Attendance register".

Result to record in the task: Session P-01 (virtual), 18 invited, 16 present.

When every step is complete, click Complete in the task panel.

Task UFT-14-05 — Track external completion · done by Extended Enterprise Manager

Input: Attendance → **Output:** Completion status

Step MP-22.5 — Track external completion (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Completion: 15 of 16 passed the final quiz.

When every step is complete, click Complete in the task panel.

Task UFT-14-06 — Issue partner certification · done by Extended Enterprise Manager

Input: Completion status → **Output:** Partner certificates

Step MP-22.6 — Issue partner certification (Extended Enterprise Manager)

Type:

Row 1 — Partner certification: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-11-30

Row 2 — Partner certification: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-12-07

Then click Complete the step. The rows go to the register "Communications log".

Step MP-14.4 — Issue certificate on completion (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Issue 15 partner certificates valid 2 years.

When every step is complete, click Complete in the task panel.

Task UFT-14-07 — Reconcile external revenue · done by Finance Manager

Input: Partner certificates → **Output:** Revenue reconciliation

Step MP-18.3 — Record committed and actual costs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-18.4 — Compare spend against budget (Finance Manager)

Type:

Row 1 — Spend against budget: MES and digital shop-floor tracking · **Criterion:** Cost · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Spend against budget: PLM and digital engineering change · **Criterion:** Risk · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Spend against budget: Supplier portal and EDI · **Criterion:** Business impact · **Weight (%):** 20 · **Score (1–5):** 2 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Revenue 43,200 MAD reconciled with the ERP; 0 unpaid.

When every step is complete, click Complete in the task panel.

Gate G4 — G4 — Delivery readiness: close the phase

1. Open the project workspace and click the gate button of the phase.
1. Tick each checklist item once its evidence is attached, then click Submit for decision.
1. Click Go. Type the justification: All mandatory items met; evidence attached.
2. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

Phase 5 — Evaluation, compliance & impact

E2E-07 — Assessment-to-Evaluation

Goal: Measure training effectiveness and skill progression

Starts when: Training session or path completed. **Ends with:** Effectiveness measured on Kirkpatrick levels 1-3 and skill progression computed.

Task UFT-07-01 — Create assessment instrument · done by Instructional Designer

Input: Assessment strategy → **Output:** Assessment instrument

Step MP-09.1 — Create assessment instrument (Instructional Designer)

Type:

Row 1 — Assessment instrument: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Soukaina Berrada · **Source:** Questionnaire results

Row 2 — Assessment instrument: PLM and digital engineering change · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Ghita Ziani · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Assessment instrument register".

Result to record in the task: Instrument 'Test MES and digital shop-floor tracking M1': 15 questions, pass mark 70%.

When every step is complete, click Complete in the task panel.

Task UFT-07-02 — Draft question bank · done by Instructional Designer

Input: Assessment instrument → **Output:** Question bank

Step MP-09.2 — Generate question bank draft (Instructional Designer)

Type:

Row 1 — Question bank draft: Question bank draft — MES and digital shop-floor tracking · **Owner:** Ghita Ziani · **Start:** 2026-10-08 · **End:** 2026-11-07 · **Budget:** 27000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Question bank draft: Question bank draft — PLM and digital engineering change · **Owner:** Tarik Lahlou · **Start:** 2026-10-15 · **End:** 2026-11-14 · **Budget:** 62000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Keep 12 AI-drafted questions, rewrite 3 with Assembly & Production vocabulary; validate each one.

When every step is complete, click Complete in the task panel.

Task UFT-07-03 — Collect reaction survey (Level 1) · done by L&D Analyst

Input: Completion records → **Output:** Level 1 results

Step MP-09.3 — Collect reaction survey (Level 1) (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Reaction survey S-01: 11 responses, satisfaction 4.3/5.

When every step is complete, click Complete in the task panel.

Task UFT-07-04 — Record learning results (Level 2) · done by Trainer

Input: Level 1 results → **Output:** Level 2 results

Step MP-09.4 — Record learning results (Level 2) (Trainer)

Type:

Row 1 — Learning results (Level 2): MES and digital shop-floor tracking · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Omar Benjelloun · **Source:** HRIS export

Row 2 — Learning results (Level 2): PLM and digital engineering change · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Sara Lahlou · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Learning results (Level 2) register".

Result to record in the task: Level 2: average pre-test 48%, post-test 81% (+33 points).

When every step is complete, click Complete in the task panel.

Task UFT-07-05 — Record on-the-job observation (Level 3) · done by Manager

Input: Level 2 results → **Output:** Level 3 results

Step MP-09.5 — Record on-the-job observation (Level 3) (Manager)

Type:

Row 1 — On-the-job observation (Level 3): MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Sara Lahlou · **Source:** Interview with the function head

Row 2 — On-the-job observation (Level 3): PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Zineb Lahlou · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "On-the-job observation (Level 3) register".

Result to record in the task: Level 3 (day 30): 9 of 11 supervisors apply the MES and digital shop-floor tracking routine daily.

When every step is complete, click Complete in the task panel.

Task UFT-07-06 — Compute skill progression · done by L&D Analyst

Input: Level 3 results → **Output:** Skill progression

Step MP-09.6 — Compute skill progression (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-10.3 — Refresh KPI computation (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Skill progression: MES and digital shop-floor tracking from 1.8 to 2.7 (target 3).

When every step is complete, click Complete in the task panel.

Task UFT-07-07 — Review evaluation results · done by L&D Analyst

Input: Skill progression → **Output:** Evaluation review

Step MP-09.7 — Review evaluation results (L&D Analyst)

Type:

Evaluation results: Evaluation results

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-08-21

Then click Complete the step.

Step MP-20.5 — Run periodic quality review (Quality Manager)

Type:

Row 1 — Periodic quality review: MES and digital shop-floor tracking — half-day workshop · **Date:** 2027-08-30 · **Trainer:** Atlas Formation Conseil · **Participants:** 14 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Periodic quality review: PLM and digital engineering change — half-day workshop · **Date:** 2027-09-06 · **Trainer:** Maghreb Learning Partners · **Participants:** 11 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Review: module M3 below 70% pass rate → improvement action assigned to the designer.

When every step is complete, click Complete in the task panel.

Task UFT-07-08 — Publish evaluation report · done by L&D Analyst

Input: Evaluation review → **Output:** Kirkpatrick evaluation report

Step MP-10.4 — Export report (L&D Analyst)

Type:

Row 1 — Report: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Report: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Step MP-10.6 — Share insight with stakeholders (L&D Analyst)

Type:

Row 1 — Insight with stakeholders: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-08-17

Row 2 — Insight with stakeholders: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-08-24

Then click Complete the step. The rows go to the register "Communications log".

Step MP-10.2 — Configure dashboard widgets (L&D Analyst)

Type:

Row 1 — Dashboard widgets: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Dashboard widgets: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Export RPT-016 Kirkpatrick report (PDF) and share with the Steering Committee.

When every step is complete, click Complete in the task panel.

E2E-08 — Learning-to-ROI

Goal: Validate ROI and business impact

Starts when: Evaluation results available for a theme selected for an ROI study. **Ends with:** Phillips ROI validated with finance and business impact report published.

Task UFT-08-01 — Select theme for ROI study · done by Performance Analyst

Input: Evaluation review → **Output:** ROI scope

Step MP-32.1 — Select theme for ROI study (Performance Analyst)

Type:

Decision: Approved

Theme for ROI study: Theme for ROI study

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2026-11-01

Decided by: Tarik Lahlou

Then click Complete the step.

Result to record in the task: ROI study on theme 'MES and digital shop-floor tracking' — population: 36 supervisors, 3 sites.

When every step is complete, click Complete in the task panel.

Task UFT-08-02 — Define business indicators · done by Performance Analyst

Input: ROI scope → **Output:** Indicator set

Step MP-32.2 — Define business indicators (Performance Analyst)

Type:

Row 1 — Business indicators: Raise MES and digital shop-floor tracking proficiency of Operator — Assembly & Production teams to level 3 · **Indicator:** KPI-005 (Design approval lead time) · **Baseline:** 30 % · **Target:** 71 % · **Deadline:** 2027-04-08 · **Owner:** Rachid Amrani

Row 2 — Business indicators: Certify Supervisor — Assembly & Production staff on PLM and digital engineering change · **Indicator:** KPI-006 (License Compliance %) · **Baseline:** 47 % · **Target:** 75 % · **Deadline:** 2027-04-15 · **Owner:** Sara Rami

Row 3 — Business indicators: Cut onboarding time on Supplier portal and EDI by 30 % · **Indicator:** KPI-007 (Content publication lead time) · **Baseline:** 40 % · **Target:** 72 % · **Deadline:** 2027-04-22 · **Owner:** Youssef Lahlou

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-10.1 — Define KPI set per audience (L&D Analyst)

Type:

Row 1 — KPI set per audience: Raise MES and digital shop-floor tracking proficiency of Operator — Assembly & Production teams to level 3 · **Indicator:** KPI-005 (Design approval lead time) · **Baseline:** 42 % · **Target:** 79 % · **Deadline:** 2027-04-08 · **Owner:** Rachid Amrani

Row 2 — KPI set per audience: Certify Supervisor — Assembly & Production staff on PLM and digital engineering change · **Indicator:** KPI-006 (License Compliance %) · **Baseline:** 48 % · **Target:** 90 % · **Deadline:** 2027-04-15 · **Owner:** Sara Rami

Row 3 — KPI set per audience: Cut onboarding time on Supplier portal and EDI by 30 % · **Indicator:** KPI-007 (Content publication lead time) · **Baseline:** 31 % · **Target:** 87 % · **Deadline:** 2027-04-22 · **Owner:** Youssef Lahlou

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Indicators: rework rate, downtime minutes per shift, data re-entry hours.

When every step is complete, click Complete in the task panel.

Task UFT-08-03 — Collect cost data · done by Finance Manager

Input: Indicator set → **Output:** Cost data

Step MP-18.3 — Record committed and actual costs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-18.4 — Compare spend against budget (Finance Manager)

Type:

Row 1 — Spend against budget: MES and digital shop-floor tracking · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Spend against budget: PLM and digital engineering change · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Spend against budget: Supplier portal and EDI · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 2 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Costs: design 60,000 MAD; delivery 180,000 MAD; participants' time 95,000 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-08-04 — Isolate training effect · done by Performance Analyst

Input: Cost data → **Output:** Isolated benefits

Step MP-32.3 — Isolate training effect (Performance Analyst)

Type:

Row 1 — Training effect: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Youssef Lahlou · **Source:** Interview with the function head

Row 2 — Training effect: PLM and digital engineering change · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Ayoub Ziani · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Training effect register".

Step MP-09.6 — Compute skill progression (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Control group: site B (not trained). Isolated benefit: 410,000 MAD per year.

When every step is complete, click Complete in the task panel.

Task UFT-08-05 — Compute Phillips ROI · done by Performance Analyst

Input: Isolated benefits → **Output:** ROI figures

Step MP-32.4 — Compute Phillips ROI (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: ROI = (410,000 − 335,000) / 335,000 = 22%; benefit-cost ratio 1.22.

When every step is complete, click Complete in the task panel.

Task UFT-08-06 — Review ROI with finance · done by Finance Manager

Input: ROI figures → **Output:** Validated ROI

Step MP-32.5 — Review ROI with finance (Finance Manager)

Type:

ROI with finance: ROI with finance

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-11-12

Then click Complete the step.

Result to record in the task: Finance review: assumptions accepted; downtime valued at 180 MAD per minute.

When every step is complete, click Complete in the task panel.

Task UFT-08-07 — Publish business impact report · done by Head of L&D

Input: Validated ROI → **Output:** ROI & business impact report

Step MP-32.6 — Publish business impact report (Head of L&D)

Type:

Row 1 — Business impact report: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-08-31

Row 2 — Business impact report: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-09-07

Then click Complete the step. The rows go to the register "Communications log".

Step MP-10.4 — Export report (L&D Analyst)

Type:

Row 1 — Report: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Report: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Step MP-10.5 — Query data via AI Assistant (Head of L&D)

Type:

Row 1 — Data via AI Assistant: KPI-005 (Design approval lead time) · **Period:** 2026-Q3 · **Value:** 56 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Data via AI Assistant: KPI-006 (License Compliance %) · **Period:** 2026-Q1 · **Value:** 65 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Publish RPT-012 ROI & Business Impact Report to executive leadership.

When every step is complete, click Complete in the task panel.

E2E-09 — Compliance-to-Certification

Goal: Ensure compliant workforce with valid certifications

Starts when: New regulatory requirement or certification nearing expiry. **Ends with:** Compliant workforce with valid certifications and an audit extract available.

Task UFT-09-01 — Register regulatory requirement · done by Compliance Officer

Input: Regulation → **Output:** Requirement record

Step MP-14.1 — Register regulatory requirement (Compliance Officer)

Type:

Row 1 — Regulatory requirement: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Yassine Bouzidi · **Source:** Audit report

Row 2 — Regulatory requirement: PLM and digital engineering change · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hajar Bouzidi · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Regulatory requirement register".

Result to record in the task: Requirement 'IATF 16949 awareness', every 24 months, source: IATF 16949 clause on competence.

When every step is complete, click Complete in the task panel.

Task UFT-09-02 — Assign mandatory training · done by Compliance Officer

Input: Requirement record → **Output:** Mandatory assignments

Step MP-14.2 — Assign mandatory training by position (Compliance Officer)

Type:

Row 1 — Role: Manager / Hiring Manager · **Mandatory training by position:** MES and digital shop-floor tracking · **Person:** Hajar Bouzidi · **Allocation (%):** 100 · **Start:** 2026-10-22 · **Holder type:** Holder

Row 2 — Role: Performance Analyst · **Mandatory training by position:** PLM and digital engineering change · **Person:** Imane Tazi · **Allocation (%):** 50 · **Start:** 2026-10-29 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Result to record in the task: Assign to positions: Assembly & Production operator, Assembly & Production supervisor, quality inspector.

When every step is complete, click Complete in the task panel.

Task UFT-09-03 — Deliver mandatory sessions · done by Training Administrator

Input: Mandatory assignments → **Output:** Attendance

Step MP-07.3 — Enroll learners into session (Training Administrator)

Type:

Row 1 — Learners into session: MES and digital shop-floor tracking — half-day workshop · **Date:** 2026-11-13 · **Trainer:** Atlas Formation Conseil · **Participants:** 14 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Learners into session: PLM and digital engineering change — half-day workshop · **Date:** 2026-11-20 · **Trainer:** Maghreb Learning Partners · **Participants:** 16 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-07.5 — Record attendance (Trainer)

Type:

Row 1 — Attendance: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Imane Tazi · **Source:** Interview with the function head

Row 2 — Attendance: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hicham Rami · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Attendance register".

Result to record in the task: Enroll 24 employees in session 'IATF 16949 awareness'; attendance recorded.

When every step is complete, click Complete in the task panel.

Task UFT-09-04 — Assess and certify · done by Trainer

Input: Attendance → **Output:** Certificates

Step MP-09.4 — Record learning results (Level 2) (Trainer)

Type:

Row 1 — Learning results (Level 2): MES and digital shop-floor tracking · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hicham Rami · **Source:** Questionnaire results

Row 2 — Learning results (Level 2): PLM and digital engineering change · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hajar Mansouri · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Learning results (Level 2) register".

Step MP-14.4 — Issue certificate on completion (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Result 86%; certificate 'IATF 16949 awareness' issued, valid until 2026+2.

When every step is complete, click Complete in the task panel.

Task UFT-09-05 — Compute certification validity · done by Compliance Officer

Input: Certificates → **Output:** Validity status

Step MP-14.3 — Compute certification validity (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Validity: 212 valid, 9 expire within 60 days, 3 expired.

When every step is complete, click Complete in the task panel.

Task UFT-09-06 — Manage renewals · done by Compliance Officer

Input: Validity status → **Output:** Renewed certificates

Step MP-14.5 — Launch renewal enrollment (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-14.6 — Confirm renewal completion (Compliance Officer)

Type:

Decision: Approved with conditions

Renewal completion: Renewal completion

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2026-11-30

Decided by: Tarik Lahlou

Then click Complete the step.

Result to record in the task: Launch renewal for the 12 employees; confirm 10 completions, 2 rescheduled.

When every step is complete, click Complete in the task panel.

Task UFT-09-07 — Produce compliance audit extract · done by Compliance Officer

Input: Renewed certificates → **Output:** Compliance audit extract

Step MP-14.7 — Produce compliance audit extract (Compliance Officer)

Type:

Row 1 — Compliance audit extract: Compliance audit extract — MES and digital shop-floor tracking · **Owner:** Soukaina Berrada · **Start:** 2027-09-19 · **End:** 2027-10-19 · **Budget:** 75000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Compliance audit extract: Compliance audit extract — PLM and digital engineering change · **Owner:** Ghita Ziani · **Start:** 2027-09-26 · **End:** 2027-10-26 · **Budget:** 41000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-10.4 — Export report (L&D Analyst)

Type:

Row 1 — Report: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Report: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Export compliance audit extract for IATF 16949 (XLSX) for the external auditor.

When every step is complete, click Complete in the task panel.

AUTO-E2E-01 — Automotive Compliance-to-Certification Readiness

Goal: Keep Automotive regulated roles certified against IATF 16949.

Starts when: New IATF 16949 requirement or certification expiry. **Ends with:** Sector compliance extract issued with every critical role certified.

Task UFT-AUTO-E1-01 — Register IATF 16949 obligations · done by Compliance Officer

Input: Sector obligations → **Output:** Record each obligation with its period.

Step MP-01.1 — Record corporate strategic objectives (Head of L&D)

Type:

Row 1 — Corporate strategic objectives: Raise MES and digital shop-floor tracking proficiency of Operator — Assembly & Production teams to level 3 · **Indicator:** KPI-002 (Skills inventory validation rate) · **Baseline:** 35 % · **Target:** 76 % · **Deadline:** 2026-12-03 · **Owner:** Tarik Lahlou

Row 2 — Corporate strategic objectives: Certify Supervisor — Assembly & Production staff on PLM and digital engineering change · **Indicator:** KPI-003 (Critical gap rate) · **Baseline:** 37 % · **Target:** 79 % · **Deadline:** 2026-12-10 · **Owner:** Omar Benjelloun

Row 3 — Corporate strategic objectives: Cut onboarding time on Supplier portal and EDI by 30 % · **Indicator:** KPI-004 (Training Engineering Report cycle time) · **Baseline:** 42 % · **Target:** 82 % · **Deadline:** 2026-12-17 · **Owner:** Sara Lahlou

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-14.1 — Register regulatory requirement (Compliance Officer)

Type:

Row 1 — Regulatory requirement: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Tarik Lahlou · **Source:** Interview with the function head

Row 2 — Regulatory requirement: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Omar Benjelloun · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Regulatory requirement register".

Result to record in the task: Obligation 'IATF 16949 training', every 12 months, owner Compliance Officer.

When every step is complete, click Complete in the task panel.

Task UFT-AUTO-E1-02 — Link obligations to positions · done by HR Business Partner

Input: Sector obligations → **Output:** Link each obligation to the Assembly & Production positions.

Step MP-01.2 — Link objectives to functions and sites (L&D Strategist)

Type:

Row 1 — Objectives to functions and sites: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Omar Benjelloun · **Source:** Questionnaire results

Row 2 — Objectives to functions and sites: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Sara Lahlou · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Objectives to functions and sites register".

Step MP-14.2 — Assign mandatory training by position (Compliance Officer)

Type:

Row 1 — Role: Head of L&D · **Mandatory training by position:** MES and digital shop-floor tracking · **Person:** Omar Benjelloun · **Allocation (%):** 100 · **Start:** 2026-06-08 · **Holder type:** Holder

Then click Complete the step. The rows go to the register "Role assignments".

Result to record in the task: Linked to 5 Assembly & Production positions (38 employees).

When every step is complete, click Complete in the task panel.

Task UFT-AUTO-E1-03 — Track certification validity · done by Compliance Officer

Input: Sector obligations → **Output:** Check expiry dates and renewals.

Step MP-02.1 — Define competency families and levels (L&D Analyst)

Type:

Row 1 — Competency families and levels: Raise MES and digital shop-floor tracking proficiency of Operator — Assembly & Production teams to level 3 · **Indicator:** KPI-015 (Training record correction rate) · **Baseline:** 49 % · **Target:** 75 % · **Deadline:** 2028-03-13 · **Owner:** Omar Benjelloun

Row 2 — Competency families and levels: Certify Supervisor — Assembly & Production staff on PLM and digital engineering change · **Indicator:** KPI-016 (Knowledge reuse rate) · **Baseline:** 35 % · **Target:** 86 % · **Deadline:** 2028-03-20 · **Owner:** Sara Lahlou

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-14.3 — Compute certification validity (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Validity: 33 valid, 5 expire within 60 days.

When every step is complete, click Complete in the task panel.

Task UFT-AUTO-E1-04 — Issue sector compliance extract · done by Compliance Officer

Input: Sector obligations → **Output:** Produce the extract for auditors.

Step MP-02.2 — Set target levels per position (HR Business Partner)

Type:

Row 1 — Target levels per position: Raise MES and digital shop-floor tracking proficiency of Operator — Assembly & Production teams to level 3 · **Indicator:** KPI-016 (Knowledge reuse rate) · **Baseline:** 43 % · **Target:** 77 % · **Deadline:** 2028-03-15 · **Owner:** Sara Lahlou

Row 2 — Target levels per position: Certify Supervisor — Assembly & Production staff on PLM and digital engineering change · **Indicator:** KPI-017 (IDP coverage) · **Baseline:** 47 % · **Target:** 83 % · **Deadline:** 2028-03-22 · **Owner:** Zineb Lahlou

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-14.7 — Produce compliance audit extract (Compliance Officer)

Type:

Row 1 — Compliance audit extract: Compliance audit extract — MES and digital shop-floor tracking · **Owner:** Sara Lahlou · **Start:** 2027-09-27 · **End:** 2027-10-27 · **Budget:** 58000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Compliance audit extract: Compliance audit extract — PLM and digital engineering change · **Owner:** Zineb Lahlou · **Start:** 2027-10-04 · **End:** 2027-11-03 · **Budget:** 32000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Extract issued for the IATF 16949 audit on 15 October.

When every step is complete, click Complete in the task panel.

Gate G5 — G5 — Evaluation & impact validated: close the phase

2. Open the project workspace and click the gate button of the phase.
2. Tick each checklist item once its evidence is attached, then click Submit for decision.
2. Click Go. Type the justification: All mandatory items met; evidence attached.
2. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

Phase 6 — Talent, knowledge & continuous improvement

E2E-10 — Talent-to-Mobility

Goal: Enable internal mobility and career progression

Starts when: Internal opening published or annual career review. **Ends with:** Internal move decided with a reskilling plan assigned.

Task UFT-10-01 — Model career paths · done by HR Director

Input: Job architecture → **Output:** Career paths

Step MP-13.1 — Model career path (HR Director)

Type:

Row 1 — Career path: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Career path: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Step MP-13.2 — Link path steps to competency targets (HR Business Partner)

Type:

Row 1 — Path steps to competency targets: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Zineb Lahlou · **Source:** Interview with the function head

Row 2 — Path steps to competency targets: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Leila Rami · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Path steps to competency targets register".

Result to record in the task: Career path: Assembly & Production operator → team leader → supervisor, with competency targets per step.

When every step is complete, click Complete in the task panel.

Task UFT-10-02 — Publish internal opening · done by HR Business Partner

Input: Career paths → **Output:** Internal opening

Step MP-31.1 — Publish internal opening (HR Business Partner)

Type:

Row 1 — Internal opening: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-09-26

Row 2 — Internal opening: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-10-03

Then click Complete the step. The rows go to the register "Communications log".

Step MP-31.2 — Define required skills (Hiring Manager)

Type:

Row 1 — Required skills: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Leila Rami · **Source:** Questionnaire results

Row 2 — Required skills: PLM and digital engineering change · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Rachid Amrani · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Required skills register".

Result to record in the task: Opening 'Assembly & Production team leader', required skills: MES and digital shop-floor tracking level 3, leadership level 2.

When every step is complete, click Complete in the task panel.

Task UFT-10-03 — Match employees to opening · done by HR Business Partner

Input: Internal opening → **Output:** Match list

Step MP-31.3 — Match employees to opening (HR Business Partner)

Type:

Row 1 — Employees to opening: MES and digital shop-floor tracking · **Criterion:** Cost · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Employees to opening: PLM and digital engineering change · **Criterion:** Risk · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-02.7 — Validate skills inventory (Head of L&D)

Type:

Decision: Approved

Skills inventory: Skills inventory

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-10-17

Decided by: Tarik Lahlou

Then click Complete the step.

Result to record in the task: Review 6 AI matches; keep 4 candidates with match score above 75%.

When every step is complete, click Complete in the task panel.

Task UFT-10-04 — Apply to internal opening · done by Employee

Input: Match list → **Output:** Applications

Step MP-31.4 — Apply to internal opening (Employee)

Type:

Row 1 — Internal opening: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Internal opening: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Application with motivation note and consent of the current manager.

When every step is complete, click Complete in the task panel.

Task UFT-10-05 — Shortlist candidates · done by Hiring Manager

Input: Applications → **Output:** Shortlist

Step MP-31.5 — Shortlist candidates (Hiring Manager)

Type:

Decision: Approved

Candidates: Candidates

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-09-30

Decided by: Tarik Lahlou

Then click Complete the step.

Result to record in the task: Shortlist: 2 candidates; interviews on 20 and 21 June.

When every step is complete, click Complete in the task panel.

Task UFT-10-06 — Plan individual development · done by Manager

Input: Shortlist → **Output:** Development plans

Step MP-13.3 — Create individual development plan (Manager)

Type:

Row 1 — Individual development plan: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Ayoub Ziani · **Source:** Interview with the function head

Row 2 — Individual development plan: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Meryem Lahlou · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Individual development plan register".

Step MP-13.4 — Suggest development actions (Manager)

Type:

Row 1 — Development actions: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Ayoub Ziani · **Source:** Interview with the function head

Row 2 — Development actions: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Meryem Lahlou · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Development actions register".

Step MP-42.3 — Build leadership development plan (HR Business Partner)

Type:

Row 1 — Leadership development plan: Leadership development plan — MES and digital shop-floor tracking · **Owner:** Ayoub Ziani · **Start:** 2027-10-09 · **End:** 2027-11-08 · **Budget:** 48000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Leadership development plan: Leadership development plan — PLM and digital engineering change · **Owner:** Meryem Lahlou · **Start:** 2027-10-16 · **End:** 2027-11-15 · **Budget:** 36000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-42.4 — Suggest leadership development actions (HR Business Partner)

Type:

Row 1 — Leadership development actions: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Ayoub Ziani · **Source:** Interview with the function head

Row 2 — Leadership development actions: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Meryem Lahlou · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Leadership development actions register".

Result to record in the task: Development plan: 2 modules MES and digital shop-floor tracking, 1 leadership workshop, 3 months mentoring.

When every step is complete, click Complete in the task panel.

Task UFT-10-07 — Assign reskilling plan · done by HR Business Partner

Input: Development plans → **Output:** Reskilling plan

Step MP-31.6 — Assign reskilling plan (HR Business Partner)

Type:

Row 1 — Role: Head of L&D · **Reskilling plan:** MES and digital shop-floor tracking · **Person:** Meryem Lahlou · **Allocation (%):** 100 · **Start:** 2027-10-01 · **Holder type:** Holder

Row 2 — Role: L&D Analyst · **Reskilling plan:** PLM and digital engineering change · **Person:** Yassine Bouzidi · **Allocation (%):** 50 · **Start:** 2027-10-08 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Step MP-08.1 — Generate personal learning plan (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Assign reskilling path 'MES and digital shop-floor tracking for team leaders' to the selected candidate.

When every step is complete, click Complete in the task panel.

Task UFT-10-08 — Review career and succession · done by HR Director

Input: Reskilling plan → **Output:** Talent mobility report

Step MP-13.5 — Run career review (HR Business Partner)

Type:

Row 1 — Career review: MES and digital shop-floor tracking — half-day workshop · **Date:** 2027-10-23 · **Trainer:** Atlas Formation Conseil · **Participants:** 12 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Career review: PLM and digital engineering change — half-day workshop · **Date:** 2027-10-30 · **Trainer:** Maghreb Learning Partners · **Participants:** 18 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-13.6 — Update succession readiness (HR Director)

Type:

Succession readiness: Succession readiness

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-10-28

Then click Complete the step.

Step MP-42.5 — Review leadership pipeline (HR Director)

Type:

Leadership pipeline: Leadership pipeline

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-10-28

Then click Complete the step.

Step MP-42.6 — Reassess leadership maturity (HR Business Partner)

Type:

Row 1 — Leadership maturity: MES and digital shop-floor tracking · **Criterion:** Cost · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Leadership maturity: PLM and digital engineering change · **Criterion:** Risk · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Succession readiness updated: 2 ready now, 3 ready within 12 months.

When every step is complete, click Complete in the task panel.

E2E-11 — Onboarding-to-Productivity

Goal: Accelerate time-to-productivity

Starts when: New hire or internal mover confirmed. **Ends with:** Employee productive within target time and onboarding closed.

Task UFT-11-01 — Create onboarding record · done by Hiring Manager

Input: Hiring decision → **Output:** Onboarding record

Step MP-35.1 — Create onboarding record (Hiring Manager)

Type:

Row 1 — Onboarding record: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hajar Bouzidi · **Source:** Audit report

Row 2 — Onboarding record: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Imane Tazi · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Onboarding record register".

Result to record in the task: Onboarding record for the new Assembly & Production technician, start date 1 July, buddy assigned.

When every step is complete, click Complete in the task panel.

Task UFT-11-02 — Generate 30-60-90 day path · done by HR Business Partner

Input: Onboarding record → **Output:** 30-60-90 path

Step MP-35.2 — Generate 30-60-90 day path (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-08.1 — Generate personal learning plan (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: 30-60-90 path: day 30 safety and IATF 16949; day 60 MES and digital shop-floor tracking; day 90 autonomy on shift.

When every step is complete, click Complete in the task panel.

Task UFT-11-03 — Enroll in onboarding sessions · done by Training Administrator

Input: 30-60-90 path → **Output:** Enrollments

Step MP-07.3 — Enroll learners into session (Training Administrator)

Type:

Row 1 — Learners into session: MES and digital shop-floor tracking — half-day workshop · **Date:** 2027-10-29 · **Trainer:** Atlas Formation Conseil · **Participants:** 18 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Learners into session: PLM and digital engineering change — half-day workshop · **Date:** 2027-11-05 · **Trainer:** Maghreb Learning Partners · **Participants:** 12 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-07.4 — Send convocations (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Enroll in the induction session of 2 July; convocation sent.

When every step is complete, click Complete in the task panel.

Task UFT-11-04 — Complete onboarding tasks · done by Employee

Input: Enrollments → **Output:** Completed tasks

Step MP-35.3 — Complete onboarding tasks (Employee)

Type:

Row 1 — Onboarding tasks: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hajar Mansouri · **Source:** Questionnaire results

Row 2 — Onboarding tasks: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Adil Naciri · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Onboarding tasks register".

Result to record in the task: Tasks done: badge, IT account, safety tour, meeting with the team.

When every step is complete, click Complete in the task panel.

Task UFT-11-05 — Hold milestone check-ins · done by Hiring Manager

Input: Completed tasks → **Output:** Check-in notes

Step MP-35.4 — Hold milestone check-in (Hiring Manager)

Type:

Row 1 — Milestone check-in: MES and digital shop-floor tracking — half-day workshop · **Date:** 2027-11-02 · **Trainer:** Atlas Formation Conseil · **Participants:** 14 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Milestone check-in: PLM and digital engineering change — half-day workshop · **Date:** 2027-11-09 · **Trainer:** Maghreb Learning Partners · **Participants:** 16 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-21.3 — Schedule coaching sessions (Coach)

Type:

Row 1 — Coaching sessions: Coaching sessions — MES and digital shop-floor tracking · **Owner:** Adil Naciri · **Start:** 2027-10-23 · **End:** 2027-11-22 · **Budget:** 77000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Coaching sessions: Coaching sessions — PLM and digital engineering change · **Owner:** Yassine Hajji · **Start:** 2027-10-30 · **End:** 2027-11-29 · **Budget:** 64000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Day-30 check-in: on track; coaching needed on MES and digital shop-floor tracking data entry.

When every step is complete, click Complete in the task panel.

Task UFT-11-06 — Assess time to productivity · done by Hiring Manager

Input: Check-in notes → **Output:** Productivity assessment

Step MP-35.5 — Assess time to productivity (Hiring Manager)

Type:

Row 1 — Time to productivity: MES and digital shop-floor tracking · **Criterion:** Risk · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Time to productivity: PLM and digital engineering change · **Criterion:** Business impact · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Time to productivity: 74 days (target 90).

When every step is complete, click Complete in the task panel.

Task UFT-11-07 — Close onboarding · done by HR Business Partner

Input: Productivity assessment → **Output:** Closed onboarding

Step MP-35.6 — Close onboarding (HR Business Partner)

Type:

Decision: Approved

Onboarding: Onboarding

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-10-20

Decided by: Tarik Lahlou

Then click Complete the step.

Step MP-13.3 — Create individual development plan (Manager)

Type:

Row 1 — Individual development plan: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Zineb Rami · **Source:** HRIS export

Row 2 — Individual development plan: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Leila Sefrioui · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Individual development plan register".

Result to record in the task: Close onboarding; link the individual development plan for year 1.

When every step is complete, click Complete in the task panel.

E2E-12 — Knowledge-Capture-to-Transfer

Goal: Capture and transfer institutional knowledge

Starts when: Critical expert identified as leaving, retiring or holding at-risk knowledge. **Ends with:** Knowledge captured, published and transferred to a validated successor.

Task UFT-12-01 — Identify critical experts · done by HR Business Partner

Input: Workforce data → **Output:** Critical expert list

Step MP-34.1 — Identify critical experts (HR Business Partner)

Type:

Row 1 — Critical experts: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Leila Sefrioui · **Source:** Interview with the function head

Row 2 — Critical experts: PLM and digital engineering change · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Ayoub Bennani · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Critical experts register".

Result to record in the task: Critical expert: senior Assembly & Production engineer retiring in 8 months; knowledge risk: high.

When every step is complete, click Complete in the task panel.

Task UFT-12-02 — Plan capture sessions · done by Knowledge Manager

Input: Critical expert list → **Output:** Capture plan

Step MP-34.2 — Plan capture sessions (Knowledge Manager)

Type:

Row 1 — Capture sessions: Capture sessions — MES and digital shop-floor tracking · **Owner:** Ayoub Bennani · **Start:** 2027-10-31 · **End:** 2027-11-30 · **Budget:** 60000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Capture sessions: Capture sessions — PLM and digital engineering change · **Owner:** Salma Sefrioui · **Start:** 2027-11-07 · **End:** 2027-12-07 · **Budget:** 63000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Capture plan: 4 sessions of 90 minutes on troubleshooting and IATF 16949 practices.

When every step is complete, click Complete in the task panel.

Task UFT-12-03 — Record expert interview · done by Knowledge Manager

Input: Capture plan → **Output:** Interview transcript

Step MP-34.3 — Record expert interview (Knowledge Manager)

Type:

Row 1 — Expert interview: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Salma Sefrioui · **Source:** Annual performance review

Row 2 — Expert interview: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Hajar Benjelloun · **Source:** Audit report

Then click Complete the step. The rows go to the register "Expert interview register".

Result to record in the task: Interview 1 recorded (82 minutes); transcript attached.

When every step is complete, click Complete in the task panel.

Task UFT-12-04 — Structure knowledge · done by Knowledge Manager

Input: Interview transcript → **Output:** Structured knowledge

Step MP-34.4 — Structure knowledge from transcript (Knowledge Manager)

Type:

Row 1 — Knowledge from transcript: Knowledge from transcript — MES and digital shop-floor tracking · **Owner:** Hajar Benjelloun · **Start:** 2027-11-04 · **End:** 2027-12-04 · **Budget:** 75000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Knowledge from transcript: Knowledge from transcript — PLM and digital engineering change · **Owner:** Salma Sefrioui · **Start:** 2027-11-11 · **End:** 2027-12-11 · **Budget:** 23000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Accept the AI structure: 5 failure modes, 12 checks, 3 decision rules; correct 2 technical terms.

When every step is complete, click Complete in the task panel.

Task UFT-12-05 — Publish knowledge article · done by Knowledge Manager

Input: Structured knowledge → **Output:** Published article

Step MP-12.1 — Publish knowledge article (Knowledge Manager)

Type:

Row 1 — Knowledge article: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-11-01

Row 2 — Knowledge article: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-11-08

Then click Complete the step. The rows go to the register "Communications log".

Step MP-12.2 — Index article for retrieval (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-33.4 — Approve publication (Knowledge Manager)

Type:

Decision: Approved

Publication: Publication

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-10-30

Decided by: Tarik Lahlou

Then click Complete the step.

Result to record in the task: Publish article 'Troubleshooting guide — Assembly & Production' in EN/FR/AR; indexed for search.

When every step is complete, click Complete in the task panel.

Task UFT-12-06 — Assign successor learning path · done by Manager

Input: Published article → **Output:** Successor path

Step MP-34.5 — Assign successor learning path (Manager)

Type:

Row 1 — Role: L&D Planner · **Successor learning path:** MES and digital shop-floor tracking · **Person:** Ghita Bouzidi · **Allocation (%):** 100 · **Start:** 2027-10-29 · **Holder type:** Holder

Row 2 — Role: Instructional Designer · **Successor learning path:** PLM and digital engineering change · **Person:** Loubna Chraibi · **Allocation (%):** 50 · **Start:** 2027-11-05 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Step MP-06.6 — Publish content to catalog (Content Developer)

Type:

Row 1 — Content to catalog: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-11-03

Row 2 — Content to catalog: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-11-10

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Assign the successor path: article + 3 shadowing sessions with the expert.

When every step is complete, click Complete in the task panel.

Task UFT-12-07 — Validate transfer completion · done by Subject Matter Expert

Input: Successor path → **Output:** Validated transfer

Step MP-34.6 — Validate transfer completion (Subject Matter Expert)

Type:

Decision: Approved

Transfer completion: Transfer completion

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-11-17

Decided by: Tarik Lahlou

Then click Complete the step.

Result to record in the task: Transfer validated: successor solved 4 of 5 test cases alone.

When every step is complete, click Complete in the task panel.

E2E-31 — Engagement-to-Roadmap

Goal: Define post-engagement roadmap and continuous improvement

Starts when: Closure of the current training engineering engagement (E2E-19). **Ends with:** Approved post-engagement roadmap with future missions and continuous improvement plan.

Task UFT-31-01 — Consolidate engagement findings · done by Consultant PM

Input: Engagement outputs → **Output:** Findings

Step MP-50.1 — Consolidate engagement findings (Consultant PM)

Type:

Row 1 — Engagement findings: KPI-019 (Vendor invoice match rate) · **Period:** 2026-Q1 · **Value:** 91 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — Engagement findings: KPI-020 (Integration synchronisation success rate) · **Period:** 2026-Q2 · **Value:** 74 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Findings: 6 deliverables, 3 lessons learned, 2 open topics (IS, org design).

When every step is complete, click Complete in the task panel.

Task UFT-31-02 — Define future perspectives · done by Consultant PM

Input: Findings → **Output:** Perspectives

Step MP-50.2 — Define future perspectives (Consultant PM)

Type:

Row 1 — Future perspectives: MES and digital shop-floor tracking · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Loubna El Idrissi · **Source:** Audit report

Row 2 — Future perspectives: PLM and digital engineering change · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Soukaina Berrada · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Future perspectives register".

Result to record in the task: Perspectives: Supplier portal and EDI programme, second wave for OP level.

When every step is complete, click Complete in the task panel.

Task UFT-31-03 — Plan One-to-One coaching · done by L&D Strategist

Input: Perspectives → **Output:** Coaching plan

Step MP-50.3 — Plan One-to-One coaching (L&D Strategist)

Type:

Row 1 — One-to-One coaching: One-to-One coaching — MES and digital shop-floor tracking · **Owner:** Soukaina Berrada · **Start:** 2027-11-16 · **End:** 2027-12-16 · **Budget:** 21000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — One-to-One coaching: One-to-One coaching — PLM and digital engineering change · **Owner:** Ghita Ziani · **Start:** 2027-11-23 · **End:** 2027-12-23 · **Budget:** 33000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: One-to-One coaching: 6 managers, 6 sessions each over 6 months.

When every step is complete, click Complete in the task panel.

Task UFT-31-04 — Plan organizational optimization · done by Org Design Consultant

Input: Perspectives → **Output:** Optimization plan

Step MP-50.4 — Plan organizational optimization (Org Design Consultant)

Type:

Row 1 — Organizational optimization: Organizational optimization — MES and digital shop-floor tracking · **Owner:** Ghita Ziani · **Start:** 2027-11-18 · **End:** 2027-12-18 · **Budget:** 29000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Organizational optimization: Organizational optimization — PLM and digital engineering change · **Owner:** Tarik Lahlou · **Start:** 2027-11-25 · **End:** 2027-12-25 · **Budget:** 67000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Organizational optimization: merge 2 planning cells; update 11 descriptions.

When every step is complete, click Complete in the task panel.

Task UFT-31-05 — Plan IS rehabilitation · done by IT Architect

Input: Perspectives → **Output:** IS plan

Step MP-50.5 — Plan IS rehabilitation (IT Architect)

Type:

Row 1 — IS rehabilitation: IS rehabilitation — MES and digital shop-floor tracking · **Owner:** Tarik Lahlou · **Start:** 2027-11-20 · **End:** 2027-12-20 · **Budget:** 42000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — IS rehabilitation: IS rehabilitation — PLM and digital engineering change · **Owner:** Omar Benjelloun · **Start:** 2027-11-27 · **End:** 2027-12-27 · **Budget:** 62000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: IS rehabilitation: connect HRIS and training platform; retire 2 spreadsheets.

When every step is complete, click Complete in the task panel.

Task UFT-31-06 — Define KPIs and dashboards · done by Performance Analyst

Input: Perspectives → **Output:** KPI framework

Step MP-50.6 — Define KPIs and dashboards (Performance Analyst)

Type:

Row 1 — KPIs and dashboards: Raise MES and digital shop-floor tracking proficiency of Operator — Assembly & Production teams to level 3 · **Indicator:** KPI-004 (Training Engineering Report cycle time) · **Baseline:** 35 % · **Target:** 82 % · **Deadline:** 2028-05-10 · **Owner:** Omar Benjelloun

Row 2 — KPIs and dashboards: Certify Supervisor — Assembly & Production staff on PLM and digital engineering change · **Indicator:** KPI-005 (Design approval lead time) · **Baseline:** 48 % · **Target:** 80 % · **Deadline:** 2028-05-17 · **Owner:** Sara Lahlou

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: KPIs: training coverage, time to competency, ROI per theme; monthly dashboard.

When every step is complete, click Complete in the task panel.

Task UFT-31-07 — Prioritize future missions · done by Consultant PM

Input: All plans → **Output:** Prioritized missions

Step MP-50.7 — Prioritize future missions (Consultant PM)

Type:

Row 1 — Future missions: MES and digital shop-floor tracking · **Criterion:** Risk · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Future missions: PLM and digital engineering change · **Criterion:** Business impact · **Weight (%):** 30 · **Score (1–5):** 5 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-50.8 — Validate roadmap with leadership (Partner)

Type:

Decision: Approved with conditions

Roadmap with leadership: Roadmap with leadership

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2027-12-15

Decided by: Tarik Lahlou

Then click Complete the step.

Result to record in the task: Priority missions: 1 IS rehabilitation, 2 coaching, 3 org optimization.

When every step is complete, click Complete in the task panel.

Task UFT-31-08 — Publish roadmap · done by Consultant PM

Input: Prioritized missions → **Output:** Post-engagement roadmap

Step MP-50.9 — Publish post-engagement roadmap (Consultant PM)

Type:

Row 1 — Post-engagement roadmap: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-11-21

Row 2 — Post-engagement roadmap: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-11-28

Then click Complete the step. The rows go to the register "Communications log".

Step MP-50.10 — Track roadmap execution (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-50.11 — Improve roadmap continuously (Consultant PM)

Type:

Roadmap continuously: Roadmap continuously

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-11-20

Then click Complete the step.

Step MP-50.12 — Report on roadmap progress (Consultant PM)

Type:

Row 1 — On roadmap progress: Announce the program: MES and digital shop-floor tracking · **Audience:** Operator — Assembly & Production teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-11-21

Row 2 — On roadmap progress: Announce the program: PLM and digital engineering change · **Audience:** Supervisor — Assembly & Production teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-11-28

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish RPT-010 Post-Engagement Roadmap to the executive committee.

When every step is complete, click Complete in the task panel.

Gate G6 — G6 — Closure & continuous improvement: close the phase

2. Open the project workspace and click the gate button of the phase.
2. Tick each checklist item once its evidence is attached, then click Submit for decision.
2. Click Go. Type the justification: All mandatory items met; evidence attached.
2. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

5. Scenario 3 — Souss BTP Solutions

Context

Context	
Sector	AEC & Construction
Size	SME · 42 employees · Agadir
Run	Digital Skills Full Run 2026 — Souss BTP Solutions — Digital skills, SME track SME-T2
Standards	ISO 19650, ISO 45001, ISO 9001
Themes	BIM modelling and ISO 19650 workflows · Digital site diary and field reporting · Drone surveying and 3D site scans · AI clash detection and model checking
Sign in as	headld@soussbtpsolutions.ma · CortexSkills#2026
Scope of the run	38 end-to-end processes, 277 user tasks and 481 steps.

Phase 0 — Enablers (run across all phases)

Enablers run across all phases

E2E-15 — Data-AI-Integration

Goal: Govern data, AI, integrations

Starts when: New integration, data source or AI use case to govern. **Ends with:** Integrations, data and AI governed with health, retention and usage reviewed.

Task UFT-15-01 — Register external integration · done by Platform Administrator

Input: Integration request → **Output:** Integration record

Step MP-16.1 — Register external integration (Platform Administrator)

Type:

Row 1 — External integration: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Loubna Squalli · **Source:** Audit report

Row 2 — External integration: Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Kawtar Naciri · **Source:** HRIS export

Then click Complete the step. The rows go to the register "External integration register".

Result to record in the task: Register integration 'HRIS — Workday' (INT-HR-01); credential reference stored encrypted.

When every step is complete, click Complete in the task panel.

Task UFT-15-02 — Map fields and check health · done by IT Architect

Input: Integration record → **Output:** Healthy integration

Step MP-16.2 — Map integration fields (IT Architect)

Type:

Row 1 — Integration fields: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Kawtar Naciri · **Source:** HRIS export

Row 2 — Integration fields: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Sara Rami · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Integration fields register".

Step MP-16.3 — Check integration health (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Map fields: employee_id → matricule; position → poste. Health check: success.

When every step is complete, click Complete in the task panel.

Task UFT-15-03 — Run HRIS synchronisation · done by IT Architect

Input: Healthy integration → **Output:** Synchronised directory

Step MP-16.4 — Run HRIS synchronisation (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-16.5 — Review synchronisation rejections (IT Architect)

Type:

Synchronisation rejections: Synchronisation rejections

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-10-01

Then click Complete the step.

Result to record in the task: Sync run: 1,204 records updated, 3 rejected (missing position) — corrected.

When every step is complete, click Complete in the task panel.

Task UFT-15-04 — Set data retention rule · done by Data Protection Officer

Input: Synchronised directory → **Output:** Retention rules

Step MP-16.6 — Set data retention rule (Data Protection Officer)

Type:

Row 1 — Data retention rule: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Data retention rule: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Retention: questionnaire responses 3 years; training records 10 years.

When every step is complete, click Complete in the task panel.

Task UFT-15-05 — Maintain AI use case register · done by Platform Administrator

Input: Retention rules → **Output:** AI register

Step MP-16.7 — Maintain AI use case register (Platform Administrator)

Type:

AI use case register: AI use case register

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-10-19

Then click Complete the step.

Result to record in the task: Add custom use case 'Shift-report summarizer' (Assistive), version 1.

When every step is complete, click Complete in the task panel.

Task UFT-15-06 — Set AI activation per scope · done by Platform Administrator

Input: AI register → **Output:** AI activation state

Step MP-16.8 — Set AI activation per scope (Platform Administrator)

Type:

Row 1 — AI activation per scope: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — AI activation per scope: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Step MP-24.1 — Enable personalization per scope (Platform Administrator)

Type:

Row 1 — Personalization per scope: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Personalization per scope: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Activate AIUC-35 and AIUC-36 for the organization; override Off for pilot project B.

When every step is complete, click Complete in the task panel.

Task UFT-15-07 — Review AI usage log · done by IT Architect

Input: AI activation state → **Output:** AI usage & governance report

Step MP-16.9 — Review AI usage log (IT Architect)

Type:

AI usage log: AI usage log

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-08-31

Then click Complete the step.

Step MP-28.2 — Validate dataset quality (Performance Analyst)

Type:

Decision: Approved

Dataset quality: Dataset quality

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-08-30

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: Usage review: 412 suggestions — 71% accepted, 20% edited, 9% rejected.

When every step is complete, click Complete in the task panel.

E2E-17 — Change-to-Adoption

Goal: Drive sustained adoption and culture change

Starts when: Approved plan or new platform capability requiring adoption. **Ends with:** Sustained adoption reached with low-adoption groups reinforced.

Task UFT-17-01 — Assess change impact · done by Change Manager

Input: Approved plan → **Output:** Impact assessment

Step MP-19.1 — Assess change impact (Change Manager)

Type:

Row 1 — Change impact: BIM modelling and ISO 19650 workflows · **Criterion:** Cost · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Change impact: Digital site diary and field reporting · **Criterion:** Risk · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Change impact: Drone surveying and 3D site scans · **Criterion:** Business impact · **Weight (%):** 20 · **Score (1–5):** 3 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Impact: Site Works & Project Delivery supervisors high, operators medium, support functions low.

When every step is complete, click Complete in the task panel.

Task UFT-17-02 — Build adoption plan · done by Change Manager

Input: Impact assessment → **Output:** Adoption plan

Step MP-19.2 — Build adoption plan (Change Manager)

Type:

Row 1 — Adoption plan: Adoption plan — BIM modelling and ISO 19650 workflows · **Owner:** Loubna Naciri · **Start:** 2026-10-16 · **End:** 2026-11-15 · **Budget:** 34000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Adoption plan: Adoption plan — Digital site diary and field reporting · **Owner:** Loubna Squalli · **Start:** 2026-10-23 · **End:** 2026-11-22 · **Budget:** 70000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Adoption plan: sponsor message, 6 champions, weekly 15-minute huddles for 8 weeks.

When every step is complete, click Complete in the task panel.

Task UFT-17-03 — Launch communication campaign · done by Change Manager

Input: Adoption plan → **Output:** Campaign

Step MP-19.3 — Launch communication campaign (Change Manager)

Type:

Row 1 — Communication campaign: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-10-13

Row 2 — Communication campaign: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-10-20

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Campaign 'BIM modelling and ISO 19650 workflows — why it matters' on e-mail, intranet and screens.

When every step is complete, click Complete in the task panel.

Task UFT-17-04 — Open community space · done by Knowledge Manager

Input: Campaign → **Output:** Community space

Step MP-12.3 — Create community space (Knowledge Manager)

Type:

Row 1 — Community space: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Kawtar Naciri · **Source:** Interview with the function head

Row 2 — Community space: Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Sara Rami · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Community space register".

Step MP-12.4 — Moderate community posts (Knowledge Manager)

Type:

Community posts: Community posts

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-10-21

Then click Complete the step.

Step MP-26.1 — Create learning cohort group (Knowledge Manager)

Type:

Row 1 — Learning cohort group: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Kawtar Naciri · **Source:** Interview with the function head

Row 2 — Learning cohort group: Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Sara Rami · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Learning cohort group register".

Result to record in the task: Community space 'BIM modelling and ISO 19650 workflows Q&A' opened; moderation rules published.

When every step is complete, click Complete in the task panel.

Task UFT-17-05 — Track adoption usage · done by L&D Analyst

Input: Community space → **Output:** Usage indicators

Step MP-19.4 — Track adoption usage (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-08.5 — Monitor engagement indicators (L&D Analyst)

Type:

Row 1 — Engagement indicators: KPI-018 (Mandatory certification compliance) · **Period:** 2026-Q2 · **Value:** 69 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Weekly active users: 64% of the target population.

When every step is complete, click Complete in the task panel.

Task UFT-17-06 — Identify low-adoption groups · done by Change Manager

Input: Usage indicators → **Output:** Low-adoption list

Step MP-19.5 — Identify low-adoption groups (Change Manager)

Type:

Row 1 — Low-adoption groups: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Loubna Squalli · **Source:** Annual performance review

Row 2 — Low-adoption groups: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Kawtar Naciri · **Source:** Audit report

Then click Complete the step. The rows go to the register "Low-adoption groups register".

Result to record in the task: Low adoption confirmed for night shift (31%); one group rejected as false positive.

When every step is complete, click Complete in the task panel.

Task UFT-17-07 — Run reinforcement actions · done by Change Manager

Input: Low-adoption list → **Output:** Adoption dashboard

Step MP-19.6 — Run reinforcement actions (Change Manager)

Type:

Row 1 — Reinforcement actions: BIM modelling and ISO 19650 workflows — half-day workshop · **Date:** 2026-09-16 · **Trainer:** Atlas Formation Conseil · **Participants:** 19 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Reinforcement actions: Digital site diary and field reporting — half-day workshop · **Date:** 2026-09-23 · **Trainer:** Maghreb Learning Partners · **Participants:** 10 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-08.6 — Trigger re-engagement nudge (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Reinforcement: night-shift coaching sessions; adoption reached 58% after 4 weeks.

When every step is complete, click Complete in the task panel.

E2E-18 — Quality-Risk-Improvement

Goal: Improve processes and mitigate risk

Starts when: Risk logged, periodic quality review due or control test scheduled. **Ends with:** Risks mitigated, actions evaluated by a different person, controls rated.

Task UFT-18-01 — Log risk or opportunity · done by Quality Manager

Input: Issue or signal → **Output:** Risk register entry

Step MP-20.1 — Log risk or opportunity (Quality Manager)

Type:

Row 1 — Risk or opportunity: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Imane Tazi · **Source:** Annual performance review

Row 2 — Risk or opportunity: Digital site diary and field reporting · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hind Lahlou · **Source:** Audit report

Then click Complete the step. The rows go to the register "Risk or opportunity register".

Result to record in the task: Risk 'Trainers unavailable in Q3': likelihood 3, impact 4, score 12.

When every step is complete, click Complete in the task panel.

Task UFT-18-02 — Assign mitigation action · done by Quality Manager

Input: Risk register entry → **Output:** Mitigation action

Step MP-20.2 — Assign mitigation action (Quality Manager)

Type:

Row 1 — Role: Manager / Hiring Manager · **Mitigation action:** BIM modelling and ISO 19650 workflows · **Person:** Hind Lahlou · **Allocation (%):** 100 · **Start:** 2026-10-16 · **Holder type:** Holder

Row 2 — Role: Finance Manager · **Mitigation action:** Digital site diary and field reporting · **Person:** Youssef Tazi · **Allocation (%):** 50 · **Start:** 2026-10-23 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Result to record in the task: Action: contract a second vendor; owner Purchasing Officer; evaluator Quality Manager.

When every step is complete, click Complete in the task panel.

Task UFT-18-03 — Execute improvement action · done by Action Owner

Input: Mitigation action → **Output:** Executed action

Step MP-20.3 — Execute improvement action (Action Owner)

Type:

Row 1 — Improvement action: BIM modelling and ISO 19650 workflows — half-day workshop · **Date:** 2026-11-07 · **Trainer:** Atlas Formation Conseil · **Participants:** 12 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Improvement action: Digital site diary and field reporting — half-day workshop · **Date:** 2026-11-14 · **Trainer:** Maghreb Learning Partners · **Participants:** 15 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Action done: framework contract signed with vendor B; evidence attached.

When every step is complete, click Complete in the task panel.

Task UFT-18-04 — Evaluate action effectiveness · done by Action Evaluator

Input: Executed action → **Output:** Effectiveness verdict

Step MP-20.4 — Evaluate action effectiveness (Action Evaluator)

Type:

Row 1 — Action effectiveness: BIM modelling and ISO 19650 workflows · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Action effectiveness: Digital site diary and field reporting · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Action effectiveness: Drone surveying and 3D site scans · **Criterion:** Cost · **Weight (%):** 20 · **Score (1–5):** 4 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Verdict: effective. The evaluator is a different user from the owner.

When every step is complete, click Complete in the task panel.

Task UFT-18-05 — Review access and security · done by IT Architect

Input: Security logs → **Output:** Access review

Step MP-17.4 — Review access violation log (IT Architect)

Type:

Access violation log: Access violation log

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-10-08

Then click Complete the step.

Step MP-17.6 — Enforce login rate limit (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-17.2 — Assign roles to user (Platform Administrator)

Type:

Row 1 — Role: Consultant (PM / Partner) · **Roles to user:** BIM modelling and ISO 19650 workflows · **Person:** Salma Ouazzani · **Allocation (%):** 100 · **Start:** 2026-09-06 · **Holder type:** Holder

Row 2 — Role: Platform Administrator · **Roles to user:** Digital site diary and field reporting · **Person:** Hajar Berrada · **Allocation (%):** 50 · **Start:** 2026-09-13 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Step MP-17.3 — Edit permission matrix (Platform Administrator)

Type:

Permission matrix: Permission matrix

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-10-08

Then click Complete the step.

Step MP-17.5 — Issue signed session token (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Access review: 2 dormant accounts disabled; 0 cross-tenant attempts.

When every step is complete, click Complete in the task panel.

Task UFT-18-06 — Run periodic quality review · done by Quality Manager

Input: Access review → **Output:** Quality review minutes

Step MP-20.5 — Run periodic quality review (Quality Manager)

Type:

Row 1 — Periodic quality review: BIM modelling and ISO 19650 workflows — half-day workshop · **Date:** 2026-09-28 · **Trainer:** Atlas Formation Conseil · **Participants:** 15 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Periodic quality review: Digital site diary and field reporting — half-day workshop · **Date:** 2026-10-05 · **Trainer:** Maghreb Learning Partners · **Participants:** 17 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-09.7 — Review evaluation results (L&D Analyst)

Type:

Evaluation results: Evaluation results

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-09-12

Then click Complete the step.

Result to record in the task: Quality review minutes: 3 KPIs red, 2 actions opened, next review in 30 days.

When every step is complete, click Complete in the task panel.

Task UFT-18-07 — Update control effectiveness · done by Quality Manager

Input: Quality review minutes → **Output:** Governance register & risk heat-map

Step MP-20.6 — Update control effectiveness rating (Quality Manager)

Type:

Control effectiveness rating: Control effectiveness rating

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-09-21

Then click Complete the step.

Result to record in the task: Control CTRL-002 effectiveness: Effective; CTRL-031: Partially effective.

When every step is complete, click Complete in the task panel.

Phase 1 — Scope & evidence

E2E-32 — Scope-of-Work-to-Engineering-Plan

Goal: Define and approve the structured scope of work and stakeholder register

Starts when: New training engineering engagement, annual plan cycle, or executive request.
Ends with: Approved Scope of Work with criteria matrix and stakeholder register released to questionnaire design (E2E-33) and needs analysis (E2E-03).

Task UFT-32-01 — Define scope frame · done by Head of L&D

Input: Engagement request → **Output:** Scope frame

Step MP-53.1 — Define scope frame (Group Yes/No) (Head of L&D)

Type:

Row 1 — Scope frame (Group Yes/No): BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Imane Tazi · **Source:** Interview with the function head

Row 2 — Scope frame (Group Yes/No): Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hind Lahlou · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Scope frame (Group Yes/No) register".

Step MP-53.2 — Select Organization (Head of L&D)

Type:

Decision: Approved

Organization: Organization

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-04-18

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: Group scope: No. Organization: Souss BTP Solutions.

When every step is complete, click Complete in the task panel.

Task UFT-32-02 — Select sector · done by L&D Analyst

Input: Sector reference list → **Output:** Sector

Step MP-53.3 — Select sector (L&D Analyst)

Type:

Decision: Approved

Sector: Sector

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-04-27

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: Sector: AEC & Construction.

When every step is complete, click Complete in the task panel.

Task UFT-32-03 — Select decision levels · done by L&D Analyst

Input: MS/MO/OP framework → **Output:** Decision levels

Step MP-53.4 — Select decision level (MS/MO/OP/Custom) (L&D Analyst)

Type:

Decision: Approved

Decision level (MS/MO/OP/Custom): Decision level (MS/MO/OP/Custom)

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-05-06

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: Decision levels: MS, MO, OP (no custom level).

When every step is complete, click Complete in the task panel.

Task UFT-32-04 — Map functions × decision levels · done by L&D Analyst

Input: Job architecture → **Output:** Criteria matrix

Step MP-53.5 — Map functions × decision level (L&D Analyst)

Type:

Row 1 — Functions × decision level: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Salma Ouazzani · **Source:** Audit report

Row 2 — Functions × decision level: Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hajar Berrada · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Functions × decision level register".

Result to record in the task: Matrix: Site Works & Project Delivery × MS/MO/OP; Quality × MO/OP; Finance × MS/MO; HR × MS/MO.

When every step is complete, click Complete in the task panel.

Task UFT-32-05 — Select focus and add custom criteria · done by Head of L&D

Input: Strategic objectives → **Output:** Focus and custom criteria

Step MP-53.6 — Select focus (All/Digital/AI/Custom) (Head of L&D)

Type:

Decision: Approved

Focus (All/Digital/AI/Custom): Focus (All/Digital/AI/Custom)

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-04-19

Decided by: Loubna Naciri

Then click Complete the step.

Step MP-53.7 — Add custom criteria (Consultant PM)

Type:

Row 1 — Custom criteria: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hajar Berrada · **Source:** HRIS export

Row 2 — Custom criteria: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Rachid Squalli · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Custom criteria register".

Result to record in the task: Focus: Digital. Custom criterion: 'Readiness for BIM modelling and ISO 19650 workflows' (weight 2.00).

When every step is complete, click Complete in the task panel.

Task UFT-32-06 — Identify stakeholders · done by HR Business Partner

Input: Employee directory → **Output:** Stakeholder list

Step MP-53.8 — Identify stakeholders (HR Business Partner)

Type:

Row 1 — Stakeholders: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Rachid Squalli · **Source:** Interview with the function head

Row 2 — Stakeholders: Digital site diary and field reporting · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Adil Tazi · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Stakeholders register".

Result to record in the task: Register 40 stakeholders: name, role, function, level, site, preferred channel (Email, Face-to-Face or Hybrid).

When every step is complete, click Complete in the task panel.

Task UFT-32-07 — Validate scope · done by Head of L&D

Input: Draft scope → **Output:** Validated scope

Step MP-53.9 — Validate and approve scope (HR Director)

Type:

Decision: Approved

Approve scope: Approve scope

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-05-07

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: Validation: every function in scope has at least 3 stakeholders; completeness 100%.

When every step is complete, click Complete in the task panel.

Task UFT-32-08 — Approve scope · done by HR Director / Consultant PM

Input: Validated scope → **Output:** Approved Scope of Work

Step MP-53.9 — Validate and approve scope (HR Director)

Type:

Decision: Approved

Approve scope: Approve scope

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-05-16

Decided by: Loubna Naciri

Then click Complete the step.

Step MP-53.10 — Publish scope and register stakeholders (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Approval status: Approved (version 1). Justification: scope aligned with SO-1 and SO-2.

When every step is complete, click Complete in the task panel.

Task UFT-32-09 — Publish scope and register stakeholders · done by L&D Analyst

Input: Approved Scope of Work → **Output:** Published SOW and stakeholder register

Step MP-53.10 — Publish scope and register stakeholders (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Generate the SOW document (RPT-033) and release scope and stakeholders to the questionnaire studio.

When every step is complete, click Complete in the task panel.

E2E-33 — Questionnaire-to-Response-Collection

Goal: Design, distribute and collect questionnaire responses across channels

Starts when: An approved Scope of Work becomes available (end of E2E-32). **Ends with:** Consolidated, validated questionnaire response dataset feeding needs analysis (E2E-03), diagnostic (E2E-20) and demand collection (E2E-27).

Task UFT-33-01 — Select questionnaire template · done by L&D Analyst

Input: Approved SOW → **Output:** Selected template

Step MP-54.1 — Select questionnaire template by focus (L&D Analyst)

Type:

Decision: Approved

Questionnaire template by focus: Questionnaire template by focus

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-04-29

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: Template: 'Digital needs — AEC & Construction' in the user's language, 5 sections.

When every step is complete, click Complete in the task panel.

Task UFT-33-02 — Elaborate questionnaire · done by L&D Analyst

Input: Template, AI prompts → **Output:** Draft questionnaire

Step MP-54.2 — Elaborate questionnaire (Load/AI/Manual) (L&D Analyst)

Type:

Row 1 — Questionnaire (Load/AI/Manual): Questionnaire (Load/AI/Manual) — BIM modelling and ISO 19650 workflows · **Owner:** Sara Rami · **Start:** 2027-05-08 · **End:** 2027-06-07 · **Budget:** 42000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Questionnaire (Load/AI/Manual): Questionnaire (Load/AI/Manual) — Digital site diary and field reporting · **Owner:** Imane Tazi · **Start:** 2027-05-15 · **End:** 2027-06-14 · **Budget:** 32000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Elaboration mode: AI. 24 questions generated from the approved Scope of Work.

When every step is complete, click Complete in the task panel.

Task UFT-33-03 — Tailor and validate content · done by L&D Analyst

Input: Draft questionnaire → **Output:** Validated questionnaire

Step MP-54.3 — Tailor to sector and focus (L&D Analyst)

Type:

Row 1 — Sector and focus: Sector and focus — BIM modelling and ISO 19650 workflows · **Owner:** Imane Tazi · **Start:** 2027-05-10 · **End:** 2027-06-09 · **Budget:** 71000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Sector and focus: Sector and focus — Digital site diary and field reporting · **Owner:** Hind Lahlou · **Start:** 2027-05-17 · **End:** 2027-06-16 · **Budget:** 22000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Validate each question; reword 5 with Site Works & Project Delivery vocabulary; delete 2 duplicates.

When every step is complete, click Complete in the task panel.

Task UFT-33-04 — Allocate RACSI · done by Head of L&D

Input: Validated questionnaire → **Output:** RACSI allocation

Step MP-54.4 — Allocate RACSI per section (Head of L&D)

Type:

Row 1 — RACSI per section: RACSI per section — BIM modelling and ISO 19650 workflows · **Owner:** Hind Lahlou · **Start:** 2027-05-12 · **End:** 2027-06-11 · **Budget:** 51000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — RACSI per section: RACSI per section — Digital site diary and field reporting · **Owner:** Youssef Tazi · **Start:** 2027-05-19 · **End:** 2027-06-18 · **Budget:** 44000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Section 'Digital practices': R L&D Analyst, A Head of L&D, C Consultant PM, S IT, I CHRO (one Accountable only).

When every step is complete, click Complete in the task panel.

Task UFT-33-05 — Select distribution channels · done by Survey Administrator

Input: Stakeholder register → **Output:** Channel plan

Step MP-54.5 — Select distribution channels (L&D Analyst)

Type:

Decision: Approved with conditions

Distribution channels: Distribution channels

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2027-06-04

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: Channels: MS and MO by Email; OP Face-to-Face with tablets; night shift Hybrid.

When every step is complete, click Complete in the task panel.

Task UFT-33-06 — Distribute questionnaire · done by Survey Administrator

Input: Channel plan → **Output:** Dispatch log

Step MP-54.6 — Distribute to stakeholders (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Distribute to 40 stakeholders; 40 dispatches logged.

When every step is complete, click Complete in the task panel.

Task UFT-33-07 — Send reminders · done by Survey Administrator

Input: Dispatch log → **Output:** Reminder log

Step MP-54.7 — Send reminders on cadence (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Reminder 1 on day 5 to 17 non-respondents; reminder 2 on day 10 to 8.

When every step is complete, click Complete in the task panel.

Task UFT-33-08 — Collect responses · done by Stakeholders

Input: Questionnaire → **Output:** Raw responses

Step MP-54.8 — Collect responses (Stakeholder)

Type:

Row 1 — Responses: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Rachid Squalli · **Source:** Questionnaire results

Row 2 — Responses: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Adil Tazi · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Responses register".

Result to record in the task: Responses: 34 collected (22 online, 12 offline synchronised).

When every step is complete, click Complete in the task panel.

Task UFT-33-09 — Validate completeness · done by L&D Analyst

Input: Raw responses → **Output:** Validated responses

Step MP-54.9 — Validate completeness and consent (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Completeness: 31 complete, 3 incomplete flagged.

When every step is complete, click Complete in the task panel.

Task UFT-33-10 — Consolidate responses · done by L&D Analyst

Input: Validated responses → **Output:** Consolidated dataset

Step MP-54.10 — Consolidate responses (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Consolidated dataset: 31 responses, 24 questions, by function and level.

When every step is complete, click Complete in the task panel.

Task UFT-33-11 — Check consent and release dataset · done by L&D Analyst

Input: Consolidated dataset → **Output:** Released dataset

Step MP-54.11 — Feed responses to needs analysis and diagnostic (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-54.12 — Report on response rate and engagement (L&D Analyst)

Type:

Row 1 — On response rate and engagement: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-05-21

Row 2 — On response rate and engagement: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-05-28

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Consent given for 31 of 31 stored responses; release to needs analysis, diagnostic and demand collection.

When every step is complete, click Complete in the task panel.

Task UFT-33-12 — Report on response and engagement · done by L&D Analyst

Input: Dispatch and response logs → **Output:** Response analytics report

Step MP-54.12 — Report on response rate and engagement (L&D Analyst)

Type:

Row 1 — On response rate and engagement: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-05-23

Row 2 — On response rate and engagement: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-05-30

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Response rate 85%; engagement rate 78%; completeness 91% (RPT-034).

When every step is complete, click Complete in the task panel.

E2E-19 — Consulting Engagement-to-Closure

Goal: Manage full consulting engagement lifecycle

Starts when: Client purchase order or engagement request received. **Ends with:** Engagement closed with client acceptance and REX recorded.

Task UFT-19-01 — Register engagement and purchase order · done by Consultant PM

Input: Client purchase order → **Output:** Engagement record

Step MP-36.1 — Register engagement and purchase order (Consultant PM)

Type:

Row 1 — Engagement and purchase order: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hajar Berrada · **Source:** Questionnaire results

Row 2 — Engagement and purchase order: Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Rachid Squalli · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Engagement and purchase order register".

Result to record in the task: Engagement 'Training engineering 2026 — Souss BTP Solutions', PO-CL-221, 45 consulting days.

When every step is complete, click Complete in the task panel.

Task UFT-19-02 — Hold kickoff meeting · done by Consultant PM

Input: Engagement record → **Output:** Kickoff held

Step MP-36.2 — Hold kickoff meeting (Consultant PM)

Type:

Row 1 — Kickoff meeting: BIM modelling and ISO 19650 workflows — half-day workshop · **Date:** 2026-11-13 · **Trainer:** Atlas Formation Conseil · **Participants:** 11 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Kickoff meeting: Digital site diary and field reporting — half-day workshop · **Date:** 2026-11-20 · **Trainer:** Maghreb Learning Partners · **Participants:** 13 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Kickoff held on 10 February with HR Director, Head of L&D and 4 function heads.

When every step is complete, click Complete in the task panel.

Task UFT-19-03 — Draft meeting minutes · done by Consultant PM

Input: Kickoff held → **Output:** Meeting minutes

Step MP-36.3 — Draft meeting minutes (Consultant PM)

Type:

Row 1 — Meeting minutes: Meeting minutes — BIM modelling and ISO 19650 workflows · **Owner:** Adil Tazi · **Start:** 2026-11-05 · **End:** 2026-12-05 · **Budget:** 62000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Meeting minutes: Meeting minutes — Digital site diary and field reporting · **Owner:** Loubna Naciri · **Start:** 2026-11-12 · **End:** 2026-12-12 · **Budget:** 31000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Review the AI minutes: 6 decisions, 9 actions, RACSI extracted; correct 1 owner name.

When every step is complete, click Complete in the task panel.

Task UFT-19-04 — Align with client strategy · done by Consultant PM

Input: Meeting minutes → **Output:** Strategic alignment

Step MP-01.1 — Record corporate strategic objectives (Head of L&D)

Type:

Row 1 — Corporate strategic objectives: Raise BIM modelling and ISO 19650 workflows proficiency of Operator — Site Works & Project Delivery teams to level 3 · **Indicator:** KPI-006 (License Compliance %) · **Baseline:** 46 % · **Target:** 87 % · **Deadline:** 2027-04-26 · **Owner:** Loubna Naciri

Row 2 — Corporate strategic objectives: Certify Supervisor — Site Works & Project Delivery staff on Digital site diary and field reporting · **Indicator:** KPI-007 (Content publication lead time) · **Baseline:** 35 % · **Target:** 88 % · **Deadline:** 2027-05-03 · **Owner:** Loubna Squalli

Row 3 — Corporate strategic objectives: Cut onboarding time on Drone surveying and 3D site scans by 30 % · **Indicator:** KPI-008 (Session fill rate) · **Baseline:** 31 % · **Target:** 85 % · **Deadline:** 2027-05-10 · **Owner:** Kawtar Naciri

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-01.2 — Link objectives to functions and sites (L&D Strategist)

Type:

Row 1 — Objectives to functions and sites: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Loubna Naciri · **Source:** HRIS export

Row 2 — Objectives to functions and sites: Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Loubna Squalli · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Objectives to functions and sites register".

Result to record in the task: Client objectives recorded: BIM modelling and ISO 19650 workflows and ISO 19650 compliance for Site Works & Project Delivery.

When every step is complete, click Complete in the task panel.

Task UFT-19-05 — Plan engagement work breakdown · done by Consultant PM

Input: Strategic alignment → **Output:** Engagement WBS

Step MP-36.4 — Plan engagement work breakdown (Consultant PM)

Type:

Row 1 — Engagement work breakdown: Engagement work breakdown — BIM modelling and ISO 19650 workflows · **Owner:** Loubna Squalli · **Start:** 2026-11-09 · **End:** 2026-12-09 · **Budget:** 41000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Engagement work breakdown: Engagement work breakdown — Digital site diary and field reporting · **Owner:** Kawtar Naciri · **Start:** 2026-11-16 · **End:** 2026-12-16 · **Budget:** 39000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: WBS: 6 phases, 14 deliverables, Gantt from February to November.

When every step is complete, click Complete in the task panel.

Task UFT-19-06 — Plan change support · done by Change Manager

Input: Engagement WBS → **Output:** Change plan

Step MP-19.1 — Assess change impact (Change Manager)

Type:

Row 1 — Change impact: BIM modelling and ISO 19650 workflows · **Criterion:** Feasibility · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Change impact: Digital site diary and field reporting · **Criterion:** Cost · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Change impact: Drone surveying and 3D site scans · **Criterion:** Risk · **Weight (%):** 20 · **Score (1–5):** 3 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-19.2 — Build adoption plan (Change Manager)

Type:

Row 1 — Adoption plan: Adoption plan — BIM modelling and ISO 19650 workflows · **Owner:** Kawtar Naciri · **Start:** 2026-11-11 · **End:** 2026-12-11 · **Budget:** 38000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Adoption plan: Adoption plan — Digital site diary and field reporting · **Owner:** Sara Rami · **Start:** 2026-11-18 · **End:** 2026-12-18 · **Budget:** 35000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Change plan: 3 sponsor messages, champion network, 2 town-halls.

When every step is complete, click Complete in the task panel.

Task UFT-19-07 — Track engagement deliverables · done by Consultant PM

Input: Change plan → **Output:** Deliverable tracker

Step MP-36.5 — Track engagement deliverables (Consultant PM)

Type:

Row 1 — Engagement deliverables: KPI-009 (Plan realization rate) · **Period:** 2026-Q1 · **Value:** 61 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Engagement deliverables: KPI-010 (Learner completion rate) · **Period:** 2026-Q2 · **Value:** 58 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-20.5 — Run periodic quality review (Quality Manager)

Type:

Row 1 — Periodic quality review: BIM modelling and ISO 19650 workflows — half-day workshop · **Date:** 2026-11-23 · **Trainer:** Atlas Formation Conseil · **Participants:** 18 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Periodic quality review: Digital site diary and field reporting — half-day workshop · **Date:** 2026-11-30 · **Trainer:** Maghreb Learning Partners · **Participants:** 17 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Deliverables: 9 of 14 delivered on time, 1 late (SWOT), 4 planned.

When every step is complete, click Complete in the task panel.

Task UFT-19-08 — Deliver final report and obtain acceptance · done by Consultant PM

Input: Deliverable tracker → **Output:** Client acceptance

Step MP-36.6 — Deliver final report (Consultant PM)

Type:

Row 1 — Final report: BIM modelling and ISO 19650 workflows — half-day workshop · **Date:** 2026-11-25 · **Trainer:** Atlas Formation Conseil · **Participants:** 13 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Final report: Digital site diary and field reporting — half-day workshop · **Date:** 2026-12-02 · **Trainer:** Maghreb Learning Partners · **Participants:** 14 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-36.7 — Obtain client acceptance (HR Director)

Type:

Row 1 — Client acceptance: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Imane Tazi · **Source:** Audit report

Row 2 — Client acceptance: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Hind Lahlou · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Client acceptance register".

Result to record in the task: Final report delivered; acceptance signed by the HR Director on 28 November.

When every step is complete, click Complete in the task panel.

Task UFT-19-09 — Record engagement REX · done by Consultant PM

Input: Client acceptance → **Output:** Engagement REX

Step MP-36.8 — Record engagement REX (Consultant PM)

Type:

Row 1 — Engagement REX: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hind Lahlou · **Source:** HRIS export

Row 2 — Engagement REX: Digital site diary and field reporting · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Youssef Tazi · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Engagement REX register".

Step MP-12.6 — Record REX entry (L&D Business Partner)

Type:

Row 1 — REX entry: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hind Lahlou · **Source:** HRIS export

Row 2 — REX entry: Digital site diary and field reporting · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Youssef Tazi · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "REX entry register".

Step MP-12.5 — Prompt REX at closure (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: REX: went well — stakeholder register; did not — late SWOT inputs; root cause — no function-head backup; rating 4/5.

When every step is complete, click Complete in the task panel.

E2E-24 — Competitive Intelligence-to-Strategy

Goal: Analyze external environment and feed L&D strategy

Starts when: Annual strategy cycle or executive request for market positioning analysis.
Ends with: Validated competitive intelligence report feeding into L&D strategy and organizational diagnostic.

Task UFT-24-01 — Define intelligence scope · done by Strategy Analyst

Input: Strategy docs → **Output:** Scope document

Step MP-43.1 — Define intelligence scope (Strategy Analyst)

Type:

Row 1 — Intelligence scope: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Rachid Squalli · **Source:** Interview with the function head

Row 2 — Intelligence scope: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Adil Tazi · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Intelligence scope register".

Result to record in the task: Scope: AEC & Construction market in Morocco and export markets; horizon 3 years; focus on BIM modelling and ISO 19650 workflows and Digital site diary and field reporting.

When every step is complete, click Complete in the task panel.

Task UFT-24-02 — Conduct Porter's Five Forces · done by Strategy Analyst

Input: Market data → **Output:** Porter report

Step MP-43.2 — Conduct Porter's Five Forces analysis (Strategy Analyst)

Type:

Row 1 — Porter's Five Forces analysis: BIM modelling and ISO 19650 workflows — half-day workshop · **Date:** 2027-01-20 · **Trainer:** Atlas Formation Conseil · **Participants:** 11 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Porter's Five Forces analysis: Digital site diary and field reporting — half-day workshop · **Date:** 2027-01-27 · **Trainer:** Maghreb Learning Partners · **Participants:** 15 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Rivalry 4/5; new entrants 3/5; substitutes 2/5; supplier power 3/5; buyer power 4/5.

When every step is complete, click Complete in the task panel.

Task UFT-24-03 — Map market segments · done by Market Analyst

Input: Market data → **Output:** Segment map

Step MP-43.3 — Map market segments (Market Analyst)

Type:

Row 1 — Market segments: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Loubna Naciri · **Source:** Annual performance review

Row 2 — Market segments: Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Loubna Squalli · **Source:** Audit report

Then click Complete the step. The rows go to the register "Market segments register".

Result to record in the task: Segments: key accounts (55% revenue), resellers (30%), direct small customers (15%).

When every step is complete, click Complete in the task panel.

Task UFT-24-04 — Analyze competitor positioning · done by Market Analyst

Input: Competitor data → **Output:** Competitor benchmark

Step MP-43.4 — Analyze competitor positioning (Market Analyst)

Type:

Row 1 — Competitor positioning: BIM modelling and ISO 19650 workflows · **Criterion:** Risk · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Competitor positioning: Digital site diary and field reporting · **Criterion:** Business impact · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Competitor positioning: Drone surveying and 3D site scans · **Criterion:** Urgency · **Weight (%):** 20 · **Score (1–5):** 2 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Competitor A leads on BIM modelling and ISO 19650 workflows; competitor B cheaper but weaker on ISO 19650.

When every step is complete, click Complete in the task panel.

