About this document

AI Value proposes 37 templates for the documented information of an integrated management system. DynamicMS holds them as a library: each template lists its sections, and each section is either free text, an approval block, or a table or text filled from the project data (registers, step values, KPIs, risks, audits, nonconformities...). The application was seeded with these templates: 6,392 documents and 8,543 versions across 120 projects, ready to download in Word, PDF and Excel.

- **Formats.** Word and PDF documents have a cover page, a table of contents and numbered sections, except the policies (signed statement of one to two pages without cover or table of contents). Registers and plans are laid out landscape; Excel workbooks have a cover sheet and one sheet per table.
- **One document per item.** Procedures are generated per end-to-end phase, process sheets per macro process, audit reports per audit carried out and 8D reports per major or critical nonconformity.
- **Diagrams.** Procedures and process sheets contain BPMN diagrams drawn from the process design (swimlanes by role, Go / No-Go gateway); the process map is drawn as a diagram.
- **Layout.** The logo, colors, header and footer of the organization (Records › Documents › Layout) apply to every generated file, like a Word template.
- **Versions.** A document starts as a draft (0.1), goes to review, and is published by a person other than the author. A new version is either regenerated from the current project data or copied, then edited.
- **Formatting and pictures.** Each template has its own formatting (fonts and sizes, justified text, orientation, margins, cover page, table of contents, numbering, page numbers, colours, logo of the organization or of the template, logo in the page header, header and footer texts) and may contain picture sections (a site layout, an organization chart, a logo) with a caption, width and alignment; every section can be aligned, coloured, framed, start on a new page or hide its title.
- **Tenant templates.** An organization copies a library template to adapt its sections and texts, or creates a new template; its copy replaces the library template in its own library.

Documented information required by the standards

ISO standards distinguish documented information to maintain (a document kept up to date) and documented information to retain (a record kept as evidence). The matrix lists what each standard requires and the template that answers it.

Clause	Documented information	Maintain / retain	Template
4.3	Scope of the management system	Maintain (document)	TPL-SCOPE
4.4.2	Process map and interactions	Maintain (document)	TPL-PMAP
5.2	Quality policy	Maintain (document)	TPL-POL-Q
5.2	Integrated QHSE policy	Maintain (document)	TPL-POL-IMS
6.2	Objectives and action plan	Maintain (document)	TPL-OBJ
6.3, 8.5.6	Control of changes record	Retain (record)	TPL-CHANGE
7.1.5	Monitoring and measuring equipment register	Retain (record)	TPL-CAL
7.2	Competence matrix and training records	Retain (record)	TPL-COMP
8.1, 8.5.1	Control plan	Maintain (document)	TPL-CTRL
8.2.3.2	Customer requirements review record	Retain (record)	TPL-REQ
8.4.1	Supplier evaluation register	Retain (record)	TPL-SUP
8.6	Release of products and services record	Retain (record)	TPL-RELEASE
8.7.2	Nonconforming outputs register	Retain (record)	TPL-NCO
9.1.1, 9.1.3	KPI dashboard and measurement results	Retain (record)	TPL-KPI
9.2.2	Internal audit programme	Retain (record)	TPL-AUDPRG
9.2.2	Internal audit report	Retain (record)	TPL-AUDREP
9.3	Management review minutes	Retain (record)	TPL-MR
10.2.2	Nonconformity and corrective action register	Retain (record)	TPL-NC

ISO 14001

Clause	Documented information	Maintain / retain	Template
4.3	Scope of the management system	Maintain (document)	TPL-SCOPE
5.2	Integrated QHSE policy	Maintain (document)	TPL-POL-IMS
5.2	Environmental policy	Maintain (document)	TPL-POL-E
6.1.1	Risks and opportunities register	Maintain (document)	TPL-REG-RISK
6.1.2	Environmental aspects and impacts register	Maintain	TPL-ASPECTS

Clause	Documented information	Maintain / retain	Template
		(document)	
6.1.3, 9.1.2	Compliance obligations register	Maintain (document)	TPL-LEGAL
6.2	Objectives and action plan	Maintain (document)	TPL-OBJ
7.2	Competence matrix and training records	Retain (record)	TPL-COMP
7.4	Communication plan and records	Retain (record)	TPL-COMM
8.2	Emergency preparedness and response plan	Maintain (document)	TPL-EPR
9.1.1	Monitoring and measuring equipment register	Retain (record)	TPL-CAL
9.1.1	KPI dashboard and measurement results	Retain (record)	TPL-KPI
9.2.2	Internal audit programme	Retain (record)	TPL-AUDPRG
9.2.2	Internal audit report	Retain (record)	TPL-AUDREP
9.3	Management review minutes	Retain (record)	TPL-MR
10.2.2	Nonconformity and corrective action register	Retain (record)	TPL-NC

ISO 45001

Clause	Documented information	Maintain / retain	Template
4.3	Scope of the management system	Maintain (document)	TPL-SCOPE
5.2	Integrated QHSE policy	Maintain (document)	TPL-POL-IMS
5.2	Occupational health and safety policy	Maintain (document)	TPL-POL-OHS
6.1.1	Risks and opportunities register	Maintain (document)	TPL-REG-RISK
6.1.2, 8.1.2	Hazard identification and risk assessment (HIRA)	Maintain (document)	TPL-HIRA
6.1.3, 9.1.2	Compliance obligations register	Maintain (document)	TPL-LEGAL
6.2	Objectives and action plan	Maintain (document)	TPL-OBJ
7.2	Competence matrix and training records	Retain (record)	TPL-COMP
7.4	Communication plan and records	Retain (record)	TPL-COMM
8.2	Emergency preparedness and response plan	Maintain (document)	TPL-EPR
9.1.1	Monitoring and measuring equipment register	Retain (record)	TPL-CAL

Clause	Documented information	Maintain / retain	Template
9.1.1	KPI dashboard and measurement results	Retain (record)	TPL-KPI
9.2.2	Internal audit programme	Retain (record)	TPL-AUDPRG
9.2.2	Internal audit report	Retain (record)	TPL-AUDREP
9.3	Management review minutes	Retain (record)	TPL-MR
10.2	Incident investigation report	Retain (record)	TPL-INC
10.2.2	Nonconformity and corrective action register	Retain (record)	TPL-NC

Note. ISO 9001 §8.3 (design and development records) is not applicable to organizations that do not design their products or services; the exclusion is justified in the scope of the management system (template TPL-SCOPE).

Market practice applied to the documents

The structure of every document follows what certified organizations and certification bodies expect. The main points:

Document	Structure
Policies	Vision and ambition; context and standards; strategic axes, each with its commitments and the measurable objectives linked to it; commitments of the chief executive, including the delegation to the management system manager; role of managers and of everyone; communication and review; signature of the chief executive. Modelled on the policy provided as an example.
Procedures	Identification, purpose and scope, references, definitions, responsibilities (RACSI), BPMN overview of the phase, then for each macro process its BPMN diagram, the SIPOC of each step (suppliers, inputs, outputs, customers, responsible) and its Go / No-Go criteria; the Go / No-Go decision of the phase gate (criteria, checklist with evidence, Go / No-Go / Hold / Recycle rules, decision recorded); records with retention; indicators; risks and controls.
Audit programme	Objectives, extent, risks and resources; frequency per process according to importance and past results; planned audits with frequency chosen from a list (monthly to every 3 years) or custom with its description; auditor qualification and independence.
Audit report	One report per audit: identification (scope, criteria, team, auditees, method), executive summary, strengths, summary of findings, detailed report of each nonconformity graded major or minor (requirement, statement, objective evidence, correction, root cause, corrective action, due date, verification), observations and opportunities, grading definitions, conclusion.
Corrective action report (8D)	D0 to D8 for each major or critical nonconformity: team, 5W2H, containment, Ishikawa and 5 Whys, occurrence and non-detection causes, permanent actions with verification, validation, prevention of recurrence, lessons learned.

Document	Structure
Measuring equipment register	Status summary; identification, range, required accuracy, method and traceability, provider and certificate, interval, error found and result, next due date, status; impact assessment of any out-of-tolerance.
Other registers and plans	Change records with impact and risk assessment and verification; communication plan and log; competence requirements, matrix, gaps, training plan and records with effectiveness; AIAG-style control plan; context with PESTLE, SWOT and influence / interest grid; master list with levels, retention and external documents; KPI definitions, results, trends and analysis; compliance obligations with evaluation of compliance; manual chapter by clause with a cross-reference matrix; management review minutes covering every input of §9.3.2 and output of §9.3.3.

Template catalogue

Templates are grouped by category. For each one: purpose, formats, requirements answered, review frequency, owner, the macro process that produces it, and its sections with the data that fills them.