Task UFT-24-05 — Monitor regulatory and technology trends · done by Regulatory Analyst

Input: Regulations → **Output:** Trend report

Step MP-43.5 — Monitor regulatory changes (Regulatory Analyst)

Type:

Row 1 — Regulatory changes: KPI-001 (Strategic objective coverage) · **Period:** 2026-Q3 · **Value:** 59 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Regulatory changes: KPI-002 (Skills inventory validation rate) · **Period:** 2026-Q1 · **Value:** 80 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-43.6 — Track technology trends (Strategy Analyst)

Type:

Row 1 — Technology trends: KPI-001 (Strategic objective coverage) · **Period:** 2026-Q3 · **Value:** 64 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Technology trends: KPI-002 (Skills inventory validation rate) · **Period:** 2026-Q1 · **Value:** 75 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-43.7 — Benchmark against industry (Strategy Analyst)

Type:

Row 1 — Against industry: BIM modelling and ISO 19650 workflows · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Against industry: Digital site diary and field reporting · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Against industry: Drone surveying and 3D site scans · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 2 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Trends: revision of ISO 19650 expected next year; fast growth of Drone surveying and 3D site scans.

When every step is complete, click Complete in the task panel.

Task UFT-24-06 — Identify L&D implications · done by L&D Strategist

Input: All findings → **Output:** L&D implications

Step MP-43.8 — Identify strategic implications for L&D (L&D Strategist)

Type:

Row 1 — Strategic implications for L&D: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Sara Rami · **Source:** Interview with the function head

Row 2 — Strategic implications for L&D: Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Imane Tazi · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Strategic implications for L&D register".

Result to record in the task: L&D implication: build BIM modelling and ISO 19650 workflows skills for key-account teams before competitor A scales.

When every step is complete, click Complete in the task panel.

Task UFT-24-07 — Publish intelligence report · done by Strategy Analyst

Input: All outputs → **Output:** Intelligence report

Step MP-43.9 — Produce intelligence report (Strategy Analyst)

Type:

Row 1 — Intelligence report: Intelligence report — BIM modelling and ISO 19650 workflows · **Owner:** Imane Tazi · **Start:** 2027-01-20 · **End:** 2027-02-19 · **Budget:** 44000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Intelligence report: Intelligence report — Digital site diary and field reporting · **Owner:** Hind Lahlou · **Start:** 2027-01-27 · **End:** 2027-02-26 · **Budget:** 77000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-43.10 — Feed intelligence into strategy and diagnostic (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-43.11 — Update intelligence continuously (Strategy Analyst)

Type:

Intelligence continuously: Intelligence continuously

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-01-28

Then click Complete the step.

Step MP-43.12 — Report to executive leadership (Head of Strategy)

Type:

Row 1 — Executive leadership: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-01-15

Row 2 — Executive leadership: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-01-22

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish RPT-007 Competitive Intelligence Report to the executive committee.

When every step is complete, click Complete in the task panel.

SME-E2E-01 — SME Snapshot-to-Plan in 30 days

Goal: Turn a one-day needs snapshot into a short, funded plan.

Starts when: SME onboarding started. **Ends with:** Short plan approved by the owner-manager.

Task UFT-SME1-01 — Interview the owner-manager · done by Head of L&D

Input: Owner-manager input → **Output:** Record priorities, key roles and headcount.

Step SME-MP-01.1 — Record business priorities (Head of L&D)

Type:

Row 1 — Business priorities: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Sara Rami · **Source:** Questionnaire results

Row 2 — Business priorities: Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Imane Tazi · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Business priorities register".

Step SME-MP-01.2 — Record key roles and headcount (HR Business Partner)

Type:

Row 1 — Key roles and headcount: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Sara Rami · **Source:** Questionnaire results

Row 2 — Key roles and headcount: Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Imane Tazi · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Key roles and headcount register".

Result to record in the task: Priorities: win 2 new customers; reduce rework. Headcount SME: owner, 3 team leaders, operators.

When every step is complete, click Complete in the task panel.

Task UFT-SME1-02 — Send the needs snapshot · done by L&D Analyst

Input: Owner-manager input → **Output:** Send the short questionnaire to all employees.

Step SME-MP-01.3 — Send short needs questionnaire (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-54.6 — Distribute to stakeholders (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Send the 10-question snapshot to all employees by WhatsApp link or paper.

When every step is complete, click Complete in the task panel.

Task UFT-SME1-03 — Summarize top needs · done by L&D Analyst

Input: Owner-manager input → **Output:** Review the AI summary of the top five needs.

Step SME-MP-01.4 — Summarize top needs (L&D Analyst)

Type:

Row 1 — Top needs: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hind Lahlou · **Source:** Audit report

Row 2 — Top needs: Digital site diary and field reporting · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Youssef Tazi · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Top needs register".

Result to record in the task: Top needs: BIM modelling and ISO 19650 workflows; Digital site diary and field reporting; customer service. Accept the AI summary.

When every step is complete, click Complete in the task panel.

Task UFT-SME1-04 — Approve the short plan · done by HR Director

Input: Owner-manager input → **Output:** Owner-manager approves the short plan.

Step MP-53.9 — Validate and approve scope (HR Director)

Type:

Decision: Approved

Approve scope: Approve scope

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-05-29

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: Short plan approved: 3 themes, 6 training days, 45,000 MAD.

When every step is complete, click Complete in the task panel.

Gate G1 — G1 — Scope & evidence approved: close the phase

2. Open the project workspace and click the gate button of the phase.
2. Tick each checklist item once its evidence is attached, then click Submit for decision.
2. Click Go. Type the justification: All mandatory items met; evidence attached.
2. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

Phase 2 — Diagnosis

E2E-20 — Multi-Axis Diagnostic-to-Maturity Report

Goal: Conduct 5-axis diagnostic + CMM maturity + leadership assessment

Starts when: Engagement kickoff or approved Scope of Work requesting a diagnostic. **Ends with:** 5-axis diagnostic, CMM maturity and leadership maturity report validated with the sponsor.

Task UFT-20-01 — Define diagnostic axes and sample · done by Consultant PM

Input: Approved Scope of Work → **Output:** Axes and sample

Step MP-37.1 — Define diagnostic axes and sample (Consultant PM)

Type:

Row 1 — Diagnostic axes and sample: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Youssef Tazi · **Source:** Interview with the function head

Row 2 — Diagnostic axes and sample: Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Salma Ouazzani · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Diagnostic axes and sample register".

Result to record in the task: Axes: strategy, organization, processes, people, information systems. Sample: 40 people (MS 8, MO 16, OP 16).

When every step is complete, click Complete in the task panel.

Task UFT-20-02 — Deploy diagnostic questionnaire · done by Consultant PM

Input: Axes and sample → **Output:** Questionnaire responses

Step MP-37.2 — Deploy diagnostic questionnaire (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-37.4 — Collect questionnaire responses (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Diagnostic questionnaire deployed to 40 people; 34 responses (85%).

When every step is complete, click Complete in the task panel.

Task UFT-20-03 — Conduct semi-structured interviews · done by Consultant

Input: Axes and sample → **Output:** Interview findings

Step MP-37.3 — Conduct semi-structured interviews (Consultant)

Type:

Row 1 — Semi-structured interviews: BIM modelling and ISO 19650 workflows — half-day workshop · **Date:** 2026-12-03 · **Trainer:** Atlas Formation Conseil · **Participants:** 15 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Semi-structured interviews: Digital site diary and field reporting — half-day workshop · **Date:** 2026-12-10 · **Trainer:** Maghreb Learning Partners · **Participants:** 19 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Interview notes (OP, Site Works & Project Delivery): 'Procedures exist but are not updated since 2023.'

When every step is complete, click Complete in the task panel.

Task UFT-20-04 — Score diagnostic axes · done by Consultant

Input: Interview findings, responses → **Output:** Axis scores

Step MP-37.5 — Score diagnostic axes (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Axis scores (1-5): strategy 3.4, organization 2.8, processes 2.6, people 3.1, IS 2.2.

When every step is complete, click Complete in the task panel.

Task UFT-20-05 — Select maturity model · done by Consultant

Input: Axis scores → **Output:** Maturity model

Step MP-38.1 — Select maturity model levels (Consultant)

Type:

Decision: Approved

Maturity model levels: Maturity model levels

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-11-20

Decided by: Loubna Naciri

Then click Complete the step.

Step MP-38.2 — Define evidence criteria per level (Consultant)

Type:

Row 1 — Evidence criteria per level: Raise BIM modelling and ISO 19650 workflows proficiency of Operator — Site Works & Project Delivery teams to level 3 · **Indicator:** KPI-016 (Knowledge reuse rate) · **Baseline:** 46 % · **Target:** 86 % · **Deadline:** 2027-05-16 · **Owner:** Adil Tazi

Row 2 — Evidence criteria per level: Certify Supervisor — Site Works & Project Delivery staff on Digital site diary and field reporting · **Indicator:** KPI-017 (IDP coverage) · **Baseline:** 46 % · **Target:** 75 % · **Deadline:** 2027-05-23 · **Owner:** Loubna Naciri

Row 3 — Evidence criteria per level: Cut onboarding time on Drone surveying and 3D site scans by 30 % · **Indicator:** KPI-018 (Mandatory certification compliance) · **Baseline:** 33 % · **Target:** 83 % · **Deadline:** 2027-05-30 · **Owner:** Loubna Squalli

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Maturity model: CMM 5 levels; evidence for level 3 = documented and applied process.

When every step is complete, click Complete in the task panel.

Task UFT-20-06 — Rate process maturity · done by Consultant

Input: Maturity model → **Output:** Maturity profile

Step MP-38.3 — Rate maturity per process area (Consultant)

Type:

Row 1 — Maturity per process area: BIM modelling and ISO 19650 workflows · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Maturity per process area: Digital site diary and field reporting · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Maturity per process area: Drone surveying and 3D site scans · **Criterion:** Cost · **Weight (%):** 20 · **Score (1–5):** 3 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-38.4 — Compute maturity profile (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Maturity: training management level 2; Site Works & Project Delivery processes level 3.

When every step is complete, click Complete in the task panel.

Task UFT-20-07 — Assess leadership maturity · done by HR Business Partner

Input: Maturity profile → **Output:** Leadership maturity

Step MP-42.1 — Launch leadership 360 assessment (HR Business Partner)

Type:

Row 1 — Leadership 360 assessment: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-11-26

Row 2 — Leadership 360 assessment: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-12-03

Then click Complete the step. The rows go to the register "Communications log".

Step MP-42.2 — Compute leadership maturity level (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Leadership 360: average level 3 (Team Leadership) across 18 managers.

When every step is complete, click Complete in the task panel.

Task UFT-20-08 — Cross-check skills and needs · done by L&D Analyst

Input: Leadership maturity → **Output:** Consolidated evidence

Step MP-02.7 — Validate skills inventory (Head of L&D)

Type:

Decision: Approved

Skills inventory: Skills inventory

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2026-12-17

Decided by: Loubna Naciri

Then click Complete the step.

Step MP-03.2 — Review gap matrix by site and function (L&D Analyst)

Type:

Gap matrix by site and function: Gap matrix by site and function

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-12-18

Then click Complete the step.

Result to record in the task: Cross-check: IS axis weakness confirmed by the BIM modelling and ISO 19650 workflows gap (-1.4).

When every step is complete, click Complete in the task panel.

Task UFT-20-09 — Draft diagnostic findings · done by Consultant

Input: Consolidated evidence → **Output:** Draft findings

Step MP-37.6 — Draft diagnostic findings (Consultant)

Type:

Row 1 — Diagnostic findings: Diagnostic findings — BIM modelling and ISO 19650 workflows · **Owner:** Sara Rami · **Start:** 2026-12-05 · **End:** 2027-01-04 · **Budget:** 29000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Diagnostic findings: Diagnostic findings — Digital site diary and field reporting · **Owner:** Imane Tazi · **Start:** 2026-12-12 · **End:** 2027-01-11 · **Budget:** 78000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-38.5 — Produce maturity report (Consultant PM)

Type:

Row 1 — Maturity report: Maturity report — BIM modelling and ISO 19650 workflows · **Owner:** Sara Rami · **Start:** 2026-12-05 · **End:** 2027-01-04 · **Budget:** 27000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Maturity report: Maturity report — Digital site diary and field reporting · **Owner:** Imane Tazi · **Start:** 2026-12-12 · **End:** 2027-01-11 · **Budget:** 51000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Edit AI findings: keep 5, merge 2, add one on ISO 19650 documentation.

When every step is complete, click Complete in the task panel.

Task UFT-20-10 — Validate findings with sponsor · done by Consultant PM

Input: Draft findings → **Output:** Diagnostic & maturity report

Step MP-37.7 — Validate findings with sponsor (Consultant PM)

Type:

Decision: Approved

Findings with sponsor: Findings with sponsor

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-11-30

Decided by: Loubna Naciri

Then click Complete the step.

Step MP-38.6 — Agree target maturity (HR Director)

Type:

Decision: Approved

Target maturity: Target maturity

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-11-30

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: Findings validated with the sponsor; target maturity level 3 by 2026+1.

When every step is complete, click Complete in the task panel.

E2E-25 — Job Architecture-to-Competency Map

Goal: Manage organizational charts, position descriptions, gap analysis

Starts when: Organizational change, new role creation, or annual job architecture review.
Ends with: Approved organizational charts, position descriptions, and competency maps with gap analysis.

Task UFT-25-01 — Map organizational structure · done by HR Analyst

Input: Org data → **Output:** Structure map

Step MP-44.1 — Map organizational structure (HR Analyst)

Type:

Row 1 — Organizational structure: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hind Lahlou · **Source:** Annual performance review

Row 2 — Organizational structure: Digital site diary and field reporting · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Youssef Tazi · **Source:** Audit report

Then click Complete the step. The rows go to the register "Organizational structure register".

Result to record in the task: Structure: 6 functions, 14 departments, 3 sites; 212 positions.

When every step is complete, click Complete in the task panel.

Task UFT-25-02 — Design organizational charts · done by Org Design Consultant

Input: Structure map → **Output:** Org charts

Step MP-44.2 — Design organizational charts (Org Design Consultant)

Type:

Row 1 — Organizational charts: Organizational charts — BIM modelling and ISO 19650 workflows · **Owner:** Youssef Tazi · **Start:** 2027-01-24 · **End:** 2027-02-23 · **Budget:** 23000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Organizational charts: Organizational charts — Digital site diary and field reporting · **Owner:** Salma Ouazzani · **Start:** 2027-01-31 · **End:** 2027-03-02 · **Budget:** 65000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Org chart 'Site Works & Project Delivery': director → 3 managers → 9 supervisors → operators.

When every step is complete, click Complete in the task panel.

Task UFT-25-03 — Conduct job analysis · done by Job Analyst

Input: Org charts → **Output:** Job analysis

Step MP-44.3 — Conduct job analysis (Job Analyst)

Type:

Row 1 — Job analysis: BIM modelling and ISO 19650 workflows — half-day workshop · **Date:** 2027-02-05 · **Trainer:** Atlas Formation Conseil · **Participants:** 14 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Job analysis: Digital site diary and field reporting — half-day workshop · **Date:** 2027-02-12 · **Trainer:** Maghreb Learning Partners · **Participants:** 17 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Job analysis 'Site Works & Project Delivery supervisor': 8 main activities, 2 of them now supported by BIM modelling and ISO 19650 workflows.

When every step is complete, click Complete in the task panel.

Task UFT-25-04 — Draft position descriptions · done by Job Analyst

Input: Job analysis → **Output:** Draft descriptions

Step MP-44.4 — Draft position descriptions (Job Analyst)

Type:

Row 1 — Position descriptions: Position descriptions — BIM modelling and ISO 19650 workflows · **Owner:** Hajar Berrada · **Start:** 2027-01-28 · **End:** 2027-02-27 · **Budget:** 31000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Position descriptions: Position descriptions — Digital site diary and field reporting · **Owner:** Rachid Squalli · **Start:** 2027-02-04 · **End:** 2027-03-06 · **Budget:** 70000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Position description drafted: mission, activities, competencies (BIM modelling and ISO 19650 workflows level 3, ISO 19650 level 3), KPIs.

When every step is complete, click Complete in the task panel.

Task UFT-25-05 — Validate with managers · done by HR Business Partner

Input: Draft descriptions → **Output:** Validated descriptions

Step MP-44.5 — Validate descriptions with managers (HR Business Partner)

Type:

Decision: Approved

Descriptions with managers: Descriptions with managers

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-02-06

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: Validated by the Site Works & Project Delivery manager with 2 changes on activities.

When every step is complete, click Complete in the task panel.

Task UFT-25-06 — Conduct gap analysis · done by Job Analyst

Input: Validated descriptions → **Output:** Gap analysis

Step MP-44.6 — Conduct gap analysis existing versus real (Job Analyst)

Type:

Row 1 — Gap analysis existing versus real: BIM modelling and ISO 19650 workflows — half-day workshop · **Date:** 2027-02-11 · **Trainer:** Atlas Formation Conseil · **Participants:** 15 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Gap analysis existing versus real: Digital site diary and field reporting — half-day workshop · **Date:** 2027-02-18 · **Trainer:** Maghreb Learning Partners · **Participants:** 12 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Gap existing vs real: 11 descriptions outdated; 4 roles with new BIM modelling and ISO 19650 workflows tasks.

When every step is complete, click Complete in the task panel.

Task UFT-25-07 — Identify roles to develop · done by HR Business Partner

Input: Gap analysis → **Output:** Roles to develop

Step MP-44.7 — Identify roles to develop (HR Business Partner)

Type:

Row 1 — Roles to develop: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Loubna Naciri · **Source:** Audit report

Row 2 — Roles to develop: Digital site diary and field reporting · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Loubna Squalli · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Roles to develop register".

Step MP-44.8 — Update job architecture (Job Analyst)

Type:

Job architecture: Job architecture

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-02-25

Then click Complete the step.

Step MP-44.9 — Align with competency framework (Job Analyst)

Type:

Row 1 — With competency framework: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Loubna Naciri · **Source:** Audit report

Row 2 — With competency framework: Digital site diary and field reporting · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Loubna Squalli · **Source:** HRIS export

Then click Complete the step. The rows go to the register "With competency framework register".

Result to record in the task: Roles 'To develop': data-literate supervisor, maintenance technician 4.0.

When every step is complete, click Complete in the task panel.

Task UFT-25-08 — Publish approved architecture · done by HR Director

Input: All outputs → **Output:** Approved architecture

Step MP-44.10 — Publish approved position descriptions (HR Director)

Type:

Row 1 — Approved position descriptions: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-01-31

Row 2 — Approved position descriptions: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-02-07

Then click Complete the step. The rows go to the register "Communications log".

Step MP-44.11 — Track job architecture changes (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-44.12 — Report on architecture health (HR Director)

Type:

Row 1 — On architecture health: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-01-31

Row 2 — On architecture health: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-02-07

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish 212 approved descriptions and the architecture map to all employees.

When every step is complete, click Complete in the task panel.

E2E-26 — GPEC-to-Training Plan

Goal: Integrate Forward Planning of Jobs and Skills into L&D

Starts when: Annual HR strategic planning cycle or GPEC (Forward Planning of Jobs and Skills) review. **Ends with:** Training plan aligned with GPEC and HR strategic orientations.

Task UFT-26-01 — Define GPEC scope · done by GPEC Specialist

Input: HR strategy → **Output:** GPEC scope

Step MP-45.1 — Define GPEC scope (GPEC Specialist)

Type:

Row 1 — GPEC scope: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Kawtar Naciri · **Source:** Interview with the function head

Row 2 — GPEC scope: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Sara Rami · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "GPEC scope register".

Result to record in the task: GPEC scope: Site Works & Project Delivery and Information Systems jobs; horizon 3 years.

When every step is complete, click Complete in the task panel.

Task UFT-26-02 — Map HR strategic orientations · done by HR Director

Input: Strategy docs → **Output:** Orientation map

Step MP-45.2 — Map HR strategic orientations (HR Director)

Type:

Row 1 — HR strategic orientations: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Sara Rami · **Source:** Questionnaire results

Row 2 — HR strategic orientations: Digital site diary and field reporting · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Imane Tazi · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "HR strategic orientations register".

Step MP-45.3 — Align training with GPEC (L&D Strategist)

Type:

Row 1 — Training with GPEC: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Sara Rami · **Source:** Questionnaire results

Row 2 — Training with GPEC: Digital site diary and field reporting · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Imane Tazi · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Training with GPEC register".

Result to record in the task: HR orientations: internal mobility first; 30% of promotions from internal talent.

When every step is complete, click Complete in the task panel.

Task UFT-26-03 — Update development foundation · done by HR Business Partner

Input: Position descriptions → **Output:** Updated foundation

Step MP-45.4 — Update development foundation (HR Business Partner)

Type:

Development foundation: Development foundation

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-02-26

Then click Complete the step.

Step MP-45.5 — Support human capital development (HR Director)

Type:

Row 1 — Human capital development: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Imane Tazi · **Source:** Annual performance review

Row 2 — Human capital development: Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hind Lahlou · **Source:** Audit report

Then click Complete the step. The rows go to the register "Human capital development register".

Result to record in the task: Development foundation updated: descriptions, annual objectives, evaluation grid.

When every step is complete, click Complete in the task panel.

Task UFT-26-04 — Update Jobs and Skills Directory (REC) · done by GPEC Specialist

Input: Job data → **Output:** Updated REC

Step MP-45.6 — Update Jobs and Skills Directory (REC) (GPEC Specialist)

Type:

Jobs and Skills Directory (REC): Jobs and Skills Directory (REC)

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-03-07

Then click Complete the step.

Result to record in the task: REC updated: 42 jobs, 3 new jobs linked to BIM modelling and ISO 19650 workflows.

When every step is complete, click Complete in the task panel.

Task UFT-26-05 — Redynamize periodic evaluations · done by HR Business Partner

Input: Eval system → **Output:** Eval updates

Step MP-45.7 — Redynamize periodic evaluations (HR Business Partner)

Type:

Row 1 — Periodic evaluations: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Youssef Tazi · **Source:** HRIS export

Row 2 — Periodic evaluations: Digital site diary and field reporting · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Salma Ouazzani · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Periodic evaluations register".

Result to record in the task: Periodic evaluation redesigned: 2 reviews per year, competency section added.

When every step is complete, click Complete in the task panel.

Task UFT-26-06 — Design career paths · done by HR Director

Input: Job architecture → **Output:** Career paths

Step MP-45.8 — Design career paths (HR Director)

Type:

Row 1 — Career paths: Career paths — BIM modelling and ISO 19650 workflows · **Owner:** Salma Ouazzani · **Start:** 2027-02-17 · **End:** 2027-03-19 · **Budget:** 40000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Career paths: Career paths — Digital site diary and field reporting · **Owner:** Hajar Berrada · **Start:** 2027-02-24 · **End:** 2027-03-26 · **Budget:** 45000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Career path: operator → team leader → supervisor → Site Works & Project Delivery manager.

When every step is complete, click Complete in the task panel.

Task UFT-26-07 — Document career management · done by HR Director

Input: Career paths → **Output:** Career process doc

Step MP-45.9 — Document career management process (HR Director)

Type:

Row 1 — Career management process: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hajar Berrada · **Source:** Questionnaire results

Row 2 — Career management process: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Rachid Squalli · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Career management process register".

Step MP-45.10 — Implement collective compensation (HR Director)

Type:

Row 1 — Collective compensation: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hajar Berrada · **Source:** Questionnaire results

Row 2 — Collective compensation: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Rachid Squalli · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Collective compensation register".

Result to record in the task: Career management procedure documented (v1): eligibility, committee, calendar.

When every step is complete, click Complete in the task panel.

Task UFT-26-08 — Align training with GPEC · done by L&D Strategist

Input: GPEC outputs → **Output:** Training-GPEC alignment

Step MP-45.11 — Feed GPEC into training needs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-45.12 — Report on GPEC integration (GPEC Specialist)

Type:

Row 1 — On GPEC integration: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-02-16

Row 2 — On GPEC integration: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-02-23

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Training aligned with GPEC: 4 themes cover the 3 new jobs; 2 themes removed.

When every step is complete, click Complete in the task panel.

E2E-27 — Demand Collection-to-Consolidation

Goal: Collect individual and collective training demands

Starts when: Annual training plan cycle or ad-hoc demand collection request. **Ends with:** Consolidated and prioritized demand repository integrated into the training needs analysis.

Task UFT-27-01 — Design demand collection forms · done by L&D Analyst

Input: Templates → **Output:** Forms

Step MP-46.1 — Design demand collection forms (L&D Analyst)

Type:

Row 1 — Demand collection forms: Demand collection forms — BIM modelling and ISO 19650 workflows · **Owner:** Adil Tazi · **Start:** 2027-02-23 · **End:** 2027-03-25 · **Budget:** 23000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Demand collection forms: Demand collection forms — Digital site diary and field reporting · **Owner:** Loubna Naciri · **Start:** 2027-03-02 · **End:** 2027-04-01 · **Budget:** 40000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Forms: individual form (5 questions) and collective form per team (3 questions).

When every step is complete, click Complete in the task panel.

Task UFT-27-02 — Deploy individual demand collection · done by L&D Analyst

Input: Forms → **Output:** Individual demands

Step MP-46.2 — Deploy individual demand collection (L&D Analyst)

Type:

Row 1 — Individual demand collection: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Individual demand collection: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Individual collection open 1-20 March; 146 demands received.

When every step is complete, click Complete in the task panel.

Task UFT-27-03 — Deploy collective demand collection · done by L&D Analyst

Input: Forms → **Output:** Collective demands

Step MP-46.3 — Deploy collective demand collection (L&D Analyst)

Type:

Row 1 — Collective demand collection: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Collective demand collection: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Collective collection: 18 team demands received.

When every step is complete, click Complete in the task panel.

Task UFT-27-04 — Collect manager recommendations · done by L&D Business Partner

Input: Managers → **Output:** Recommendations

Step MP-46.4 — Collect manager recommendations (L&D Business Partner)

Type:

Row 1 — Manager recommendations: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Kawtar Naciri · **Source:** Questionnaire results

Row 2 — Manager recommendations: Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Sara Rami · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Manager recommendations register".

Result to record in the task: Manager recommendations: 24 received, 9 flagged as priority.

When every step is complete, click Complete in the task panel.

Task UFT-27-05 — Consolidate demands by function · done by L&D Analyst

Input: Demands → **Output:** Consolidated demands

Step MP-46.5 — Consolidate demands by function (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Consolidated: Site Works & Project Delivery 64 demands, Operations 41, Quality 22, others 37.

When every step is complete, click Complete in the task panel.

Task UFT-27-06 — Map demands to competencies · done by L&D Analyst

Input: Consolidated demands → **Output:** Demand-competency map

Step MP-46.6 — Map demands to competencies (L&D Analyst)

Type:

Row 1 — Demands to competencies: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Imane Tazi · **Source:** Audit report

Row 2 — Demands to competencies: Digital site diary and field reporting · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hind Lahlou · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Demands to competencies register".

Step MP-46.7 — Prioritize demands (L&D Business Partner)

Type:

Row 1 — Demands: BIM modelling and ISO 19650 workflows · **Criterion:** Risk · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Demands: Digital site diary and field reporting · **Criterion:** Business impact · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Demands: Drone surveying and 3D site scans · **Criterion:** Urgency · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Accept AI mapping for 139 demands; map 7 manually to 'Digital site diary and field reporting'.

When every step is complete, click Complete in the task panel.

Task UFT-27-07 — Prioritize and validate demands · done by L&D Business Partner

Input: Demand map → **Output:** Validated demands

Step MP-46.8 — Validate demands with managers (L&D Business Partner)

Type:

Decision: Approved

Demands with managers: Demands with managers

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-02-28

Decided by: Loubna Naciri

Then click Complete the step.

Step MP-46.9 — Integrate demands into needs analysis (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-46.10 — Report on demand patterns (L&D Analyst)

Type:

Row 1 — On demand patterns: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-03-02

Row 2 — On demand patterns: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-03-09

Then click Complete the step. The rows go to the register "Communications log".

Step MP-46.11 — Track demand fulfillment (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-46.12 — Improve demand collection (L&D Analyst)

Type:

Demand collection: Demand collection

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-03-01

Then click Complete the step.

Result to record in the task: Validated: 112 demands (High 38, Medium 51, Low 23); 34 rejected with reason.

When every step is complete, click Complete in the task panel.

E2E-28 — Performance Assessment-to-RAG Dashboard

Goal: Assess MS/MO/OP performance with RAG ratings

Starts when: Annual performance cycle or management request for performance visualization. **Ends with:** Validated MS/MO/OP (Strategic Management / Operational Management / Operational Level) performance assessment with RAG (Green/Amber/Red) dashboards.

Task UFT-28-01 — Define MS/MO/OP framework · done by Performance Analyst

Input: Strategy docs → **Output:** Framework

Step MP-47.1 — Define MS/MO/OP framework (Performance Analyst)

Type:

Row 1 — MS/MO/OP framework: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Youssef Tazi · **Source:** Interview with the function head

Row 2 — MS/MO/OP framework: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Salma Ouazzani · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "MS/MO/OP framework register".

Result to record in the task: MS = executive committee; MO = managers and supervisors; OP = operators and technicians.

When every step is complete, click Complete in the task panel.

Task UFT-28-02 — Define RAG criteria · done by Performance Analyst

Input: Framework → **Output:** RAG criteria

Step MP-47.2 — Define RAG criteria (Performance Analyst)

Type:

Row 1 — RAG criteria: Raise BIM modelling and ISO 19650 workflows proficiency of Operator — Site Works & Project Delivery teams to level 3 · **Indicator:** KPI-008 (Session fill rate) · **Baseline:** 47 % · **Target:** 81 % · **Deadline:** 2027-08-28 · **Owner:** Salma Ouazzani

Row 2 — RAG criteria: Certify Supervisor — Site Works & Project Delivery staff on Digital site diary and field reporting · **Indicator:** KPI-009 (Plan realization rate) · **Baseline:** 36 % · **Target:** 80 % · **Deadline:** 2027-09-04 · **Owner:** Hajar Berrada

Row 3 — RAG criteria: Cut onboarding time on Drone surveying and 3D site scans by 30 % · **Indicator:** KPI-010 (Learner completion rate) · **Baseline:** 38 % · **Target:** 89 % · **Deadline:** 2027-09-11 · **Owner:** Rachid Squalli

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Green ≥ 90% of target; Amber 70-89%; Red < 70%.

When every step is complete, click Complete in the task panel.

Task UFT-28-03 — Collect performance data by function · done by Performance Analyst

Input: Function data → **Output:** Data set

Step MP-47.3 — Collect performance data by function (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Data collected for 6 functions: 18 KPIs, last 12 months.

When every step is complete, click Complete in the task panel.

Task UFT-28-04 — Assess MS performance · done by Performance Analyst

Input: Data set → **Output:** MS assessment

Step MP-47.4 — Assess MS performance (Performance Analyst)

Type:

Row 1 — MS performance: BIM modelling and ISO 19650 workflows · **Criterion:** Risk · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — MS performance: Digital site diary and field reporting · **Criterion:** Business impact · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — MS performance: Drone surveying and 3D site scans · **Criterion:** Urgency · **Weight (%):** 20 · **Score (1–5):** 3 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: MS: strategy deployment Amber (78%); governance Green (92%).

When every step is complete, click Complete in the task panel.

Task UFT-28-05 — Assess MO performance · done by Performance Analyst

Input: Data set → **Output:** MO assessment

Step MP-47.5 — Assess MO performance (Performance Analyst)

Type:

Row 1 — MO performance: BIM modelling and ISO 19650 workflows · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — MO performance: Digital site diary and field reporting · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — MO performance: Drone surveying and 3D site scans · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 2 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: MO: Site Works & Project Delivery team management Red (64%); planning Amber (81%).

When every step is complete, click Complete in the task panel.

Task UFT-28-06 — Assess OP performance · done by Performance Analyst

Input: Data set → **Output:** OP assessment

Step MP-47.6 — Assess OP performance (Performance Analyst)

Type:

Row 1 — OP performance: BIM modelling and ISO 19650 workflows · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — OP performance: Digital site diary and field reporting · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — OP performance: Drone surveying and 3D site scans · **Criterion:** Cost · **Weight (%):** 20 · **Score (1–5):** 4 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-47.7 — Apply RAG ratings (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: OP: ISO 19650 compliance Amber (85%); productivity Green (93%).

When every step is complete, click Complete in the task panel.

Task UFT-28-07 — Publish RAG dashboard · done by Performance Analyst

Input: All assessments → **Output:** RAG dashboard

Step MP-47.8 — Visualize performance dashboards (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-47.9 — Identify performance gaps (Performance Analyst)

Type:

Row 1 — Performance gaps: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Loubna Squalli · **Source:** Questionnaire results

Row 2 — Performance gaps: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Kawtar Naciri · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Performance gaps register".

Step MP-47.10 — Feed performance into diagnostic report (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-47.11 — Track performance progression (Performance Analyst)

Type:

Row 1 — Performance progression: KPI-013 (Skill progression rate) · **Period:** 2026-Q2 · **Value:** 84 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — Performance progression: KPI-014 (Report on-time delivery) · **Period:** 2026-Q3 · **Value:** 84 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-47.12 — Report performance to leadership (Performance Analyst)

Type:

Row 1 — Performance to leadership: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-03-16

Row 2 — Performance to leadership: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-03-23

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish RPT-005 MS/MO/OP RAG dashboard to the executive committee.

When every step is complete, click Complete in the task panel.

E2E-29 — Functional SWOT-to-Improvement Axes

Goal: Conduct function-level SWOT and define improvement axes

Starts when: Diagnostic phase of a training engineering engagement or annual functional review. **Ends with:** Validated functional SWOT reports with prioritized improvement axes per function.

Task UFT-29-01 — Define function scope · done by L&D Analyst

Input: Org data → **Output:** Scope

Step MP-48.1 — Define function scope (L&D Analyst)

Type:

Row 1 — Function scope: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Kawtar Naciri · **Source:** Annual performance review

Row 2 — Function scope: Digital site diary and field reporting · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Sara Rami · **Source:** Audit report

Then click Complete the step. The rows go to the register "Function scope register".

Result to record in the task: Function in scope: Site Works & Project Delivery (3 sites, 96 people).

When every step is complete, click Complete in the task panel.

Task UFT-29-02 — Conduct function SWOT · done by L&D Analyst

Input: Function data → **Output:** SWOT

Step MP-48.2 — Conduct function SWOT (L&D Analyst)

Type:

Row 1 — Function SWOT: BIM modelling and ISO 19650 workflows — half-day workshop · **Date:** 2027-04-04 · **Trainer:** Atlas Formation Conseil · **Participants:** 16 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Function SWOT: Digital site diary and field reporting — half-day workshop · **Date:** 2027-04-11 · **Trainer:** Maghreb Learning Partners · **Participants:** 15 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: SWOT workshop held with the function head and 6 supervisors.

When every step is complete, click Complete in the task panel.

Task UFT-29-03 — Identify strengths and weaknesses · done by L&D Analyst

Input: Interview data → **Output:** Internal factors

Step MP-48.3 — Identify strengths (L&D Analyst)

Type:

Row 1 — Strengths: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Imane Tazi · **Source:** HRIS export

Row 2 — Strengths: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Hind Lahlou · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Strengths register".

Step MP-48.4 — Identify weaknesses (L&D Analyst)

Type:

Row 1 — Weaknesses: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Imane Tazi · **Source:** HRIS export

Row 2 — Weaknesses: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Hind Lahlou · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Weaknesses register".

Result to record in the task: Strength: experienced team. Weakness: low BIM modelling and ISO 19650 workflows usage, paper records.

When every step is complete, click Complete in the task panel.

Task UFT-29-04 — Identify opportunities and threats · done by L&D Analyst

Input: Market data → **Output:** External factors

Step MP-48.5 — Identify opportunities (L&D Analyst)

Type:

Row 1 — Opportunities: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hind Lahlou · **Source:** Interview with the function head

Row 2 — Opportunities: Digital site diary and field reporting · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Youssef Tazi · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Opportunities register".

Step MP-48.6 — Identify threats (L&D Analyst)

Type:

Row 1 — Threats: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hind Lahlou · **Source:** Interview with the function head

Row 2 — Threats: Digital site diary and field reporting · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Youssef Tazi · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Threats register".

Result to record in the task: Opportunity: Drone surveying and 3D site scans. Threat: stricter ISO 19650 audits.

When every step is complete, click Complete in the task panel.

Task UFT-29-05 — Define improvement axes · done by L&D Business Partner

Input: SWOT → **Output:** Improvement axes

Step MP-48.7 — Define improvement axes (L&D Business Partner)

Type:

Row 1 — Improvement axes: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Youssef Tazi · **Source:** Questionnaire results

Row 2 — Improvement axes: Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Salma Ouazzani · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Improvement axes register".

Result to record in the task: Axis 1: digitalise shift records with BIM modelling and ISO 19650 workflows. Axis 2: certify supervisors on ISO 19650.

When every step is complete, click Complete in the task panel.

Task UFT-29-06 — Validate with function heads · done by L&D Business Partner

Input: Improvement axes → **Output:** Validated axes

Step MP-48.8 — Validate axes with function heads (L&D Business Partner)

Type:

Decision: Approved

Axes with function heads: Axes with function heads

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-04-16

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: Validated by the function head on 18 April; axis 2 deadline moved to Q3.

When every step is complete, click Complete in the task panel.

Task UFT-29-07 — Prioritize improvement axes · done by L&D Strategist

Input: Validated axes → **Output:** Prioritized axes

Step MP-48.9 — Prioritize improvement axes (L&D Strategist)

Type:

Row 1 — Improvement axes: BIM modelling and ISO 19650 workflows · **Criterion:** Risk · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Improvement axes: Digital site diary and field reporting · **Criterion:** Business impact · **Weight (%):** 30 · **Score (1–5):** 5 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Improvement axes: Drone surveying and 3D site scans · **Criterion:** Urgency · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-48.10 — Feed SWOT into diagnostic report (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-48.11 — Track improvement implementation (L&D Business Partner)

Type:

Row 1 — Improvement implementation: KPI-020 (Integration synchronisation success rate) · **Period:** 2026-Q3 · **Value:** 88 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — Improvement implementation: KPI-001 (Strategic objective coverage) · **Period:** 2026-Q1 · **Value:** 71 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-48.12 — Report on function performance (L&D Analyst)

Type:

Row 1 — On function performance: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-03-30

Row 2 — On function performance: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-04-06

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Priority: axis 1 (impact 5), axis 2 (impact 4).

When every step is complete, click Complete in the task panel.

E2E-02 — Skills-to-Gap Diagnosis

Goal: Produce a validated skills gap diagnosis

Starts when: Approved annual L&D plan or a scheduled skills assessment campaign. **Ends with:** Validated skills gap diagnosis released to needs analysis.

Task UFT-02-01 — Maintain competency framework · done by L&D Analyst

Input: Job architecture → **Output:** Competency framework

Step MP-02.1 — Define competency families and levels (L&D Analyst)

Type:

Row 1 — Competency families and levels: Raise BIM modelling and ISO 19650 workflows proficiency of Operator — Site Works & Project Delivery teams to level 3 · **Indicator:** KPI-012 (Average Level 1 satisfaction) · **Baseline:** 39 % · **Target:** 86 % · **Deadline:** 2027-02-17 · **Owner:** Adil Tazi

Row 2 — Competency families and levels: Certify Supervisor — Site Works & Project Delivery staff on Digital site diary and field reporting · **Indicator:** KPI-013 (Skill progression rate) · **Baseline:** 31 % · **Target:** 87 % · **Deadline:** 2027-02-24 · **Owner:** Loubna Naciri

Row 3 — Competency families and levels: Cut onboarding time on Drone surveying and 3D site scans by 30 % · **Indicator:** KPI-014 (Report on-time delivery) · **Baseline:** 46 % · **Target:** 83 % · **Deadline:** 2027-03-03 · **Owner:** Loubna Squalli

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Family 'BIM modelling and ISO 19650 workflows': 4 competencies on the 1-4 scale (Aware, Practitioner, Autonomous, Expert).

When every step is complete, click Complete in the task panel.

Task UFT-02-02 — Set target levels per position · done by HR Business Partner

Input: Competency framework → **Output:** Position targets

Step MP-02.2 — Set target levels per position (HR Business Partner)

Type:

Row 1 — Target levels per position: Raise BIM modelling and ISO 19650 workflows proficiency of Operator — Site Works & Project Delivery teams to level 3 · **Indicator:** KPI-013 (Skill progression rate) · **Baseline:** 31 % · **Target:** 86 % · **Deadline:** 2027-02-19 · **Owner:** Loubna Naciri

Row 2 — Target levels per position: Certify Supervisor — Site Works & Project Delivery staff on Digital site diary and field reporting · **Indicator:** KPI-014 (Report on-time delivery) · **Baseline:** 37 % · **Target:** 87 % · **Deadline:** 2027-02-26 · **Owner:** Loubna Squalli

Row 3 — Target levels per position: Cut onboarding time on Drone surveying and 3D site scans by 30 % · **Indicator:** KPI-015 (Training record correction rate) · **Baseline:** 38 % · **Target:** 86 % · **Deadline:** 2027-03-05 · **Owner:** Kawtar Naciri

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Site Works & Project Delivery supervisor: BIM modelling and ISO 19650 workflows = 3; ISO 19650 = 3. Site Works & Project Delivery operator: BIM modelling and ISO 19650 workflows = 2.

When every step is complete, click Complete in the task panel.

Task UFT-02-03 — Launch assessment campaign · done by L&D Analyst

Input: Position targets → **Output:** Open campaign

Step MP-02.3 — Launch assessment campaign (L&D Analyst)

Type:

Row 1 — Assessment campaign: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-08-30

Row 2 — Assessment campaign: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-09-06

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Campaign 'Skills 2026': population Site Works & Project Delivery and Operations (212 people), 12 competencies, close date 30 April.

When every step is complete, click Complete in the task panel.

Task UFT-02-04 — Collect self and manager assessments · done by Manager

Input: Open campaign → **Output:** Consolidated assessments

Step MP-02.4 — Submit self and manager assessments (Manager)

Type:

Row 1 — Self and manager assessments: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-09-01

Row 2 — Self and manager assessments: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-09-08

Then click Complete the step. The rows go to the register "Communications log".

Step MP-02.5 — Consolidate assessment results (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Self-assessment BIM modelling and ISO 19650 workflows: 2; manager validation: 2 with comment 'needs practice on live cases'.

When every step is complete, click Complete in the task panel.

Task UFT-02-05 — Suggest proficiency from evidence · done by L&D Analyst

Input: Consolidated assessments → **Output:** Suggested levels

Step MP-02.6 — Suggest proficiency from evidence (L&D Analyst)

Type:

Row 1 — Proficiency from evidence: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Sara Rami · **Source:** HRIS export

Row 2 — Proficiency from evidence: Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Imane Tazi · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Proficiency from evidence register".

Result to record in the task: Accept 38 suggested levels, edit 4 (evidence too old), reject 1. Every change carries a note.

When every step is complete, click Complete in the task panel.

Task UFT-02-06 — Validate skills inventory · done by Head of L&D

Input: Suggested levels → **Output:** Validated inventory

Step MP-02.7 — Validate skills inventory (Head of L&D)

Type:

Decision: Approved

Skills inventory: Skills inventory

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2026-09-10

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: Inventory validated: 212 employees, 96% assessments complete. Justification: sample checked by site.

When every step is complete, click Complete in the task panel.

Task UFT-02-07 — Compute and forecast gaps · done by L&D Analyst

Input: Validated inventory → **Output:** Skills gap diagnosis

Step MP-03.1 — Compute gap matrix (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-03.2 — Review gap matrix by site and function (L&D Analyst)

Type:

Gap matrix by site and function: Gap matrix by site and function

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-09-20

Then click Complete the step.

Step MP-28.3 — Forecast skill gaps (Performance Analyst)

Type:

Row 1 — Skill gaps: KPI-018 (Mandatory certification compliance) · **Period:** 2026-Q3 · **Value:** 87 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — Skill gaps: KPI-019 (Vendor invoice match rate) · **Period:** 2026-Q1 · **Value:** 62 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-28.1 — Build analytics dataset (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Critical gaps: BIM modelling and ISO 19650 workflows (-1.4 average on supervisors), Digital site diary and field reporting (-1.1). Forecast: Drone surveying and 3D site scans becomes critical within 12 months.

When every step is complete, click Complete in the task panel.

E2E-21 — Previous Plan Impact-to-Strategy Update

Goal: Evaluate N-1 plan impact and update strategy

Starts when: Start of a new plan cycle with N-1 execution data available. **Ends with:** N-1 impact conclusions fed into the strategy update.

Task UFT-21-01 — Load N-1 plan execution data · done by L&D Analyst

Input: N-1 plan → **Output:** N-1 dataset

Step MP-39.1 — Load N-1 plan execution data (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Load N-1 plan: 28 sessions planned, 23 delivered, 1,410,000 MAD spent.

When every step is complete, click Complete in the task panel.

Task UFT-21-02 — Define impact criteria · done by L&D Analyst

Input: N-1 dataset → **Output:** Impact criteria

Step MP-39.2 — Define impact criteria (L&D Analyst)

Type:

Row 1 — Impact criteria: Raise BIM modelling and ISO 19650 workflows proficiency of Operator — Site Works & Project Delivery teams to level 3 · **Indicator:** KPI-003 (Critical gap rate) · **Baseline:** 32 % · **Target:** 73 % · **Deadline:** 2027-05-30 · **Owner:** Youssef Tazi

Row 2 — Impact criteria: Certify Supervisor — Site Works & Project Delivery staff on Digital site diary and field reporting · **Indicator:** KPI-004 (Training Engineering Report cycle time) · **Baseline:** 37 % · **Target:** 83 % · **Deadline:** 2027-06-06 · **Owner:** Salma Ouazzani

Row 3 — Impact criteria: Cut onboarding time on Drone surveying and 3D site scans by 30 % · **Indicator:** KPI-005 (Design approval lead time) · **Baseline:** 37 % · **Target:** 78 % · **Deadline:** 2027-06-13 · **Owner:** Hajar Berrada

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Impact criteria: application on the job, KPI change, satisfaction, cost per learner.

When every step is complete, click Complete in the task panel.

Task UFT-21-03 — Survey participants and managers · done by L&D Analyst

Input: Impact criteria → **Output:** Survey results

Step MP-39.3 — Survey participants and managers (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-09.5 — Record on-the-job observation (Level 3) (Manager)

Type:

Row 1 — On-the-job observation (Level 3): BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Salma Ouazzani · **Source:** Annual performance review

Row 2 — On-the-job observation (Level 3): Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hajar Berrada · **Source:** Audit report

Then click Complete the step. The rows go to the register "On-the-job observation (Level 3) register".

Result to record in the task: Survey sent to 190 participants and 34 managers; 61% responded.

When every step is complete, click Complete in the task panel.

Task UFT-21-04 — Compare planned against realized · done by L&D Analyst

Input: Survey results → **Output:** Plan-vs-actual analysis

Step MP-39.4 — Compare planned against realized (L&D Analyst)

Type:

Row 1 — Planned against realized: BIM modelling and ISO 19650 workflows · **Criterion:** Risk · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Planned against realized: Digital site diary and field reporting · **Criterion:** Business impact · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Planned against realized: Drone surveying and 3D site scans · **Criterion:** Urgency · **Weight (%):** 20 · **Score (1–5):** 4 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-32.3 — Isolate training effect (Performance Analyst)

Type:

Row 1 — Training effect: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hajar Berrada · **Source:** Audit report

Row 2 — Training effect: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Rachid Squalli · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Training effect register".

Result to record in the task: Planned vs realized: 82% of sessions, 94% of budget; 2 themes not delivered.

When every step is complete, click Complete in the task panel.

Task UFT-21-05 — Review N-1 ROI · done by Performance Analyst

Input: Plan-vs-actual analysis → **Output:** N-1 ROI

Step MP-32.4 — Compute Phillips ROI (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-32.5 — Review ROI with finance (Finance Manager)

Type:

ROI with finance: ROI with finance

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-12-11

Then click Complete the step.

Result to record in the task: N-1 ROI: Digital site diary and field reporting 18%; safety theme 35%.

When every step is complete, click Complete in the task panel.

Task UFT-21-06 — Draft impact conclusions · done by L&D Analyst

Input: N-1 ROI → **Output:** Draft conclusions

Step MP-39.5 — Draft impact study conclusions (L&D Analyst)

Type:

Row 1 — Impact study conclusions: Impact study conclusions — BIM modelling and ISO 19650 workflows · **Owner:** Adil Tazi · **Start:** 2026-12-19 · **End:** 2027-01-18 · **Budget:** 46000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Impact study conclusions: Impact study conclusions — Digital site diary and field reporting · **Owner:** Loubna Naciri · **Start:** 2026-12-26 · **End:** 2027-01-25 · **Budget:** 36000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Accept AI conclusions 1-3; rewrite conclusion 4 (sample too small).

When every step is complete, click Complete in the task panel.

Task UFT-21-07 — Feed conclusions to strategy · done by Head of L&D

Input: Draft conclusions → **Output:** Strategy inputs

Step MP-39.6 — Feed conclusions to strategy update (Head of L&D)

Type:

Row 1 — Conclusions to strategy update: KPI-008 (Session fill rate) · **Period:** 2026-Q2 · **Value:** 56 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Conclusions to strategy update: KPI-009 (Plan realization rate) · **Period:** 2026-Q3 · **Value:** 60 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-01.1 — Record corporate strategic objectives (Head of L&D)

Type:

Row 1 — Corporate strategic objectives: Raise BIM modelling and ISO 19650 workflows proficiency of Operator — Site Works & Project Delivery teams to level 3 · **Indicator:** KPI-008 (Session fill rate) · **Baseline:** 44 % · **Target:** 81 % · **Deadline:** 2027-06-09 · **Owner:** Loubna Naciri

Row 2 — Corporate strategic objectives: Certify Supervisor — Site Works & Project Delivery staff on Digital site diary and field reporting · **Indicator:** KPI-009 (Plan realization rate) · **Baseline:** 38 % · **Target:** 89 % · **Deadline:** 2027-06-16 · **Owner:** Loubna Squalli

Row 3 — Corporate strategic objectives: Cut onboarding time on Drone surveying and 3D site scans by 30 % · **Indicator:** KPI-010 (Learner completion rate) · **Baseline:** 38 % · **Target:** 79 % · **Deadline:** 2027-06-23 · **Owner:** Kawtar Naciri

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Feed to strategy: keep blended format; stop long classroom courses on Digital site diary and field reporting.

When every step is complete, click Complete in the task panel.

Task UFT-21-08 — Update roadmap priorities · done by L&D Strategist

Input: Strategy inputs → **Output:** Updated roadmap priorities

Step MP-04.6 — Sequence roadmap initiatives (L&D Strategist)

Type:

Row 1 — Roadmap initiatives: Roadmap initiatives — BIM modelling and ISO 19650 workflows · **Owner:** Loubna Squalli · **Start:** 2026-12-23 · **End:** 2027-01-22 · **Budget:** 56000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Roadmap initiatives: Roadmap initiatives — Digital site diary and field reporting · **Owner:** Kawtar Naciri · **Start:** 2026-12-30 · **End:** 2027-01-29 · **Budget:** 74000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Roadmap priority updated: BIM modelling and ISO 19650 workflows moved to Q2; Digital site diary and field reporting to microlearning.

When every step is complete, click Complete in the task panel.

Gate G2 — G2 — Diagnostic validated: close the phase

2. Open the project workspace and click the gate button of the phase.
2. Tick each checklist item once its evidence is attached, then click Submit for decision.
2. Click Go. Type the justification: All mandatory items met; evidence attached.
2. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

Phase 3 — Training Engineering Report & plan

E2E-01 — Strategy-to-Learning Plan

Goal: Translate corporate strategy into an approved annual L&D plan and budget

Starts when: Annual strategy cycle opened or revised corporate objectives published by the board. **Ends with:** Annual L&D plan and budget envelope approved by the Steering Committee and locked.

Task UFT-01-01 — Record strategic objectives · done by Head of L&D

Input: Corporate strategy → **Output:** Strategic objectives register

Step MP-01.1 — Record corporate strategic objectives (Head of L&D)

Type:

Row 1 — Corporate strategic objectives: Raise BIM modelling and ISO 19650 workflows proficiency of Operator — Site Works & Project Delivery teams to level 3 · **Indicator:** KPI-006 (License Compliance %) · **Baseline:** 40 % · **Target:** 73 % · **Deadline:** 2027-02-05 · **Owner:** Imane Tazi

Row 2 — Corporate strategic objectives: Certify Supervisor — Site Works & Project Delivery staff on Digital site diary and field reporting · **Indicator:** KPI-007 (Content publication lead time) · **Baseline:** 35 % · **Target:** 82 % · **Deadline:** 2027-02-12 · **Owner:** Hind Lahlou

Row 3 — Corporate strategic objectives: Cut onboarding time on Drone surveying and 3D site scans by 30 % · **Indicator:** KPI-008 (Session fill rate) · **Baseline:** 46 % · **Target:** 72 % · **Deadline:** 2027-02-19 · **Owner:** Youssef Tazi

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: SO-1: BIM modelling and ISO 19650 workflows used by 80% of Site Works & Project Delivery staff by end 2026 (owner: Operations Director, measured quarterly). SO-2: zero major audit findings on ISO 19650.

When every step is complete, click Complete in the task panel.

Task UFT-01-02 — Link objectives to functions and sites · done by L&D Strategist

Input: Strategic objectives register → **Output:** Objective-function map

Step MP-01.2 — Link objectives to functions and sites (L&D Strategist)

Type:

Row 1 — Objectives to functions and sites: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hind Lahlou · **Source:** Interview with the function head

Row 2 — Objectives to functions and sites: Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Youssef Tazi · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Objectives to functions and sites register".

Result to record in the task: SO-1 → Site Works & Project Delivery, Operations, Information Systems (all sites). SO-2 → Quality & HSE, Site Works & Project Delivery.

When every step is complete, click Complete in the task panel.

Task UFT-01-03 — Frame skills priorities · done by L&D Analyst

Input: Objective-function map → **Output:** Priority competency list

Step MP-02.1 — Define competency families and levels (L&D Analyst)

Type:

Row 1 — Competency families and levels: Raise BIM modelling and ISO 19650 workflows proficiency of Operator — Site Works & Project Delivery teams to level 3 · **Indicator:** KPI-008 (Session fill rate) · **Baseline:** 35 % · **Target:** 85 % · **Deadline:** 2027-02-09 · **Owner:** Youssef Tazi

Row 2 — Competency families and levels: Certify Supervisor — Site Works & Project Delivery staff on Digital site diary and field reporting · **Indicator:** KPI-009 (Plan realization rate) · **Baseline:** 47 % · **Target:** 75 % · **Deadline:** 2027-02-16 · **Owner:** Salma Ouazzani

Row 3 — Competency families and levels: Cut onboarding time on Drone surveying and 3D site scans by 30 % · **Indicator:** KPI-010 (Learner completion rate) · **Baseline:** 37 % · **Target:** 85 % · **Deadline:** 2027-02-23 · **Owner:** Hajar Berrada

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-02.2 — Set target levels per position (HR Business Partner)

Type:

Row 1 — Target levels per position: Raise BIM modelling and ISO 19650 workflows proficiency of Operator — Site Works & Project Delivery teams to level 3 · **Indicator:** KPI-008 (Session fill rate) · **Baseline:** 49 % · **Target:** 89 % · **Deadline:** 2027-02-09 · **Owner:** Youssef Tazi

Row 2 — Target levels per position: Certify Supervisor — Site Works & Project Delivery staff on Digital site diary and field reporting · **Indicator:** KPI-009 (Plan realization rate) · **Baseline:** 47 % · **Target:** 88 % · **Deadline:** 2027-02-16 · **Owner:** Salma Ouazzani

Row 3 — Target levels per position: Cut onboarding time on Drone surveying and 3D site scans by 30 % · **Indicator:** KPI-010 (Learner completion rate) · **Baseline:** 46 % · **Target:** 83 % · **Deadline:** 2027-02-23 · **Owner:** Hajar Berrada

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Priority competency families: BIM modelling and ISO 19650 workflows; Digital site diary and field reporting; ISO 19650 compliance. Target level 3 (Autonomous) for supervisors.

When every step is complete, click Complete in the task panel.

Task UFT-01-04 — Pre-scope training needs · done by L&D Analyst

Input: Priority competency list → **Output:** Pre-scoped needs

Step MP-03.1 — Compute gap matrix (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-03.2 — Review gap matrix by site and function (L&D Analyst)

Type:

Gap matrix by site and function: Gap matrix by site and function

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-09-09

Then click Complete the step.

Result to record in the task: Pre-scoped needs: 42% of Site Works & Project Delivery supervisors below target on BIM modelling and ISO 19650 workflows; 18 employees below target on ISO 19650.

When every step is complete, click Complete in the task panel.

Task UFT-01-05 — Define budget envelope · done by Finance Manager

Input: Pre-scoped needs → **Output:** Budget envelope

Step MP-01.3 — Define L&D budget envelope (Finance Manager)

Type:

Row 1 — L&D budget envelope: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hajar Berrada · **Source:** Audit report

Row 2 — L&D budget envelope: Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Rachid Squalli · **Source:** HRIS export

Then click Complete the step. The rows go to the register "L&D budget envelope register".

Step MP-18.1 — Allocate budget by theme and site (Finance Manager)

Type:

Row 1 — Budget by theme and site: Budget by theme and site — BIM modelling and ISO 19650 workflows · **Owner:** Hajar Berrada · **Start:** 2026-08-27 · **End:** 2026-09-26 · **Budget:** 28000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Budget by theme and site: Budget by theme and site — Digital site diary and field reporting · **Owner:** Rachid Squalli · **Start:** 2026-09-03 · **End:** 2026-10-03 · **Budget:** 66000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-18.2 — Forecast OFPPT refunds (Finance Manager)

Type:

Row 1 — OFPPT refunds: KPI-010 (Learner completion rate) · **Period:** 2026-Q1 · **Value:** 72 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — OFPPT refunds: KPI-011 (API Availability) · **Period:** 2026-Q2 · **Value:** 79 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Gross L&D budget 2026: 1,850,000 MAD; forecast refund (OFPPT/CSF): 520,000 MAD; net envelope: 1,330,000 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-01-06 — Plan change and adoption · done by Change Manager

Input: Budget envelope → **Output:** Adoption plan

Step MP-19.1 — Assess change impact (Change Manager)

Type:

Row 1 — Change impact: BIM modelling and ISO 19650 workflows · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Change impact: Digital site diary and field reporting · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Change impact: Drone surveying and 3D site scans · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-19.2 — Build adoption plan (Change Manager)

Type:

Row 1 — Adoption plan: Adoption plan — BIM modelling and ISO 19650 workflows · **Owner:** Rachid Squalli · **Start:** 2026-08-29 · **End:** 2026-09-28 · **Budget:** 74000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Change impact: high for Site Works & Project Delivery supervisors (new BIM modelling and ISO 19650 workflows routines). Sponsors: Operations Director. Champions: one per site.

When every step is complete, click Complete in the task panel.

Task UFT-01-07 — Compile plan approval pack · done by Head of L&D

Input: Adoption plan → **Output:** Approval pack

Step MP-01.4 — Schedule Steering Committee milestones (Head of L&D)

Type:

Row 1 — Steering Committee milestones: Steering Committee milestones — BIM modelling and ISO 19650 workflows · **Owner:** Rachid Squalli · **Start:** 2027-04-28 · **End:** 2027-05-28 · **Budget:** 51000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Steering Committee milestones: Steering Committee milestones — Digital site diary and field reporting · **Owner:** Adil Tazi · **Start:** 2027-05-05 · **End:** 2027-06-04 · **Budget:** 34000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-01.5 — Compile plan approval pack (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-04.1 — Consolidate feeder outputs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Approval pack: 2 objectives, net budget 1,330,000 MAD, 6 priority themes, committee date 15 March 2026.

When every step is complete, click Complete in the task panel.

Task UFT-01-08 — Approve and lock annual L&D plan · done by HR Director

Input: Approval pack → **Output:** Approved annual L&D plan

Step MP-01.6 — Record Steering Committee decision (HR Director)

Type:

Row 1 — Steering Committee decision: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Adil Tazi · **Source:** Questionnaire results

Row 2 — Steering Committee decision: Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Loubna Naciri · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Steering Committee decision register".

Step MP-01.7 — Lock and distribute approved plan (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Decision: Approve. Justification: aligned with SO-1 and SO-2; budget within envelope. Plan locked as version 1.

When every step is complete, click Complete in the task panel.

E2E-03 — Needs-to-Training Engineering Report & Roadmap

Goal: Produce the Training Engineering Report and the prioritized training roadmap

Starts when: Validated skills gap diagnosis, consolidated demands, approved Scope of Work or diagnostic findings available. **Ends with:** Training Engineering Report and prioritized roadmap approved and published.

Task UFT-03-01 — Plan diagnostic interviews · done by L&D Analyst

Input: Approved Scope of Work → **Output:** Interview plan

Step MP-03.3 — Plan diagnostic interviews (L&D Analyst)

Type:

Row 1 — Diagnostic interviews: Diagnostic interviews — BIM modelling and ISO 19650 workflows · **Owner:** Youssef Tazi · **Start:** 2026-09-14 · **End:** 2026-10-14 · **Budget:** 62000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Diagnostic interviews: Diagnostic interviews — Digital site diary and field reporting · **Owner:** Salma Ouazzani · **Start:** 2026-09-21 · **End:** 2026-10-21 · **Budget:** 64000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Interview plan: 14 semi-structured interviews (4 MS, 6 MO, 4 OP), 45 minutes each, weeks 10-11.

When every step is complete, click Complete in the task panel.

Task UFT-03-02 — Record interview findings · done by L&D Analyst

Input: Interview plan → **Output:** Interview findings

Step MP-03.4 — Record interview findings (L&D Analyst)

Type:

Row 1 — Interview findings: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Salma Ouazzani · **Source:** Audit report

Row 2 — Interview findings: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Hajar Berrada · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Interview findings register".

Result to record in the task: Finding (MO, Site Works & Project Delivery): 'Supervisors do not trust BIM modelling and ISO 19650 workflows data; they re-enter figures on paper.'

When every step is complete, click Complete in the task panel.

Task UFT-03-03 — Cluster needs into themes · done by L&D Analyst

Input: Interview findings, gaps, responses → **Output:** Training themes

Step MP-03.5 — Cluster needs into training themes (L&D Analyst)

Type:

Row 1 — Needs into training themes: BIM modelling and ISO 19650 workflows · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Needs into training themes: Digital site diary and field reporting · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Needs into training themes: Drone surveying and 3D site scans · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 3 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Accept theme 'BIM modelling and ISO 19650 workflows for supervisors'; merge two duplicate themes on Digital site diary and field reporting; split 'ISO 19650' into awareness and auditor tracks.

When every step is complete, click Complete in the task panel.

Task UFT-03-04 — Prioritize needs by impact · done by L&D Strategist

Input: Training themes → **Output:** Prioritized needs

Step MP-03.6 — Prioritize needs by business impact (L&D Strategist)

Type:

Row 1 — Needs by business impact: BIM modelling and ISO 19650 workflows · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Needs by business impact: Digital site diary and field reporting · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Needs by business impact: Drone surveying and 3D site scans · **Criterion:** Cost · **Weight (%):** 20 · **Score (1–5):** 4 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: BIM modelling and ISO 19650 workflows: impact 5, urgency 4. Digital site diary and field reporting: impact 4, urgency 3. ISO 19650: impact 4, urgency 5.

When every step is complete, click Complete in the task panel.

Task UFT-03-05 — Validate needs register · done by Head of L&D

Input: Prioritized needs → **Output:** Validated needs register

Step MP-03.7 — Validate needs register (Head of L&D)

Type:

Decision: Approved

Needs register: Needs register

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-09-29

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: Needs register validated: 23 needs, 6 themes. Justification: covers SO-1 and SO-2; sponsor reviewed.

When every step is complete, click Complete in the task panel.

Task UFT-03-06 — Consolidate engineering inputs · done by L&D Analyst

Input: Validated needs register → **Output:** Input completeness check

Step MP-04.1 — Consolidate feeder outputs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-04.2 — Check input completeness (L&D Analyst)

Type:

Input completeness: Input completeness

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-10-09

Then click Complete the step.

Result to record in the task: Inputs complete: Scope of Work, 187 responses, gap matrix, RAG dashboard, SWOT, demands. Missing: none.

When every step is complete, click Complete in the task panel.

Task UFT-03-07 — Draft Training Engineering Report · done by L&D Strategist

Input: Input completeness check → **Output:** Report draft

Step MP-04.3 — Generate report draft (L&D Strategist)

Type:

Row 1 — Report draft: Report draft — BIM modelling and ISO 19650 workflows · **Owner:** Youssef Tazi · **Start:** 2027-05-14 · **End:** 2027-06-13 · **Budget:** 41000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Report draft: Report draft — Digital site diary and field reporting · **Owner:** Salma Ouazzani · **Start:** 2027-05-21 · **End:** 2027-06-20 · **Budget:** 22000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-04.4 — Edit and complete report sections (L&D Strategist)

Type:

Complete report sections: Complete report sections

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-06-05

Then click Complete the step.

Result to record in the task: Section 3 'Diagnostic': edit the AI draft, add the interview quote on BIM modelling and ISO 19650 workflows, keep the RAG table.

When every step is complete, click Complete in the task panel.

Task UFT-03-08 — Run quality review · done by Quality Manager

Input: Report draft → **Output:** Reviewed report

Step MP-04.5 — Run quality review of report (Quality Manager)

Type:

Row 1 — Quality review of report: BIM modelling and ISO 19650 workflows — half-day workshop · **Date:** 2027-05-26 · **Trainer:** Atlas Formation Conseil · **Participants:** 14 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Quality review of report: Digital site diary and field reporting — half-day workshop · **Date:** 2027-06-02 · **Trainer:** Maghreb Learning Partners · **Participants:** 11 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-20.5 — Run periodic quality review (Quality Manager)

Type:

Row 1 — Periodic quality review: BIM modelling and ISO 19650 workflows — half-day workshop · **Date:** 2027-05-26 · **Trainer:** Atlas Formation Conseil · **Participants:** 11 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Periodic quality review: Digital site diary and field reporting — half-day workshop · **Date:** 2027-06-02 · **Trainer:** Maghreb Learning Partners · **Participants:** 12 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Quality review: 11/12 checklist items met; fix item 'sources cited for every figure'. Result: pass after correction.

When every step is complete, click Complete in the task panel.

Task UFT-03-09 — Sequence and budget roadmap · done by L&D Strategist

Input: Reviewed report → **Output:** Draft roadmap

Step MP-04.6 — Sequence roadmap initiatives (L&D Strategist)

Type:

Row 1 — Roadmap initiatives: Roadmap initiatives — BIM modelling and ISO 19650 workflows · **Owner:** Hajar Berrada · **Start:** 2027-05-18 · **End:** 2027-06-17 · **Budget:** 46000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Roadmap initiatives: Roadmap initiatives — Digital site diary and field reporting · **Owner:** Rachid Squalli · **Start:** 2027-05-25 · **End:** 2027-06-24 · **Budget:** 75000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-18.1 — Allocate budget by theme and site (Finance Manager)

Type:

Row 1 — Budget by theme and site: Budget by theme and site — BIM modelling and ISO 19650 workflows · **Owner:** Hajar Berrada · **Start:** 2027-05-18 · **End:** 2027-06-17 · **Budget:** 72000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Budget by theme and site: Budget by theme and site — Digital site diary and field reporting · **Owner:** Rachid Squalli · **Start:** 2027-05-25 · **End:** 2027-06-24 · **Budget:** 74000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Roadmap: Q2 BIM modelling and ISO 19650 workflows (6 groups); Q3 ISO 19650 (4 groups); Q4 Digital site diary and field reporting (3 groups). Total 1,240,000 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-03-10 — Approve and publish report and roadmap · done by Head of L&D

Input: Draft roadmap → **Output:** Approved Training Engineering Report and roadmap

Step MP-04.7 — Submit roadmap for approval (Head of L&D)

Type:

Row 1 — Roadmap for approval: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-05-15

Row 2 — Roadmap for approval: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-05-22

Then click Complete the step. The rows go to the register "Communications log".

Step MP-04.8 — Record roadmap approval (HR Director)

Type:

Row 1 — Roadmap approval: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Rachid Squalli · **Source:** Questionnaire results

Row 2 — Roadmap approval: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Adil Tazi · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Roadmap approval register".

Step MP-04.9 — Publish approved report and roadmap (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-01.6 — Record Steering Committee decision (HR Director)

Type:

Row 1 — Steering Committee decision: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Rachid Squalli · **Source:** Questionnaire results

Row 2 — Steering Committee decision: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Adil Tazi · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Steering Committee decision register".

Result to record in the task: Decision: Approve report and roadmap v1. Justification: within budget, linked to SO-1/SO-2. Publish to all stakeholders.

When every step is complete, click Complete in the task panel.

E2E-30 — Prioritization-to-Resource Plan

Goal: Prioritize themes and plan days, groups, trainers, budget

Starts when: Consolidated training themes requiring prioritization and resource planning.
Ends with: Approved prioritized training plan with days per theme, group planning, trainer allocation, and budget.

Task UFT-30-01 — Consolidate training themes · done by L&D Analyst

Input: Themes → **Output:** Theme list

Step MP-49.1 — Consolidate training themes (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Consolidated list: 9 themes from needs, demands, GPEC and SWOT.

When every step is complete, click Complete in the task panel.

Task UFT-30-02 — Define prioritization criteria · done by L&D Strategist

Input: Strategy → **Output:** Criteria

Step MP-49.2 — Define prioritization criteria (L&D Strategist)

Type:

Row 1 — Prioritization criteria: Raise BIM modelling and ISO 19650 workflows proficiency of Operator — Site Works & Project Delivery teams to level 3 · **Indicator:** KPI-002 (Skills inventory validation rate) · **Baseline:** 36 % · **Target:** 78 % · **Deadline:** 2027-09-25 · **Owner:** Adil Tazi

Row 2 — Prioritization criteria: Certify Supervisor — Site Works & Project Delivery staff on Digital site diary and field reporting · **Indicator:** KPI-003 (Critical gap rate) · **Baseline:** 47 % · **Target:** 88 % · **Deadline:** 2027-10-02 · **Owner:** Loubna Naciri

Row 3 — Prioritization criteria: Cut onboarding time on Drone surveying and 3D site scans by 30 % · **Indicator:** KPI-004 (Training Engineering Report cycle time) · **Baseline:** 32 % · **Target:** 84 % · **Deadline:** 2027-10-09 · **Owner:** Loubna Squalli

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Criteria: strategic impact 40%, urgency 30%, number of learners 20%, cost 10%.

When every step is complete, click Complete in the task panel.

Task UFT-30-03 — Prioritize themes · done by L&D Strategist

Input: Criteria → **Output:** Prioritized themes

Step MP-49.3 — Prioritize themes (L&D Strategist)

Type:

Row 1 — Themes: BIM modelling and ISO 19650 workflows · **Criterion:** Feasibility · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Themes: Digital site diary and field reporting · **Criterion:** Cost · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Themes: Drone surveying and 3D site scans · **Criterion:** Risk · **Weight (%):** 20 · **Score (1–5):** 2 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Rank 1 BIM modelling and ISO 19650 workflows (score 86); rank 2 ISO 19650 (81); rank 3 Digital site diary and field reporting (74).

When every step is complete, click Complete in the task panel.

Task UFT-30-04 — Estimate days per theme · done by L&D Planner

Input: Prioritized themes → **Output:** Days per theme

Step MP-49.4 — Estimate days per theme (L&D Planner)

Type:

Row 1 — Days per theme: BIM modelling and ISO 19650 workflows · **Criterion:** Cost · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Days per theme: Digital site diary and field reporting · **Criterion:** Risk · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Days per theme: Drone surveying and 3D site scans · **Criterion:** Business impact · **Weight (%):** 20 · **Score (1–5):** 3 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: BIM modelling and ISO 19650 workflows: 3 days per group; ISO 19650: 2 days; Digital site diary and field reporting: 1.5 days.

When every step is complete, click Complete in the task panel.

Task UFT-30-05 — Define groups per theme · done by L&D Planner

Input: Days per theme → **Output:** Group plan

Step MP-49.5 — Define number of groups per theme (L&D Planner)

Type:

Row 1 — Number of groups per theme: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Kawtar Naciri · **Source:** Audit report

Row 2 — Number of groups per theme: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Sara Rami · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Number of groups per theme register".

Step MP-49.6 — Allocate trainers (L&D Planner)

Type:

Row 1 — Role: L&D Analyst · **Trainers:** BIM modelling and ISO 19650 workflows · **Person:** Kawtar Naciri · **Allocation (%):** 100 · **Start:** 2027-04-04 · **Holder type:** Holder

Row 2 — Role: Trainer / Coach · **Trainers:** Digital site diary and field reporting · **Person:** Sara Rami · **Allocation (%):** 50 · **Start:** 2027-04-11 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Result to record in the task: BIM modelling and ISO 19650 workflows: 6 groups of 12; ISO 19650: 4 groups; Digital site diary and field reporting: 3 groups.

When every step is complete, click Complete in the task panel.

Task UFT-30-06 — Allocate trainers and budget · done by Finance Manager

Input: Group plan → **Output:** Resource plan

Step MP-49.7 — Estimate plan budget (Finance Manager)

Type:

Row 1 — Plan budget: BIM modelling and ISO 19650 workflows · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Plan budget: Digital site diary and field reporting · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Plan budget: Drone surveying and 3D site scans · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 3 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-49.8 — Sequence delivery (L&D Planner)

Type:

Row 1 — Delivery: Delivery — BIM modelling and ISO 19650 workflows · **Owner:** Sara Rami · **Start:** 2027-04-16 · **End:** 2027-05-16 · **Budget:** 62000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Delivery: Delivery — Digital site diary and field reporting · **Owner:** Imane Tazi · **Start:** 2027-04-23 · **End:** 2027-05-23 · **Budget:** 29000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-49.9 — Validate plan with governance (Head of L&D)

Type:

Decision: Approved

Plan with governance: Plan with governance

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-04-09

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: Trainers: 2 internal, vendor A; budget 1,240,000 MAD (within envelope).

When every step is complete, click Complete in the task panel.

Task UFT-30-07 — Publish prioritized training plan · done by L&D Leader

Input: All outputs → **Output:** Prioritized Plan

Step MP-49.10 — Publish prioritized plan (Head of L&D)

Type:

Row 1 — Prioritized plan: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-05-29

Row 2 — Prioritized plan: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-06-05

Then click Complete the step. The rows go to the register "Communications log".

Step MP-49.11 — Track plan execution (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-49.12 — Report on resource utilization (L&D Planner)

Type:

Row 1 — On resource utilization: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-05-29

Row 2 — On resource utilization: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-06-05

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish RPT-002 Prioritized Training Plan 2026 to all stakeholders.

When every step is complete, click Complete in the task panel.

E2E-22 — Multi-Site Plan-to-Deployment

Goal: Adapt and deploy plans across sites

Starts when: Approved roadmap for an organization with several sites or entities. **Ends with:** Site plans adapted, validated and deployed, with deviations escalated.

Task UFT-22-01 — Split plan by site · done by Head of L&D

Input: Approved roadmap → **Output:** Site plans

Step MP-40.1 — Split plan by site (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Split plan into 3 sites: Casablanca 55%, Tanger 30%, Agadir 15%.

When every step is complete, click Complete in the task panel.

Task UFT-22-02 — Adapt site plan to local constraints · done by Site L&D Coordinator

Input: Site plans → **Output:** Adapted site plans

Step MP-40.2 — Adapt site plan to local constraints (Site L&D Coordinator)

Type:

Row 1 — Site plan to local constraints: Site plan to local constraints — BIM modelling and ISO 19650 workflows · **Owner:** Sara Rami · **Start:** 2026-12-27 · **End:** 2027-01-26 · **Budget:** 34000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Site plan to local constraints: Site plan to local constraints — Digital site diary and field reporting · **Owner:** Imane Tazi · **Start:** 2027-01-03 · **End:** 2027-02-02 · **Budget:** 46000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Tanger: shift constraints → sessions of 4 hours instead of full days.

When every step is complete, click Complete in the task panel.

Task UFT-22-03 — Localize site materials · done by Instructional Designer

Input: Adapted site plans → **Output:** Localized materials

Step MP-23.1 — Request translation (Instructional Designer)

Type:

Row 1 — Translation: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-12-24

Row 2 — Translation: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-12-31

Then click Complete the step. The rows go to the register "Communications log".

Step MP-23.3 — Validate translation (Subject Matter Expert)

Type:

Decision: Approved

Translation: Translation

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2026-12-29

Decided by: Loubna Naciri

Then click Complete the step.

Step MP-23.6 — Review participation equity (HR Business Partner)

Type:

Participation equity: Participation equity

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-12-30

Then click Complete the step.

Step MP-23.7 — Record inclusion actions (HR Business Partner)

Type:

Row 1 — Inclusion actions: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Imane Tazi · **Source:** Interview with the function head

Row 2 — Inclusion actions: Digital site diary and field reporting · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hind Lahlou · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Inclusion actions register".

Result to record in the task: Agadir materials translated to AR; validated by the site expert.

When every step is complete, click Complete in the task panel.

Task UFT-22-04 — Validate site plan · done by Head of L&D

Input: Adapted site plans → **Output:** Validated site plans

Step MP-40.3 — Validate site plan (Head of L&D)

Type:

Decision: Approved

Site plan: Site plan

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-01-07

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: Site plans validated centrally; budget deviation within ±5%.

When every step is complete, click Complete in the task panel.

Task UFT-22-05 — Schedule site sessions · done by Training Administrator

Input: Validated site plans → **Output:** Site schedules

Step MP-07.1 — Create training session (Training Administrator)

Type:

Row 1 — Training session: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Adil Tazi · **Source:** Audit report

Row 2 — Training session: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Loubna Naciri · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Training session register".

Step MP-11.1 — Book rooms and equipment (Training Administrator)

Type:

Row 1 — Rooms and equipment: Rooms and equipment — BIM modelling and ISO 19650 workflows · **Owner:** Adil Tazi · **Start:** 2027-06-13 · **End:** 2027-07-13 · **Budget:** 49000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Rooms and equipment: Rooms and equipment — Digital site diary and field reporting · **Owner:** Loubna Naciri · **Start:** 2027-06-20 · **End:** 2027-07-20 · **Budget:** 36000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Tanger schedule: 8 sessions, rooms booked, 2 trainers.

When every step is complete, click Complete in the task panel.

Task UFT-22-06 — Deploy site schedule · done by Site L&D Coordinator

Input: Site schedules → **Output:** Deployed schedules

Step MP-40.4 — Deploy site schedule (Site L&D Coordinator)

Type:

Row 1 — Site schedule: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Site schedule: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Schedules deployed and communicated to site managers.

When every step is complete, click Complete in the task panel.

Task UFT-22-07 — Consolidate site status · done by Head of L&D

Input: Deployed schedules → **Output:** Site status

Step MP-40.5 — Consolidate site status (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Status: Casablanca 70%, Tanger 45%, Agadir 20% delivered.

When every step is complete, click Complete in the task panel.

Task UFT-22-08 — Escalate site deviation · done by Head of L&D

Input: Site status → **Output:** Multi-site deployment status

Step MP-40.6 — Escalate site deviation (Head of L&D)

Type:

Row 1 — Site deviation: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-06-14

Row 2 — Site deviation: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-06-21

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Escalate Agadir deviation (-25%) to the HR Director with a recovery plan.

When every step is complete, click Complete in the task panel.

E2E-23 — Regulatory Submission-to-Validation

Goal: Submit and validate training plans with regulatory bodies

Starts when: Approved plan requiring external validation or funding (e.g. OFPPT, GIAC-Agro).
Ends with: Plan validated by the regulatory body and evidence archived.

Task UFT-23-01 — Select regulatory template · done by Compliance Officer

Input: Approved plan → **Output:** Selected template

Step MP-41.1 — Select regulatory template (Compliance Officer)

Type:

Decision: Approved

Regulatory template: Regulatory template

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-01-16

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: Template: OFPPT special training contracts (CSF) — plan file.

When every step is complete, click Complete in the task panel.

Task UFT-23-02 — Generate submission file · done by Compliance Officer

Input: Selected template → **Output:** Submission file

Step MP-41.2 — Generate submission file (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-20.5 — Run periodic quality review (Quality Manager)

Type:

Row 1 — Periodic quality review: BIM modelling and ISO 19650 workflows — half-day workshop · **Date:** 2027-01-14 · **Trainer:** Atlas Formation Conseil · **Participants:** 10 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Periodic quality review: Digital site diary and field reporting — half-day workshop · **Date:** 2027-01-21 · **Trainer:** Maghreb Learning Partners · **Participants:** 13 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Submission file generated: plan, themes, providers, costs; quality check passed.

When every step is complete, click Complete in the task panel.

Task UFT-23-03 — Submit plan to regulatory body · done by Compliance Officer

Input: Submission file → **Output:** Submitted plan

Step MP-41.3 — Submit plan to regulatory body (Compliance Officer)

Type:

Row 1 — Plan to regulatory body: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-01-01

Row 2 — Plan to regulatory body: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-01-08

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Submitted to the regional funding committee on 5 March; reference GSF-2026-118.

When every step is complete, click Complete in the task panel.

Task UFT-23-04 — Track submission status · done by Compliance Officer

Input: Submitted plan → **Output:** Status log

Step MP-41.4 — Track submission status (Compliance Officer)

Type:

Row 1 — Submission status: KPI-002 (Skills inventory validation rate) · **Period:** 2026-Q3 · **Value:** 86 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — Submission status: KPI-003 (Critical gap rate) · **Period:** 2026-Q1 · **Value:** 80 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Status: additional document requested (provider accreditation) — sent on 12 March.

When every step is complete, click Complete in the task panel.

Task UFT-23-05 — Record regulator decision · done by Compliance Officer

Input: Status log → **Output:** Regulator decision

Step MP-41.5 — Record regulator decision (Compliance Officer)

Type:

Row 1 — Regulator decision: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Salma Ouazzani · **Source:** Questionnaire results

Row 2 — Regulator decision: Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hajar Berrada · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Regulator decision register".

Step MP-14.1 — Register regulatory requirement (Compliance Officer)

Type:

Row 1 — Regulatory requirement: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Salma Ouazzani · **Source:** Questionnaire results

Row 2 — Regulatory requirement: Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hajar Berrada · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Regulatory requirement register".

Result to record in the task: Decision: approved with a cap of 520,000 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-23-06 — Submit refund claims · done by Finance Manager

Input: Regulator decision → **Output:** Refund claims

Step MP-18.5 — Submit refund claims (Finance Manager)

Type:

Row 1 — Refund claims: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-06-26

Row 2 — Refund claims: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-07-03

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Refund claims submitted for 12 delivered actions: 318,000 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-23-07 — Archive submission evidence · done by Compliance Officer

Input: Refund claims → **Output:** Regulatory submission tracker

Step MP-41.6 — Archive submission evidence (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-18.6 — Close budget period (Finance Manager)

Type:

Decision: Approved with conditions

Budget period: Budget period

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2027-07-24

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: Archive file, decision and claims; retention 10 years.

When every step is complete, click Complete in the task panel.

E2E-16 — Vendor-to-Finance

Goal: Manage vendors from selection to payment

Starts when: Training need requiring an external provider. **Ends with:** Vendor selected, order issued and payment approved against attendance.

Task UFT-16-01 — Issue request for proposal · done by Purchasing Officer

Input: Training need → **Output:** RFP

Step MP-15.1 — Issue request for proposal (Purchasing Officer)

Type:

Row 1 — Request for proposal: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-10-01

Row 2 — Request for proposal: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-10-08

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: RFP 'Training on BIM modelling and ISO 19650 workflows' sent to 4 vendors, answers due 15 May.

When every step is complete, click Complete in the task panel.

Task UFT-16-02 — Score vendor proposals · done by Purchasing Officer

Input: RFP → **Output:** Scored proposals

Step MP-15.2 — Score vendor proposals (Purchasing Officer)

Type:

Row 1 — Vendor proposals: BIM modelling and ISO 19650 workflows · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Vendor proposals: Digital site diary and field reporting · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Vendor proposals: Drone surveying and 3D site scans · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Scores: vendor A 82, vendor B 76, vendor C 64 (price 40%, expertise 40%, references 20%).

When every step is complete, click Complete in the task panel.

Task UFT-16-03 — Register and verify vendor · done by Purchasing Officer

Input: Scored proposals → **Output:** Accredited vendor

Step MP-15.3 — Register vendor record (Purchasing Officer)

Type:

Row 1 — Vendor record: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hajar Berrada · **Source:** Interview with the function head

Row 2 — Vendor record: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Rachid Squalli · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Vendor record register".

Step MP-15.4 — Verify vendor accreditation (Compliance Officer)

Type:

Vendor accreditation: Vendor accreditation

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-10-11

Then click Complete the step.

Result to record in the task: Register vendor A; accreditation OFPPT verified, valid until December.

When every step is complete, click Complete in the task panel.

Task UFT-16-04 — Issue purchase order · done by Purchasing Officer

Input: Accredited vendor → **Output:** Purchase order

Step MP-15.5 — Issue purchase order (Purchasing Officer)

Type:

Row 1 — Purchase order: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-10-07

Row 2 — Purchase order: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-10-14

Then click Complete the step. The rows go to the register "Communications log".

Step MP-18.3 — Record committed and actual costs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Purchase order PO-2026-044: 180,000 MAD on budget line 'BIM modelling and ISO 19650 workflows'.

When every step is complete, click Complete in the task panel.

Task UFT-16-05 — Match invoice to order and attendance · done by Training Administrator

Input: Purchase order → **Output:** Matched invoice

Step MP-15.6 — Match invoice to order and attendance (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-11.5 — Reconcile attendance with invoices (Training Administrator)

Type:

Attendance with invoices: Attendance with invoices

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-08-04

Then click Complete the step.

Result to record in the task: Invoice matched with PO and attendance (3 days × 12 learners): OK.

When every step is complete, click Complete in the task panel.

Task UFT-16-06 — Approve vendor payment · done by Finance Manager

Input: Matched invoice → **Output:** Vendor performance & spend report

Step MP-15.7 — Approve vendor payment (Finance Manager)

Type:

Decision: Approved

Vendor payment: Vendor payment

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-07-08

Decided by: Loubna Naciri

Then click Complete the step.

Step MP-18.4 — Compare spend against budget (Finance Manager)

Type:

Row 1 — Spend against budget: BIM modelling and ISO 19650 workflows · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Spend against budget: Digital site diary and field reporting · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Approve payment 180,000 MAD; vendor performance rating 4/5.

When every step is complete, click Complete in the task panel.

AEC-E2E-02 — AEC & Construction Critical-Skills-to-Transformation Plan

Goal: Turn critical-skill gaps and digital and AI use cases into a transformation plan.

Starts when: Annual plan cycle or technology change in AEC & Construction. **Ends with:** Transformation learning paths approved.

Task UFT-AEC-E2-01 — List critical Site Works & Project Delivery skills · done by L&D Analyst

Input: Sector obligations → **Output:** Record each critical skill with its level.

Step MP-02.1 — Define competency families and levels (L&D Analyst)

Type:

Row 1 — Competency families and levels: Raise BIM modelling and ISO 19650 workflows proficiency of Operator — Site Works & Project Delivery teams to level 3 · **Indicator:** KPI-002 (Skills inventory validation rate) · **Baseline:** 44 % · **Target:** 77 % · **Deadline:** 2027-01-28 · **Owner:** Loubna Naciri

Row 2 — Competency families and levels: Certify Supervisor — Site Works & Project Delivery staff on Digital site diary and field reporting · **Indicator:** KPI-003 (Critical gap rate) · **Baseline:** 47 % · **Target:** 88 % · **Deadline:** 2027-02-04 · **Owner:** Loubna Squalli

Row 3 — Competency families and levels: Cut onboarding time on Drone surveying and 3D site scans by 30 % · **Indicator:** KPI-004 (Training Engineering Report cycle time) · **Baseline:** 49 % · **Target:** 75 % · **Deadline:** 2027-02-11 · **Owner:** Kawtar Naciri

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-03.1 — Compute gap matrix (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Critical skills: 6 for Site Works & Project Delivery, each with target level 3.

When every step is complete, click Complete in the task panel.

Task UFT-AEC-E2-02 — List digital and AI use cases · done by L&D Strategist

Input: Sector obligations → **Output:** Record the use cases that change jobs.

Step MP-03.3 — Plan diagnostic interviews (L&D Analyst)

Type:

Row 1 — Diagnostic interviews: Diagnostic interviews — BIM modelling and ISO 19650 workflows · **Owner:** Loubna Squalli · **Start:** 2026-08-13 · **End:** 2026-09-12 · **Budget:** 77000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Diagnostic interviews: Diagnostic interviews — Digital site diary and field reporting · **Owner:** Kawtar Naciri · **Start:** 2026-08-20 · **End:** 2026-09-19 · **Budget:** 46000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Use cases: BIM modelling and ISO 19650 workflows; Digital site diary and field reporting; Drone surveying and 3D site scans.

When every step is complete, click Complete in the task panel.

Task UFT-AEC-E2-03 — Forecast impacted roles · done by Performance Analyst

Input: Sector obligations → **Output:** Review the AI forecast of impacted roles.

Step MP-03.5 — Cluster needs into training themes (L&D Analyst)

Type:

Row 1 — Needs into training themes: BIM modelling and ISO 19650 workflows · **Criterion:** Cost · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Needs into training themes: Digital site diary and field reporting · **Criterion:** Risk · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Needs into training themes: Drone surveying and 3D site scans · **Criterion:** Business impact · **Weight (%):** 20 · **Score (1–5):** 4 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-28.3 — Forecast skill gaps (Performance Analyst)

Type:

Row 1 — Skill gaps: KPI-004 (Training Engineering Report cycle time) · **Period:** 2026-Q1 · **Value:** 61 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Skill gaps: KPI-005 (Design approval lead time) · **Period:** 2026-Q2 · **Value:** 70 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Impacted roles: supervisors (high), operators (medium); accept the AI forecast.

When every step is complete, click Complete in the task panel.

Task UFT-AEC-E2-04 — Approve transformation paths · done by Instructional Designer

Input: Sector obligations → **Output:** Approve the learning paths per role.

Step MP-05.2 — Define learning path and modules (Instructional Designer)

Type:

Row 1 — Learning path and modules: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hajar Berrada · **Source:** Audit report

Row 2 — Learning path and modules: Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Rachid Squalli · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Learning path and modules register".

Step MP-05.7 — Approve design document (Head of L&D)

Type:

Decision: Approved with conditions

Design document: Design document

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2027-08-13

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: Approve 2 transformation paths: 'BIM modelling and ISO 19650 workflows for supervisors', 'Digital site diary and field reporting for operators'.

When every step is complete, click Complete in the task panel.

SME-E2E-02 — SME Funding-to-Refund

Goal: Secure funding and recover the refunds of the plan.

Starts when: Short plan approved. **Ends with:** Refund received and recorded.

Task UFT-SME2-01 — Select eligible themes · done by L&D Analyst

Input: Owner-manager input → **Output:** Keep the themes that funding rules accept.

Step SME-MP-02.1 — Select eligible themes (L&D Analyst)

Type:

Decision: Approved

Eligible themes: Eligible themes

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-06-07

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: Eligible themes: BIM modelling and ISO 19650 workflows and ISO 19650 (funding rules met).

When every step is complete, click Complete in the task panel.

Task UFT-SME2-02 — Build the funding file · done by Finance Manager

Input: Owner-manager input → **Output:** Assemble the file for the funding body.

Step SME-MP-02.2 — Build funding file (Finance Manager)

Type:

Row 1 — Funding file: Funding file — BIM modelling and ISO 19650 workflows · **Owner:** Hajar Berrada · **Start:** 2027-06-09 · **End:** 2027-07-09 · **Budget:** 31000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Funding file: Funding file — Digital site diary and field reporting · **Owner:** Rachid Squalli · **Start:** 2027-06-16 · **End:** 2027-07-16 · **Budget:** 20000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-41.2 — Generate submission file (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Funding file: plan, quotes, provider accreditation, attendance model.

When every step is complete, click Complete in the task panel.

Task UFT-SME2-03 — Submit the refund claim · done by Finance Manager

Input: Owner-manager input → **Output:** Submit the claim after delivery.

Step SME-MP-02.3 — Submit refund claim (Finance Manager)

Type:

Row 1 — Refund claim: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-06-06

Row 2 — Refund claim: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-06-13

Then click Complete the step. The rows go to the register "Communications log".

Step MP-18.5 — Submit refund claims (Finance Manager)

Type:

Row 1 — Refund claims: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-06-06

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Refund claim submitted: 28,000 MAD with signed attendance sheets.

When every step is complete, click Complete in the task panel.

Task UFT-SME2-04 — Record the refund · done by Finance Manager

Input: Owner-manager input → **Output:** Record the refund and close the file.

Step SME-MP-02.4 — Track refund payment (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Refund received: 28,000 MAD on 20 November; file closed.

When every step is complete, click Complete in the task panel.

Gate G3 — G3 — Report & roadmap approved: close the phase

2. Open the project workspace and click the gate button of the phase.

2. Tick each checklist item once its evidence is attached, then click Submit for decision.
2. Click Go. Type the justification: All mandatory items met; evidence attached.
2. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

Phase 4 — Design & delivery

E2E-04 — Roadmap-to-Curriculum Design

Goal: Convert roadmap into curriculum maps, learning paths, design documents

Starts when: Approved Training Engineering Report and roadmap published. **Ends with:** Approved curriculum maps, learning paths and design documents.

Task UFT-04-01 — Create curriculum map · done by Instructional Designer

Input: Approved roadmap → **Output:** Curriculum map

Step MP-05.1 — Create curriculum map from roadmap (Instructional Designer)

Type:

Row 1 — Curriculum map from roadmap: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Kawtar Naciri · **Source:** Audit report

Row 2 — Curriculum map from roadmap: Digital site diary and field reporting · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Sara Rami · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Curriculum map from roadmap register".

Result to record in the task: Curriculum map 'BIM modelling and ISO 19650 workflows': 3 learning paths (operators, supervisors, managers), 9 modules.

When every step is complete, click Complete in the task panel.

Task UFT-04-02 — Define learning paths and modules · done by Instructional Designer

Input: Curriculum map → **Output:** Learning paths

Step MP-05.2 — Define learning path and modules (Instructional Designer)

Type:

Row 1 — Learning path and modules: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Sara Rami · **Source:** HRIS export

Row 2 — Learning path and modules: Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Imane Tazi · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Learning path and modules register".

Result to record in the task: Path 'Supervisors — BIM modelling and ISO 19650 workflows': 4 modules, 3 days blended (1 day e-learning, 2 days workshop).

When every step is complete, click Complete in the task panel.

Task UFT-04-03 — Write learning objectives · done by Instructional Designer

Input: Learning paths → **Output:** Learning objectives

Step MP-05.3 — Write learning objectives per module (Instructional Designer)

Type:

Row 1 — Learning objectives per module: Raise BIM modelling and ISO 19650 workflows proficiency of Operator — Site Works & Project Delivery teams to level 3 · **Indicator:** KPI-002 (Skills inventory validation rate) · **Baseline:** 31 % · **Target:** 80 % · **Deadline:** 2028-01-23 · **Owner:** Imane Tazi

Row 2 — Learning objectives per module: Certify Supervisor — Site Works & Project Delivery staff on Digital site diary and field reporting · **Indicator:** KPI-003 (Critical gap rate) · **Baseline:** 34 % · **Target:** 70 % · **Deadline:** 2028-01-30 · **Owner:** Hind Lahlou

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Objective M1: 'By the end, the supervisor reads the BIM modelling and ISO 19650 workflows dashboard and decides the shift action in 5 minutes.'

When every step is complete, click Complete in the task panel.

Task UFT-04-04 — Propose module structure · done by Instructional Designer

Input: Learning objectives → **Output:** Module structure

Step MP-05.4 — Propose module structure (Instructional Designer)

Type:

Row 1 — Module structure: Module structure — BIM modelling and ISO 19650 workflows · **Owner:** Hind Lahlou · **Start:** 2027-08-08 · **End:** 2027-09-07 · **Budget:** 26000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Module structure: Module structure — Digital site diary and field reporting · **Owner:** Youssef Tazi · **Start:** 2027-08-15 · **End:** 2027-09-14 · **Budget:** 76000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Accept the proposed structure (intro, demo, practice, quiz); replace the quiz by a live case from Site Works & Project Delivery.

When every step is complete, click Complete in the task panel.

Task UFT-04-05 — Set assessment strategy · done by Instructional Designer

Input: Module structure → **Output:** Assessment strategy

Step MP-05.5 — Set assessment strategy (Instructional Designer)

Type:

Row 1 — Assessment strategy: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Assessment strategy: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Assessment: pre/post test (Level 2) and manager observation after 30 days (Level 3).

When every step is complete, click Complete in the task panel.

Task UFT-04-06 — Develop and tag content · done by Content Developer

Input: Assessment strategy → **Output:** Tagged content assets

Step MP-06.1 — Upload content assets (Content Developer)

Type:

Row 1 — Content assets: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Content assets: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Step MP-06.2 — Validate package format (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-06.5 — Tag content with competencies (Content Developer)

Type:

Row 1 — Content with competencies: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Salma Ouazzani · **Source:** Audit report

Row 2 — Content with competencies: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Hajar Berrada · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Content with competencies register".

Result to record in the task: Upload 'M1_BIM modelling and ISO 19650 workflows.pptx' and 'M1_video.mp4'; tag competency 'BIM modelling and ISO 19650 workflows' level 3.

When every step is complete, click Complete in the task panel.

Task UFT-04-07 — Localize and check accessibility · done by Instructional Designer

Input: Tagged content assets → **Output:** Localized accessible content

Step MP-23.1 — Request translation (Instructional Designer)

Type:

Row 1 — Translation: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-08-09

Row 2 — Translation: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-08-16

Then click Complete the step. The rows go to the register "Communications log".

Step MP-23.2 — Draft machine translation (Instructional Designer)

Type:

Row 1 — Machine translation: Machine translation — BIM modelling and ISO 19650 workflows · **Owner:** Hajar Berrada · **Start:** 2027-08-14 · **End:** 2027-09-13 · **Budget:** 58000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Machine translation: Machine translation — Digital site diary and field reporting · **Owner:** Rachid Squalli · **Start:** 2027-08-21 · **End:** 2027-09-20 · **Budget:** 65000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-23.3 — Validate translation (Subject Matter Expert)

Type:

Decision: Approved

Translation: Translation

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-08-07

Decided by: Loubna Naciri

Then click Complete the step.

Step MP-23.4 — Run accessibility check (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-23.5 — Fix accessibility issues (Content Developer)

Type:

Accessibility issues: Accessibility issues

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-08-08

Then click Complete the step.

Result to record in the task: Request FR and AR versions; validate the AI draft translation; accessibility check: 0 blocking issues.

When every step is complete, click Complete in the task panel.

Task UFT-04-08 — Approve design document · done by Head of L&D

Input: Localized accessible content → **Output:** Approved design document

Step MP-05.6 — Review design with subject matter expert (Subject Matter Expert)

Type:

Design with subject matter expert: Design with subject matter expert

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-08-17

Then click Complete the step.

Step MP-05.7 — Approve design document (Head of L&D)

Type:

Decision: Approved

Design document: Design document

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-08-16

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: Decision: design approved. Comment: SME review done on 12 May; ready for delivery.

When every step is complete, click Complete in the task panel.

E2E-05 — Design-to-Delivery

Goal: Deliver training across all modalities

Starts when: Approved design document and prioritized training plan. **Ends with:** Training delivered across all modalities with attendance and completion recorded.

Task UFT-05-01 — Publish content to catalog · done by Content Developer

Input: Approved design → **Output:** Published catalog

Step MP-06.3 — Route content for expert review (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-06.4 — Record review decision (Subject Matter Expert)

Type:

Row 1 — Review decision: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Adil Tazi · **Source:** Questionnaire results

Row 2 — Review decision: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Loubna Naciri · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Review decision register".

Step MP-06.6 — Publish content to catalog (Content Developer)

Type:

Row 1 — Content to catalog: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-08-13

Row 2 — Content to catalog: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-08-20

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish module 'M1 BIM modelling and ISO 19650 workflows' to the catalog; audience: supervisors; languages EN/FR/AR.

When every step is complete, click Complete in the task panel.

Task UFT-05-02 — Book logistics · done by Training Administrator

Input: Published catalog → **Output:** Logistics plan

Step MP-11.1 — Book rooms and equipment (Training Administrator)

Type:

Row 1 — Rooms and equipment: Rooms and equipment — BIM modelling and ISO 19650 workflows · **Owner:** Loubna Naciri · **Start:** 2027-08-20 · **End:** 2027-09-19 · **Budget:** 60000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Rooms and equipment: Rooms and equipment — Digital site diary and field reporting · **Owner:** Loubna Squalli · **Start:** 2027-08-27 · **End:** 2027-09-26 · **Budget:** 50000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-11.2 — Manage trainer calendars (Training Administrator)

Type:

Row 1 — Trainer calendars: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Loubna Naciri · **Source:** Annual performance review

Row 2 — Trainer calendars: Digital site diary and field reporting · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Loubna Squalli · **Source:** Audit report

Then click Complete the step. The rows go to the register "Trainer calendars register".

Result to record in the task: Room 'Training A' (20 seats) 3-5 June; projector; trainer calendar blocked.

When every step is complete, click Complete in the task panel.

Task UFT-05-03 — Schedule sessions · done by Training Administrator

Input: Logistics plan → **Output:** Session schedule

Step MP-07.1 — Create training session (Training Administrator)

Type:

Row 1 — Training session: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Loubna Squalli · **Source:** Audit report

Row 2 — Training session: Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Kawtar Naciri · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Training session register".

Step MP-07.2 — Check scheduling conflicts (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Session S-01 'BIM modelling and ISO 19650 workflows — supervisors', 3-5 June, 12 seats, no conflict reported.

When every step is complete, click Complete in the task panel.

Task UFT-05-04 — Enroll learners and send convocations · done by Training Administrator

Input: Session schedule → **Output:** Enrollments

Step MP-07.3 — Enroll learners into session (Training Administrator)

Type:

Row 1 — Learners into session: BIM modelling and ISO 19650 workflows — half-day workshop · **Date:** 2027-09-03 · **Trainer:** Atlas Formation Conseil · **Participants:** 19 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Learners into session: Digital site diary and field reporting — half-day workshop · **Date:** 2027-09-10 · **Trainer:** Maghreb Learning Partners · **Participants:** 10 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-07.4 — Send convocations (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-17.1 — Provision users via SSO (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Enroll 12 supervisors; convocations sent by e-mail and SMS in each learner's language.

When every step is complete, click Complete in the task panel.

Task UFT-05-05 — Push microlearning capsules · done by Instructional Designer

Input: Enrollments → **Output:** Capsules in flow of work

Step MP-25.1 — Author microlearning capsule (Instructional Designer)

Type:

Row 1 — Microlearning capsule: Microlearning capsule — BIM modelling and ISO 19650 workflows · **Owner:** Sara Rami · **Start:** 2027-08-26 · **End:** 2027-09-25 · **Budget:** 74000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Microlearning capsule: Microlearning capsule — Digital site diary and field reporting · **Owner:** Imane Tazi · **Start:** 2027-09-02 · **End:** 2027-10-02 · **Budget:** 41000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-25.2 — Generate capsule draft from source (Instructional Designer)

Type:

Row 1 — Capsule draft from source: Capsule draft from source — BIM modelling and ISO 19650 workflows · **Owner:** Sara Rami · **Start:** 2027-08-26 · **End:** 2027-09-25 · **Budget:** 36000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Capsule draft from source: Capsule draft from source — Digital site diary and field reporting · **Owner:** Imane Tazi · **Start:** 2027-09-02 · **End:** 2027-10-02 · **Budget:** 67000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-25.3 — Push capsule to collaboration channel (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-25.4 — Consume capsule on mobile (Learner)

Type:

Row 1 — Capsule on mobile: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Sara Rami · **Source:** Interview with the function head

Row 2 — Capsule on mobile: Digital site diary and field reporting · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Imane Tazi · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Capsule on mobile register".

Step MP-25.5 — Track capsule completion (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Capsule '5-minute Digital site diary and field reporting check' pushed to the Teams channel of Site Works & Project Delivery; 48 views in week 1.

When every step is complete, click Complete in the task panel.

Task UFT-05-06 — Run immersive simulations · done by Trainer

Input: Enrollments → **Output:** Simulation results

Step MP-30.1 — Define simulation scenario (Instructional Designer)

Type:

Row 1 — Simulation scenario: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Imane Tazi · **Source:** Questionnaire results

Row 2 — Simulation scenario: Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hind Lahlou · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Simulation scenario register".

Step MP-30.2 — Configure simulation scoring (Instructional Designer)

Type:

Row 1 — Simulation scoring: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Simulation scoring: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Step MP-30.3 — Launch simulation session (Trainer)

Type:

Row 1 — Simulation session: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-08-23

Row 2 — Simulation session: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-08-30

Then click Complete the step. The rows go to the register "Communications log".

Step MP-30.4 — Capture simulation performance (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-30.5 — Debrief learner (Trainer)

Type:

Row 1 — Learner: BIM modelling and ISO 19650 workflows — half-day workshop · **Date:** 2027-09-07 · **Trainer:** Atlas Formation Conseil · **Participants:** 19 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Learner: Digital site diary and field reporting — half-day workshop · **Date:** 2027-09-14 · **Trainer:** Maghreb Learning Partners · **Participants:** 17 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-30.6 — Record simulation evidence (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Simulation 'Site Works & Project Delivery incident': score 78/100; debrief notes recorded; evidence saved.

When every step is complete, click Complete in the task panel.

Task UFT-05-07 — Record attendance · done by Trainer

Input: Session schedule → **Output:** Attendance records

Step MP-07.5 — Record attendance (Trainer)

Type:

Row 1 — Attendance: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hind Lahlou · **Source:** Annual performance review

Row 2 — Attendance: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Youssef Tazi · **Source:** Audit report

Then click Complete the step. The rows go to the register "Attendance register".

Result to record in the task: Attendance S-01: 11 present, 1 absent (justified). Signature sheet attached.

When every step is complete, click Complete in the task panel.

Task UFT-05-08 — Close sessions · done by Training Administrator

Input: Attendance records → **Output:** Completion records

Step MP-07.6 — Close session and record completion (Training Administrator)

Type:

Decision: Approved with conditions

Session and record completion: Session and record completion

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2027-09-22

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: Close S-01: 11 completions recorded; certificate issued to each participant.

When every step is complete, click Complete in the task panel.

Task UFT-05-09 — Reconcile and archive period · done by Training Administrator

Input: Completion records → **Output:** Closed delivery period

Step MP-11.5 — Reconcile attendance with invoices (Training Administrator)

Type:

Attendance with invoices: Attendance with invoices

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-08-28

Then click Complete the step.

Step MP-11.6 — Archive period records (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-11.3 — Import external training records (Training Administrator)

Type:

Row 1 — External training records: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — External training records: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Step MP-11.4 — Correct training record with justification (Training Administrator)

Type:

Training record with justification: Training record with justification

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-08-28

Then click Complete the step.

Result to record in the task: Reconcile invoice INV-2026-118 (3 days × 12 learners) with attendance; archive period Q2.

When every step is complete, click Complete in the task panel.

E2E-06 — Learner-Journey-to-Engagement

Goal: Deliver personalized, engaging learning experience

Starts when: Learner enrolled in a learning path or session. **Ends with:** Personalized learning journey completed with engagement measured.

Task UFT-06-01 — Generate personal learning plan · done by L&D Analyst

Input: Enrollments → **Output:** Personal learning plans

Step MP-08.1 — Generate personal learning plan (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Personal plan generated for each learner: 3 items on BIM modelling and ISO 19650 workflows, 1 capsule on Digital site diary and field reporting.

When every step is complete, click Complete in the task panel.

Task UFT-06-02 — Recommend learning items · done by Learner

Input: Personal learning plans → **Output:** Recommendations

Step MP-08.2 — Recommend learning items (Learner)

Type:

Row 1 — Learning items: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Rachid Squalli · **Source:** Questionnaire results

Row 2 — Learning items: Digital site diary and field reporting · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Adil Tazi · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Learning items register".

Step MP-24.1 — Enable personalization per scope (Platform Administrator)

Type:

Row 1 — Personalization per scope: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Personalization per scope: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Accept 2 recommendations, reject 1 ('already mastered'). The outcome is logged.

When every step is complete, click Complete in the task panel.

Task UFT-06-03 — Adapt path to performance · done by Instructional Designer

Input: Recommendations → **Output:** Adapted paths

Step MP-24.2 — Set adaptation rules (Instructional Designer)

Type:

Row 1 — Adaptation rules: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Adaptation rules: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Step MP-24.3 — Adapt path to learner performance (Learner)

Type:

Row 1 — Path to learner performance: Path to learner performance — BIM modelling and ISO 19650 workflows · **Owner:** Adil Tazi · **Start:** 2027-09-09 · **End:** 2027-10-09 · **Budget:** 32000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Path to learner performance: Path to learner performance — Digital site diary and field reporting · **Owner:** Loubna Naciri · **Start:** 2027-09-16 · **End:** 2027-10-16 · **Budget:** 59000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-24.4 — Record learner response to adaptation (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Rule: if the quiz score < 60%, add the remedial capsule 'BIM modelling and ISO 19650 workflows basics'.

When every step is complete, click Complete in the task panel.

Task UFT-06-04 — Animate social learning · done by Knowledge Manager

Input: Adapted paths → **Output:** Active cohorts

Step MP-26.1 — Create learning cohort group (Knowledge Manager)

Type:

Row 1 — Learning cohort group: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Loubna Naciri · **Source:** Audit report

Row 2 — Learning cohort group: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Loubna Squalli · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Learning cohort group register".

Step MP-26.2 — Invite group members (Knowledge Manager)

Type:

Row 1 — Group members: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-09-06

Row 2 — Group members: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-09-13

Then click Complete the step. The rows go to the register "Communications log".

Step MP-26.3 — Post question or answer (Learner)

Type:

Row 1 — Question or answer: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-09-06

Row 2 — Question or answer: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-09-13

Then click Complete the step. The rows go to the register "Communications log".

Step MP-26.4 — Endorse expert answer (Subject Matter Expert)

Type:

Decision: Approved with conditions

Expert answer: Expert answer

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2027-10-02

Decided by: Loubna Naciri

Then click Complete the step.

Step MP-26.5 — Flag inappropriate content (Learner)

Type:

Row 1 — Inappropriate content: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Loubna Naciri · **Source:** Audit report

Row 2 — Inappropriate content: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Loubna Squalli · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Inappropriate content register".

Step MP-26.6 — Resolve moderation flag (Knowledge Manager)

Type:

Moderation flag: Moderation flag

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-10-03

Then click Complete the step.

Result to record in the task: Create cohort 'BIM modelling and ISO 19650 workflows supervisors 2026' and invite 12 members; first question posted.

When every step is complete, click Complete in the task panel.

Task UFT-06-05 — Run gamification · done by Instructional Designer

Input: Active cohorts → **Output:** Awards

Step MP-27.1 — Define points and badge rules (Instructional Designer)

Type:

Row 1 — Points and badge rules: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Loubna Squalli · **Source:** HRIS export

Row 2 — Points and badge rules: Digital site diary and field reporting · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Kawtar Naciri · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Points and badge rules register".

Step MP-27.2 — Configure leaderboard scope (Instructional Designer)

Type:

Row 1 — Leaderboard scope: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Leaderboard scope: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Step MP-27.3 — Award points on completion (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-27.4 — Unlock badge (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-27.6 — Adjust gamification rules (Instructional Designer)

Type:

Gamification rules: Gamification rules

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-09-07

Then click Complete the step.

Result to record in the task: Badge 'BIM modelling and ISO 19650 workflows Practitioner' for completing 3 modules; 10 points per capsule.

When every step is complete, click Complete in the task panel.

Task UFT-06-06 — Match and run coaching · done by L&D Business Partner

Input: Learner requests → **Output:** Coaching sessions

Step MP-21.1 — Request coaching (Learner)

Type:

Row 1 — Coaching: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-09-10

Row 2 — Coaching: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-09-17

Then click Complete the step. The rows go to the register "Communications log".

Step MP-21.2 — Match coach to learner (L&D Business Partner)

Type:

Row 1 — Coach to learner: BIM modelling and ISO 19650 workflows · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Coach to learner: Digital site diary and field reporting · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-21.3 — Schedule coaching sessions (Coach)

Type:

Row 1 — Coaching sessions: Coaching sessions — BIM modelling and ISO 19650 workflows · **Owner:** Kawtar Naciri · **Start:** 2027-09-15 · **End:** 2027-10-15 · **Budget:** 55000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Coaching sessions: Coaching sessions — Digital site diary and field reporting · **Owner:** Sara Rami · **Start:** 2027-09-22 · **End:** 2027-10-22 · **Budget:** 52000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-21.4 — Log coaching session notes (Coach)

Type:

Row 1 — Coaching session notes: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Kawtar Naciri · **Source:** Interview with the function head

Row 2 — Coaching session notes: Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Sara Rami · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Coaching session notes register".

Step MP-21.5 — Evaluate coaching outcomes (Manager)

Type:

Row 1 — Coaching outcomes: BIM modelling and ISO 19650 workflows · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Coaching outcomes: Digital site diary and field reporting · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-21.6 — Close coaching engagement (Coach)

Type:

Decision: Approved

Coaching engagement: Coaching engagement

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-09-15

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: Match coach 'Senior Site Works & Project Delivery supervisor' to 3 learners; 4 sessions of 1 hour.

When every step is complete, click Complete in the task panel.

Task UFT-06-07 — Collect learner feedback · done by Learner

Input: Coaching sessions → **Output:** Learner feedback

Step MP-08.3 — Enroll in recommended item (Learner)

Type:

Row 1 — In recommended item: BIM modelling and ISO 19650 workflows — half-day workshop · **Date:** 2027-09-27 · **Trainer:** Atlas Formation Conseil · **Participants:** 17 · **Hours:** 3.5 · **Modality:** On site

Row 2 — In recommended item: Digital site diary and field reporting — half-day workshop · **Date:** 2027-10-04 · **Trainer:** Maghreb Learning Partners · **Participants:** 15 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-08.4 — Submit learning feedback (Learner)

Type:

Row 1 — Learning feedback: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-09-12

Row 2 — Learning feedback: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-09-19

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Feedback: 4.4/5; comment 'more real cases from Site Works & Project Delivery'.

When every step is complete, click Complete in the task panel.

Task UFT-06-08 — Monitor engagement and nudge · done by L&D Analyst

Input: Learner feedback → **Output:** Engagement report

Step MP-08.5 — Monitor engagement indicators (L&D Analyst)

Type:

Row 1 — Engagement indicators: KPI-004 (Training Engineering Report cycle time) · **Period:** 2026-Q3 · **Value:** 71 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Engagement indicators: KPI-005 (Design approval lead time) · **Period:** 2026-Q1 · **Value:** 70 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-08.6 — Trigger re-engagement nudge (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-24.5 — Review recommendation acceptance (L&D Analyst)

Type:

Recommendation acceptance: Recommendation acceptance

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-10-04

Then click Complete the step.

Step MP-27.5 — Review engagement uplift (L&D Analyst)

Type:

Engagement uplift: Engagement uplift

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-10-04

Then click Complete the step.

Step MP-24.6 — Tune personalization settings (L&D Analyst)

Type:

Row 1 — Personalization settings: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Personalization settings: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Step MP-28.4 — Predict learner drop-out risk (Performance Analyst)

Type:

Row 1 — Learner drop-out risk: KPI-004 (Training Engineering Report cycle time) · **Period:** 2026-Q3 · **Value:** 57 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Learner drop-out risk: KPI-005 (Design approval lead time) · **Period:** 2026-Q1 · **Value:** 65 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-28.5 — Review predictions with L&D (Head of L&D)

Type:

Predictions with L&D: Predictions with L&D

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-10-04

Then click Complete the step.

Step MP-28.6 — Create preventive action (L&D Analyst)

Type:

Row 1 — Preventive action: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Imane Tazi · **Source:** Annual performance review

Row 2 — Preventive action: Digital site diary and field reporting · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hind Lahlou · **Source:** Audit report

Then click Complete the step. The rows go to the register "Preventive action register".

Result to record in the task: Engagement 81%; nudge sent to 9 inactive learners; drop-out risk high for 2 learners.

When every step is complete, click Complete in the task panel.

E2E-13 — Content-Curate-to-Retire

Goal: Publish, maintain, retire content

Starts when: New content published or content past its review date. **Ends with:** Catalog curated, maintained and outdated content retired.

Task UFT-13-01 — Aggregate provider catalogs · done by Content Curator

Input: Provider catalogs → **Output:** Aggregated catalog

Step MP-29.1 — Aggregate provider catalogs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Aggregate 2 provider catalogs (LinkedIn Learning, Coursera): 1,240 items imported.

When every step is complete, click Complete in the task panel.

Task UFT-13-02 — Recommend curated items · done by Content Curator

Input: Aggregated catalog → **Output:** Ranked items

Step MP-29.2 — Recommend curated items (Content Curator)

Type:

Row 1 — Curated items: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Youssef Tazi · **Source:** HRIS export

Row 2 — Curated items: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Salma Ouazzani · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Curated items register".

Result to record in the task: Keep the 15 top-ranked items on BIM modelling and ISO 19650 workflows; reject 3 items older than 3 years.

When every step is complete, click Complete in the task panel.

Task UFT-13-03 — Approve and organize collections · done by Content Curator

Input: Ranked items → **Output:** Curated collections

Step MP-29.3 — Approve curated item (Content Curator)

Type:

Decision: Approved

Curated item: Curated item

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-09-25

Decided by: Loubna Naciri

Then click Complete the step.

Step MP-29.4 — Organize curated collection (Content Curator)

Type:

Row 1 — Curated collection: Curated collection — BIM modelling and ISO 19650 workflows · **Owner:** Salma Ouazzani · **Start:** 2027-09-25 · **End:** 2027-10-25 · **Budget:** 39000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Curated collection: Curated collection — Digital site diary and field reporting · **Owner:** Hajar Berrada · **Start:** 2027-10-02 · **End:** 2027-11-01 · **Budget:** 47000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Collection 'BIM modelling and ISO 19650 workflows starter kit': 8 items, audience supervisors, review date in 12 months.

When every step is complete, click Complete in the task panel.

Task UFT-13-04 — Review peer content · done by Subject Matter Expert

Input: User submissions → **Output:** Approved peer content

Step MP-33.1 — Submit user-generated content (Employee)

Type:

Row 1 — User-generated content: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-09-22

Row 2 — User-generated content: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-09-29

Then click Complete the step. The rows go to the register "Communications log".

Step MP-33.2 — Check content against policy (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-33.3 — Peer review content (Subject Matter Expert)

Type:

Row 1 — Review content: BIM modelling and ISO 19650 workflows — half-day workshop · **Date:** 2027-10-07 · **Trainer:** Atlas Formation Conseil · **Participants:** 18 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Review content: Digital site diary and field reporting — half-day workshop · **Date:** 2027-10-14 · **Trainer:** Maghreb Learning Partners · **Participants:** 16 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Peer video 'How we use Digital site diary and field reporting on shift' reviewed by an expert: approved with 1 correction.

When every step is complete, click Complete in the task panel.

Task UFT-13-05 — Promote and rate content · done by Knowledge Manager

Input: Approved peer content → **Output:** Rated content

Step MP-33.5 — Send approved content to curation (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-33.6 — Rate user-generated item (Learner)

Type:

Row 1 — User-generated item: BIM modelling and ISO 19650 workflows · **Criterion:** Cost · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — User-generated item: Digital site diary and field reporting · **Criterion:** Risk · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Send approved peer content to curation; average learner rating 4.5/5.

When every step is complete, click Complete in the task panel.

Task UFT-13-06 — Flag content past review date · done by Content Curator

Input: Rated content → **Output:** Review queue

Step MP-29.5 — Flag content past review date (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: 14 items past review date flagged; owners notified.

When every step is complete, click Complete in the task panel.

Task UFT-13-07 — Retire outdated content · done by Content Curator

Input: Review queue → **Output:** Content library health report

Step MP-29.6 — Retire outdated content (Content Curator)

Type:

Row 1 — Outdated content: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Outdated content: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Step MP-25.6 — Retire low-value capsule (Content Curator)

Type:

Row 1 — Low-value capsule: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Low-value capsule: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Retire 6 outdated items and 2 low-value capsules; library health 92%.

When every step is complete, click Complete in the task panel.

E2E-14 — Extended-Enterprise-Training

Goal: Certify partners and train customers

Starts when: Partner, reseller or customer training program launched. **Ends with:** External learners trained, paid and certified.

Task UFT-14-01 — Create external sub-portal · done by Extended Enterprise Manager

Input: Program brief → **Output:** External portal

Step MP-22.1 — Create external sub-portal (Extended Enterprise Manager)

Type:

Row 1 — External sub-portal: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Loubna Squalli · **Source:** Interview with the function head

Row 2 — External sub-portal: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Kawtar Naciri · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "External sub-portal register".

Result to record in the task: Sub-portal 'Partners Academy — Souss BTP Solutions' created for distributors and installers.

When every step is complete, click Complete in the task panel.

Task UFT-14-02 — Configure catalog and pricing · done by Extended Enterprise Manager

Input: External portal → **Output:** Priced catalog

Step MP-22.2 — Configure external catalog and pricing (Extended Enterprise Manager)

Type:

Row 1 — External catalog and pricing: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — External catalog and pricing: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Step MP-18.1 — Allocate budget by theme and site (Finance Manager)

Type:

Row 1 — Budget by theme and site: Budget by theme and site — BIM modelling and ISO 19650 workflows · **Owner:** Kawtar Naciri · **Start:** 2027-10-07 · **End:** 2027-11-06 · **Budget:** 41000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Budget by theme and site: Budget by theme and site — Digital site diary and field reporting · **Owner:** Sara Rami · **Start:** 2027-10-14 · **End:** 2027-11-13 · **Budget:** 32000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Catalog: 'ISO 19650 for partners' 1,200 MAD; 'BIM modelling and ISO 19650 workflows certification' 2,400 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-14-03 — Process payment and enroll · done by Extended Enterprise Manager

Input: Priced catalog → **Output:** External enrollments

Step MP-22.3 — Process online payment (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-22.4 — Enroll external learner (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: 18 online payments processed; 18 external learners enrolled.

When every step is complete, click Complete in the task panel.

Task UFT-14-04 — Deliver external sessions · done by Training Administrator

Input: External enrollments → **Output:** Attendance

Step MP-07.1 — Create training session (Training Administrator)

Type:

Row 1 — Training session: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Imane Tazi · **Source:** Audit report

Row 2 — Training session: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Hind Lahlou · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Training session register".

Step MP-07.5 — Record attendance (Trainer)

Type:

Row 1 — Attendance: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Imane Tazi · **Source:** Audit report

Row 2 — Attendance: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Hind Lahlou · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Attendance register".

Result to record in the task: Session P-01 (virtual), 18 invited, 16 present.

When every step is complete, click Complete in the task panel.

Task UFT-14-05 — Track external completion · done by Extended Enterprise Manager

Input: Attendance → **Output:** Completion status

Step MP-22.5 — Track external completion (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Completion: 15 of 16 passed the final quiz.

When every step is complete, click Complete in the task panel.

Task UFT-14-06 — Issue partner certification · done by Extended Enterprise Manager

Input: Completion status → **Output:** Partner certificates

Step MP-22.6 — Issue partner certification (Extended Enterprise Manager)

Type:

Row 1 — Partner certification: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-10-10

Row 2 — Partner certification: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-10-17

Then click Complete the step. The rows go to the register "Communications log".

Step MP-14.4 — Issue certificate on completion (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Issue 15 partner certificates valid 2 years.

When every step is complete, click Complete in the task panel.

Task UFT-14-07 — Reconcile external revenue · done by Finance Manager

Input: Partner certificates → **Output:** Revenue reconciliation

Step MP-18.3 — Record committed and actual costs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-18.4 — Compare spend against budget (Finance Manager)

Type:

Row 1 — Spend against budget: BIM modelling and ISO 19650 workflows · **Criterion:** Feasibility · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Spend against budget: Digital site diary and field reporting · **Criterion:** Cost · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Revenue 43,200 MAD reconciled with the ERP; 0 unpaid.

When every step is complete, click Complete in the task panel.

SME-E2E-03 — SME Upskill-to-Adoption

Goal: Make sure new digital and AI skills are used at work.

Starts when: Funded plan launched. **Ends with:** Adoption confirmed and owner-manager coached.

Task UFT-SME3-01 — Assign microlearning capsules · done by Training Administrator

Input: Owner-manager input → **Output:** Assign short capsules per employee.

Step SME-MP-03.1 — Assign microlearning capsules (Training Administrator)

Type:

Row 1 — Role: Compliance Officer / DPO · **Microlearning capsules:** BIM modelling and ISO 19650 workflows · **Person:** Hajar Berrada · **Allocation (%):** 100 · **Start:** 2027-10-09 · **Holder type:** Holder

Row 2 — Role: Consultant (PM / Partner) · **Microlearning capsules:** Digital site diary and field reporting · **Person:** Rachid Squalli · **Allocation (%):** 50 · **Start:** 2027-10-16 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Step MP-25.3 — Push capsule to collaboration channel (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Assign 4 capsules 'BIM modelling and ISO 19650 workflows in 10 minutes' to each employee.

When every step is complete, click Complete in the task panel.

Task UFT-SME3-02 — Coach on the job · done by Trainer

Input: Owner-manager input → **Output:** Coach employees while they use the tools.

Step SME-MP-03.2 — Coach employees on the job (Trainer)

Type:

Row 1 — Employees on the job: BIM modelling and ISO 19650 workflows — half-day workshop · **Date:** 2027-10-31 · **Trainer:** Atlas Formation Conseil · **Participants:** 18 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Employees on the job: Digital site diary and field reporting — half-day workshop · **Date:** 2027-11-07 · **Trainer:** Maghreb Learning Partners · **Participants:** 16 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: On-the-job coaching: 2 hours per team leader per week for 4 weeks.

When every step is complete, click Complete in the task panel.

Task UFT-SME3-03 — Measure adoption · done by L&D Analyst

Input: Owner-manager input → **Output:** Check tool usage per employee.

Step SME-MP-03.3 — Measure tool usage (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Adoption: 9 of 12 employees use the new tool every day.

When every step is complete, click Complete in the task panel.

Task UFT-SME3-04 — Coach the owner-manager · done by Consultant PM

Input: Owner-manager input → **Output:** Hold the monthly coaching and update the dashboard.

Step SME-MP-04.1 — Hold monthly coaching session (Consultant PM)

Type:

Row 1 — Monthly coaching session: BIM modelling and ISO 19650 workflows — half-day workshop · **Date:** 2027-11-04 · **Trainer:** Atlas Formation Conseil · **Participants:** 16 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Monthly coaching session: Digital site diary and field reporting — half-day workshop · **Date:** 2027-11-11 · **Trainer:** Maghreb Learning Partners · **Participants:** 13 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step SME-MP-04.2 — Update skills dashboard (Head of L&D)

Type:

Skills dashboard: Skills dashboard

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-10-26

Then click Complete the step.

Result to record in the task: Monthly coaching with the owner-manager; skills dashboard updated.

When every step is complete, click Complete in the task panel.

Gate G4 — G4 — Delivery readiness: close the phase

2. Open the project workspace and click the gate button of the phase.
2. Tick each checklist item once its evidence is attached, then click Submit for decision.
2. Click Go. Type the justification: All mandatory items met; evidence attached.
2. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

Phase 5 — Evaluation, compliance & impact

E2E-07 — Assessment-to-Evaluation

Goal: Measure training effectiveness and skill progression

Starts when: Training session or path completed. **Ends with:** Effectiveness measured on Kirkpatrick levels 1-3 and skill progression computed.

Task UFT-07-01 — Create assessment instrument · done by Instructional Designer

Input: Assessment strategy → **Output:** Assessment instrument

Step MP-09.1 — Create assessment instrument (Instructional Designer)

Type:

Row 1 — Assessment instrument: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Loubna Squalli · **Source:** Questionnaire results

Row 2 — Assessment instrument: Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Kawtar Naciri · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Assessment instrument register".

Result to record in the task: Instrument 'Test BIM modelling and ISO 19650 workflows M1': 15 questions, pass mark 70%.

When every step is complete, click Complete in the task panel.

Task UFT-07-02 — Draft question bank · done by Instructional Designer

Input: Assessment instrument → **Output:** Question bank

Step MP-09.2 — Generate question bank draft (Instructional Designer)

Type:

Row 1 — Question bank draft: Question bank draft — BIM modelling and ISO 19650 workflows · **Owner:** Kawtar Naciri · **Start:** 2027-10-29 · **End:** 2027-11-28 · **Budget:** 37000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Question bank draft: Question bank draft — Digital site diary and field reporting · **Owner:** Sara Rami · **Start:** 2027-11-05 · **End:** 2027-12-05 · **Budget:** 74000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Keep 12 AI-drafted questions, rewrite 3 with Site Works & Project Delivery vocabulary; validate each one.

When every step is complete, click Complete in the task panel.

Task UFT-07-03 — Collect reaction survey (Level 1) · done by L&D Analyst

Input: Completion records → **Output:** Level 1 results

Step MP-09.3 — Collect reaction survey (Level 1) (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Reaction survey S-01: 11 responses, satisfaction 4.3/5.

When every step is complete, click Complete in the task panel.

Task UFT-07-04 — Record learning results (Level 2) · done by Trainer

Input: Level 1 results → **Output:** Level 2 results

Step MP-09.4 — Record learning results (Level 2) (Trainer)

Type:

Row 1 — Learning results (Level 2): BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Imane Tazi · **Source:** HRIS export

Row 2 — Learning results (Level 2): Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hind Lahlou · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Learning results (Level 2) register".

Result to record in the task: Level 2: average pre-test 48%, post-test 81% (+33 points).

When every step is complete, click Complete in the task panel.

Task UFT-07-05 — Record on-the-job observation (Level 3) · done by Manager

Input: Level 2 results → **Output:** Level 3 results

Step MP-09.5 — Record on-the-job observation (Level 3) (Manager)

Type:

Row 1 — On-the-job observation (Level 3): BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hind Lahlou · **Source:** Interview with the function head

Row 2 — On-the-job observation (Level 3): Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Youssef Tazi · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "On-the-job observation (Level 3) register".

Result to record in the task: Level 3 (day 30): 9 of 11 supervisors apply the BIM modelling and ISO 19650 workflows routine daily.

When every step is complete, click Complete in the task panel.

Task UFT-07-06 — Compute skill progression · done by L&D Analyst

Input: Level 3 results → **Output:** Skill progression

Step MP-09.6 — Compute skill progression (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-10.3 — Refresh KPI computation (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Skill progression: BIM modelling and ISO 19650 workflows from 1.8 to 2.7 (target 3).

When every step is complete, click Complete in the task panel.

Task UFT-07-07 — Review evaluation results · done by L&D Analyst

Input: Skill progression → **Output:** Evaluation review

Step MP-09.7 — Review evaluation results (L&D Analyst)

Type:

Evaluation results: Evaluation results

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-11-23

Then click Complete the step.

Step MP-20.5 — Run periodic quality review (Quality Manager)

Type:

Row 1 — Periodic quality review: BIM modelling and ISO 19650 workflows — half-day workshop · **Date:** 2027-11-18 · **Trainer:** Atlas Formation Conseil · **Participants:** 11 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Periodic quality review: Digital site diary and field reporting — half-day workshop · **Date:** 2027-11-25 · **Trainer:** Maghreb Learning Partners · **Participants:** 17 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Review: module M3 below 70% pass rate → improvement action assigned to the designer.

When every step is complete, click Complete in the task panel.

Task UFT-07-08 — Publish evaluation report · done by L&D Analyst

Input: Evaluation review → **Output:** Kirkpatrick evaluation report

Step MP-10.4 — Export report (L&D Analyst)

Type:

Row 1 — Report: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Report: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Step MP-10.6 — Share insight with stakeholders (L&D Analyst)

Type:

Row 1 — Insight with stakeholders: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-11-05

Row 2 — Insight with stakeholders: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-11-12

Then click Complete the step. The rows go to the register "Communications log".

Step MP-10.2 — Configure dashboard widgets (L&D Analyst)

Type:

Row 1 — Dashboard widgets: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Dashboard widgets: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Export RPT-016 Kirkpatrick report (PDF) and share with the Steering Committee.

When every step is complete, click Complete in the task panel.

E2E-08 — Learning-to-ROI

Goal: Validate ROI and business impact

Starts when: Evaluation results available for a theme selected for an ROI study. **Ends with:** Phillips ROI validated with finance and business impact report published.

Task UFT-08-01 — Select theme for ROI study · done by Performance Analyst

Input: Evaluation review → **Output:** ROI scope

Step MP-32.1 — Select theme for ROI study (Performance Analyst)

Type:

Decision: Approved

Theme for ROI study: Theme for ROI study

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-11-05

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: ROI study on theme 'BIM modelling and ISO 19650 workflows' — population: 36 supervisors, 3 sites.

When every step is complete, click Complete in the task panel.

Task UFT-08-02 — Define business indicators · done by Performance Analyst

Input: ROI scope → **Output:** Indicator set

Step MP-32.2 — Define business indicators (Performance Analyst)

Type:

Row 1 — Business indicators: Raise BIM modelling and ISO 19650 workflows proficiency of Operator — Site Works & Project Delivery teams to level 3 · **Indicator:** KPI-012 (Average Level 1 satisfaction) · **Baseline:** 45 % · **Target:** 82 % · **Deadline:** 2028-05-02 · **Owner:** Adil Tazi

Row 2 — Business indicators: Certify Supervisor — Site Works & Project Delivery staff on Digital site diary and field reporting · **Indicator:** KPI-013 (Skill progression rate) · **Baseline:** 44 % · **Target:** 79 % · **Deadline:** 2028-05-09 · **Owner:** Loubna Naciri

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-10.1 — Define KPI set per audience (L&D Analyst)

Type:

Row 1 — KPI set per audience: Raise BIM modelling and ISO 19650 workflows proficiency of Operator — Site Works & Project Delivery teams to level 3 · **Indicator:** KPI-012 (Average Level 1 satisfaction) · **Baseline:** 49 % · **Target:** 85 % · **Deadline:** 2028-05-02 · **Owner:** Adil Tazi

Row 2 — KPI set per audience: Certify Supervisor — Site Works & Project Delivery staff on Digital site diary and field reporting · **Indicator:** KPI-013 (Skill progression rate) · **Baseline:** 42 % · **Target:** 83 % · **Deadline:** 2028-05-09 · **Owner:** Loubna Naciri

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Indicators: rework rate, downtime minutes per shift, data re-entry hours.

When every step is complete, click Complete in the task panel.

Task UFT-08-03 — Collect cost data · done by Finance Manager

Input: Indicator set → **Output:** Cost data

Step MP-18.3 — Record committed and actual costs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-18.4 — Compare spend against budget (Finance Manager)

Type:

Row 1 — Spend against budget: BIM modelling and ISO 19650 workflows · **Criterion:** Feasibility · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Spend against budget: Digital site diary and field reporting · **Criterion:** Cost · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Costs: design 60,000 MAD; delivery 180,000 MAD; participants' time 95,000 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-08-04 — Isolate training effect · done by Performance Analyst

Input: Cost data → **Output:** Isolated benefits

Step MP-32.3 — Isolate training effect (Performance Analyst)

Type:

Row 1 — Training effect: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Loubna Squalli · **Source:** Annual performance review

Row 2 — Training effect: Digital site diary and field reporting · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Kawtar Naciri · **Source:** Audit report

Then click Complete the step. The rows go to the register "Training effect register".

Step MP-09.6 — Compute skill progression (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Control group: site B (not trained). Isolated benefit: 410,000 MAD per year.

When every step is complete, click Complete in the task panel.

Task UFT-08-05 — Compute Phillips ROI · done by Performance Analyst

Input: Isolated benefits → **Output:** ROI figures

Step MP-32.4 — Compute Phillips ROI (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: ROI = (410,000 − 335,000) / 335,000 = 22%; benefit-cost ratio 1.22.

When every step is complete, click Complete in the task panel.

Task UFT-08-06 — Review ROI with finance · done by Finance Manager

Input: ROI figures → **Output:** Validated ROI

Step MP-32.5 — Review ROI with finance (Finance Manager)

Type:

ROI with finance: ROI with finance

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-11-16

Then click Complete the step.

Result to record in the task: Finance review: assumptions accepted; downtime valued at 180 MAD per minute.

When every step is complete, click Complete in the task panel.

Task UFT-08-07 — Publish business impact report · done by Head of L&D

Input: Validated ROI → **Output:** ROI & business impact report

Step MP-32.6 — Publish business impact report (Head of L&D)

Type:

Row 1 — Business impact report: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-11-19

Row 2 — Business impact report: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-11-26

Then click Complete the step. The rows go to the register "Communications log".

Step MP-10.4 — Export report (L&D Analyst)

Type:

Row 1 — Report: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Report: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Step MP-10.5 — Query data via AI Assistant (Head of L&D)

Type:

Row 1 — Data via AI Assistant: KPI-017 (IDP coverage) · **Period:** 2026-Q3 · **Value:** 65 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Data via AI Assistant: KPI-018 (Mandatory certification compliance) · **Period:** 2026-Q1 · **Value:** 57 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Publish RPT-012 ROI & Business Impact Report to executive leadership.

When every step is complete, click Complete in the task panel.

E2E-09 — Compliance-to-Certification

Goal: Ensure compliant workforce with valid certifications

Starts when: New regulatory requirement or certification nearing expiry. **Ends with:** Compliant workforce with valid certifications and an audit extract available.

Task UFT-09-01 — Register regulatory requirement · done by Compliance Officer

Input: Regulation → **Output:** Requirement record

Step MP-14.1 — Register regulatory requirement (Compliance Officer)

Type:

Row 1 — Regulatory requirement: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hind Lahlou · **Source:** Questionnaire results

Row 2 — Regulatory requirement: Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Youssef Tazi · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Regulatory requirement register".

Result to record in the task: Requirement 'ISO 19650 awareness', every 24 months, source: ISO 19650 clause on competence.

When every step is complete, click Complete in the task panel.

Task UFT-09-02 — Assign mandatory training · done by Compliance Officer

Input: Requirement record → **Output:** Mandatory assignments

Step MP-14.2 — Assign mandatory training by position (Compliance Officer)

Type:

Row 1 — Role: Compliance Officer / DPO · **Mandatory training by position:** BIM modelling and ISO 19650 workflows · **Person:** Youssef Tazi · **Allocation (%):** 100 · **Start:** 2027-11-18 · **Holder type:** Holder

Row 2 — Role: Consultant (PM / Partner) · **Mandatory training by position:** Digital site diary and field reporting · **Person:** Salma Ouazzani · **Allocation (%):** 50 · **Start:** 2027-11-25 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Result to record in the task: Assign to positions: Site Works & Project Delivery operator, Site Works & Project Delivery supervisor, quality inspector.

When every step is complete, click Complete in the task panel.

Task UFT-09-03 — Deliver mandatory sessions · done by Training Administrator

Input: Mandatory assignments → **Output:** Attendance

Step MP-07.3 — Enroll learners into session (Training Administrator)

Type:

Row 1 — Learners into session: BIM modelling and ISO 19650 workflows — half-day workshop · **Date:** 2027-12-10 · **Trainer:** Atlas Formation Conseil · **Participants:** 17 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Learners into session: Digital site diary and field reporting — half-day workshop · **Date:** 2027-12-17 · **Trainer:** Maghreb Learning Partners · **Participants:** 16 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-07.5 — Record attendance (Trainer)

Type:

Row 1 — Attendance: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Salma Ouazzani · **Source:** Audit report

Row 2 — Attendance: Digital site diary and field reporting · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hajar Berrada · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Attendance register".

Result to record in the task: Enroll 24 employees in session 'ISO 19650 awareness'; attendance recorded.

When every step is complete, click Complete in the task panel.

Task UFT-09-04 — Assess and certify · done by Trainer

Input: Attendance → **Output:** Certificates

Step MP-09.4 — Record learning results (Level 2) (Trainer)

Type:

Row 1 — Learning results (Level 2): BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hajar Berrada · **Source:** HRIS export

Row 2 — Learning results (Level 2): Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Rachid Squalli · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Learning results (Level 2) register".

Step MP-14.4 — Issue certificate on completion (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Result 86%; certificate 'ISO 19650 awareness' issued, valid until 2026+2.

When every step is complete, click Complete in the task panel.

Task UFT-09-05 — Compute certification validity · done by Compliance Officer

Input: Certificates → **Output:** Validity status

Step MP-14.3 — Compute certification validity (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Validity: 212 valid, 9 expire within 60 days, 3 expired.

When every step is complete, click Complete in the task panel.

Task UFT-09-06 — Manage renewals · done by Compliance Officer

Input: Validity status → **Output:** Renewed certificates

Step MP-14.5 — Launch renewal enrollment (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-14.6 — Confirm renewal completion (Compliance Officer)

Type:

Decision: Approved

Renewal completion: Renewal completion

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-12-13

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: Launch renewal for the 12 employees; confirm 10 completions, 2 rescheduled.

When every step is complete, click Complete in the task panel.

Task UFT-09-07 — Produce compliance audit extract · done by Compliance Officer

Input: Renewed certificates → **Output:** Compliance audit extract

Step MP-14.7 — Produce compliance audit extract (Compliance Officer)

Type:

Row 1 — Compliance audit extract: Compliance audit extract — BIM modelling and ISO 19650 workflows · **Owner:** Loubna Naciri · **Start:** 2027-12-08 · **End:** 2028-01-07 · **Budget:** 44000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Compliance audit extract: Compliance audit extract — Digital site diary and field reporting · **Owner:** Loubna Squalli · **Start:** 2027-12-15 · **End:** 2028-01-14 · **Budget:** 43000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-10.4 — Export report (L&D Analyst)

Type:

Row 1 — Report: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Report: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Export compliance audit extract for ISO 19650 (XLSX) for the external auditor.

When every step is complete, click Complete in the task panel.

AEC-E2E-01 — AEC & Construction Compliance-to-Certification Readiness

Goal: Keep AEC & Construction regulated roles certified against ISO 19650.

Starts when: New ISO 19650 requirement or certification expiry. **Ends with:** Sector compliance extract issued with every critical role certified.

Task UFT-AEC-E1-01 — Register ISO 19650 obligations · done by Compliance Officer

Input: Sector obligations → **Output:** Record each obligation with its period.

Step MP-01.1 — Record corporate strategic objectives (Head of L&D)

Type:

Row 1 — Corporate strategic objectives: Raise BIM modelling and ISO 19650 workflows proficiency of Operator — Site Works & Project Delivery teams to level 3 · **Indicator:** KPI-005 (Design approval lead time) · **Baseline:** 31 % · **Target:** 78 % · **Deadline:** 2028-05-28 · **Owner:** Loubna Squalli

Row 2 — Corporate strategic objectives: Certify Supervisor — Site Works & Project Delivery staff on Digital site diary and field reporting · **Indicator:** KPI-006 (License Compliance %) · **Baseline:** 50 % · **Target:** 75 % · **Deadline:** 2028-06-04 · **Owner:** Kawtar Naciri

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-14.1 — Register regulatory requirement (Compliance Officer)

Type:

Row 1 — Regulatory requirement: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Loubna Squalli · **Source:** Audit report

Row 2 — Regulatory requirement: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Kawtar Naciri · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Regulatory requirement register".

Result to record in the task: Obligation 'ISO 19650 training', every 12 months, owner Compliance Officer.

When every step is complete, click Complete in the task panel.

Task UFT-AEC-E1-02 — Link obligations to positions · done by HR Business Partner

Input: Sector obligations → **Output:** Link each obligation to the Site Works & Project Delivery positions.

Step MP-01.2 — Link objectives to functions and sites (L&D Strategist)

Type:

Row 1 — Objectives to functions and sites: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Kawtar Naciri · **Source:** HRIS export

Row 2 — Objectives to functions and sites: Digital site diary and field reporting · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Sara Rami · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Objectives to functions and sites register".

Step MP-14.2 — Assign mandatory training by position (Compliance Officer)

Type:

Row 1 — Role: Employee / Learner · **Mandatory training by position:** BIM modelling and ISO 19650 workflows · **Person:** Kawtar Naciri · **Allocation (%):** 100 · **Start:** 2027-12-02 · **Holder type:** Holder

Row 2 — Role: Manager / Hiring Manager · **Mandatory training by position:** Digital site diary and field reporting · **Person:** Sara Rami · **Allocation (%):** 50 · **Start:** 2027-12-09 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Result to record in the task: Linked to 5 Site Works & Project Delivery positions (38 employees).

When every step is complete, click Complete in the task panel.

Task UFT-AEC-E1-03 — Track certification validity · done by Compliance Officer

Input: Sector obligations → **Output:** Check expiry dates and renewals.

Step MP-02.1 — Define competency families and levels (L&D Analyst)

Type:

Row 1 — Competency families and levels: Raise BIM modelling and ISO 19650 workflows proficiency of Operator — Site Works & Project Delivery teams to level 3 · **Indicator:** KPI-007 (Content publication lead time) · **Baseline:** 41 % · **Target:** 89 % · **Deadline:** 2028-06-01 · **Owner:** Sara Rami

Row 2 — Competency families and levels: Certify Supervisor — Site Works & Project Delivery staff on Digital site diary and field reporting · **Indicator:** KPI-008 (Session fill rate) · **Baseline:** 41 % · **Target:** 76 % · **Deadline:** 2028-06-08 · **Owner:** Imane Tazi

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-14.3 — Compute certification validity (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Validity: 33 valid, 5 expire within 60 days.

When every step is complete, click Complete in the task panel.

Task UFT-AEC-E1-04 — Issue sector compliance extract · done by Compliance Officer

Input: Sector obligations → **Output:** Produce the extract for auditors.

Step MP-02.2 — Set target levels per position (HR Business Partner)

Type:

Row 1 — Target levels per position: Raise BIM modelling and ISO 19650 workflows proficiency of Operator — Site Works & Project Delivery teams to level 3 · **Indicator:** KPI-008 (Session fill rate) · **Baseline:** 49 % · **Target:** 89 % · **Deadline:** 2028-06-03 · **Owner:** Imane Tazi

Row 2 — Target levels per position: Certify Supervisor — Site Works & Project Delivery staff on Digital site diary and field reporting · **Indicator:** KPI-009 (Plan realization rate) · **Baseline:** 48 % · **Target:** 75 % · **Deadline:** 2028-06-10 · **Owner:** Hind Lahlou

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-14.7 — Produce compliance audit extract (Compliance Officer)

Type:

Row 1 — Compliance audit extract: Compliance audit extract — BIM modelling and ISO 19650 workflows · **Owner:** Imane Tazi · **Start:** 2027-12-16 · **End:** 2028-01-15 · **Budget:** 45000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Compliance audit extract: Compliance audit extract — Digital site diary and field reporting · **Owner:** Hind Lahlou · **Start:** 2027-12-23 · **End:** 2028-01-22 · **Budget:** 76000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Extract issued for the ISO 19650 audit on 15 October.

When every step is complete, click Complete in the task panel.

Gate G5 — G5 — Evaluation & impact validated: close the phase

2. Open the project workspace and click the gate button of the phase.
2. Tick each checklist item once its evidence is attached, then click Submit for decision.
2. Click Go. Type the justification: All mandatory items met; evidence attached.
2. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

Phase 6 — Talent, knowledge & continuous improvement

E2E-10 — Talent-to-Mobility

Goal: Enable internal mobility and career progression

Starts when: Internal opening published or annual career review. **Ends with:** Internal move decided with a reskilling plan assigned.

Task UFT-10-01 — Model career paths · done by HR Director

Input: Job architecture → **Output:** Career paths

Step MP-13.1 — Model career path (HR Director)

Type:

Row 1 — Career path: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Career path: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Step MP-13.2 — Link path steps to competency targets (HR Business Partner)

Type:

Row 1 — Path steps to competency targets: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hind Lahlou · **Source:** Annual performance review

Row 2 — Path steps to competency targets: Digital site diary and field reporting · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Youssef Tazi · **Source:** Audit report

Then click Complete the step. The rows go to the register "Path steps to competency targets register".

Result to record in the task: Career path: Site Works & Project Delivery operator → team leader → supervisor, with competency targets per step.

When every step is complete, click Complete in the task panel.

Task UFT-10-02 — Publish internal opening · done by HR Business Partner

Input: Career paths → **Output:** Internal opening

Step MP-31.1 — Publish internal opening (HR Business Partner)

Type:

Row 1 — Internal opening: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-12-15

Row 2 — Internal opening: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-12-22

Then click Complete the step. The rows go to the register "Communications log".

Step MP-31.2 — Define required skills (Hiring Manager)

Type:

Row 1 — Required skills: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Youssef Tazi · **Source:** Audit report

Row 2 — Required skills: Digital site diary and field reporting · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Salma Ouazzani · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Required skills register".

Result to record in the task: Opening 'Site Works & Project Delivery team leader', required skills: BIM modelling and ISO 19650 workflows level 3, leadership level 2.

When every step is complete, click Complete in the task panel.

Task UFT-10-03 — Match employees to opening · done by HR Business Partner

Input: Internal opening → **Output:** Match list

Step MP-31.3 — Match employees to opening (HR Business Partner)

Type:

Row 1 — Employees to opening: BIM modelling and ISO 19650 workflows · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Employees to opening: Digital site diary and field reporting · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-02.7 — Validate skills inventory (Head of L&D)

Type:

Decision: Approved

Skills inventory: Skills inventory

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-12-15

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: Review 6 AI matches; keep 4 candidates with match score above 75%.

When every step is complete, click Complete in the task panel.

Task UFT-10-04 — Apply to internal opening · done by Employee

Input: Match list → **Output:** Applications

Step MP-31.4 — Apply to internal opening (Employee)

Type:

Row 1 — Internal opening: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Internal opening: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Application with motivation note and consent of the current manager.

When every step is complete, click Complete in the task panel.

Task UFT-10-05 — Shortlist candidates · done by Hiring Manager

Input: Applications → **Output:** Shortlist

Step MP-31.5 — Shortlist candidates (Hiring Manager)

Type:

Decision: Approved

Candidates: Candidates

Rationale: Approved after review of the evidence and budget.

Decision date: 2028-01-02

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: Shortlist: 2 candidates; interviews on 20 and 21 June.

When every step is complete, click Complete in the task panel.

Task UFT-10-06 — Plan individual development · done by Manager

Input: Shortlist → **Output:** Development plans

Step MP-13.3 — Create individual development plan (Manager)

Type:

Row 1 — Individual development plan: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Adil Tazi · **Source:** Annual performance review

Row 2 — Individual development plan: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Loubna Naciri · **Source:** Audit report

Then click Complete the step. The rows go to the register "Individual development plan register".

Step MP-13.4 — Suggest development actions (Manager)

Type:

Row 1 — Development actions: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Adil Tazi · **Source:** Annual performance review

Row 2 — Development actions: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Loubna Naciri · **Source:** Audit report

Then click Complete the step. The rows go to the register "Development actions register".

Step MP-42.3 — Build leadership development plan (HR Business Partner)

Type:

Row 1 — Leadership development plan: Leadership development plan — BIM modelling and ISO 19650 workflows · **Owner:** Adil Tazi · **Start:** 2027-12-28 · **End:** 2028-01-27 · **Budget:** 24000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Leadership development plan: Leadership development plan — Digital site diary and field reporting · **Owner:** Loubna Naciri · **Start:** 2028-01-04 · **End:** 2028-02-03 · **Budget:** 40000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-42.4 — Suggest leadership development actions (HR Business Partner)

Type:

Row 1 — Leadership development actions: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Adil Tazi · **Source:** Annual performance review

Row 2 — Leadership development actions: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Loubna Naciri · **Source:** Audit report

Then click Complete the step. The rows go to the register "Leadership development actions register".

Result to record in the task: Development plan: 2 modules BIM modelling and ISO 19650 workflows, 1 leadership workshop, 3 months mentoring.

When every step is complete, click Complete in the task panel.

Task UFT-10-07 — Assign reskilling plan · done by HR Business Partner

Input: Development plans → **Output:** Reskilling plan

Step MP-31.6 — Assign reskilling plan (HR Business Partner)

Type:

Row 1 — Role: Trainer / Coach · **Reskilling plan:** BIM modelling and ISO 19650 workflows · **Person:** Loubna Naciri · **Allocation (%):** 100 · **Start:** 2027-12-20 · **Holder type:** Holder

Row 2 — Role: Employee / Learner · **Reskilling plan:** Digital site diary and field reporting · **Person:** Loubna Squalli · **Allocation (%):** 50 · **Start:** 2027-12-27 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Step MP-08.1 — Generate personal learning plan (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Assign reskilling path 'BIM modelling and ISO 19650 workflows for team leaders' to the selected candidate.

When every step is complete, click Complete in the task panel.

Task UFT-10-08 — Review career and succession · done by HR Director

Input: Reskilling plan → **Output:** Talent mobility report

Step MP-13.5 — Run career review (HR Business Partner)

Type:

Row 1 — Career review: BIM modelling and ISO 19650 workflows — half-day workshop · **Date:** 2028-01-11 · **Trainer:** Atlas Formation Conseil · **Participants:** 15 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Career review: Digital site diary and field reporting — half-day workshop · **Date:** 2028-01-18 · **Trainer:** Maghreb Learning Partners · **Participants:** 12 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-13.6 — Update succession readiness (HR Director)

Type:

Succession readiness: Succession readiness

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-12-26

Then click Complete the step.

Step MP-42.5 — Review leadership pipeline (HR Director)

Type:

Leadership pipeline: Leadership pipeline

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-12-26

Then click Complete the step.

Step MP-42.6 — Reassess leadership maturity (HR Business Partner)

Type:

Row 1 — Leadership maturity: BIM modelling and ISO 19650 workflows · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Leadership maturity: Digital site diary and field reporting · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Succession readiness updated: 2 ready now, 3 ready within 12 months.

When every step is complete, click Complete in the task panel.

E2E-11 — Onboarding-to-Productivity

Goal: Accelerate time-to-productivity

Starts when: New hire or internal mover confirmed. **Ends with:** Employee productive within target time and onboarding closed.

Task UFT-11-01 — Create onboarding record · done by Hiring Manager

Input: Hiring decision → **Output:** Onboarding record

Step MP-35.1 — Create onboarding record (Hiring Manager)

Type:

Row 1 — Onboarding record: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Kawtar Naciri · **Source:** Interview with the function head

Row 2 — Onboarding record: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Sara Rami · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Onboarding record register".

Result to record in the task: Onboarding record for the new Site Works & Project Delivery technician, start date 1 July, buddy assigned.

When every step is complete, click Complete in the task panel.

Task UFT-11-02 — Generate 30-60-90 day path · done by HR Business Partner

Input: Onboarding record → **Output:** 30-60-90 path

Step MP-35.2 — Generate 30-60-90 day path (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-08.1 — Generate personal learning plan (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: 30-60-90 path: day 30 safety and ISO 19650; day 60 BIM modelling and ISO 19650 workflows; day 90 autonomy on shift.

When every step is complete, click Complete in the task panel.

Task UFT-11-03 — Enroll in onboarding sessions · done by Training Administrator

Input: 30-60-90 path → **Output:** Enrollments

Step MP-07.3 — Enroll learners into session (Training Administrator)

Type:

Row 1 — Learners into session: BIM modelling and ISO 19650 workflows — half-day workshop · **Date:** 2028-01-17 · **Trainer:** Atlas Formation Conseil · **Participants:** 14 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Learners into session: Digital site diary and field reporting — half-day workshop · **Date:** 2028-01-24 · **Trainer:** Maghreb Learning Partners · **Participants:** 12 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-07.4 — Send convocations (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Enroll in the induction session of 2 July; convocation sent.

When every step is complete, click Complete in the task panel.

Task UFT-11-04 — Complete onboarding tasks · done by Employee

Input: Enrollments → **Output:** Completed tasks

Step MP-35.3 — Complete onboarding tasks (Employee)

Type:

Row 1 — Onboarding tasks: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hind Lahlou · **Source:** Audit report

Row 2 — Onboarding tasks: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Youssef Tazi · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Onboarding tasks register".

Result to record in the task: Tasks done: badge, IT account, safety tour, meeting with the team.

When every step is complete, click Complete in the task panel.

Task UFT-11-05 — Hold milestone check-ins · done by Hiring Manager

Input: Completed tasks → **Output:** Check-in notes

Step MP-35.4 — Hold milestone check-in (Hiring Manager)

Type:

Row 1 — Milestone check-in: BIM modelling and ISO 19650 workflows — half-day workshop · **Date:** 2028-01-21 · **Trainer:** Atlas Formation Conseil · **Participants:** 14 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Milestone check-in: Digital site diary and field reporting — half-day workshop · **Date:** 2028-01-28 · **Trainer:** Maghreb Learning Partners · **Participants:** 10 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-21.3 — Schedule coaching sessions (Coach)

Type:

Row 1 — Coaching sessions: Coaching sessions — BIM modelling and ISO 19650 workflows · **Owner:** Youssef Tazi · **Start:** 2028-01-11 · **End:** 2028-02-10 · **Budget:** 74000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Coaching sessions: Coaching sessions — Digital site diary and field reporting · **Owner:** Salma Ouazzani · **Start:** 2028-01-18 · **End:** 2028-02-17 · **Budget:** 68000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Day-30 check-in: on track; coaching needed on BIM modelling and ISO 19650 workflows data entry.

When every step is complete, click Complete in the task panel.

Task UFT-11-06 — Assess time to productivity · done by Hiring Manager

Input: Check-in notes → **Output:** Productivity assessment

Step MP-35.5 — Assess time to productivity (Hiring Manager)

Type:

Row 1 — Time to productivity: BIM modelling and ISO 19650 workflows · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Time to productivity: Digital site diary and field reporting · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Time to productivity: 74 days (target 90).

When every step is complete, click Complete in the task panel.

Task UFT-11-07 — Close onboarding · done by HR Business Partner

Input: Productivity assessment → **Output:** Closed onboarding

Step MP-35.6 — Close onboarding (HR Business Partner)

Type:

Decision: Approved

Onboarding: Onboarding

Rationale: Approved after review of the evidence and budget.

Decision date: 2028-01-22

Decided by: Loubna Naciri

Then click Complete the step.

Step MP-13.3 — Create individual development plan (Manager)

Type:

Row 1 — Individual development plan: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hajar Berrada · **Source:** Questionnaire results

Row 2 — Individual development plan: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Rachid Squalli · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Individual development plan register".

Result to record in the task: Close onboarding; link the individual development plan for year 1.

When every step is complete, click Complete in the task panel.

E2E-12 — Knowledge-Capture-to-Transfer

Goal: Capture and transfer institutional knowledge

Starts when: Critical expert identified as leaving, retiring or holding at-risk knowledge. **Ends with:** Knowledge captured, published and transferred to a validated successor.

Task UFT-12-01 — Identify critical experts · done by HR Business Partner

Input: Workforce data → **Output:** Critical expert list

Step MP-34.1 — Identify critical experts (HR Business Partner)

Type:

Row 1 — Critical experts: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Rachid Squalli · **Source:** Annual performance review

Row 2 — Critical experts: Digital site diary and field reporting · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Adil Tazi · **Source:** Audit report

Then click Complete the step. The rows go to the register "Critical experts register".

Result to record in the task: Critical expert: senior Site Works & Project Delivery engineer retiring in 8 months; knowledge risk: high.

When every step is complete, click Complete in the task panel.

Task UFT-12-02 — Plan capture sessions · done by Knowledge Manager

Input: Critical expert list → **Output:** Capture plan

Step MP-34.2 — Plan capture sessions (Knowledge Manager)

Type:

Row 1 — Capture sessions: Capture sessions — BIM modelling and ISO 19650 workflows · **Owner:** Adil Tazi · **Start:** 2028-01-19 · **End:** 2028-02-18 · **Budget:** 51000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Capture sessions: Capture sessions — Digital site diary and field reporting · **Owner:** Loubna Naciri · **Start:** 2028-01-26 · **End:** 2028-02-25 · **Budget:** 22000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Capture plan: 4 sessions of 90 minutes on troubleshooting and ISO 19650 practices.

When every step is complete, click Complete in the task panel.

Task UFT-12-03 — Record expert interview · done by Knowledge Manager

Input: Capture plan → **Output:** Interview transcript

Step MP-34.3 — Record expert interview (Knowledge Manager)

Type:

Row 1 — Expert interview: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Loubna Naciri · **Source:** HRIS export

Row 2 — Expert interview: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Loubna Squalli · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Expert interview register".

Result to record in the task: Interview 1 recorded (82 minutes); transcript attached.

When every step is complete, click Complete in the task panel.

Task UFT-12-04 — Structure knowledge · done by Knowledge Manager

Input: Interview transcript → **Output:** Structured knowledge

Step MP-34.4 — Structure knowledge from transcript (Knowledge Manager)

Type:

Row 1 — Knowledge from transcript: Knowledge from transcript — BIM modelling and ISO 19650 workflows · **Owner:** Loubna Squalli · **Start:** 2028-01-23 · **End:** 2028-02-22 · **Budget:** 74000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Knowledge from transcript: Knowledge from transcript — Digital site diary and field reporting · **Owner:** Kawtar Naciri · **Start:** 2028-01-30 · **End:** 2028-02-29 · **Budget:** 24000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Accept the AI structure: 5 failure modes, 12 checks, 3 decision rules; correct 2 technical terms.

When every step is complete, click Complete in the task panel.

Task UFT-12-05 — Publish knowledge article · done by Knowledge Manager

Input: Structured knowledge → **Output:** Published article

Step MP-12.1 — Publish knowledge article (Knowledge Manager)

Type:

Row 1 — Knowledge article: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2028-01-20

Row 2 — Knowledge article: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2028-01-27

Then click Complete the step. The rows go to the register "Communications log".

Step MP-12.2 — Index article for retrieval (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-33.4 — Approve publication (Knowledge Manager)

Type:

Decision: Approved

Publication: Publication

Rationale: Approved after review of the evidence and budget.

Decision date: 2028-02-01

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: Publish article 'Troubleshooting guide — Site Works & Project Delivery' in EN/FR/AR; indexed for search.

When every step is complete, click Complete in the task panel.