Policies and scope

Code	Template	Management system	Formats	Required by
TPL-POL-Q	Quality policy	QMS	DOCX, PDF	ISO 9001 §5.2 (maintain)
TPL-POL-IMS	Integrated QHSE policy	QHSE	DOCX, PDF	ISO 9001 §5.2 (maintain); ISO 14001 §5.2 (maintain); ISO 45001 §5.2 (maintain)
TPL-POL-E	Environmental policy	QHSE	DOCX, PDF	ISO 14001 §5.2 (maintain)
TPL-POL-OHS	Occupational health and safety policy	QHSE	DOCX, PDF	ISO 45001 §5.2 (maintain)
TPL-SCOPE	Scope of the management system	QMS, QHSE	DOCX, PDF	ISO 9001 §4.3 (maintain); ISO 14001 §4.3 (maintain); ISO 45001 §4.3 (maintain)
TPL-MAN	Management system manual	QMS, QHSE	DOCX, PDF	Recommended

TPL-POL-Q — Quality policy

Vision, strategic axes with measurable objectives and commitments, signed by the chief executive (ISO 9001 §5.2). One to two pages, no table of contents.

Formats: DOCX, PDF; table of contents: no; review: Annual; owner: Top Management; produced by: UMS022 Quality Policy and Strategic Direction Definition.

#	Section	Type	Content
1	Our vision and ambition	Project data	Vision and ambition of the organization, the context issues it faces and the standards the system is built on.
2	Our strategic axes	Project data	Strategic axes (customers, operational excellence, improvement, people, compliance, partners, tools), each with its commitments and the measurable objectives of the objectives register linked to it.
3	Commitments of top management	Project data	Commitments of the chief executive ("As chief executive, I commit to..."), including the delegation to the management system manager.
4	Everyone's role	Project data	Role of managers and of every employee; closing message of the chief executive.
5	Communication and review of this policy	Project data	How the policy is communicated, made available and reviewed (date of the last management review).
6	Signature	Project data	Name, title, place, date and signature of the chief executive.

TPL-POL-IMS — Integrated QHSE policy

One policy for quality, environment and occupational health and safety (ISO 9001, ISO 14001 and ISO 45001 §5.2), signed by the chief executive.

Formats: DOCX, PDF; table of contents: no; review: Annual; owner: Top Management; produced by: UMS022 Quality Policy and Strategic Direction Definition.

#	Section	Type	Content
1	Our vision and ambition	Project data	Vision and ambition (quality, health, safety and environment).
2	Our strategic axes	Project data	Strategic axes including health and safety and environment, each with measurable objectives.
3	Commitments of top management	Project data	Commitments of the chief executive for quality, OH&S (prevention, consultation) and environment (prevention of pollution, compliance obligations).
4	Everyone's role	Project data	Role of managers and employees.
5	Communication and review of this policy	Project data	How the policy is communicated, made available and reviewed (date of the last management review).
6	Signature	Project data	Name, title, place, date and signature of the chief executive.

TPL-POL-E — Environmental policy

Stand-alone environmental policy (ISO 14001 §5.2) when no integrated policy is used.

Formats: DOCX, PDF; table of contents: no; review: Annual; owner: Top Management; produced by: UMS022 Quality Policy and Strategic Direction Definition; replaced by TPL-POL-IMS when an integrated policy is used.

#	Section	Type	Content
1	Our vision and ambition	Project data	Vision and ambition (environment).

#	Section	Type	Content
2	Our strategic axes	Project data	Environmental strategic axes with objectives.
3	Commitments of top management	Project data	Environmental commitments of the chief executive.
4	Everyone's role	Project data	Role of managers and employees.
5	Communication and review of this policy	Project data	How the policy is communicated, made available and reviewed (date of the last management review).
6	Signature	Project data	Name, title, place, date and signature of the chief executive.

TPL-POL-OHS — Occupational health and safety policy

Stand-alone OH&S policy (ISO 45001 §5.2) when no integrated policy is used.

Formats: DOCX, PDF; table of contents: no; review: Annual; owner: Top Management; produced by: UMS022 Quality Policy and Strategic Direction Definition; replaced by TPL-POL-IMS when an integrated policy is used.

#	Section	Type	Content
1	Our vision and ambition	Project data	Vision and ambition (occupational health and safety).
2	Our strategic axes	Project data	OH&S strategic axes with objectives.
3	Commitments of top management	Project data	OH&S commitments of the chief executive.
4	Everyone's role	Project data	Role of managers and employees.
5	Communication and review of this policy	Project data	How the policy is communicated, made available and reviewed (date of the last management review).
6	Signature	Project data	Name, title, place, date and signature of the chief executive.

TPL-SCOPE — Scope of the management system

Scope statement, sites, products and services, boundaries, outsourced processes and justification of non-applicable requirements (§4.3).

Formats: DOCX, PDF; table of contents: yes; review: Annual; owner: Ims Manager; produced by: UMS016 Context Analysis and Stakeholder Mapping.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.
2	Purpose and scope	Text	This document defines the boundaries and applicability of the management system of {org}, as required by clause 4.3 of {standards}. It is available to interested parties on request.
3	Organization profile	Project data	Organization profile: activity, site, size, customers, management system, certificates, management system manager.
4	Scope statement	Project data	Scope statement built from the profile, with the scope

#	Section	Type	Content
			recorded in step MP-001.8.
5	Sites and organization units	Project data	Sites and departments of the organization structure (OBS) with their members.
6	Products and services	Project data	Products and services in scope with their customers and main requirements.
7	Boundaries, interfaces and outsourced processes	Project data	Outsourced processes and interfaces with how each is controlled.
8	Standards applied	Project data	Standards selected once for the project (step MP-002.10).
9	Requirements not applicable and justification	Project data	Requirements not applicable, with their justification.
10	Processes in scope	Project data	Macro processes of the project with phase, owner and status.
11	Revision history	Project data	Revision history of the document itself.
12	Approval	Approval block	Names, dates and signatures of the persons who prepared, reviewed and approved the document.

TPL-MAN — Management system manual

How the management system meets each clause of the standards (high-level structure 4 to 10), with the process map, responsibilities and the cross-reference to documents.

Recommended, not required.

Formats: DOCX, PDF; table of contents: yes; review: Annual; owner: Ims Manager; produced by: GRC001 Policy and Procedure Governance.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.
2	Introduction	Text	This manual describes the management system of {org} and how it meets the requirements of {standards}. It is the entry point to the documented information: each chapter follows the clause of the same number and refers to the procedures and records that apply. The manual is controlled; printed copies are for information only.
3	Presentation of the organization	Project data	Organization profile: activity, site, size, customers, management system, certificates, management system manager.
4	Scope and applicability (§4.3)	Project data	Scope statement and non-applicable requirements.
5	Context of the organization (§4.1, §4.2)	Project data	Main issues and interested parties.
6	Management system and its processes (§4.4)	Project data	Process map diagram: management, core and support processes between customer requirements and satisfaction.
7	Leadership and	Project data	Leadership and commitment, with the strategic axes of the

#	Section	Type	Content
	commitment (§5)		policy.
8	Roles, responsibilities and authorities (§5.3)	Project data	RACSI of every macro process (five columns, one Accountable).
9	Planning: risks, opportunities and objectives (§6)	Project data	Risk method, top risks and objectives.
10	Support (§7)	Project data	Resources, measuring equipment, competence, communication and documented information.
11	Operation (§8)	Project data	Operational planning and control, with the control plan.
12	Performance evaluation (§9)	Project data	Indicators on target, audits and management reviews.
13	Improvement (§10)	Project data	Nonconformities, closures and improvement ideas.
14	Cross-reference: clauses, processes and documents	Project data	Cross-reference: clause, requirement, process and document.
15	Revision history	Project data	Revision history of the document itself.
16	Approval	Approval block	Names, dates and signatures of the persons who prepared, reviewed and approved the document.

Context and planning

Code	Template	Management system	Formats	Required by
TPL-CTX	Context and interested parties analysis	QMS, QHSE	DOCX, PDF	Recommended
TPL-REG-IP	Interested parties register	QMS, QHSE	XLSX, PDF	Recommended
TPL-REG-RISK	Risks and opportunities register	QMS, QHSE	XLSX, PDF	ISO 14001 §6.1.1 (maintain); ISO 45001 §6.1.1 (maintain)
TPL-OBJ	Objectives and action plan	QMS, QHSE	XLSX, PDF, DOCX	ISO 9001 §6.2 (maintain); ISO 14001 §6.2 (maintain); ISO 45001 §6.2 (maintain)
TPL-LEGAL	Compliance obligations register	QMS, QHSE	XLSX, PDF	ISO 14001 §6.1.3, 9.1.2 (maintain); ISO 45001 §6.1.3, 9.1.2 (maintain)

TPL-CTX — Context and interested parties analysis

PESTLE and SWOT analysis, interested parties with their requirements, influence and interest, conclusions for risks and opportunities, and review (§4.1, §4.2).

Formats: DOCX, PDF; table of contents: yes; review: Annual; owner: Ims Manager; produced by: UMS016 Context Analysis and Stakeholder Mapping.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.
2	Purpose and scope	Text	This report records the external and internal issues relevant to the purpose and strategic direction of {org}, and the needs and expectations of its relevant interested parties. Its conclusions feed the risks and opportunities, the scope, the policy and the objectives.
3	Method	Project data	PESTLE, SWOT and interested party method and review frequency.
4	External issues (PESTLE)	Project data	External issues by PESTLE factor: risk or opportunity, impact, trend, plus the issues recorded in step MP-001.2.
5	Internal issues	Project data	Internal issues recorded in step MP-001.3, one row per issue with its source.
6	SWOT synthesis	Project data	Strengths, weaknesses, opportunities and threats built from the context register and improvement ideas.
7	Interested parties and their requirements	Project data	Interested parties: internal or external, needs and expectations, compliance obligation, influence, interest, priority and monitoring.
8	Needs and expectations mapped to the interested parties	Project data	Needs and expectations recorded in the needs register: the interested parties concerned, type, compliance obligation and how the organization addresses each one.
9	Influence and interest grid	Project data	Influence / interest grid: manage closely, keep satisfied, keep informed, monitor.
10	Assessment of needs and expectations	Project data	Decision matrix of the needs and expectations assessment (step MP-001.5).
11	Process interactions	Project data	Process interactions recorded in step MP-001.7.
12	Conclusions: risks and opportunities to address	Project data	Risks and opportunities that result from the analysis.
13	Monitoring and review	Project data	Periodic review of the context (step MP-001.10): frequency, dates, decisions.
14	Revision history	Project data	Revision history of the document itself.
15	Approval	Approval block	Names, dates and signatures of the persons who prepared, reviewed and approved the document.

TPL-REG-IP — Interested parties register

Interested parties, needs and expectations, requirements adopted as compliance obligations, influence, interest, priority, monitoring and owner.

Formats: XLSX, PDF; table of contents: no; review: Semi-annual; owner: Ims Manager; produced by: UMS016 Context Analysis and Stakeholder Mapping.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.

#	Section	Type	Content
2	Interested parties	Project data	Interested parties: internal or external, needs and expectations, compliance obligation, influence, interest, priority and monitoring.
3	Needs and expectations mapped to the interested parties	Project data	Needs and expectations recorded in the needs register: the interested parties concerned, type, compliance obligation and how the organization addresses each one.
4	Influence and interest grid	Project data	Influence / interest grid: manage closely, keep satisfied, keep informed, monitor.

TPL-REG-RISK — Risks and opportunities register

Risks with cause, consequence, existing controls, likelihood, impact, level, treatment and residual risk; opportunities; heat map and scoring method (§6.1).

Formats: XLSX, PDF; table of contents: no; review: Semi-annual; owner: Risk Manager; produced by: UMS030 Operational Risk and Opportunity Management.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.
2	Summary	Project data	Number of risks by level and of opportunities.
3	Risks	Project data	Risks with cause, consequence, existing controls, likelihood, impact, score, treatment, residual risk, owner and status.
4	Opportunities	Project data	Opportunities with benefit, feasibility and the action to pursue them.
5	Heat map (number of risks)	Project data	Heat map: number of risks per likelihood and impact.
6	Scoring method and acceptance criteria	Project data	Likelihood and impact scale (1 to 5) and score bands.

TPL-OBJ — Objectives and action plan

SMART objectives linked to the policy axes: KPI, baseline, target, deadline, owner, resources, evaluation method, progress; with the actions to achieve them (§6.2).

Formats: XLSX, PDF, DOCX; table of contents: no; review: Quarterly; owner: Ims Manager; produced by: UMS031 Quality Objectives and Targets Deployment.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.
2	Summary	Project data	Objectives on track and at risk.
3	Objectives	Project data	SMART objectives: policy axis, KPI, baseline, target, current value, deadline, owner, resources and status.

#	Section	Type	Content
4	Action plan	Project data	Actions planned to reach the objectives.
5	Approval	Approval block	Names, dates and signatures of the persons who prepared, reviewed and approved the document.

TPL-LEGAL — Compliance obligations register

Legal requirements and other requirements (contracts, permits, standards): source, reference, applicability, how complied, owner, evaluation of compliance and actions (ISO 14001 / ISO 45001 §6.1.3, §9.1.2).

Formats: XLSX, PDF; table of contents: no; review: Semi-annual; owner: Compliance Officer; produced by: GRC005 Regulatory and Compliance Obligations Mapping.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.
2	Evaluation of compliance — summary	Project data	Evaluation of compliance: compliant, partially compliant, non-compliant.
3	Obligations	Project data	Obligations: type, authority, reference, applicability, requirement, how complied, owner, interval, last and next evaluation.
4	Actions for partial or non compliance	Project data	Actions for partial or non compliance.

Processes and procedures

Code	Template	Management system	Formats	Required by
TPL-PMAP	Process map and interactions	QMS, QHSE	DOCX, PDF	ISO 9001 §4.4.2 (maintain)
TPL-PSHEET	Macro process sheet	QMS, QHSE	DOCX, PDF	Recommended
TPL-PROC	Procedure	QMS, QHSE	DOCX, PDF	Recommended
TPL-WI	Work instruction	QMS, QHSE	DOCX, PDF	Recommended
TPL-RACSI	RACSI matrix	QMS, QHSE	XLSX, PDF	Recommended

TPL-PMAP — Process map and interactions

Process map (management, core and support processes), process owners, purpose, indicators and interactions (§4.4).

Formats: DOCX, PDF; table of contents: yes; review: Annual; owner: Process Excellence Manager; produced by: UMS002 Process Architecture Mapping.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.
2	Purpose and scope	Text	This document presents the processes of the management system of {org}, their sequence and interactions, their owners and how their performance is measured (§4.4.1).
3	Process map	Project data	Process map diagram: management, core and support processes between customer requirements and satisfaction.
4	Processes, owners and indicators	Project data	Processes with type (management, core, support), owner, purpose and indicators.
5	Interactions	Project data	Process interactions recorded in step MP-001.7.
6	Process owners (RACSI)	Project data	RACSI of every macro process (five columns, one Accountable).
7	Revision history	Project data	Revision history of the document itself.
8	Approval	Approval block	Names, dates and signatures of the persons who prepared, reviewed and approved the document.

TPL-PSHEET — Macro process sheet

One sheet per macro process: identity, SIPOC, BPMN diagram, steps with their SIPOC, RACSI, indicators, risks and documents.

Formats: DOCX, PDF; table of contents: no; review: Semi-annual; owner: Process Excellence Manager; produced by: UMS002 Process Architecture Mapping; one document per macro process.

#	Section	Type	Content
1	Process identity	Project data	Process identity: type, owner, purpose, trigger, end, standards and phase.
2	SIPOC of the process	Project data	SIPOC of the macro process.
3	Process flow (BPMN)	Project data	BPMN diagram of the macro process: one lane per role, its steps, the Go / No-Go gateway and the end event.
4	Steps and their SIPOC	Project data	Steps of the macro process, each with its SIPOC (suppliers, inputs, outputs, customers) and responsible role.
5	Go / No-Go to close the process	Project data	Go criteria to close the process, No-Go handling, decision maker and current status.
6	RACSI	Project data	RACSI of the macro process of the document.
7	Indicators	Project data	KPIs of the macro process of the document.
8	Risks and controls	Project data	Risks and controls of the macro process.
9	Documents and records	Project data	Documents and records of the macro process.
10	Revision history	Project data	Revision history of the document itself.

TPL-PROC — Procedure

Purpose, scope, references, definitions, responsibilities, BPMN flow, activities with the SIPOC of each step, Go / No-Go decision, records, indicators and risks of a process phase.

Formats: DOCX, PDF; table of contents: yes; review: Annual; owner: Process Excellence Manager; produced by: UMS024 Procedures and Work Instructions Development; one document per end-to-end phase.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.
2	Purpose and scope	Text	This procedure describes how the phase "{phase}" is carried out at {org}: who does what, in which order, with which inputs and outputs, and how the decision to move to the next phase is taken. It applies to all units and people involved in the phase.
3	References	Project data	Standards and related documents (manual, process map, master list).
4	Terms and definitions	Project data	Terms used in procedures: SIPOC, RACSI, BPMN, gate and Go / No-Go, documented information.
5	Responsibilities	Project data	RACSI of the macro processes of the phase.
6	Process overview (BPMN)	Project data	BPMN overview of the phase: macro processes as sub-processes and the phase gate.
7	Description of activities	Project data	For each macro process of the phase: purpose, trigger, owner, BPMN diagram, SIPOC of each step and Go / No-Go criteria.
8	Go / No-Go decision	Project data	Gate of the phase: entry and exit criteria, checklist with evidence, decision rules (Go, No-Go, Hold, Recycle) and the decision recorded.
9	Records	Project data	Records produced in the phase: owner, storage and retention.
10	Performance indicators	Project data	KPIs of the macro processes of the phase.
11	Risks and controls	Project data	Risks and business rules of the phase.
12	Revision history	Project data	Revision history of the document itself.
13	Approval	Approval block	Names, dates and signatures of the persons who prepared, reviewed and approved the document.