Task UFT-12-06 — Assign successor learning path · done by Manager

Input: Published article → **Output:** Successor path

Step MP-34.5 — Assign successor learning path (Manager)

Type:

Row 1 — Role: Compliance Officer / DPO · **Successor learning path:** BIM modelling and ISO 19650 workflows · **Person:** Sara Rami · **Allocation (%):** 100 · **Start:** 2028-01-17 · **Holder type:** Holder

Row 2 — Role: Consultant (PM / Partner) · **Successor learning path:** Digital site diary and field reporting · **Person:** Imane Tazi · **Allocation (%):** 50 · **Start:** 2028-01-24 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Step MP-06.6 — Publish content to catalog (Content Developer)

Type:

Row 1 — Content to catalog: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2028-01-22

Row 2 — Content to catalog: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2028-01-29

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Assign the successor path: article + 3 shadowing sessions with the expert.

When every step is complete, click Complete in the task panel.

Task UFT-12-07 — Validate transfer completion · done by Subject Matter Expert

Input: Successor path → **Output:** Validated transfer

Step MP-34.6 — Validate transfer completion (Subject Matter Expert)

Type:

Decision: Approved with conditions

Transfer completion: Transfer completion

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2028-02-19

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: Transfer validated: successor solved 4 of 5 test cases alone.

When every step is complete, click Complete in the task panel.

E2E-31 — Engagement-to-Roadmap

Goal: Define post-engagement roadmap and continuous improvement

Starts when: Closure of the current training engineering engagement (E2E-19). **Ends with:** Approved post-engagement roadmap with future missions and continuous improvement plan.

Task UFT-31-01 — Consolidate engagement findings · done by Consultant PM

Input: Engagement outputs → **Output:** Findings

Step MP-50.1 — Consolidate engagement findings (Consultant PM)

Type:

Row 1 — Engagement findings: KPI-011 (API Availability) · **Period:** 2026-Q1 · **Value:** 76 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Engagement findings: KPI-012 (Average Level 1 satisfaction) · **Period:** 2026-Q2 · **Value:** 77 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Findings: 6 deliverables, 3 lessons learned, 2 open topics (IS, org design).

When every step is complete, click Complete in the task panel.

Task UFT-31-02 — Define future perspectives · done by Consultant PM

Input: Findings → **Output:** Perspectives

Step MP-50.2 — Define future perspectives (Consultant PM)

Type:

Row 1 — Future perspectives: BIM modelling and ISO 19650 workflows · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Youssef Tazi · **Source:** Interview with the function head

Row 2 — Future perspectives: Digital site diary and field reporting · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Salma Ouazzani · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Future perspectives register".

Result to record in the task: Perspectives: Drone surveying and 3D site scans programme, second wave for OP level.

When every step is complete, click Complete in the task panel.

Task UFT-31-03 — Plan One-to-One coaching · done by L&D Strategist

Input: Perspectives → **Output:** Coaching plan

Step MP-50.3 — Plan One-to-One coaching (L&D Strategist)

Type:

Row 1 — One-to-One coaching: One-to-One coaching — BIM modelling and ISO 19650 workflows · **Owner:** Salma Ouazzani · **Start:** 2028-02-04 · **End:** 2028-03-05 · **Budget:** 31000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — One-to-One coaching: One-to-One coaching — Digital site diary and field reporting · **Owner:** Hajar Berrada · **Start:** 2028-02-11 · **End:** 2028-03-12 · **Budget:** 41000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: One-to-One coaching: 6 managers, 6 sessions each over 6 months.

When every step is complete, click Complete in the task panel.

Task UFT-31-04 — Plan organizational optimization · done by Org Design Consultant

Input: Perspectives → **Output:** Optimization plan

Step MP-50.4 — Plan organizational optimization (Org Design Consultant)

Type:

Row 1 — Organizational optimization: Organizational optimization — BIM modelling and ISO 19650 workflows · **Owner:** Hajar Berrada · **Start:** 2028-02-06 · **End:** 2028-03-07 · **Budget:** 50000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Organizational optimization: Organizational optimization — Digital site diary and field reporting · **Owner:** Rachid Squalli · **Start:** 2028-02-13 · **End:** 2028-03-14 · **Budget:** 41000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Organizational optimization: merge 2 planning cells; update 11 descriptions.

When every step is complete, click Complete in the task panel.

Task UFT-31-05 — Plan IS rehabilitation · done by IT Architect

Input: Perspectives → **Output:** IS plan

Step MP-50.5 — Plan IS rehabilitation (IT Architect)

Type:

Row 1 — IS rehabilitation: IS rehabilitation — BIM modelling and ISO 19650 workflows · **Owner:** Rachid Squalli · **Start:** 2028-02-08 · **End:** 2028-03-09 · **Budget:** 42000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — IS rehabilitation: IS rehabilitation — Digital site diary and field reporting · **Owner:** Adil Tazi · **Start:** 2028-02-15 · **End:** 2028-03-16 · **Budget:** 42000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: IS rehabilitation: connect HRIS and training platform; retire 2 spreadsheets.

When every step is complete, click Complete in the task panel.

Task UFT-31-06 — Define KPIs and dashboards · done by Performance Analyst

Input: Perspectives → **Output:** KPI framework

Step MP-50.6 — Define KPIs and dashboards (Performance Analyst)

Type:

Row 1 — KPIs and dashboards: Raise BIM modelling and ISO 19650 workflows proficiency of Operator — Site Works & Project Delivery teams to level 3 · **Indicator:** KPI-016 (Knowledge reuse rate) · **Baseline:** 39 % · **Target:** 72 % · **Deadline:** 2028-07-29 · **Owner:** Adil Tazi

Row 2 — KPIs and dashboards: Certify Supervisor — Site Works & Project Delivery staff on Digital site diary and field reporting · **Indicator:** KPI-017 (IDP coverage) · **Baseline:** 49 % · **Target:** 79 % · **Deadline:** 2028-08-05 · **Owner:** Loubna Naciri

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: KPIs: training coverage, time to competency, ROI per theme; monthly dashboard.

When every step is complete, click Complete in the task panel.

Task UFT-31-07 — Prioritize future missions · done by Consultant PM

Input: All plans → **Output:** Prioritized missions

Step MP-50.7 — Prioritize future missions (Consultant PM)

Type:

Row 1 — Future missions: BIM modelling and ISO 19650 workflows · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Future missions: Digital site diary and field reporting · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-50.8 — Validate roadmap with leadership (Partner)

Type:

Decision: Approved

Roadmap with leadership: Roadmap with leadership

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2028-02-12

Decided by: Loubna Naciri

Then click Complete the step.

Result to record in the task: Priority missions: 1 IS rehabilitation, 2 coaching, 3 org optimization.

When every step is complete, click Complete in the task panel.

Task UFT-31-08 — Publish roadmap · done by Consultant PM

Input: Prioritized missions → **Output:** Post-engagement roadmap

Step MP-50.9 — Publish post-engagement roadmap (Consultant PM)

Type:

Row 1 — Post-engagement roadmap: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2028-02-09

Row 2 — Post-engagement roadmap: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2028-02-16

Then click Complete the step. The rows go to the register "Communications log".

Step MP-50.10 — Track roadmap execution (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-50.11 — Improve roadmap continuously (Consultant PM)

Type:

Roadmap continuously: Roadmap continuously

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2028-02-22

Then click Complete the step.

Step MP-50.12 — Report on roadmap progress (Consultant PM)

Type:

Row 1 — On roadmap progress: Announce the program: BIM modelling and ISO 19650 workflows · **Audience:** Operator — Site Works & Project Delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2028-02-09

Row 2 — On roadmap progress: Announce the program: Digital site diary and field reporting · **Audience:** Supervisor — Site Works & Project Delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2028-02-16

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish RPT-010 Post-Engagement Roadmap to the executive committee.

When every step is complete, click Complete in the task panel.

Gate G6 — G6 — Closure & continuous improvement: close the phase

2. Open the project workspace and click the gate button of the phase.
2. Tick each checklist item once its evidence is attached, then click Submit for decision.
2. Click Go. Type the justification: All mandatory items met; evidence attached.
2. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

6. Scenario 4 — Coopérative Laitière Al Baraka

Context

Context	
Sector	Food & Beverage
Size	SME · 55 employees · El Jadida
Run	AI Skills Full Run 2026 — Coopérative Laitière Al Baraka — AI skills, SME track SME-T3
Standards	HACCP, ISO 22000, FSSC 22000
Themes	AI shelf-life and spoilage prediction · Computer vision for foreign-body detection · AI demand planning for perishables · Digital HACCP records and traceability
Sign in as	headld@cooperativelaitier.ma · CortexSkills#2026
Scope of the run	38 end-to-end processes, 277 user tasks and 481 steps.

Phase 0 — Enablers (run across all phases)

Enablers run across all phases

E2E-15 — Data-AI-Integration

Goal: Govern data, AI, integrations

Starts when: New integration, data source or AI use case to govern. **Ends with:** Integrations, data and AI governed with health, retention and usage reviewed.

Task UFT-15-01 — Register external integration · done by Platform Administrator

Input: Integration request → **Output:** Integration record

Step MP-16.1 — Register external integration (Platform Administrator)

Type:

Row 1 — External integration: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Soukaina Mansouri · **Source:** Interview with the function head

Row 2 — External integration: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Reda Mansouri · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "External integration register".

Result to record in the task: Register integration 'HRIS — Workday' (INT-HR-01); credential reference stored encrypted.

When every step is complete, click Complete in the task panel.

Task UFT-15-02 — Map fields and check health · done by IT Architect

Input: Integration record → **Output:** Healthy integration

Step MP-16.2 — Map integration fields (IT Architect)

Type:

Row 1 — Integration fields: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Reda Mansouri · **Source:** Questionnaire results

Row 2 — Integration fields: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Karim Bennani · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Integration fields register".

Step MP-16.3 — Check integration health (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Map fields: employee_id → matricule; position → poste. Health check: success.

When every step is complete, click Complete in the task panel.

Task UFT-15-03 — Run HRIS synchronisation · done by IT Architect

Input: Healthy integration → **Output:** Synchronised directory

Step MP-16.4 — Run HRIS synchronisation (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-16.5 — Review synchronisation rejections (IT Architect)

Type:

Synchronisation rejections: Synchronisation rejections

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-09-29

Then click Complete the step.

Result to record in the task: Sync run: 1,204 records updated, 3 rejected (missing position) — corrected.

When every step is complete, click Complete in the task panel.

Task UFT-15-04 — Set data retention rule · done by Data Protection Officer

Input: Synchronised directory → **Output:** Retention rules

Step MP-16.6 — Set data retention rule (Data Protection Officer)

Type:

Row 1 — Data retention rule: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Data retention rule: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Retention: questionnaire responses 3 years; training records 10 years.

When every step is complete, click Complete in the task panel.

Task UFT-15-05 — Maintain AI use case register · done by Platform Administrator

Input: Retention rules → **Output:** AI register

Step MP-16.7 — Maintain AI use case register (Platform Administrator)

Type:

AI use case register: AI use case register

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-09-12

Then click Complete the step.

Result to record in the task: Add custom use case 'Shift-report summarizer' (Assistive), version 1.

When every step is complete, click Complete in the task panel.

Task UFT-15-06 — Set AI activation per scope · done by Platform Administrator

Input: AI register → **Output:** AI activation state

Step MP-16.8 — Set AI activation per scope (Platform Administrator)

Type:

Row 1 — AI activation per scope: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — AI activation per scope: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Step MP-24.1 — Enable personalization per scope (Platform Administrator)

Type:

Row 1 — Personalization per scope: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Personalization per scope: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Activate AIUC-35 and AIUC-36 for the organization; override Off for pilot project B.

When every step is complete, click Complete in the task panel.

Task UFT-15-07 — Review AI usage log · done by IT Architect

Input: AI activation state → **Output:** AI usage & governance report

Step MP-16.9 — Review AI usage log (IT Architect)

Type:

AI usage log: AI usage log

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-08-31

Then click Complete the step.

Step MP-28.2 — Validate dataset quality (Performance Analyst)

Type:

Decision: Approved

Dataset quality: Dataset quality

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-08-30

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: Usage review: 412 suggestions — 71% accepted, 20% edited, 9% rejected.

When every step is complete, click Complete in the task panel.

E2E-17 — Change-to-Adoption

Goal: Drive sustained adoption and culture change

Starts when: Approved plan or new platform capability requiring adoption. **Ends with:** Sustained adoption reached with low-adoption groups reinforced.

Task UFT-17-01 — Assess change impact · done by Change Manager

Input: Approved plan → **Output:** Impact assessment

Step MP-19.1 — Assess change impact (Change Manager)

Type:

Row 1 — Change impact: AI shelf-life and spoilage prediction · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Change impact: Computer vision for foreign-body detection · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Change impact: AI demand planning for perishables · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Impact: Production & Food Safety supervisors high, operators medium, support functions low.

When every step is complete, click Complete in the task panel.

Task UFT-17-02 — Build adoption plan · done by Change Manager

Input: Impact assessment → **Output:** Adoption plan

Step MP-19.2 — Build adoption plan (Change Manager)

Type:

Row 1 — Adoption plan: Adoption plan — AI shelf-life and spoilage prediction · **Owner:** Sara Lahlou · **Start:** 2026-09-30 · **End:** 2026-10-30 · **Budget:** 75000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Adoption plan: Adoption plan — Computer vision for foreign-body detection · **Owner:** Soukaina Mansouri · **Start:** 2026-10-07 · **End:** 2026-11-06 · **Budget:** 23000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Adoption plan: sponsor message, 6 champions, weekly 15-minute huddles for 8 weeks.

When every step is complete, click Complete in the task panel.

Task UFT-17-03 — Launch communication campaign · done by Change Manager

Input: Adoption plan → **Output:** Campaign

Step MP-19.3 — Launch communication campaign (Change Manager)

Type:

Row 1 — Communication campaign: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-09-27

Row 2 — Communication campaign: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-10-04

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Campaign 'AI shelf-life and spoilage prediction — why it matters' on e-mail, intranet and screens.

When every step is complete, click Complete in the task panel.

Task UFT-17-04 — Open community space · done by Knowledge Manager

Input: Campaign → **Output:** Community space

Step MP-12.3 — Create community space (Knowledge Manager)

Type:

Row 1 — Community space: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Reda Mansouri · **Source:** Annual performance review

Row 2 — Community space: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Bennani · **Source:** Audit report

Then click Complete the step. The rows go to the register "Community space register".

Step MP-12.4 — Moderate community posts (Knowledge Manager)

Type:

Community posts: Community posts

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-10-19

Then click Complete the step.

Step MP-26.1 — Create learning cohort group (Knowledge Manager)

Type:

Row 1 — Learning cohort group: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Reda Mansouri · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Learning cohort group register".

Result to record in the task: Community space 'AI shelf-life and spoilage prediction Q&A' opened; moderation rules published.

When every step is complete, click Complete in the task panel.

Task UFT-17-05 — Track adoption usage · done by L&D Analyst

Input: Community space → **Output:** Usage indicators

Step MP-19.4 — Track adoption usage (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-08.5 — Monitor engagement indicators (L&D Analyst)

Type:

Row 1 — Engagement indicators: KPI-013 (Skill progression rate) · **Period:** 2026-Q1 · **Value:** 66 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Engagement indicators: KPI-014 (Report on-time delivery) · **Period:** 2026-Q2 · **Value:** 86 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Weekly active users: 64% of the target population.

When every step is complete, click Complete in the task panel.

Task UFT-17-06 — Identify low-adoption groups · done by Change Manager

Input: Usage indicators → **Output:** Low-adoption list

Step MP-19.5 — Identify low-adoption groups (Change Manager)

Type:

Row 1 — Low-adoption groups: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Anas Tazi · **Source:** Annual performance review

Row 2 — Low-adoption groups: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Mansouri · **Source:** Audit report

Then click Complete the step. The rows go to the register "Low-adoption groups register".

Result to record in the task: Low adoption confirmed for night shift (31%); one group rejected as false positive.

When every step is complete, click Complete in the task panel.

Task UFT-17-07 — Run reinforcement actions · done by Change Manager

Input: Low-adoption list → **Output:** Adoption dashboard

Step MP-19.6 — Run reinforcement actions (Change Manager)

Type:

Row 1 — Reinforcement actions: AI shelf-life and spoilage prediction — half-day workshop · **Date:** 2026-09-16 · **Trainer:** Atlas Formation Conseil · **Participants:** 12 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Reinforcement actions: Computer vision for foreign-body detection — half-day workshop · **Date:** 2026-09-23 · **Trainer:** Maghreb Learning Partners · **Participants:** 16 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-08.6 — Trigger re-engagement nudge (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Reinforcement: night-shift coaching sessions; adoption reached 58% after 4 weeks.

When every step is complete, click Complete in the task panel.

E2E-18 — Quality-Risk-Improvement

Goal: Improve processes and mitigate risk

Starts when: Risk logged, periodic quality review due or control test scheduled. **Ends with:** Risks mitigated, actions evaluated by a different person, controls rated.

Task UFT-18-01 — Log risk or opportunity · done by Quality Manager

Input: Issue or signal → **Output:** Risk register entry

Step MP-20.1 — Log risk or opportunity (Quality Manager)

Type:

Row 1 — Risk or opportunity: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Bennani · **Source:** Audit report

Row 2 — Risk or opportunity: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Ghita Amrani · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Risk or opportunity register".

Result to record in the task: Risk 'Trainers unavailable in Q3': likelihood 3, impact 4, score 12.

When every step is complete, click Complete in the task panel.

Task UFT-18-02 — Assign mitigation action · done by Quality Manager

Input: Risk register entry → **Output:** Mitigation action

Step MP-20.2 — Assign mitigation action (Quality Manager)

Type:

Row 1 — Role: Compliance Officer / DPO · **Mitigation action:** AI shelf-life and spoilage prediction · **Person:** Ghita Amrani · **Allocation (%):** 100 · **Start:** 2026-09-28 · **Holder type:** Holder

Row 2 — Role: Consultant (PM / Partner) · **Mitigation action:** Computer vision for foreign-body detection · **Person:** Adil Alaoui · **Allocation (%):** 50 · **Start:** 2026-10-05 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Result to record in the task: Action: contract a second vendor; owner Purchasing Officer; evaluator Quality Manager.

When every step is complete, click Complete in the task panel.

Task UFT-18-03 — Execute improvement action · done by Action Owner

Input: Mitigation action → **Output:** Executed action

Step MP-20.3 — Execute improvement action (Action Owner)

Type:

Row 1 — Improvement action: AI shelf-life and spoilage prediction — half-day workshop · **Date:** 2026-10-20 · **Trainer:** Atlas Formation Conseil · **Participants:** 18 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Improvement action: Computer vision for foreign-body detection — half-day workshop · **Date:** 2026-10-27 · **Trainer:** Maghreb Learning Partners · **Participants:** 20 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Action done: framework contract signed with vendor B; evidence attached.

When every step is complete, click Complete in the task panel.

Task UFT-18-04 — Evaluate action effectiveness · done by Action Evaluator

Input: Executed action → **Output:** Effectiveness verdict

Step MP-20.4 — Evaluate action effectiveness (Action Evaluator)

Type:

Row 1 — Action effectiveness: AI shelf-life and spoilage prediction · **Criterion:** Feasibility · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Action effectiveness: Computer vision for foreign-body detection · **Criterion:** Cost · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Action effectiveness: AI demand planning for perishables · **Criterion:** Risk · **Weight (%):** 20 · **Score (1–5):** 4 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Verdict: effective. The evaluator is a different user from the owner.

When every step is complete, click Complete in the task panel.

Task UFT-18-05 — Review access and security · done by IT Architect

Input: Security logs → **Output:** Access review

Step MP-17.4 — Review access violation log (IT Architect)

Type:

Access violation log: Access violation log

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-10-08

Then click Complete the step.

Step MP-17.6 — Enforce login rate limit (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-17.2 — Assign roles to user (Platform Administrator)

Type:

Row 1 — Role: Consultant (PM / Partner) · **Roles to user:** AI shelf-life and spoilage prediction · **Person:** Ghita Amrani · **Allocation (%):** 100 · **Start:** 2026-09-06 · **Holder type:** Holder

Row 2 — Role: Platform Administrator · **Roles to user:** Computer vision for foreign-body detection · **Person:** Adil Alaoui · **Allocation (%):** 50 · **Start:** 2026-09-13 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Step MP-17.3 — Edit permission matrix (Platform Administrator)

Type:

Permission matrix: Permission matrix

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-10-08

Then click Complete the step.

Step MP-17.5 — Issue signed session token (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Access review: 2 dormant accounts disabled; 0 cross-tenant attempts.

When every step is complete, click Complete in the task panel.

Task UFT-18-06 — Run periodic quality review · done by Quality Manager

Input: Access review → **Output:** Quality review minutes

Step MP-20.5 — Run periodic quality review (Quality Manager)

Type:

Row 1 — Periodic quality review: AI shelf-life and spoilage prediction — half-day workshop · **Date:** 2026-09-28 · **Trainer:** Atlas Formation Conseil · **Participants:** 18 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Periodic quality review: Computer vision for foreign-body detection — half-day workshop · **Date:** 2026-10-05 · **Trainer:** Maghreb Learning Partners · **Participants:** 15 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-09.7 — Review evaluation results (L&D Analyst)

Type:

Evaluation results: Evaluation results

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-09-12

Then click Complete the step.

Result to record in the task: Quality review minutes: 3 KPIs red, 2 actions opened, next review in 30 days.

When every step is complete, click Complete in the task panel.

Task UFT-18-07 — Update control effectiveness · done by Quality Manager

Input: Quality review minutes → **Output:** Governance register & risk heat-map

Step MP-20.6 — Update control effectiveness rating (Quality Manager)

Type:

Control effectiveness rating: Control effectiveness rating

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-09-21

Then click Complete the step.

Result to record in the task: Control CTRL-002 effectiveness: Effective; CTRL-031: Partially effective.

When every step is complete, click Complete in the task panel.

Phase 1 — Scope & evidence

E2E-32 — Scope-of-Work-to-Engineering-Plan

Goal: Define and approve the structured scope of work and stakeholder register

Starts when: New training engineering engagement, annual plan cycle, or executive request.
Ends with: Approved Scope of Work with criteria matrix and stakeholder register released to questionnaire design (E2E-33) and needs analysis (E2E-03).

Task UFT-32-01 — Define scope frame · done by Head of L&D

Input: Engagement request → **Output:** Scope frame

Step MP-53.1 — Define scope frame (Group Yes/No) (Head of L&D)

Type:

Row 1 — Scope frame (Group Yes/No): AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Hajji · **Source:** Questionnaire results

Row 2 — Scope frame (Group Yes/No): Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Anas Tazi · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Scope frame (Group Yes/No) register".

Step MP-53.2 — Select Organization (Head of L&D)

Type:

Decision: Approved

Organization: Organization

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-04-17

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: Group scope: No. Organization: Coopérative Laitière Al Baraka.

When every step is complete, click Complete in the task panel.

Task UFT-32-02 — Select sector · done by L&D Analyst

Input: Sector reference list → **Output:** Sector

Step MP-53.3 — Select sector (L&D Analyst)

Type:

Decision: Approved

Sector: Sector

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-04-26

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: Sector: Food & Beverage.

When every step is complete, click Complete in the task panel.

Task UFT-32-03 — Select decision levels · done by L&D Analyst

Input: MS/MO/OP framework → **Output:** Decision levels

Step MP-53.4 — Select decision level (MS/MO/OP/Custom) (L&D Analyst)

Type:

Decision: Approved with conditions

Decision level (MS/MO/OP/Custom): Decision level (MS/MO/OP/Custom)

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2027-05-05

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: Decision levels: MS, MO, OP (no custom level).

When every step is complete, click Complete in the task panel.

Task UFT-32-04 — Map functions × decision levels · done by L&D Analyst

Input: Job architecture → **Output:** Criteria matrix

Step MP-53.5 — Map functions × decision level (L&D Analyst)

Type:

Row 1 — Functions × decision level: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Sara Lahlou · **Source:** HRIS export

Row 2 — Functions × decision level: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Soukaina Mansouri · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Functions × decision level register".

Result to record in the task: Matrix: Production & Food Safety × MS/MO/OP; Quality × MO/OP; Finance × MS/MO; HR × MS/MO.

When every step is complete, click Complete in the task panel.

Task UFT-32-05 — Select focus and add custom criteria · done by Head of L&D

Input: Strategic objectives → **Output:** Focus and custom criteria

Step MP-53.6 — Select focus (All/Digital/AI/Custom) (Head of L&D)

Type:

Decision: Approved

Focus (All/Digital/AI/Custom): Focus (All/Digital/AI/Custom)

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-04-18

Decided by: Karim Hajji

Then click Complete the step.

Step MP-53.7 — Add custom criteria (Consultant PM)

Type:

Row 1 — Custom criteria: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Soukaina Mansouri · **Source:** Interview with the function head

Row 2 — Custom criteria: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Reda Mansouri · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Custom criteria register".

Result to record in the task: Focus: AI. Custom criterion: 'Readiness for AI shelf-life and spoilage prediction' (weight 2.00).

When every step is complete, click Complete in the task panel.

Task UFT-32-06 — Identify stakeholders · done by HR Business Partner

Input: Employee directory → **Output:** Stakeholder list

Step MP-53.8 — Identify stakeholders (HR Business Partner)

Type:

Row 1 — Stakeholders: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Reda Mansouri · **Source:** Questionnaire results

Row 2 — Stakeholders: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Bennani · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Stakeholders register".

Result to record in the task: Register 40 stakeholders: name, role, function, level, site, preferred channel (Email, Face-to-Face or Hybrid).

When every step is complete, click Complete in the task panel.

Task UFT-32-07 — Validate scope · done by Head of L&D

Input: Draft scope → **Output:** Validated scope

Step MP-53.9 — Validate and approve scope (HR Director)

Type:

Decision: Approved

Approve scope: Approve scope

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-05-06

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: Validation: every function in scope has at least 3 stakeholders; completeness 100%.

When every step is complete, click Complete in the task panel.

Task UFT-32-08 — Approve scope · done by HR Director / Consultant PM

Input: Validated scope → **Output:** Approved Scope of Work

Step MP-53.9 — Validate and approve scope (HR Director)

Type:

Decision: Approved with conditions

Approve scope: Approve scope

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2027-05-15

Decided by: Karim Hajji

Then click Complete the step.

Step MP-53.10 — Publish scope and register stakeholders (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Approval status: Approved (version 1). Justification: scope aligned with SO-1 and SO-2.

When every step is complete, click Complete in the task panel.

Task UFT-32-09 — Publish scope and register stakeholders · done by L&D Analyst

Input: Approved Scope of Work → **Output:** Published SOW and stakeholder register

Step MP-53.10 — Publish scope and register stakeholders (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Generate the SOW document (RPT-033) and release scope and stakeholders to the questionnaire studio.

When every step is complete, click Complete in the task panel.

E2E-33 — Questionnaire-to-Response-Collection

Goal: Design, distribute and collect questionnaire responses across channels

Starts when: An approved Scope of Work becomes available (end of E2E-32). **Ends with:** Consolidated, validated questionnaire response dataset feeding needs analysis (E2E-03), diagnostic (E2E-20) and demand collection (E2E-27).

Task UFT-33-01 — Select questionnaire template · done by L&D Analyst

Input: Approved SOW → **Output:** Selected template

Step MP-54.1 — Select questionnaire template by focus (L&D Analyst)

Type:

Decision: Approved

Questionnaire template by focus: Questionnaire template by focus

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-04-28

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: Template: 'AI needs — Food & Beverage' in the user's language, 5 sections.

When every step is complete, click Complete in the task panel.

Task UFT-33-02 — Elaborate questionnaire · done by L&D Analyst

Input: Template, AI prompts → **Output:** Draft questionnaire

Step MP-54.2 — Elaborate questionnaire (Load/AI/Manual) (L&D Analyst)

Type:

Row 1 — Questionnaire (Load/AI/Manual): Questionnaire (Load/AI/Manual) — AI shelf-life and spoilage prediction · **Owner:** Soukaina Ziani · **Start:** 2027-04-30 · **End:** 2027-05-30 · **Budget:** 51000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Questionnaire (Load/AI/Manual): Questionnaire (Load/AI/Manual) — Computer vision for foreign-body detection · **Owner:** Karim Hajji · **Start:** 2027-05-07 · **End:** 2027-06-06 · **Budget:** 30000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Elaboration mode: AI. 24 questions generated from the approved Scope of Work.

When every step is complete, click Complete in the task panel.

Task UFT-33-03 — Tailor and validate content · done by L&D Analyst

Input: Draft questionnaire → **Output:** Validated questionnaire

Step MP-54.3 — Tailor to sector and focus (L&D Analyst)

Type:

Row 1 — Sector and focus: Sector and focus — AI shelf-life and spoilage prediction · **Owner:** Karim Hajji · **Start:** 2027-05-02 · **End:** 2027-06-01 · **Budget:** 28000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Sector and focus: Sector and focus — Computer vision for foreign-body detection · **Owner:** Anas Tazi · **Start:** 2027-05-09 · **End:** 2027-06-08 · **Budget:** 35000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Validate each question; reword 5 with Production & Food Safety vocabulary; delete 2 duplicates.

When every step is complete, click Complete in the task panel.

Task UFT-33-04 — Allocate RACSI · done by Head of L&D

Input: Validated questionnaire → **Output:** RACSI allocation

Step MP-54.4 — Allocate RACSI per section (Head of L&D)

Type:

Row 1 — RACSI per section: RACSI per section — AI shelf-life and spoilage prediction · **Owner:** Anas Tazi · **Start:** 2027-05-04 · **End:** 2027-06-03 · **Budget:** 43000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — RACSI per section: RACSI per section — Computer vision for foreign-body detection · **Owner:** Karim Mansouri · **Start:** 2027-05-11 · **End:** 2027-06-10 · **Budget:** 55000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Section 'Digital practices': R L&D Analyst, A Head of L&D, C Consultant PM, S IT, I CHRO (one Accountable only).

When every step is complete, click Complete in the task panel.

Task UFT-33-05 — Select distribution channels · done by Survey Administrator

Input: Stakeholder register → **Output:** Channel plan

Step MP-54.5 — Select distribution channels (L&D Analyst)

Type:

Decision: Approved

Distribution channels: Distribution channels

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-04-29

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: Channels: MS and MO by Email; OP Face-to-Face with tablets; night shift Hybrid.

When every step is complete, click Complete in the task panel.

Task UFT-33-06 — Distribute questionnaire · done by Survey Administrator

Input: Channel plan → **Output:** Dispatch log

Step MP-54.6 — Distribute to stakeholders (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Distribute to 40 stakeholders; 40 dispatches logged.

When every step is complete, click Complete in the task panel.

Task UFT-33-07 — Send reminders · done by Survey Administrator

Input: Dispatch log → **Output:** Reminder log

Step MP-54.7 — Send reminders on cadence (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Reminder 1 on day 5 to 17 non-respondents; reminder 2 on day 10 to 8.

When every step is complete, click Complete in the task panel.

Task UFT-33-08 — Collect responses · done by Stakeholders

Input: Questionnaire → **Output:** Raw responses

Step MP-54.8 — Collect responses (Stakeholder)

Type:

Row 1 — Responses: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Reda Mansouri · **Source:** Annual performance review

Row 2 — Responses: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Karim Bennani · **Source:** Audit report

Then click Complete the step. The rows go to the register "Responses register".

Result to record in the task: Responses: 34 collected (22 online, 12 offline synchronised).

When every step is complete, click Complete in the task panel.

Task UFT-33-09 — Validate completeness · done by L&D Analyst

Input: Raw responses → **Output:** Validated responses

Step MP-54.9 — Validate completeness and consent (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Completeness: 31 complete, 3 incomplete flagged.

When every step is complete, click Complete in the task panel.

Task UFT-33-10 — Consolidate responses · done by L&D Analyst

Input: Validated responses → **Output:** Consolidated dataset

Step MP-54.10 — Consolidate responses (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Consolidated dataset: 31 responses, 24 questions, by function and level.

When every step is complete, click Complete in the task panel.

Task UFT-33-11 — Check consent and release dataset · done by L&D Analyst

Input: Consolidated dataset → **Output:** Released dataset

Step MP-54.11 — Feed responses to needs analysis and diagnostic (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-54.12 — Report on response rate and engagement (L&D Analyst)

Type:

Row 1 — On response rate and engagement: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-05-13

Row 2 — On response rate and engagement: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and

their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-05-20

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Consent given for 31 of 31 stored responses; release to needs analysis, diagnostic and demand collection.

When every step is complete, click Complete in the task panel.

Task UFT-33-12 — Report on response and engagement · done by L&D Analyst

Input: Dispatch and response logs → **Output:** Response analytics report

Step MP-54.12 — Report on response rate and engagement (L&D Analyst)

Type:

Row 1 — On response rate and engagement: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-05-15

Row 2 — On response rate and engagement: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-05-22

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Response rate 85%; engagement rate 78%; completeness 91% (RPT-034).

When every step is complete, click Complete in the task panel.

E2E-19 — Consulting Engagement-to-Closure

Goal: Manage full consulting engagement lifecycle

Starts when: Client purchase order or engagement request received. **Ends with:** Engagement closed with client acceptance and REX recorded.

Task UFT-19-01 — Register engagement and purchase order · done by Consultant PM

Input: Client purchase order → **Output:** Engagement record

Step MP-36.1 — Register engagement and purchase order (Consultant PM)

Type:

Row 1 — Engagement and purchase order: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Soukaina Ziani · **Source:** Annual performance review

Row 2 — Engagement and purchase order: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Karim Hajji · **Source:** Audit report

Then click Complete the step. The rows go to the register "Engagement and purchase order register".

Result to record in the task: Engagement 'Training engineering 2026 — Coopérative Laitière Al Baraka', PO-CL-221, 45 consulting days.

When every step is complete, click Complete in the task panel.

Task UFT-19-02 — Hold kickoff meeting · done by Consultant PM

Input: Engagement record → **Output:** Kickoff held

Step MP-36.2 — Hold kickoff meeting (Consultant PM)

Type:

Row 1 — Kickoff meeting: AI shelf-life and spoilage prediction — half-day workshop · **Date:** 2026-10-26 · **Trainer:** Atlas Formation Conseil · **Participants:** 16 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Kickoff meeting: Computer vision for foreign-body detection — half-day workshop · **Date:** 2026-11-02 · **Trainer:** Maghreb Learning Partners · **Participants:** 16 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Kickoff held on 10 February with HR Director, Head of L&D and 4 function heads.

When every step is complete, click Complete in the task panel.

Task UFT-19-03 — Draft meeting minutes · done by Consultant PM

Input: Kickoff held → **Output:** Meeting minutes

Step MP-36.3 — Draft meeting minutes (Consultant PM)

Type:

Row 1 — Meeting minutes: Meeting minutes — AI shelf-life and spoilage prediction · **Owner:** Anas Tazi · **Start:** 2026-10-18 · **End:** 2026-11-17 · **Budget:** 33000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Meeting minutes: Meeting minutes — Computer vision for foreign-body detection · **Owner:** Karim Mansouri · **Start:** 2026-10-25 · **End:** 2026-11-24 · **Budget:** 68000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Review the AI minutes: 6 decisions, 9 actions, RACSI extracted; correct 1 owner name.

When every step is complete, click Complete in the task panel.

Task UFT-19-04 — Align with client strategy · done by Consultant PM

Input: Meeting minutes → **Output:** Strategic alignment

Step MP-01.1 — Record corporate strategic objectives (Head of L&D)

Type:

Row 1 — Corporate strategic objectives: Raise AI shelf-life and spoilage prediction proficiency of Operator — Production & Food Safety teams to level 3 · **Indicator:** KPI-017 (IDP coverage) · **Baseline:** 42 % · **Target:** 87 % · **Deadline:** 2027-04-08 · **Owner:** Karim Mansouri

Row 2 — Corporate strategic objectives: Certify Supervisor — Production & Food Safety staff on Computer vision for foreign-body detection · **Indicator:** KPI-018 (Mandatory certification compliance) · **Baseline:** 47 % · **Target:** 83 % · **Deadline:** 2027-04-15 · **Owner:** Sara Lahlou

Row 3 — Corporate strategic objectives: Cut onboarding time on AI demand planning for perishables by 30 % · **Indicator:** KPI-019 (Vendor invoice match rate) · **Baseline:** 35 % · **Target:** 82 % · **Deadline:** 2027-04-22 · **Owner:** Soukaina Mansouri

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-01.2 — Link objectives to functions and sites (L&D Strategist)

Type:

Row 1 — Objectives to functions and sites: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Karim Mansouri · **Source:** Interview with the function head

Row 2 — Objectives to functions and sites: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Sara Lahlou · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Objectives to functions and sites register".

Result to record in the task: Client objectives recorded: AI shelf-life and spoilage prediction and HACCP compliance for Production & Food Safety.

When every step is complete, click Complete in the task panel.

Task UFT-19-05 — Plan engagement work breakdown · done by Consultant PM

Input: Strategic alignment → **Output:** Engagement WBS

Step MP-36.4 — Plan engagement work breakdown (Consultant PM)

Type:

Row 1 — Engagement work breakdown: Engagement work breakdown — AI shelf-life and spoilage prediction · **Owner:** Sara Lahlou · **Start:** 2026-10-22 · **End:** 2026-11-21 · **Budget:** 65000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Engagement work breakdown: Engagement work breakdown — Computer vision for foreign-body detection · **Owner:** Soukaina Mansouri · **Start:** 2026-10-29 · **End:** 2026-11-28 · **Budget:** 39000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: WBS: 6 phases, 14 deliverables, Gantt from February to November.

When every step is complete, click Complete in the task panel.

Task UFT-19-06 — Plan change support · done by Change Manager

Input: Engagement WBS → **Output:** Change plan

Step MP-19.1 — Assess change impact (Change Manager)

Type:

Row 1 — Change impact: AI shelf-life and spoilage prediction · **Criterion:** Cost · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Change impact: Computer vision for foreign-body detection · **Criterion:** Risk · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Change impact: AI demand planning for perishables · **Criterion:** Business impact · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-19.2 — Build adoption plan (Change Manager)

Type:

Row 1 — Adoption plan: Adoption plan — AI shelf-life and spoilage prediction · **Owner:** Soukaina Mansouri · **Start:** 2026-10-24 · **End:** 2026-11-23 · **Budget:** 47000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Adoption plan: Adoption plan — Computer vision for foreign-body detection · **Owner:** Reda Mansouri · **Start:** 2026-10-31 · **End:** 2026-11-30 · **Budget:** 38000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Change plan: 3 sponsor messages, champion network, 2 town-halls.

When every step is complete, click Complete in the task panel.

Task UFT-19-07 — Track engagement deliverables · done by Consultant PM

Input: Change plan → **Output:** Deliverable tracker

Step MP-36.5 — Track engagement deliverables (Consultant PM)

Type:

Row 1 — Engagement deliverables: KPI-020 (Integration synchronisation success rate) · **Period:** 2026-Q1 · **Value:** 76 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Engagement deliverables: KPI-001 (Strategic objective coverage) · **Period:** 2026-Q2 · **Value:** 72 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-20.5 — Run periodic quality review (Quality Manager)

Type:

Row 1 — Periodic quality review: AI shelf-life and spoilage prediction — half-day workshop · **Date:** 2026-11-05 · **Trainer:** Atlas Formation Conseil · **Participants:** 13 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Periodic quality review: Computer vision for foreign-body detection — half-day workshop · **Date:** 2026-11-12 · **Trainer:** Maghreb Learning Partners · **Participants:** 11 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Deliverables: 9 of 14 delivered on time, 1 late (SWOT), 4 planned.

When every step is complete, click Complete in the task panel.

Task UFT-19-08 — Deliver final report and obtain acceptance · done by Consultant PM

Input: Deliverable tracker → **Output:** Client acceptance

Step MP-36.6 — Deliver final report (Consultant PM)

Type:

Row 1 — Final report: AI shelf-life and spoilage prediction — half-day workshop · **Date:** 2026-11-07 · **Trainer:** Atlas Formation Conseil · **Participants:** 20 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Final report: Computer vision for foreign-body detection — half-day workshop · **Date:** 2026-11-14 · **Trainer:** Maghreb Learning Partners · **Participants:** 11 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-36.7 — Obtain client acceptance (HR Director)

Type:

Row 1 — Client acceptance: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Karim Bennani · **Source:** HRIS export

Row 2 — Client acceptance: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Ghita Amrani · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Client acceptance register".

Result to record in the task: Final report delivered; acceptance signed by the HR Director on 28 November.

When every step is complete, click Complete in the task panel.

Task UFT-19-09 — Record engagement REX · done by Consultant PM

Input: Client acceptance → **Output:** Engagement REX

Step MP-36.8 — Record engagement REX (Consultant PM)

Type:

Row 1 — Engagement REX: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Ghita Amrani · **Source:** Interview with the function head

Row 2 — Engagement REX: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Adil Alaoui · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Engagement REX register".

Step MP-12.6 — Record REX entry (L&D Business Partner)

Type:

Row 1 — REX entry: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Ghita Amrani · **Source:** Interview with the function head

Row 2 — REX entry: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Adil Alaoui · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "REX entry register".

Step MP-12.5 — Prompt REX at closure (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: REX: went well — stakeholder register; did not — late SWOT inputs; root cause — no function-head backup; rating 4/5.

When every step is complete, click Complete in the task panel.

E2E-24 — Competitive Intelligence-to-Strategy

Goal: Analyze external environment and feed L&D strategy

Starts when: Annual strategy cycle or executive request for market positioning analysis.
Ends with: Validated competitive intelligence report feeding into L&D strategy and organizational diagnostic.

Task UFT-24-01 — Define intelligence scope · done by Strategy Analyst

Input: Strategy docs → **Output:** Scope document

Step MP-43.1 — Define intelligence scope (Strategy Analyst)

Type:

Row 1 — Intelligence scope: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Reda Mansouri · **Source:** Questionnaire results

Row 2 — Intelligence scope: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Karim Bennani · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Intelligence scope register".

Result to record in the task: Scope: Food & Beverage market in Morocco and export markets; horizon 3 years; focus on AI shelf-life and spoilage prediction and Computer vision for foreign-body detection.

When every step is complete, click Complete in the task panel.

Task UFT-24-02 — Conduct Porter's Five Forces · done by Strategy Analyst

Input: Market data → **Output:** Porter report

Step MP-43.2 — Conduct Porter's Five Forces analysis (Strategy Analyst)

Type:

Row 1 — Porter's Five Forces analysis: AI shelf-life and spoilage prediction — half-day workshop · **Date:** 2027-01-12 · **Trainer:** Atlas Formation Conseil · **Participants:** 17 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Porter's Five Forces analysis: Computer vision for foreign-body detection — half-day workshop · **Date:** 2027-01-19 · **Trainer:** Maghreb Learning Partners · **Participants:** 18 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Rivalry 4/5; new entrants 3/5; substitutes 2/5; supplier power 3/5; buyer power 4/5.

When every step is complete, click Complete in the task panel.

Task UFT-24-03 — Map market segments · done by Market Analyst

Input: Market data → **Output:** Segment map

Step MP-43.3 — Map market segments (Market Analyst)

Type:

Row 1 — Market segments: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Ghita Amrani · **Source:** Audit report

Row 2 — Market segments: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Adil Alaoui · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Market segments register".

Result to record in the task: Segments: key accounts (55% revenue), resellers (30%), direct small customers (15%).

When every step is complete, click Complete in the task panel.

Task UFT-24-04 — Analyze competitor positioning · done by Market Analyst

Input: Competitor data → **Output:** Competitor benchmark

Step MP-43.4 — Analyze competitor positioning (Market Analyst)

Type:

Row 1 — Competitor positioning: AI shelf-life and spoilage prediction · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Competitor positioning: Computer vision for foreign-body detection · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Competitor positioning: AI demand planning for perishables · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 3 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Competitor A leads on AI shelf-life and spoilage prediction; competitor B cheaper but weaker on HACCP.

When every step is complete, click Complete in the task panel.

Task UFT-24-05 — Monitor regulatory and technology trends · done by Regulatory Analyst

Input: Regulations → **Output:** Trend report

Step MP-43.5 — Monitor regulatory changes (Regulatory Analyst)

Type:

Row 1 — Regulatory changes: KPI-017 (IDP coverage) · **Period:** 2026-Q2 · **Value:** 88 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — Regulatory changes: KPI-018 (Mandatory certification compliance) · **Period:** 2026-Q3 · **Value:** 82 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-43.6 — Track technology trends (Strategy Analyst)

Type:

Row 1 — Technology trends: KPI-017 (IDP coverage) · **Period:** 2026-Q2 · **Value:** 70 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Technology trends: KPI-018 (Mandatory certification compliance) · **Period:** 2026-Q3 · **Value:** 66 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-43.7 — Benchmark against industry (Strategy Analyst)

Type:

Row 1 — Against industry: AI shelf-life and spoilage prediction · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Against industry: Computer vision for foreign-body detection · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Against industry: AI demand planning for perishables · **Criterion:** Cost · **Weight (%):** 20 · **Score (1–5):** 2 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Trends: revision of HACCP expected next year; fast growth of AI demand planning for perishables.

When every step is complete, click Complete in the task panel.

Task UFT-24-06 — Identify L&D implications · done by L&D Strategist

Input: All findings → **Output:** L&D implications

Step MP-43.8 — Identify strategic implications for L&D (L&D Strategist)

Type:

Row 1 — Strategic implications for L&D: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Soukaina Ziani · **Source:** Questionnaire results

Row 2 — Strategic implications for L&D: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Karim Hajji · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Strategic implications for L&D register".

Result to record in the task: L&D implication: build AI shelf-life and spoilage prediction skills for key-account teams before competitor A scales.

When every step is complete, click Complete in the task panel.

Task UFT-24-07 — Publish intelligence report · done by Strategy Analyst

Input: All outputs → **Output:** Intelligence report

Step MP-43.9 — Produce intelligence report (Strategy Analyst)

Type:

Row 1 — Intelligence report: Intelligence report — AI shelf-life and spoilage prediction · **Owner:** Karim Hajji · **Start:** 2027-01-12 · **End:** 2027-02-11 · **Budget:** 70000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Intelligence report: Intelligence report — Computer vision for foreign-body detection · **Owner:** Anas Tazi · **Start:** 2027-01-19 · **End:** 2027-02-18 · **Budget:** 21000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-43.10 — Feed intelligence into strategy and diagnostic (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-43.11 — Update intelligence continuously (Strategy Analyst)

Type:

Intelligence continuously: Intelligence continuously

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-01-27

Then click Complete the step.

Step MP-43.12 — Report to executive leadership (Head of Strategy)

Type:

Row 1 — Executive leadership: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-01-07

Row 2 — Executive leadership: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-01-14

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish RPT-007 Competitive Intelligence Report to the executive committee.

When every step is complete, click Complete in the task panel.

SME-E2E-01 — SME Snapshot-to-Plan in 30 days

Goal: Turn a one-day needs snapshot into a short, funded plan.

Starts when: SME onboarding started. **Ends with:** Short plan approved by the owner-manager.

Task UFT-SME1-01 — Interview the owner-manager · done by Head of L&D

Input: Owner-manager input → **Output:** Record priorities, key roles and headcount.

Step SME-MP-01.1 — Record business priorities (Head of L&D)

Type:

Row 1 — Business priorities: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Mansouri · **Source:** Interview with the function head

Row 2 — Business priorities: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Sara Lahlou · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Business priorities register".

Step SME-MP-01.2 — Record key roles and headcount (HR Business Partner)

Type:

Row 1 — Key roles and headcount: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Mansouri · **Source:** Interview with the function head

Row 2 — Key roles and headcount: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Sara Lahlou · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Key roles and headcount register".

Result to record in the task: Priorities: win 2 new customers; reduce rework. Headcount SME: owner, 3 team leaders, operators.

When every step is complete, click Complete in the task panel.

Task UFT-SME1-02 — Send the needs snapshot · done by L&D Analyst

Input: Owner-manager input → **Output:** Send the short questionnaire to all employees.

Step SME-MP-01.3 — Send short needs questionnaire (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-54.6 — Distribute to stakeholders (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Send the 10-question snapshot to all employees by WhatsApp link or paper.

When every step is complete, click Complete in the task panel.

Task UFT-SME1-03 — Summarize top needs · done by L&D Analyst

Input: Owner-manager input → **Output:** Review the AI summary of the top five needs.

Step SME-MP-01.4 — Summarize top needs (L&D Analyst)

Type:

Row 1 — Top needs: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Soukaina Mansouri · **Source:** Annual performance review

Row 2 — Top needs: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Reda Mansouri · **Source:** Audit report

Then click Complete the step. The rows go to the register "Top needs register".

Result to record in the task: Top needs: AI shelf-life and spoilage prediction; Computer vision for foreign-body detection; customer service. Accept the AI summary.

When every step is complete, click Complete in the task panel.

Task UFT-SME1-04 — Approve the short plan · done by HR Director

Input: Owner-manager input → **Output:** Owner-manager approves the short plan.

Step MP-53.9 — Validate and approve scope (HR Director)

Type:

Decision: Approved with conditions

Approve scope: Approve scope

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2027-06-24

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: Short plan approved: 3 themes, 6 training days, 45,000 MAD.

When every step is complete, click Complete in the task panel.

Gate G1 — G1 — Scope & evidence approved: close the phase

2. Open the project workspace and click the gate button of the phase.
2. Tick each checklist item once its evidence is attached, then click Submit for decision.
2. Click Go. Type the justification: All mandatory items met; evidence attached.
2. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

Phase 2 — Diagnosis

E2E-20 — Multi-Axis Diagnostic-to-Maturity Report

Goal: Conduct 5-axis diagnostic + CMM maturity + leadership assessment

Starts when: Engagement kickoff or approved Scope of Work requesting a diagnostic. **Ends with:** 5-axis diagnostic, CMM maturity and leadership maturity report validated with the sponsor.

Task UFT-20-01 — Define diagnostic axes and sample · done by Consultant PM

Input: Approved Scope of Work → **Output:** Axes and sample

Step MP-37.1 — Define diagnostic axes and sample (Consultant PM)

Type:

Row 1 — Diagnostic axes and sample: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Adil Alaoui · **Source:** Questionnaire results

Row 2 — Diagnostic axes and sample: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Imane Hajji · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Diagnostic axes and sample register".

Result to record in the task: Axes: strategy, organization, processes, people, information systems. Sample: 40 people (MS 8, MO 16, OP 16).

When every step is complete, click Complete in the task panel.

Task UFT-20-02 — Deploy diagnostic questionnaire · done by Consultant PM

Input: Axes and sample → **Output:** Questionnaire responses

Step MP-37.2 — Deploy diagnostic questionnaire (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-37.4 — Collect questionnaire responses (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Diagnostic questionnaire deployed to 40 people; 34 responses (85%).

When every step is complete, click Complete in the task panel.

Task UFT-20-03 — Conduct semi-structured interviews · done by Consultant

Input: Axes and sample → **Output:** Interview findings

Step MP-37.3 — Conduct semi-structured interviews (Consultant)

Type:

Row 1 — Semi-structured interviews: AI shelf-life and spoilage prediction — half-day workshop · **Date:** 2026-11-15 · **Trainer:** Atlas Formation Conseil · **Participants:** 17 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Semi-structured interviews: Computer vision for foreign-body detection — half-day workshop · **Date:** 2026-11-22 · **Trainer:** Maghreb Learning Partners · **Participants:** 18 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Interview notes (OP, Production & Food Safety): 'Procedures exist but are not updated since 2023.'

When every step is complete, click Complete in the task panel.

Task UFT-20-04 — Score diagnostic axes · done by Consultant

Input: Interview findings, responses → **Output:** Axis scores

Step MP-37.5 — Score diagnostic axes (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Axis scores (1-5): strategy 3.4, organization 2.8, processes 2.6, people 3.1, IS 2.2.

When every step is complete, click Complete in the task panel.

Task UFT-20-05 — Select maturity model · done by Consultant

Input: Axis scores → **Output:** Maturity model

Step MP-38.1 — Select maturity model levels (Consultant)

Type:

Decision: Approved

Maturity model levels: Maturity model levels

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2026-11-09

Decided by: Karim Hajji

Then click Complete the step.

Step MP-38.2 — Define evidence criteria per level (Consultant)

Type:

Row 1 — Evidence criteria per level: Raise AI shelf-life and spoilage prediction proficiency of Operator — Production & Food Safety teams to level 3 · **Indicator:** KPI-007 (Content publication lead time) · **Baseline:** 43 % · **Target:** 76 % · **Deadline:** 2027-04-28 · **Owner:** Anas Tazi

Row 2 — Evidence criteria per level: Certify Supervisor — Production & Food Safety staff on Computer vision for foreign-body detection · **Indicator:** KPI-008 (Session fill rate) · **Baseline:** 31 % · **Target:** 73 % · **Deadline:** 2027-05-05 · **Owner:** Karim Mansouri

Row 3 — Evidence criteria per level: Cut onboarding time on AI demand planning for perishables by 30 % · **Indicator:** KPI-009 (Plan realization rate) · **Baseline:** 44 % · **Target:** 75 % · **Deadline:** 2027-05-12 · **Owner:** Sara Lahlou

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Maturity model: CMM 5 levels; evidence for level 3 = documented and applied process.

When every step is complete, click Complete in the task panel.

Task UFT-20-06 — Rate process maturity · done by Consultant

Input: Maturity model → **Output:** Maturity profile

Step MP-38.3 — Rate maturity per process area (Consultant)

Type:

Row 1 — Maturity per process area: AI shelf-life and spoilage prediction · **Criterion:** Feasibility · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Maturity per process area: Computer vision for foreign-body detection · **Criterion:** Cost · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Maturity per process area: AI demand planning for perishables · **Criterion:** Risk · **Weight (%):** 20 · **Score (1–5):** 4 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-38.4 — Compute maturity profile (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Maturity: training management level 2; Production & Food Safety processes level 3.

When every step is complete, click Complete in the task panel.

Task UFT-20-07 — Assess leadership maturity · done by HR Business Partner

Input: Maturity profile → **Output:** Leadership maturity

Step MP-42.1 — Launch leadership 360 assessment (HR Business Partner)

Type:

Row 1 — Leadership 360 assessment: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-11-08

Row 2 — Leadership 360 assessment: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-11-15

Then click Complete the step. The rows go to the register "Communications log".

Step MP-42.2 — Compute leadership maturity level (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Leadership 360: average level 3 (Team Leadership) across 18 managers.

When every step is complete, click Complete in the task panel.

Task UFT-20-08 — Cross-check skills and needs · done by L&D Analyst

Input: Leadership maturity → **Output:** Consolidated evidence

Step MP-02.7 — Validate skills inventory (Head of L&D)

Type:

Decision: Approved with conditions

Skills inventory: Skills inventory

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2026-12-06

Decided by: Karim Hajji

Then click Complete the step.

Step MP-03.2 — Review gap matrix by site and function (L&D Analyst)

Type:

Gap matrix by site and function: Gap matrix by site and function

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-12-07

Then click Complete the step.

Result to record in the task: Cross-check: IS axis weakness confirmed by the AI shelf-life and spoilage prediction gap (-1.4).

When every step is complete, click Complete in the task panel.

Task UFT-20-09 — Draft diagnostic findings · done by Consultant

Input: Consolidated evidence → **Output:** Draft findings

Step MP-37.6 — Draft diagnostic findings (Consultant)

Type:

Row 1 — Diagnostic findings: Diagnostic findings — AI shelf-life and spoilage prediction · **Owner:** Reda Mansouri · **Start:** 2026-11-17 · **End:** 2026-12-17 · **Budget:** 42000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Diagnostic findings: Diagnostic findings — Computer vision for foreign-body detection · **Owner:** Karim Bennani · **Start:** 2026-11-24 · **End:** 2026-12-24 · **Budget:** 29000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-38.5 — Produce maturity report (Consultant PM)

Type:

Row 1 — Maturity report: Maturity report — AI shelf-life and spoilage prediction · **Owner:** Reda Mansouri · **Start:** 2026-11-17 · **End:** 2026-12-17 · **Budget:** 24000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Maturity report: Maturity report — Computer vision for foreign-body detection · **Owner:** Karim Bennani · **Start:** 2026-11-24 · **End:** 2026-12-24 · **Budget:** 49000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Edit AI findings: keep 5, merge 2, add one on HACCP documentation.

When every step is complete, click Complete in the task panel.

Task UFT-20-10 — Validate findings with sponsor · done by Consultant PM

Input: Draft findings → **Output:** Diagnostic & maturity report

Step MP-37.7 — Validate findings with sponsor (Consultant PM)

Type:

Decision: Approved

Findings with sponsor: Findings with sponsor

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2026-11-19

Decided by: Karim Hajji

Then click Complete the step.

Step MP-38.6 — Agree target maturity (HR Director)

Type:

Decision: Approved

Target maturity: Target maturity

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2026-11-19

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: Findings validated with the sponsor; target maturity level 3 by 2026+1.

When every step is complete, click Complete in the task panel.

E2E-25 — Job Architecture-to-Competency Map

Goal: Manage organizational charts, position descriptions, gap analysis

Starts when: Organizational change, new role creation, or annual job architecture review.

Ends with: Approved organizational charts, position descriptions, and competency maps with gap analysis.

Task UFT-25-01 — Map organizational structure · done by HR Analyst

Input: Org data → **Output:** Structure map

Step MP-44.1 — Map organizational structure (HR Analyst)

Type:

Row 1 — Organizational structure: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Anas Tazi · **Source:** Audit report

Row 2 — Organizational structure: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Mansouri · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Organizational structure register".

Result to record in the task: Structure: 6 functions, 14 departments, 3 sites; 212 positions.

When every step is complete, click Complete in the task panel.

Task UFT-25-02 — Design organizational charts · done by Org Design Consultant

Input: Structure map → **Output:** Org charts

Step MP-44.2 — Design organizational charts (Org Design Consultant)

Type:

Row 1 — Organizational charts: Organizational charts — AI shelf-life and spoilage prediction · **Owner:** Karim Mansouri · **Start:** 2027-01-16 · **End:** 2027-02-15 · **Budget:** 27000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Organizational charts: Organizational charts — Computer vision for foreign-body detection · **Owner:** Sara Lahlou · **Start:** 2027-01-23 · **End:** 2027-02-22 · **Budget:** 53000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Org chart 'Production & Food Safety': director → 3 managers → 9 supervisors → operators.

When every step is complete, click Complete in the task panel.

Task UFT-25-03 — Conduct job analysis · done by Job Analyst

Input: Org charts → **Output:** Job analysis

Step MP-44.3 — Conduct job analysis (Job Analyst)

Type:

Row 1 — Job analysis: AI shelf-life and spoilage prediction — half-day workshop · **Date:** 2027-01-28 · **Trainer:** Atlas Formation Conseil · **Participants:** 17 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Job analysis: Computer vision for foreign-body detection — half-day workshop · **Date:** 2027-02-04 · **Trainer:** Maghreb Learning Partners · **Participants:** 10 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Job analysis 'Production & Food Safety supervisor': 8 main activities, 2 of them now supported by AI shelf-life and spoilage prediction.

When every step is complete, click Complete in the task panel.

Task UFT-25-04 — Draft position descriptions · done by Job Analyst

Input: Job analysis → **Output:** Draft descriptions

Step MP-44.4 — Draft position descriptions (Job Analyst)

Type:

Row 1 — Position descriptions: Position descriptions — AI shelf-life and spoilage prediction · **Owner:** Soukaina Mansouri · **Start:** 2027-01-20 · **End:** 2027-02-19 · **Budget:** 43000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Position descriptions: Position descriptions — Computer vision for foreign-body detection · **Owner:** Reda Mansouri · **Start:** 2027-01-27 · **End:** 2027-02-26 · **Budget:** 78000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Position description drafted: mission, activities, competencies (AI shelf-life and spoilage prediction level 3, HACCP level 3), KPIs.

When every step is complete, click Complete in the task panel.

Task UFT-25-05 — Validate with managers · done by HR Business Partner

Input: Draft descriptions → **Output:** Validated descriptions

Step MP-44.5 — Validate descriptions with managers (HR Business Partner)

Type:

Decision: Approved

Descriptions with managers: Descriptions with managers

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-02-05

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: Validated by the Production & Food Safety manager with 2 changes on activities.

When every step is complete, click Complete in the task panel.

Task UFT-25-06 — Conduct gap analysis · done by Job Analyst

Input: Validated descriptions → **Output:** Gap analysis

Step MP-44.6 — Conduct gap analysis existing versus real (Job Analyst)

Type:

Row 1 — Gap analysis existing versus real: AI shelf-life and spoilage prediction — half-day workshop · **Date:** 2027-02-03 · **Trainer:** Atlas Formation Conseil · **Participants:** 18 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Gap analysis existing versus real: Computer vision for foreign-body detection — half-day workshop · **Date:** 2027-02-10 · **Trainer:** Maghreb Learning Partners · **Participants:** 15 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Gap existing vs real: 11 descriptions outdated; 4 roles with new AI shelf-life and spoilage prediction tasks.

When every step is complete, click Complete in the task panel.

Task UFT-25-07 — Identify roles to develop · done by HR Business Partner

Input: Gap analysis → **Output:** Roles to develop

Step MP-44.7 — Identify roles to develop (HR Business Partner)

Type:

Row 1 — Roles to develop: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Ghita Amrani · **Source:** HRIS export

Row 2 — Roles to develop: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Adil Alaoui · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Roles to develop register".

Step MP-44.8 — Update job architecture (Job Analyst)

Type:

Job architecture: Job architecture

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-01-20

Then click Complete the step.

Step MP-44.9 — Align with competency framework (Job Analyst)

Type:

Row 1 — With competency framework: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Ghita Amrani · **Source:** HRIS export

Row 2 — With competency framework: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Adil Alaoui · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "With competency framework register".

Result to record in the task: Roles 'To develop': data-literate supervisor, maintenance technician 4.0.

When every step is complete, click Complete in the task panel.

Task UFT-25-08 — Publish approved architecture · done by HR Director

Input: All outputs → **Output:** Approved architecture

Step MP-44.10 — Publish approved position descriptions (HR Director)

Type:

Row 1 — Approved position descriptions: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-01-23

Row 2 — Approved position descriptions: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-01-30

Then click Complete the step. The rows go to the register "Communications log".

Step MP-44.11 — Track job architecture changes (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-44.12 — Report on architecture health (HR Director)

Type:

Row 1 — On architecture health: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-01-23

Row 2 — On architecture health: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-01-30

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish 212 approved descriptions and the architecture map to all employees.

When every step is complete, click Complete in the task panel.

E2E-26 — GPEC-to-Training Plan

Goal: Integrate Forward Planning of Jobs and Skills into L&D

Starts when: Annual HR strategic planning cycle or GPEC (Forward Planning of Jobs and Skills) review. **Ends with:** Training plan aligned with GPEC and HR strategic orientations.

Task UFT-26-01 — Define GPEC scope · done by GPEC Specialist

Input: HR strategy → **Output:** GPEC scope

Step MP-45.1 — Define GPEC scope (GPEC Specialist)

Type:

Row 1 — GPEC scope: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Imane Hajji · **Source:** Questionnaire results

Row 2 — GPEC scope: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Soukaina Ziani · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "GPEC scope register".

Result to record in the task: GPEC scope: Production & Food Safety and Information Systems jobs; horizon 3 years.

When every step is complete, click Complete in the task panel.

Task UFT-26-02 — Map HR strategic orientations · done by HR Director

Input: Strategy docs → **Output:** Orientation map

Step MP-45.2 — Map HR strategic orientations (HR Director)

Type:

Row 1 — HR strategic orientations: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Soukaina Ziani · **Source:** Annual performance review

Row 2 — HR strategic orientations: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Hajji · **Source:** Audit report

Then click Complete the step. The rows go to the register "HR strategic orientations register".

Step MP-45.3 — Align training with GPEC (L&D Strategist)

Type:

Row 1 — Training with GPEC: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Soukaina Ziani · **Source:** Annual performance review

Row 2 — Training with GPEC: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Hajji · **Source:** Audit report

Then click Complete the step. The rows go to the register "Training with GPEC register".

Result to record in the task: HR orientations: internal mobility first; 30% of promotions from internal talent.

When every step is complete, click Complete in the task panel.

Task UFT-26-03 — Update development foundation · done by HR Business Partner

Input: Position descriptions → **Output:** Updated foundation

Step MP-45.4 — Update development foundation (HR Business Partner)

Type:

Development foundation: Development foundation

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-02-25

Then click Complete the step.

Step MP-45.5 — Support human capital development (HR Director)

Type:

Row 1 — Human capital development: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Hajji · **Source:** Audit report

Row 2 — Human capital development: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Anas Tazi · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Human capital development register".

Result to record in the task: Development foundation updated: descriptions, annual objectives, evaluation grid.

When every step is complete, click Complete in the task panel.

Task UFT-26-04 — Update Jobs and Skills Directory (REC) · done by GPEC Specialist

Input: Job data → **Output:** Updated REC

Step MP-45.6 — Update Jobs and Skills Directory (REC) (GPEC Specialist)

Type:

Jobs and Skills Directory (REC): Jobs and Skills Directory (REC)

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-01-30

Then click Complete the step.

Result to record in the task: REC updated: 42 jobs, 3 new jobs linked to AI shelf-life and spoilage prediction.

When every step is complete, click Complete in the task panel.

Task UFT-26-05 — Redynamize periodic evaluations · done by HR Business Partner

Input: Eval system → **Output:** Eval updates

Step MP-45.7 — Redynamize periodic evaluations (HR Business Partner)

Type:

Row 1 — Periodic evaluations: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Karim Mansouri · **Source:** Interview with the function head

Row 2 — Periodic evaluations: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Sara Lahlou · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Periodic evaluations register".

Result to record in the task: Periodic evaluation redesigned: 2 reviews per year, competency section added.

When every step is complete, click Complete in the task panel.

Task UFT-26-06 — Design career paths · done by HR Director

Input: Job architecture → **Output:** Career paths

Step MP-45.8 — Design career paths (HR Director)

Type:

Row 1 — Career paths: Career paths — AI shelf-life and spoilage prediction · **Owner:** Sara Lahlou · **Start:** 2027-02-09 · **End:** 2027-03-11 · **Budget:** 78000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Career paths: Career paths — Computer vision for foreign-body detection · **Owner:** Soukaina Mansouri · **Start:** 2027-02-16 · **End:** 2027-03-18 · **Budget:** 41000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Career path: operator → team leader → supervisor → Production & Food Safety manager.

When every step is complete, click Complete in the task panel.

Task UFT-26-07 — Document career management · done by HR Director

Input: Career paths → **Output:** Career process doc

Step MP-45.9 — Document career management process (HR Director)

Type:

Row 1 — Career management process: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Soukaina Mansouri · **Source:** Annual performance review

Row 2 — Career management process: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Reda Mansouri · **Source:** Audit report

Then click Complete the step. The rows go to the register "Career management process register".

Step MP-45.10 — Implement collective compensation (HR Director)

Type:

Row 1 — Collective compensation: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Soukaina Mansouri · **Source:** Annual performance review

Row 2 — Collective compensation: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Reda Mansouri · **Source:** Audit report

Then click Complete the step. The rows go to the register "Collective compensation register".

Result to record in the task: Career management procedure documented (v1): eligibility, committee, calendar.

When every step is complete, click Complete in the task panel.

Task UFT-26-08 — Align training with GPEC · done by L&D Strategist

Input: GPEC outputs → **Output:** Training-GPEC alignment

Step MP-45.11 — Feed GPEC into training needs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-45.12 — Report on GPEC integration (GPEC Specialist)

Type:

Row 1 — On GPEC integration: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-02-08

Row 2 — On GPEC integration: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-02-15

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Training aligned with GPEC: 4 themes cover the 3 new jobs; 2 themes removed.

When every step is complete, click Complete in the task panel.

E2E-27 — Demand Collection-to-Consolidation

Goal: Collect individual and collective training demands

Starts when: Annual training plan cycle or ad-hoc demand collection request. **Ends with:** Consolidated and prioritized demand repository integrated into the training needs analysis.

Task UFT-27-01 — Design demand collection forms · done by L&D Analyst

Input: Templates → **Output:** Forms

Step MP-46.1 — Design demand collection forms (L&D Analyst)

Type:

Row 1 — Demand collection forms: Demand collection forms — AI shelf-life and spoilage prediction · **Owner:** Karim Bennani · **Start:** 2027-02-15 · **End:** 2027-03-17 · **Budget:** 52000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Demand collection forms: Demand collection forms — Computer vision for foreign-body detection · **Owner:** Ghita Amrani · **Start:** 2027-02-22 · **End:** 2027-03-24 · **Budget:** 33000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Forms: individual form (5 questions) and collective form per team (3 questions).

When every step is complete, click Complete in the task panel.

Task UFT-27-02 — Deploy individual demand collection · done by L&D Analyst

Input: Forms → **Output:** Individual demands

Step MP-46.2 — Deploy individual demand collection (L&D Analyst)

Type:

Row 1 — Individual demand collection: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Individual demand collection: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Individual collection open 1-20 March; 146 demands received.

When every step is complete, click Complete in the task panel.

Task UFT-27-03 — Deploy collective demand collection · done by L&D Analyst

Input: Forms → **Output:** Collective demands

Step MP-46.3 — Deploy collective demand collection (L&D Analyst)

Type:

Row 1 — Collective demand collection: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Collective demand collection: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Collective collection: 18 team demands received.

When every step is complete, click Complete in the task panel.

Task UFT-27-04 — Collect manager recommendations · done by L&D Business Partner

Input: Managers → **Output:** Recommendations

Step MP-46.4 — Collect manager recommendations (L&D Business Partner)

Type:

Row 1 — Manager recommendations: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Imane Hajji · **Source:** Annual performance review

Row 2 — Manager recommendations: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Soukaina Ziani · **Source:** Audit report

Then click Complete the step. The rows go to the register "Manager recommendations register".

Result to record in the task: Manager recommendations: 24 received, 9 flagged as priority.

When every step is complete, click Complete in the task panel.

Task UFT-27-05 — Consolidate demands by function · done by L&D Analyst

Input: Demands → **Output:** Consolidated demands

Step MP-46.5 — Consolidate demands by function (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Consolidated: Production & Food Safety 64 demands, Operations 41, Quality 22, others 37.

When every step is complete, click Complete in the task panel.

Task UFT-27-06 — Map demands to competencies · done by L&D Analyst

Input: Consolidated demands → **Output:** Demand-competency map

Step MP-46.6 — Map demands to competencies (L&D Analyst)

Type:

Row 1 — Demands to competencies: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Karim Hajji · **Source:** HRIS export

Row 2 — Demands to competencies: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Anas Tazi · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Demands to competencies register".

Step MP-46.7 — Prioritize demands (L&D Business Partner)

Type:

Row 1 — Demands: AI shelf-life and spoilage prediction · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Demands: Computer vision for foreign-body detection · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Demands: AI demand planning for perishables · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Accept AI mapping for 139 demands; map 7 manually to 'Computer vision for foreign-body detection'.

When every step is complete, click Complete in the task panel.

Task UFT-27-07 — Prioritize and validate demands · done by L&D Business Partner

Input: Demand map → **Output:** Validated demands

Step MP-46.8 — Validate demands with managers (L&D Business Partner)

Type:

Decision: Approved

Demands with managers: Demands with managers

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-02-27

Decided by: Karim Hajji

Then click Complete the step.

Step MP-46.9 — Integrate demands into needs analysis (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-46.10 — Report on demand patterns (L&D Analyst)

Type:

Row 1 — On demand patterns: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-02-22

Row 2 — On demand patterns: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-03-01

Then click Complete the step. The rows go to the register "Communications log".

Step MP-46.11 — Track demand fulfillment (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-46.12 — Improve demand collection (L&D Analyst)

Type:

Demand collection: Demand collection

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-02-28

Then click Complete the step.

Result to record in the task: Validated: 112 demands (High 38, Medium 51, Low 23); 34 rejected with reason.

When every step is complete, click Complete in the task panel.

E2E-28 — Performance Assessment-to-RAG Dashboard

Goal: Assess MS/MO/OP performance with RAG ratings

Starts when: Annual performance cycle or management request for performance visualization. **Ends with:** Validated MS/MO/OP (Strategic Management / Operational Management / Operational Level) performance assessment with RAG (Green/Amber/Red) dashboards.

Task UFT-28-01 — Define MS/MO/OP framework · done by Performance Analyst

Input: Strategy docs → **Output:** Framework

Step MP-47.1 — Define MS/MO/OP framework (Performance Analyst)

Type:

Row 1 — MS/MO/OP framework: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Karim Mansouri · **Source:** Questionnaire results

Row 2 — MS/MO/OP framework: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Sara Lahlou · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "MS/MO/OP framework register".

Result to record in the task: MS = executive committee; MO = managers and supervisors; OP = operators and technicians.

When every step is complete, click Complete in the task panel.

Task UFT-28-02 — Define RAG criteria · done by Performance Analyst

Input: Framework → **Output:** RAG criteria

Step MP-47.2 — Define RAG criteria (Performance Analyst)

Type:

Row 1 — RAG criteria: Raise AI shelf-life and spoilage prediction proficiency of Operator — Production & Food Safety teams to level 3 · **Indicator:** KPI-004 (Training Engineering Report cycle time) · **Baseline:** 35 % · **Target:** 81 % · **Deadline:** 2027-08-20 · **Owner:** Sara Lahlou

Row 2 — RAG criteria: Certify Supervisor — Production & Food Safety staff on Computer vision for foreign-body detection · **Indicator:** KPI-005 (Design approval lead time) · **Baseline:** 42 % · **Target:** 88 % · **Deadline:** 2027-08-27 · **Owner:** Soukaina Mansouri

Row 3 — RAG criteria: Cut onboarding time on AI demand planning for perishables by 30 % · **Indicator:** KPI-006 (License Compliance %) · **Baseline:** 32 % · **Target:** 77 % · **Deadline:** 2027-09-03 · **Owner:** Reda Mansouri

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Green ≥ 90% of target; Amber 70-89%; Red < 70%.

When every step is complete, click Complete in the task panel.

Task UFT-28-03 — Collect performance data by function · done by Performance Analyst

Input: Function data → **Output:** Data set

Step MP-47.3 — Collect performance data by function (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Data collected for 6 functions: 18 KPIs, last 12 months.

When every step is complete, click Complete in the task panel.

Task UFT-28-04 — Assess MS performance · done by Performance Analyst

Input: Data set → **Output:** MS assessment

Step MP-47.4 — Assess MS performance (Performance Analyst)

Type:

Row 1 — MS performance: AI shelf-life and spoilage prediction · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — MS performance: Computer vision for foreign-body detection · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 5 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — MS performance: AI demand planning for perishables · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 4 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: MS: strategy deployment Amber (78%); governance Green (92%).

When every step is complete, click Complete in the task panel.

Task UFT-28-05 — Assess MO performance · done by Performance Analyst

Input: Data set → **Output:** MO assessment

Step MP-47.5 — Assess MO performance (Performance Analyst)

Type:

Row 1 — MO performance: AI shelf-life and spoilage prediction · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — MO performance: Computer vision for foreign-body detection · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — MO performance: AI demand planning for perishables · **Criterion:** Cost · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: MO: Production & Food Safety team management Red (64%); planning Amber (81%).

When every step is complete, click Complete in the task panel.

Task UFT-28-06 — Assess OP performance · done by Performance Analyst

Input: Data set → **Output:** OP assessment

Step MP-47.6 — Assess OP performance (Performance Analyst)

Type:

Row 1 — OP performance: AI shelf-life and spoilage prediction · **Criterion:** Feasibility · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — OP performance: Computer vision for foreign-body detection · **Criterion:** Cost · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — OP performance: AI demand planning for perishables · **Criterion:** Risk · **Weight (%):** 20 · **Score (1–5):** 4 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-47.7 — Apply RAG ratings (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: OP: HACCP compliance Amber (85%); productivity Green (93%).

When every step is complete, click Complete in the task panel.

Task UFT-28-07 — Publish RAG dashboard · done by Performance Analyst

Input: All assessments → **Output:** RAG dashboard

Step MP-47.8 — Visualize performance dashboards (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-47.9 — Identify performance gaps (Performance Analyst)

Type:

Row 1 — Performance gaps: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Adil Alaoui · **Source:** Annual performance review

Row 2 — Performance gaps: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Imane Hajji · **Source:** Audit report

Then click Complete the step. The rows go to the register "Performance gaps register".

Step MP-47.10 — Feed performance into diagnostic report (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-47.11 — Track performance progression (Performance Analyst)

Type:

Row 1 — Performance progression: KPI-009 (Plan realization rate) · **Period:** 2026-Q1 · **Value:** 87 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — Performance progression: KPI-010 (Learner completion rate) · **Period:** 2026-Q2 · **Value:** 61 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-47.12 — Report performance to leadership (Performance Analyst)

Type:

Row 1 — Performance to leadership: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-03-08

Row 2 — Performance to leadership: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-03-15

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish RPT-005 MS/MO/OP RAG dashboard to the executive committee.

When every step is complete, click Complete in the task panel.

E2E-29 — Functional SWOT-to-Improvement Axes

Goal: Conduct function-level SWOT and define improvement axes

Starts when: Diagnostic phase of a training engineering engagement or annual functional review. **Ends with:** Validated functional SWOT reports with prioritized improvement axes per function.

Task UFT-29-01 — Define function scope · done by L&D Analyst

Input: Org data → **Output:** Scope

Step MP-48.1 — Define function scope (L&D Analyst)

Type:

Row 1 — Function scope: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Imane Hajji · **Source:** Audit report

Row 2 — Function scope: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Soukaina Ziani · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Function scope register".

Result to record in the task: Function in scope: Production & Food Safety (3 sites, 96 people).

When every step is complete, click Complete in the task panel.

Task UFT-29-02 — Conduct function SWOT · done by L&D Analyst

Input: Function data → **Output:** SWOT

Step MP-48.2 — Conduct function SWOT (L&D Analyst)

Type:

Row 1 — Function SWOT: AI shelf-life and spoilage prediction — half-day workshop · **Date:** 2027-03-27 · **Trainer:** Atlas Formation Conseil · **Participants:** 12 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Function SWOT: Computer vision for foreign-body detection — half-day workshop · **Date:** 2027-04-03 · **Trainer:** Maghreb Learning Partners · **Participants:** 16 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: SWOT workshop held with the function head and 6 supervisors.

When every step is complete, click Complete in the task panel.

Task UFT-29-03 — Identify strengths and weaknesses · done by L&D Analyst

Input: Interview data → **Output:** Internal factors

Step MP-48.3 — Identify strengths (L&D Analyst)

Type:

Row 1 — Strengths: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Karim Hajji · **Source:** Interview with the function head

Row 2 — Strengths: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Anas Tazi · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Strengths register".

Step MP-48.4 — Identify weaknesses (L&D Analyst)

Type:

Row 1 — Weaknesses: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Karim Hajji · **Source:** Interview with the function head

Row 2 — Weaknesses: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Anas Tazi · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Weaknesses register".

Result to record in the task: Strength: experienced team. Weakness: low AI shelf-life and spoilage prediction usage, paper records.

When every step is complete, click Complete in the task panel.

Task UFT-29-04 — Identify opportunities and threats · done by L&D Analyst

Input: Market data → **Output:** External factors

Step MP-48.5 — Identify opportunities (L&D Analyst)

Type:

Row 1 — Opportunities: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Anas Tazi · **Source:** Questionnaire results

Row 2 — Opportunities: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Mansouri · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Opportunities register".

Step MP-48.6 — Identify threats (L&D Analyst)

Type:

Row 1 — Threats: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Anas Tazi · **Source:** Questionnaire results

Row 2 — Threats: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Mansouri · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Threats register".

Result to record in the task: Opportunity: AI demand planning for perishables. Threat: stricter HACCP audits.

When every step is complete, click Complete in the task panel.

Task UFT-29-05 — Define improvement axes · done by L&D Business Partner

Input: SWOT → **Output:** Improvement axes

Step MP-48.7 — Define improvement axes (L&D Business Partner)

Type:

Row 1 — Improvement axes: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Mansouri · **Source:** Annual performance review

Row 2 — Improvement axes: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Sara Lahlou · **Source:** Audit report

Then click Complete the step. The rows go to the register "Improvement axes register".

Result to record in the task: Axis 1: digitalise shift records with AI shelf-life and spoilage prediction. Axis 2: certify supervisors on HACCP.

When every step is complete, click Complete in the task panel.

Task UFT-29-06 — Validate with function heads · done by L&D Business Partner

Input: Improvement axes → **Output:** Validated axes

Step MP-48.8 — Validate axes with function heads (L&D Business Partner)

Type:

Decision: Approved with conditions

Axes with function heads: Axes with function heads

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2027-04-15

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: Validated by the function head on 18 April; axis 2 deadline moved to Q3.

When every step is complete, click Complete in the task panel.

Task UFT-29-07 — Prioritize improvement axes · done by L&D Strategist

Input: Validated axes → **Output:** Prioritized axes

Step MP-48.9 — Prioritize improvement axes (L&D Strategist)

Type:

Row 1 — Improvement axes: AI shelf-life and spoilage prediction · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Improvement axes: Computer vision for foreign-body detection · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Improvement axes: AI demand planning for perishables · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-48.10 — Feed SWOT into diagnostic report (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-48.11 — Track improvement implementation (L&D Business Partner)

Type:

Row 1 — Improvement implementation: KPI-016 (Knowledge reuse rate) · **Period:** 2026-Q2 · **Value:** 57 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Improvement implementation: KPI-017 (IDP coverage) · **Period:** 2026-Q3 · **Value:** 79 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-48.12 — Report on function performance (L&D Analyst)

Type:

Row 1 — On function performance: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-03-22

Row 2 — On function performance: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-03-29

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Priority: axis 1 (impact 5), axis 2 (impact 4).