TPL-WI — Work instruction

Step-by-step instruction for one activity: key points and reasons, safety, tools, quality checks and the record to fill.

Formats: DOCX, PDF; table of contents: no; review: Annual; owner: Operations Manager; produced by: UMS024 Procedures and Work Instructions Development.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.
2	Purpose and scope	Text	Carry out the activities of {line} right first time, safely, and record the result. Applies to all technicians and operators of {org}.
3	Safety and PPE	Project data	Safety and PPE rules.
4	Tools, equipment and	Project data	Tools and equipment with their calibration validity.

#	Section	Type	Content
	materials		
5	Instructions	Project data	Instructions with key points and reasons.
6	Quality checks and acceptance criteria	Project data	Quality checks with acceptance criteria and reaction.
7	Records	Text	Fill in the job sheet in the application (photos, measurements, customer signature). Any deviation is recorded as a nonconformity.
8	Revision history	Project data	Revision history of the document itself.
9	Approval	Approval block	Names, dates and signatures of the persons who prepared, reviewed and approved the document.

TPL-RACSI — RACSI matrix

Responsible, Accountable, Consulted, Support and Informed roles for every macro process, with the rules of use (§5.3).

Formats: XLSX, PDF; table of contents: no; review: Annual; owner: Process Excellence Manager; produced by: UMS002 Process Architecture Mapping.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.
2	RACSI	Project data	RACSI of every macro process (five columns, one Accountable).
3	Rules of use	Project data	Rules of use of the RACSI matrix.

Support

Code	Template	Management system	Formats	Required by
TPL-COMP	Competence matrix and training records	QMS, QHSE	XLSX, PDF	ISO 9001 §7.2 (retain); ISO 14001 §7.2 (retain); ISO 45001 §7.2 (retain)
TPL-CAL	Monitoring and measuring equipment register	QMS, QHSE	XLSX, PDF	ISO 9001 §7.1.5 (retain); ISO 14001 §9.1.1 (retain); ISO 45001 §9.1.1 (retain)
TPL-COMM	Communication plan and records	QMS, QHSE	XLSX, PDF	ISO 14001 §7.4 (retain); ISO 45001 §7.4 (retain)
TPL-DOCLIST	Master list of documented information	QMS, QHSE	XLSX, PDF	Recommended

TPL-COMP — Competence matrix and training records

Competence requirements per role, people × competences matrix with levels, gaps and actions, training plan, training records and evaluation of effectiveness (§7.2).

Formats: XLSX, PDF; table of contents: no; review: Semi-annual; owner: Hr Manager; produced by: UMS006 Competence and Training Orchestration.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.
2	Competence requirements	Project data	Competence required per role with level, criticality and how it is acquired.
3	Competence matrix (levels 1–4)	Project data	People × competences matrix with actual / required levels (colour: met, gap of 1, gap of 2 or more).
4	Gaps and actions	Project data	Competence gaps and their actions.
5	Training plan	Project data	Training plan: course, type, provider, date, hours, status.
6	Training records and effectiveness	Project data	Training records: date, trainer, participants, evaluation, result and effectiveness with its method.
7	Legend and rating scales	Project data	Competence levels 1 to 4.

TPL-CAL — Monitoring and measuring equipment register

Identification, measuring range and accuracy, calibration method and traceability, provider and certificate, frequency, last result, due date, status, and the impact assessment of any out-of-tolerance (ISO 9001 §7.1.5).

Formats: XLSX, PDF; table of contents: no; review: Semi-annual; owner: Quality Manager; produced by: UMS021 Monitoring and Measurement Resources Control.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.
2	Calibration status	Project data	Calibration status: valid, due soon, overdue, out of tolerance.
3	Equipment register	Project data	Equipment register: ID, category, make and model, serial, location and user, range, required accuracy, method, interval, next due, status.
4	Calibration and verification records	Project data	Calibration records: date, provider, certificate, error found, result and traceability.
5	Out-of-tolerance impact assessments (§7.1.5.2)	Project data	Impact assessment of equipment found out of tolerance (ISO 9001 §7.1.5.2).
6	Legend and rating scales	Project data	Meaning of the calibration statuses.

TPL-COMM — Communication plan and records

On what, why, with whom, who, how, when, in which language and with which record (§7.4), and the log of internal and external communications.

Formats: XLSX, PDF; table of contents: no; review: Annual; owner: Ims Manager; produced by: UMS032 Management System Communication Plan Development.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.
2	Communication plan	Project data	Communication plan: what, why, with whom, internal or external, who, how, when and record.
3	Communication records	Project data	Communication log: date, topic, audience, channel, by, reach, evidence and feedback.
4	Communications recorded in the process steps	Project data	Communication records typed in the communication steps (what, with whom, how, when, who).

TPL-DOCLIST — Master list of documented information

Every controlled document and record: level, clause, version, status, owner, approver, effective date, review, distribution, storage, retention and disposition; external documents; the documented information required by the standards (§7.5).

Formats: XLSX, PDF; table of contents: no; review: Quarterly; owner: Document Controller; produced by: UMS001 Documentary Lifecycle Control.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.
2	Documentation structure	Project data	Four levels of documentation and who approves each.
3	Documents to maintain	Project data	Documents: type, level, clause, version, status, owner, approver, effective date, review, next review and distribution.
4	Records to retain and retention	Project data	Records to retain: owner, storage, protection, retention period and disposition.
5	Documents of external origin	Project data	Documents of external origin and how they are kept up to date.
6	Documented information required by the standards	Project data	Documented information required by the project standards and whether it exists.

Code	Template	Management system	Formats	Required by
TPL-SUP	Supplier evaluation register	QMS, QHSE	XLSX, PDF	ISO 9001 §8.4.1 (retain)
TPL-CTRL	Control plan	QMS, QHSE	XLSX, PDF	ISO 9001 §8.1, 8.5.1 (maintain)
TPL-NCO	Nonconforming outputs register	QMS, QHSE	XLSX, PDF	ISO 9001 §8.7.2 (retain)
TPL-REQ	Customer requirements review record	QMS, QHSE	XLSX, PDF	ISO 9001 §8.2.3.2 (retain)
TPL-RELEASE	Release of products and services record	QMS, QHSE	XLSX, PDF	ISO 9001 §8.6 (retain)
TPL-CHANGE	Control of changes record	QMS, QHSE	XLSX, PDF	ISO 9001 §6.3, 8.5.6 (retain)

TPL-SUP — Supplier evaluation register

Weighted criteria, scores per criterion, class A/B/C, approval status, performance monitoring (on-time delivery, PPM, complaints), re-evaluation dates and actions (ISO 9001 §8.4.1).

Formats: XLSX, PDF; table of contents: no; review: Semi-annual; owner: Quality Manager; produced by: UMS007 Supplier Quality Performance.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.
2	Evaluation criteria and weighting	Project data	Evaluation criteria and weights; classes A, B and C.
3	Supplier evaluations	Project data	Supplier evaluations: category, certification, criticality, scores per criterion, overall score, class, status, last and next evaluation.
4	Performance monitoring	Project data	Supplier performance: on-time delivery, PPM, complaints and action.

TPL-CTRL — Control plan

Per operation: characteristic, classification, specification, measurement technique, sample size and frequency, control method, responsible, record and reaction plan; with the operational controls and business rules (ISO 9001 §8.1, §8.5.1).

Formats: XLSX, PDF; table of contents: no; review: Semi-annual; owner: Operations Manager; produced by: UMS025 Process Control Plan Management.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.

#	Section	Type	Content
2	Control plan identification	Project data	Control plan identification: products, operations, stage, key contact and team.
3	Control plan	Project data	Control plan: operation, characteristic, product or process, class (critical, major, minor), specification, measurement technique, sample, frequency, control method, responsible, record and reaction plan.
4	Reaction plan rules	Project data	Reaction plan rules.
5	Operational controls (COSO)	Project data	Controls with type, frequency, owner and effectiveness.
6	Business rules	Project data	Business rules of the macro processes of the project.
7	Approval	Approval block	Names, dates and signatures of the persons who prepared, reviewed and approved the document.

TPL-NCO — Nonconforming outputs register

Description, quantity, where detected, disposition (rework, repair, concession, scrap, return), authority deciding, customer information, cost and link to the nonconformity (ISO 9001 §8.7.2).

Formats: XLSX, PDF; table of contents: no; review: Monthly; owner: Quality Manager; produced by: UMS011 Problem Capture and Definition.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.
2	Summary	Project data	Number, open items, concessions and cost of nonconforming outputs.
3	Nonconforming outputs	Project data	Nonconforming outputs: NC reference, date, description, quantity, where detected, disposition, authority, customer informed, concession and cost.

TPL-REQ — Customer requirements review record

Review of requirements before committing to supply: specified, not stated, legal and additional requirements, capability, decision, reviewer and confirmation to the customer (ISO 9001 §8.2.3).

Formats: XLSX, PDF; table of contents: no; review: Per event; owner: Operations Manager; produced by: UMS016 Context Analysis and Stakeholder Mapping.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.
2	Reviews	Project data	Customer requirement reviews: request, customer, type, requirements reviewed, capability, lead time, decision,

#	Section	Type	Content
			reviewer and confirmation.
3	Changes to requirements	Project data	Changes to products, services or processes that affect requirements.

TPL-RELEASE — Release of products and services record

Evidence of conformity with the acceptance criteria and traceability to the person authorizing the release (ISO 9001 §8.6).

Formats: XLSX, PDF; table of contents: no; review: Monthly; owner: Operations Manager; produced by: UMS025 Process Control Plan Management.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.
2	Acceptance criteria	Project data	Acceptance criteria for release from the control plan.
3	Release records	Project data	Release records: job or lot, date, criteria, result, released by and evidence.

TPL-CHANGE — Control of changes record

Change requests with type, reason, impact and risk assessment, resources, approval, implementation, verification of effectiveness and post-change review (ISO 9001 §6.3, §8.5.6; ISO 14001 / 45001 §8.1).

Formats: XLSX, PDF; table of contents: no; review: Per event; owner: Ims Manager; produced by: GRC001 Policy and Procedure Governance.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.
2	How changes are controlled	Project data	How changes are requested, assessed, approved, implemented and verified.
3	Change requests	Project data	Change requests: type, date, requester, reason, impacted processes and documents, resources, approval and planned date.
4	Impact and risk assessment	Project data	Impact and risk assessment of each change and integrity of the system.
5	Implementation and verification	Project data	Implementation, verification of effectiveness and post-change review.
6	Changes recorded in the process steps	Project data	Changes recorded in the change steps: what changed, why and who authorized it.

Health, safety and environment

Code	Template	Management system	Formats	Required by
TPL-ASPECTS	Environmental aspects and impacts register	QHSE	XLSX, PDF	ISO 14001 §6.1.2 (maintain)
TPL-HIRA	Hazard identification and risk assessment (HIRA)	QHSE	XLSX, PDF	ISO 45001 §6.1.2, 8.1.2 (maintain)
TPL-EPR	Emergency preparedness and response plan	QHSE	DOCX, PDF	ISO 14001 §8.2 (maintain); ISO 45001 §8.2 (maintain)
TPL-INC	Incident investigation report	QHSE	DOCX, PDF	ISO 45001 §10.2 (retain)

TPL-ASPECTS — Environmental aspects and impacts register

Activity, aspect, impact, condition (normal, abnormal, emergency), life-cycle stage, severity, frequency, significance, legal link and controls (ISO 14001 §6.1.2).

Formats: XLSX, PDF; table of contents: no; review: Semi-annual; owner: Hse Manager; produced by: UMS030 Operational Risk and Opportunity Management.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.
2	Aspects and impacts	Project data	Aspects: activity, impact, condition, frequency, severity, significance, legal link, control and owner.
3	Significance criteria	Project data	Significance criteria.

TPL-HIRA — Hazard identification and risk assessment (HIRA)

Activity, hazard, harm, persons exposed, existing controls, likelihood × severity, additional controls following the hierarchy of controls, residual risk and owner (ISO 45001 §6.1.2, §8.1.2).

Formats: XLSX, PDF; table of contents: no; review: Semi-annual; owner: Hse Manager; produced by: UMS030 Operational Risk and Opportunity Management.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.
2	Hazards and risks	Project data	Hazards: activity, possible harm, persons exposed, likelihood, severity, risk, existing and additional controls, residual risk and owner.
3	Hierarchy of controls	Project data	Hierarchy of controls.
4	Rating method	Project data	Likelihood and impact scale (1 to 5) and score bands.

TPL-EPR — Emergency preparedness and response plan

Emergency scenarios and response, organization and roles, contacts, resources, drills and their evaluation (ISO 14001 §8.2, ISO 45001 §8.2).

Formats: DOCX, PDF; table of contents: yes; review: Annual; owner: Hse Manager; produced by: GRC009 Business Continuity and Crisis Preparedness.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.
2	Purpose and scope	Text	Prepare {org} to respond to emergency situations at {city} and limit their consequences for people, the environment and the business.
3	Emergency scenarios and response	Project data	Emergency scenarios with the immediate response, responsible and resources.
4	Emergency organization and roles	Project data	Emergency organization and roles.
5	Emergency contacts	Project data	Emergency contacts.
6	Drills, incidents and lessons learned	Project data	Incidents with type, date, lost days, investigation and lessons.
7	Revision history	Project data	Revision history of the document itself.
8	Approval	Approval block	Names, dates and signatures of the persons who prepared, reviewed and approved the document.

TPL-INC — Incident investigation report

Facts, severity, immediate actions, root causes, corrective actions and lessons learned of incidents (ISO 45001 §10.2).

Formats: DOCX, PDF; table of contents: no; review: Per event; owner: Hse Manager; produced by: GRC007 Whistleblowing and Incident Investigation.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.
2	Incidents	Project data	Incidents with type, date, lost days, investigation and lessons.
3	Corrective actions	Project data	Containment, corrective and preventive actions.
4	Approval	Approval block	Names, dates and signatures of the persons who prepared, reviewed and approved the document.

Performance evaluation

Code	Template	Management system	Formats	Required by
TPL-KPI	KPI dashboard and measurement results	QMS, QHSE	XLSX, PDF	ISO 9001 §9.1.1, 9.1.3 (retain); ISO 14001 §9.1.1 (retain); ISO 45001 §9.1.1 (retain)
TPL-AUDPRG	Internal audit programme	QMS, QHSE	XLSX, PDF	ISO 9001 §9.2.2 (retain); ISO 14001 §9.2.2 (retain); ISO 45001 §9.2.2 (retain)
TPL-AUDREP	Internal audit report	QMS, QHSE	DOCX, PDF	ISO 9001 §9.2.2 (retain); ISO 14001 §9.2.2 (retain); ISO 45001 §9.2.2 (retain)
TPL-MR	Management review minutes	QMS, QHSE	DOCX, PDF	ISO 9001 §9.3 (retain); ISO 14001 §9.3 (retain); ISO 45001 §9.3 (retain)

TPL-KPI — KPI dashboard and measurement results

Indicator definitions (formula, unit, frequency, target, alert threshold, source, owner), results over six periods with trend and status, and the analysis of indicators off target (§9.1.1, §9.1.3).

Formats: XLSX, PDF; table of contents: no; review: Monthly; owner: Performance Manager; produced by: UMS027 Process Indicators and KPI Management.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.
2	Summary	Project data	Indicators on target, off target and improving.
3	Results and trends	Project data	Results of six periods with trend and status.
4	Analysis of indicators off target	Project data	Analysis and action for each indicator off target.
5	Indicator definitions	Project data	Indicator definitions: formula, unit, target, direction, measurement and analysis frequency, source, owner.

TPL-AUDPRG — Internal audit programme

Objectives, extent and risks of the programme; audit frequency per process based on importance and past results; planned audits with scope, criteria, method, team and status; auditor qualification (§9.2.2, ISO 19011).

Formats: XLSX, PDF; table of contents: no; review: Annual; owner: Audit Manager; produced by: GRC008 Internal Audit and Assurance Cycle.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.
2	Programme objectives and extent	Project data	Programme objectives, extent, frequency rule, methods, resources and risks.
3	Audit frequency per process	Project data	Audit frequency per process from its importance and risk, with the last and next audits.
4	Audit programme	Project data	Planned audits: type, scope and processes, criteria, frequency (list option or custom), date, duration, team and status.
5	Auditors and qualification	Project data	Auditors, qualification and independence.
6	Frequency options	Project data	Audit frequency options and their typical use.
7	Approval	Approval block	Names, dates and signatures of the persons who prepared, reviewed and approved the document.

TPL-AUDREP — Internal audit report

Audit identification, executive summary, strengths, nonconformities graded (major, minor), observations and opportunities for improvement with requirement, objective evidence, correction and due dates, conclusion and distribution (§9.2.2 f, ISO 19011 §6.5).

Formats: DOCX, PDF; table of contents: yes; review: Per event; owner: Audit Manager; produced by: GRC008 Internal Audit and Assurance Cycle.