When every step is complete, click Complete in the task panel.

E2E-02 — Skills-to-Gap Diagnosis

Goal: Produce a validated skills gap diagnosis

Starts when: Approved annual L&D plan or a scheduled skills assessment campaign. **Ends with:** Validated skills gap diagnosis released to needs analysis.

Task UFT-02-01 — Maintain competency framework · done by L&D Analyst

Input: Job architecture → **Output:** Competency framework

Step MP-02.1 — Define competency families and levels (L&D Analyst)

Type:

Row 1 — Competency families and levels: Raise AI shelf-life and spoilage prediction proficiency of Operator — Production & Food Safety teams to level 3 · **Indicator:** KPI-006 (License Compliance %) · **Baseline:** 36 % · **Target:** 83 % · **Deadline:** 2027-02-05 · **Owner:** Soukaina Mansouri

Row 2 — Competency families and levels: Certify Supervisor — Production & Food Safety staff on Computer vision for foreign-body detection · **Indicator:** KPI-007 (Content publication lead time) · **Baseline:** 37 % · **Target:** 83 % · **Deadline:** 2027-02-12 · **Owner:** Reda Mansouri

Row 3 — Competency families and levels: Cut onboarding time on AI demand planning for perishables by 30 % · **Indicator:** KPI-008 (Session fill rate) · **Baseline:** 41 % · **Target:** 88 % · **Deadline:** 2027-02-19 · **Owner:** Karim Bennani

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Family 'AI shelf-life and spoilage prediction': 4 competencies on the 1-4 scale (Aware, Practitioner, Autonomous, Expert).

When every step is complete, click Complete in the task panel.

Task UFT-02-02 — Set target levels per position · done by HR Business Partner

Input: Competency framework → **Output:** Position targets

Step MP-02.2 — Set target levels per position (HR Business Partner)

Type:

Row 1 — Target levels per position: Raise AI shelf-life and spoilage prediction proficiency of Operator — Production & Food Safety teams to level 3 · **Indicator:** KPI-007 (Content publication lead time) · **Baseline:** 33 % · **Target:** 73 % · **Deadline:** 2027-02-07 · **Owner:** Reda Mansouri

Row 2 — Target levels per position: Certify Supervisor — Production & Food Safety staff on Computer vision for foreign-body detection · **Indicator:** KPI-008 (Session fill rate) · **Baseline:** 36 % · **Target:** 75 % · **Deadline:** 2027-02-14 · **Owner:** Karim Bennani

Row 3 — Target levels per position: Cut onboarding time on AI demand planning for perishables by 30 % · **Indicator:** KPI-009 (Plan realization rate) · **Baseline:** 45 % · **Target:** 78 % · **Deadline:** 2027-02-21 · **Owner:** Ghita Amrani

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Production & Food Safety supervisor: AI shelf-life and spoilage prediction = 3; HACCP = 3. Production & Food Safety operator: AI shelf-life and spoilage prediction = 2.

When every step is complete, click Complete in the task panel.

Task UFT-02-03 — Launch assessment campaign · done by L&D Analyst

Input: Position targets → **Output:** Open campaign

Step MP-02.3 — Launch assessment campaign (L&D Analyst)

Type:

Row 1 — Assessment campaign: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-08-18

Row 2 — Assessment campaign: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-08-25

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Campaign 'Skills 2026': population Production & Food Safety and Operations (212 people), 12 competencies, close date 30 April.

When every step is complete, click Complete in the task panel.

Task UFT-02-04 — Collect self and manager assessments · done by Manager

Input: Open campaign → **Output:** Consolidated assessments

Step MP-02.4 — Submit self and manager assessments (Manager)

Type:

Row 1 — Self and manager assessments: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-08-20

Row 2 — Self and manager assessments: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-08-27

Then click Complete the step. The rows go to the register "Communications log".

Step MP-02.5 — Consolidate assessment results (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Self-assessment AI shelf-life and spoilage prediction: 2; manager validation: 2 with comment 'needs practice on live cases'.

When every step is complete, click Complete in the task panel.

Task UFT-02-05 — Suggest proficiency from evidence · done by L&D Analyst

Input: Consolidated assessments → **Output:** Suggested levels

Step MP-02.6 — Suggest proficiency from evidence (L&D Analyst)

Type:

Row 1 — Proficiency from evidence: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Adil Alaoui · **Source:** Audit report

Row 2 — Proficiency from evidence: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Imane Hajji · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Proficiency from evidence register".

Result to record in the task: Accept 38 suggested levels, edit 4 (evidence too old), reject 1. Every change carries a note.

When every step is complete, click Complete in the task panel.

Task UFT-02-06 — Validate skills inventory · done by Head of L&D

Input: Suggested levels → **Output:** Validated inventory

Step MP-02.7 — Validate skills inventory (Head of L&D)

Type:

Decision: Approved

Skills inventory: Skills inventory

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-08-22

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: Inventory validated: 212 employees, 96% assessments complete. Justification: sample checked by site.

When every step is complete, click Complete in the task panel.

Task UFT-02-07 — Compute and forecast gaps · done by L&D Analyst

Input: Validated inventory → **Output:** Skills gap diagnosis

Step MP-03.1 — Compute gap matrix (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-03.2 — Review gap matrix by site and function (L&D Analyst)

Type:

Gap matrix by site and function: Gap matrix by site and function

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-09-01

Then click Complete the step.

Step MP-28.3 — Forecast skill gaps (Performance Analyst)

Type:

Row 1 — Skill gaps: KPI-012 (Average Level 1 satisfaction) · **Period:** 2026-Q3 · **Value:** 87 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — Skill gaps: KPI-013 (Skill progression rate) · **Period:** 2026-Q1 · **Value:** 75 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-28.1 — Build analytics dataset (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Critical gaps: AI shelf-life and spoilage prediction (-1.4 average on supervisors), Computer vision for foreign-body detection (-1.1). Forecast: AI demand planning for perishables becomes critical within 12 months.

When every step is complete, click Complete in the task panel.

E2E-21 — Previous Plan Impact-to-Strategy Update

Goal: Evaluate N-1 plan impact and update strategy

Starts when: Start of a new plan cycle with N-1 execution data available. **Ends with:** N-1 impact conclusions fed into the strategy update.

Task UFT-21-01 — Load N-1 plan execution data · done by L&D Analyst

Input: N-1 plan → **Output:** N-1 dataset

Step MP-39.1 — Load N-1 plan execution data (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Load N-1 plan: 28 sessions planned, 23 delivered, 1,410,000 MAD spent.

When every step is complete, click Complete in the task panel.

Task UFT-21-02 — Define impact criteria · done by L&D Analyst

Input: N-1 dataset → **Output:** Impact criteria

Step MP-39.2 — Define impact criteria (L&D Analyst)

Type:

Row 1 — Impact criteria: Raise AI shelf-life and spoilage prediction proficiency of Operator — Production & Food Safety teams to level 3 · **Indicator:** KPI-014 (Report on-time delivery) · **Baseline:** 38 % · **Target:** 72 % · **Deadline:** 2027-05-12 · **Owner:** Adil Alaoui

Row 2 — Impact criteria: Certify Supervisor — Production & Food Safety staff on Computer vision for foreign-body detection · **Indicator:** KPI-015 (Training record correction rate) · **Baseline:** 37 % · **Target:** 82 % · **Deadline:** 2027-05-19 · **Owner:** Imane Hajji

Row 3 — Impact criteria: Cut onboarding time on AI demand planning for perishables by 30 % · **Indicator:** KPI-016 (Knowledge reuse rate) · **Baseline:** 31 % · **Target:** 85 % · **Deadline:** 2027-05-26 · **Owner:** Soukaina Ziani

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Impact criteria: application on the job, KPI change, satisfaction, cost per learner.

When every step is complete, click Complete in the task panel.

Task UFT-21-03 — Survey participants and managers · done by L&D Analyst

Input: Impact criteria → **Output:** Survey results

Step MP-39.3 — Survey participants and managers (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-09.5 — Record on-the-job observation (Level 3) (Manager)

Type:

Row 1 — On-the-job observation (Level 3): AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Imane Hajji · **Source:** Audit report

Row 2 — On-the-job observation (Level 3): Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Soukaina Ziani · **Source:** HRIS export

Then click Complete the step. The rows go to the register "On-the-job observation (Level 3) register".

Result to record in the task: Survey sent to 190 participants and 34 managers; 61% responded.

When every step is complete, click Complete in the task panel.

Task UFT-21-04 — Compare planned against realized · done by L&D Analyst

Input: Survey results → **Output:** Plan-vs-actual analysis

Step MP-39.4 — Compare planned against realized (L&D Analyst)

Type:

Row 1 — Planned against realized: AI shelf-life and spoilage prediction · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Planned against realized: Computer vision for foreign-body detection · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Planned against realized: AI demand planning for perishables · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 3 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-32.3 — Isolate training effect (Performance Analyst)

Type:

Row 1 — Training effect: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Soukaina Ziani · **Source:** HRIS export

Row 2 — Training effect: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Hajji · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Training effect register".

Result to record in the task: Planned vs realized: 82% of sessions, 94% of budget; 2 themes not delivered.

When every step is complete, click Complete in the task panel.

Task UFT-21-05 — Review N-1 ROI · done by Performance Analyst

Input: Plan-vs-actual analysis → **Output:** N-1 ROI

Step MP-32.4 — Compute Phillips ROI (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-32.5 — Review ROI with finance (Finance Manager)

Type:

ROI with finance: ROI with finance

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-11-30

Then click Complete the step.

Result to record in the task: N-1 ROI: Computer vision for foreign-body detection 18%; safety theme 35%.

When every step is complete, click Complete in the task panel.

Task UFT-21-06 — Draft impact conclusions · done by L&D Analyst

Input: N-1 ROI → **Output:** Draft conclusions

Step MP-39.5 — Draft impact study conclusions (L&D Analyst)

Type:

Row 1 — Impact study conclusions: Impact study conclusions — AI shelf-life and spoilage prediction · **Owner:** Anas Tazi · **Start:** 2026-12-01 · **End:** 2026-12-31 · **Budget:** 44000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Impact study conclusions: Impact study conclusions — Computer vision for foreign-body detection · **Owner:** Karim Mansouri · **Start:** 2026-12-08 · **End:** 2027-01-07 · **Budget:** 34000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Accept AI conclusions 1-3; rewrite conclusion 4 (sample too small).

When every step is complete, click Complete in the task panel.

Task UFT-21-07 — Feed conclusions to strategy · done by Head of L&D

Input: Draft conclusions → **Output:** Strategy inputs

Step MP-39.6 — Feed conclusions to strategy update (Head of L&D)

Type:

Row 1 — Conclusions to strategy update: KPI-019 (Vendor invoice match rate) · **Period:** 2026-Q2 · **Value:** 80 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — Conclusions to strategy update: KPI-020 (Integration synchronisation success rate) · **Period:** 2026-Q3 · **Value:** 67 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-01.1 — Record corporate strategic objectives (Head of L&D)

Type:

Row 1 — Corporate strategic objectives: Raise AI shelf-life and spoilage prediction proficiency of Operator — Production & Food Safety teams to level 3 · **Indicator:** KPI-019 (Vendor invoice match rate) · **Baseline:** 44 % · **Target:** 87 % · **Deadline:** 2027-05-22 · **Owner:** Karim Mansouri

Row 2 — Corporate strategic objectives: Certify Supervisor — Production & Food Safety staff on Computer vision for foreign-body detection · **Indicator:** KPI-020 (Integration synchronisation success rate) · **Baseline:** 48 % · **Target:** 86 % · **Deadline:** 2027-05-29 · **Owner:** Sara Lahlou

Row 3 — Corporate strategic objectives: Cut onboarding time on AI demand planning for perishables by 30 % · **Indicator:** KPI-001 (Strategic objective coverage) · **Baseline:** 48 % · **Target:** 71 % · **Deadline:** 2027-06-05 · **Owner:** Soukaina Mansouri

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Feed to strategy: keep blended format; stop long classroom courses on Computer vision for foreign-body detection.

When every step is complete, click Complete in the task panel.

Task UFT-21-08 — Update roadmap priorities · done by L&D Strategist

Input: Strategy inputs → **Output:** Updated roadmap priorities

Step MP-04.6 — Sequence roadmap initiatives (L&D Strategist)

Type:

Row 1 — Roadmap initiatives: Roadmap initiatives — AI shelf-life and spoilage prediction · **Owner:** Sara Lahlou · **Start:** 2026-12-05 · **End:** 2027-01-04 · **Budget:** 30000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Roadmap initiatives: Roadmap initiatives — Computer vision for foreign-body detection · **Owner:** Soukaina Mansouri · **Start:** 2026-12-12 · **End:** 2027-01-11 · **Budget:** 68000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Roadmap priority updated: AI shelf-life and spoilage prediction moved to Q2; Computer vision for foreign-body detection to microlearning.

When every step is complete, click Complete in the task panel.

Gate G2 — G2 — Diagnostic validated: close the phase

2. Open the project workspace and click the gate button of the phase.
2. Tick each checklist item once its evidence is attached, then click Submit for decision.
3. Click Go. Type the justification: All mandatory items met; evidence attached.
3. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

Phase 3 — Training Engineering Report & plan

E2E-01 — Strategy-to-Learning Plan

Goal: Translate corporate strategy into an approved annual L&D plan and budget

Starts when: Annual strategy cycle opened or revised corporate objectives published by the board. **Ends with:** Annual L&D plan and budget envelope approved by the Steering Committee and locked.

Task UFT-01-01 — Record strategic objectives · done by Head of L&D

Input: Corporate strategy → **Output:** Strategic objectives register

Step MP-01.1 — Record corporate strategic objectives (Head of L&D)

Type:

Row 1 — Corporate strategic objectives: Raise AI shelf-life and spoilage prediction proficiency of Operator — Production & Food Safety teams to level 3 · **Indicator:** KPI-002 (Skills inventory validation rate) · **Baseline:** 37 % · **Target:** 73 % · **Deadline:** 2027-01-28 · **Owner:** Karim Hajji

Row 2 — Corporate strategic objectives: Certify Supervisor — Production & Food Safety staff on Computer vision for foreign-body detection · **Indicator:** KPI-003 (Critical gap rate) · **Baseline:** 40 % · **Target:** 75 % · **Deadline:** 2027-02-04 · **Owner:** Anas Tazi

Row 3 — Corporate strategic objectives: Cut onboarding time on AI demand planning for perishables by 30 % · **Indicator:** KPI-004 (Training Engineering Report cycle time) · **Baseline:** 38 % · **Target:** 70 % · **Deadline:** 2027-02-11 · **Owner:** Karim Mansouri

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: SO-1: AI shelf-life and spoilage prediction used by 80% of Production & Food Safety staff by end 2026 (owner: Operations Director, measured quarterly). SO-2: zero major audit findings on HACCP.

When every step is complete, click Complete in the task panel.

Task UFT-01-02 — Link objectives to functions and sites · done by L&D Strategist

Input: Strategic objectives register → **Output:** Objective-function map

Step MP-01.2 — Link objectives to functions and sites (L&D Strategist)

Type:

Row 1 — Objectives to functions and sites: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Anas Tazi · **Source:** Questionnaire results

Row 2 — Objectives to functions and sites: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Karim Mansouri · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Objectives to functions and sites register".

Result to record in the task: SO-1 → Production & Food Safety, Operations, Information Systems (all sites). SO-2 → Quality & HSE, Production & Food Safety.

When every step is complete, click Complete in the task panel.

Task UFT-01-03 — Frame skills priorities · done by L&D Analyst

Input: Objective-function map → **Output:** Priority competency list

Step MP-02.1 — Define competency families and levels (L&D Analyst)

Type:

Row 1 — Competency families and levels: Raise AI shelf-life and spoilage prediction proficiency of Operator — Production & Food Safety teams to level 3 · **Indicator:** KPI-004 (Training Engineering Report cycle time) · **Baseline:** 41 % · **Target:** 78 % · **Deadline:** 2027-02-01 · **Owner:** Karim Mansouri

Row 2 — Competency families and levels: Certify Supervisor — Production & Food Safety staff on Computer vision for foreign-body detection · **Indicator:** KPI-005 (Design approval lead time) · **Baseline:** 43 % · **Target:** 73 % · **Deadline:** 2027-02-08 · **Owner:** Sara Lahlou

Row 3 — Competency families and levels: Cut onboarding time on AI demand planning for perishables by 30 % · **Indicator:** KPI-006 (License Compliance %) · **Baseline:** 44 % · **Target:** 72 % · **Deadline:** 2027-02-15 · **Owner:** Soukaina Mansouri

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-02.2 — Set target levels per position (HR Business Partner)

Type:

Row 1 — Target levels per position: Raise AI shelf-life and spoilage prediction proficiency of Operator — Production & Food Safety teams to level 3 · **Indicator:** KPI-004 (Training Engineering Report cycle time) · **Baseline:** 46 % · **Target:** 89 % · **Deadline:** 2027-02-01 · **Owner:** Karim Mansouri

Row 2 — Target levels per position: Certify Supervisor — Production & Food Safety staff on Computer vision for foreign-body detection · **Indicator:** KPI-005 (Design approval lead time) · **Baseline:** 46 % · **Target:** 79 % · **Deadline:** 2027-02-08 · **Owner:** Sara Lahlou

Row 3 — Target levels per position: Cut onboarding time on AI demand planning for perishables by 30 % · **Indicator:** KPI-006 (License Compliance %) · **Baseline:** 40 % · **Target:** 80 % · **Deadline:** 2027-02-15 · **Owner:** Soukaina Mansouri

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Priority competency families: AI shelf-life and spoilage prediction; Computer vision for foreign-body detection; HACCP compliance. Target level 3 (Autonomous) for supervisors.

When every step is complete, click Complete in the task panel.

Task UFT-01-04 — Pre-scope training needs · done by L&D Analyst

Input: Priority competency list → **Output:** Pre-scoped needs

Step MP-03.1 — Compute gap matrix (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-03.2 — Review gap matrix by site and function (L&D Analyst)

Type:

Gap matrix by site and function: Gap matrix by site and function

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-09-08

Then click Complete the step.

Result to record in the task: Pre-scoped needs: 42% of Production & Food Safety supervisors below target on AI shelf-life and spoilage prediction; 18 employees below target on HACCP.

When every step is complete, click Complete in the task panel.

Task UFT-01-05 — Define budget envelope · done by Finance Manager

Input: Pre-scoped needs → **Output:** Budget envelope

Step MP-01.3 — Define L&D budget envelope (Finance Manager)

Type:

Row 1 — L&D budget envelope: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Ghita Amrani · **Source:** Audit report

Row 2 — L&D budget envelope: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Adil Alaoui · **Source:** HRIS export

Then click Complete the step. The rows go to the register "L&D budget envelope register".

Step MP-18.1 — Allocate budget by theme and site (Finance Manager)

Type:

Row 1 — Budget by theme and site: Budget by theme and site — AI shelf-life and spoilage prediction · **Owner:** Ghita Amrani · **Start:** 2027-04-24 · **End:** 2027-05-24 · **Budget:** 48000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Budget by theme and site: Budget by theme and site — Computer vision for foreign-body detection · **Owner:** Adil Alaoui · **Start:** 2027-05-01 · **End:** 2027-05-31 · **Budget:** 79000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-18.2 — Forecast OFPPT refunds (Finance Manager)

Type:

Row 1 — OFPPT refunds: KPI-010 (Learner completion rate) · **Period:** 2026-Q1 · **Value:** 69 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — OFPPT refunds: KPI-011 (API Availability) · **Period:** 2026-Q2 · **Value:** 72 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Gross L&D budget 2026: 1,850,000 MAD; forecast refund (OFPPT/CSF): 520,000 MAD; net envelope: 1,330,000 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-01-06 — Plan change and adoption · done by Change Manager

Input: Budget envelope → **Output:** Adoption plan

Step MP-19.1 — Assess change impact (Change Manager)

Type:

Row 1 — Change impact: AI shelf-life and spoilage prediction · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Change impact: Computer vision for foreign-body detection · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-19.2 — Build adoption plan (Change Manager)

Type:

Row 1 — Adoption plan: Adoption plan — AI shelf-life and spoilage prediction · **Owner:** Adil Alaoui · **Start:** 2027-04-26 · **End:** 2027-05-26 · **Budget:** 50000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Adoption plan: Adoption plan — Computer vision for foreign-body detection · **Owner:** Imane Hajji · **Start:** 2027-05-03 · **End:** 2027-06-02 · **Budget:** 51000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Change impact: high for Production & Food Safety supervisors (new AI shelf-life and spoilage prediction routines). Sponsors: Operations Director. Champions: one per site.

When every step is complete, click Complete in the task panel.

Task UFT-01-07 — Compile plan approval pack · done by Head of L&D

Input: Adoption plan → **Output:** Approval pack

Step MP-01.4 — Schedule Steering Committee milestones (Head of L&D)

Type:

Row 1 — Steering Committee milestones: Steering Committee milestones — AI shelf-life and spoilage prediction · **Owner:** Imane Hajji · **Start:** 2027-04-28 · **End:** 2027-05-28 · **Budget:** 49000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Steering Committee milestones: Steering Committee milestones — Computer vision for foreign-body detection · **Owner:** Soukaina Ziani · **Start:** 2027-05-05 · **End:** 2027-06-04 · **Budget:** 78000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-01.5 — Compile plan approval pack (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-04.1 — Consolidate feeder outputs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Approval pack: 2 objectives, net budget 1,330,000 MAD, 6 priority themes, committee date 15 March 2026.

When every step is complete, click Complete in the task panel.

Task UFT-01-08 — Approve and lock annual L&D plan · done by HR Director

Input: Approval pack → **Output:** Approved annual L&D plan

Step MP-01.6 — Record Steering Committee decision (HR Director)

Type:

Row 1 — Steering Committee decision: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Soukaina Ziani · **Source:** Questionnaire results

Row 2 — Steering Committee decision: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Karim Hajji · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Steering Committee decision register".

Step MP-01.7 — Lock and distribute approved plan (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Decision: Approve. Justification: aligned with SO-1 and SO-2; budget within envelope. Plan locked as version 1.

When every step is complete, click Complete in the task panel.

E2E-03 — Needs-to-Training Engineering Report & Roadmap

Goal: Produce the Training Engineering Report and the prioritized training roadmap

Starts when: Validated skills gap diagnosis, consolidated demands, approved Scope of Work or diagnostic findings available. **Ends with:** Training Engineering Report and prioritized roadmap approved and published.

Task UFT-03-01 — Plan diagnostic interviews · done by L&D Analyst

Input: Approved Scope of Work → **Output:** Interview plan

Step MP-03.3 — Plan diagnostic interviews (L&D Analyst)

Type:

Row 1 — Diagnostic interviews: Diagnostic interviews — AI shelf-life and spoilage prediction · **Owner:** Karim Hajji · **Start:** 2026-09-02 · **End:** 2026-10-02 · **Budget:** 69000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Diagnostic interviews: Diagnostic interviews — Computer vision for foreign-body detection · **Owner:** Anas Tazi · **Start:** 2026-09-09 · **End:** 2026-10-09 · **Budget:** 79000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Interview plan: 14 semi-structured interviews (4 MS, 6 MO, 4 OP), 45 minutes each, weeks 10-11.

When every step is complete, click Complete in the task panel.

Task UFT-03-02 — Record interview findings · done by L&D Analyst

Input: Interview plan → **Output:** Interview findings

Step MP-03.4 — Record interview findings (L&D Analyst)

Type:

Row 1 — Interview findings: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Anas Tazi · **Source:** Annual performance review

Row 2 — Interview findings: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Mansouri · **Source:** Audit report

Then click Complete the step. The rows go to the register "Interview findings register".

Result to record in the task: Finding (MO, Production & Food Safety): 'Supervisors do not trust AI shelf-life and spoilage prediction data; they re-enter figures on paper.'

When every step is complete, click Complete in the task panel.

Task UFT-03-03 — Cluster needs into themes · done by L&D Analyst

Input: Interview findings, gaps, responses → **Output:** Training themes

Step MP-03.5 — Cluster needs into training themes (L&D Analyst)

Type:

Row 1 — Needs into training themes: AI shelf-life and spoilage prediction · **Criterion:** Risk · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Needs into training themes: Computer vision for foreign-body detection · **Criterion:** Business impact · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Needs into training themes: AI demand planning for perishables · **Criterion:** Urgency · **Weight (%):** 20 · **Score (1–5):** 2 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Accept theme 'AI shelf-life and spoilage prediction for supervisors'; merge two duplicate themes on Computer vision for foreign-body detection; split 'HACCP' into awareness and auditor tracks.

When every step is complete, click Complete in the task panel.

Task UFT-03-04 — Prioritize needs by impact · done by L&D Strategist

Input: Training themes → **Output:** Prioritized needs

Step MP-03.6 — Prioritize needs by business impact (L&D Strategist)

Type:

Row 1 — Needs by business impact: AI shelf-life and spoilage prediction · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Needs by business impact: Computer vision for foreign-body detection · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 5 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Needs by business impact: AI demand planning for perishables · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 3 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: AI shelf-life and spoilage prediction: impact 5, urgency 4. Computer vision for foreign-body detection: impact 4, urgency 3. HACCP: impact 4, urgency 5.

When every step is complete, click Complete in the task panel.

Task UFT-03-05 — Validate needs register · done by Head of L&D

Input: Prioritized needs → **Output:** Validated needs register

Step MP-03.7 — Validate needs register (Head of L&D)

Type:

Decision: Approved

Needs register: Needs register

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-05-17

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: Needs register validated: 23 needs, 6 themes. Justification: covers SO-1 and SO-2; sponsor reviewed.

When every step is complete, click Complete in the task panel.

Task UFT-03-06 — Consolidate engineering inputs · done by L&D Analyst

Input: Validated needs register → **Output:** Input completeness check

Step MP-04.1 — Consolidate feeder outputs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-04.2 — Check input completeness (L&D Analyst)

Type:

Input completeness: Input completeness

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-05-27

Then click Complete the step.

Result to record in the task: Inputs complete: Scope of Work, 187 responses, gap matrix, RAG dashboard, SWOT, demands. Missing: none.

When every step is complete, click Complete in the task panel.

Task UFT-03-07 — Draft Training Engineering Report · done by L&D Strategist

Input: Input completeness check → **Output:** Report draft

Step MP-04.3 — Generate report draft (L&D Strategist)

Type:

Row 1 — Report draft: Report draft — AI shelf-life and spoilage prediction · **Owner:** Karim Bennani · **Start:** 2027-05-14 · **End:** 2027-06-13 · **Budget:** 79000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Report draft: Report draft — Computer vision for foreign-body detection · **Owner:** Ghita Amrani · **Start:** 2027-05-21 · **End:** 2027-06-20 · **Budget:** 64000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-04.4 — Edit and complete report sections (L&D Strategist)

Type:

Complete report sections: Complete report sections

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-06-05

Then click Complete the step.

Result to record in the task: Section 3 'Diagnostic': edit the AI draft, add the interview quote on AI shelf-life and spoilage prediction, keep the RAG table.

When every step is complete, click Complete in the task panel.

Task UFT-03-08 — Run quality review · done by Quality Manager

Input: Report draft → **Output:** Reviewed report

Step MP-04.5 — Run quality review of report (Quality Manager)

Type:

Row 1 — Quality review of report: AI shelf-life and spoilage prediction — half-day workshop · **Date:** 2027-05-26 · **Trainer:** Atlas Formation Conseil · **Participants:** 15 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Quality review of report: Computer vision for foreign-body detection — half-day workshop · **Date:** 2027-06-02 · **Trainer:** Maghreb Learning Partners · **Participants:** 16 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-20.5 — Run periodic quality review (Quality Manager)

Type:

Row 1 — Periodic quality review: AI shelf-life and spoilage prediction — half-day workshop · **Date:** 2027-05-26 · **Trainer:** Atlas Formation Conseil · **Participants:** 18 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Periodic quality review: Computer vision for foreign-body detection — half-day workshop · **Date:** 2027-06-02 · **Trainer:** Maghreb Learning Partners · **Participants:** 18 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Quality review: 11/12 checklist items met; fix item 'sources cited for every figure'. Result: pass after correction.

When every step is complete, click Complete in the task panel.

Task UFT-03-09 — Sequence and budget roadmap · done by L&D Strategist

Input: Reviewed report → **Output:** Draft roadmap

Step MP-04.6 — Sequence roadmap initiatives (L&D Strategist)

Type:

Row 1 — Roadmap initiatives: Roadmap initiatives — AI shelf-life and spoilage prediction · **Owner:** Adil Alaoui · **Start:** 2027-05-18 · **End:** 2027-06-17 · **Budget:** 20000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Roadmap initiatives: Roadmap initiatives — Computer vision for foreign-body detection · **Owner:** Imane Hajji · **Start:** 2027-05-25 · **End:** 2027-06-24 · **Budget:** 35000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-18.1 — Allocate budget by theme and site (Finance Manager)

Type:

Row 1 — Budget by theme and site: Budget by theme and site — AI shelf-life and spoilage prediction · **Owner:** Adil Alaoui · **Start:** 2027-05-18 · **End:** 2027-06-17 · **Budget:** 65000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Budget by theme and site: Budget by theme and site — Computer vision for foreign-body detection · **Owner:** Imane Hajji · **Start:** 2027-05-25 · **End:** 2027-06-24 · **Budget:** 70000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Roadmap: Q2 AI shelf-life and spoilage prediction (6 groups); Q3 HACCP (4 groups); Q4 Computer vision for foreign-body detection (3 groups). Total 1,240,000 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-03-10 — Approve and publish report and roadmap · done by Head of L&D

Input: Draft roadmap → **Output:** Approved Training Engineering Report and roadmap

Step MP-04.7 — Submit roadmap for approval (Head of L&D)

Type:

Row 1 — Roadmap for approval: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-05-15

Row 2 — Roadmap for approval: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-05-22

Then click Complete the step. The rows go to the register "Communications log".

Step MP-04.8 — Record roadmap approval (HR Director)

Type:

Row 1 — Roadmap approval: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Imane Hajji · **Source:** Questionnaire results

Row 2 — Roadmap approval: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Soukaina Ziani · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Roadmap approval register".

Step MP-04.9 — Publish approved report and roadmap (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-01.6 — Record Steering Committee decision (HR Director)

Type:

Row 1 — Steering Committee decision: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Imane Hajji · **Source:** Questionnaire results

Row 2 — Steering Committee decision: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Soukaina Ziani · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Steering Committee decision register".

Result to record in the task: Decision: Approve report and roadmap v1. Justification: within budget, linked to SO-1/SO-2. Publish to all stakeholders.

When every step is complete, click Complete in the task panel.

E2E-30 — Prioritization-to-Resource Plan

Goal: Prioritize themes and plan days, groups, trainers, budget

Starts when: Consolidated training themes requiring prioritization and resource planning.
Ends with: Approved prioritized training plan with days per theme, group planning, trainer allocation, and budget.

Task UFT-30-01 — Consolidate training themes · done by L&D Analyst

Input: Themes → **Output:** Theme list

Step MP-49.1 — Consolidate training themes (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Consolidated list: 9 themes from needs, demands, GPEC and SWOT.

When every step is complete, click Complete in the task panel.

Task UFT-30-02 — Define prioritization criteria · done by L&D Strategist

Input: Strategy → **Output:** Criteria

Step MP-49.2 — Define prioritization criteria (L&D Strategist)

Type:

Row 1 — Prioritization criteria: Raise AI shelf-life and spoilage prediction proficiency of Operator — Production & Food Safety teams to level 3 · **Indicator:** KPI-018 (Mandatory certification compliance) · **Baseline:** 48 % · **Target:** 88 % · **Deadline:** 2027-09-17 · **Owner:** Karim Bennani

Row 2 — Prioritization criteria: Certify Supervisor — Production & Food Safety staff on Computer vision for foreign-body detection · **Indicator:** KPI-019 (Vendor invoice match rate) · **Baseline:** 43 % · **Target:** 71 % · **Deadline:** 2027-09-24 · **Owner:** Ghita Amrani

Row 3 — Prioritization criteria: Cut onboarding time on AI demand planning for perishables by 30 % · **Indicator:** KPI-020 (Integration synchronisation success rate) · **Baseline:** 33 % · **Target:** 86 % · **Deadline:** 2027-10-01 · **Owner:** Adil Alaoui

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Criteria: strategic impact 40%, urgency 30%, number of learners 20%, cost 10%.

When every step is complete, click Complete in the task panel.

Task UFT-30-03 — Prioritize themes · done by L&D Strategist

Input: Criteria → **Output:** Prioritized themes

Step MP-49.3 — Prioritize themes (L&D Strategist)

Type:

Row 1 — Themes: AI shelf-life and spoilage prediction · **Criterion:** Cost · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Themes: Computer vision for foreign-body detection · **Criterion:** Risk · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Themes: AI demand planning for perishables · **Criterion:** Business impact · **Weight (%):** 20 · **Score (1–5):** 2 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Rank 1 AI shelf-life and spoilage prediction (score 86); rank 2 HACCP (81); rank 3 Computer vision for foreign-body detection (74).

When every step is complete, click Complete in the task panel.

Task UFT-30-04 — Estimate days per theme · done by L&D Planner

Input: Prioritized themes → **Output:** Days per theme

Step MP-49.4 — Estimate days per theme (L&D Planner)

Type:

Row 1 — Days per theme: AI shelf-life and spoilage prediction · **Criterion:** Risk · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Days per theme: Computer vision for foreign-body detection · **Criterion:** Business impact · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Days per theme: AI demand planning for perishables · **Criterion:** Urgency · **Weight (%):** 20 · **Score (1–5):** 4 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: AI shelf-life and spoilage prediction: 3 days per group; HACCP: 2 days; Computer vision for foreign-body detection: 1.5 days.

When every step is complete, click Complete in the task panel.

Task UFT-30-05 — Define groups per theme · done by L&D Planner

Input: Days per theme → **Output:** Group plan

Step MP-49.5 — Define number of groups per theme (L&D Planner)

Type:

Row 1 — Number of groups per theme: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Imane Hajji · **Source:** HRIS export

Row 2 — Number of groups per theme: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Soukaina Ziani · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Number of groups per theme register".

Step MP-49.6 — Allocate trainers (L&D Planner)

Type:

Row 1 — Role: Auditor (Read-Only) · **Trainers:** AI shelf-life and spoilage prediction · **Person:** Imane Hajji · **Allocation (%):** 100 · **Start:** 2027-03-27 · **Holder type:** Holder

Row 2 — Role: Platform Administrator · **Trainers:** Computer vision for foreign-body detection · **Person:** Soukaina Ziani · **Allocation (%):** 50 · **Start:** 2027-04-03 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Result to record in the task: AI shelf-life and spoilage prediction: 6 groups of 12; HACCP: 4 groups; Computer vision for foreign-body detection: 3 groups.

When every step is complete, click Complete in the task panel.

Task UFT-30-06 — Allocate trainers and budget · done by Finance Manager

Input: Group plan → **Output:** Resource plan

Step MP-49.7 — Estimate plan budget (Finance Manager)

Type:

Row 1 — Plan budget: AI shelf-life and spoilage prediction · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Plan budget: Computer vision for foreign-body detection · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Plan budget: AI demand planning for perishables · **Criterion:** Cost · **Weight (%):** 20 · **Score (1–5):** 3 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-49.8 — Sequence delivery (L&D Planner)

Type:

Row 1 — Delivery: Delivery — AI shelf-life and spoilage prediction · **Owner:** Soukaina Ziani · **Start:** 2027-04-08 · **End:** 2027-05-08 · **Budget:** 77000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Delivery: Delivery — Computer vision for foreign-body detection · **Owner:** Karim Hajji · **Start:** 2027-04-15 · **End:** 2027-05-15 · **Budget:** 49000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-49.9 — Validate plan with governance (Head of L&D)

Type:

Decision: Approved

Plan with governance: Plan with governance

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-04-08

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: Trainers: 2 internal, vendor A; budget 1,240,000 MAD (within envelope).

When every step is complete, click Complete in the task panel.

Task UFT-30-07 — Publish prioritized training plan · done by L&D Leader

Input: All outputs → **Output:** Prioritized Plan

Step MP-49.10 — Publish prioritized plan (Head of L&D)

Type:

Row 1 — Prioritized plan: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-05-29

Row 2 — Prioritized plan: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-06-05

Then click Complete the step. The rows go to the register "Communications log".

Step MP-49.11 — Track plan execution (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-49.12 — Report on resource utilization (L&D Planner)

Type:

Row 1 — On resource utilization: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-05-29

Row 2 — On resource utilization: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-06-05

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish RPT-002 Prioritized Training Plan 2026 to all stakeholders.

When every step is complete, click Complete in the task panel.

E2E-22 — Multi-Site Plan-to-Deployment

Goal: Adapt and deploy plans across sites

Starts when: Approved roadmap for an organization with several sites or entities. **Ends with:** Site plans adapted, validated and deployed, with deviations escalated.

Task UFT-22-01 — Split plan by site · done by Head of L&D

Input: Approved roadmap → **Output:** Site plans

Step MP-40.1 — Split plan by site (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Split plan into 3 sites: Casablanca 55%, Tanger 30%, Agadir 15%.

When every step is complete, click Complete in the task panel.

Task UFT-22-02 — Adapt site plan to local constraints · done by Site L&D Coordinator

Input: Site plans → **Output:** Adapted site plans

Step MP-40.2 — Adapt site plan to local constraints (Site L&D Coordinator)

Type:

Row 1 — Site plan to local constraints: Site plan to local constraints — AI shelf-life and spoilage prediction · **Owner:** Reda Mansouri · **Start:** 2026-12-09 · **End:** 2027-01-08 · **Budget:** 70000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Site plan to local constraints: Site plan to local constraints — Computer vision for foreign-body detection · **Owner:** Karim Bennani · **Start:** 2026-12-16 · **End:** 2027-01-15 · **Budget:** 58000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Tanger: shift constraints → sessions of 4 hours instead of full days.

When every step is complete, click Complete in the task panel.

Task UFT-22-03 — Localize site materials · done by Instructional Designer

Input: Adapted site plans → **Output:** Localized materials

Step MP-23.1 — Request translation (Instructional Designer)

Type:

Row 1 — Translation: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-12-06

Row 2 — Translation: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-12-13

Then click Complete the step. The rows go to the register "Communications log".

Step MP-23.3 — Validate translation (Subject Matter Expert)

Type:

Decision: Approved

Translation: Translation

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-12-18

Decided by: Karim Hajji

Then click Complete the step.

Step MP-23.6 — Review participation equity (HR Business Partner)

Type:

Participation equity: Participation equity

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-12-19

Then click Complete the step.

Step MP-23.7 — Record inclusion actions (HR Business Partner)

Type:

Row 1 — Inclusion actions: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Bennani · **Source:** Questionnaire results

Row 2 — Inclusion actions: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Ghita Amrani · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Inclusion actions register".

Result to record in the task: Agadir materials translated to AR; validated by the site expert.

When every step is complete, click Complete in the task panel.

Task UFT-22-04 — Validate site plan · done by Head of L&D

Input: Adapted site plans → **Output:** Validated site plans

Step MP-40.3 — Validate site plan (Head of L&D)

Type:

Decision: Approved

Site plan: Site plan

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2026-12-27

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: Site plans validated centrally; budget deviation within ±5%.

When every step is complete, click Complete in the task panel.

Task UFT-22-05 — Schedule site sessions · done by Training Administrator

Input: Validated site plans → **Output:** Site schedules

Step MP-07.1 — Create training session (Training Administrator)

Type:

Row 1 — Training session: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Adil Alaoui · **Source:** Audit report

Row 2 — Training session: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Imane Hajji · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Training session register".

Step MP-11.1 — Book rooms and equipment (Training Administrator)

Type:

Row 1 — Rooms and equipment: Rooms and equipment — AI shelf-life and spoilage prediction · **Owner:** Adil Alaoui · **Start:** 2026-12-15 · **End:** 2027-01-14 · **Budget:** 78000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Rooms and equipment: Rooms and equipment — Computer vision for foreign-body detection · **Owner:** Imane Hajji · **Start:** 2026-12-22 · **End:** 2027-01-21 · **Budget:** 32000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Tanger schedule: 8 sessions, rooms booked, 2 trainers.

When every step is complete, click Complete in the task panel.

Task UFT-22-06 — Deploy site schedule · done by Site L&D Coordinator

Input: Site schedules → **Output:** Deployed schedules

Step MP-40.4 — Deploy site schedule (Site L&D Coordinator)

Type:

Row 1 — Site schedule: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Site schedule: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Schedules deployed and communicated to site managers.

When every step is complete, click Complete in the task panel.

Task UFT-22-07 — Consolidate site status · done by Head of L&D

Input: Deployed schedules → **Output:** Site status

Step MP-40.5 — Consolidate site status (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Status: Casablanca 70%, Tanger 45%, Agadir 20% delivered.

When every step is complete, click Complete in the task panel.

Task UFT-22-08 — Escalate site deviation · done by Head of L&D

Input: Site status → **Output:** Multi-site deployment status

Step MP-40.6 — Escalate site deviation (Head of L&D)

Type:

Row 1 — Site deviation: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-06-14

Row 2 — Site deviation: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-06-21

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Escalate Agadir deviation (-25%) to the HR Director with a recovery plan.

When every step is complete, click Complete in the task panel.

E2E-23 — Regulatory Submission-to-Validation

Goal: Submit and validate training plans with regulatory bodies

Starts when: Approved plan requiring external validation or funding (e.g. OFPPT, GIAC-Agro).
Ends with: Plan validated by the regulatory body and evidence archived.

Task UFT-23-01 — Select regulatory template · done by Compliance Officer

Input: Approved plan → **Output:** Selected template

Step MP-41.1 — Select regulatory template (Compliance Officer)

Type:

Decision: Approved

Regulatory template: Regulatory template

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-12-28

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: Template: OFPPT special training contracts (CSF) — plan file.

When every step is complete, click Complete in the task panel.

Task UFT-23-02 — Generate submission file · done by Compliance Officer

Input: Selected template → **Output:** Submission file

Step MP-41.2 — Generate submission file (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-20.5 — Run periodic quality review (Quality Manager)

Type:

Row 1 — Periodic quality review: AI shelf-life and spoilage prediction — half-day workshop · **Date:** 2027-01-02 · **Trainer:** Atlas Formation Conseil · **Participants:** 16 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Periodic quality review: Computer vision for foreign-body detection — half-day workshop · **Date:** 2027-01-09 · **Trainer:** Maghreb Learning Partners · **Participants:** 16 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Submission file generated: plan, themes, providers, costs; quality check passed.

When every step is complete, click Complete in the task panel.

Task UFT-23-03 — Submit plan to regulatory body · done by Compliance Officer

Input: Submission file → **Output:** Submitted plan

Step MP-41.3 — Submit plan to regulatory body (Compliance Officer)

Type:

Row 1 — Plan to regulatory body: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-12-20

Row 2 — Plan to regulatory body: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-12-27

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Submitted to the regional funding committee on 5 March; reference GSF-2026-118.

When every step is complete, click Complete in the task panel.

Task UFT-23-04 — Track submission status · done by Compliance Officer

Input: Submitted plan → **Output:** Status log

Step MP-41.4 — Track submission status (Compliance Officer)

Type:

Row 1 — Submission status: KPI-011 (API Availability) · **Period:** 2026-Q2 · **Value:** 92 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — Submission status: KPI-012 (Average Level 1 satisfaction) · **Period:** 2026-Q3 · **Value:** 66 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Status: additional document requested (provider accreditation) — sent on 12 March.

When every step is complete, click Complete in the task panel.

Task UFT-23-05 — Record regulator decision · done by Compliance Officer

Input: Status log → **Output:** Regulator decision

Step MP-41.5 — Record regulator decision (Compliance Officer)

Type:

Row 1 — Regulator decision: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Ghita Amrani · **Source:** Questionnaire results

Row 2 — Regulator decision: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Adil Alaoui · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Regulator decision register".

Step MP-14.1 — Register regulatory requirement (Compliance Officer)

Type:

Row 1 — Regulatory requirement: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Ghita Amrani · **Source:** Questionnaire results

Row 2 — Regulatory requirement: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Adil Alaoui · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Regulatory requirement register".

Result to record in the task: Decision: approved with a cap of 520,000 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-23-06 — Submit refund claims · done by Finance Manager

Input: Regulator decision → **Output:** Refund claims

Step MP-18.5 — Submit refund claims (Finance Manager)

Type:

Row 1 — Refund claims: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-06-26

Row 2 — Refund claims: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-07-03

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Refund claims submitted for 12 delivered actions: 318,000 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-23-07 — Archive submission evidence · done by Compliance Officer

Input: Refund claims → **Output:** Regulatory submission tracker

Step MP-41.6 — Archive submission evidence (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-18.6 — Close budget period (Finance Manager)

Type:

Decision: Approved with conditions

Budget period: Budget period

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2027-07-24

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: Archive file, decision and claims; retention 10 years.

When every step is complete, click Complete in the task panel.

E2E-16 — Vendor-to-Finance

Goal: Manage vendors from selection to payment

Starts when: Training need requiring an external provider. **Ends with:** Vendor selected, order issued and payment approved against attendance.

Task UFT-16-01 — Issue request for proposal · done by Purchasing Officer

Input: Training need → **Output:** RFP

Step MP-15.1 — Issue request for proposal (Purchasing Officer)

Type:

Row 1 — Request for proposal: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-09-15

Row 2 — Request for proposal: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-09-22

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: RFP 'Training on AI shelf-life and spoilage prediction' sent to 4 vendors, answers due 15 May.

When every step is complete, click Complete in the task panel.

Task UFT-16-02 — Score vendor proposals · done by Purchasing Officer

Input: RFP → **Output:** Scored proposals

Step MP-15.2 — Score vendor proposals (Purchasing Officer)

Type:

Row 1 — Vendor proposals: AI shelf-life and spoilage prediction · **Criterion:** Feasibility · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Vendor proposals: Computer vision for foreign-body detection · **Criterion:** Cost · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Vendor proposals: AI demand planning for perishables · **Criterion:** Risk · **Weight (%):** 20 · **Score (1–5):** 2 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Scores: vendor A 82, vendor B 76, vendor C 64 (price 40%, expertise 40%, references 20%).

When every step is complete, click Complete in the task panel.

Task UFT-16-03 — Register and verify vendor · done by Purchasing Officer

Input: Scored proposals → **Output:** Accredited vendor

Step MP-15.3 — Register vendor record (Purchasing Officer)

Type:

Row 1 — Vendor record: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Hajji · **Source:** Annual performance review

Row 2 — Vendor record: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Anas Tazi · **Source:** Audit report

Then click Complete the step. The rows go to the register "Vendor record register".

Step MP-15.4 — Verify vendor accreditation (Compliance Officer)

Type:

Vendor accreditation: Vendor accreditation

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-10-09

Then click Complete the step.

Result to record in the task: Register vendor A; accreditation OFPPT verified, valid until December.

When every step is complete, click Complete in the task panel.

Task UFT-16-04 — Issue purchase order · done by Purchasing Officer

Input: Accredited vendor → **Output:** Purchase order

Step MP-15.5 — Issue purchase order (Purchasing Officer)

Type:

Row 1 — Purchase order: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-07-06

Row 2 — Purchase order: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-07-13

Then click Complete the step. The rows go to the register "Communications log".

Step MP-18.3 — Record committed and actual costs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Purchase order PO-2026-044: 180,000 MAD on budget line 'AI shelf-life and spoilage prediction'.

When every step is complete, click Complete in the task panel.

Task UFT-16-05 — Match invoice to order and attendance · done by Training Administrator

Input: Purchase order → **Output:** Matched invoice

Step MP-15.6 — Match invoice to order and attendance (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-11.5 — Reconcile attendance with invoices (Training Administrator)

Type:

Attendance with invoices: Attendance with invoices

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-08-04

Then click Complete the step.

Result to record in the task: Invoice matched with PO and attendance (3 days × 12 learners): OK.

When every step is complete, click Complete in the task panel.

Task UFT-16-06 — Approve vendor payment · done by Finance Manager

Input: Matched invoice → **Output:** Vendor performance & spend report

Step MP-15.7 — Approve vendor payment (Finance Manager)

Type:

Decision: Approved

Vendor payment: Vendor payment

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-07-08

Decided by: Karim Hajji

Then click Complete the step.

Step MP-18.4 — Compare spend against budget (Finance Manager)

Type:

Row 1 — Spend against budget: AI shelf-life and spoilage prediction · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Spend against budget: Computer vision for foreign-body detection · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 5 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Approve payment 180,000 MAD; vendor performance rating 4/5.

When every step is complete, click Complete in the task panel.

FNB-E2E-02 — Food & Beverage Critical-Skills-to-Transformation Plan

Goal: Turn critical-skill gaps and digital and AI use cases into a transformation plan.

Starts when: Annual plan cycle or technology change in Food & Beverage. **Ends with:** Transformation learning paths approved.

Task UFT-FNB-E2-01 — List critical Production & Food Safety skills · done by L&D Analyst

Input: Sector obligations → **Output:** Record each critical skill with its level.

Step MP-02.1 — Define competency families and levels (L&D Analyst)

Type:

Row 1 — Competency families and levels: Raise AI shelf-life and spoilage prediction proficiency of Operator — Production & Food Safety teams to level 3 · **Indicator:** KPI-004 (Training Engineering Report cycle time) · **Baseline:** 34 % · **Target:** 83 % · **Deadline:** 2027-11-08 · **Owner:** Soukaina Ziani

Row 2 — Competency families and levels: Certify Supervisor — Production & Food Safety staff on Computer vision for foreign-body detection · **Indicator:** KPI-005 (Design approval lead time) · **Baseline:** 43 % · **Target:** 83 % · **Deadline:** 2027-11-15 · **Owner:** Karim Hajji

Row 3 — Competency families and levels: Cut onboarding time on AI demand planning for perishables by 30 % · **Indicator:** KPI-006 (License Compliance %) · **Baseline:** 35 % · **Target:** 74 % · **Deadline:** 2027-11-22 · **Owner:** Anas Tazi

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-03.1 — Compute gap matrix (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Critical skills: 6 for Production & Food Safety, each with target level 3.

When every step is complete, click Complete in the task panel.

Task UFT-FNB-E2-02 — List digital and AI use cases · done by L&D Strategist

Input: Sector obligations → **Output:** Record the use cases that change jobs.

Step MP-03.3 — Plan diagnostic interviews (L&D Analyst)

Type:

Row 1 — Diagnostic interviews: Diagnostic interviews — AI shelf-life and spoilage prediction · **Owner:** Karim Hajji · **Start:** 2027-05-24 · **End:** 2027-06-23 · **Budget:** 36000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Diagnostic interviews: Diagnostic interviews — Computer vision for foreign-body detection · **Owner:** Anas Tazi · **Start:** 2027-05-31 · **End:** 2027-06-30 · **Budget:** 52000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Use cases: AI shelf-life and spoilage prediction; Computer vision for foreign-body detection; AI demand planning for perishables.

When every step is complete, click Complete in the task panel.

Task UFT-FNB-E2-03 — Forecast impacted roles · done by Performance Analyst

Input: Sector obligations → **Output:** Review the AI forecast of impacted roles.

Step MP-03.5 — Cluster needs into training themes (L&D Analyst)

Type:

Row 1 — Needs into training themes: AI shelf-life and spoilage prediction · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Needs into training themes: Computer vision for foreign-body detection · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Needs into training themes: AI demand planning for perishables · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 3 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-28.3 — Forecast skill gaps (Performance Analyst)

Type:

Row 1 — Skill gaps: KPI-006 (License Compliance %) · **Period:** 2026-Q2 · **Value:** 56 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Impacted roles: supervisors (high), operators (medium); accept the AI forecast.

When every step is complete, click Complete in the task panel.

Task UFT-FNB-E2-04 — Approve transformation paths · done by Instructional Designer

Input: Sector obligations → **Output:** Approve the learning paths per role.

Step MP-05.2 — Define learning path and modules (Instructional Designer)

Type:

Row 1 — Learning path and modules: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Adil Alaoui · **Source:** Audit report

Row 2 — Learning path and modules: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Imane Hajji · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Learning path and modules register".

Step MP-05.7 — Approve design document (Head of L&D)

Type:

Decision: Approved with conditions

Design document: Design document

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2027-08-13

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: Approve 2 transformation paths: 'AI shelf-life and spoilage prediction for supervisors', 'Computer vision for foreign-body detection for operators'.

When every step is complete, click Complete in the task panel.

SME-E2E-02 — SME Funding-to-Refund

Goal: Secure funding and recover the refunds of the plan.

Starts when: Short plan approved. **Ends with:** Refund received and recorded.

Task UFT-SME2-01 — Select eligible themes · done by L&D Analyst

Input: Owner-manager input → **Output:** Keep the themes that funding rules accept.

Step SME-MP-02.1 — Select eligible themes (L&D Analyst)

Type:

Decision: Approved

Eligible themes: Eligible themes

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-05-29

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: Eligible themes: AI shelf-life and spoilage prediction and HACCP (funding rules met).

When every step is complete, click Complete in the task panel.

Task UFT-SME2-02 — Build the funding file · done by Finance Manager

Input: Owner-manager input → **Output:** Assemble the file for the funding body.

Step SME-MP-02.2 — Build funding file (Finance Manager)

Type:

Row 1 — Funding file: Funding file — AI shelf-life and spoilage prediction · **Owner:** Ghita Amrani · **Start:** 2027-06-07 · **End:** 2027-07-07 · **Budget:** 59000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Funding file: Funding file — Computer vision for foreign-body detection · **Owner:** Adil Alaoui · **Start:** 2027-06-14 · **End:** 2027-07-14 · **Budget:** 51000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-41.2 — Generate submission file (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Funding file: plan, quotes, provider accreditation, attendance model.

When every step is complete, click Complete in the task panel.

Task UFT-SME2-03 — Submit the refund claim · done by Finance Manager

Input: Owner-manager input → **Output:** Submit the claim after delivery.

Step SME-MP-02.3 — Submit refund claim (Finance Manager)

Type:

Row 1 — Refund claim: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-06-04

Row 2 — Refund claim: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-06-11

Then click Complete the step. The rows go to the register "Communications log".

Step MP-18.5 — Submit refund claims (Finance Manager)

Type:

Row 1 — Refund claims: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-06-04

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Refund claim submitted: 28,000 MAD with signed attendance sheets.

When every step is complete, click Complete in the task panel.

Task UFT-SME2-04 — Record the refund · done by Finance Manager

Input: Owner-manager input → **Output:** Record the refund and close the file.

Step SME-MP-02.4 — Track refund payment (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Refund received: 28,000 MAD on 20 November; file closed.

When every step is complete, click Complete in the task panel.

Gate G3 — G3 — Report & roadmap approved: close the phase

3. Open the project workspace and click the gate button of the phase.
3. Tick each checklist item once its evidence is attached, then click Submit for decision.
3. Click Go. Type the justification: All mandatory items met; evidence attached.
3. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

Phase 4 — Design & delivery

E2E-04 — Roadmap-to-Curriculum Design

Goal: Convert roadmap into curriculum maps, learning paths, design documents

Starts when: Approved Training Engineering Report and roadmap published. **Ends with:** Approved curriculum maps, learning paths and design documents.

Task UFT-04-01 — Create curriculum map · done by Instructional Designer

Input: Approved roadmap → **Output:** Curriculum map

Step MP-05.1 — Create curriculum map from roadmap (Instructional Designer)

Type:

Row 1 — Curriculum map from roadmap: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Mansouri · **Source:** Audit report

Row 2 — Curriculum map from roadmap: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Sara Lahlou · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Curriculum map from roadmap register".

Result to record in the task: Curriculum map 'AI shelf-life and spoilage prediction': 3 learning paths (operators, supervisors, managers), 9 modules.

When every step is complete, click Complete in the task panel.

Task UFT-04-02 — Define learning paths and modules · done by Instructional Designer

Input: Curriculum map → **Output:** Learning paths

Step MP-05.2 — Define learning path and modules (Instructional Designer)

Type:

Row 1 — Learning path and modules: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Sara Lahlou · **Source:** HRIS export

Row 2 — Learning path and modules: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Soukaina Mansouri · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Learning path and modules register".

Result to record in the task: Path 'Supervisors — AI shelf-life and spoilage prediction': 4 modules, 3 days blended (1 day e-learning, 2 days workshop).

When every step is complete, click Complete in the task panel.

Task UFT-04-03 — Write learning objectives · done by Instructional Designer

Input: Learning paths → **Output:** Learning objectives

Step MP-05.3 — Write learning objectives per module (Instructional Designer)

Type:

Row 1 — Learning objectives per module: Raise AI shelf-life and spoilage prediction proficiency of Operator — Production & Food Safety teams to level 3 · **Indicator:** KPI-002 (Skills inventory validation rate) · **Baseline:** 37 % · **Target:** 77 % · **Deadline:** 2028-01-23 · **Owner:** Soukaina Mansouri

Row 2 — Learning objectives per module: Certify Supervisor — Production & Food Safety staff on Computer vision for foreign-body detection · **Indicator:** KPI-003 (Critical gap rate) · **Baseline:** 39 % · **Target:** 74 % · **Deadline:** 2028-01-30 · **Owner:** Reda Mansouri

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Objective M1: 'By the end, the supervisor reads the AI shelf-life and spoilage prediction dashboard and decides the shift action in 5 minutes.'

When every step is complete, click Complete in the task panel.

Task UFT-04-04 — Propose module structure · done by Instructional Designer

Input: Learning objectives → **Output:** Module structure

Step MP-05.4 — Propose module structure (Instructional Designer)

Type:

Row 1 — Module structure: Module structure — AI shelf-life and spoilage prediction · **Owner:** Reda Mansouri · **Start:** 2027-08-08 · **End:** 2027-09-07 · **Budget:** 79000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Module structure: Module structure — Computer vision for foreign-body detection · **Owner:** Karim Bennani · **Start:** 2027-08-15 · **End:** 2027-09-14 · **Budget:** 35000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Accept the proposed structure (intro, demo, practice, quiz); replace the quiz by a live case from Production & Food Safety.

When every step is complete, click Complete in the task panel.

Task UFT-04-05 — Set assessment strategy · done by Instructional Designer

Input: Module structure → **Output:** Assessment strategy

Step MP-05.5 — Set assessment strategy (Instructional Designer)

Type:

Row 1 — Assessment strategy: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Assessment strategy: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Assessment: pre/post test (Level 2) and manager observation after 30 days (Level 3).

When every step is complete, click Complete in the task panel.

Task UFT-04-06 — Develop and tag content · done by Content Developer

Input: Assessment strategy → **Output:** Tagged content assets

Step MP-06.1 — Upload content assets (Content Developer)

Type:

Row 1 — Content assets: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Content assets: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Step MP-06.2 — Validate package format (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-06.5 — Tag content with competencies (Content Developer)

Type:

Row 1 — Content with competencies: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Ghita Amrani · **Source:** Audit report

Row 2 — Content with competencies: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Adil Alaoui · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Content with competencies register".

Result to record in the task: Upload 'M1_AI shelf-life and spoilage prediction.pptx' and 'M1_video.mp4'; tag competency 'AI shelf-life and spoilage prediction' level 3.

When every step is complete, click Complete in the task panel.

Task UFT-04-07 — Localize and check accessibility · done by Instructional Designer

Input: Tagged content assets → **Output:** Localized accessible content

Step MP-23.1 — Request translation (Instructional Designer)

Type:

Row 1 — Translation: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-08-09

Row 2 — Translation: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-08-16

Then click Complete the step. The rows go to the register "Communications log".

Step MP-23.2 — Draft machine translation (Instructional Designer)

Type:

Row 1 — Machine translation: Machine translation — AI shelf-life and spoilage prediction · **Owner:** Adil Alaoui · **Start:** 2027-08-14 · **End:** 2027-09-13 · **Budget:** 21000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Machine translation: Machine translation — Computer vision for foreign-body detection · **Owner:** Imane Hajji · **Start:** 2027-08-21 · **End:** 2027-09-20 · **Budget:** 43000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-23.3 — Validate translation (Subject Matter Expert)

Type:

Decision: Approved

Translation: Translation

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-08-07

Decided by: Karim Hajji

Then click Complete the step.

Step MP-23.4 — Run accessibility check (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-23.5 — Fix accessibility issues (Content Developer)

Type:

Accessibility issues: Accessibility issues

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-08-08

Then click Complete the step.

Result to record in the task: Request FR and AR versions; validate the AI draft translation; accessibility check: 0 blocking issues.

When every step is complete, click Complete in the task panel.

Task UFT-04-08 — Approve design document · done by Head of L&D

Input: Localized accessible content → **Output:** Approved design document

Step MP-05.6 — Review design with subject matter expert (Subject Matter Expert)

Type:

Design with subject matter expert: Design with subject matter expert

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-08-17

Then click Complete the step.

Step MP-05.7 — Approve design document (Head of L&D)

Type:

Decision: Approved

Design document: Design document

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-08-16

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: Decision: design approved. Comment: SME review done on 12 May; ready for delivery.

When every step is complete, click Complete in the task panel.

E2E-05 — Design-to-Delivery

Goal: Deliver training across all modalities

Starts when: Approved design document and prioritized training plan. **Ends with:** Training delivered across all modalities with attendance and completion recorded.

Task UFT-05-01 — Publish content to catalog · done by Content Developer

Input: Approved design → **Output:** Published catalog

Step MP-06.3 — Route content for expert review (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-06.4 — Record review decision (Subject Matter Expert)

Type:

Row 1 — Review decision: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Soukaina Ziani · **Source:** Questionnaire results

Row 2 — Review decision: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Hajji · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Review decision register".

Step MP-06.6 — Publish content to catalog (Content Developer)

Type:

Row 1 — Content to catalog: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-08-13

Row 2 — Content to catalog: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-08-20

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish module 'M1 AI shelf-life and spoilage prediction' to the catalog; audience: supervisors; languages EN/FR/AR.

When every step is complete, click Complete in the task panel.

Task UFT-05-02 — Book logistics · done by Training Administrator

Input: Published catalog → **Output:** Logistics plan

Step MP-11.1 — Book rooms and equipment (Training Administrator)

Type:

Row 1 — Rooms and equipment: Rooms and equipment — AI shelf-life and spoilage prediction · **Owner:** Karim Hajji · **Start:** 2027-08-20 · **End:** 2027-09-19 · **Budget:** 71000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Rooms and equipment: Rooms and equipment — Computer vision for foreign-body detection · **Owner:** Anas Tazi · **Start:** 2027-08-27 · **End:** 2027-09-26 · **Budget:** 58000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-11.2 — Manage trainer calendars (Training Administrator)

Type:

Row 1 — Trainer calendars: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Hajji · **Source:** Annual performance review

Row 2 — Trainer calendars: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Anas Tazi · **Source:** Audit report

Then click Complete the step. The rows go to the register "Trainer calendars register".

Result to record in the task: Room 'Training A' (20 seats) 3-5 June; projector; trainer calendar blocked.

When every step is complete, click Complete in the task panel.

Task UFT-05-03 — Schedule sessions · done by Training Administrator

Input: Logistics plan → **Output:** Session schedule

Step MP-07.1 — Create training session (Training Administrator)

Type:

Row 1 — Training session: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Anas Tazi · **Source:** Audit report

Row 2 — Training session: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Karim Mansouri · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Training session register".

Step MP-07.2 — Check scheduling conflicts (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Session S-01 'AI shelf-life and spoilage prediction — supervisors', 3-5 June, 12 seats, no conflict reported.

When every step is complete, click Complete in the task panel.

Task UFT-05-04 — Enroll learners and send convocations · done by Training Administrator

Input: Session schedule → **Output:** Enrollments

Step MP-07.3 — Enroll learners into session (Training Administrator)

Type:

Row 1 — Learners into session: AI shelf-life and spoilage prediction — half-day workshop · **Date:** 2027-09-03 · **Trainer:** Atlas Formation Conseil · **Participants:** 16 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Learners into session: Computer vision for foreign-body detection — half-day workshop · **Date:** 2027-09-10 · **Trainer:** Maghreb Learning Partners · **Participants:** 14 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-07.4 — Send convocations (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-17.1 — Provision users via SSO (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Enroll 12 supervisors; convocations sent by e-mail and SMS in each learner's language.

When every step is complete, click Complete in the task panel.

Task UFT-05-05 — Push microlearning capsules · done by Instructional Designer

Input: Enrollments → **Output:** Capsules in flow of work

Step MP-25.1 — Author microlearning capsule (Instructional Designer)

Type:

Row 1 — Microlearning capsule: Microlearning capsule — AI shelf-life and spoilage prediction · **Owner:** Sara Lahlou · **Start:** 2027-08-26 · **End:** 2027-09-25 · **Budget:** 28000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Microlearning capsule: Microlearning capsule — Computer vision for foreign-body detection · **Owner:** Soukaina Mansouri · **Start:** 2027-09-02 · **End:** 2027-10-02 · **Budget:** 51000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-25.2 — Generate capsule draft from source (Instructional Designer)

Type:

Row 1 — Capsule draft from source: Capsule draft from source — AI shelf-life and spoilage prediction · **Owner:** Sara Lahlou · **Start:** 2027-08-26 · **End:** 2027-09-25 · **Budget:** 71000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Capsule draft from source: Capsule draft from source — Computer vision for foreign-body detection · **Owner:** Soukaina Mansouri · **Start:** 2027-09-02 · **End:** 2027-10-02 · **Budget:** 50000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-25.3 — Push capsule to collaboration channel (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-25.4 — Consume capsule on mobile (Learner)

Type:

Row 1 — Capsule on mobile: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Sara Lahlou · **Source:** Interview with the function head

Row 2 — Capsule on mobile: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Soukaina Mansouri · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Capsule on mobile register".

Step MP-25.5 — Track capsule completion (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Capsule '5-minute Computer vision for foreign-body detection check' pushed to the Teams channel of Production & Food Safety; 48 views in week 1.

When every step is complete, click Complete in the task panel.

Task UFT-05-06 — Run immersive simulations · done by Trainer

Input: Enrollments → **Output:** Simulation results

Step MP-30.1 — Define simulation scenario (Instructional Designer)

Type:

Row 1 — Simulation scenario: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Soukaina Mansouri · **Source:** Questionnaire results

Row 2 — Simulation scenario: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Reda Mansouri · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Simulation scenario register".

Step MP-30.2 — Configure simulation scoring (Instructional Designer)

Type:

Row 1 — Simulation scoring: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Simulation scoring: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Step MP-30.3 — Launch simulation session (Trainer)

Type:

Row 1 — Simulation session: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-08-23

Row 2 — Simulation session: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-08-30

Then click Complete the step. The rows go to the register "Communications log".

Step MP-30.4 — Capture simulation performance (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-30.5 — Debrief learner (Trainer)

Type:

Row 1 — Learner: AI shelf-life and spoilage prediction — half-day workshop · **Date:** 2027-09-07 · **Trainer:** Atlas Formation Conseil · **Participants:** 10 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Learner: Computer vision for foreign-body detection — half-day workshop · **Date:** 2027-09-14 · **Trainer:** Maghreb Learning Partners · **Participants:** 18 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-30.6 — Record simulation evidence (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Simulation 'Production & Food Safety incident': score 78/100; debrief notes recorded; evidence saved.

When every step is complete, click Complete in the task panel.

Task UFT-05-07 — Record attendance · done by Trainer

Input: Session schedule → **Output:** Attendance records

Step MP-07.5 — Record attendance (Trainer)

Type:

Row 1 — Attendance: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Reda Mansouri · **Source:** Annual performance review

Row 2 — Attendance: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Bennani · **Source:** Audit report

Then click Complete the step. The rows go to the register "Attendance register".

Result to record in the task: Attendance S-01: 11 present, 1 absent (justified). Signature sheet attached.

When every step is complete, click Complete in the task panel.

Task UFT-05-08 — Close sessions · done by Training Administrator

Input: Attendance records → **Output:** Completion records

Step MP-07.6 — Close session and record completion (Training Administrator)

Type:

Decision: Approved with conditions

Session and record completion: Session and record completion

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2027-09-22

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: Close S-01: 11 completions recorded; certificate issued to each participant.

When every step is complete, click Complete in the task panel.

Task UFT-05-09 — Reconcile and archive period · done by Training Administrator

Input: Completion records → **Output:** Closed delivery period

Step MP-11.5 — Reconcile attendance with invoices (Training Administrator)

Type:

Attendance with invoices: Attendance with invoices

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-08-28

Then click Complete the step.

Step MP-11.6 — Archive period records (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-11.3 — Import external training records (Training Administrator)

Type:

Row 1 — External training records: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — External training records: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Step MP-11.4 — Correct training record with justification (Training Administrator)

Type:

Training record with justification: Training record with justification

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-08-28

Then click Complete the step.

Result to record in the task: Reconcile invoice INV-2026-118 (3 days × 12 learners) with attendance; archive period Q2.

When every step is complete, click Complete in the task panel.

E2E-06 — Learner-Journey-to-Engagement

Goal: Deliver personalized, engaging learning experience

Starts when: Learner enrolled in a learning path or session. **Ends with:** Personalized learning journey completed with engagement measured.

Task UFT-06-01 — Generate personal learning plan · done by L&D Analyst

Input: Enrollments → **Output:** Personal learning plans

Step MP-08.1 — Generate personal learning plan (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Personal plan generated for each learner: 3 items on AI shelf-life and spoilage prediction, 1 capsule on Computer vision for foreign-body detection.

When every step is complete, click Complete in the task panel.

Task UFT-06-02 — Recommend learning items · done by Learner

Input: Personal learning plans → **Output:** Recommendations

Step MP-08.2 — Recommend learning items (Learner)

Type:

Row 1 — Learning items: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Imane Hajji · **Source:** Questionnaire results

Row 2 — Learning items: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Soukaina Ziani · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Learning items register".

Step MP-24.1 — Enable personalization per scope (Platform Administrator)

Type:

Row 1 — Personalization per scope: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Personalization per scope: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Accept 2 recommendations, reject 1 ('already mastered'). The outcome is logged.

When every step is complete, click Complete in the task panel.

Task UFT-06-03 — Adapt path to performance · done by Instructional Designer

Input: Recommendations → **Output:** Adapted paths

Step MP-24.2 — Set adaptation rules (Instructional Designer)

Type:

Row 1 — Adaptation rules: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Adaptation rules: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Step MP-24.3 — Adapt path to learner performance (Learner)

Type:

Row 1 — Path to learner performance: Path to learner performance — AI shelf-life and spoilage prediction · **Owner:** Soukaina Ziani · **Start:** 2027-09-09 · **End:** 2027-10-09 · **Budget:** 30000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Path to learner performance: Path to learner performance — Computer vision for foreign-body detection · **Owner:** Karim Hajji · **Start:** 2027-09-16 · **End:** 2027-10-16 · **Budget:** 73000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-24.4 — Record learner response to adaptation (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Rule: if the quiz score < 60%, add the remedial capsule 'AI shelf-life and spoilage prediction basics'.

When every step is complete, click Complete in the task panel.

Task UFT-06-04 — Animate social learning · done by Knowledge Manager

Input: Adapted paths → **Output:** Active cohorts

Step MP-26.1 — Create learning cohort group (Knowledge Manager)

Type:

Row 1 — Learning cohort group: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Karim Hajji · **Source:** Audit report

Row 2 — Learning cohort group: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Anas Tazi · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Learning cohort group register".

Step MP-26.2 — Invite group members (Knowledge Manager)

Type:

Row 1 — Group members: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-09-06

Row 2 — Group members: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-09-13

Then click Complete the step. The rows go to the register "Communications log".

Step MP-26.3 — Post question or answer (Learner)

Type:

Row 1 — Question or answer: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-09-06

Row 2 — Question or answer: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-09-13

Then click Complete the step. The rows go to the register "Communications log".

Step MP-26.4 — Endorse expert answer (Subject Matter Expert)

Type:

Decision: Approved with conditions

Expert answer: Expert answer

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2027-10-02

Decided by: Karim Hajji

Then click Complete the step.

Step MP-26.5 — Flag inappropriate content (Learner)

Type:

Row 1 — Inappropriate content: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Karim Hajji · **Source:** Audit report

Row 2 — Inappropriate content: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Anas Tazi · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Inappropriate content register".

Step MP-26.6 — Resolve moderation flag (Knowledge Manager)

Type:

Moderation flag: Moderation flag

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-10-03

Then click Complete the step.

Result to record in the task: Create cohort 'AI shelf-life and spoilage prediction supervisors 2026' and invite 12 members; first question posted.

When every step is complete, click Complete in the task panel.

Task UFT-06-05 — Run gamification · done by Instructional Designer

Input: Active cohorts → **Output:** Awards

Step MP-27.1 — Define points and badge rules (Instructional Designer)

Type:

Row 1 — Points and badge rules: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Anas Tazi · **Source:** HRIS export

Row 2 — Points and badge rules: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Karim Mansouri · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Points and badge rules register".

Step MP-27.2 — Configure leaderboard scope (Instructional Designer)

Type:

Row 1 — Leaderboard scope: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Leaderboard scope: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Step MP-27.3 — Award points on completion (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-27.4 — Unlock badge (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-27.6 — Adjust gamification rules (Instructional Designer)

Type:

Gamification rules: Gamification rules

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-09-07

Then click Complete the step.

Result to record in the task: Badge 'AI shelf-life and spoilage prediction Practitioner' for completing 3 modules; 10 points per capsule.

When every step is complete, click Complete in the task panel.

Task UFT-06-06 — Match and run coaching · done by L&D Business Partner

Input: Learner requests → **Output:** Coaching sessions

Step MP-21.1 — Request coaching (Learner)

Type:

Row 1 — Coaching: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-09-10

Row 2 — Coaching: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-09-17

Then click Complete the step. The rows go to the register "Communications log".

Step MP-21.2 — Match coach to learner (L&D Business Partner)

Type:

Row 1 — Coach to learner: AI shelf-life and spoilage prediction · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Coach to learner: Computer vision for foreign-body detection · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-21.3 — Schedule coaching sessions (Coach)

Type:

Row 1 — Coaching sessions: Coaching sessions — AI shelf-life and spoilage prediction · **Owner:** Karim Mansouri · **Start:** 2027-09-15 · **End:** 2027-10-15 · **Budget:** 41000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Coaching sessions: Coaching sessions — Computer vision for foreign-body detection · **Owner:** Sara Lahlou · **Start:** 2027-09-22 · **End:** 2027-10-22 · **Budget:** 80000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-21.4 — Log coaching session notes (Coach)

Type:

Row 1 — Coaching session notes: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Karim Mansouri · **Source:** Interview with the function head

Row 2 — Coaching session notes: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Sara Lahlou · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Coaching session notes register".

Step MP-21.5 — Evaluate coaching outcomes (Manager)

Type:

Row 1 — Coaching outcomes: AI shelf-life and spoilage prediction · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Coaching outcomes: Computer vision for foreign-body detection · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 5 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-21.6 — Close coaching engagement (Coach)

Type:

Decision: Approved

Coaching engagement: Coaching engagement

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-09-15

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: Match coach 'Senior Production & Food Safety supervisor' to 3 learners; 4 sessions of 1 hour.

When every step is complete, click Complete in the task panel.

Task UFT-06-07 — Collect learner feedback · done by Learner

Input: Coaching sessions → **Output:** Learner feedback

Step MP-08.3 — Enroll in recommended item (Learner)

Type:

Row 1 — In recommended item: AI shelf-life and spoilage prediction — half-day workshop · **Date:** 2027-09-27 · **Trainer:** Atlas Formation Conseil · **Participants:** 17 · **Hours:** 3.5 · **Modality:** On site

Row 2 — In recommended item: Computer vision for foreign-body detection — half-day workshop · **Date:** 2027-10-04 · **Trainer:** Maghreb Learning Partners · **Participants:** 17 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-08.4 — Submit learning feedback (Learner)

Type:

Row 1 — Learning feedback: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-09-12

Row 2 — Learning feedback: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-09-19

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Feedback: 4.4/5; comment 'more real cases from Production & Food Safety'.

When every step is complete, click Complete in the task panel.

Task UFT-06-08 — Monitor engagement and nudge · done by L&D Analyst

Input: Learner feedback → **Output:** Engagement report

Step MP-08.5 — Monitor engagement indicators (L&D Analyst)

Type:

Row 1 — Engagement indicators: KPI-004 (Training Engineering Report cycle time) · **Period:** 2026-Q3 · **Value:** 94 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — Engagement indicators: KPI-005 (Design approval lead time) · **Period:** 2026-Q1 · **Value:** 94 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-08.6 — Trigger re-engagement nudge (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-24.5 — Review recommendation acceptance (L&D Analyst)

Type:

Recommendation acceptance: Recommendation acceptance

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-10-04

Then click Complete the step.

Step MP-27.5 — Review engagement uplift (L&D Analyst)

Type:

Engagement uplift: Engagement uplift

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-10-04

Then click Complete the step.

Step MP-24.6 — Tune personalization settings (L&D Analyst)

Type:

Row 1 — Personalization settings: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Personalization settings: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Step MP-28.4 — Predict learner drop-out risk (Performance Analyst)

Type:

Row 1 — Learner drop-out risk: KPI-004 (Training Engineering Report cycle time) · **Period:** 2026-Q3 · **Value:** 72 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Learner drop-out risk: KPI-005 (Design approval lead time) · **Period:** 2026-Q1 · **Value:** 75 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-28.5 — Review predictions with L&D (Head of L&D)

Type:

Predictions with L&D: Predictions with L&D

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-10-04

Then click Complete the step.

Step MP-28.6 — Create preventive action (L&D Analyst)

Type:

Row 1 — Preventive action: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Soukaina Mansouri · **Source:** Annual performance review

Row 2 — Preventive action: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Reda Mansouri · **Source:** Audit report

Then click Complete the step. The rows go to the register "Preventive action register".

Result to record in the task: Engagement 81%; nudge sent to 9 inactive learners; drop-out risk high for 2 learners.

When every step is complete, click Complete in the task panel.

E2E-13 — Content-Curate-to-Retire

Goal: Publish, maintain, retire content

Starts when: New content published or content past its review date. **Ends with:** Catalog curated, maintained and outdated content retired.

Task UFT-13-01 — Aggregate provider catalogs · done by Content Curator

Input: Provider catalogs → **Output:** Aggregated catalog

Step MP-29.1 — Aggregate provider catalogs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Aggregate 2 provider catalogs (LinkedIn Learning, Coursera): 1,240 items imported.

When every step is complete, click Complete in the task panel.

Task UFT-13-02 — Recommend curated items · done by Content Curator

Input: Aggregated catalog → **Output:** Ranked items

Step MP-29.2 — Recommend curated items (Content Curator)

Type:

Row 1 — Curated items: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Karim Bennani · **Source:** HRIS export

Row 2 — Curated items: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Ghita Amrani · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Curated items register".

Result to record in the task: Keep the 15 top-ranked items on AI shelf-life and spoilage prediction; reject 3 items older than 3 years.

When every step is complete, click Complete in the task panel.

Task UFT-13-03 — Approve and organize collections · done by Content Curator

Input: Ranked items → **Output:** Curated collections

Step MP-29.3 — Approve curated item (Content Curator)

Type:

Decision: Approved

Curated item: Curated item

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-09-25

Decided by: Karim Hajji

Then click Complete the step.

Step MP-29.4 — Organize curated collection (Content Curator)

Type:

Row 1 — Curated collection: Curated collection — AI shelf-life and spoilage prediction · **Owner:** Ghita Amrani · **Start:** 2027-09-25 · **End:** 2027-10-25 · **Budget:** 67000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Curated collection: Curated collection — Computer vision for foreign-body detection · **Owner:** Adil Alaoui · **Start:** 2027-10-02 · **End:** 2027-11-01 · **Budget:** 37000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Collection 'AI shelf-life and spoilage prediction starter kit': 8 items, audience supervisors, review date in 12 months.

When every step is complete, click Complete in the task panel.

Task UFT-13-04 — Review peer content · done by Subject Matter Expert

Input: User submissions → **Output:** Approved peer content

Step MP-33.1 — Submit user-generated content (Employee)

Type:

Row 1 — User-generated content: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-09-22

Row 2 — User-generated content: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-09-29

Then click Complete the step. The rows go to the register "Communications log".

Step MP-33.2 — Check content against policy (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-33.3 — Peer review content (Subject Matter Expert)

Type:

Row 1 — Review content: AI shelf-life and spoilage prediction — half-day workshop · **Date:** 2027-10-07 · **Trainer:** Atlas Formation Conseil · **Participants:** 20 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Review content: Computer vision for foreign-body detection — half-day workshop · **Date:** 2027-10-14 · **Trainer:** Maghreb Learning Partners · **Participants:** 10 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Peer video 'How we use Computer vision for foreign-body detection on shift' reviewed by an expert: approved with 1 correction.

When every step is complete, click Complete in the task panel.

Task UFT-13-05 — Promote and rate content · done by Knowledge Manager

Input: Approved peer content → **Output:** Rated content

Step MP-33.5 — Send approved content to curation (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-33.6 — Rate user-generated item (Learner)

Type:

Row 1 — User-generated item: AI shelf-life and spoilage prediction · **Criterion:** Cost · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — User-generated item: Computer vision for foreign-body detection · **Criterion:** Risk · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Send approved peer content to curation; average learner rating 4.5/5.

When every step is complete, click Complete in the task panel.