#	Section	Type	Content
1	Audit identification	Project data	Audit identification: reference, type, date, duration, objectives, scope, criteria, lead auditor, team, auditees, method and frequency.
2	Executive summary	Project data	Number of findings by grading and the conclusion on conformity and effectiveness.
3	Strengths	Project data	Strengths observed.
4	Summary of findings	Project data	Findings with grading, clause, area, description, response due date and status.
5	Nonconformities — detailed report	Project data	Detailed report of each nonconformity: classification, requirement, statement, objective evidence, process, auditee, correction, root cause, corrective action, response due, verification and status.
6	Observations and opportunities for improvement	Project data	Observations and opportunities for improvement with evidence.
7	Grading of findings	Project data	Definitions of major and minor nonconformities, observations and opportunities for improvement, and the response expected.
8	Audit conclusion and follow-up	Project data	Conclusion, follow-up, distribution and limitations.
9	Approval	Approval block	Names, dates and signatures of the persons who prepared, reviewed and approved the document.

TPL-MR — Management review minutes

Meeting identification and attendance, agenda, every input required by §9.3.2 with its status and trend, the outputs required by §9.3.3 (decisions on improvement, changes and resources), conclusions on suitability, adequacy and effectiveness, and signatures.

Formats: DOCX, PDF; table of contents: yes; review: Per event; owner: Ims Manager; produced by: UMS039 Governance Bodies and Reviews Orchestration.

#	Section	Type	Content
1	Meeting identification and attendance	Project data	Meeting identification: date, location, chair, attendees, secretary and previous review.
2	Agenda	Project data	Agenda of the review.
3	Review inputs (§9.3.2)	Project data	Every input of ISO 9001 §9.3.2 (a to f) with its status, trend and assessment.
4	Process performance and conformity	Project data	Results of the last three periods.
5	Extent to which objectives have been met	Project data	SMART objectives: policy axis, KPI, baseline, target, current value, deadline, owner, resources and status.
6	Audit results	Project data	Audit findings with clause, type and status.
7	Nonconformities and corrective actions	Project data	Nonconformities of the period.
8	Performance of external providers	Project data	Supplier performance: on-time delivery, PPM, complaints and action.
9	Effectiveness of actions on risks and opportunities	Project data	Risks scored 12 and above.
10	Review outputs: decisions and actions (§9.3.3)	Project data	Decisions and actions by category of §9.3.3 with owner and due date.
11	Conclusions on the management system	Project data	Conclusions on suitability, adequacy and effectiveness; next review.
12	Approval	Approval block	Names, dates and signatures of the persons who prepared, reviewed and approved the document.

Improvement

Code	Template	Management system	Formats	Required by
TPL-NC	Nonconformity and corrective action register	QMS, QHSE	XLSX, PDF	ISO 9001 §10.2.2 (retain); ISO 14001 §10.2.2 (retain); ISO 45001 §10.2.2 (retain)
TPL-CAPA	Corrective action report (8D)	QMS, QHSE	DOCX, PDF	Recommended
TPL-IMP	Improvement plan	QMS, QHSE	XLSX, PDF	Recommended

TPL-NC — Nonconformity and corrective action register

Nature of nonconformities, source, criticality, correction, root cause, corrective actions, due dates, effectiveness and closure (§10.2.2).

Formats: XLSX, PDF; table of contents: no; review: Monthly; owner: Quality Manager; produced by: UMS014 Corrective Action Execution and Follow-Up.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.
2	Summary	Project data	Number, critical or major, open and cost of nonconformities.
3	Nonconformities	Project data	Nonconformities: source, criticality, detection, owner, correction, root cause, corrective action, due date, effectiveness and status.
4	Corrective actions	Project data	Containment, corrective and preventive actions.

TPL-CAPA — Corrective action report (8D)

Eight disciplines for one major nonconformity: D0 identification, D1 team, D2 problem (5W2H), D3 containment, D4 root cause (Ishikawa, 5 Whys, occurrence and non-detection), D5–D6 corrective actions and validation, D7 prevention, D8 closure and lessons learned.

Formats: DOCX, PDF; table of contents: no; review: Per event; owner: Quality Manager; produced by: UMS013 Root Cause Resolution.

#	Section	Type	Content
1	D0 — Identification	Project data	D0: 8D reference, nonconformity, source, criticality, dates, champion, priority.
2	D1 — Team	Project data	D1: team members and their role.
3	D2 — Problem description (5W2H)	Project data	D2: problem description (what, where, when, who, how many, how detected, why a problem).
4	D3 — Containment actions	Project data	D3: containment actions with owner, date and result.
5	D4 — Root cause analysis	Project data	D4: Ishikawa (6M), 5 Whys and verified root causes (occurrence and non-detection).
6	D5–D6 — Corrective actions and validation	Project data	D5–D6: permanent corrective actions, owners, due dates, verification and validation of effectiveness.
7	D7 — Prevention of recurrence	Project data	D7: prevention of recurrence (horizontal deployment, risk register, knowledge base).
8	D8 — Closure and lessons learned	Project data	D8: lessons learned, closure and team recognition.
9	Approval	Approval block	Names, dates and signatures of the persons who prepared, reviewed and approved the document.

TPL-IMP — Improvement plan

Improvement opportunities with source, expected gain, ROI, effort, priority, owner, status and results, and the improvement actions (§10.1, §10.3).

Formats: XLSX, PDF; table of contents: no; review: Quarterly; owner: Transformation Manager; produced by: UMS005 Continual Improvement Pipeline Steering.

#	Section	Type	Content
1	Document identification	Project data	Document identification: reference, version, owner, organization, standards, review frequency and next review.
2	Improvement opportunities	Project data	Improvement opportunities with source, submitter, ROI, effort, priority and status.
3	Improvement actions	Project data	Improvement actions.

Data that fills the templates

Each data section of a template names a data source. The table explains where the data comes from in DynamicMS, so the documents stay consistent with what the teams record in the workflow steps and registers.

Source	Content and origin
actions_corrective	Containment, corrective and preventive actions.
actions_improvement	Improvement actions.
actions_objectives	Actions planned to reach the objectives.
aspects_full	Aspects: activity, impact, condition, frequency, severity, significance, legal link, control and owner.
aspects_method	Significance criteria.
audit_conclusion	Conclusion, follow-up, distribution and limitations.
audit_findings	Findings with grading, clause, area, description, response due date and status.
audit_header	Audit identification: reference, type, date, duration, objectives, scope, criteria, lead auditor, team, auditees, method and frequency.
audit_nc_detail	Detailed report of each nonconformity: classification, requirement, statement, objective evidence, process, auditee, correction, root cause, corrective action, response due, verification and status.
audit_ofi	Observations and opportunities for improvement with evidence.
audit_strengths	Strengths observed.
audit_summary	Number of findings by grading and the conclusion on conformity and effectiveness.
audit_universe	Audit frequency per process from its importance and risk, with the last and next audits.

Source	Content and origin
auditors	Auditors, qualification and independence.
audits_full	Planned audits: type, scope and processes, criteria, frequency (list option or custom), date, duration, team and status.
audprg_intro	Programme objectives, extent, frequency rule, methods, resources and risks.
cal_legend	Meaning of the calibration statuses.
cal_oot	Impact assessment of equipment found out of tolerance (ISO 9001 §7.1.5.2).
cal_records	Calibration records: date, provider, certificate, error found, result and traceability.
cal_summary	Calibration status: valid, due soon, overdue, out of tolerance.
calibration_full	Equipment register: ID, category, make and model, serial, location and user, range, required accuracy, method, interval, next due, status.
capa_d0	D0: 8D reference, nonconformity, source, criticality, dates, champion, priority.
capa_d1	D1: team members and their role.
capa_d2	D2: problem description (what, where, when, who, how many, how detected, why a problem).
capa_d3	D3: containment actions with owner, date and result.
capa_d4	D4: Ishikawa (6M), 5 Whys and verified root causes (occurrence and non-detection).
capa_d5	D5–D6: permanent corrective actions, owners, due dates, verification and validation of effectiveness.
capa_d7	D7: prevention of recurrence (horizontal deployment, risk register, knowledge base).
capa_d8	D8: lessons learned, closure and team recognition.
change_process	How changes are requested, assessed, approved, implemented and verified.
change_risk	Impact and risk assessment of each change and integrity of the system.
change_verification	Implementation, verification of effectiveness and post-change review.
changes	Changes recorded in the change steps: what changed, why and who authorized it.
changes_customer	Changes to products, services or processes that affect requirements.
changes_full	Change requests: type, date, requester, reason, impacted processes and documents, resources, approval and planned date.
clause_matrix	Cross-reference: clause, requirement, process and document.
commlog	Communication log: date, topic, audience, channel, by, reach, evidence and feedback.
commplan	Communication plan: what, why, with whom, internal or external, who, how, when and record.