Task UFT-13-06 — Flag content past review date · done by Content Curator

Input: Rated content → **Output:** Review queue

Step MP-29.5 — Flag content past review date (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: 14 items past review date flagged; owners notified.

When every step is complete, click Complete in the task panel.

Task UFT-13-07 — Retire outdated content · done by Content Curator

Input: Review queue → **Output:** Content library health report

Step MP-29.6 — Retire outdated content (Content Curator)

Type:

Row 1 — Outdated content: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Outdated content: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Step MP-25.6 — Retire low-value capsule (Content Curator)

Type:

Row 1 — Low-value capsule: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Low-value capsule: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Retire 6 outdated items and 2 low-value capsules; library health 92%.

When every step is complete, click Complete in the task panel.

E2E-14 — Extended-Enterprise-Training

Goal: Certify partners and train customers

Starts when: Partner, reseller or customer training program launched. **Ends with:** External learners trained, paid and certified.

Task UFT-14-01 — Create external sub-portal · done by Extended Enterprise Manager

Input: Program brief → **Output:** External portal

Step MP-22.1 — Create external sub-portal (Extended Enterprise Manager)

Type:

Row 1 — External sub-portal: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Anas Tazi · **Source:** Interview with the function head

Row 2 — External sub-portal: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Mansouri · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "External sub-portal register".

Result to record in the task: Sub-portal 'Partners Academy — Coopérative Laitière Al Baraka' created for distributors and installers.

When every step is complete, click Complete in the task panel.

Task UFT-14-02 — Configure catalog and pricing · done by Extended Enterprise Manager

Input: External portal → **Output:** Priced catalog

Step MP-22.2 — Configure external catalog and pricing (Extended Enterprise Manager)

Type:

Row 1 — External catalog and pricing: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — External catalog and pricing: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Step MP-18.1 — Allocate budget by theme and site (Finance Manager)

Type:

Row 1 — Budget by theme and site: Budget by theme and site — AI shelf-life and spoilage prediction · **Owner:** Karim Mansouri · **Start:** 2027-10-07 · **End:** 2027-11-06 · **Budget:** 30000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Budget by theme and site: Budget by theme and site — Computer vision for foreign-body detection · **Owner:** Sara Lahlou · **Start:** 2027-10-14 · **End:** 2027-11-13 · **Budget:** 74000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Catalog: 'HACCP for partners' 1,200 MAD; 'AI shelf-life and spoilage prediction certification' 2,400 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-14-03 — Process payment and enroll · done by Extended Enterprise Manager

Input: Priced catalog → **Output:** External enrollments

Step MP-22.3 — Process online payment (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-22.4 — Enroll external learner (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: 18 online payments processed; 18 external learners enrolled.

When every step is complete, click Complete in the task panel.

Task UFT-14-04 — Deliver external sessions · done by Training Administrator

Input: External enrollments → **Output:** Attendance

Step MP-07.1 — Create training session (Training Administrator)

Type:

Row 1 — Training session: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Soukaina Mansouri · **Source:** Audit report

Row 2 — Training session: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Reda Mansouri · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Training session register".

Step MP-07.5 — Record attendance (Trainer)

Type:

Row 1 — Attendance: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Soukaina Mansouri · **Source:** Audit report

Row 2 — Attendance: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Reda Mansouri · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Attendance register".

Result to record in the task: Session P-01 (virtual), 18 invited, 16 present.

When every step is complete, click Complete in the task panel.

Task UFT-14-05 — Track external completion · done by Extended Enterprise Manager

Input: Attendance → **Output:** Completion status

Step MP-22.5 — Track external completion (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Completion: 15 of 16 passed the final quiz.

When every step is complete, click Complete in the task panel.

Task UFT-14-06 — Issue partner certification · done by Extended Enterprise Manager

Input: Completion status → **Output:** Partner certificates

Step MP-22.6 — Issue partner certification (Extended Enterprise Manager)

Type:

Row 1 — Partner certification: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-10-10

Row 2 — Partner certification: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-10-17

Then click Complete the step. The rows go to the register "Communications log".

Step MP-14.4 — Issue certificate on completion (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Issue 15 partner certificates valid 2 years.

When every step is complete, click Complete in the task panel.

Task UFT-14-07 — Reconcile external revenue · done by Finance Manager

Input: Partner certificates → **Output:** Revenue reconciliation

Step MP-18.3 — Record committed and actual costs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-18.4 — Compare spend against budget (Finance Manager)

Type:

Row 1 — Spend against budget: AI shelf-life and spoilage prediction · **Criterion:** Feasibility · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Spend against budget: Computer vision for foreign-body detection · **Criterion:** Cost · **Weight (%):** 30 · **Score (1–5):** 5 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Revenue 43,200 MAD reconciled with the ERP; 0 unpaid.

When every step is complete, click Complete in the task panel.

SME-E2E-03 — SME Upskill-to-Adoption

Goal: Make sure new digital and AI skills are used at work.

Starts when: Funded plan launched. **Ends with:** Adoption confirmed and owner-manager coached.

Task UFT-SME3-01 — Assign microlearning capsules · done by Training Administrator

Input: Owner-manager input → **Output:** Assign short capsules per employee.

Step SME-MP-03.1 — Assign microlearning capsules (Training Administrator)

Type:

Row 1 — Role: Compliance Officer / DPO · **Microlearning capsules:** AI shelf-life and spoilage prediction · **Person:** Adil Alaoui · **Allocation (%):** 100 · **Start:** 2027-10-09 · **Holder type:** Holder

Row 2 — Role: Consultant (PM / Partner) · **Microlearning capsules:** Computer vision for foreign-body detection · **Person:** Imane Hajji · **Allocation (%):** 50 · **Start:** 2027-10-16 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Step MP-25.3 — Push capsule to collaboration channel (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Assign 4 capsules 'AI shelf-life and spoilage prediction in 10 minutes' to each employee.

When every step is complete, click Complete in the task panel.

Task UFT-SME3-02 — Coach on the job · done by Trainer

Input: Owner-manager input → **Output:** Coach employees while they use the tools.

Step SME-MP-03.2 — Coach employees on the job (Trainer)

Type:

Row 1 — Employees on the job: AI shelf-life and spoilage prediction — half-day workshop · **Date:** 2027-10-31 · **Trainer:** Atlas Formation Conseil · **Participants:** 12 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Employees on the job: Computer vision for foreign-body detection — half-day workshop · **Date:** 2027-11-07 · **Trainer:** Maghreb Learning Partners · **Participants:** 15 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: On-the-job coaching: 2 hours per team leader per week for 4 weeks.

When every step is complete, click Complete in the task panel.

Task UFT-SME3-03 — Measure adoption · done by L&D Analyst

Input: Owner-manager input → **Output:** Check tool usage per employee.

Step SME-MP-03.3 — Measure tool usage (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Adoption: 9 of 12 employees use the new tool every day.

When every step is complete, click Complete in the task panel.

Task UFT-SME3-04 — Coach the owner-manager · done by Consultant PM

Input: Owner-manager input → **Output:** Hold the monthly coaching and update the dashboard.

Step SME-MP-04.1 — Hold monthly coaching session (Consultant PM)

Type:

Row 1 — Monthly coaching session: AI shelf-life and spoilage prediction — half-day workshop · **Date:** 2027-11-04 · **Trainer:** Atlas Formation Conseil · **Participants:** 12 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Monthly coaching session: Computer vision for foreign-body detection — half-day workshop · **Date:** 2027-11-11 · **Trainer:** Maghreb Learning Partners · **Participants:** 13 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step SME-MP-04.2 — Update skills dashboard (Head of L&D)

Type:

Skills dashboard: Skills dashboard

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-10-26

Then click Complete the step.

Result to record in the task: Monthly coaching with the owner-manager; skills dashboard updated.

When every step is complete, click Complete in the task panel.

Gate G4 — G4 — Delivery readiness: close the phase

3. Open the project workspace and click the gate button of the phase.
3. Tick each checklist item once its evidence is attached, then click Submit for decision.
3. Click Go. Type the justification: All mandatory items met; evidence attached.
3. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

Phase 5 — Evaluation, compliance & impact

E2E-07 — Assessment-to-Evaluation

Goal: Measure training effectiveness and skill progression

Starts when: Training session or path completed. **Ends with:** Effectiveness measured on Kirkpatrick levels 1-3 and skill progression computed.

Task UFT-07-01 — Create assessment instrument · done by Instructional Designer

Input: Assessment strategy → **Output:** Assessment instrument

Step MP-09.1 — Create assessment instrument (Instructional Designer)

Type:

Row 1 — Assessment instrument: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Anas Tazi · **Source:** Questionnaire results

Row 2 — Assessment instrument: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Karim Mansouri · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Assessment instrument register".

Result to record in the task: Instrument 'Test AI shelf-life and spoilage prediction M1': 15 questions, pass mark 70%.

When every step is complete, click Complete in the task panel.

Task UFT-07-02 — Draft question bank · done by Instructional Designer

Input: Assessment instrument → **Output:** Question bank

Step MP-09.2 — Generate question bank draft (Instructional Designer)

Type:

Row 1 — Question bank draft: Question bank draft — AI shelf-life and spoilage prediction · **Owner:** Karim Mansouri · **Start:** 2027-10-29 · **End:** 2027-11-28 · **Budget:** 48000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Question bank draft: Question bank draft — Computer vision for foreign-body detection · **Owner:** Sara Lahlou · **Start:** 2027-11-05 · **End:** 2027-12-05 · **Budget:** 25000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Keep 12 AI-drafted questions, rewrite 3 with Production & Food Safety vocabulary; validate each one.

When every step is complete, click Complete in the task panel.

Task UFT-07-03 — Collect reaction survey (Level 1) · done by L&D Analyst

Input: Completion records → **Output:** Level 1 results

Step MP-09.3 — Collect reaction survey (Level 1) (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Reaction survey S-01: 11 responses, satisfaction 4.3/5.

When every step is complete, click Complete in the task panel.

Task UFT-07-04 — Record learning results (Level 2) · done by Trainer

Input: Level 1 results → **Output:** Level 2 results

Step MP-09.4 — Record learning results (Level 2) (Trainer)

Type:

Row 1 — Learning results (Level 2): AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Soukaina Mansouri · **Source:** HRIS export

Row 2 — Learning results (Level 2): Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Reda Mansouri · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Learning results (Level 2) register".

Result to record in the task: Level 2: average pre-test 48%, post-test 81% (+33 points).

When every step is complete, click Complete in the task panel.

Task UFT-07-05 — Record on-the-job observation (Level 3) · done by Manager

Input: Level 2 results → **Output:** Level 3 results

Step MP-09.5 — Record on-the-job observation (Level 3) (Manager)

Type:

Row 1 — On-the-job observation (Level 3): AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Reda Mansouri · **Source:** Interview with the function head

Row 2 — On-the-job observation (Level 3): Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Bennani · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "On-the-job observation (Level 3) register".

Result to record in the task: Level 3 (day 30): 9 of 11 supervisors apply the AI shelf-life and spoilage prediction routine daily.

When every step is complete, click Complete in the task panel.

Task UFT-07-06 — Compute skill progression · done by L&D Analyst

Input: Level 3 results → **Output:** Skill progression

Step MP-09.6 — Compute skill progression (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-10.3 — Refresh KPI computation (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Skill progression: AI shelf-life and spoilage prediction from 1.8 to 2.7 (target 3).

When every step is complete, click Complete in the task panel.

Task UFT-07-07 — Review evaluation results · done by L&D Analyst

Input: Skill progression → **Output:** Evaluation review

Step MP-09.7 — Review evaluation results (L&D Analyst)

Type:

Evaluation results: Evaluation results

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-11-23

Then click Complete the step.

Step MP-20.5 — Run periodic quality review (Quality Manager)

Type:

Row 1 — Periodic quality review: AI shelf-life and spoilage prediction — half-day workshop · **Date:** 2027-11-18 · **Trainer:** Atlas Formation Conseil · **Participants:** 14 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Periodic quality review: Computer vision for foreign-body detection — half-day workshop · **Date:** 2027-11-25 · **Trainer:** Maghreb Learning Partners · **Participants:** 12 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Review: module M3 below 70% pass rate → improvement action assigned to the designer.

When every step is complete, click Complete in the task panel.

Task UFT-07-08 — Publish evaluation report · done by L&D Analyst

Input: Evaluation review → **Output:** Kirkpatrick evaluation report

Step MP-10.4 — Export report (L&D Analyst)

Type:

Row 1 — Report: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Report: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Step MP-10.6 — Share insight with stakeholders (L&D Analyst)

Type:

Row 1 — Insight with stakeholders: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-11-05

Row 2 — Insight with stakeholders: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-11-12

Then click Complete the step. The rows go to the register "Communications log".

Step MP-10.2 — Configure dashboard widgets (L&D Analyst)

Type:

Row 1 — Dashboard widgets: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Dashboard widgets: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Export RPT-016 Kirkpatrick report (PDF) and share with the Steering Committee.

When every step is complete, click Complete in the task panel.

E2E-08 — Learning-to-ROI

Goal: Validate ROI and business impact

Starts when: Evaluation results available for a theme selected for an ROI study. **Ends with:** Phillips ROI validated with finance and business impact report published.

Task UFT-08-01 — Select theme for ROI study · done by Performance Analyst

Input: Evaluation review → **Output:** ROI scope

Step MP-32.1 — Select theme for ROI study (Performance Analyst)

Type:

Decision: Approved

Theme for ROI study: Theme for ROI study

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-11-05

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: ROI study on theme 'AI shelf-life and spoilage prediction' — population: 36 supervisors, 3 sites.

When every step is complete, click Complete in the task panel.

Task UFT-08-02 — Define business indicators · done by Performance Analyst

Input: ROI scope → **Output:** Indicator set

Step MP-32.2 — Define business indicators (Performance Analyst)

Type:

Row 1 — Business indicators: Raise AI shelf-life and spoilage prediction proficiency of Operator — Production & Food Safety teams to level 3 · **Indicator:** KPI-012 (Average Level 1 satisfaction) · **Baseline:** 42 % · **Target:** 80 % · **Deadline:** 2028-05-02 · **Owner:** Soukaina Ziani

Row 2 — Business indicators: Certify Supervisor — Production & Food Safety staff on Computer vision for foreign-body detection · **Indicator:** KPI-013 (Skill progression rate) · **Baseline:** 37 % · **Target:** 85 % · **Deadline:** 2028-05-09 · **Owner:** Karim Hajji

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-10.1 — Define KPI set per audience (L&D Analyst)

Type:

Row 1 — KPI set per audience: Raise AI shelf-life and spoilage prediction proficiency of Operator — Production & Food Safety teams to level 3 · **Indicator:** KPI-012 (Average Level 1 satisfaction) · **Baseline:** 40 % · **Target:** 76 % · **Deadline:** 2028-05-02 · **Owner:** Soukaina Ziani

Row 2 — KPI set per audience: Certify Supervisor — Production & Food Safety staff on Computer vision for foreign-body detection · **Indicator:** KPI-013 (Skill progression rate) · **Baseline:** 36 % · **Target:** 80 % · **Deadline:** 2028-05-09 · **Owner:** Karim Hajji

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Indicators: rework rate, downtime minutes per shift, data re-entry hours.

When every step is complete, click Complete in the task panel.

Task UFT-08-03 — Collect cost data · done by Finance Manager

Input: Indicator set → **Output:** Cost data

Step MP-18.3 — Record committed and actual costs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-18.4 — Compare spend against budget (Finance Manager)

Type:

Row 1 — Spend against budget: AI shelf-life and spoilage prediction · **Criterion:** Feasibility · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Spend against budget: Computer vision for foreign-body detection · **Criterion:** Cost · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Costs: design 60,000 MAD; delivery 180,000 MAD; participants' time 95,000 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-08-04 — Isolate training effect · done by Performance Analyst

Input: Cost data → **Output:** Isolated benefits

Step MP-32.3 — Isolate training effect (Performance Analyst)

Type:

Row 1 — Training effect: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Anas Tazi · **Source:** Annual performance review

Row 2 — Training effect: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Karim Mansouri · **Source:** Audit report

Then click Complete the step. The rows go to the register "Training effect register".

Step MP-09.6 — Compute skill progression (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Control group: site B (not trained). Isolated benefit: 410,000 MAD per year.

When every step is complete, click Complete in the task panel.

Task UFT-08-05 — Compute Phillips ROI · done by Performance Analyst

Input: Isolated benefits → **Output:** ROI figures

Step MP-32.4 — Compute Phillips ROI (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: ROI = (410,000 − 335,000) / 335,000 = 22%; benefit-cost ratio 1.22.

When every step is complete, click Complete in the task panel.

Task UFT-08-06 — Review ROI with finance · done by Finance Manager

Input: ROI figures → **Output:** Validated ROI

Step MP-32.5 — Review ROI with finance (Finance Manager)

Type:

ROI with finance: ROI with finance

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-11-16

Then click Complete the step.

Result to record in the task: Finance review: assumptions accepted; downtime valued at 180 MAD per minute.

When every step is complete, click Complete in the task panel.

Task UFT-08-07 — Publish business impact report · done by Head of L&D

Input: Validated ROI → **Output:** ROI & business impact report

Step MP-32.6 — Publish business impact report (Head of L&D)

Type:

Row 1 — Business impact report: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-11-19

Row 2 — Business impact report: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-11-26

Then click Complete the step. The rows go to the register "Communications log".

Step MP-10.4 — Export report (L&D Analyst)

Type:

Row 1 — Report: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Report: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Step MP-10.5 — Query data via AI Assistant (Head of L&D)

Type:

Row 1 — Data via AI Assistant: KPI-017 (IDP coverage) · **Period:** 2026-Q3 · **Value:** 86 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — Data via AI Assistant: KPI-018 (Mandatory certification compliance) · **Period:** 2026-Q1 · **Value:** 60 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Publish RPT-012 ROI & Business Impact Report to executive leadership.

When every step is complete, click Complete in the task panel.

E2E-09 — Compliance-to-Certification

Goal: Ensure compliant workforce with valid certifications

Starts when: New regulatory requirement or certification nearing expiry. **Ends with:** Compliant workforce with valid certifications and an audit extract available.

Task UFT-09-01 — Register regulatory requirement · done by Compliance Officer

Input: Regulation → **Output:** Requirement record

Step MP-14.1 — Register regulatory requirement (Compliance Officer)

Type:

Row 1 — Regulatory requirement: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Reda Mansouri · **Source:** Questionnaire results

Row 2 — Regulatory requirement: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Karim Bennani · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Regulatory requirement register".

Result to record in the task: Requirement 'HACCP awareness', every 24 months, source: HACCP clause on competence.

When every step is complete, click Complete in the task panel.

Task UFT-09-02 — Assign mandatory training · done by Compliance Officer

Input: Requirement record → **Output:** Mandatory assignments

Step MP-14.2 — Assign mandatory training by position (Compliance Officer)

Type:

Row 1 — Role: Compliance Officer / DPO · **Mandatory training by position:** AI shelf-life and spoilage prediction · **Person:** Karim Bennani · **Allocation (%):** 100 · **Start:** 2027-11-18 · **Holder type:** Holder

Row 2 — Role: Consultant (PM / Partner) · **Mandatory training by position:** Computer vision for foreign-body detection · **Person:** Ghita Amrani · **Allocation (%):** 50 · **Start:** 2027-11-25 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Result to record in the task: Assign to positions: Production & Food Safety operator, Production & Food Safety supervisor, quality inspector.

When every step is complete, click Complete in the task panel.

Task UFT-09-03 — Deliver mandatory sessions · done by Training Administrator

Input: Mandatory assignments → **Output:** Attendance

Step MP-07.3 — Enroll learners into session (Training Administrator)

Type:

Row 1 — Learners into session: AI shelf-life and spoilage prediction — half-day workshop · **Date:** 2027-12-10 · **Trainer:** Atlas Formation Conseil · **Participants:** 11 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Learners into session: Computer vision for foreign-body detection — half-day workshop · **Date:** 2027-12-17 · **Trainer:** Maghreb Learning Partners · **Participants:** 15 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-07.5 — Record attendance (Trainer)

Type:

Row 1 — Attendance: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Ghita Amrani · **Source:** Audit report

Row 2 — Attendance: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Adil Alaoui · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Attendance register".

Result to record in the task: Enroll 24 employees in session 'HACCP awareness'; attendance recorded.

When every step is complete, click Complete in the task panel.

Task UFT-09-04 — Assess and certify · done by Trainer

Input: Attendance → **Output:** Certificates

Step MP-09.4 — Record learning results (Level 2) (Trainer)

Type:

Row 1 — Learning results (Level 2): AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Adil Alaoui · **Source:** HRIS export

Row 2 — Learning results (Level 2): Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Imane Hajji · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Learning results (Level 2) register".

Step MP-14.4 — Issue certificate on completion (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Result 86%; certificate 'HACCP awareness' issued, valid until 2026+2.

When every step is complete, click Complete in the task panel.

Task UFT-09-05 — Compute certification validity · done by Compliance Officer

Input: Certificates → **Output:** Validity status

Step MP-14.3 — Compute certification validity (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Validity: 212 valid, 9 expire within 60 days, 3 expired.

When every step is complete, click Complete in the task panel.

Task UFT-09-06 — Manage renewals · done by Compliance Officer

Input: Validity status → **Output:** Renewed certificates

Step MP-14.5 — Launch renewal enrollment (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-14.6 — Confirm renewal completion (Compliance Officer)

Type:

Decision: Approved

Renewal completion: Renewal completion

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-12-13

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: Launch renewal for the 12 employees; confirm 10 completions, 2 rescheduled.

When every step is complete, click Complete in the task panel.

Task UFT-09-07 — Produce compliance audit extract · done by Compliance Officer

Input: Renewed certificates → **Output:** Compliance audit extract

Step MP-14.7 — Produce compliance audit extract (Compliance Officer)

Type:

Row 1 — Compliance audit extract: Compliance audit extract — AI shelf-life and spoilage prediction · **Owner:** Karim Hajji · **Start:** 2027-12-08 · **End:** 2028-01-07 · **Budget:** 38000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Compliance audit extract: Compliance audit extract — Computer vision for foreign-body detection · **Owner:** Anas Tazi · **Start:** 2027-12-15 · **End:** 2028-01-14 · **Budget:** 58000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-10.4 — Export report (L&D Analyst)

Type:

Row 1 — Report: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Report: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Export compliance audit extract for HACCP (XLSX) for the external auditor.

When every step is complete, click Complete in the task panel.

FNB-E2E-01 — Food & Beverage Compliance-to-Certification Readiness

Goal: Keep Food & Beverage regulated roles certified against HACCP.

Starts when: New HACCP requirement or certification expiry. **Ends with:** Sector compliance extract issued with every critical role certified.

Task UFT-FNB-E1-01 — Register HACCP obligations · done by Compliance Officer

Input: Sector obligations → **Output:** Record each obligation with its period.

Step MP-01.1 — Record corporate strategic objectives (Head of L&D)

Type:

Row 1 — Corporate strategic objectives: Raise AI shelf-life and spoilage prediction proficiency of Operator — Production & Food Safety teams to level 3 · **Indicator:** KPI-005 (Design approval lead time) · **Baseline:** 30 % · **Target:** 80 % · **Deadline:** 2028-05-28 · **Owner:** Anas Tazi

Row 2 — Corporate strategic objectives: Certify Supervisor — Production & Food Safety staff on Computer vision for foreign-body detection · **Indicator:** KPI-006 (License Compliance %) · **Baseline:** 44 % · **Target:** 72 % · **Deadline:** 2028-06-04 · **Owner:** Karim Mansouri

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-14.1 — Register regulatory requirement (Compliance Officer)

Type:

Row 1 — Regulatory requirement: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Anas Tazi · **Source:** Audit report

Row 2 — Regulatory requirement: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Mansouri · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Regulatory requirement register".

Result to record in the task: Obligation 'HACCP training', every 12 months, owner Compliance Officer.

When every step is complete, click Complete in the task panel.

Task UFT-FNB-E1-02 — Link obligations to positions · done by HR Business Partner

Input: Sector obligations → **Output:** Link each obligation to the Production & Food Safety positions.

Step MP-01.2 — Link objectives to functions and sites (L&D Strategist)

Type:

Row 1 — Objectives to functions and sites: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Mansouri · **Source:** HRIS export

Row 2 — Objectives to functions and sites: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Sara Lahlou · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Objectives to functions and sites register".

Step MP-14.2 — Assign mandatory training by position (Compliance Officer)

Type:

Row 1 — Role: Employee / Learner · **Mandatory training by position:** AI shelf-life and spoilage prediction · **Person:** Karim Mansouri · **Allocation (%):** 100 · **Start:** 2027-12-02 · **Holder type:** Holder

Row 2 — Role: Manager / Hiring Manager · **Mandatory training by position:** Computer vision for foreign-body detection · **Person:** Sara Lahlou · **Allocation (%):** 50 · **Start:** 2027-12-09 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Result to record in the task: Linked to 5 Production & Food Safety positions (38 employees).

When every step is complete, click Complete in the task panel.

Task UFT-FNB-E1-03 — Track certification validity · done by Compliance Officer

Input: Sector obligations → **Output:** Check expiry dates and renewals.

Step MP-02.1 — Define competency families and levels (L&D Analyst)

Type:

Row 1 — Competency families and levels: Raise AI shelf-life and spoilage prediction proficiency of Operator — Production & Food Safety teams to level 3 · **Indicator:** KPI-007 (Content publication lead time) · **Baseline:** 41 % · **Target:** 72 % · **Deadline:** 2028-06-01 · **Owner:** Sara Lahlou

Row 2 — Competency families and levels: Certify Supervisor — Production & Food Safety staff on Computer vision for foreign-body detection · **Indicator:** KPI-008 (Session fill rate) · **Baseline:** 35 % · **Target:** 70 % · **Deadline:** 2028-06-08 · **Owner:** Soukaina Mansouri

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-14.3 — Compute certification validity (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Validity: 33 valid, 5 expire within 60 days.

When every step is complete, click Complete in the task panel.

Task UFT-FNB-E1-04 — Issue sector compliance extract · done by Compliance Officer

Input: Sector obligations → **Output:** Produce the extract for auditors.

Step MP-02.2 — Set target levels per position (HR Business Partner)

Type:

Row 1 — Target levels per position: Raise AI shelf-life and spoilage prediction proficiency of Operator — Production & Food Safety teams to level 3 · **Indicator:** KPI-008 (Session fill rate) · **Baseline:** 32 % · **Target:** 89 % · **Deadline:** 2028-06-03 · **Owner:** Soukaina Mansouri

Row 2 — Target levels per position: Certify Supervisor — Production & Food Safety staff on Computer vision for foreign-body detection · **Indicator:** KPI-009 (Plan realization rate) · **Baseline:** 39 % · **Target:** 85 % · **Deadline:** 2028-06-10 · **Owner:** Reda Mansouri

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-14.7 — Produce compliance audit extract (Compliance Officer)

Type:

Row 1 — Compliance audit extract: Compliance audit extract — AI shelf-life and spoilage prediction · **Owner:** Soukaina Mansouri · **Start:** 2027-12-16 · **End:** 2028-01-15 · **Budget:** 72000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Compliance audit extract: Compliance audit extract — Computer vision for foreign-body detection · **Owner:** Reda Mansouri · **Start:** 2027-12-23 · **End:** 2028-01-22 · **Budget:** 32000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Extract issued for the HACCP audit on 15 October.

When every step is complete, click Complete in the task panel.

Gate G5 — G5 — Evaluation & impact validated: close the phase

3. Open the project workspace and click the gate button of the phase.
3. Tick each checklist item once its evidence is attached, then click Submit for decision.
3. Click Go. Type the justification: All mandatory items met; evidence attached.
3. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

Phase 6 — Talent, knowledge & continuous improvement

E2E-10 — Talent-to-Mobility

Goal: Enable internal mobility and career progression

Starts when: Internal opening published or annual career review. **Ends with:** Internal move decided with a reskilling plan assigned.

Task UFT-10-01 — Model career paths · done by HR Director

Input: Job architecture → **Output:** Career paths

Step MP-13.1 — Model career path (HR Director)

Type:

Row 1 — Career path: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Career path: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Step MP-13.2 — Link path steps to competency targets (HR Business Partner)

Type:

Row 1 — Path steps to competency targets: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Reda Mansouri · **Source:** Annual performance review

Row 2 — Path steps to competency targets: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Karim Bennani · **Source:** Audit report

Then click Complete the step. The rows go to the register "Path steps to competency targets register".

Result to record in the task: Career path: Production & Food Safety operator → team leader → supervisor, with competency targets per step.

When every step is complete, click Complete in the task panel.

Task UFT-10-02 — Publish internal opening · done by HR Business Partner

Input: Career paths → **Output:** Internal opening

Step MP-31.1 — Publish internal opening (HR Business Partner)

Type:

Row 1 — Internal opening: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-12-15

Row 2 — Internal opening: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-12-22

Then click Complete the step. The rows go to the register "Communications log".

Step MP-31.2 — Define required skills (Hiring Manager)

Type:

Row 1 — Required skills: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Karim Bennani · **Source:** Audit report

Row 2 — Required skills: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Ghita Amrani · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Required skills register".

Result to record in the task: Opening 'Production & Food Safety team leader', required skills: AI shelf-life and spoilage prediction level 3, leadership level 2.

When every step is complete, click Complete in the task panel.

Task UFT-10-03 — Match employees to opening · done by HR Business Partner

Input: Internal opening → **Output:** Match list

Step MP-31.3 — Match employees to opening (HR Business Partner)

Type:

Row 1 — Employees to opening: AI shelf-life and spoilage prediction · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Employees to opening: Computer vision for foreign-body detection · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-02.7 — Validate skills inventory (Head of L&D)

Type:

Decision: Approved

Skills inventory: Skills inventory

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-12-15

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: Review 6 AI matches; keep 4 candidates with match score above 75%.

When every step is complete, click Complete in the task panel.

Task UFT-10-04 — Apply to internal opening · done by Employee

Input: Match list → **Output:** Applications

Step MP-31.4 — Apply to internal opening (Employee)

Type:

Row 1 — Internal opening: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Internal opening: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Application with motivation note and consent of the current manager.

When every step is complete, click Complete in the task panel.

Task UFT-10-05 — Shortlist candidates · done by Hiring Manager

Input: Applications → **Output:** Shortlist

Step MP-31.5 — Shortlist candidates (Hiring Manager)

Type:

Decision: Approved

Candidates: Candidates

Rationale: Approved after review of the evidence and budget.

Decision date: 2028-01-02

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: Shortlist: 2 candidates; interviews on 20 and 21 June.

When every step is complete, click Complete in the task panel.

Task UFT-10-06 — Plan individual development · done by Manager

Input: Shortlist → **Output:** Development plans

Step MP-13.3 — Create individual development plan (Manager)

Type:

Row 1 — Individual development plan: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Soukaina Ziani · **Source:** Annual performance review

Row 2 — Individual development plan: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Hajji · **Source:** Audit report

Then click Complete the step. The rows go to the register "Individual development plan register".

Step MP-13.4 — Suggest development actions (Manager)

Type:

Row 1 — Development actions: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Soukaina Ziani · **Source:** Annual performance review

Row 2 — Development actions: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Hajji · **Source:** Audit report

Then click Complete the step. The rows go to the register "Development actions register".

Step MP-42.3 — Build leadership development plan (HR Business Partner)

Type:

Row 1 — Leadership development plan: Leadership development plan — AI shelf-life and spoilage prediction · **Owner:** Soukaina Ziani · **Start:** 2027-12-28 · **End:** 2028-01-27 · **Budget:** 22000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Leadership development plan: Leadership development plan — Computer vision for foreign-body detection · **Owner:** Karim Hajji · **Start:** 2028-01-04 · **End:** 2028-02-03 · **Budget:** 32000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-42.4 — Suggest leadership development actions (HR Business Partner)

Type:

Row 1 — Leadership development actions: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Soukaina Ziani · **Source:** Annual performance review

Row 2 — Leadership development actions: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Hajji · **Source:** Audit report

Then click Complete the step. The rows go to the register "Leadership development actions register".

Result to record in the task: Development plan: 2 modules AI shelf-life and spoilage prediction, 1 leadership workshop, 3 months mentoring.

When every step is complete, click Complete in the task panel.

Task UFT-10-07 — Assign reskilling plan · done by HR Business Partner

Input: Development plans → **Output:** Reskilling plan

Step MP-31.6 — Assign reskilling plan (HR Business Partner)

Type:

Row 1 — Role: Trainer / Coach · **Reskilling plan:** AI shelf-life and spoilage prediction · **Person:** Karim Hajji · **Allocation (%):** 100 · **Start:** 2027-12-20 · **Holder type:** Holder

Row 2 — Role: Employee / Learner · **Reskilling plan:** Computer vision for foreign-body detection · **Person:** Anas Tazi · **Allocation (%):** 50 · **Start:** 2027-12-27 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Step MP-08.1 — Generate personal learning plan (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Assign reskilling path 'AI shelf-life and spoilage prediction for team leaders' to the selected candidate.

When every step is complete, click Complete in the task panel.

Task UFT-10-08 — Review career and succession · done by HR Director

Input: Reskilling plan → **Output:** Talent mobility report

Step MP-13.5 — Run career review (HR Business Partner)

Type:

Row 1 — Career review: AI shelf-life and spoilage prediction — half-day workshop · **Date:** 2028-01-11 · **Trainer:** Atlas Formation Conseil · **Participants:** 19 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Career review: Computer vision for foreign-body detection — half-day workshop · **Date:** 2028-01-18 · **Trainer:** Maghreb Learning Partners · **Participants:** 17 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-13.6 — Update succession readiness (HR Director)

Type:

Succession readiness: Succession readiness

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-12-26

Then click Complete the step.

Step MP-42.5 — Review leadership pipeline (HR Director)

Type:

Leadership pipeline: Leadership pipeline

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-12-26

Then click Complete the step.

Step MP-42.6 — Reassess leadership maturity (HR Business Partner)

Type:

Row 1 — Leadership maturity: AI shelf-life and spoilage prediction · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Leadership maturity: Computer vision for foreign-body detection · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Succession readiness updated: 2 ready now, 3 ready within 12 months.

When every step is complete, click Complete in the task panel.

E2E-11 — Onboarding-to-Productivity

Goal: Accelerate time-to-productivity

Starts when: New hire or internal mover confirmed. **Ends with:** Employee productive within target time and onboarding closed.

Task UFT-11-01 — Create onboarding record · done by Hiring Manager

Input: Hiring decision → **Output:** Onboarding record

Step MP-35.1 — Create onboarding record (Hiring Manager)

Type:

Row 1 — Onboarding record: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Karim Mansouri · **Source:** Interview with the function head

Row 2 — Onboarding record: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Sara Lahlou · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Onboarding record register".

Result to record in the task: Onboarding record for the new Production & Food Safety technician, start date 1 July, buddy assigned.

When every step is complete, click Complete in the task panel.

Task UFT-11-02 — Generate 30-60-90 day path · done by HR Business Partner

Input: Onboarding record → **Output:** 30-60-90 path

Step MP-35.2 — Generate 30-60-90 day path (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-08.1 — Generate personal learning plan (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: 30-60-90 path: day 30 safety and HACCP; day 60 AI shelf-life and spoilage prediction; day 90 autonomy on shift.

When every step is complete, click Complete in the task panel.

Task UFT-11-03 — Enroll in onboarding sessions · done by Training Administrator

Input: 30-60-90 path → **Output:** Enrollments

Step MP-07.3 — Enroll learners into session (Training Administrator)

Type:

Row 1 — Learners into session: AI shelf-life and spoilage prediction — half-day workshop · **Date:** 2028-01-17 · **Trainer:** Atlas Formation Conseil · **Participants:** 11 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Learners into session: Computer vision for foreign-body detection — half-day workshop · **Date:** 2028-01-24 · **Trainer:** Maghreb Learning Partners · **Participants:** 19 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-07.4 — Send convocations (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Enroll in the induction session of 2 July; convocation sent.

When every step is complete, click Complete in the task panel.

Task UFT-11-04 — Complete onboarding tasks · done by Employee

Input: Enrollments → **Output:** Completed tasks

Step MP-35.3 — Complete onboarding tasks (Employee)

Type:

Row 1 — Onboarding tasks: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Reda Mansouri · **Source:** Audit report

Row 2 — Onboarding tasks: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim Bennani · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Onboarding tasks register".

Result to record in the task: Tasks done: badge, IT account, safety tour, meeting with the team.

When every step is complete, click Complete in the task panel.

Task UFT-11-05 — Hold milestone check-ins · done by Hiring Manager

Input: Completed tasks → **Output:** Check-in notes

Step MP-35.4 — Hold milestone check-in (Hiring Manager)

Type:

Row 1 — Milestone check-in: AI shelf-life and spoilage prediction — half-day workshop · **Date:** 2028-01-21 · **Trainer:** Atlas Formation Conseil · **Participants:** 19 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Milestone check-in: Computer vision for foreign-body detection — half-day workshop · **Date:** 2028-01-28 · **Trainer:** Maghreb Learning Partners · **Participants:** 15 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-21.3 — Schedule coaching sessions (Coach)

Type:

Row 1 — Coaching sessions: Coaching sessions — AI shelf-life and spoilage prediction · **Owner:** Karim Bennani · **Start:** 2028-01-11 · **End:** 2028-02-10 · **Budget:** 31000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Coaching sessions: Coaching sessions — Computer vision for foreign-body detection · **Owner:** Ghita Amrani · **Start:** 2028-01-18 · **End:** 2028-02-17 · **Budget:** 60000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Day-30 check-in: on track; coaching needed on AI shelf-life and spoilage prediction data entry.

When every step is complete, click Complete in the task panel.

Task UFT-11-06 — Assess time to productivity · done by Hiring Manager

Input: Check-in notes → **Output:** Productivity assessment

Step MP-35.5 — Assess time to productivity (Hiring Manager)

Type:

Row 1 — Time to productivity: AI shelf-life and spoilage prediction · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Time to productivity: Computer vision for foreign-body detection · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 5 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Time to productivity: 74 days (target 90).

When every step is complete, click Complete in the task panel.

Task UFT-11-07 — Close onboarding · done by HR Business Partner

Input: Productivity assessment → **Output:** Closed onboarding

Step MP-35.6 — Close onboarding (HR Business Partner)

Type:

Decision: Approved

Onboarding: Onboarding

Rationale: Approved after review of the evidence and budget.

Decision date: 2028-01-22

Decided by: Karim Hajji

Then click Complete the step.

Step MP-13.3 — Create individual development plan (Manager)

Type:

Row 1 — Individual development plan: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Adil Alaoui · **Source:** Questionnaire results

Row 2 — Individual development plan: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Imane Hajji · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Individual development plan register".

Result to record in the task: Close onboarding; link the individual development plan for year 1.

When every step is complete, click Complete in the task panel.

E2E-12 — Knowledge-Capture-to-Transfer

Goal: Capture and transfer institutional knowledge

Starts when: Critical expert identified as leaving, retiring or holding at-risk knowledge. **Ends with:** Knowledge captured, published and transferred to a validated successor.

Task UFT-12-01 — Identify critical experts · done by HR Business Partner

Input: Workforce data → **Output:** Critical expert list

Step MP-34.1 — Identify critical experts (HR Business Partner)

Type:

Row 1 — Critical experts: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Imane Hajji · **Source:** Annual performance review

Row 2 — Critical experts: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Soukaina Ziani · **Source:** Audit report

Then click Complete the step. The rows go to the register "Critical experts register".

Result to record in the task: Critical expert: senior Production & Food Safety engineer retiring in 8 months; knowledge risk: high.

When every step is complete, click Complete in the task panel.

Task UFT-12-02 — Plan capture sessions · done by Knowledge Manager

Input: Critical expert list → **Output:** Capture plan

Step MP-34.2 — Plan capture sessions (Knowledge Manager)

Type:

Row 1 — Capture sessions: Capture sessions — AI shelf-life and spoilage prediction · **Owner:** Soukaina Ziani · **Start:** 2028-01-19 · **End:** 2028-02-18 · **Budget:** 67000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Capture sessions: Capture sessions — Computer vision for foreign-body detection · **Owner:** Karim Hajji · **Start:** 2028-01-26 · **End:** 2028-02-25 · **Budget:** 71000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Capture plan: 4 sessions of 90 minutes on troubleshooting and HACCP practices.

When every step is complete, click Complete in the task panel.

Task UFT-12-03 — Record expert interview · done by Knowledge Manager

Input: Capture plan → **Output:** Interview transcript

Step MP-34.3 — Record expert interview (Knowledge Manager)

Type:

Row 1 — Expert interview: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Karim Hajji · **Source:** HRIS export

Row 2 — Expert interview: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Anas Tazi · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Expert interview register".

Result to record in the task: Interview 1 recorded (82 minutes); transcript attached.

When every step is complete, click Complete in the task panel.

Task UFT-12-04 — Structure knowledge · done by Knowledge Manager

Input: Interview transcript → **Output:** Structured knowledge

Step MP-34.4 — Structure knowledge from transcript (Knowledge Manager)

Type:

Row 1 — Knowledge from transcript: Knowledge from transcript — AI shelf-life and spoilage prediction · **Owner:** Anas Tazi · **Start:** 2028-01-23 · **End:** 2028-02-22 · **Budget:** 29000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Knowledge from transcript: Knowledge from transcript — Computer vision for foreign-body detection · **Owner:** Karim Mansouri · **Start:** 2028-01-30 · **End:** 2028-02-29 · **Budget:** 55000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Accept the AI structure: 5 failure modes, 12 checks, 3 decision rules; correct 2 technical terms.

When every step is complete, click Complete in the task panel.

Task UFT-12-05 — Publish knowledge article · done by Knowledge Manager

Input: Structured knowledge → **Output:** Published article

Step MP-12.1 — Publish knowledge article (Knowledge Manager)

Type:

Row 1 — Knowledge article: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2028-01-20

Row 2 — Knowledge article: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2028-01-27

Then click Complete the step. The rows go to the register "Communications log".

Step MP-12.2 — Index article for retrieval (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-33.4 — Approve publication (Knowledge Manager)

Type:

Decision: Approved

Publication: Publication

Rationale: Approved after review of the evidence and budget.

Decision date: 2028-02-01

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: Publish article 'Troubleshooting guide — Production & Food Safety' in EN/FR/AR; indexed for search.

When every step is complete, click Complete in the task panel.

Task UFT-12-06 — Assign successor learning path · done by Manager

Input: Published article → **Output:** Successor path

Step MP-34.5 — Assign successor learning path (Manager)

Type:

Row 1 — Role: Compliance Officer / DPO · **Successor learning path:** AI shelf-life and spoilage prediction · **Person:** Sara Lahlou · **Allocation (%):** 100 · **Start:** 2028-01-17 · **Holder type:** Holder

Row 2 — Role: Consultant (PM / Partner) · **Successor learning path:** Computer vision for foreign-body detection · **Person:** Soukaina Mansouri · **Allocation (%):** 50 · **Start:** 2028-01-24 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Step MP-06.6 — Publish content to catalog (Content Developer)

Type:

Row 1 — Content to catalog: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2028-01-22

Row 2 — Content to catalog: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2028-01-29

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Assign the successor path: article + 3 shadowing sessions with the expert.

When every step is complete, click Complete in the task panel.

Task UFT-12-07 — Validate transfer completion · done by Subject Matter Expert

Input: Successor path → **Output:** Validated transfer

Step MP-34.6 — Validate transfer completion (Subject Matter Expert)

Type:

Decision: Approved with conditions

Transfer completion: Transfer completion

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2028-02-19

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: Transfer validated: successor solved 4 of 5 test cases alone.

When every step is complete, click Complete in the task panel.

E2E-31 — Engagement-to-Roadmap

Goal: Define post-engagement roadmap and continuous improvement

Starts when: Closure of the current training engineering engagement (E2E-19). **Ends with:** Approved post-engagement roadmap with future missions and continuous improvement plan.

Task UFT-31-01 — Consolidate engagement findings · done by Consultant PM

Input: Engagement outputs → **Output:** Findings

Step MP-50.1 — Consolidate engagement findings (Consultant PM)

Type:

Row 1 — Engagement findings: KPI-011 (API Availability) · **Period:** 2026-Q1 · **Value:** 87 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — Engagement findings: KPI-012 (Average Level 1 satisfaction) · **Period:** 2026-Q2 · **Value:** 83 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Findings: 6 deliverables, 3 lessons learned, 2 open topics (IS, org design).

When every step is complete, click Complete in the task panel.

Task UFT-31-02 — Define future perspectives · done by Consultant PM

Input: Findings → **Output:** Perspectives

Step MP-50.2 — Define future perspectives (Consultant PM)

Type:

Row 1 — Future perspectives: AI shelf-life and spoilage prediction · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Karim Bennani · **Source:** Interview with the function head

Row 2 — Future perspectives: Computer vision for foreign-body detection · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Ghita Amrani · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Future perspectives register".

Result to record in the task: Perspectives: AI demand planning for perishables programme, second wave for OP level.

When every step is complete, click Complete in the task panel.

Task UFT-31-03 — Plan One-to-One coaching · done by L&D Strategist

Input: Perspectives → **Output:** Coaching plan

Step MP-50.3 — Plan One-to-One coaching (L&D Strategist)

Type:

Row 1 — One-to-One coaching: One-to-One coaching — AI shelf-life and spoilage prediction · **Owner:** Ghita Amrani · **Start:** 2028-02-04 · **End:** 2028-03-05 · **Budget:** 36000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — One-to-One coaching: One-to-One coaching — Computer vision for foreign-body detection · **Owner:** Adil Alaoui · **Start:** 2028-02-11 · **End:** 2028-03-12 · **Budget:** 64000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: One-to-One coaching: 6 managers, 6 sessions each over 6 months.

When every step is complete, click Complete in the task panel.

Task UFT-31-04 — Plan organizational optimization · done by Org Design Consultant

Input: Perspectives → **Output:** Optimization plan

Step MP-50.4 — Plan organizational optimization (Org Design Consultant)

Type:

Row 1 — Organizational optimization: Organizational optimization — AI shelf-life and spoilage prediction · **Owner:** Adil Alaoui · **Start:** 2028-02-06 · **End:** 2028-03-07 · **Budget:** 80000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Organizational optimization: Organizational optimization — Computer vision for foreign-body detection · **Owner:** Imane Hajji · **Start:** 2028-02-13 · **End:** 2028-03-14 · **Budget:** 69000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Organizational optimization: merge 2 planning cells; update 11 descriptions.

When every step is complete, click Complete in the task panel.

Task UFT-31-05 — Plan IS rehabilitation · done by IT Architect

Input: Perspectives → **Output:** IS plan

Step MP-50.5 — Plan IS rehabilitation (IT Architect)

Type:

Row 1 — IS rehabilitation: IS rehabilitation — AI shelf-life and spoilage prediction · **Owner:** Imane Hajji · **Start:** 2028-02-08 · **End:** 2028-03-09 · **Budget:** 72000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — IS rehabilitation: IS rehabilitation — Computer vision for foreign-body detection · **Owner:** Soukaina Ziani · **Start:** 2028-02-15 · **End:** 2028-03-16 · **Budget:** 62000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: IS rehabilitation: connect HRIS and training platform; retire 2 spreadsheets.

When every step is complete, click Complete in the task panel.

Task UFT-31-06 — Define KPIs and dashboards · done by Performance Analyst

Input: Perspectives → **Output:** KPI framework

Step MP-50.6 — Define KPIs and dashboards (Performance Analyst)

Type:

Row 1 — KPIs and dashboards: Raise AI shelf-life and spoilage prediction proficiency of Operator — Production & Food Safety teams to level 3 · **Indicator:** KPI-016 (Knowledge reuse rate) · **Baseline:** 41 % · **Target:** 86 % · **Deadline:** 2028-07-29 · **Owner:** Soukaina Ziani

Row 2 — KPIs and dashboards: Certify Supervisor — Production & Food Safety staff on Computer vision for foreign-body detection · **Indicator:** KPI-017 (IDP coverage) · **Baseline:** 36 % · **Target:** 70 % · **Deadline:** 2028-08-05 · **Owner:** Karim Hajji

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: KPIs: training coverage, time to competency, ROI per theme; monthly dashboard.

When every step is complete, click Complete in the task panel.

Task UFT-31-07 — Prioritize future missions · done by Consultant PM

Input: All plans → **Output:** Prioritized missions

Step MP-50.7 — Prioritize future missions (Consultant PM)

Type:

Row 1 — Future missions: AI shelf-life and spoilage prediction · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Future missions: Computer vision for foreign-body detection · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-50.8 — Validate roadmap with leadership (Partner)

Type:

Decision: Approved

Roadmap with leadership: Roadmap with leadership

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2028-02-12

Decided by: Karim Hajji

Then click Complete the step.

Result to record in the task: Priority missions: 1 IS rehabilitation, 2 coaching, 3 org optimization.

When every step is complete, click Complete in the task panel.

Task UFT-31-08 — Publish roadmap · done by Consultant PM

Input: Prioritized missions → **Output:** Post-engagement roadmap

Step MP-50.9 — Publish post-engagement roadmap (Consultant PM)

Type:

Row 1 — Post-engagement roadmap: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2028-02-09

Row 2 — Post-engagement roadmap: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2028-02-16

Then click Complete the step. The rows go to the register "Communications log".

Step MP-50.10 — Track roadmap execution (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-50.11 — Improve roadmap continuously (Consultant PM)

Type:

Roadmap continuously: Roadmap continuously

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2028-02-22

Then click Complete the step.

Step MP-50.12 — Report on roadmap progress (Consultant PM)

Type:

Row 1 — On roadmap progress: Announce the program: AI shelf-life and spoilage prediction · **Audience:** Operator — Production & Food Safety teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2028-02-09

Row 2 — On roadmap progress: Announce the program: Computer vision for foreign-body detection · **Audience:** Supervisor — Production & Food Safety teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2028-02-16

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish RPT-010 Post-Engagement Roadmap to the executive committee.

When every step is complete, click Complete in the task panel.

Gate G6 — G6 — Closure & continuous improvement: close the phase

3. Open the project workspace and click the gate button of the phase.
3. Tick each checklist item once its evidence is attached, then click Submit for decision.
3. Click Go. Type the justification: All mandatory items met; evidence attached.
3. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

7. Scenario 5 — Horizon Services Group

Context

Context	
Sector	Multi-sector services
Size	Large company · 1800 employees · Casablanca
Run	AI Skills Full Run 2026 — Horizon Services Group — AI skills, Full run
Standards	ISO 9001, ISO 10015, ISO 21001
Themes	Generative AI for everyday work · AI-assisted customer service · Responsible AI and data protection · Digital workplace and collaboration tools
Sign in as	headld@horizonservices.ma · CortexSkills#2026
Scope of the run	33 end-to-end processes, 257 user tasks and 448 steps.

Phase 0 — Enablers (run across all phases)

Enablers run across all phases

E2E-15 — Data-AI-Integration

Goal: Govern data, AI, integrations

Starts when: New integration, data source or AI use case to govern. **Ends with:** Integrations, data and AI governed with health, retention and usage reviewed.

Task UFT-15-01 — Register external integration · done by Platform Administrator

Input: Integration request → **Output:** Integration record

Step MP-16.1 — Register external integration (Platform Administrator)

Type:

Row 1 — External integration: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Karim El Idrissi · **Source:** Audit report

Row 2 — External integration: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Mehdi Chraibi · **Source:** HRIS export

Then click Complete the step. The rows go to the register "External integration register".

Result to record in the task: Register integration 'HRIS — Workday' (INT-HR-01); credential reference stored encrypted.

When every step is complete, click Complete in the task panel.

Task UFT-15-02 — Map fields and check health · done by IT Architect

Input: Integration record → **Output:** Healthy integration

Step MP-16.2 — Map integration fields (IT Architect)

Type:

Row 1 — Integration fields: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Mehdi Chraibi · **Source:** HRIS export

Row 2 — Integration fields: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Sara Tazi · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Integration fields register".

Step MP-16.3 — Check integration health (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Map fields: employee_id → matricule; position → poste. Health check: success.

When every step is complete, click Complete in the task panel.

Task UFT-15-03 — Run HRIS synchronisation · done by IT Architect

Input: Healthy integration → **Output:** Synchronised directory

Step MP-16.4 — Run HRIS synchronisation (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-16.5 — Review synchronisation rejections (IT Architect)

Type:

Synchronisation rejections: Synchronisation rejections

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-11-28

Then click Complete the step.

Result to record in the task: Sync run: 1,204 records updated, 3 rejected (missing position) — corrected.

When every step is complete, click Complete in the task panel.

Task UFT-15-04 — Set data retention rule · done by Data Protection Officer

Input: Synchronised directory → **Output:** Retention rules

Step MP-16.6 — Set data retention rule (Data Protection Officer)

Type:

Row 1 — Data retention rule: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Data retention rule: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Retention: questionnaire responses 3 years; training records 10 years.

When every step is complete, click Complete in the task panel.

Task UFT-15-05 — Maintain AI use case register · done by Platform Administrator

Input: Retention rules → **Output:** AI register

Step MP-16.7 — Maintain AI use case register (Platform Administrator)

Type:

AI use case register: AI use case register

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-12-16

Then click Complete the step.

Result to record in the task: Add custom use case 'Shift-report summarizer' (Assistive), version 1.

When every step is complete, click Complete in the task panel.

Task UFT-15-06 — Set AI activation per scope · done by Platform Administrator

Input: AI register → **Output:** AI activation state

Step MP-16.8 — Set AI activation per scope (Platform Administrator)

Type:

Row 1 — AI activation per scope: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — AI activation per scope: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Step MP-24.1 — Enable personalization per scope (Platform Administrator)

Type:

Row 1 — Personalization per scope: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Personalization per scope: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Activate AIUC-35 and AIUC-36 for the organization; override Off for pilot project B.

When every step is complete, click Complete in the task panel.

Task UFT-15-07 — Review AI usage log · done by IT Architect

Input: AI activation state → **Output:** AI usage & governance report

Step MP-16.9 — Review AI usage log (IT Architect)

Type:

AI usage log: AI usage log

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-11-29

Then click Complete the step.

Step MP-28.2 — Validate dataset quality (Performance Analyst)

Type:

Decision: Approved

Dataset quality: Dataset quality

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-11-28

Decided by: Hajar Fassi

Then click Complete the step.

Result to record in the task: Usage review: 412 suggestions — 71% accepted, 20% edited, 9% rejected.

When every step is complete, click Complete in the task panel.

E2E-17 — Change-to-Adoption

Goal: Drive sustained adoption and culture change

Starts when: Approved plan or new platform capability requiring adoption. **Ends with:** Sustained adoption reached with low-adoption groups reinforced.

Task UFT-17-01 — Assess change impact · done by Change Manager

Input: Approved plan → **Output:** Impact assessment

Step MP-19.1 — Assess change impact (Change Manager)

Type:

Row 1 — Change impact: Generative AI for everyday work · **Criterion:** Feasibility · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Change impact: AI-assisted customer service · **Criterion:** Cost · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Change impact: Responsible AI and data protection · **Criterion:** Risk · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Impact: Operations and service delivery supervisors high, operators medium, support functions low.

When every step is complete, click Complete in the task panel.

Task UFT-17-02 — Build adoption plan · done by Change Manager

Input: Impact assessment → **Output:** Adoption plan

Step MP-19.2 — Build adoption plan (Change Manager)

Type:

Row 1 — Adoption plan: Adoption plan — Generative AI for everyday work · **Owner:** Anas Ziani · **Start:** 2026-12-21 · **End:** 2027-01-20 · **Budget:** 67000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Adoption plan: Adoption plan — AI-assisted customer service · **Owner:** Ghita Ziani · **Start:** 2026-12-28 · **End:** 2027-01-27 · **Budget:** 20000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Adoption plan: sponsor message, 6 champions, weekly 15-minute huddles for 8 weeks.

When every step is complete, click Complete in the task panel.

Task UFT-17-03 — Launch communication campaign · done by Change Manager

Input: Adoption plan → **Output:** Campaign

Step MP-19.3 — Launch communication campaign (Change Manager)

Type:

Row 1 — Communication campaign: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-12-18

Row 2 — Communication campaign: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-12-25

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Campaign 'Generative AI for everyday work — why it matters' on e-mail, intranet and screens.

When every step is complete, click Complete in the task panel.

Task UFT-17-04 — Open community space · done by Knowledge Manager

Input: Campaign → **Output:** Community space

Step MP-12.3 — Create community space (Knowledge Manager)

Type:

Row 1 — Community space: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Zineb Berrada · **Source:** HRIS export

Row 2 — Community space: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hicham Tazi · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Community space register".

Step MP-12.4 — Moderate community posts (Knowledge Manager)

Type:

Community posts: Community posts

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-12-19

Then click Complete the step.

Step MP-26.1 — Create learning cohort group (Knowledge Manager)

Type:

Row 1 — Learning cohort group: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Zineb Berrada · **Source:** HRIS export

Row 2 — Learning cohort group: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hicham Tazi · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Learning cohort group register".

Result to record in the task: Community space 'Generative AI for everyday work Q&A' opened; moderation rules published.

When every step is complete, click Complete in the task panel.

Task UFT-17-05 — Track adoption usage · done by L&D Analyst

Input: Community space → **Output:** Usage indicators

Step MP-19.4 — Track adoption usage (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-08.5 — Monitor engagement indicators (L&D Analyst)

Type:

Row 1 — Engagement indicators: KPI-007 (Content publication lead time) · **Period:** 2026-Q1 · **Value:** 74 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Engagement indicators: KPI-008 (Session fill rate) · **Period:** 2026-Q2 · **Value:** 93 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Weekly active users: 64% of the target population.

When every step is complete, click Complete in the task panel.

Task UFT-17-06 — Identify low-adoption groups · done by Change Manager

Input: Usage indicators → **Output:** Low-adoption list

Step MP-19.5 — Identify low-adoption groups (Change Manager)

Type:

Row 1 — Low-adoption groups: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Youssef Ziani · **Source:** Questionnaire results

Row 2 — Low-adoption groups: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Imane Ouazzani · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Low-adoption groups register".

Result to record in the task: Low adoption confirmed for night shift (31%); one group rejected as false positive.

When every step is complete, click Complete in the task panel.

Task UFT-17-07 — Run reinforcement actions · done by Change Manager

Input: Low-adoption list → **Output:** Adoption dashboard

Step MP-19.6 — Run reinforcement actions (Change Manager)

Type:

Row 1 — Reinforcement actions: Generative AI for everyday work — half-day workshop · **Date:** 2027-01-10 · **Trainer:** Atlas Formation Conseil · **Participants:** 15 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Reinforcement actions: AI-assisted customer service — half-day workshop · **Date:** 2027-01-17 · **Trainer:** Maghreb Learning Partners · **Participants:** 13 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-08.6 — Trigger re-engagement nudge (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Reinforcement: night-shift coaching sessions; adoption reached 58% after 4 weeks.

When every step is complete, click Complete in the task panel.

E2E-18 — Quality-Risk-Improvement

Goal: Improve processes and mitigate risk

Starts when: Risk logged, periodic quality review due or control test scheduled. **Ends with:** Risks mitigated, actions evaluated by a different person, controls rated.

Task UFT-18-01 — Log risk or opportunity · done by Quality Manager

Input: Issue or signal → **Output:** Risk register entry

Step MP-20.1 — Log risk or opportunity (Quality Manager)

Type:

Row 1 — Risk or opportunity: Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Rim Alaoui · **Source:** Audit report

Row 2 — Risk or opportunity: AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Mehdi Alaoui · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Risk or opportunity register".

Result to record in the task: Risk 'Trainers unavailable in Q3': likelihood 3, impact 4, score 12.

When every step is complete, click Complete in the task panel.

Task UFT-18-02 — Assign mitigation action · done by Quality Manager

Input: Risk register entry → **Output:** Mitigation action

Step MP-20.2 — Assign mitigation action (Quality Manager)

Type:

Row 1 — Role: Strategy Analyst / Head of Strategy · **Mitigation action:** Generative AI for everyday work · **Person:** Mehdi Alaoui · **Allocation (%):** 100 · **Start:** 2026-12-25 · **Holder type:** Holder

Row 2 — Role: HR Business Partner / Job Analyst · **Mitigation action:** AI-assisted customer service · **Person:** Leila Mansouri · **Allocation (%):** 50 · **Start:** 2027-01-01 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Result to record in the task: Action: contract a second vendor; owner Purchasing Officer; evaluator Quality Manager.

When every step is complete, click Complete in the task panel.

Task UFT-18-03 — Execute improvement action · done by Action Owner

Input: Mitigation action → **Output:** Executed action

Step MP-20.3 — Execute improvement action (Action Owner)

Type:

Row 1 — Improvement action: Generative AI for everyday work — half-day workshop · **Date:** 2027-01-16 · **Trainer:** Atlas Formation Conseil · **Participants:** 15 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Improvement action: AI-assisted customer service — half-day workshop · **Date:** 2027-01-23 · **Trainer:** Maghreb Learning Partners · **Participants:** 15 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Action done: framework contract signed with vendor B; evidence attached.

When every step is complete, click Complete in the task panel.

Task UFT-18-04 — Evaluate action effectiveness · done by Action Evaluator

Input: Executed action → **Output:** Effectiveness verdict

Step MP-20.4 — Evaluate action effectiveness (Action Evaluator)

Type:

Row 1 — Action effectiveness: Generative AI for everyday work · **Criterion:** Feasibility · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Action effectiveness: AI-assisted customer service · **Criterion:** Cost · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Action effectiveness: Responsible AI and data protection · **Criterion:** Risk · **Weight (%):** 20 · **Score (1–5):** 3 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Verdict: effective. The evaluator is a different user from the owner.

When every step is complete, click Complete in the task panel.

Task UFT-18-05 — Review access and security · done by IT Architect

Input: Security logs → **Output:** Access review

Step MP-17.4 — Review access violation log (IT Architect)

Type:

Access violation log: Access violation log

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-01-25

Then click Complete the step.

Step MP-17.6 — Enforce login rate limit (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-17.2 — Assign roles to user (Platform Administrator)

Type:

Row 1 — Role: Finance Manager · **Roles to user:** Generative AI for everyday work · **Person:** Omar Kettani · **Allocation (%):** 100 · **Start:** 2026-12-31 · **Holder type:** Holder

Row 2 — Role: Purchasing Officer · **Roles to user:** AI-assisted customer service · **Person:** Tarik Naciri · **Allocation (%):** 50 · **Start:** 2027-01-07 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Step MP-17.3 — Edit permission matrix (Platform Administrator)

Type:

Permission matrix: Permission matrix

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-01-25

Then click Complete the step.

Step MP-17.5 — Issue signed session token (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Access review: 2 dormant accounts disabled; 0 cross-tenant attempts.

When every step is complete, click Complete in the task panel.

Task UFT-18-06 — Run periodic quality review · done by Quality Manager

Input: Access review → **Output:** Quality review minutes

Step MP-20.5 — Run periodic quality review (Quality Manager)

Type:

Row 1 — Periodic quality review: Generative AI for everyday work — half-day workshop · **Date:** 2027-01-22 · **Trainer:** Atlas Formation Conseil · **Participants:** 18 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Periodic quality review: AI-assisted customer service — half-day workshop · **Date:** 2027-01-29 · **Trainer:** Maghreb Learning Partners · **Participants:** 20 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-09.7 — Review evaluation results (L&D Analyst)

Type:

Evaluation results: Evaluation results

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-02-03

Then click Complete the step.

Result to record in the task: Quality review minutes: 3 KPIs red, 2 actions opened, next review in 30 days.

When every step is complete, click Complete in the task panel.

Task UFT-18-07 — Update control effectiveness · done by Quality Manager

Input: Quality review minutes → **Output:** Governance register & risk heat-map

Step MP-20.6 — Update control effectiveness rating (Quality Manager)

Type:

Control effectiveness rating: Control effectiveness rating

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-01-08

Then click Complete the step.

Result to record in the task: Control CTRL-002 effectiveness: Effective; CTRL-031: Partially effective.

When every step is complete, click Complete in the task panel.

Phase 1 — Scope & evidence

E2E-32 — Scope-of-Work-to-Engineering-Plan

Goal: Define and approve the structured scope of work and stakeholder register

Starts when: New training engineering engagement, annual plan cycle, or executive request.
Ends with: Approved Scope of Work with criteria matrix and stakeholder register released to questionnaire design (E2E-33) and needs analysis (E2E-03).

Task UFT-32-01 — Define scope frame · done by Head of L&D

Input: Engagement request → **Output:** Scope frame

Step MP-53.1 — Define scope frame (Group Yes/No) (Head of L&D)

Type:

Row 1 — Scope frame (Group Yes/No): Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Adil Amrani · **Source:** Questionnaire results

Row 2 — Scope frame (Group Yes/No): AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Rim Kettani · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Scope frame (Group Yes/No) register".

Step MP-53.2 — Select Organization (Head of L&D)

Type:

Decision: Approved

Organization: Organization

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-08-13

Decided by: Hajar Fassi

Then click Complete the step.

Result to record in the task: Group scope: No. Organization: Horizon Services Group.

When every step is complete, click Complete in the task panel.

Task UFT-32-02 — Select sector · done by L&D Analyst

Input: Sector reference list → **Output:** Sector

Step MP-53.3 — Select sector (L&D Analyst)

Type:

Decision: Approved

Sector: Sector

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-08-22

Decided by: Hajar Fassi

Then click Complete the step.

Result to record in the task: Sector: Multi-sector services.

When every step is complete, click Complete in the task panel.

Task UFT-32-03 — Select decision levels · done by L&D Analyst

Input: MS/MO/OP framework → **Output:** Decision levels

Step MP-53.4 — Select decision level (MS/MO/OP/Custom) (L&D Analyst)

Type:

Decision: Approved with conditions

Decision level (MS/MO/OP/Custom): Decision level (MS/MO/OP/Custom)

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2027-08-31

Decided by: Hajar Fassi

Then click Complete the step.

Result to record in the task: Decision levels: MS, MO, OP (no custom level).

When every step is complete, click Complete in the task panel.

Task UFT-32-04 — Map functions × decision levels · done by L&D Analyst

Input: Job architecture → **Output:** Criteria matrix

Step MP-53.5 — Map functions × decision level (L&D Analyst)

Type:

Row 1 — Functions × decision level: Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Ghita Ziani · **Source:** HRIS export

Row 2 — Functions × decision level: AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Zineb Berrada · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Functions × decision level register".

Result to record in the task: Matrix: Operations and service delivery × MS/MO/OP; Quality × MO/OP; Finance × MS/MO; HR × MS/MO.

When every step is complete, click Complete in the task panel.

Task UFT-32-05 — Select focus and add custom criteria · done by Head of L&D

Input: Strategic objectives → **Output:** Focus and custom criteria

Step MP-53.6 — Select focus (All/Digital/AI/Custom) (Head of L&D)

Type:

Decision: Approved

Focus (All/Digital/AI/Custom): Focus (All/Digital/AI/Custom)

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-08-14

Decided by: Hajar Fassi

Then click Complete the step.

Step MP-53.7 — Add custom criteria (Consultant PM)

Type:

Row 1 — Custom criteria: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Zineb Berrada · **Source:** Interview with the function head

Row 2 — Custom criteria: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Hicham Tazi · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Custom criteria register".

Result to record in the task: Focus: AI. Custom criterion: 'Readiness for Generative AI for everyday work' (weight 2.00).

When every step is complete, click Complete in the task panel.

Task UFT-32-06 — Identify stakeholders · done by HR Business Partner

Input: Employee directory → **Output:** Stakeholder list

Step MP-53.8 — Identify stakeholders (HR Business Partner)

Type:

Row 1 — Stakeholders: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hicham Tazi · **Source:** Questionnaire results

Row 2 — Stakeholders: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Youssef Ziani · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Stakeholders register".

Result to record in the task: Register 40 stakeholders: name, role, function, level, site, preferred channel (Email, Face-to-Face or Hybrid).

When every step is complete, click Complete in the task panel.

Task UFT-32-07 — Validate scope · done by Head of L&D

Input: Draft scope → **Output:** Validated scope

Step MP-53.9 — Validate and approve scope (HR Director)

Type:

Decision: Approved

Approve scope: Approve scope

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-09-01

Decided by: Hajar Fassi

Then click Complete the step.

Result to record in the task: Validation: every function in scope has at least 3 stakeholders; completeness 100%.

When every step is complete, click Complete in the task panel.

Task UFT-32-08 — Approve scope · done by HR Director / Consultant PM

Input: Validated scope → **Output:** Approved Scope of Work

Step MP-53.9 — Validate and approve scope (HR Director)

Type:

Decision: Approved with conditions

Approve scope: Approve scope

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2027-09-10

Decided by: Hajar Fassi

Then click Complete the step.

Step MP-53.10 — Publish scope and register stakeholders (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Approval status: Approved (version 1). Justification: scope aligned with SO-1 and SO-2.

When every step is complete, click Complete in the task panel.

Task UFT-32-09 — Publish scope and register stakeholders · done by L&D Analyst

Input: Approved Scope of Work → **Output:** Published SOW and stakeholder register

Step MP-53.10 — Publish scope and register stakeholders (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Generate the SOW document (RPT-033) and release scope and stakeholders to the questionnaire studio.

When every step is complete, click Complete in the task panel.

E2E-33 — Questionnaire-to-Response-Collection

Goal: Design, distribute and collect questionnaire responses across channels

Starts when: An approved Scope of Work becomes available (end of E2E-32). **Ends with:** Consolidated, validated questionnaire response dataset feeding needs analysis (E2E-03), diagnostic (E2E-20) and demand collection (E2E-27).

Task UFT-33-01 — Select questionnaire template · done by L&D Analyst

Input: Approved SOW → **Output:** Selected template

Step MP-54.1 — Select questionnaire template by focus (L&D Analyst)

Type:

Decision: Approved

Questionnaire template by focus: Questionnaire template by focus

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-08-24

Decided by: Hajar Fassi

Then click Complete the step.

Result to record in the task: Template: 'AI needs — Multi-sector services' in the user's language, 5 sections.

When every step is complete, click Complete in the task panel.

Task UFT-33-02 — Elaborate questionnaire · done by L&D Analyst

Input: Template, AI prompts → **Output:** Draft questionnaire

Step MP-54.2 — Elaborate questionnaire (Load/AI/Manual) (L&D Analyst)

Type:

Row 1 — Questionnaire (Load/AI/Manual): Questionnaire (Load/AI/Manual) — Generative AI for everyday work · **Owner:** Leila Mansouri · **Start:** 2027-08-26 · **End:** 2027-09-25 · **Budget:** 40000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Questionnaire (Load/AI/Manual): Questionnaire (Load/AI/Manual) — AI-assisted customer service · **Owner:** Hicham Bennani · **Start:** 2027-09-02 · **End:** 2027-10-02 · **Budget:** 33000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Elaboration mode: AI. 24 questions generated from the approved Scope of Work.

When every step is complete, click Complete in the task panel.

Task UFT-33-03 — Tailor and validate content · done by L&D Analyst

Input: Draft questionnaire → **Output:** Validated questionnaire

Step MP-54.3 — Tailor to sector and focus (L&D Analyst)

Type:

Row 1 — Sector and focus: Sector and focus — Generative AI for everyday work · **Owner:** Hicham Bennani · **Start:** 2027-08-28 · **End:** 2027-09-27 · **Budget:** 63000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Sector and focus: Sector and focus — AI-assisted customer service · **Owner:** Omar Kettani · **Start:** 2027-09-04 · **End:** 2027-10-04 · **Budget:** 53000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Validate each question; reword 5 with Operations and service delivery vocabulary; delete 2 duplicates.

When every step is complete, click Complete in the task panel.

Task UFT-33-04 — Allocate RACSI · done by Head of L&D

Input: Validated questionnaire → **Output:** RACSI allocation

Step MP-54.4 — Allocate RACSI per section (Head of L&D)

Type:

Row 1 — RACSI per section: RACSI per section — Generative AI for everyday work · **Owner:** Omar Kettani · **Start:** 2027-08-30 · **End:** 2027-09-29 · **Budget:** 22000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — RACSI per section: RACSI per section — AI-assisted customer service · **Owner:** Tarik Naciri · **Start:** 2027-09-06 · **End:** 2027-10-06 · **Budget:** 51000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Section 'Digital practices': R L&D Analyst, A Head of L&D, C Consultant PM, S IT, I CHRO (one Accountable only).

When every step is complete, click Complete in the task panel.

Task UFT-33-05 — Select distribution channels · done by Survey Administrator

Input: Stakeholder register → **Output:** Channel plan

Step MP-54.5 — Select distribution channels (L&D Analyst)

Type:

Decision: Approved

Distribution channels: Distribution channels

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-08-25

Decided by: Hajar Fassi

Then click Complete the step.

Result to record in the task: Channels: MS and MO by Email; OP Face-to-Face with tablets; night shift Hybrid.

When every step is complete, click Complete in the task panel.

Task UFT-33-06 — Distribute questionnaire · done by Survey Administrator

Input: Channel plan → **Output:** Dispatch log

Step MP-54.6 — Distribute to stakeholders (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Distribute to 40 stakeholders; 40 dispatches logged.

When every step is complete, click Complete in the task panel.

Task UFT-33-07 — Send reminders · done by Survey Administrator

Input: Dispatch log → **Output:** Reminder log

Step MP-54.7 — Send reminders on cadence (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Reminder 1 on day 5 to 17 non-respondents; reminder 2 on day 10 to 8.

When every step is complete, click Complete in the task panel.

Task UFT-33-08 — Collect responses · done by Stakeholders

Input: Questionnaire → **Output:** Raw responses

Step MP-54.8 — Collect responses (Stakeholder)

Type:

Row 1 — Responses: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Soukaina Squalli · **Source:** Annual performance review

Row 2 — Responses: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim El Idrissi · **Source:** Audit report

Then click Complete the step. The rows go to the register "Responses register".

Result to record in the task: Responses: 34 collected (22 online, 12 offline synchronised).

When every step is complete, click Complete in the task panel.

Task UFT-33-09 — Validate completeness · done by L&D Analyst

Input: Raw responses → **Output:** Validated responses

Step MP-54.9 — Validate completeness and consent (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Completeness: 31 complete, 3 incomplete flagged.

When every step is complete, click Complete in the task panel.

Task UFT-33-10 — Consolidate responses · done by L&D Analyst

Input: Validated responses → **Output:** Consolidated dataset

Step MP-54.10 — Consolidate responses (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Consolidated dataset: 31 responses, 24 questions, by function and level.

When every step is complete, click Complete in the task panel.

Task UFT-33-11 — Check consent and release dataset · done by L&D Analyst

Input: Consolidated dataset → **Output:** Released dataset

Step MP-54.11 — Feed responses to needs analysis and diagnostic (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-54.12 — Report on response rate and engagement (L&D Analyst)

Type:

Row 1 — On response rate and engagement: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-09-08

Row 2 — On response rate and engagement: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and

their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-09-15

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Consent given for 31 of 31 stored responses; release to needs analysis, diagnostic and demand collection.

When every step is complete, click Complete in the task panel.

Task UFT-33-12 — Report on response and engagement · done by L&D Analyst

Input: Dispatch and response logs → **Output:** Response analytics report

Step MP-54.12 — Report on response rate and engagement (L&D Analyst)

Type:

Row 1 — On response rate and engagement: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-09-10

Row 2 — On response rate and engagement: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-09-17

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Response rate 85%; engagement rate 78%; completeness 91% (RPT-034).

When every step is complete, click Complete in the task panel.

E2E-19 — Consulting Engagement-to-Closure

Goal: Manage full consulting engagement lifecycle

Starts when: Client purchase order or engagement request received. **Ends with:** Engagement closed with client acceptance and REX recorded.

Task UFT-19-01 — Register engagement and purchase order · done by Consultant PM

Input: Client purchase order → **Output:** Engagement record

Step MP-36.1 — Register engagement and purchase order (Consultant PM)

Type:

Row 1 — Engagement and purchase order: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hajar Fassi · **Source:** Interview with the function head

Row 2 — Engagement and purchase order: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Soukaina Squalli · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Engagement and purchase order register".

Result to record in the task: Engagement 'Training engineering 2026 — Horizon Services Group', PO-CL-221, 45 consulting days.

When every step is complete, click Complete in the task panel.

Task UFT-19-02 — Hold kickoff meeting · done by Consultant PM

Input: Engagement record → **Output:** Kickoff held

Step MP-36.2 — Hold kickoff meeting (Consultant PM)

Type:

Row 1 — Kickoff meeting: Generative AI for everyday work — half-day workshop · **Date:** 2027-01-28 · **Trainer:** Atlas Formation Conseil · **Participants:** 17 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Kickoff meeting: AI-assisted customer service — half-day workshop · **Date:** 2027-02-04 · **Trainer:** Maghreb Learning Partners · **Participants:** 13 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Kickoff held on 10 February with HR Director, Head of L&D and 4 function heads.

When every step is complete, click Complete in the task panel.

Task UFT-19-03 — Draft meeting minutes · done by Consultant PM

Input: Kickoff held → **Output:** Meeting minutes

Step MP-36.3 — Draft meeting minutes (Consultant PM)

Type:

Row 1 — Meeting minutes: Meeting minutes — Generative AI for everyday work · **Owner:** Karim El Idrissi · **Start:** 2027-01-20 · **End:** 2027-02-19 · **Budget:** 69000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Meeting minutes: Meeting minutes — AI-assisted customer service · **Owner:** Mehdi Chraibi · **Start:** 2027-01-27 · **End:** 2027-02-26 · **Budget:** 28000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Review the AI minutes: 6 decisions, 9 actions, RACSI extracted; correct 1 owner name.

When every step is complete, click Complete in the task panel.

Task UFT-19-04 — Align with client strategy · done by Consultant PM

Input: Meeting minutes → **Output:** Strategic alignment

Step MP-01.1 — Record corporate strategic objectives (Head of L&D)

Type:

Row 1 — Corporate strategic objectives: Raise Generative AI for everyday work proficiency of Operator — Operations and service delivery teams to level 3 · **Indicator:** KPI-020 (Integration synchronisation success rate) · **Baseline:** 47 % · **Target:** 74 % · **Deadline:** 2027-07-11 · **Owner:** Mehdi Chraibi

Row 2 — Corporate strategic objectives: Certify Supervisor — Operations and service delivery staff on AI-assisted customer service · **Indicator:** KPI-001 (Strategic objective coverage) · **Baseline:** 46 % · **Target:** 76 % · **Deadline:** 2027-07-18 · **Owner:** Sara Tazi

Row 3 — Corporate strategic objectives: Cut onboarding time on Responsible AI and data protection by 30 % · **Indicator:** KPI-002 (Skills inventory validation rate) · **Baseline:** 49 % · **Target:** 77 % · **Deadline:** 2027-07-25 · **Owner:** Asmae Sefrioui

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-01.2 — Link objectives to functions and sites (L&D Strategist)

Type:

Row 1 — Objectives to functions and sites: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Mehdi Chraibi · **Source:** Audit report

Row 2 — Objectives to functions and sites: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Sara Tazi · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Objectives to functions and sites register".

Result to record in the task: Client objectives recorded: Generative AI for everyday work and ISO 9001 compliance for Operations and service delivery.

When every step is complete, click Complete in the task panel.

Task UFT-19-05 — Plan engagement work breakdown · done by Consultant PM

Input: Strategic alignment → **Output:** Engagement WBS

Step MP-36.4 — Plan engagement work breakdown (Consultant PM)

Type:

Row 1 — Engagement work breakdown: Engagement work breakdown — Generative AI for everyday work · **Owner:** Sara Tazi · **Start:** 2027-01-24 · **End:** 2027-02-23 · **Budget:** 35000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Engagement work breakdown: Engagement work breakdown — AI-assisted customer service · **Owner:** Asmae Sefrioui · **Start:** 2027-01-31 · **End:** 2027-03-02 · **Budget:** 47000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: WBS: 6 phases, 14 deliverables, Gantt from February to November.

When every step is complete, click Complete in the task panel.

Task UFT-19-06 — Plan change support · done by Change Manager

Input: Engagement WBS → **Output:** Change plan

Step MP-19.1 — Assess change impact (Change Manager)

Type:

Row 1 — Change impact: Generative AI for everyday work · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Change impact: AI-assisted customer service · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Change impact: Responsible AI and data protection · **Criterion:** Cost · **Weight (%):** 20 · **Score (1–5):** 2 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-19.2 — Build adoption plan (Change Manager)

Type:

Row 1 — Adoption plan: Adoption plan — Generative AI for everyday work · **Owner:** Asmae Sefrioui · **Start:** 2027-01-26 · **End:** 2027-02-25 · **Budget:** 61000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Adoption plan: Adoption plan — AI-assisted customer service · **Owner:** Loubna Chraibi · **Start:** 2027-02-02 · **End:** 2027-03-04 · **Budget:** 22000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Change plan: 3 sponsor messages, champion network, 2 town-halls.

When every step is complete, click Complete in the task panel.

Task UFT-19-07 — Track engagement deliverables · done by Consultant PM

Input: Change plan → **Output:** Deliverable tracker

Step MP-36.5 — Track engagement deliverables (Consultant PM)

Type:

Row 1 — Engagement deliverables: KPI-003 (Critical gap rate) · **Period:** 2026-Q2 · **Value:** 59 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Engagement deliverables: KPI-004 (Training Engineering Report cycle time) · **Period:** 2026-Q3 · **Value:** 88 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-20.5 — Run periodic quality review (Quality Manager)

Type:

Row 1 — Periodic quality review: Generative AI for everyday work — half-day workshop · **Date:** 2027-02-07 · **Trainer:** Atlas Formation Conseil · **Participants:** 12 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Periodic quality review: AI-assisted customer service — half-day workshop · **Date:** 2027-02-14 · **Trainer:** Maghreb Learning Partners · **Participants:** 11 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Deliverables: 9 of 14 delivered on time, 1 late (SWOT), 4 planned.

When every step is complete, click Complete in the task panel.

Task UFT-19-08 — Deliver final report and obtain acceptance · done by Consultant PM

Input: Deliverable tracker → **Output:** Client acceptance

Step MP-36.6 — Deliver final report (Consultant PM)

Type:

Row 1 — Final report: Generative AI for everyday work — half-day workshop · **Date:** 2027-02-09 · **Trainer:** Atlas Formation Conseil · **Participants:** 20 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Final report: AI-assisted customer service — half-day workshop · **Date:** 2027-02-16 · **Trainer:** Maghreb Learning Partners · **Participants:** 15 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-36.7 — Obtain client acceptance (HR Director)

Type:

Row 1 — Client acceptance: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Loubna Sefrioui · **Source:** Annual performance review

Row 2 — Client acceptance: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Leila Berrada · **Source:** Audit report

Then click Complete the step. The rows go to the register "Client acceptance register".

Result to record in the task: Final report delivered; acceptance signed by the HR Director on 28 November.

When every step is complete, click Complete in the task panel.

Task UFT-19-09 — Record engagement REX · done by Consultant PM

Input: Client acceptance → **Output:** Engagement REX

Step MP-36.8 — Record engagement REX (Consultant PM)

Type:

Row 1 — Engagement REX: Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Leila Berrada · **Source:** Audit report

Row 2 — Engagement REX: AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Tarik Squalli · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Engagement REX register".

Step MP-12.6 — Record REX entry (L&D Business Partner)

Type:

Row 1 — REX entry: Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Leila Berrada · **Source:** Audit report

Row 2 — REX entry: AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Tarik Squalli · **Source:** HRIS export

Then click Complete the step. The rows go to the register "REX entry register".

Step MP-12.5 — Prompt REX at closure (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: REX: went well — stakeholder register; did not — late SWOT inputs; root cause — no function-head backup; rating 4/5.

When every step is complete, click Complete in the task panel.

E2E-24 — Competitive Intelligence-to-Strategy

Goal: Analyze external environment and feed L&D strategy

Starts when: Annual strategy cycle or executive request for market positioning analysis.
Ends with: Validated competitive intelligence report feeding into L&D strategy and organizational diagnostic.

Task UFT-24-01 — Define intelligence scope · done by Strategy Analyst

Input: Strategy docs → **Output:** Scope document

Step MP-43.1 — Define intelligence scope (Strategy Analyst)

Type:

Row 1 — Intelligence scope: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hicham Sefrioui · **Source:** Annual performance review

Row 2 — Intelligence scope: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Adil Amrani · **Source:** Audit report

Then click Complete the step. The rows go to the register "Intelligence scope register".

Result to record in the task: Scope: Multi-sector services market in Morocco and export markets; horizon 3 years; focus on Generative AI for everyday work and AI-assisted customer service.

When every step is complete, click Complete in the task panel.

Task UFT-24-02 — Conduct Porter's Five Forces · done by Strategy Analyst

Input: Market data → **Output:** Porter report

Step MP-43.2 — Conduct Porter's Five Forces analysis (Strategy Analyst)

Type:

Row 1 — Porter's Five Forces analysis: Generative AI for everyday work — half-day workshop · **Date:** 2027-04-22 · **Trainer:** Atlas Formation Conseil · **Participants:** 12 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Porter's Five Forces analysis: AI-assisted customer service — half-day workshop · **Date:** 2027-04-29 · **Trainer:** Maghreb Learning Partners · **Participants:** 18 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Rivalry 4/5; new entrants 3/5; substitutes 2/5; supplier power 3/5; buyer power 4/5.

When every step is complete, click Complete in the task panel.

Task UFT-24-03 — Map market segments · done by Market Analyst

Input: Market data → **Output:** Segment map

Step MP-43.3 — Map market segments (Market Analyst)

Type:

Row 1 — Market segments: Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Rim Kettani · **Source:** HRIS export

Row 2 — Market segments: AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Anas Ziani · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Market segments register".

Result to record in the task: Segments: key accounts (55% revenue), resellers (30%), direct small customers (15%).

When every step is complete, click Complete in the task panel.

Task UFT-24-04 — Analyze competitor positioning · done by Market Analyst

Input: Competitor data → **Output:** Competitor benchmark

Step MP-43.4 — Analyze competitor positioning (Market Analyst)

Type:

Row 1 — Competitor positioning: Generative AI for everyday work · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Competitor positioning: AI-assisted customer service · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Competitor positioning: Responsible AI and data protection · **Criterion:** Cost · **Weight (%):** 20 · **Score (1–5):** 4 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Competitor A leads on Generative AI for everyday work; competitor B cheaper but weaker on ISO 9001.

When every step is complete, click Complete in the task panel.

Task UFT-24-05 — Monitor regulatory and technology trends · done by Regulatory Analyst

Input: Regulations → **Output:** Trend report

Step MP-43.5 — Monitor regulatory changes (Regulatory Analyst)

Type:

Row 1 — Regulatory changes: KPI-003 (Critical gap rate) · **Period:** 2026-Q3 · **Value:** 55 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Regulatory changes: KPI-004 (Training Engineering Report cycle time) · **Period:** 2026-Q1 · **Value:** 72 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-43.6 — Track technology trends (Strategy Analyst)

Type:

Row 1 — Technology trends: KPI-003 (Critical gap rate) · **Period:** 2026-Q3 · **Value:** 70 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Technology trends: KPI-004 (Training Engineering Report cycle time) · **Period:** 2026-Q1 · **Value:** 90 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-43.7 — Benchmark against industry (Strategy Analyst)

Type:

Row 1 — Against industry: Generative AI for everyday work · **Criterion:** Feasibility · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Against industry: AI-assisted customer service · **Criterion:** Cost · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Against industry: Responsible AI and data protection · **Criterion:** Risk · **Weight (%):** 20 · **Score (1–5):** 2 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Trends: revision of ISO 9001 expected next year; fast growth of Responsible AI and data protection.

When every step is complete, click Complete in the task panel.

Task UFT-24-06 — Identify L&D implications · done by L&D Strategist

Input: All findings → **Output:** L&D implications

Step MP-43.8 — Identify strategic implications for L&D (L&D Strategist)

Type:

Row 1 — Strategic implications for L&D: Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Zineb Berrada · **Source:** Annual performance review

Row 2 — Strategic implications for L&D: AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hicham Tazi · **Source:** Audit report

Then click Complete the step. The rows go to the register "Strategic implications for L&D register".

Result to record in the task: L&D implication: build Generative AI for everyday work skills for key-account teams before competitor A scales.

When every step is complete, click Complete in the task panel.

Task UFT-24-07 — Publish intelligence report · done by Strategy Analyst

Input: All outputs → **Output:** Intelligence report

Step MP-43.9 — Produce intelligence report (Strategy Analyst)

Type:

Row 1 — Intelligence report: Intelligence report — Generative AI for everyday work · **Owner:** Hicham Tazi · **Start:** 2027-04-22 · **End:** 2027-05-22 · **Budget:** 38000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Intelligence report: Intelligence report — AI-assisted customer service · **Owner:** Youssef Ziani · **Start:** 2027-04-29 · **End:** 2027-05-29 · **Budget:** 78000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-43.10 — Feed intelligence into strategy and diagnostic (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-43.11 — Update intelligence continuously (Strategy Analyst)

Type:

Intelligence continuously: Intelligence continuously

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-05-14

Then click Complete the step.

Step MP-43.12 — Report to executive leadership (Head of Strategy)

Type:

Row 1 — Executive leadership: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-04-17

Row 2 — Executive leadership: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-04-24

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish RPT-007 Competitive Intelligence Report to the executive committee.

When every step is complete, click Complete in the task panel.

Gate G1 — G1 — Scope & evidence approved: close the phase

3. Open the project workspace and click the gate button of the phase.
3. Tick each checklist item once its evidence is attached, then click Submit for decision.
3. Click Go. Type the justification: All mandatory items met; evidence attached.
3. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

Phase 2 — Diagnosis

E2E-20 — Multi-Axis Diagnostic-to-Maturity Report

Goal: Conduct 5-axis diagnostic + CMM maturity + leadership assessment

Starts when: Engagement kickoff or approved Scope of Work requesting a diagnostic. **Ends with:** 5-axis diagnostic, CMM maturity and leadership maturity report validated with the sponsor.

Task UFT-20-01 — Define diagnostic axes and sample · done by Consultant PM

Input: Approved Scope of Work → **Output:** Axes and sample

Step MP-37.1 — Define diagnostic axes and sample (Consultant PM)

Type:

Row 1 — Diagnostic axes and sample: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Tarik Squalli · **Source:** HRIS export

Row 2 — Diagnostic axes and sample: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Hajar Fassi · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Diagnostic axes and sample register".

Result to record in the task: Axes: strategy, organization, processes, people, information systems. Sample: 40 people (MS 8, MO 16, OP 16).

When every step is complete, click Complete in the task panel.

Task UFT-20-02 — Deploy diagnostic questionnaire · done by Consultant PM

Input: Axes and sample → **Output:** Questionnaire responses

Step MP-37.2 — Deploy diagnostic questionnaire (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-37.4 — Collect questionnaire responses (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Diagnostic questionnaire deployed to 40 people; 34 responses (85%).

When every step is complete, click Complete in the task panel.

Task UFT-20-03 — Conduct semi-structured interviews · done by Consultant

Input: Axes and sample → **Output:** Interview findings

Step MP-37.3 — Conduct semi-structured interviews (Consultant)

Type:

Row 1 — Semi-structured interviews: Generative AI for everyday work — half-day workshop · **Date:** 2027-02-17 · **Trainer:** Atlas Formation Conseil · **Participants:** 12 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Semi-structured interviews: AI-assisted customer service — half-day workshop · **Date:** 2027-02-24 · **Trainer:** Maghreb Learning Partners · **Participants:** 17 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Interview notes (OP, Operations and service delivery): 'Procedures exist but are not updated since 2023.'

When every step is complete, click Complete in the task panel.

Task UFT-20-04 — Score diagnostic axes · done by Consultant

Input: Interview findings, responses → **Output:** Axis scores

Step MP-37.5 — Score diagnostic axes (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Axis scores (1-5): strategy 3.4, organization 2.8, processes 2.6, people 3.1, IS 2.2.

When every step is complete, click Complete in the task panel.

Task UFT-20-05 — Select maturity model · done by Consultant

Input: Axis scores → **Output:** Maturity model

Step MP-38.1 — Select maturity model levels (Consultant)

Type:

Decision: Approved with conditions

Maturity model levels: Maturity model levels

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2027-03-04

Decided by: Hajar Fassi

Then click Complete the step.

Step MP-38.2 — Define evidence criteria per level (Consultant)

Type:

Row 1 — Evidence criteria per level: Raise Generative AI for everyday work proficiency of Operator — Operations and service delivery teams to level 3 · **Indicator:** KPI-010 (Learner completion rate) · **Baseline:** 33 % · **Target:** 77 % · **Deadline:** 2027-07-31 · **Owner:** Hicham Sefrioui

Row 2 — Evidence criteria per level: Certify Supervisor — Operations and service delivery staff on AI-assisted customer service · **Indicator:** KPI-011 (API Availability) · **Baseline:** 36 % · **Target:** 83 % · **Deadline:** 2027-08-07 · **Owner:** Adil Amrani

Row 3 — Evidence criteria per level: Cut onboarding time on Responsible AI and data protection by 30 % · **Indicator:** KPI-012 (Average Level 1 satisfaction) · **Baseline:** 44 % · **Target:** 74 % · **Deadline:** 2027-08-14 · **Owner:** Rim Kettani

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Maturity model: CMM 5 levels; evidence for level 3 = documented and applied process.

When every step is complete, click Complete in the task panel.

Task UFT-20-06 — Rate process maturity · done by Consultant

Input: Maturity model → **Output:** Maturity profile

Step MP-38.3 — Rate maturity per process area (Consultant)

Type:

Row 1 — Maturity per process area: Generative AI for everyday work · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Maturity per process area: AI-assisted customer service · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 5 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Maturity per process area: Responsible AI and data protection · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-38.4 — Compute maturity profile (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Maturity: training management level 2; Operations and service delivery processes level 3.

When every step is complete, click Complete in the task panel.

Task UFT-20-07 — Assess leadership maturity · done by HR Business Partner

Input: Maturity profile → **Output:** Leadership maturity

Step MP-42.1 — Launch leadership 360 assessment (HR Business Partner)

Type:

Row 1 — Leadership 360 assessment: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-02-10

Row 2 — Leadership 360 assessment: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-02-17

Then click Complete the step. The rows go to the register "Communications log".

Step MP-42.2 — Compute leadership maturity level (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Leadership 360: average level 3 (Team Leadership) across 18 managers.

When every step is complete, click Complete in the task panel.

Task UFT-20-08 — Cross-check skills and needs · done by L&D Analyst

Input: Leadership maturity → **Output:** Consolidated evidence

Step MP-02.7 — Validate skills inventory (Head of L&D)

Type:

Decision: Approved

Skills inventory: Skills inventory

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-02-24

Decided by: Hajar Fassi

Then click Complete the step.

Step MP-03.2 — Review gap matrix by site and function (L&D Analyst)

Type:

Gap matrix by site and function: Gap matrix by site and function

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-02-25

Then click Complete the step.

Result to record in the task: Cross-check: IS axis weakness confirmed by the Generative AI for everyday work gap (-1.4).

When every step is complete, click Complete in the task panel.

Task UFT-20-09 — Draft diagnostic findings · done by Consultant

Input: Consolidated evidence → **Output:** Draft findings

Step MP-37.6 — Draft diagnostic findings (Consultant)

Type:

Row 1 — Diagnostic findings: Diagnostic findings — Generative AI for everyday work · **Owner:** Ghita Ziani · **Start:** 2027-02-19 · **End:** 2027-03-21 · **Budget:** 62000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Diagnostic findings: Diagnostic findings — AI-assisted customer service · **Owner:** Zineb Berrada · **Start:** 2027-02-26 · **End:** 2027-03-28 · **Budget:** 38000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-38.5 — Produce maturity report (Consultant PM)

Type:

Row 1 — Maturity report: Maturity report — Generative AI for everyday work · **Owner:** Ghita Ziani · **Start:** 2027-02-19 · **End:** 2027-03-21 · **Budget:** 68000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Maturity report: Maturity report — AI-assisted customer service · **Owner:** Zineb Berrada · **Start:** 2027-02-26 · **End:** 2027-03-28 · **Budget:** 58000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Edit AI findings: keep 5, merge 2, add one on ISO 9001 documentation.

When every step is complete, click Complete in the task panel.

Task UFT-20-10 — Validate findings with sponsor · done by Consultant PM

Input: Draft findings → **Output:** Diagnostic & maturity report

Step MP-37.7 — Validate findings with sponsor (Consultant PM)

Type:

Decision: Approved with conditions

Findings with sponsor: Findings with sponsor

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2027-03-14

Decided by: Hajar Fassi

Then click Complete the step.

Step MP-38.6 — Agree target maturity (HR Director)

Type:

Decision: Approved with conditions

Target maturity: Target maturity

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2027-03-14

Decided by: Hajar Fassi

Then click Complete the step.

Result to record in the task: Findings validated with the sponsor; target maturity level 3 by 2026+1.

When every step is complete, click Complete in the task panel.

E2E-25 — Job Architecture-to-Competency Map

Goal: Manage organizational charts, position descriptions, gap analysis

Starts when: Organizational change, new role creation, or annual job architecture review.
Ends with: Approved organizational charts, position descriptions, and competency maps with gap analysis.

Task UFT-25-01 — Map organizational structure · done by HR Analyst

Input: Org data → **Output:** Structure map

Step MP-44.1 — Map organizational structure (HR Analyst)

Type:

Row 1 — Organizational structure: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Youssef Ziani · **Source:** HRIS export

Row 2 — Organizational structure: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Imane Ouazzani · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Organizational structure register".

Result to record in the task: Structure: 6 functions, 14 departments, 3 sites; 212 positions.

When every step is complete, click Complete in the task panel.

Task UFT-25-02 — Design organizational charts · done by Org Design Consultant

Input: Structure map → **Output:** Org charts

Step MP-44.2 — Design organizational charts (Org Design Consultant)

Type:

Row 1 — Organizational charts: Organizational charts — Generative AI for everyday work · **Owner:** Imane Ouazzani · **Start:** 2027-04-26 · **End:** 2027-05-26 · **Budget:** 74000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Organizational charts: Organizational charts — AI-assisted customer service · **Owner:** Rim Alaoui · **Start:** 2027-05-03 · **End:** 2027-06-02 · **Budget:** 46000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Org chart 'Operations and service delivery': director → 3 managers → 9 supervisors → operators.

When every step is complete, click Complete in the task panel.

Task UFT-25-03 — Conduct job analysis · done by Job Analyst

Input: Org charts → **Output:** Job analysis

Step MP-44.3 — Conduct job analysis (Job Analyst)

Type:

Row 1 — Job analysis: Generative AI for everyday work — half-day workshop · **Date:** 2027-05-08 · **Trainer:** Atlas Formation Conseil · **Participants:** 13 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Job analysis: AI-assisted customer service — half-day workshop · **Date:** 2027-05-15 · **Trainer:** Maghreb Learning Partners · **Participants:** 17 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Job analysis 'Operations and service delivery supervisor': 8 main activities, 2 of them now supported by Generative AI for everyday work.

When every step is complete, click Complete in the task panel.

Task UFT-25-04 — Draft position descriptions · done by Job Analyst

Input: Job analysis → **Output:** Draft descriptions

Step MP-44.4 — Draft position descriptions (Job Analyst)

Type:

Row 1 — Position descriptions: Position descriptions — Generative AI for everyday work · **Owner:** Mehdi Alaoui · **Start:** 2027-04-30 · **End:** 2027-05-30 · **Budget:** 70000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Position descriptions: Position descriptions — AI-assisted customer service · **Owner:** Leila Mansouri · **Start:** 2027-05-07 · **End:** 2027-06-06 · **Budget:** 77000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Position description drafted: mission, activities, competencies (Generative AI for everyday work level 3, ISO 9001 level 3), KPIs.

When every step is complete, click Complete in the task panel.

Task UFT-25-05 — Validate with managers · done by HR Business Partner

Input: Draft descriptions → **Output:** Validated descriptions

Step MP-44.5 — Validate descriptions with managers (HR Business Partner)

Type:

Decision: Approved with conditions

Descriptions with managers: Descriptions with managers

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2027-05-23

Decided by: Hajar Fassi

Then click Complete the step.

Result to record in the task: Validated by the Operations and service delivery manager with 2 changes on activities.

When every step is complete, click Complete in the task panel.

Task UFT-25-06 — Conduct gap analysis · done by Job Analyst

Input: Validated descriptions → **Output:** Gap analysis

Step MP-44.6 — Conduct gap analysis existing versus real (Job Analyst)

Type:

Row 1 — Gap analysis existing versus real: Generative AI for everyday work — half-day workshop · **Date:** 2027-05-14 · **Trainer:** Atlas Formation Conseil · **Participants:** 16 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Gap analysis existing versus real: AI-assisted customer service — half-day workshop · **Date:** 2027-05-21 · **Trainer:** Maghreb Learning Partners · **Participants:** 10 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Gap existing vs real: 11 descriptions outdated; 4 roles with new Generative AI for everyday work tasks.

When every step is complete, click Complete in the task panel.

Task UFT-25-07 — Identify roles to develop · done by HR Business Partner

Input: Gap analysis → **Output:** Roles to develop

Step MP-44.7 — Identify roles to develop (HR Business Partner)

Type:

Row 1 — Roles to develop: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Omar Kettani · **Source:** Interview with the function head

Row 2 — Roles to develop: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Tarik Naciri · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Roles to develop register".

Step MP-44.8 — Update job architecture (Job Analyst)

Type:

Job architecture: Job architecture

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-05-07

Then click Complete the step.

Step MP-44.9 — Align with competency framework (Job Analyst)

Type:

Row 1 — With competency framework: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Omar Kettani · **Source:** Interview with the function head

Row 2 — With competency framework: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Tarik Naciri · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "With competency framework register".

Result to record in the task: Roles 'To develop': data-literate supervisor, maintenance technician 4.0.

When every step is complete, click Complete in the task panel.

Task UFT-25-08 — Publish approved architecture · done by HR Director

Input: All outputs → **Output:** Approved architecture

Step MP-44.10 — Publish approved position descriptions (HR Director)

Type:

Row 1 — Approved position descriptions: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-05-03

Row 2 — Approved position descriptions: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-05-10

Then click Complete the step. The rows go to the register "Communications log".

Step MP-44.11 — Track job architecture changes (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-44.12 — Report on architecture health (HR Director)

Type:

Row 1 — On architecture health: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-05-03

Row 2 — On architecture health: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-05-10

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish 212 approved descriptions and the architecture map to all employees.

When every step is complete, click Complete in the task panel.

E2E-26 — GPEC-to-Training Plan

Goal: Integrate Forward Planning of Jobs and Skills into L&D

Starts when: Annual HR strategic planning cycle or GPEC (Forward Planning of Jobs and Skills) review. **Ends with:** Training plan aligned with GPEC and HR strategic orientations.

Task UFT-26-01 — Define GPEC scope · done by GPEC Specialist

Input: HR strategy → **Output:** GPEC scope

Step MP-45.1 — Define GPEC scope (GPEC Specialist)

Type:

Row 1 — GPEC scope: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Mehdi Fassi · **Source:** Annual performance review

Row 2 — GPEC scope: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Hajar Fassi · **Source:** Audit report

Then click Complete the step. The rows go to the register "GPEC scope register".

Result to record in the task: GPEC scope: Operations and service delivery and Information Systems jobs; horizon 3 years.

When every step is complete, click Complete in the task panel.

Task UFT-26-02 — Map HR strategic orientations · done by HR Director

Input: Strategy docs → **Output:** Orientation map

Step MP-45.2 — Map HR strategic orientations (HR Director)

Type:

Row 1 — HR strategic orientations: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hajar Fassi · **Source:** Audit report

Row 2 — HR strategic orientations: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Soukaina Squalli · **Source:** HRIS export

Then click Complete the step. The rows go to the register "HR strategic orientations register".

Step MP-45.3 — Align training with GPEC (L&D Strategist)

Type:

Row 1 — Training with GPEC: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hajar Fassi · **Source:** Audit report

Row 2 — Training with GPEC: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Soukaina Squalli · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Training with GPEC register".

Result to record in the task: HR orientations: internal mobility first; 30% of promotions from internal talent.

When every step is complete, click Complete in the task panel.

Task UFT-26-03 — Update development foundation · done by HR Business Partner

Input: Position descriptions → **Output:** Updated foundation

Step MP-45.4 — Update development foundation (HR Business Partner)

Type:

Development foundation: Development foundation

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-05-08

Then click Complete the step.

Step MP-45.5 — Support human capital development (HR Director)

Type:

Row 1 — Human capital development: Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Soukaina Squalli · **Source:** HRIS export

Row 2 — Human capital development: AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Karim El Idrissi · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Human capital development register".

Result to record in the task: Development foundation updated: descriptions, annual objectives, evaluation grid.

When every step is complete, click Complete in the task panel.

Task UFT-26-04 — Update Jobs and Skills Directory (REC) · done by GPEC Specialist

Input: Job data → **Output:** Updated REC

Step MP-45.6 — Update Jobs and Skills Directory (REC) (GPEC Specialist)

Type:

Jobs and Skills Directory (REC): Jobs and Skills Directory (REC)

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-05-17

Then click Complete the step.

Result to record in the task: REC updated: 42 jobs, 3 new jobs linked to Generative AI for everyday work.

When every step is complete, click Complete in the task panel.

Task UFT-26-05 — Redynamize periodic evaluations · done by HR Business Partner

Input: Eval system → **Output:** Eval updates

Step MP-45.7 — Redynamize periodic evaluations (HR Business Partner)

Type:

Row 1 — Periodic evaluations: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Mehdi Chraibi · **Source:** Questionnaire results

Row 2 — Periodic evaluations: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Sara Tazi · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Periodic evaluations register".

Result to record in the task: Periodic evaluation redesigned: 2 reviews per year, competency section added.

When every step is complete, click Complete in the task panel.

Task UFT-26-06 — Design career paths · done by HR Director

Input: Job architecture → **Output:** Career paths

Step MP-45.8 — Design career paths (HR Director)

Type:

Row 1 — Career paths: Career paths — Generative AI for everyday work · **Owner:** Sara Tazi · **Start:** 2027-05-20 · **End:** 2027-06-19 · **Budget:** 76000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Career paths: Career paths — AI-assisted customer service · **Owner:** Asmae Sefrioui · **Start:** 2027-05-27 · **End:** 2027-06-26 · **Budget:** 68000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Career path: operator → team leader → supervisor → Operations and service delivery manager.

When every step is complete, click Complete in the task panel.

Task UFT-26-07 — Document career management · done by HR Director

Input: Career paths → **Output:** Career process doc

Step MP-45.9 — Document career management process (HR Director)

Type:

Row 1 — Career management process: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Asmae Sefrioui · **Source:** Audit report

Row 2 — Career management process: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Loubna Chraibi · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Career management process register".

Step MP-45.10 — Implement collective compensation (HR Director)

Type:

Row 1 — Collective compensation: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Asmae Sefrioui · **Source:** Audit report

Row 2 — Collective compensation: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Loubna Chraibi · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Collective compensation register".

Result to record in the task: Career management procedure documented (v1): eligibility, committee, calendar.

When every step is complete, click Complete in the task panel.

Task UFT-26-08 — Align training with GPEC · done by L&D Strategist

Input: GPEC outputs → **Output:** Training-GPEC alignment

Step MP-45.11 — Feed GPEC into training needs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-45.12 — Report on GPEC integration (GPEC Specialist)

Type:

Row 1 — On GPEC integration: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-05-19

Row 2 — On GPEC integration: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-05-26

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Training aligned with GPEC: 4 themes cover the 3 new jobs; 2 themes removed.

When every step is complete, click Complete in the task panel.

E2E-27 — Demand Collection-to-Consolidation

Goal: Collect individual and collective training demands

Starts when: Annual training plan cycle or ad-hoc demand collection request. **Ends with:** Consolidated and prioritized demand repository integrated into the training needs analysis.

Task UFT-27-01 — Design demand collection forms · done by L&D Analyst

Input: Templates → **Output:** Forms

Step MP-46.1 — Design demand collection forms (L&D Analyst)

Type:

Row 1 — Demand collection forms: Demand collection forms — Generative AI for everyday work · **Owner:** Loubna Sefrioui · **Start:** 2027-05-26 · **End:** 2027-06-25 · **Budget:** 49000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Demand collection forms: Demand collection forms — AI-assisted customer service · **Owner:** Leila Berrada · **Start:** 2027-06-02 · **End:** 2027-07-02 · **Budget:** 51000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Forms: individual form (5 questions) and collective form per team (3 questions).

When every step is complete, click Complete in the task panel.

Task UFT-27-02 — Deploy individual demand collection · done by L&D Analyst

Input: Forms → **Output:** Individual demands

Step MP-46.2 — Deploy individual demand collection (L&D Analyst)

Type:

Row 1 — Individual demand collection: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Individual demand collection: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Individual collection open 1-20 March; 146 demands received.

When every step is complete, click Complete in the task panel.

Task UFT-27-03 — Deploy collective demand collection · done by L&D Analyst

Input: Forms → **Output:** Collective demands

Step MP-46.3 — Deploy collective demand collection (L&D Analyst)

Type:

Row 1 — Collective demand collection: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Collective demand collection: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Collective collection: 18 team demands received.

When every step is complete, click Complete in the task panel.

Task UFT-27-04 — Collect manager recommendations · done by L&D Business Partner

Input: Managers → **Output:** Recommendations

Step MP-46.4 — Collect manager recommendations (L&D Business Partner)

Type:

Row 1 — Manager recommendations: Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hajar Fassi · **Source:** Audit report

Row 2 — Manager recommendations: AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Leila El Idrissi · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Manager recommendations register".

Result to record in the task: Manager recommendations: 24 received, 9 flagged as priority.

When every step is complete, click Complete in the task panel.

Task UFT-27-05 — Consolidate demands by function · done by L&D Analyst

Input: Demands → **Output:** Consolidated demands

Step MP-46.5 — Consolidate demands by function (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Consolidated: Operations and service delivery 64 demands, Operations 41, Quality 22, others 37.

When every step is complete, click Complete in the task panel.

Task UFT-27-06 — Map demands to competencies · done by L&D Analyst

Input: Consolidated demands → **Output:** Demand-competency map

Step MP-46.6 — Map demands to competencies (L&D Analyst)

Type:

Row 1 — Demands to competencies: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Asmae Lahlou · **Source:** Interview with the function head

Row 2 — Demands to competencies: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hicham Sefrioui · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Demands to competencies register".

Step MP-46.7 — Prioritize demands (L&D Business Partner)

Type:

Row 1 — Demands: Generative AI for everyday work · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Demands: AI-assisted customer service · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Demands: Responsible AI and data protection · **Criterion:** Cost · **Weight (%):** 20 · **Score (1–5):** 4 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Accept AI mapping for 139 demands; map 7 manually to 'AI-assisted customer service'.

When every step is complete, click Complete in the task panel.

Task UFT-27-07 — Prioritize and validate demands · done by L&D Business Partner

Input: Demand map → **Output:** Validated demands

Step MP-46.8 — Validate demands with managers (L&D Business Partner)

Type:

Decision: Approved

Demands with managers: Demands with managers

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-06-14

Decided by: Hajar Fassi

Then click Complete the step.

Step MP-46.9 — Integrate demands into needs analysis (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-46.10 — Report on demand patterns (L&D Analyst)

Type:

Row 1 — On demand patterns: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-06-02

Row 2 — On demand patterns: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-06-09

Then click Complete the step. The rows go to the register "Communications log".

Step MP-46.11 — Track demand fulfillment (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-46.12 — Improve demand collection (L&D Analyst)

Type:

Demand collection: Demand collection

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-06-15

Then click Complete the step.

Result to record in the task: Validated: 112 demands (High 38, Medium 51, Low 23); 34 rejected with reason.

When every step is complete, click Complete in the task panel.

E2E-28 — Performance Assessment-to-RAG Dashboard

Goal: Assess MS/MO/OP performance with RAG ratings

Starts when: Annual performance cycle or management request for performance visualization. **Ends with:** Validated MS/MO/OP (Strategic Management / Operational Management / Operational Level) performance assessment with RAG (Green/Amber/Red) dashboards.

Task UFT-28-01 — Define MS/MO/OP framework · done by Performance Analyst

Input: Strategy docs → **Output:** Framework

Step MP-47.1 — Define MS/MO/OP framework (Performance Analyst)

Type:

Row 1 — MS/MO/OP framework: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Adil Amrani · **Source:** Annual performance review

Row 2 — MS/MO/OP framework: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Rim Kettani · **Source:** Audit report

Then click Complete the step. The rows go to the register "MS/MO/OP framework register".

Result to record in the task: MS = executive committee; MO = managers and supervisors; OP = operators and technicians.

When every step is complete, click Complete in the task panel.

Task UFT-28-02 — Define RAG criteria · done by Performance Analyst

Input: Framework → **Output:** RAG criteria

Step MP-47.2 — Define RAG criteria (Performance Analyst)

Type:

Row 1 — RAG criteria: Raise Generative AI for everyday work proficiency of Operator — Operations and service delivery teams to level 3 · **Indicator:** KPI-010 (Learner completion rate) · **Baseline:** 32 % · **Target:** 71 % · **Deadline:** 2027-11-28 · **Owner:** Rim Kettani

Row 2 — RAG criteria: Certify Supervisor — Operations and service delivery staff on AI-assisted customer service · **Indicator:** KPI-011 (API Availability) · **Baseline:** 38 % · **Target:** 78 % · **Deadline:** 2027-12-05 · **Owner:** Anas Ziani

Row 3 — RAG criteria: Cut onboarding time on Responsible AI and data protection by 30 % · **Indicator:** KPI-012 (Average Level 1 satisfaction) · **Baseline:** 39 % · **Target:** 79 % · **Deadline:** 2027-12-12 · **Owner:** Ghita Ziani

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Green ≥ 90% of target; Amber 70-89%; Red < 70%.

When every step is complete, click Complete in the task panel.

Task UFT-28-03 — Collect performance data by function · done by Performance Analyst

Input: Function data → **Output:** Data set

Step MP-47.3 — Collect performance data by function (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Data collected for 6 functions: 18 KPIs, last 12 months.

When every step is complete, click Complete in the task panel.

Task UFT-28-04 — Assess MS performance · done by Performance Analyst

Input: Data set → **Output:** MS assessment

Step MP-47.4 — Assess MS performance (Performance Analyst)

Type:

Row 1 — MS performance: Generative AI for everyday work · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — MS performance: AI-assisted customer service · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — MS performance: Responsible AI and data protection · **Criterion:** Cost · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: MS: strategy deployment Amber (78%); governance Green (92%).

When every step is complete, click Complete in the task panel.

Task UFT-28-05 — Assess MO performance · done by Performance Analyst

Input: Data set → **Output:** MO assessment

Step MP-47.5 — Assess MO performance (Performance Analyst)

Type:

Row 1 — MO performance: Generative AI for everyday work · **Criterion:** Feasibility · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — MO performance: AI-assisted customer service · **Criterion:** Cost · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — MO performance: Responsible AI and data protection · **Criterion:** Risk · **Weight (%):** 20 · **Score (1–5):** 4 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: MO: Operations and service delivery team management Red (64%); planning Amber (81%).

When every step is complete, click Complete in the task panel.

Task UFT-28-06 — Assess OP performance · done by Performance Analyst

Input: Data set → **Output:** OP assessment

Step MP-47.6 — Assess OP performance (Performance Analyst)

Type:

Row 1 — OP performance: Generative AI for everyday work · **Criterion:** Cost · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — OP performance: AI-assisted customer service · **Criterion:** Risk · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — OP performance: Responsible AI and data protection · **Criterion:** Business impact · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-47.7 — Apply RAG ratings (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: OP: ISO 9001 compliance Amber (85%); productivity Green (93%).

When every step is complete, click Complete in the task panel.

Task UFT-28-07 — Publish RAG dashboard · done by Performance Analyst

Input: All assessments → **Output:** RAG dashboard

Step MP-47.8 — Visualize performance dashboards (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-47.9 — Identify performance gaps (Performance Analyst)

Type:

Row 1 — Performance gaps: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Youssef Ziani · **Source:** Audit report

Row 2 — Performance gaps: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Imane Ouazzani · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Performance gaps register".

Step MP-47.10 — Feed performance into diagnostic report (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-47.11 — Track performance progression (Performance Analyst)

Type:

Row 1 — Performance progression: KPI-015 (Training record correction rate) · **Period:** 2026-Q2 · **Value:** 68 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Performance progression: KPI-016 (Knowledge reuse rate) · **Period:** 2026-Q3 · **Value:** 74 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-47.12 — Report performance to leadership (Performance Analyst)

Type:

Row 1 — Performance to leadership: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-06-16

Row 2 — Performance to leadership: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-06-23

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish RPT-005 MS/MO/OP RAG dashboard to the executive committee.

When every step is complete, click Complete in the task panel.

E2E-29 — Functional SWOT-to-Improvement Axes

Goal: Conduct function-level SWOT and define improvement axes

Starts when: Diagnostic phase of a training engineering engagement or annual functional review. **Ends with:** Validated functional SWOT reports with prioritized improvement axes per function.

Task UFT-29-01 — Define function scope · done by L&D Analyst

Input: Org data → **Output:** Scope

Step MP-48.1 — Define function scope (L&D Analyst)

Type:

Row 1 — Function scope: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Imane Ouazzani · **Source:** HRIS export

Row 2 — Function scope: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Rim Alaoui · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Function scope register".

Result to record in the task: Function in scope: Operations and service delivery (3 sites, 96 people).

When every step is complete, click Complete in the task panel.

Task UFT-29-02 — Conduct function SWOT · done by L&D Analyst

Input: Function data → **Output:** SWOT

Step MP-48.2 — Conduct function SWOT (L&D Analyst)

Type:

Row 1 — Function SWOT: Generative AI for everyday work — half-day workshop · **Date:** 2027-07-05 · **Trainer:** Atlas Formation Conseil · **Participants:** 17 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Function SWOT: AI-assisted customer service — half-day workshop · **Date:** 2027-07-12 · **Trainer:** Maghreb Learning Partners · **Participants:** 19 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: SWOT workshop held with the function head and 6 supervisors.

When every step is complete, click Complete in the task panel.

Task UFT-29-03 — Identify strengths and weaknesses · done by L&D Analyst

Input: Interview data → **Output:** Internal factors

Step MP-48.3 — Identify strengths (L&D Analyst)

Type:

Row 1 — Strengths: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Mehdi Alaoui · **Source:** Questionnaire results

Row 2 — Strengths: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Leila Mansouri · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Strengths register".

Step MP-48.4 — Identify weaknesses (L&D Analyst)

Type:

Row 1 — Weaknesses: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Mehdi Alaoui · **Source:** Questionnaire results

Row 2 — Weaknesses: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Leila Mansouri · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Weaknesses register".

Result to record in the task: Strength: experienced team. Weakness: low Generative AI for everyday work usage, paper records.

When every step is complete, click Complete in the task panel.

Task UFT-29-04 — Identify opportunities and threats · done by L&D Analyst

Input: Market data → **Output:** External factors

Step MP-48.5 — Identify opportunities (L&D Analyst)

Type:

Row 1 — Opportunities: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Leila Mansouri · **Source:** Annual performance review

Row 2 — Opportunities: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hicham Bennani · **Source:** Audit report

Then click Complete the step. The rows go to the register "Opportunities register".

Step MP-48.6 — Identify threats (L&D Analyst)

Type:

Row 1 — Threats: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Leila Mansouri · **Source:** Annual performance review

Row 2 — Threats: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hicham Bennani · **Source:** Audit report

Then click Complete the step. The rows go to the register "Threats register".

Result to record in the task: Opportunity: Responsible AI and data protection. Threat: stricter ISO 9001 audits.

When every step is complete, click Complete in the task panel.

Task UFT-29-05 — Define improvement axes · done by L&D Business Partner

Input: SWOT → **Output:** Improvement axes

Step MP-48.7 — Define improvement axes (L&D Business Partner)

Type:

Row 1 — Improvement axes: Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hicham Bennani · **Source:** Audit report

Row 2 — Improvement axes: AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Omar Kettani · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Improvement axes register".

Result to record in the task: Axis 1: digitalise shift records with Generative AI for everyday work. Axis 2: certify supervisors on ISO 9001.

When every step is complete, click Complete in the task panel.

Task UFT-29-06 — Validate with function heads · done by L&D Business Partner

Input: Improvement axes → **Output:** Validated axes

Step MP-48.8 — Validate axes with function heads (L&D Business Partner)

Type:

Decision: Approved

Axes with function heads: Axes with function heads

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-06-26

Decided by: Hajar Fassi

Then click Complete the step.

Result to record in the task: Validated by the function head on 18 April; axis 2 deadline moved to Q3.

When every step is complete, click Complete in the task panel.

Task UFT-29-07 — Prioritize improvement axes · done by L&D Strategist

Input: Validated axes → **Output:** Prioritized axes

Step MP-48.9 — Prioritize improvement axes (L&D Strategist)

Type:

Row 1 — Improvement axes: Generative AI for everyday work · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Improvement axes: AI-assisted customer service · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Improvement axes: Responsible AI and data protection · **Criterion:** Cost · **Weight (%):** 20 · **Score (1–5):** 3 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-48.10 — Feed SWOT into diagnostic report (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-48.11 — Track improvement implementation (L&D Business Partner)

Type:

Row 1 — Improvement implementation: KPI-002 (Skills inventory validation rate) · **Period:** 2026-Q3 · **Value:** 64 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Improvement implementation: KPI-003 (Critical gap rate) · **Period:** 2026-Q1 · **Value:** 84 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-48.12 — Report on function performance (L&D Analyst)

Type:

Row 1 — On function performance: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-06-30

Row 2 — On function performance: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-07-07

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Priority: axis 1 (impact 5), axis 2 (impact 4).

When every step is complete, click Complete in the task panel.

E2E-02 — Skills-to-Gap Diagnosis

Goal: Produce a validated skills gap diagnosis

Starts when: Approved annual L&D plan or a scheduled skills assessment campaign. **Ends with:** Validated skills gap diagnosis released to needs analysis.

Task UFT-02-01 — Maintain competency framework · done by L&D Analyst

Input: Job architecture → **Output:** Competency framework

Step MP-02.1 — Define competency families and levels (L&D Analyst)

Type:

Row 1 — Competency families and levels: Raise Generative AI for everyday work proficiency of Operator — Operations and service delivery teams to level 3 · **Indicator:** KPI-010 (Learner completion rate) · **Baseline:** 38 % · **Target:** 85 % · **Deadline:** 2026-10-24 · **Owner:** Zineb Berrada

Row 2 — Competency families and levels: Certify Supervisor — Operations and service delivery staff on AI-assisted customer service · **Indicator:** KPI-011 (API Availability) · **Baseline:** 39 % · **Target:** 80 % · **Deadline:** 2026-10-31 · **Owner:** Hicham Tazi

Row 3 — Competency families and levels: Cut onboarding time on Responsible AI and data protection by 30 % · **Indicator:** KPI-012 (Average Level 1 satisfaction) · **Baseline:** 39 % · **Target:** 85 % · **Deadline:** 2026-11-07 · **Owner:** Youssef Ziani

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Family 'Generative AI for everyday work': 4 competencies on the 1-4 scale (Aware, Practitioner, Autonomous, Expert).

When every step is complete, click Complete in the task panel.

Task UFT-02-02 — Set target levels per position · done by HR Business Partner

Input: Competency framework → **Output:** Position targets

Step MP-02.2 — Set target levels per position (HR Business Partner)

Type:

Row 1 — Target levels per position: Raise Generative AI for everyday work proficiency of Operator — Operations and service delivery teams to level 3 · **Indicator:** KPI-011 (API Availability) · **Baseline:** 39 % · **Target:** 72 % · **Deadline:** 2026-10-26 · **Owner:** Hicham Tazi

Row 2 — Target levels per position: Certify Supervisor — Operations and service delivery staff on AI-assisted customer service · **Indicator:** KPI-012 (Average Level 1 satisfaction) · **Baseline:** 33 % · **Target:** 82 % · **Deadline:** 2026-11-02 · **Owner:** Youssef Ziani

Row 3 — Target levels per position: Cut onboarding time on Responsible AI and data protection by 30 % · **Indicator:** KPI-013 (Skill progression rate) · **Baseline:** 35 % · **Target:** 87 % · **Deadline:** 2026-11-09 · **Owner:** Imane Ouazzani

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Operations and service delivery supervisor: Generative AI for everyday work = 3; ISO 9001 = 3. Operations and service delivery operator: Generative AI for everyday work = 2.

When every step is complete, click Complete in the task panel.

Task UFT-02-03 — Launch assessment campaign · done by L&D Analyst

Input: Position targets → **Output:** Open campaign

Step MP-02.3 — Launch assessment campaign (L&D Analyst)

Type:

Row 1 — Assessment campaign: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-05-06

Row 2 — Assessment campaign: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-05-13

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Campaign 'Skills 2026': population Operations and service delivery and Operations (212 people), 12 competencies, close date 30 April.

When every step is complete, click Complete in the task panel.

Task UFT-02-04 — Collect self and manager assessments · done by Manager

Input: Open campaign → **Output:** Consolidated assessments

Step MP-02.4 — Submit self and manager assessments (Manager)

Type:

Row 1 — Self and manager assessments: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-05-08

Row 2 — Self and manager assessments: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-05-15

Then click Complete the step. The rows go to the register "Communications log".

Step MP-02.5 — Consolidate assessment results (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Self-assessment Generative AI for everyday work: 2; manager validation: 2 with comment 'needs practice on live cases'.

When every step is complete, click Complete in the task panel.

Task UFT-02-05 — Suggest proficiency from evidence · done by L&D Analyst

Input: Consolidated assessments → **Output:** Suggested levels

Step MP-02.6 — Suggest proficiency from evidence (L&D Analyst)

Type:

Row 1 — Proficiency from evidence: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Rim Alaoui · **Source:** Annual performance review

Row 2 — Proficiency from evidence: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Mehdi Alaoui · **Source:** Audit report

Then click Complete the step. The rows go to the register "Proficiency from evidence register".

Result to record in the task: Accept 38 suggested levels, edit 4 (evidence too old), reject 1. Every change carries a note.

When every step is complete, click Complete in the task panel.

Task UFT-02-06 — Validate skills inventory · done by Head of L&D

Input: Suggested levels → **Output:** Validated inventory

Step MP-02.7 — Validate skills inventory (Head of L&D)

Type:

Decision: Approved with conditions

Skills inventory: Skills inventory

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2026-06-07

Decided by: Hajar Fassi

Then click Complete the step.

Result to record in the task: Inventory validated: 212 employees, 96% assessments complete. Justification: sample checked by site.

When every step is complete, click Complete in the task panel.

Task UFT-02-07 — Compute and forecast gaps · done by L&D Analyst

Input: Validated inventory → **Output:** Skills gap diagnosis

Step MP-03.1 — Compute gap matrix (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-03.2 — Review gap matrix by site and function (L&D Analyst)

Type:

Gap matrix by site and function: Gap matrix by site and function

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-05-13

Then click Complete the step.

Step MP-28.3 — Forecast skill gaps (Performance Analyst)

Type:

Row 1 — Skill gaps: KPI-016 (Knowledge reuse rate) · **Period:** 2026-Q1 · **Value:** 73 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Skill gaps: KPI-017 (IDP coverage) · **Period:** 2026-Q2 · **Value:** 73 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-28.1 — Build analytics dataset (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Critical gaps: Generative AI for everyday work (-1.4 average on supervisors), AI-assisted customer service (-1.1). Forecast: Responsible AI and data protection becomes critical within 12 months.

When every step is complete, click Complete in the task panel.

E2E-21 — Previous Plan Impact-to-Strategy Update

Goal: Evaluate N-1 plan impact and update strategy

Starts when: Start of a new plan cycle with N-1 execution data available. **Ends with:** N-1 impact conclusions fed into the strategy update.

Task UFT-21-01 — Load N-1 plan execution data · done by L&D Analyst

Input: N-1 plan → **Output:** N-1 dataset

Step MP-39.1 — Load N-1 plan execution data (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Load N-1 plan: 28 sessions planned, 23 delivered, 1,410,000 MAD spent.

When every step is complete, click Complete in the task panel.

Task UFT-21-02 — Define impact criteria · done by L&D Analyst

Input: N-1 dataset → **Output:** Impact criteria

Step MP-39.2 — Define impact criteria (L&D Analyst)

Type:

Row 1 — Impact criteria: Raise Generative AI for everyday work proficiency of Operator — Operations and service delivery teams to level 3 · **Indicator:** KPI-017 (IDP coverage) · **Baseline:** 49 % · **Target:** 80 % · **Deadline:** 2027-08-14 · **Owner:** Youssef Ziani

Row 2 — Impact criteria: Certify Supervisor — Operations and service delivery staff on AI-assisted customer service · **Indicator:** KPI-018 (Mandatory certification compliance) · **Baseline:** 49 % · **Target:** 80 % · **Deadline:** 2027-08-21 · **Owner:** Imane Ouazzani

Row 3 — Impact criteria: Cut onboarding time on Responsible AI and data protection by 30 % · **Indicator:** KPI-019 (Vendor invoice match rate) · **Baseline:** 38 % · **Target:** 86 % · **Deadline:** 2027-08-28 · **Owner:** Rim Alaoui

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Impact criteria: application on the job, KPI change, satisfaction, cost per learner.

When every step is complete, click Complete in the task panel.

Task UFT-21-03 — Survey participants and managers · done by L&D Analyst

Input: Impact criteria → **Output:** Survey results

Step MP-39.3 — Survey participants and managers (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-09.5 — Record on-the-job observation (Level 3) (Manager)

Type:

Row 1 — On-the-job observation (Level 3): Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Imane Ouazzani · **Source:** Questionnaire results

Row 2 — On-the-job observation (Level 3): AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Rim Alaoui · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "On-the-job observation (Level 3) register".

Result to record in the task: Survey sent to 190 participants and 34 managers; 61% responded.

When every step is complete, click Complete in the task panel.

Task UFT-21-04 — Compare planned against realized · done by L&D Analyst

Input: Survey results → **Output:** Plan-vs-actual analysis

Step MP-39.4 — Compare planned against realized (L&D Analyst)

Type:

Row 1 — Planned against realized: Generative AI for everyday work · **Criterion:** Cost · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Planned against realized: AI-assisted customer service · **Criterion:** Risk · **Weight (%):** 30 · **Score (1–5):** 5 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Planned against realized: Responsible AI and data protection · **Criterion:** Business impact · **Weight (%):** 20 · **Score (1–5):** 4 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-32.3 — Isolate training effect (Performance Analyst)

Type:

Row 1 — Training effect: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Rim Alaoui · **Source:** Annual performance review

Row 2 — Training effect: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Mehdi Alaoui · **Source:** Audit report

Then click Complete the step. The rows go to the register "Training effect register".

Result to record in the task: Planned vs realized: 82% of sessions, 94% of budget; 2 themes not delivered.

When every step is complete, click Complete in the task panel.

Task UFT-21-05 — Review N-1 ROI · done by Performance Analyst

Input: Plan-vs-actual analysis → **Output:** N-1 ROI

Step MP-32.4 — Compute Phillips ROI (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-32.5 — Review ROI with finance (Finance Manager)

Type:

ROI with finance: ROI with finance

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-03-25

Then click Complete the step.

Result to record in the task: N-1 ROI: AI-assisted customer service 18%; safety theme 35%.

When every step is complete, click Complete in the task panel.

Task UFT-21-06 — Draft impact conclusions · done by L&D Analyst

Input: N-1 ROI → **Output:** Draft conclusions

Step MP-39.5 — Draft impact study conclusions (L&D Analyst)

Type:

Row 1 — Impact study conclusions: Impact study conclusions — Generative AI for everyday work · **Owner:** Leila Mansouri · **Start:** 2027-03-05 · **End:** 2027-04-04 · **Budget:** 76000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Impact study conclusions: Impact study conclusions — AI-assisted customer service · **Owner:** Hicham Bennani · **Start:** 2027-03-12 · **End:** 2027-04-11 · **Budget:** 56000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Accept AI conclusions 1-3; rewrite conclusion 4 (sample too small).

When every step is complete, click Complete in the task panel.

Task UFT-21-07 — Feed conclusions to strategy · done by Head of L&D

Input: Draft conclusions → **Output:** Strategy inputs

Step MP-39.6 — Feed conclusions to strategy update (Head of L&D)

Type:

Row 1 — Conclusions to strategy update: KPI-002 (Skills inventory validation rate) · **Period:** 2026-Q3 · **Value:** 66 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Conclusions to strategy update: KPI-003 (Critical gap rate) · **Period:** 2026-Q1 · **Value:** 64 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-01.1 — Record corporate strategic objectives (Head of L&D)

Type:

Row 1 — Corporate strategic objectives: Raise Generative AI for everyday work proficiency of Operator — Operations and service delivery teams to level 3 · **Indicator:** KPI-002 (Skills inventory validation rate) · **Baseline:** 48 % · **Target:** 81 % · **Deadline:** 2027-08-24 · **Owner:** Hicham Bennani

Row 2 — Corporate strategic objectives: Certify Supervisor — Operations and service delivery staff on AI-assisted customer service · **Indicator:** KPI-003 (Critical gap rate) · **Baseline:** 31 % · **Target:** 82 % · **Deadline:** 2027-08-31 · **Owner:** Omar Kettani

Row 3 — Corporate strategic objectives: Cut onboarding time on Responsible AI and data protection by 30 % · **Indicator:** KPI-004 (Training Engineering Report cycle time) · **Baseline:** 47 % · **Target:** 81 % · **Deadline:** 2027-09-07 · **Owner:** Tarik Naciri

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Feed to strategy: keep blended format; stop long classroom courses on AI-assisted customer service.

When every step is complete, click Complete in the task panel.

Task UFT-21-08 — Update roadmap priorities · done by L&D Strategist

Input: Strategy inputs → **Output:** Updated roadmap priorities

Step MP-04.6 — Sequence roadmap initiatives (L&D Strategist)

Type:

Row 1 — Roadmap initiatives: Roadmap initiatives — Generative AI for everyday work · **Owner:** Omar Kettani · **Start:** 2027-03-09 · **End:** 2027-04-08 · **Budget:** 55000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Roadmap initiatives: Roadmap initiatives — AI-assisted customer service · **Owner:** Tarik Naciri · **Start:** 2027-03-16 · **End:** 2027-04-15 · **Budget:** 71000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Roadmap priority updated: Generative AI for everyday work moved to Q2; AI-assisted customer service to microlearning.

When every step is complete, click Complete in the task panel.

Gate G2 — G2 — Diagnostic validated: close the phase

3. Open the project workspace and click the gate button of the phase.
3. Tick each checklist item once its evidence is attached, then click Submit for decision.
3. Click Go. Type the justification: All mandatory items met; evidence attached.
3. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

Phase 3 — Training Engineering Report & plan

E2E-01 — Strategy-to-Learning Plan

Goal: Translate corporate strategy into an approved annual L&D plan and budget

Starts when: Annual strategy cycle opened or revised corporate objectives published by the board. **Ends with:** Annual L&D plan and budget envelope approved by the Steering Committee and locked.

Task UFT-01-01 — Record strategic objectives · done by Head of L&D

Input: Corporate strategy → **Output:** Strategic objectives register

Step MP-01.1 — Record corporate strategic objectives (Head of L&D)

Type:

Row 1 — Corporate strategic objectives: Raise Generative AI for everyday work proficiency of Operator — Operations and service delivery teams to level 3 · **Indicator:** KPI-002 (Skills inventory validation rate) · **Baseline:** 43 % · **Target:** 81 % · **Deadline:** 2026-10-08 · **Owner:** Hajar Fassi

Row 2 — Corporate strategic objectives: Certify Supervisor — Operations and service delivery staff on AI-assisted customer service · **Indicator:** KPI-003 (Critical gap rate) · **Baseline:** 43 % · **Target:** 80 % · **Deadline:** 2026-10-15 · **Owner:** Leila El Idrissi

Row 3 — Corporate strategic objectives: Cut onboarding time on Responsible AI and data protection by 30 % · **Indicator:** KPI-004 (Training Engineering Report cycle time) · **Baseline:** 35 % · **Target:** 82 % · **Deadline:** 2026-10-22 · **Owner:** Asmae Lahlou

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: SO-1: Generative AI for everyday work used by 80% of Operations and service delivery staff by end 2026 (owner: Operations Director, measured quarterly). SO-2: zero major audit findings on ISO 9001.

When every step is complete, click Complete in the task panel.

Task UFT-01-02 — Link objectives to functions and sites · done by L&D Strategist

Input: Strategic objectives register → **Output:** Objective-function map

Step MP-01.2 — Link objectives to functions and sites (L&D Strategist)

Type:

Row 1 — Objectives to functions and sites: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Leila El Idrissi · **Source:** Questionnaire results

Row 2 — Objectives to functions and sites: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Asmae Lahlou · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Objectives to functions and sites register".

Result to record in the task: SO-1 → Operations and service delivery, Operations, Information Systems (all sites). SO-2 → Quality & HSE, Operations and service delivery.

When every step is complete, click Complete in the task panel.

Task UFT-01-03 — Frame skills priorities · done by L&D Analyst

Input: Objective-function map → **Output:** Priority competency list

Step MP-02.1 — Define competency families and levels (L&D Analyst)

Type:

Row 1 — Competency families and levels: Raise Generative AI for everyday work proficiency of Operator — Operations and service delivery teams to level 3 · **Indicator:** KPI-004 (Training Engineering Report cycle time) · **Baseline:** 30 % · **Target:** 80 % · **Deadline:** 2026-10-12 · **Owner:** Asmae Lahlou

Row 2 — Competency families and levels: Certify Supervisor — Operations and service delivery staff on AI-assisted customer service · **Indicator:** KPI-005 (Design approval lead time) · **Baseline:** 49 % · **Target:** 87 % · **Deadline:** 2026-10-19 · **Owner:** Hicham Sefrioui

Row 3 — Competency families and levels: Cut onboarding time on Responsible AI and data protection by 30 % · **Indicator:** KPI-006 (License Compliance %) · **Baseline:** 36 % · **Target:** 86 % · **Deadline:** 2026-10-26 · **Owner:** Adil Amrani

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-02.2 — Set target levels per position (HR Business Partner)

Type:

Row 1 — Target levels per position: Raise Generative AI for everyday work proficiency of Operator — Operations and service delivery teams to level 3 · **Indicator:** KPI-004 (Training Engineering Report cycle time) · **Baseline:** 45 % · **Target:** 76 % · **Deadline:** 2026-10-12 · **Owner:** Asmae Lahlou

Row 2 — Target levels per position: Certify Supervisor — Operations and service delivery staff on AI-assisted customer service · **Indicator:** KPI-005 (Design approval lead time) · **Baseline:** 48 % · **Target:** 84 % · **Deadline:** 2026-10-19 · **Owner:** Hicham Sefrioui

Row 3 — Target levels per position: Cut onboarding time on Responsible AI and data protection by 30 % · **Indicator:** KPI-006 (License Compliance %) · **Baseline:** 36 % · **Target:** 76 % · **Deadline:** 2026-10-26 · **Owner:** Adil Amrani

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Priority competency families: Generative AI for everyday work; AI-assisted customer service; ISO 9001 compliance. Target level 3 (Autonomous) for supervisors.

When every step is complete, click Complete in the task panel.

Task UFT-01-04 — Pre-scope training needs · done by L&D Analyst

Input: Priority competency list → **Output:** Pre-scoped needs

Step MP-03.1 — Compute gap matrix (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-03.2 — Review gap matrix by site and function (L&D Analyst)

Type:

Gap matrix by site and function: Gap matrix by site and function

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-05-19

Then click Complete the step.

Result to record in the task: Pre-scoped needs: 42% of Operations and service delivery supervisors below target on Generative AI for everyday work; 18 employees below target on ISO 9001.

When every step is complete, click Complete in the task panel.

Task UFT-01-05 — Define budget envelope · done by Finance Manager

Input: Pre-scoped needs → **Output:** Budget envelope

Step MP-01.3 — Define L&D budget envelope (Finance Manager)

Type:

Row 1 — L&D budget envelope: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Adil Amrani · **Source:** HRIS export

Row 2 — L&D budget envelope: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Rim Kettani · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "L&D budget envelope register".

Step MP-18.1 — Allocate budget by theme and site (Finance Manager)

Type:

Row 1 — Budget by theme and site: Budget by theme and site — Generative AI for everyday work · **Owner:** Adil Amrani · **Start:** 2026-04-29 · **End:** 2026-05-29 · **Budget:** 22000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Budget by theme and site: Budget by theme and site — AI-assisted customer service · **Owner:** Rim Kettani · **Start:** 2026-05-06 · **End:** 2026-06-05 · **Budget:** 67000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-18.2 — Forecast OFPPT refunds (Finance Manager)

Type:

Row 1 — OFPPT refunds: KPI-006 (License Compliance %) · **Period:** 2026-Q3 · **Value:** 66 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — OFPPT refunds: KPI-007 (Content publication lead time) · **Period:** 2026-Q1 · **Value:** 77 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Gross L&D budget 2026: 1,850,000 MAD; forecast refund (OFPPT/CSF): 520,000 MAD; net envelope: 1,330,000 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-01-06 — Plan change and adoption · done by Change Manager

Input: Budget envelope → **Output:** Adoption plan

Step MP-19.1 — Assess change impact (Change Manager)

Type:

Row 1 — Change impact: Generative AI for everyday work · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Change impact: AI-assisted customer service · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 5 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Change impact: Responsible AI and data protection · **Criterion:** Cost · **Weight (%):** 20 · **Score (1–5):** 3 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-19.2 — Build adoption plan (Change Manager)

Type:

Row 1 — Adoption plan: Adoption plan — Generative AI for everyday work · **Owner:** Rim Kettani · **Start:** 2026-05-01 · **End:** 2026-05-31 · **Budget:** 31000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Adoption plan: Adoption plan — AI-assisted customer service · **Owner:** Anas Ziani · **Start:** 2026-05-08 · **End:** 2026-06-07 · **Budget:** 77000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Change impact: high for Operations and service delivery supervisors (new Generative AI for everyday work routines). Sponsors: Operations Director. Champions: one per site.

When every step is complete, click Complete in the task panel.

Task UFT-01-07 — Compile plan approval pack · done by Head of L&D

Input: Adoption plan → **Output:** Approval pack

Step MP-01.4 — Schedule Steering Committee milestones (Head of L&D)

Type:

Row 1 — Steering Committee milestones: Steering Committee milestones — Generative AI for everyday work · **Owner:** Anas Ziani · **Start:** 2026-05-03 · **End:** 2026-06-02 · **Budget:** 44000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Steering Committee milestones: Steering Committee milestones — AI-assisted customer service · **Owner:** Ghita Ziani · **Start:** 2026-05-10 · **End:** 2026-06-09 · **Budget:** 40000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-01.5 — Compile plan approval pack (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-04.1 — Consolidate feeder outputs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Approval pack: 2 objectives, net budget 1,330,000 MAD, 6 priority themes, committee date 15 March 2026.

When every step is complete, click Complete in the task panel.

Task UFT-01-08 — Approve and lock annual L&D plan · done by HR Director

Input: Approval pack → **Output:** Approved annual L&D plan

Step MP-01.6 — Record Steering Committee decision (HR Director)

Type:

Row 1 — Steering Committee decision: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Ghita Ziani · **Source:** Annual performance review

Row 2 — Steering Committee decision: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Zineb Berrada · **Source:** Audit report

Then click Complete the step. The rows go to the register "Steering Committee decision register".

Step MP-01.7 — Lock and distribute approved plan (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Decision: Approve. Justification: aligned with SO-1 and SO-2; budget within envelope. Plan locked as version 1.

When every step is complete, click Complete in the task panel.

E2E-03 — Needs-to-Training Engineering Report & Roadmap

Goal: Produce the Training Engineering Report and the prioritized training roadmap

Starts when: Validated skills gap diagnosis, consolidated demands, approved Scope of Work or diagnostic findings available. **Ends with:** Training Engineering Report and prioritized roadmap approved and published.

Task UFT-03-01 — Plan diagnostic interviews · done by L&D Analyst

Input: Approved Scope of Work → **Output:** Interview plan

Step MP-03.3 — Plan diagnostic interviews (L&D Analyst)

Type:

Row 1 — Diagnostic interviews: Diagnostic interviews — Generative AI for everyday work · **Owner:** Hicham Bennani · **Start:** 2026-05-21 · **End:** 2026-06-20 · **Budget:** 43000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Diagnostic interviews: Diagnostic interviews — AI-assisted customer service · **Owner:** Omar Kettani · **Start:** 2026-05-28 · **End:** 2026-06-27 · **Budget:** 50000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Interview plan: 14 semi-structured interviews (4 MS, 6 MO, 4 OP), 45 minutes each, weeks 10-11.

When every step is complete, click Complete in the task panel.

Task UFT-03-02 — Record interview findings · done by L&D Analyst

Input: Interview plan → **Output:** Interview findings

Step MP-03.4 — Record interview findings (L&D Analyst)

Type:

Row 1 — Interview findings: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Omar Kettani · **Source:** Questionnaire results

Row 2 — Interview findings: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Tarik Naciri · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Interview findings register".

Result to record in the task: Finding (MO, Operations and service delivery): 'Supervisors do not trust Generative AI for everyday work data; they re-enter figures on paper.'

When every step is complete, click Complete in the task panel.

Task UFT-03-03 — Cluster needs into themes · done by L&D Analyst

Input: Interview findings, gaps, responses → **Output:** Training themes

Step MP-03.5 — Cluster needs into training themes (L&D Analyst)

Type:

Row 1 — Needs into training themes: Generative AI for everyday work · **Criterion:** Cost · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Needs into training themes: AI-assisted customer service · **Criterion:** Risk · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Needs into training themes: Responsible AI and data protection · **Criterion:** Business impact · **Weight (%):** 20 · **Score (1–5):** 2 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Accept theme 'Generative AI for everyday work for supervisors'; merge two duplicate themes on AI-assisted customer service; split 'ISO 9001' into awareness and auditor tracks.

When every step is complete, click Complete in the task panel.

Task UFT-03-04 — Prioritize needs by impact · done by L&D Strategist

Input: Training themes → **Output:** Prioritized needs

Step MP-03.6 — Prioritize needs by business impact (L&D Strategist)

Type:

Row 1 — Needs by business impact: Generative AI for everyday work · **Criterion:** Risk · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Needs by business impact: AI-assisted customer service · **Criterion:** Business impact · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Needs by business impact: Responsible AI and data protection · **Criterion:** Urgency · **Weight (%):** 20 · **Score (1–5):** 3 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Generative AI for everyday work: impact 5, urgency 4. AI-assisted customer service: impact 4, urgency 3. ISO 9001: impact 4, urgency 5.

When every step is complete, click Complete in the task panel.

Task UFT-03-05 — Validate needs register · done by Head of L&D

Input: Prioritized needs → **Output:** Validated needs register

Step MP-03.7 — Validate needs register (Head of L&D)

Type:

Decision: Approved

Needs register: Needs register

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-05-22

Decided by: Hajar Fassi

Then click Complete the step.

Result to record in the task: Needs register validated: 23 needs, 6 themes. Justification: covers SO-1 and SO-2; sponsor reviewed.

When every step is complete, click Complete in the task panel.

Task UFT-03-06 — Consolidate engineering inputs · done by L&D Analyst

Input: Validated needs register → **Output:** Input completeness check

Step MP-04.1 — Consolidate feeder outputs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-04.2 — Check input completeness (L&D Analyst)

Type:

Input completeness: Input completeness

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-06-01

Then click Complete the step.

Result to record in the task: Inputs complete: Scope of Work, 187 responses, gap matrix, RAG dashboard, SWOT, demands. Missing: none.

When every step is complete, click Complete in the task panel.

Task UFT-03-07 — Draft Training Engineering Report · done by L&D Strategist

Input: Input completeness check → **Output:** Report draft

Step MP-04.3 — Generate report draft (L&D Strategist)

Type:

Row 1 — Report draft: Report draft — Generative AI for everyday work · **Owner:** Karim El Idrissi · **Start:** 2026-06-02 · **End:** 2026-07-02 · **Budget:** 67000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Report draft: Report draft — AI-assisted customer service · **Owner:** Mehdi Chraibi · **Start:** 2026-06-09 · **End:** 2026-07-09 · **Budget:** 67000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-04.4 — Edit and complete report sections (L&D Strategist)

Type:

Complete report sections: Complete report sections

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-06-10

Then click Complete the step.

Result to record in the task: Section 3 'Diagnostic': edit the AI draft, add the interview quote on Generative AI for everyday work, keep the RAG table.

When every step is complete, click Complete in the task panel.

Task UFT-03-08 — Run quality review · done by Quality Manager

Input: Report draft → **Output:** Reviewed report

Step MP-04.5 — Run quality review of report (Quality Manager)

Type:

Row 1 — Quality review of report: Generative AI for everyday work — half-day workshop · **Date:** 2026-06-14 · **Trainer:** Atlas Formation Conseil · **Participants:** 18 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Quality review of report: AI-assisted customer service — half-day workshop · **Date:** 2026-06-21 · **Trainer:** Maghreb Learning Partners · **Participants:** 14 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-20.5 — Run periodic quality review (Quality Manager)

Type:

Row 1 — Periodic quality review: Generative AI for everyday work — half-day workshop · **Date:** 2026-06-14 · **Trainer:** Atlas Formation Conseil · **Participants:** 14 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Periodic quality review: AI-assisted customer service — half-day workshop · **Date:** 2026-06-21 · **Trainer:** Maghreb Learning Partners · **Participants:** 15 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Quality review: 11/12 checklist items met; fix item 'sources cited for every figure'. Result: pass after correction.

When every step is complete, click Complete in the task panel.

Task UFT-03-09 — Sequence and budget roadmap · done by L&D Strategist

Input: Reviewed report → **Output:** Draft roadmap

Step MP-04.6 — Sequence roadmap initiatives (L&D Strategist)

Type:

Row 1 — Roadmap initiatives: Roadmap initiatives — Generative AI for everyday work · **Owner:** Sara Tazi · **Start:** 2026-06-06 · **End:** 2026-07-06 · **Budget:** 54000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Roadmap initiatives: Roadmap initiatives — AI-assisted customer service · **Owner:** Asmae Sefrioui · **Start:** 2026-06-13 · **End:** 2026-07-13 · **Budget:** 30000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-18.1 — Allocate budget by theme and site (Finance Manager)

Type:

Row 1 — Budget by theme and site: Budget by theme and site — Generative AI for everyday work · **Owner:** Sara Tazi · **Start:** 2026-06-06 · **End:** 2026-07-06 · **Budget:** 43000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Budget by theme and site: Budget by theme and site — AI-assisted customer service · **Owner:** Asmae Sefrioui · **Start:** 2026-06-13 · **End:** 2026-07-13 · **Budget:** 68000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Roadmap: Q2 Generative AI for everyday work (6 groups); Q3 ISO 9001 (4 groups); Q4 AI-assisted customer service (3 groups). Total 1,240,000 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-03-10 — Approve and publish report and roadmap · done by Head of L&D

Input: Draft roadmap → **Output:** Approved Training Engineering Report and roadmap

Step MP-04.7 — Submit roadmap for approval (Head of L&D)

Type:

Row 1 — Roadmap for approval: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-06-03

Row 2 — Roadmap for approval: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-06-10

Then click Complete the step. The rows go to the register "Communications log".

Step MP-04.8 — Record roadmap approval (HR Director)

Type:

Row 1 — Roadmap approval: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Asmae Sefrioui · **Source:** HRIS export

Row 2 — Roadmap approval: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Loubna Chraibi · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Roadmap approval register".

Step MP-04.9 — Publish approved report and roadmap (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-01.6 — Record Steering Committee decision (HR Director)

Type:

Row 1 — Steering Committee decision: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Asmae Sefrioui · **Source:** HRIS export

Row 2 — Steering Committee decision: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Loubna Chraibi · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Steering Committee decision register".

Result to record in the task: Decision: Approve report and roadmap v1. Justification: within budget, linked to SO-1/SO-2. Publish to all stakeholders.

When every step is complete, click Complete in the task panel.

E2E-30 — Prioritization-to-Resource Plan

Goal: Prioritize themes and plan days, groups, trainers, budget

Starts when: Consolidated training themes requiring prioritization and resource planning.
Ends with: Approved prioritized training plan with days per theme, group planning, trainer allocation, and budget.

Task UFT-30-01 — Consolidate training themes · done by L&D Analyst

Input: Themes → **Output:** Theme list

Step MP-49.1 — Consolidate training themes (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Consolidated list: 9 themes from needs, demands, GPEC and SWOT.

When every step is complete, click Complete in the task panel.

Task UFT-30-02 — Define prioritization criteria · done by L&D Strategist

Input: Strategy → **Output:** Criteria

Step MP-49.2 — Define prioritization criteria (L&D Strategist)

Type:

Row 1 — Prioritization criteria: Raise Generative AI for everyday work proficiency of Operator — Operations and service delivery teams to level 3 · **Indicator:** KPI-004 (Training Engineering Report cycle time) · **Baseline:** 39 % · **Target:** 89 % · **Deadline:** 2027-12-26 · **Owner:** Hajar Fassi

Row 2 — Prioritization criteria: Certify Supervisor — Operations and service delivery staff on AI-assisted customer service · **Indicator:** KPI-005 (Design approval lead time) · **Baseline:** 48 % · **Target:** 84 % · **Deadline:** 2028-01-02 · **Owner:** Soukaina Squalli

Row 3 — Prioritization criteria: Cut onboarding time on Responsible AI and data protection by 30 % · **Indicator:** KPI-006 (License Compliance %) · **Baseline:** 35 % · **Target:** 89 % · **Deadline:** 2028-01-09 · **Owner:** Karim El Idrissi

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Criteria: strategic impact 40%, urgency 30%, number of learners 20%, cost 10%.

When every step is complete, click Complete in the task panel.

Task UFT-30-03 — Prioritize themes · done by L&D Strategist

Input: Criteria → **Output:** Prioritized themes

Step MP-49.3 — Prioritize themes (L&D Strategist)

Type:

Row 1 — Themes: Generative AI for everyday work · **Criterion:** Risk · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Themes: AI-assisted customer service · **Criterion:** Business impact · **Weight (%):** 30 · **Score (1–5):** 5 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Themes: Responsible AI and data protection · **Criterion:** Urgency · **Weight (%):** 20 · **Score (1–5):** 2 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Rank 1 Generative AI for everyday work (score 86); rank 2 ISO 9001 (81); rank 3 AI-assisted customer service (74).

When every step is complete, click Complete in the task panel.

Task UFT-30-04 — Estimate days per theme · done by L&D Planner

Input: Prioritized themes → **Output:** Days per theme

Step MP-49.4 — Estimate days per theme (L&D Planner)

Type:

Row 1 — Days per theme: Generative AI for everyday work · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 4 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Days per theme: AI-assisted customer service · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Days per theme: Responsible AI and data protection · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Generative AI for everyday work: 3 days per group; ISO 9001: 2 days; AI-assisted customer service: 1.5 days.

When every step is complete, click Complete in the task panel.

Task UFT-30-05 — Define groups per theme · done by L&D Planner

Input: Days per theme → **Output:** Group plan

Step MP-49.5 — Define number of groups per theme (L&D Planner)

Type:

Row 1 — Number of groups per theme: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Mehdi Chraibi · **Source:** Interview with the function head

Row 2 — Number of groups per theme: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Sara Tazi · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Number of groups per theme register".

Step MP-49.6 — Allocate trainers (L&D Planner)

Type:

Row 1 — Role: Knowledge Manager · **Trainers:** Generative AI for everyday work · **Person:** Mehdi Chraibi · **Allocation (%):** 100 · **Start:** 2027-07-05 · **Holder type:** Holder

Row 2 — Role: Change Manager · **Trainers:** AI-assisted customer service · **Person:** Sara Tazi · **Allocation (%):** 50 · **Start:** 2027-07-12 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Result to record in the task: Generative AI for everyday work: 6 groups of 12; ISO 9001: 4 groups; AI-assisted customer service: 3 groups.

When every step is complete, click Complete in the task panel.

Task UFT-30-06 — Allocate trainers and budget · done by Finance Manager

Input: Group plan → **Output:** Resource plan

Step MP-49.7 — Estimate plan budget (Finance Manager)

Type:

Row 1 — Plan budget: Generative AI for everyday work · **Criterion:** Feasibility · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Plan budget: AI-assisted customer service · **Criterion:** Cost · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Plan budget: Responsible AI and data protection · **Criterion:** Risk · **Weight (%):** 20 · **Score (1–5):** 4 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-49.8 — Sequence delivery (L&D Planner)

Type:

Row 1 — Delivery: Delivery — Generative AI for everyday work · **Owner:** Sara Tazi · **Start:** 2027-07-17 · **End:** 2027-08-16 · **Budget:** 48000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Delivery: Delivery — AI-assisted customer service · **Owner:** Asmae Sefrioui · **Start:** 2027-07-24 · **End:** 2027-08-23 · **Budget:** 67000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-49.9 — Validate plan with governance (Head of L&D)

Type:

Decision: Approved

Plan with governance: Plan with governance

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-07-24

Decided by: Hajar Fassi

Then click Complete the step.

Result to record in the task: Trainers: 2 internal, vendor A; budget 1,240,000 MAD (within envelope).

When every step is complete, click Complete in the task panel.

Task UFT-30-07 — Publish prioritized training plan · done by L&D Leader

Input: All outputs → **Output:** Prioritized Plan

Step MP-49.10 — Publish prioritized plan (Head of L&D)

Type:

Row 1 — Prioritized plan: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-07-14

Row 2 — Prioritized plan: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-07-21

Then click Complete the step. The rows go to the register "Communications log".

Step MP-49.11 — Track plan execution (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-49.12 — Report on resource utilization (L&D Planner)

Type:

Row 1 — On resource utilization: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-07-14

Row 2 — On resource utilization: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-07-21

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish RPT-002 Prioritized Training Plan 2026 to all stakeholders.

When every step is complete, click Complete in the task panel.

E2E-22 — Multi-Site Plan-to-Deployment

Goal: Adapt and deploy plans across sites

Starts when: Approved roadmap for an organization with several sites or entities. **Ends with:** Site plans adapted, validated and deployed, with deviations escalated.

Task UFT-22-01 — Split plan by site · done by Head of L&D

Input: Approved roadmap → **Output:** Site plans

Step MP-40.1 — Split plan by site (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Split plan into 3 sites: Casablanca 55%, Tanger 30%, Agadir 15%.

When every step is complete, click Complete in the task panel.

Task UFT-22-02 — Adapt site plan to local constraints · done by Site L&D Coordinator

Input: Site plans → **Output:** Adapted site plans

Step MP-40.2 — Adapt site plan to local constraints (Site L&D Coordinator)

Type:

Row 1 — Site plan to local constraints: Site plan to local constraints — Generative AI for everyday work · **Owner:** Mehdi Fassi · **Start:** 2027-03-13 · **End:** 2027-04-12 · **Budget:** 26000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Site plan to local constraints: Site plan to local constraints — AI-assisted customer service · **Owner:** Hajar Fassi · **Start:** 2027-03-20 · **End:** 2027-04-19 · **Budget:** 24000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Tanger: shift constraints → sessions of 4 hours instead of full days.

When every step is complete, click Complete in the task panel.

Task UFT-22-03 — Localize site materials · done by Instructional Designer

Input: Adapted site plans → **Output:** Localized materials

Step MP-23.1 — Request translation (Instructional Designer)

Type:

Row 1 — Translation: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-03-10

Row 2 — Translation: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-03-17

Then click Complete the step. The rows go to the register "Communications log".

Step MP-23.3 — Validate translation (Subject Matter Expert)

Type:

Decision: Approved

Translation: Translation

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-03-08

Decided by: Hajar Fassi

Then click Complete the step.

Step MP-23.6 — Review participation equity (HR Business Partner)

Type:

Participation equity: Participation equity

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-03-09

Then click Complete the step.

Step MP-23.7 — Record inclusion actions (HR Business Partner)

Type:

Row 1 — Inclusion actions: Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hajar Fassi · **Source:** HRIS export

Row 2 — Inclusion actions: AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Soukaina Squalli · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Inclusion actions register".

Result to record in the task: Agadir materials translated to AR; validated by the site expert.

When every step is complete, click Complete in the task panel.

Task UFT-22-04 — Validate site plan · done by Head of L&D

Input: Adapted site plans → **Output:** Validated site plans

Step MP-40.3 — Validate site plan (Head of L&D)

Type:

Decision: Approved

Site plan: Site plan

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-03-17

Decided by: Hajar Fassi

Then click Complete the step.

Result to record in the task: Site plans validated centrally; budget deviation within ±5%.

When every step is complete, click Complete in the task panel.

Task UFT-22-05 — Schedule site sessions · done by Training Administrator

Input: Validated site plans → **Output:** Site schedules

Step MP-07.1 — Create training session (Training Administrator)

Type:

Row 1 — Training session: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Karim El Idrissi · **Source:** Questionnaire results

Row 2 — Training session: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Mehdi Chraibi · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Training session register".

Step MP-11.1 — Book rooms and equipment (Training Administrator)

Type:

Row 1 — Rooms and equipment: Rooms and equipment — Generative AI for everyday work · **Owner:** Karim El Idrissi · **Start:** 2027-03-19 · **End:** 2027-04-18 · **Budget:** 77000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Rooms and equipment: Rooms and equipment — AI-assisted customer service · **Owner:** Mehdi Chraibi · **Start:** 2027-03-26 · **End:** 2027-04-25 · **Budget:** 78000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Tanger schedule: 8 sessions, rooms booked, 2 trainers.

When every step is complete, click Complete in the task panel.

Task UFT-22-06 — Deploy site schedule · done by Site L&D Coordinator

Input: Site schedules → **Output:** Deployed schedules

Step MP-40.4 — Deploy site schedule (Site L&D Coordinator)

Type:

Row 1 — Site schedule: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Site schedule: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Schedules deployed and communicated to site managers.

When every step is complete, click Complete in the task panel.

Task UFT-22-07 — Consolidate site status · done by Head of L&D

Input: Deployed schedules → **Output:** Site status

Step MP-40.5 — Consolidate site status (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Status: Casablanca 70%, Tanger 45%, Agadir 20% delivered.

When every step is complete, click Complete in the task panel.

Task UFT-22-08 — Escalate site deviation · done by Head of L&D

Input: Site status → **Output:** Multi-site deployment status

Step MP-40.6 — Escalate site deviation (Head of L&D)

Type:

Row 1 — Site deviation: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-03-20

Row 2 — Site deviation: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-03-27

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Escalate Agadir deviation (-25%) to the HR Director with a recovery plan.

When every step is complete, click Complete in the task panel.

E2E-23 — Regulatory Submission-to-Validation

Goal: Submit and validate training plans with regulatory bodies

Starts when: Approved plan requiring external validation or funding (e.g. OFPPT, GIAC-Agro).
Ends with: Plan validated by the regulatory body and evidence archived.