Source	Content and origin
communications	Communication records typed in the communication steps (what, with whom, how, when, who).
competence_gaps	Competence gaps and their actions.
competence_matrix	People × competences matrix with actual / required levels (colour: met, gap of 1, gap of 2 or more).
competence_req	Competence required per role with level, criticality and how it is acquired.
competence_scale	Competence levels 1 to 4.
context_conclusions	Risks and opportunities that result from the analysis.
context_internal	Internal issues recorded in step MP-001.3, one row per issue with its source.
context_method	PESTLE, SWOT and interested party method and review frequency.
context_summary	Main issues and interested parties.
controlplan	Control plan: operation, characteristic, product or process, class (critical, major, minor), specification, measurement technique, sample, frequency, control method, responsible, record and reaction plan.
controls	Controls with type, frequency, owner and effectiveness.
ctrl_header	Control plan identification: products, operations, stage, key contact and team.
ctrl_reaction	Reaction plan rules.
definitions	Terms used in procedures: SIPOC, RACSI, BPMN, gate and Go / No-Go, documented information.
doc_hierarchy	Four levels of documentation and who approves each.
doc_identity	Document identification: reference, version, owner, organization, standards, review frequency and next review.
documents_full	Documents: type, level, clause, version, status, owner, approver, effective date, review, next review and distribution.
epr_contacts	Emergency contacts.
epr_roles	Emergency organization and roles.
epr_scenarios	Emergency scenarios with the immediate response, responsible and resources.
exclusions	Requirements not applicable, with their justification.
external_docs	Documents of external origin and how they are kept up to date.
finding_grading	Definitions of major and minor nonconformities, observations and opportunities for improvement, and the response expected.
findings	Audit findings with clause, type and status.
freq_legend	Audit frequency options and their typical use.
hazards_full	Hazards: activity, possible harm, persons exposed, likelihood, severity, risk, existing and additional controls, residual risk and owner.
heatmap	Heat map: number of risks per likelihood and impact.

Source	Content and origin
hierarchy_controls	Hierarchy of controls.
ideas_full	Improvement opportunities with source, submitter, ROI, effort, priority and status.
improvement_summary	Nonconformities, closures and improvement ideas.
incidents_full	Incidents with type, date, lost days, investigation and lessons.
kpi_analysis	Analysis and action for each indicator off target.
kpi_definitions	Indicator definitions: formula, unit, target, direction, measurement and analysis frequency, source, owner.
kpi_results	Results of six periods with trend and status.
kpi_results_short	Results of the last three periods.
kpi_summary	Indicators on target, off target and improving.
leadership_summary	Leadership and commitment, with the strategic axes of the policy.
mandatory_matrix	Documented information required by the project standards and whether it exists.
mp_bpmn	BPMN diagram of the macro process: one lane per role, its steps, the Go / No-Go gateway and the end event.
mp_docs	Documents and records of the macro process.
mp_gonogo	Go criteria to close the process, No-Go handling, decision maker and current status.
mp_header	Process identity: type, owner, purpose, trigger, end, standards and phase.
mp_kpis	KPIs of the macro process of the document.
mp_racsi	RACSI of the macro process of the document.
mp_risks	Risks and controls of the macro process.
mp_sipoc	SIPOC of the macro process.
mp_steps_sipoc	Steps of the macro process, each with its SIPOC (suppliers, inputs, outputs, customers) and responsible role.
mr_agenda	Agenda of the review.
mr_conclusion	Conclusions on suitability, adequacy and effectiveness; next review.
mr_header	Meeting identification: date, location, chair, attendees, secretary and previous review.
mr_inputs	Every input of ISO 9001 §9.3.2 (a to f) with its status, trend and assessment.
mr_outputs	Decisions and actions by category of §9.3.3 with owner and due date.
nc_summary	Number, critical or major, open and cost of nonconformities.
nco_full	Nonconforming outputs: NC reference, date, description, quantity, where detected, disposition, authority, customer informed, concession and cost.
nco_summary	Number, open items, concessions and cost of nonconforming outputs.
ncs_full	Nonconformities: source, criticality, detection, owner, correction, root cause, corrective action, due date, effectiveness and status.

Source	Content and origin
ncs_short	Nonconformities of the period.
needs_parties	Needs and expectations recorded in the needs register: the interested parties concerned, type, compliance obligation and how the organization addresses each one.
objectives_full	SMART objectives: policy axis, KPI, baseline, target, current value, deadline, owner, resources and status.
objectives_summary	Objectives on track and at risk.
obligations_actions	Actions for partial or non compliance.
obligations_full	Obligations: type, authority, reference, applicability, requirement, how complied, owner, interval, last and next evaluation.
obligations_summary	Evaluation of compliance: compliant, partially compliant, non-compliant.
obs_units	Sites and departments of the organization structure (OBS) with their members.
operation_summary	Operational planning and control, with the control plan.
opportunities_full	Opportunities with benefit, feasibility and the action to pursue them.
org_profile	Organization profile: activity, site, size, customers, management system, certificates, management system manager.
outsourced	Outsourced processes and interfaces with how each is controlled.
parties_full	Interested parties: internal or external, needs and expectations, compliance obligation, influence, interest, priority and monitoring.
performance_summary	Indicators on target, audits and management reviews.
pestle	External issues by PESTLE factor: risk or opportunity, impact, trend, plus the issues recorded in step MP-001.2.
phase_activities	For each macro process of the phase: purpose, trigger, owner, BPMN diagram, SIPOC of each step and Go / No-Go criteria.
phase_bpmn	BPMN overview of the phase: macro processes as sub-processes and the phase gate.
phase_gate	Gate of the phase: entry and exit criteria, checklist with evidence, decision rules (Go, No-Go, Hold, Recycle) and the decision recorded.
phase_kpis	KPIs of the macro processes of the phase.
phase_racsi	RACSI of the macro processes of the phase.
phase_records	Records produced in the phase: owner, storage and retention.
phase_risks	Risks and business rules of the phase.
planning_summary	Risk method, top risks and objectives.
pmap_diagram	Process map diagram: management, core and support processes between customer requirements and satisfaction.
policy_axes:E	Environmental strategic axes with objectives.
policy_axes:IMS	Strategic axes including health and safety and environment, each with measurable objectives.
policy_axes:OHS	OH&S strategic axes with objectives.

Source	Content and origin
policy_axes:Q	Strategic axes (customers, operational excellence, improvement, people, compliance, partners, tools), each with its commitments and the measurable objectives of the objectives register linked to it.
policy_commitments:E	Environmental commitments of the chief executive.
policy_commitments:IMS	Commitments of the chief executive for quality, OH&S (prevention, consultation) and environment (prevention of pollution, compliance obligations).
policy_commitments:OHS	OH&S commitments of the chief executive.
policy_commitments:Q	Commitments of the chief executive ("As chief executive, I commit to..."), including the delegation to the management system manager.
policy_review	How the policy is communicated, made available and reviewed (date of the last management review).
policy_roles:E	Role of managers and employees.
policy_roles:IMS	Role of managers and employees.
policy_roles:OHS	Role of managers and employees.
policy_roles:Q	Role of managers and of every employee; closing message of the chief executive.
policy_signature	Name, title, place, date and signature of the chief executive.
policy_vision:E	Vision and ambition (environment).
policy_vision:IMS	Vision and ambition (quality, health, safety and environment).
policy_vision:OHS	Vision and ambition (occupational health and safety).
policy_vision:Q	Vision and ambition of the organization, the context issues it faces and the standards the system is built on.
power_grid	Influence / interest grid: manage closely, keep satisfied, keep informed, monitor.
process_list	Processes with type (management, core, support), owner, purpose and indicators.
processes	Macro processes of the project with phase, owner and status.
products_services	Products and services in scope with their customers and main requirements.
racsi	RACSI of every macro process (five columns, one Accountable).
racsi_rules	Rules of use of the RACSI matrix.
records_retention	Records to retain: owner, storage, protection, retention period and disposition.
references	Standards and related documents (manual, process map, master list).
release_criteria	Acceptance criteria for release from the control plan.
releases	Release records: job or lot, date, criteria, result, released by and evidence.
reqreview	Customer requirement reviews: request, customer, type, requirements reviewed, capability, lead time, decision, reviewer and confirmation.
revisions	Revision history of the document itself.

Source	Content and origin
risk_scale	Likelihood and impact scale (1 to 5) and score bands.
risk_summary	Number of risks by level and of opportunities.
risks_full	Risks with cause, consequence, existing controls, likelihood, impact, score, treatment, residual risk, owner and status.
risks_top	Risks scored 12 and above.
rules	Business rules of the macro processes of the project.
scope_statement	Scope statement built from the profile, with the scope recorded in step MP-001.8.
scope_summary	Scope statement and non-applicable requirements.
standards	Standards selected once for the project (step MP-002.10).
step_matrix:MP-001.5	Decision matrix of the needs and expectations assessment (step MP-001.5).
step_review:MP-001.10	Periodic review of the context (step MP-001.10): frequency, dates, decisions.
step_rows:MP-001.7	Process interactions recorded in step MP-001.7.
supplier_criteria	Evaluation criteria and weights; classes A, B and C.
supplier_perf	Supplier performance: on-time delivery, PPM, complaints and action.
suppliers_full	Supplier evaluations: category, certification, criticality, scores per criterion, overall score, class, status, last and next evaluation.
support_summary	Resources, measuring equipment, competence, communication and documented information.
swot	Strengths, weaknesses, opportunities and threats built from the context register and improvement ideas.
training_full	Training records: date, trainer, participants, evaluation, result and effectiveness with its method.
training_plan	Training plan: course, type, provider, date, hours, status.
wi_checks	Quality checks with acceptance criteria and reaction.
wi_safety	Safety and PPE rules.
wi_steps	Instructions with key points and reasons.
wi_tools	Tools and equipment with their calibration validity.