Task UFT-23-01 — Select regulatory template · done by Compliance Officer

Input: Approved plan → **Output:** Selected template

Step MP-41.1 — Select regulatory template (Compliance Officer)

Type:

Decision: Approved

Regulatory template: Regulatory template

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2027-03-27

Decided by: Hajar Fassi

Then click Complete the step.

Result to record in the task: Template: OFPPT special training contracts (CSF) — plan file.

When every step is complete, click Complete in the task panel.

Task UFT-23-02 — Generate submission file · done by Compliance Officer

Input: Selected template → **Output:** Submission file

Step MP-41.2 — Generate submission file (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-20.5 — Run periodic quality review (Quality Manager)

Type:

Row 1 — Periodic quality review: Generative AI for everyday work — half-day workshop · **Date:** 2027-04-08 · **Trainer:** Atlas Formation Conseil · **Participants:** 15 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Periodic quality review: AI-assisted customer service — half-day workshop · **Date:** 2027-04-15 · **Trainer:** Maghreb Learning Partners · **Participants:** 14 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Submission file generated: plan, themes, providers, costs; quality check passed.

When every step is complete, click Complete in the task panel.

Task UFT-23-03 — Submit plan to regulatory body · done by Compliance Officer

Input: Submission file → **Output:** Submitted plan

Step MP-41.3 — Submit plan to regulatory body (Compliance Officer)

Type:

Row 1 — Plan to regulatory body: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-03-26

Row 2 — Plan to regulatory body: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-04-02

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Submitted to the regional funding committee on 5 March; reference GSF-2026-118.

When every step is complete, click Complete in the task panel.

Task UFT-23-04 — Track submission status · done by Compliance Officer

Input: Submitted plan → **Output:** Status log

Step MP-41.4 — Track submission status (Compliance Officer)

Type:

Row 1 — Submission status: KPI-015 (Training record correction rate) · **Period:** 2026-Q1 · **Value:** 59 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Submission status: KPI-016 (Knowledge reuse rate) · **Period:** 2026-Q2 · **Value:** 81 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Status: additional document requested (provider accreditation) — sent on 12 March.

When every step is complete, click Complete in the task panel.

Task UFT-23-05 — Record regulator decision · done by Compliance Officer

Input: Status log → **Output:** Regulator decision

Step MP-41.5 — Record regulator decision (Compliance Officer)

Type:

Row 1 — Regulator decision: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hajar Fassi · **Source:** HRIS export

Row 2 — Regulator decision: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Leila El Idrissi · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Regulator decision register".

Step MP-14.1 — Register regulatory requirement (Compliance Officer)

Type:

Row 1 — Regulatory requirement: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hajar Fassi · **Source:** HRIS export

Row 2 — Regulatory requirement: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Leila El Idrissi · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Regulatory requirement register".

Result to record in the task: Decision: approved with a cap of 520,000 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-23-06 — Submit refund claims · done by Finance Manager

Input: Regulator decision → **Output:** Refund claims

Step MP-18.5 — Submit refund claims (Finance Manager)

Type:

Row 1 — Refund claims: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-04-01

Row 2 — Refund claims: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-04-08

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Refund claims submitted for 12 delivered actions: 318,000 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-23-07 — Archive submission evidence · done by Compliance Officer

Input: Refund claims → **Output:** Regulatory submission tracker

Step MP-41.6 — Archive submission evidence (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-18.6 — Close budget period (Finance Manager)

Type:

Decision: Approved

Budget period: Budget period

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-04-15

Decided by: Hajar Fassi

Then click Complete the step.

Result to record in the task: Archive file, decision and claims; retention 10 years.

When every step is complete, click Complete in the task panel.

E2E-16 — Vendor-to-Finance

Goal: Manage vendors from selection to payment

Starts when: Training need requiring an external provider. **Ends with:** Vendor selected, order issued and payment approved against attendance.

Task UFT-16-01 — Issue request for proposal · done by Purchasing Officer

Input: Training need → **Output:** RFP

Step MP-15.1 — Issue request for proposal (Purchasing Officer)

Type:

Row 1 — Request for proposal: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-12-02

Row 2 — Request for proposal: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-12-09

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: RFP 'Training on Generative AI for everyday work' sent to 4 vendors, answers due 15 May.

When every step is complete, click Complete in the task panel.

Task UFT-16-02 — Score vendor proposals · done by Purchasing Officer

Input: RFP → **Output:** Scored proposals

Step MP-15.2 — Score vendor proposals (Purchasing Officer)

Type:

Row 1 — Vendor proposals: Generative AI for everyday work · **Criterion:** Feasibility · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Vendor proposals: AI-assisted customer service · **Criterion:** Cost · **Weight (%):** 30 · **Score (1–5):** 5 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Vendor proposals: Responsible AI and data protection · **Criterion:** Risk · **Weight (%):** 20 · **Score (1–5):** 4 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Scores: vendor A 82, vendor B 76, vendor C 64 (price 40%, expertise 40%, references 20%).

When every step is complete, click Complete in the task panel.

Task UFT-16-03 — Register and verify vendor · done by Purchasing Officer

Input: Scored proposals → **Output:** Accredited vendor

Step MP-15.3 — Register vendor record (Purchasing Officer)

Type:

Row 1 — Vendor record: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Leila El Idrissi · **Source:** Annual performance review

Row 2 — Vendor record: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Asmae Lahlou · **Source:** Audit report

Then click Complete the step. The rows go to the register "Vendor record register".

Step MP-15.4 — Verify vendor accreditation (Compliance Officer)

Type:

Vendor accreditation: Vendor accreditation

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-12-26

Then click Complete the step.

Result to record in the task: Register vendor A; accreditation OFPPT verified, valid until December.

When every step is complete, click Complete in the task panel.

Task UFT-16-04 — Issue purchase order · done by Purchasing Officer

Input: Accredited vendor → **Output:** Purchase order

Step MP-15.5 — Issue purchase order (Purchasing Officer)

Type:

Row 1 — Purchase order: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-12-08

Row 2 — Purchase order: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-12-15

Then click Complete the step. The rows go to the register "Communications log".

Step MP-18.3 — Record committed and actual costs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Purchase order PO-2026-044: 180,000 MAD on budget line 'Generative AI for everyday work'.

When every step is complete, click Complete in the task panel.

Task UFT-16-05 — Match invoice to order and attendance · done by Training Administrator

Input: Purchase order → **Output:** Matched invoice

Step MP-15.6 — Match invoice to order and attendance (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-11.5 — Reconcile attendance with invoices (Training Administrator)

Type:

Attendance with invoices: Attendance with invoices

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-12-09

Then click Complete the step.

Result to record in the task: Invoice matched with PO and attendance (3 days × 12 learners): OK.

When every step is complete, click Complete in the task panel.

Task UFT-16-06 — Approve vendor payment · done by Finance Manager

Input: Matched invoice → **Output:** Vendor performance & spend report

Step MP-15.7 — Approve vendor payment (Finance Manager)

Type:

Decision: Approved

Vendor payment: Vendor payment

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2026-12-17

Decided by: Hajar Fassi

Then click Complete the step.

Step MP-18.4 — Compare spend against budget (Finance Manager)

Type:

Row 1 — Spend against budget: Generative AI for everyday work · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Spend against budget: AI-assisted customer service · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 3 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Spend against budget: Responsible AI and data protection · **Criterion:** Cost · **Weight (%):** 20 · **Score (1–5):** 2 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Approve payment 180,000 MAD; vendor performance rating 4/5.

When every step is complete, click Complete in the task panel.

Gate G3 — G3 — Report & roadmap approved: close the phase

3. Open the project workspace and click the gate button of the phase.
3. Tick each checklist item once its evidence is attached, then click Submit for decision.
3. Click Go. Type the justification: All mandatory items met; evidence attached.
3. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

Phase 4 — Design & delivery

E2E-04 — Roadmap-to-Curriculum Design

Goal: Convert roadmap into curriculum maps, learning paths, design documents

Starts when: Approved Training Engineering Report and roadmap published. **Ends with:** Approved curriculum maps, learning paths and design documents.

Task UFT-04-01 — Create curriculum map · done by Instructional Designer

Input: Approved roadmap → **Output:** Curriculum map

Step MP-05.1 — Create curriculum map from roadmap (Instructional Designer)

Type:

Row 1 — Curriculum map from roadmap: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Loubna Chraibi · **Source:** Interview with the function head

Row 2 — Curriculum map from roadmap: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Loubna Sefrioui · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Curriculum map from roadmap register".

Result to record in the task: Curriculum map 'Generative AI for everyday work': 3 learning paths (operators, supervisors, managers), 9 modules.

When every step is complete, click Complete in the task panel.

Task UFT-04-02 — Define learning paths and modules · done by Instructional Designer

Input: Curriculum map → **Output:** Learning paths

Step MP-05.2 — Define learning path and modules (Instructional Designer)

Type:

Row 1 — Learning path and modules: Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Loubna Sefrioui · **Source:** Questionnaire results

Row 2 — Learning path and modules: AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Leila Berrada · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Learning path and modules register".

Result to record in the task: Path 'Supervisors — Generative AI for everyday work': 4 modules, 3 days blended (1 day e-learning, 2 days workshop).

When every step is complete, click Complete in the task panel.

Task UFT-04-03 — Write learning objectives · done by Instructional Designer

Input: Learning paths → **Output:** Learning objectives

Step MP-05.3 — Write learning objectives per module (Instructional Designer)

Type:

Row 1 — Learning objectives per module: Raise Generative AI for everyday work proficiency of Operator — Operations and service delivery teams to level 3 · **Indicator:** KPI-009 (Plan realization rate) · **Baseline:** 41 % · **Target:** 81 % · **Deadline:** 2026-12-01 · **Owner:** Leila Berrada

Row 2 — Learning objectives per module: Certify Supervisor — Operations and service delivery staff on AI-assisted customer service · **Indicator:** KPI-010 (Learner completion rate) · **Baseline:** 33 % · **Target:** 81 % · **Deadline:** 2026-12-08 · **Owner:** Tarik Squalli

Row 3 — Learning objectives per module: Cut onboarding time on Responsible AI and data protection by 30 % · **Indicator:** KPI-011 (API Availability) · **Baseline:** 42 % · **Target:** 73 % · **Deadline:** 2026-12-15 · **Owner:** Hajar Fassi

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Objective M1: 'By the end, the supervisor reads the Generative AI for everyday work dashboard and decides the shift action in 5 minutes.'

When every step is complete, click Complete in the task panel.

Task UFT-04-04 — Propose module structure · done by Instructional Designer

Input: Learning objectives → **Output:** Module structure

Step MP-05.4 — Propose module structure (Instructional Designer)

Type:

Row 1 — Module structure: Module structure — Generative AI for everyday work · **Owner:** Tarik Squalli · **Start:** 2026-06-16 · **End:** 2026-07-16 · **Budget:** 42000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Module structure: Module structure — AI-assisted customer service · **Owner:** Hajar Fassi · **Start:** 2026-06-23 · **End:** 2026-07-23 · **Budget:** 72000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Accept the proposed structure (intro, demo, practice, quiz); replace the quiz by a live case from Operations and service delivery.

When every step is complete, click Complete in the task panel.

Task UFT-04-05 — Set assessment strategy · done by Instructional Designer

Input: Module structure → **Output:** Assessment strategy

Step MP-05.5 — Set assessment strategy (Instructional Designer)

Type:

Row 1 — Assessment strategy: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Assessment strategy: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Assessment: pre/post test (Level 2) and manager observation after 30 days (Level 3).

When every step is complete, click Complete in the task panel.

Task UFT-04-06 — Develop and tag content · done by Content Developer

Input: Assessment strategy → **Output:** Tagged content assets

Step MP-06.1 — Upload content assets (Content Developer)

Type:

Row 1 — Content assets: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Content assets: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Step MP-06.2 — Validate package format (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-06.5 — Tag content with competencies (Content Developer)

Type:

Row 1 — Content with competencies: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Leila El Idrissi · **Source:** Interview with the function head

Row 2 — Content with competencies: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Asmae Lahlou · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Content with competencies register".

Result to record in the task: Upload 'M1_Generative AI for everyday work.pptx' and 'M1_video.mp4'; tag competency 'Generative AI for everyday work' level 3.

When every step is complete, click Complete in the task panel.

Task UFT-04-07 — Localize and check accessibility · done by Instructional Designer

Input: Tagged content assets → **Output:** Localized accessible content

Step MP-23.1 — Request translation (Instructional Designer)

Type:

Row 1 — Translation: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-06-17

Row 2 — Translation: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-06-24

Then click Complete the step. The rows go to the register "Communications log".

Step MP-23.2 — Draft machine translation (Instructional Designer)

Type:

Row 1 — Machine translation: Machine translation — Generative AI for everyday work · **Owner:** Asmae Lahlou · **Start:** 2026-06-22 · **End:** 2026-07-22 · **Budget:** 62000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Machine translation: Machine translation — AI-assisted customer service · **Owner:** Hicham Sefrioui · **Start:** 2026-06-29 · **End:** 2026-07-29 · **Budget:** 63000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-23.3 — Validate translation (Subject Matter Expert)

Type:

Decision: Approved

Translation: Translation

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-06-29

Decided by: Hajar Fassi

Then click Complete the step.

Step MP-23.4 — Run accessibility check (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-23.5 — Fix accessibility issues (Content Developer)

Type:

Accessibility issues: Accessibility issues

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-06-30

Then click Complete the step.

Result to record in the task: Request FR and AR versions; validate the AI draft translation; accessibility check: 0 blocking issues.

When every step is complete, click Complete in the task panel.

Task UFT-04-08 — Approve design document · done by Head of L&D

Input: Localized accessible content → **Output:** Approved design document

Step MP-05.6 — Review design with subject matter expert (Subject Matter Expert)

Type:

Design with subject matter expert: Design with subject matter expert

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Minor corrections

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-07-09

Then click Complete the step.

Step MP-05.7 — Approve design document (Head of L&D)

Type:

Decision: Approved

Design document: Design document

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2026-07-08

Decided by: Hajar Fassi

Then click Complete the step.

Result to record in the task: Decision: design approved. Comment: SME review done on 12 May; ready for delivery.

When every step is complete, click Complete in the task panel.

E2E-05 — Design-to-Delivery

Goal: Deliver training across all modalities

Starts when: Approved design document and prioritized training plan. **Ends with:** Training delivered across all modalities with attendance and completion recorded.

Task UFT-05-01 — Publish content to catalog · done by Content Developer

Input: Approved design → **Output:** Published catalog

Step MP-06.3 — Route content for expert review (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-06.4 — Record review decision (Subject Matter Expert)

Type:

Row 1 — Review decision: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Adil Amrani · **Source:** Audit report

Row 2 — Review decision: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Rim Kettani · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Review decision register".

Step MP-06.6 — Publish content to catalog (Content Developer)

Type:

Row 1 — Content to catalog: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-06-21

Row 2 — Content to catalog: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-06-28

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish module 'M1 Generative AI for everyday work' to the catalog; audience: supervisors; languages EN/FR/AR.

When every step is complete, click Complete in the task panel.

Task UFT-05-02 — Book logistics · done by Training Administrator

Input: Published catalog → **Output:** Logistics plan

Step MP-11.1 — Book rooms and equipment (Training Administrator)

Type:

Row 1 — Rooms and equipment: Rooms and equipment — Generative AI for everyday work · **Owner:** Rim Kettani · **Start:** 2026-06-28 · **End:** 2026-07-28 · **Budget:** 58000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Rooms and equipment: Rooms and equipment — AI-assisted customer service · **Owner:** Anas Ziani · **Start:** 2026-07-05 · **End:** 2026-08-04 · **Budget:** 66000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-11.2 — Manage trainer calendars (Training Administrator)

Type:

Row 1 — Trainer calendars: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Rim Kettani · **Source:** HRIS export

Row 2 — Trainer calendars: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Anas Ziani · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Trainer calendars register".

Result to record in the task: Room 'Training A' (20 seats) 3-5 June; projector; trainer calendar blocked.

When every step is complete, click Complete in the task panel.

Task UFT-05-03 — Schedule sessions · done by Training Administrator

Input: Logistics plan → **Output:** Session schedule

Step MP-07.1 — Create training session (Training Administrator)

Type:

Row 1 — Training session: Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Anas Ziani · **Source:** Interview with the function head

Row 2 — Training session: AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Ghita Ziani · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Training session register".

Step MP-07.2 — Check scheduling conflicts (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Session S-01 'Generative AI for everyday work — supervisors', 3-5 June, 12 seats, no conflict reported.

When every step is complete, click Complete in the task panel.

Task UFT-05-04 — Enroll learners and send convocations · done by Training Administrator

Input: Session schedule → **Output:** Enrollments

Step MP-07.3 — Enroll learners into session (Training Administrator)

Type:

Row 1 — Learners into session: Generative AI for everyday work — half-day workshop · **Date:** 2026-07-12 · **Trainer:** Atlas Formation Conseil · **Participants:** 12 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Learners into session: AI-assisted customer service — half-day workshop · **Date:** 2026-07-19 · **Trainer:** Maghreb Learning Partners · **Participants:** 10 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-07.4 — Send convocations (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-17.1 — Provision users via SSO (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Enroll 12 supervisors; convocations sent by e-mail and SMS in each learner's language.

When every step is complete, click Complete in the task panel.

Task UFT-05-05 — Push microlearning capsules · done by Instructional Designer

Input: Enrollments → **Output:** Capsules in flow of work

Step MP-25.1 — Author microlearning capsule (Instructional Designer)

Type:

Row 1 — Microlearning capsule: Microlearning capsule — Generative AI for everyday work · **Owner:** Zineb Berrada · **Start:** 2026-07-04 · **End:** 2026-08-03 · **Budget:** 24000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Microlearning capsule: Microlearning capsule — AI-assisted customer service · **Owner:** Hicham Tazi · **Start:** 2026-07-11 · **End:** 2026-08-10 · **Budget:** 21000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-25.2 — Generate capsule draft from source (Instructional Designer)

Type:

Row 1 — Capsule draft from source: Capsule draft from source — Generative AI for everyday work · **Owner:** Zineb Berrada · **Start:** 2026-07-04 · **End:** 2026-08-03 · **Budget:** 59000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Capsule draft from source: Capsule draft from source — AI-assisted customer service · **Owner:** Hicham Tazi · **Start:** 2026-07-11 · **End:** 2026-08-10 · **Budget:** 64000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-25.3 — Push capsule to collaboration channel (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-25.4 — Consume capsule on mobile (Learner)

Type:

Row 1 — Capsule on mobile: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Zineb Berrada · **Source:** Annual performance review

Row 2 — Capsule on mobile: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hicham Tazi · **Source:** Audit report

Then click Complete the step. The rows go to the register "Capsule on mobile register".

Step MP-25.5 — Track capsule completion (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Capsule '5-minute AI-assisted customer service check' pushed to the Teams channel of Operations and service delivery; 48 views in week 1.

When every step is complete, click Complete in the task panel.

Task UFT-05-06 — Run immersive simulations · done by Trainer

Input: Enrollments → **Output:** Simulation results

Step MP-30.1 — Define simulation scenario (Instructional Designer)

Type:

Row 1 — Simulation scenario: Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hicham Tazi · **Source:** Audit report

Row 2 — Simulation scenario: AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Youssef Ziani · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Simulation scenario register".

Step MP-30.2 — Configure simulation scoring (Instructional Designer)

Type:

Row 1 — Simulation scoring: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Simulation scoring: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Step MP-30.3 — Launch simulation session (Trainer)

Type:

Row 1 — Simulation session: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-07-01

Row 2 — Simulation session: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-07-08

Then click Complete the step. The rows go to the register "Communications log".

Step MP-30.4 — Capture simulation performance (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-30.5 — Debrief learner (Trainer)

Type:

Row 1 — Learner: Generative AI for everyday work — half-day workshop · **Date:** 2026-07-16 · **Trainer:** Atlas Formation Conseil · **Participants:** 11 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Learner: AI-assisted customer service — half-day workshop · **Date:** 2026-07-23 · **Trainer:** Maghreb Learning Partners · **Participants:** 11 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-30.6 — Record simulation evidence (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Simulation 'Operations and service delivery incident': score 78/100; debrief notes recorded; evidence saved.

When every step is complete, click Complete in the task panel.

Task UFT-05-07 — Record attendance · done by Trainer

Input: Session schedule → **Output:** Attendance records

Step MP-07.5 — Record attendance (Trainer)

Type:

Row 1 — Attendance: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Youssef Ziani · **Source:** HRIS export

Row 2 — Attendance: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Imane Ouazzani · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Attendance register".

Result to record in the task: Attendance S-01: 11 present, 1 absent (justified). Signature sheet attached.

When every step is complete, click Complete in the task panel.

Task UFT-05-08 — Close sessions · done by Training Administrator

Input: Attendance records → **Output:** Completion records

Step MP-07.6 — Close session and record completion (Training Administrator)

Type:

Decision: Approved

Session and record completion: Session and record completion

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2026-07-10

Decided by: Hajar Fassi

Then click Complete the step.

Result to record in the task: Close S-01: 11 completions recorded; certificate issued to each participant.

When every step is complete, click Complete in the task panel.

Task UFT-05-09 — Reconcile and archive period · done by Training Administrator

Input: Completion records → **Output:** Closed delivery period

Step MP-11.5 — Reconcile attendance with invoices (Training Administrator)

Type:

Attendance with invoices: Attendance with invoices

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-07-20

Then click Complete the step.

Step MP-11.6 — Archive period records (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-11.3 — Import external training records (Training Administrator)

Type:

Row 1 — External training records: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — External training records: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Step MP-11.4 — Correct training record with justification (Training Administrator)

Type:

Training record with justification: Training record with justification

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-07-20

Then click Complete the step.

Result to record in the task: Reconcile invoice INV-2026-118 (3 days × 12 learners) with attendance; archive period Q2.

When every step is complete, click Complete in the task panel.

E2E-06 — Learner-Journey-to-Engagement

Goal: Deliver personalized, engaging learning experience

Starts when: Learner enrolled in a learning path or session. **Ends with:** Personalized learning journey completed with engagement measured.

Task UFT-06-01 — Generate personal learning plan · done by L&D Analyst

Input: Enrollments → **Output:** Personal learning plans

Step MP-08.1 — Generate personal learning plan (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Personal plan generated for each learner: 3 items on Generative AI for everyday work, 1 capsule on AI-assisted customer service.

When every step is complete, click Complete in the task panel.

Task UFT-06-02 — Recommend learning items · done by Learner

Input: Personal learning plans → **Output:** Recommendations

Step MP-08.2 — Recommend learning items (Learner)

Type:

Row 1 — Learning items: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Leila Mansouri · **Source:** Audit report

Row 2 — Learning items: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hicham Bennani · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Learning items register".

Step MP-24.1 — Enable personalization per scope (Platform Administrator)

Type:

Row 1 — Personalization per scope: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Personalization per scope: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Accept 2 recommendations, reject 1 ('already mastered'). The outcome is logged.

When every step is complete, click Complete in the task panel.

Task UFT-06-03 — Adapt path to performance · done by Instructional Designer

Input: Recommendations → **Output:** Adapted paths

Step MP-24.2 — Set adaptation rules (Instructional Designer)

Type:

Row 1 — Adaptation rules: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Adaptation rules: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Step MP-24.3 — Adapt path to learner performance (Learner)

Type:

Row 1 — Path to learner performance: Path to learner performance — Generative AI for everyday work · **Owner:** Hicham Bennani · **Start:** 2026-07-18 · **End:** 2026-08-17 · **Budget:** 27000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Path to learner performance: Path to learner performance — AI-assisted customer service · **Owner:** Omar Kettani · **Start:** 2026-07-25 · **End:** 2026-08-24 · **Budget:** 75000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-24.4 — Record learner response to adaptation (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Rule: if the quiz score < 60%, add the remedial capsule 'Generative AI for everyday work basics'.

When every step is complete, click Complete in the task panel.

Task UFT-06-04 — Animate social learning · done by Knowledge Manager

Input: Adapted paths → **Output:** Active cohorts

Step MP-26.1 — Create learning cohort group (Knowledge Manager)

Type:

Row 1 — Learning cohort group: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Omar Kettani · **Source:** Interview with the function head

Row 2 — Learning cohort group: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Tarik Naciri · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Learning cohort group register".

Step MP-26.2 — Invite group members (Knowledge Manager)

Type:

Row 1 — Group members: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-07-15

Row 2 — Group members: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-07-22

Then click Complete the step. The rows go to the register "Communications log".

Step MP-26.3 — Post question or answer (Learner)

Type:

Row 1 — Question or answer: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-07-15

Row 2 — Question or answer: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-07-22

Then click Complete the step. The rows go to the register "Communications log".

Step MP-26.4 — Endorse expert answer (Subject Matter Expert)

Type:

Decision: Approved

Expert answer: Expert answer

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2026-07-20

Decided by: Hajar Fassi

Then click Complete the step.

Step MP-26.5 — Flag inappropriate content (Learner)

Type:

Row 1 — Inappropriate content: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Omar Kettani · **Source:** Interview with the function head

Row 2 — Inappropriate content: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Tarik Naciri · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Inappropriate content register".

Step MP-26.6 — Resolve moderation flag (Knowledge Manager)

Type:

Moderation flag: Moderation flag

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-07-21

Then click Complete the step.

Result to record in the task: Create cohort 'Generative AI for everyday work supervisors 2026' and invite 12 members; first question posted.

When every step is complete, click Complete in the task panel.

Task UFT-06-05 — Run gamification · done by Instructional Designer

Input: Active cohorts → **Output:** Awards

Step MP-27.1 — Define points and badge rules (Instructional Designer)

Type:

Row 1 — Points and badge rules: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Tarik Naciri · **Source:** Questionnaire results

Row 2 — Points and badge rules: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Mehdi Fassi · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Points and badge rules register".

Step MP-27.2 — Configure leaderboard scope (Instructional Designer)

Type:

Row 1 — Leaderboard scope: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Leaderboard scope: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Step MP-27.3 — Award points on completion (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-27.4 — Unlock badge (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-27.6 — Adjust gamification rules (Instructional Designer)

Type:

Gamification rules: Gamification rules

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-07-30

Then click Complete the step.

Result to record in the task: Badge 'Generative AI for everyday work Practitioner' for completing 3 modules; 10 points per capsule.

When every step is complete, click Complete in the task panel.

Task UFT-06-06 — Match and run coaching · done by L&D Business Partner

Input: Learner requests → **Output:** Coaching sessions

Step MP-21.1 — Request coaching (Learner)

Type:

Row 1 — Coaching: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-07-19

Row 2 — Coaching: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-07-26

Then click Complete the step. The rows go to the register "Communications log".

Step MP-21.2 — Match coach to learner (L&D Business Partner)

Type:

Row 1 — Coach to learner: Generative AI for everyday work · **Criterion:** Cost · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Coach to learner: AI-assisted customer service · **Criterion:** Risk · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Coach to learner: Responsible AI and data protection · **Criterion:** Business impact · **Weight (%):** 20 · **Score (1–5):** 3 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-21.3 — Schedule coaching sessions (Coach)

Type:

Row 1 — Coaching sessions: Coaching sessions — Generative AI for everyday work · **Owner:** Mehdi Fassi · **Start:** 2026-07-24 · **End:** 2026-08-23 · **Budget:** 69000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Coaching sessions: Coaching sessions — AI-assisted customer service · **Owner:** Hajar Fassi · **Start:** 2026-07-31 · **End:** 2026-08-30 · **Budget:** 34000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-21.4 — Log coaching session notes (Coach)

Type:

Row 1 — Coaching session notes: Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Mehdi Fassi · **Source:** Annual performance review

Row 2 — Coaching session notes: AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hajar Fassi · **Source:** Audit report

Then click Complete the step. The rows go to the register "Coaching session notes register".

Step MP-21.5 — Evaluate coaching outcomes (Manager)

Type:

Row 1 — Coaching outcomes: Generative AI for everyday work · **Criterion:** Cost · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Coaching outcomes: AI-assisted customer service · **Criterion:** Risk · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Coaching outcomes: Responsible AI and data protection · **Criterion:** Business impact · **Weight (%):** 20 · **Score (1–5):** 3 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-21.6 — Close coaching engagement (Coach)

Type:

Decision: Approved

Coaching engagement: Coaching engagement

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2026-08-07

Decided by: Hajar Fassi

Then click Complete the step.

Result to record in the task: Match coach 'Senior Operations and service delivery supervisor' to 3 learners; 4 sessions of 1 hour.

When every step is complete, click Complete in the task panel.

Task UFT-06-07 — Collect learner feedback · done by Learner

Input: Coaching sessions → **Output:** Learner feedback

Step MP-08.3 — Enroll in recommended item (Learner)

Type:

Row 1 — In recommended item: Generative AI for everyday work — half-day workshop · **Date:** 2026-08-05 · **Trainer:** Atlas Formation Conseil · **Participants:** 13 · **Hours:** 3.5 · **Modality:** On site

Row 2 — In recommended item: AI-assisted customer service — half-day workshop · **Date:** 2026-08-12 · **Trainer:** Maghreb Learning Partners · **Participants:** 18 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-08.4 — Submit learning feedback (Learner)

Type:

Row 1 — Learning feedback: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-07-21

Row 2 — Learning feedback: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-07-28

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Feedback: 4.4/5; comment 'more real cases from Operations and service delivery'.

When every step is complete, click Complete in the task panel.

Task UFT-06-08 — Monitor engagement and nudge · done by L&D Analyst

Input: Learner feedback → **Output:** Engagement report

Step MP-08.5 — Monitor engagement indicators (L&D Analyst)

Type:

Row 1 — Engagement indicators: KPI-011 (API Availability) · **Period:** 2026-Q3 · **Value:** 87 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — Engagement indicators: KPI-012 (Average Level 1 satisfaction) · **Period:** 2026-Q1 · **Value:** 87 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-08.6 — Trigger re-engagement nudge (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-24.5 — Review recommendation acceptance (L&D Analyst)

Type:

Recommendation acceptance: Recommendation acceptance

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-07-22

Then click Complete the step.

Step MP-27.5 — Review engagement uplift (L&D Analyst)

Type:

Engagement uplift: Engagement uplift

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-07-22

Then click Complete the step.

Step MP-24.6 — Tune personalization settings (L&D Analyst)

Type:

Row 1 — Personalization settings: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Personalization settings: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Step MP-28.4 — Predict learner drop-out risk (Performance Analyst)

Type:

Row 1 — Learner drop-out risk: KPI-011 (API Availability) · **Period:** 2026-Q3 · **Value:** 58 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Learner drop-out risk: KPI-012 (Average Level 1 satisfaction) · **Period:** 2026-Q1 · **Value:** 64 · **Target:** 80 · **Status:** Red · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Step MP-28.5 — Review predictions with L&D (Head of L&D)

Type:

Predictions with L&D: Predictions with L&D

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-07-22

Then click Complete the step.

Step MP-28.6 — Create preventive action (L&D Analyst)

Type:

Row 1 — Preventive action: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Soukaina Squalli · **Source:** HRIS export

Row 2 — Preventive action: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Karim El Idrissi · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Preventive action register".

Result to record in the task: Engagement 81%; nudge sent to 9 inactive learners; drop-out risk high for 2 learners.

When every step is complete, click Complete in the task panel.

E2E-13 — Content-Curate-to-Retire

Goal: Publish, maintain, retire content

Starts when: New content published or content past its review date. **Ends with:** Catalog curated, maintained and outdated content retired.

Task UFT-13-01 — Aggregate provider catalogs · done by Content Curator

Input: Provider catalogs → **Output:** Aggregated catalog

Step MP-29.1 — Aggregate provider catalogs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Aggregate 2 provider catalogs (LinkedIn Learning, Coursera): 1,240 items imported.

When every step is complete, click Complete in the task panel.

Task UFT-13-02 — Recommend curated items · done by Content Curator

Input: Aggregated catalog → **Output:** Ranked items

Step MP-29.2 — Recommend curated items (Content Curator)

Type:

Row 1 — Curated items: Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Zineb Berrada · **Source:** Interview with the function head

Row 2 — Curated items: AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hicham Tazi · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Curated items register".

Result to record in the task: Keep the 15 top-ranked items on Generative AI for everyday work; reject 3 items older than 3 years.

When every step is complete, click Complete in the task panel.

Task UFT-13-03 — Approve and organize collections · done by Content Curator

Input: Ranked items → **Output:** Curated collections

Step MP-29.3 — Approve curated item (Content Curator)

Type:

Decision: Approved

Curated item: Curated item

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-11-06

Decided by: Hajar Fassi

Then click Complete the step.

Step MP-29.4 — Organize curated collection (Content Curator)

Type:

Row 1 — Curated collection: Curated collection — Generative AI for everyday work · **Owner:** Hicham Tazi · **Start:** 2026-10-30 · **End:** 2026-11-29 · **Budget:** 72000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Curated collection: Curated collection — AI-assisted customer service · **Owner:** Youssef Ziani · **Start:** 2026-11-06 · **End:** 2026-12-06 · **Budget:** 67000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Collection 'Generative AI for everyday work starter kit': 8 items, audience supervisors, review date in 12 months.

When every step is complete, click Complete in the task panel.

Task UFT-13-04 — Review peer content · done by Subject Matter Expert

Input: User submissions → **Output:** Approved peer content

Step MP-33.1 — Submit user-generated content (Employee)

Type:

Row 1 — User-generated content: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-10-27

Row 2 — User-generated content: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-11-03

Then click Complete the step. The rows go to the register "Communications log".

Step MP-33.2 — Check content against policy (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-33.3 — Peer review content (Subject Matter Expert)

Type:

Row 1 — Review content: Generative AI for everyday work — half-day workshop · **Date:** 2026-11-11 · **Trainer:** Atlas Formation Conseil · **Participants:** 13 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Review content: AI-assisted customer service — half-day workshop · **Date:** 2026-11-18 · **Trainer:** Maghreb Learning Partners · **Participants:** 15 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Peer video 'How we use AI-assisted customer service on shift' reviewed by an expert: approved with 1 correction.

When every step is complete, click Complete in the task panel.

Task UFT-13-05 — Promote and rate content · done by Knowledge Manager

Input: Approved peer content → **Output:** Rated content

Step MP-33.5 — Send approved content to curation (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-33.6 — Rate user-generated item (Learner)

Type:

Row 1 — User-generated item: Generative AI for everyday work · **Criterion:** Risk · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — User-generated item: AI-assisted customer service · **Criterion:** Business impact · **Weight (%):** 30 · **Score (1–5):** 5 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — User-generated item: Responsible AI and data protection · **Criterion:** Urgency · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Send approved peer content to curation; average learner rating 4.5/5.

When every step is complete, click Complete in the task panel.

Task UFT-13-06 — Flag content past review date · done by Content Curator

Input: Rated content → **Output:** Review queue

Step MP-29.5 — Flag content past review date (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: 14 items past review date flagged; owners notified.

When every step is complete, click Complete in the task panel.

Task UFT-13-07 — Retire outdated content · done by Content Curator

Input: Review queue → **Output:** Content library health report

Step MP-29.6 — Retire outdated content (Content Curator)

Type:

Row 1 — Outdated content: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Outdated content: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Step MP-25.6 — Retire low-value capsule (Content Curator)

Type:

Row 1 — Low-value capsule: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Low-value capsule: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Retire 6 outdated items and 2 low-value capsules; library health 92%.

When every step is complete, click Complete in the task panel.

E2E-14 — Extended-Enterprise-Training

Goal: Certify partners and train customers

Starts when: Partner, reseller or customer training program launched. **Ends with:** External learners trained, paid and certified.

Task UFT-14-01 — Create external sub-portal · done by Extended Enterprise Manager

Input: Program brief → **Output:** External portal

Step MP-22.1 — Create external sub-portal (Extended Enterprise Manager)

Type:

Row 1 — External sub-portal: Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Leila Mansouri · **Source:** Questionnaire results

Row 2 — External sub-portal: AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hicham Bennani · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "External sub-portal register".

Result to record in the task: Sub-portal 'Partners Academy — Horizon Services Group' created for distributors and installers.

When every step is complete, click Complete in the task panel.

Task UFT-14-02 — Configure catalog and pricing · done by Extended Enterprise Manager

Input: External portal → **Output:** Priced catalog

Step MP-22.2 — Configure external catalog and pricing (Extended Enterprise Manager)

Type:

Row 1 — External catalog and pricing: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — External catalog and pricing: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Step MP-18.1 — Allocate budget by theme and site (Finance Manager)

Type:

Row 1 — Budget by theme and site: Budget by theme and site — Generative AI for everyday work · **Owner:** Hicham Bennani · **Start:** 2026-11-11 · **End:** 2026-12-11 · **Budget:** 75000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Budget by theme and site: Budget by theme and site — AI-assisted customer service · **Owner:** Omar Kettani · **Start:** 2026-11-18 · **End:** 2026-12-18 · **Budget:** 73000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Catalog: 'ISO 9001 for partners' 1,200 MAD; 'Generative AI for everyday work certification' 2,400 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-14-03 — Process payment and enroll · done by Extended Enterprise Manager

Input: Priced catalog → **Output:** External enrollments

Step MP-22.3 — Process online payment (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-22.4 — Enroll external learner (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: 18 online payments processed; 18 external learners enrolled.

When every step is complete, click Complete in the task panel.

Task UFT-14-04 — Deliver external sessions · done by Training Administrator

Input: External enrollments → **Output:** Attendance

Step MP-07.1 — Create training session (Training Administrator)

Type:

Row 1 — Training session: Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Tarik Naciri · **Source:** HRIS export

Row 2 — Training session: AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Mehdi Fassi · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Training session register".

Step MP-07.5 — Record attendance (Trainer)

Type:

Row 1 — Attendance: Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Tarik Naciri · **Source:** HRIS export

Row 2 — Attendance: AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Mehdi Fassi · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Attendance register".

Result to record in the task: Session P-01 (virtual), 18 invited, 16 present.

When every step is complete, click Complete in the task panel.

Task UFT-14-05 — Track external completion · done by Extended Enterprise Manager

Input: Attendance → **Output:** Completion status

Step MP-22.5 — Track external completion (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Completion: 15 of 16 passed the final quiz.

When every step is complete, click Complete in the task panel.

Task UFT-14-06 — Issue partner certification · done by Extended Enterprise Manager

Input: Completion status → **Output:** Partner certificates

Step MP-22.6 — Issue partner certification (Extended Enterprise Manager)

Type:

Row 1 — Partner certification: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-11-14

Row 2 — Partner certification: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-11-21

Then click Complete the step. The rows go to the register "Communications log".

Step MP-14.4 — Issue certificate on completion (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Issue 15 partner certificates valid 2 years.

When every step is complete, click Complete in the task panel.

Task UFT-14-07 — Reconcile external revenue · done by Finance Manager

Input: Partner certificates → **Output:** Revenue reconciliation

Step MP-18.3 — Record committed and actual costs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-18.4 — Compare spend against budget (Finance Manager)

Type:

Row 1 — Spend against budget: Generative AI for everyday work · **Criterion:** Cost · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Spend against budget: AI-assisted customer service · **Criterion:** Risk · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Spend against budget: Responsible AI and data protection · **Criterion:** Business impact · **Weight (%):** 20 · **Score (1–5):** 2 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Revenue 43,200 MAD reconciled with the ERP; 0 unpaid.

When every step is complete, click Complete in the task panel.

Gate G4 — G4 — Delivery readiness: close the phase

3. Open the project workspace and click the gate button of the phase.
3. Tick each checklist item once its evidence is attached, then click Submit for decision.
3. Click Go. Type the justification: All mandatory items met; evidence attached.
3. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

Phase 5 — Evaluation, compliance & impact

E2E-07 — Assessment-to-Evaluation

Goal: Measure training effectiveness and skill progression

Starts when: Training session or path completed. **Ends with:** Effectiveness measured on Kirkpatrick levels 1-3 and skill progression computed.

Task UFT-07-01 — Create assessment instrument · done by Instructional Designer

Input: Assessment strategy → **Output:** Assessment instrument

Step MP-09.1 — Create assessment instrument (Instructional Designer)

Type:

Row 1 — Assessment instrument: Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Karim El Idrissi · **Source:** Interview with the function head

Row 2 — Assessment instrument: AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Mehdi Chraibi · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Assessment instrument register".

Result to record in the task: Instrument 'Test Generative AI for everyday work M1': 15 questions, pass mark 70%.

When every step is complete, click Complete in the task panel.

Task UFT-07-02 — Draft question bank · done by Instructional Designer

Input: Assessment instrument → **Output:** Question bank

Step MP-09.2 — Generate question bank draft (Instructional Designer)

Type:

Row 1 — Question bank draft: Question bank draft — Generative AI for everyday work · **Owner:** Mehdi Chraibi · **Start:** 2026-08-01 · **End:** 2026-08-31 · **Budget:** 47000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Question bank draft: Question bank draft — AI-assisted customer service · **Owner:** Sara Tazi · **Start:** 2026-08-08 · **End:** 2026-09-07 · **Budget:** 65000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Keep 12 AI-drafted questions, rewrite 3 with Operations and service delivery vocabulary; validate each one.

When every step is complete, click Complete in the task panel.

Task UFT-07-03 — Collect reaction survey (Level 1) · done by L&D Analyst

Input: Completion records → **Output:** Level 1 results

Step MP-09.3 — Collect reaction survey (Level 1) (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Reaction survey S-01: 11 responses, satisfaction 4.3/5.

When every step is complete, click Complete in the task panel.

Task UFT-07-04 — Record learning results (Level 2) · done by Trainer

Input: Level 1 results → **Output:** Level 2 results

Step MP-09.4 — Record learning results (Level 2) (Trainer)

Type:

Row 1 — Learning results (Level 2): Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Asmae Sefrioui · **Source:** Audit report

Row 2 — Learning results (Level 2): AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Loubna Chraibi · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Learning results (Level 2) register".

Result to record in the task: Level 2: average pre-test 48%, post-test 81% (+33 points).

When every step is complete, click Complete in the task panel.

Task UFT-07-05 — Record on-the-job observation (Level 3) · done by Manager

Input: Level 2 results → **Output:** Level 3 results

Step MP-09.5 — Record on-the-job observation (Level 3) (Manager)

Type:

Row 1 — On-the-job observation (Level 3): Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Loubna Chraibi · **Source:** HRIS export

Row 2 — On-the-job observation (Level 3): AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Loubna Sefrioui · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "On-the-job observation (Level 3) register".

Result to record in the task: Level 3 (day 30): 9 of 11 supervisors apply the Generative AI for everyday work routine daily.

When every step is complete, click Complete in the task panel.

Task UFT-07-06 — Compute skill progression · done by L&D Analyst

Input: Level 3 results → **Output:** Skill progression

Step MP-09.6 — Compute skill progression (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-10.3 — Refresh KPI computation (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Skill progression: Generative AI for everyday work from 1.8 to 2.7 (target 3).

When every step is complete, click Complete in the task panel.

Task UFT-07-07 — Review evaluation results · done by L&D Analyst

Input: Skill progression → **Output:** Evaluation review

Step MP-09.7 — Review evaluation results (L&D Analyst)

Type:

Evaluation results: Evaluation results

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-08-19

Then click Complete the step.

Step MP-20.5 — Run periodic quality review (Quality Manager)

Type:

Row 1 — Periodic quality review: Generative AI for everyday work — half-day workshop · **Date:** 2026-08-21 · **Trainer:** Atlas Formation Conseil · **Participants:** 16 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Periodic quality review: AI-assisted customer service — half-day workshop · **Date:** 2026-08-28 · **Trainer:** Maghreb Learning Partners · **Participants:** 13 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Result to record in the task: Review: module M3 below 70% pass rate → improvement action assigned to the designer.

When every step is complete, click Complete in the task panel.

Task UFT-07-08 — Publish evaluation report · done by L&D Analyst

Input: Evaluation review → **Output:** Kirkpatrick evaluation report

Step MP-10.4 — Export report (L&D Analyst)

Type:

Row 1 — Report: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Report: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Step MP-10.6 — Share insight with stakeholders (L&D Analyst)

Type:

Row 1 — Insight with stakeholders: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-08-08

Row 2 — Insight with stakeholders: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-08-15

Then click Complete the step. The rows go to the register "Communications log".

Step MP-10.2 — Configure dashboard widgets (L&D Analyst)

Type:

Row 1 — Dashboard widgets: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Dashboard widgets: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Export RPT-016 Kirkpatrick report (PDF) and share with the Steering Committee.

When every step is complete, click Complete in the task panel.

E2E-08 — Learning-to-ROI

Goal: Validate ROI and business impact

Starts when: Evaluation results available for a theme selected for an ROI study. **Ends with:** Phillips ROI validated with finance and business impact report published.

Task UFT-08-01 — Select theme for ROI study · done by Performance Analyst

Input: Evaluation review → **Output:** ROI scope

Step MP-32.1 — Select theme for ROI study (Performance Analyst)

Type:

Decision: Approved with conditions

Theme for ROI study: Theme for ROI study

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2026-09-05

Decided by: Hajar Fassi

Then click Complete the step.

Result to record in the task: ROI study on theme 'Generative AI for everyday work' — population: 36 supervisors, 3 sites.

When every step is complete, click Complete in the task panel.

Task UFT-08-02 — Define business indicators · done by Performance Analyst

Input: ROI scope → **Output:** Indicator set

Step MP-32.2 — Define business indicators (Performance Analyst)

Type:

Row 1 — Business indicators: Raise Generative AI for everyday work proficiency of Operator — Operations and service delivery teams to level 3 · **Indicator:** KPI-001 (Strategic objective coverage) · **Baseline:** 44 % · **Target:** 85 % · **Deadline:** 2027-02-03 · **Owner:** Leila El Idrissi

Row 2 — Business indicators: Certify Supervisor — Operations and service delivery staff on AI-assisted customer service · **Indicator:** KPI-002 (Skills inventory validation rate) · **Baseline:** 41 % · **Target:** 88 % · **Deadline:** 2027-02-10 · **Owner:** Asmae Lahlou

Row 3 — Business indicators: Cut onboarding time on Responsible AI and data protection by 30 % · **Indicator:** KPI-003 (Critical gap rate) · **Baseline:** 46 % · **Target:** 84 % · **Deadline:** 2027-02-17 · **Owner:** Hicham Sefrioui

Then click Complete the step. The rows go to the register "Objectives register".

Step MP-10.1 — Define KPI set per audience (L&D Analyst)

Type:

Row 1 — KPI set per audience: Raise Generative AI for everyday work proficiency of Operator — Operations and service delivery teams to level 3 · **Indicator:** KPI-001 (Strategic objective coverage) · **Baseline:** 32 % · **Target:** 85 % · **Deadline:** 2027-02-03 · **Owner:** Leila El Idrissi

Row 2 — KPI set per audience: Certify Supervisor — Operations and service delivery staff on AI-assisted customer service · **Indicator:** KPI-002 (Skills inventory validation rate) · **Baseline:** 46 % · **Target:** 84 % · **Deadline:** 2027-02-10 · **Owner:** Asmae Lahlou

Row 3 — KPI set per audience: Cut onboarding time on Responsible AI and data protection by 30 % · **Indicator:** KPI-003 (Critical gap rate) · **Baseline:** 31 % · **Target:** 86 % · **Deadline:** 2027-02-17 · **Owner:** Hicham Sefrioui

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: Indicators: rework rate, downtime minutes per shift, data re-entry hours.

When every step is complete, click Complete in the task panel.

Task UFT-08-03 — Collect cost data · done by Finance Manager

Input: Indicator set → **Output:** Cost data

Step MP-18.3 — Record committed and actual costs (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-18.4 — Compare spend against budget (Finance Manager)

Type:

Row 1 — Spend against budget: Generative AI for everyday work · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 3 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Spend against budget: AI-assisted customer service · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Spend against budget: Responsible AI and data protection · **Criterion:** Cost · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Costs: design 60,000 MAD; delivery 180,000 MAD; participants' time 95,000 MAD.

When every step is complete, click Complete in the task panel.

Task UFT-08-04 — Isolate training effect · done by Performance Analyst

Input: Cost data → **Output:** Isolated benefits

Step MP-32.3 — Isolate training effect (Performance Analyst)

Type:

Row 1 — Training effect: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hicham Sefrioui · **Source:** Questionnaire results

Row 2 — Training effect: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Adil Amrani · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Training effect register".

Step MP-09.6 — Compute skill progression (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Control group: site B (not trained). Isolated benefit: 410,000 MAD per year.

When every step is complete, click Complete in the task panel.

Task UFT-08-05 — Compute Phillips ROI · done by Performance Analyst

Input: Isolated benefits → **Output:** ROI figures

Step MP-32.4 — Compute Phillips ROI (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: ROI = (410,000 − 335,000) / 335,000 = 22%; benefit-cost ratio 1.22.

When every step is complete, click Complete in the task panel.

Task UFT-08-06 — Review ROI with finance · done by Finance Manager

Input: ROI figures → **Output:** Validated ROI

Step MP-32.5 — Review ROI with finance (Finance Manager)

Type:

ROI with finance: ROI with finance

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-09-16

Then click Complete the step.

Result to record in the task: Finance review: assumptions accepted; downtime valued at 180 MAD per minute.

When every step is complete, click Complete in the task panel.

Task UFT-08-07 — Publish business impact report · done by Head of L&D

Input: Validated ROI → **Output:** ROI & business impact report

Step MP-32.6 — Publish business impact report (Head of L&D)

Type:

Row 1 — Business impact report: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-08-22

Row 2 — Business impact report: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-08-29

Then click Complete the step. The rows go to the register "Communications log".

Step MP-10.4 — Export report (L&D Analyst)

Type:

Row 1 — Report: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Row 2 — Report: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Then click Complete the step. The rows go to the register "Settings".

Step MP-10.5 — Query data via AI Assistant (Head of L&D)

Type:

Row 1 — Data via AI Assistant: KPI-006 (License Compliance %) · **Period:** 2026-Q3 · **Value:** 71 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Row 2 — Data via AI Assistant: KPI-007 (Content publication lead time) · **Period:** 2026-Q1 · **Value:** 87 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Publish RPT-012 ROI & Business Impact Report to executive leadership.

When every step is complete, click Complete in the task panel.

E2E-09 — Compliance-to-Certification

Goal: Ensure compliant workforce with valid certifications

Starts when: New regulatory requirement or certification nearing expiry. **Ends with:** Compliant workforce with valid certifications and an audit extract available.

Task UFT-09-01 — Register regulatory requirement · done by Compliance Officer

Input: Regulation → **Output:** Requirement record

Step MP-14.1 — Register regulatory requirement (Compliance Officer)

Type:

Row 1 — Regulatory requirement: Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Ghita Ziani · **Source:** Interview with the function head

Row 2 — Regulatory requirement: AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Zineb Berrada · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Regulatory requirement register".

Result to record in the task: Requirement 'ISO 9001 awareness', every 24 months, source: ISO 9001 clause on competence.

When every step is complete, click Complete in the task panel.

Task UFT-09-02 — Assign mandatory training · done by Compliance Officer

Input: Requirement record → **Output:** Mandatory assignments

Step MP-14.2 — Assign mandatory training by position (Compliance Officer)

Type:

Row 1 — Role: Training Administrator · **Mandatory training by position:** Generative AI for everyday work · **Person:** Zineb Berrada · **Allocation (%):** 100 · **Start:** 2026-08-21 · **Holder type:** Holder

Row 2 — Role: Trainer / Coach · **Mandatory training by position:** AI-assisted customer service · **Person:** Hicham Tazi · **Allocation (%):** 50 · **Start:** 2026-08-28 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Result to record in the task: Assign to positions: Operations and service delivery operator, Operations and service delivery supervisor, quality inspector.

When every step is complete, click Complete in the task panel.

Task UFT-09-03 — Deliver mandatory sessions · done by Training Administrator

Input: Mandatory assignments → **Output:** Attendance

Step MP-07.3 — Enroll learners into session (Training Administrator)

Type:

Row 1 — Learners into session: Generative AI for everyday work — half-day workshop · **Date:** 2026-09-12 · **Trainer:** Atlas Formation Conseil · **Participants:** 18 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Learners into session: AI-assisted customer service — half-day workshop · **Date:** 2026-09-19 · **Trainer:** Maghreb Learning Partners · **Participants:** 15 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-07.5 — Record attendance (Trainer)

Type:

Row 1 — Attendance: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hicham Tazi · **Source:** Annual performance review

Row 2 — Attendance: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Youssef Ziani · **Source:** Audit report

Then click Complete the step. The rows go to the register "Attendance register".

Result to record in the task: Enroll 24 employees in session 'ISO 9001 awareness'; attendance recorded.

When every step is complete, click Complete in the task panel.

Task UFT-09-04 — Assess and certify · done by Trainer

Input: Attendance → **Output:** Certificates

Step MP-09.4 — Record learning results (Level 2) (Trainer)

Type:

Row 1 — Learning results (Level 2): Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Youssef Ziani · **Source:** Audit report

Row 2 — Learning results (Level 2): AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Imane Ouazzani · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Learning results (Level 2) register".

Step MP-14.4 — Issue certificate on completion (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Result 86%; certificate 'ISO 9001 awareness' issued, valid until 2026+2.

When every step is complete, click Complete in the task panel.

Task UFT-09-05 — Compute certification validity · done by Compliance Officer

Input: Certificates → **Output:** Validity status

Step MP-14.3 — Compute certification validity (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Validity: 212 valid, 9 expire within 60 days, 3 expired.

When every step is complete, click Complete in the task panel.

Task UFT-09-06 — Manage renewals · done by Compliance Officer

Input: Validity status → **Output:** Renewed certificates

Step MP-14.5 — Launch renewal enrollment (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-14.6 — Confirm renewal completion (Compliance Officer)

Type:

Decision: Approved

Renewal completion: Renewal completion

Rationale: Conditions met; risks accepted by the sponsor.

Decision date: 2026-09-08

Decided by: Hajar Fassi

Then click Complete the step.

Result to record in the task: Launch renewal for the 12 employees; confirm 10 completions, 2 rescheduled.

When every step is complete, click Complete in the task panel.

Task UFT-09-07 — Produce compliance audit extract · done by Compliance Officer

Input: Renewed certificates → **Output:** Compliance audit extract

Step MP-14.7 — Produce compliance audit extract (Compliance Officer)

Type:

Row 1 — Compliance audit extract: Compliance audit extract — Generative AI for everyday work · **Owner:** Mehdi Alaoui · **Start:** 2026-09-10 · **End:** 2026-10-10 · **Budget:** 47000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Compliance audit extract: Compliance audit extract — AI-assisted customer service · **Owner:** Leila Mansouri · **Start:** 2026-09-17 · **End:** 2026-10-17 · **Budget:** 68000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-10.4 — Export report (L&D Analyst)

Type:

Row 1 — Report: Reminder cadence · **Value:** Every 5 days, three reminders · **Reference:** Communication plan

Row 2 — Report: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Export compliance audit extract for ISO 9001 (XLSX) for the external auditor.

When every step is complete, click Complete in the task panel.

Gate G5 — G5 — Evaluation & impact validated: close the phase

3. Open the project workspace and click the gate button of the phase.
3. Tick each checklist item once its evidence is attached, then click Submit for decision.
3. Click Go. Type the justification: All mandatory items met; evidence attached.
3. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.

Phase 6 — Talent, knowledge & continuous improvement

E2E-10 — Talent-to-Mobility

Goal: Enable internal mobility and career progression

Starts when: Internal opening published or annual career review. **Ends with:** Internal move decided with a reskilling plan assigned.

Task UFT-10-01 — Model career paths · done by HR Director

Input: Job architecture → **Output:** Career paths

Step MP-13.1 — Model career path (HR Director)

Type:

Row 1 — Career path: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Career path: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Step MP-13.2 — Link path steps to competency targets (HR Business Partner)

Type:

Row 1 — Path steps to competency targets: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Leila Mansouri · **Source:** Annual performance review

Row 2 — Path steps to competency targets: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Hicham Bennani · **Source:** Audit report

Then click Complete the step. The rows go to the register "Path steps to competency targets register".

Result to record in the task: Career path: Operations and service delivery operator → team leader → supervisor, with competency targets per step.

When every step is complete, click Complete in the task panel.

Task UFT-10-02 — Publish internal opening · done by HR Business Partner

Input: Career paths → **Output:** Internal opening

Step MP-31.1 — Publish internal opening (HR Business Partner)

Type:

Row 1 — Internal opening: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-09-09

Row 2 — Internal opening: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-09-16

Then click Complete the step. The rows go to the register "Communications log".

Step MP-31.2 — Define required skills (Hiring Manager)

Type:

Row 1 — Required skills: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Hicham Bennani · **Source:** Audit report

Row 2 — Required skills: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Omar Kettani · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Required skills register".

Result to record in the task: Opening 'Operations and service delivery team leader', required skills: Generative AI for everyday work level 3, leadership level 2.

When every step is complete, click Complete in the task panel.

Task UFT-10-03 — Match employees to opening · done by HR Business Partner

Input: Internal opening → **Output:** Match list

Step MP-31.3 — Match employees to opening (HR Business Partner)

Type:

Row 1 — Employees to opening: Generative AI for everyday work · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Employees to opening: AI-assisted customer service · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 4 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Employees to opening: Responsible AI and data protection · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-02.7 — Validate skills inventory (Head of L&D)

Type:

Decision: Approved

Skills inventory: Skills inventory

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-09-09

Decided by: Hajar Fassi

Then click Complete the step.

Result to record in the task: Review 6 AI matches; keep 4 candidates with match score above 75%.

When every step is complete, click Complete in the task panel.

Task UFT-10-04 — Apply to internal opening · done by Employee

Input: Match list → **Output:** Applications

Step MP-31.4 — Apply to internal opening (Employee)

Type:

Row 1 — Internal opening: Completeness threshold · **Value:** 70 % · **Reference:** Data quality rule

Row 2 — Internal opening: Approval route · **Value:** Head of L&D, then HR Director · **Reference:** Delegation of authority

Then click Complete the step. The rows go to the register "Settings".

Result to record in the task: Application with motivation note and consent of the current manager.

When every step is complete, click Complete in the task panel.

Task UFT-10-05 — Shortlist candidates · done by Hiring Manager

Input: Applications → **Output:** Shortlist

Step MP-31.5 — Shortlist candidates (Hiring Manager)

Type:

Decision: Approved

Candidates: Candidates

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-09-27

Decided by: Hajar Fassi

Then click Complete the step.

Result to record in the task: Shortlist: 2 candidates; interviews on 20 and 21 June.

When every step is complete, click Complete in the task panel.

Task UFT-10-06 — Plan individual development · done by Manager

Input: Shortlist → **Output:** Development plans

Step MP-13.3 — Create individual development plan (Manager)

Type:

Row 1 — Individual development plan: Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hajar Fassi · **Source:** Annual performance review

Row 2 — Individual development plan: AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Soukaina Squalli · **Source:** Audit report

Then click Complete the step. The rows go to the register "Individual development plan register".

Step MP-13.4 — Suggest development actions (Manager)

Type:

Row 1 — Development actions: Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hajar Fassi · **Source:** Annual performance review

Row 2 — Development actions: AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Soukaina Squalli · **Source:** Audit report

Then click Complete the step. The rows go to the register "Development actions register".

Step MP-42.3 — Build leadership development plan (HR Business Partner)

Type:

Row 1 — Leadership development plan: Leadership development plan — Generative AI for everyday work · **Owner:** Hajar Fassi · **Start:** 2026-09-22 · **End:** 2026-10-22 · **Budget:** 78000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Leadership development plan: Leadership development plan — AI-assisted customer service · **Owner:** Soukaina Squalli · **Start:** 2026-09-29 · **End:** 2026-10-29 · **Budget:** 56000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Step MP-42.4 — Suggest leadership development actions (HR Business Partner)

Type:

Row 1 — Leadership development actions: Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Hajar Fassi · **Source:** Annual performance review

Row 2 — Leadership development actions: AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Soukaina Squalli · **Source:** Audit report

Then click Complete the step. The rows go to the register "Leadership development actions register".

Result to record in the task: Development plan: 2 modules Generative AI for everyday work, 1 leadership workshop, 3 months mentoring.

When every step is complete, click Complete in the task panel.

Task UFT-10-07 — Assign reskilling plan · done by HR Business Partner

Input: Development plans → **Output:** Reskilling plan

Step MP-31.6 — Assign reskilling plan (HR Business Partner)

Type:

Row 1 — Role: IT Architect · **Reskilling plan:** Generative AI for everyday work · **Person:** Soukaina Squalli · **Allocation (%):** 100 · **Start:** 2026-09-14 · **Holder type:** Holder

Row 2 — Role: Consultant (PM / Partner) · **Reskilling plan:** AI-assisted customer service · **Person:** Karim El Idrissi · **Allocation (%):** 50 · **Start:** 2026-09-21 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Step MP-08.1 — Generate personal learning plan (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Assign reskilling path 'Generative AI for everyday work for team leaders' to the selected candidate.

When every step is complete, click Complete in the task panel.

Task UFT-10-08 — Review career and succession · done by HR Director

Input: Reskilling plan → **Output:** Talent mobility report

Step MP-13.5 — Run career review (HR Business Partner)

Type:

Row 1 — Career review: Generative AI for everyday work — half-day workshop · **Date:** 2026-10-06 · **Trainer:** Atlas Formation Conseil · **Participants:** 14 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Career review: AI-assisted customer service — half-day workshop · **Date:** 2026-10-13 · **Trainer:** Maghreb Learning Partners · **Participants:** 15 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-13.6 — Update succession readiness (HR Director)

Type:

Succession readiness: Succession readiness

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-09-20

Then click Complete the step.

Step MP-42.5 — Review leadership pipeline (HR Director)

Type:

Leadership pipeline: Leadership pipeline

Findings: Records complete and traceable; two minor corrections on dates.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2026-09-20

Then click Complete the step.

Step MP-42.6 — Reassess leadership maturity (HR Business Partner)

Type:

Row 1 — Leadership maturity: Generative AI for everyday work · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 2 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Leadership maturity: AI-assisted customer service · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Leadership maturity: Responsible AI and data protection · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 5 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Succession readiness updated: 2 ready now, 3 ready within 12 months.

When every step is complete, click Complete in the task panel.

E2E-11 — Onboarding-to-Productivity

Goal: Accelerate time-to-productivity

Starts when: New hire or internal mover confirmed. **Ends with:** Employee productive within target time and onboarding closed.

Task UFT-11-01 — Create onboarding record · done by Hiring Manager

Input: Hiring decision → **Output:** Onboarding record

Step MP-35.1 — Create onboarding record (Hiring Manager)

Type:

Row 1 — Onboarding record: Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Mehdi Chraibi · **Source:** Interview with the function head

Row 2 — Onboarding record: AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Sara Tazi · **Source:** Questionnaire results

Then click Complete the step. The rows go to the register "Onboarding record register".

Result to record in the task: Onboarding record for the new Operations and service delivery technician, start date 1 July, buddy assigned.

When every step is complete, click Complete in the task panel.

Task UFT-11-02 — Generate 30-60-90 day path · done by HR Business Partner

Input: Onboarding record → **Output:** 30-60-90 path

Step MP-35.2 — Generate 30-60-90 day path (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-08.1 — Generate personal learning plan (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: 30-60-90 path: day 30 safety and ISO 9001; day 60 Generative AI for everyday work; day 90 autonomy on shift.

When every step is complete, click Complete in the task panel.

Task UFT-11-03 — Enroll in onboarding sessions · done by Training Administrator

Input: 30-60-90 path → **Output:** Enrollments

Step MP-07.3 — Enroll learners into session (Training Administrator)

Type:

Row 1 — Learners into session: Generative AI for everyday work — half-day workshop · **Date:** 2026-10-12 · **Trainer:** Atlas Formation Conseil · **Participants:** 17 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Learners into session: AI-assisted customer service — half-day workshop · **Date:** 2026-10-19 · **Trainer:** Maghreb Learning Partners · **Participants:** 15 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-07.4 — Send convocations (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Result to record in the task: Enroll in the induction session of 2 July; convocation sent.

When every step is complete, click Complete in the task panel.

Task UFT-11-04 — Complete onboarding tasks · done by Employee

Input: Enrollments → **Output:** Completed tasks

Step MP-35.3 — Complete onboarding tasks (Employee)

Type:

Row 1 — Onboarding tasks: Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Loubna Chraibi · **Source:** Audit report

Row 2 — Onboarding tasks: AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Loubna Sefrioui · **Source:** HRIS export

Then click Complete the step. The rows go to the register "Onboarding tasks register".

Result to record in the task: Tasks done: badge, IT account, safety tour, meeting with the team.

When every step is complete, click Complete in the task panel.

Task UFT-11-05 — Hold milestone check-ins · done by Hiring Manager

Input: Completed tasks → **Output:** Check-in notes

Step MP-35.4 — Hold milestone check-in (Hiring Manager)

Type:

Row 1 — Milestone check-in: Generative AI for everyday work — half-day workshop · **Date:** 2026-10-16 · **Trainer:** Atlas Formation Conseil · **Participants:** 13 · **Hours:** 3.5 · **Modality:** On site

Row 2 — Milestone check-in: AI-assisted customer service — half-day workshop · **Date:** 2026-10-23 · **Trainer:** Maghreb Learning Partners · **Participants:** 16 · **Hours:** 7 · **Modality:** Remote

Then click Complete the step. The rows go to the register "Training sessions".

Step MP-21.3 — Schedule coaching sessions (Coach)

Type:

Row 1 — Coaching sessions: Coaching sessions — Generative AI for everyday work · **Owner:** Loubna Sefrioui · **Start:** 2026-10-06 · **End:** 2026-11-05 · **Budget:** 21000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Coaching sessions: Coaching sessions — AI-assisted customer service · **Owner:** Leila Berrada · **Start:** 2026-10-13 · **End:** 2026-11-12 · **Budget:** 53000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Day-30 check-in: on track; coaching needed on Generative AI for everyday work data entry.

When every step is complete, click Complete in the task panel.

Task UFT-11-06 — Assess time to productivity · done by Hiring Manager

Input: Check-in notes → **Output:** Productivity assessment

Step MP-35.5 — Assess time to productivity (Hiring Manager)

Type:

Row 1 — Time to productivity: Generative AI for everyday work · **Criterion:** Urgency · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Time to productivity: AI-assisted customer service · **Criterion:** Feasibility · **Weight (%):** 30 · **Score (1–5):** 2 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Time to productivity: Responsible AI and data protection · **Criterion:** Cost · **Weight (%):** 20 · **Score (1–5):** 4 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Result to record in the task: Time to productivity: 74 days (target 90).

When every step is complete, click Complete in the task panel.

Task UFT-11-07 — Close onboarding · done by HR Business Partner

Input: Productivity assessment → **Output:** Closed onboarding

Step MP-35.6 — Close onboarding (HR Business Partner)

Type:

Decision: Approved

Onboarding: Onboarding

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-10-17

Decided by: Hajar Fassi

Then click Complete the step.

Step MP-13.3 — Create individual development plan (Manager)

Type:

Row 1 — Individual development plan: Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Tarik Squalli · **Source:** Questionnaire results

Row 2 — Individual development plan: AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hajar Fassi · **Source:** Annual performance review

Then click Complete the step. The rows go to the register "Individual development plan register".

Result to record in the task: Close onboarding; link the individual development plan for year 1.

When every step is complete, click Complete in the task panel.

E2E-12 — Knowledge-Capture-to-Transfer

Goal: Capture and transfer institutional knowledge

Starts when: Critical expert identified as leaving, retiring or holding at-risk knowledge. **Ends with:** Knowledge captured, published and transferred to a validated successor.

Task UFT-12-01 — Identify critical experts · done by HR Business Partner

Input: Workforce data → **Output:** Critical expert list

Step MP-34.1 — Identify critical experts (HR Business Partner)

Type:

Row 1 — Critical experts: Generative AI for everyday work · **Category:** Primary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hajar Fassi · **Source:** Annual performance review

Row 2 — Critical experts: AI-assisted customer service · **Category:** Secondary · **Description:** Required by the standard and the latest audit. · **Owner:** Leila El Idrissi · **Source:** Audit report

Then click Complete the step. The rows go to the register "Critical experts register".

Result to record in the task: Critical expert: senior Operations and service delivery engineer retiring in 8 months; knowledge risk: high.

When every step is complete, click Complete in the task panel.

Task UFT-12-02 — Plan capture sessions · done by Knowledge Manager

Input: Critical expert list → **Output:** Capture plan

Step MP-34.2 — Plan capture sessions (Knowledge Manager)

Type:

Row 1 — Capture sessions: Capture sessions — Generative AI for everyday work · **Owner:** Leila El Idrissi · **Start:** 2026-10-14 · **End:** 2026-11-13 · **Budget:** 56000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Capture sessions: Capture sessions — AI-assisted customer service · **Owner:** Asmae Lahlou · **Start:** 2026-10-21 · **End:** 2026-11-20 · **Budget:** 34000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Capture plan: 4 sessions of 90 minutes on troubleshooting and ISO 9001 practices.

When every step is complete, click Complete in the task panel.

Task UFT-12-03 — Record expert interview · done by Knowledge Manager

Input: Capture plan → **Output:** Interview transcript

Step MP-34.3 — Record expert interview (Knowledge Manager)

Type:

Row 1 — Expert interview: Generative AI for everyday work · **Category:** Primary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Asmae Lahlou · **Source:** HRIS export

Row 2 — Expert interview: AI-assisted customer service · **Category:** Secondary · **Description:** Gap confirmed by the assessment: 40 % of staff below level 2. · **Owner:** Hicham Sefrioui · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Expert interview register".

Result to record in the task: Interview 1 recorded (82 minutes); transcript attached.

When every step is complete, click Complete in the task panel.

Task UFT-12-04 — Structure knowledge · done by Knowledge Manager

Input: Interview transcript → **Output:** Structured knowledge

Step MP-34.4 — Structure knowledge from transcript (Knowledge Manager)

Type:

Row 1 — Knowledge from transcript: Knowledge from transcript — Generative AI for everyday work · **Owner:** Hicham Sefrioui · **Start:** 2026-10-18 · **End:** 2026-11-17 · **Budget:** 64000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Knowledge from transcript: Knowledge from transcript — AI-assisted customer service · **Owner:** Adil Amrani · **Start:** 2026-10-25 · **End:** 2026-11-24 · **Budget:** 77000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Accept the AI structure: 5 failure modes, 12 checks, 3 decision rules; correct 2 technical terms.

When every step is complete, click Complete in the task panel.

Task UFT-12-05 — Publish knowledge article · done by Knowledge Manager

Input: Structured knowledge → **Output:** Published article

Step MP-12.1 — Publish knowledge article (Knowledge Manager)

Type:

Row 1 — Knowledge article: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-10-15

Row 2 — Knowledge article: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-10-22

Then click Complete the step. The rows go to the register "Communications log".

Step MP-12.2 — Index article for retrieval (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-33.4 — Approve publication (Knowledge Manager)

Type:

Decision: Approved

Publication: Publication

Rationale: Approved after review of the evidence and budget.

Decision date: 2026-10-27

Decided by: Hajar Fassi

Then click Complete the step.

Result to record in the task: Publish article 'Troubleshooting guide — Operations and service delivery' in EN/FR/AR; indexed for search.

When every step is complete, click Complete in the task panel.

Task UFT-12-06 — Assign successor learning path · done by Manager

Input: Published article → **Output:** Successor path

Step MP-34.5 — Assign successor learning path (Manager)

Type:

Row 1 — Role: L&D Planner · **Successor learning path:** Generative AI for everyday work · **Person:** Rim Kettani · **Allocation (%):** 100 · **Start:** 2026-10-12 · **Holder type:** Holder

Row 2 — Role: Instructional Designer · **Successor learning path:** AI-assisted customer service · **Person:** Anas Ziani · **Allocation (%):** 50 · **Start:** 2026-10-19 · **Holder type:** Deputy

Then click Complete the step. The rows go to the register "Role assignments".

Step MP-06.6 — Publish content to catalog (Content Developer)

Type:

Row 1 — Content to catalog: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2026-10-17

Row 2 — Content to catalog: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2026-10-24

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Assign the successor path: article + 3 shadowing sessions with the expert.

When every step is complete, click Complete in the task panel.

Task UFT-12-07 — Validate transfer completion · done by Subject Matter Expert

Input: Successor path → **Output:** Validated transfer

Step MP-34.6 — Validate transfer completion (Subject Matter Expert)

Type:

Decision: Approved with conditions

Transfer completion: Transfer completion

Rationale: Approved after review of the evidence and budget.

Conditions: Review the budget after the first quarter.

Decision date: 2026-11-14

Decided by: Hajar Fassi

Then click Complete the step.

Result to record in the task: Transfer validated: successor solved 4 of 5 test cases alone.

When every step is complete, click Complete in the task panel.

E2E-31 — Engagement-to-Roadmap

Goal: Define post-engagement roadmap and continuous improvement

Starts when: Closure of the current training engineering engagement (E2E-19). **Ends with:** Approved post-engagement roadmap with future missions and continuous improvement plan.

Task UFT-31-01 — Consolidate engagement findings · done by Consultant PM

Input: Engagement outputs → **Output:** Findings

Step MP-50.1 — Consolidate engagement findings (Consultant PM)

Type:

Row 1 — Engagement findings: KPI-010 (Learner completion rate) · **Period:** 2026-Q2 · **Value:** 82 · **Target:** 80 · **Status:** Green · **Why it is monitored:** On track

Row 2 — Engagement findings: KPI-011 (API Availability) · **Period:** 2026-Q3 · **Value:** 67 · **Target:** 80 · **Status:** Amber · **Why it is monitored:** Sessions postponed by the peak season

Then click Complete the step. The rows go to the register "Indicator values".

Result to record in the task: Findings: 6 deliverables, 3 lessons learned, 2 open topics (IS, org design).

When every step is complete, click Complete in the task panel.

Task UFT-31-02 — Define future perspectives · done by Consultant PM

Input: Findings → **Output:** Perspectives

Step MP-50.2 — Define future perspectives (Consultant PM)

Type:

Row 1 — Future perspectives: Generative AI for everyday work · **Category:** Primary · **Description:** Required by the standard and the latest audit. · **Owner:** Loubna Sefrioui · **Source:** HRIS export

Row 2 — Future perspectives: AI-assisted customer service · **Category:** Secondary · **Description:** Raised by three managers in the interviews; linked to the yearly objective. · **Owner:** Leila Berrada · **Source:** Interview with the function head

Then click Complete the step. The rows go to the register "Future perspectives register".

Result to record in the task: Perspectives: Responsible AI and data protection programme, second wave for OP level.

When every step is complete, click Complete in the task panel.

Task UFT-31-03 — Plan One-to-One coaching · done by L&D Strategist

Input: Perspectives → **Output:** Coaching plan

Step MP-50.3 — Plan One-to-One coaching (L&D Strategist)

Type:

Row 1 — One-to-One coaching: One-to-One coaching — Generative AI for everyday work · **Owner:** Leila Berrada · **Start:** 2027-07-25 · **End:** 2027-08-24 · **Budget:** 35000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — One-to-One coaching: One-to-One coaching — AI-assisted customer service · **Owner:** Tarik Squalli · **Start:** 2027-08-01 · **End:** 2027-08-31 · **Budget:** 21000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: One-to-One coaching: 6 managers, 6 sessions each over 6 months.

When every step is complete, click Complete in the task panel.

Task UFT-31-04 — Plan organizational optimization · done by Org Design Consultant

Input: Perspectives → **Output:** Optimization plan

Step MP-50.4 — Plan organizational optimization (Org Design Consultant)

Type:

Row 1 — Organizational optimization: Organizational optimization — Generative AI for everyday work · **Owner:** Tarik Squalli · **Start:** 2027-07-27 · **End:** 2027-08-26 · **Budget:** 44000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — Organizational optimization: Organizational optimization — AI-assisted customer service · **Owner:** Hajar Fassi · **Start:** 2027-08-03 · **End:** 2027-09-02 · **Budget:** 34000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: Organizational optimization: merge 2 planning cells; update 11 descriptions.

When every step is complete, click Complete in the task panel.

Task UFT-31-05 — Plan IS rehabilitation · done by IT Architect

Input: Perspectives → **Output:** IS plan

Step MP-50.5 — Plan IS rehabilitation (IT Architect)

Type:

Row 1 — IS rehabilitation: IS rehabilitation — Generative AI for everyday work · **Owner:** Hajar Fassi · **Start:** 2027-07-29 · **End:** 2027-08-28 · **Budget:** 48000 · **Deliverable:** Attendance sheets, evaluations and certificates

Row 2 — IS rehabilitation: IS rehabilitation — AI-assisted customer service · **Owner:** Leila El Idrissi · **Start:** 2027-08-05 · **End:** 2027-09-04 · **Budget:** 38000 · **Deliverable:** Attendance sheets, evaluations and certificates

Then click Complete the step. The rows go to the register "Action plan".

Result to record in the task: IS rehabilitation: connect HRIS and training platform; retire 2 spreadsheets.

When every step is complete, click Complete in the task panel.

Task UFT-31-06 — Define KPIs and dashboards · done by Performance Analyst

Input: Perspectives → **Output:** KPI framework

Step MP-50.6 — Define KPIs and dashboards (Performance Analyst)

Type:

Row 1 — KPIs and dashboards: Raise Generative AI for everyday work proficiency of Operator — Operations and service delivery teams to level 3 · **Indicator:** KPI-015 (Training record correction rate) · **Baseline:** 37 % · **Target:** 80 % · **Deadline:** 2028-01-17 · **Owner:** Leila El Idrissi

Row 2 — KPIs and dashboards: Certify Supervisor — Operations and service delivery staff on AI-assisted customer service · **Indicator:** KPI-016 (Knowledge reuse rate) · **Baseline:** 35 % · **Target:** 87 % · **Deadline:** 2028-01-24 · **Owner:** Asmae Lahlou

Row 3 — KPIs and dashboards: Cut onboarding time on Responsible AI and data protection by 30 % · **Indicator:** KPI-017 (IDP coverage) · **Baseline:** 49 % · **Target:** 78 % · **Deadline:** 2028-01-31 · **Owner:** Hicham Sefrioui

Then click Complete the step. The rows go to the register "Objectives register".

Result to record in the task: KPIs: training coverage, time to competency, ROI per theme; monthly dashboard.

When every step is complete, click Complete in the task panel.

Task UFT-31-07 — Prioritize future missions · done by Consultant PM

Input: All plans → **Output:** Prioritized missions

Step MP-50.7 — Prioritize future missions (Consultant PM)

Type:

Row 1 — Future missions: Generative AI for everyday work · **Criterion:** Business impact · **Weight (%):** 40 · **Score (1–5):** 5 · **Facts justifying the score:** Raised by three managers in the interviews; linked to the yearly objective.

Row 2 — Future missions: AI-assisted customer service · **Criterion:** Urgency · **Weight (%):** 30 · **Score (1–5):** 5 · **Facts justifying the score:** Gap confirmed by the assessment: 40 % of staff below level 2.

Row 3 — Future missions: Responsible AI and data protection · **Criterion:** Feasibility · **Weight (%):** 20 · **Score (1–5):** 3 · **Facts justifying the score:** Required by the standard and the latest audit.

Then click Complete the step. The rows go to the register "Assessments".

Step MP-50.8 — Validate roadmap with leadership (Partner)

Type:

Decision: Approved

Roadmap with leadership: Roadmap with leadership

Rationale: Approved after review of the evidence and budget.

Decision date: 2027-07-26

Decided by: Hajar Fassi

Then click Complete the step.

Result to record in the task: Priority missions: 1 IS rehabilitation, 2 coaching, 3 org optimization.

When every step is complete, click Complete in the task panel.

Task UFT-31-08 — Publish roadmap · done by Consultant PM

Input: Prioritized missions → **Output:** Post-engagement roadmap

Step MP-50.9 — Publish post-engagement roadmap (Consultant PM)

Type:

Row 1 — Post-engagement roadmap: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-07-30

Row 2 — Post-engagement roadmap: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-08-06

Then click Complete the step. The rows go to the register "Communications log".

Step MP-50.10 — Track roadmap execution (System)

Nothing to type: the platform performs this step once the previous steps are complete.

Step MP-50.11 — Improve roadmap continuously (Consultant PM)

Type:

Roadmap continuously: Roadmap continuously

Findings: Evidence matches the plan; owners confirmed.

Conclusion: Conforming

Follow-up actions: Check the corrections at the next steering meeting.

Review date: 2027-08-05

Then click Complete the step.

Step MP-50.12 — Report on roadmap progress (Consultant PM)

Type:

Row 1 — On roadmap progress: Announce the program: Generative AI for everyday work · **Audience:** Operator — Operations and service delivery teams and their managers · **Channel:** E-mail · **Message:** Why the program matters, who is concerned and how to enrol. · **Date:** 2027-07-30

Row 2 — On roadmap progress: Announce the program: AI-assisted customer service · **Audience:** Supervisor — Operations and service delivery teams and their managers · **Channel:** WhatsApp · **Message:** Session dates, venue and what to prepare. · **Date:** 2027-08-06

Then click Complete the step. The rows go to the register "Communications log".

Result to record in the task: Publish RPT-010 Post-Engagement Roadmap to the executive committee.

When every step is complete, click Complete in the task panel.

Gate G6 — G6 — Closure & continuous improvement: close the phase

3. Open the project workspace and click the gate button of the phase.
4. Tick each checklist item once its evidence is attached, then click Submit for decision.
4. Click Go. Type the justification: All mandatory items met; evidence attached.
4. Confirm. The decision is recorded with your name and the date; the steps of the phase become read-only.