Placeholders in free text: {org} organization, {product} products and services, {line} main delivery process, {city} site, {customer} main customers, {supplier} main supplies, {standards} standards of the project, {date} date of generation, {phase} end-to-end phase of a procedure.

Using the templates in DynamicMS

Generate a document

1. From a workflow step: select Generate document, choose a template (the templates of the macro process are suggested first), then Generate. The draft is linked to the step and appears under Documents of this step.
2. From Records › Documents: select New document, choose From a template, filled with the project data, and the template.
3. From Records › Documents › Required by the standards: select Create next to a missing document.

Review, approve and download

1. Open the document: the Structure and content card shows each section with its data.
2. On a draft, select Edit the structure to add, rename, reorder or delete sections and to edit free text.
3. Select Submit for review; another person selects Approve and publish. The previous version becomes Superseded.
4. Select PDF, DOCX or XLSX to download the version shown. A draft is marked UNCONTROLLED DRAFT.
5. For the next revision, select New version and choose Regenerate the content from the current project data, or keep the current content.

Adapt the templates

1. Open Records › Documents › Templates and select a template to see its structure.
2. Select Copy to edit: the copy belongs to your organization and replaces the library template in your library.
3. Rename, add, reorder or delete sections; choose for each section free text, project data (and which data) or an approval block; choose the formats and whether the Word and PDF files have a table of contents.
4. Select New template to create a template from scratch; Retire removes a template of your organization.
5. Add a Picture or logo section: upload a PNG or JPEG, type its caption, set its width and alignment. Under each section, Section formatting sets its alignment, size, colour, background, bold or italic, a page break before it or a hidden title.
6. Open the Formatting tab to set the fonts, sizes, alignment, orientation, margins, cover page, table of contents, numbering, page numbers, colours, the logo (organization, template or none, its position, and in the page header) and the header and footer texts; the preview shows the result.
7. Open the Layout tab to set the logo, colors, header and footer of every generated file.

- On a draft document, Edit the structure and formatting changes that document only: sections, pictures and formatting.

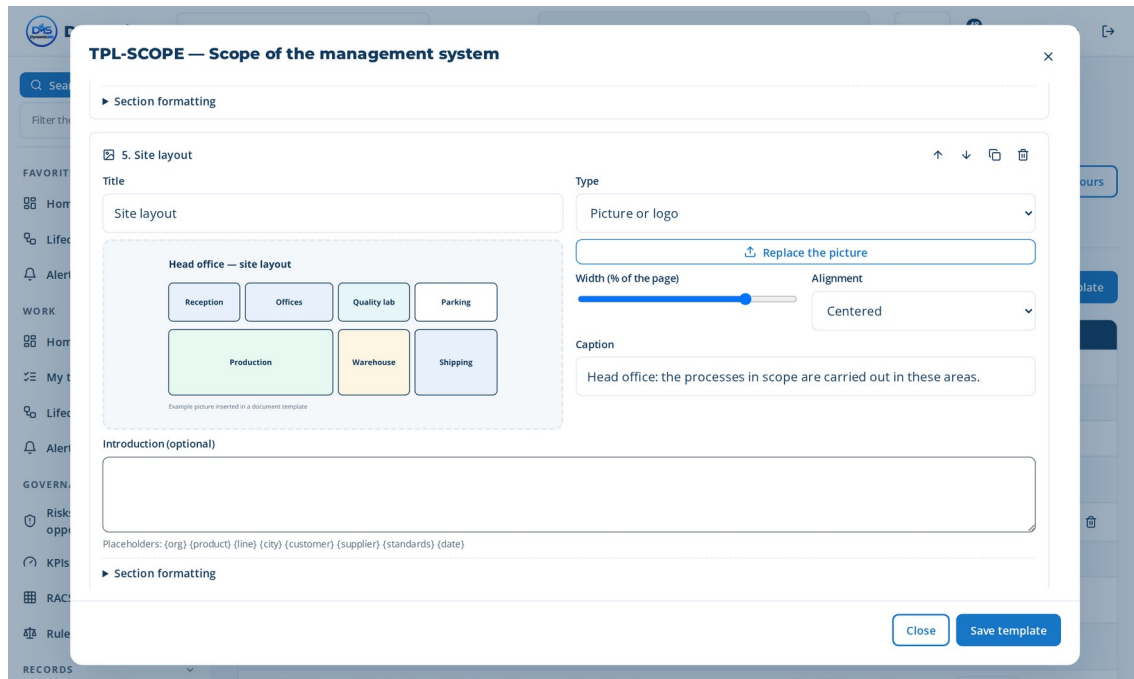

Figure — A picture section in a document template.

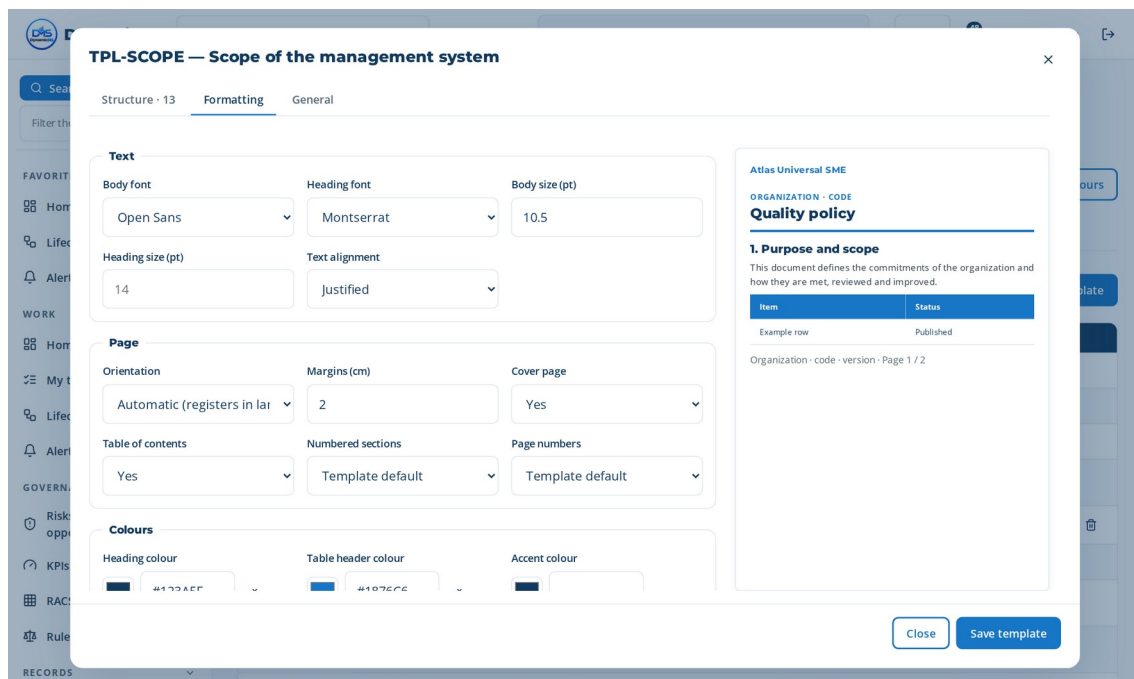

Figure — Formatting of a document template, with its preview.

Documents seeded in the demonstration

Every project of the demonstration has its documents generated from the templates that apply to its management system and standards. The scenario projects of the user guides keep

a frozen copy of the content of each current version; the others are rendered from the live data when downloaded.

Quality policy

AT-UNI-QMS-POL-Q · Version 1.1 · Published

Our vision and ambition

Our vision is to be the reference provider of technical services for local businesses, recognized for reliability, responsiveness and the professionalism of our teams.

Aware of the challenges of our context - Strategic (market, customer loss); Operational (process failure, supply chain) - and relying on the daily commitment of our women and men to meet the expectations of our customers, we have built our quality management system on ISO 9001.

Our strategic axes

We affirm this ambition through 7 strategic axes, each with measurable objectives reviewed every year:

Axis 1 - Meet the expectations of our customers

- Improve responsiveness to customer complaints (answer within 48 h)
- Improve the customer satisfaction barometer
- Raise customer satisfaction on technical services - target $\geq 85\%$ by 2026-11-10 (Q-KPI-01)
- Deliver technical services on time - target $\geq 95\%$ by 2026-08-12 (Q-KPI-02)

Axis 2 - Operational excellence, right first time

- Update and standardize workstations and work instructions
- Control our processes with control plans and calibrated equipment
- Reduce the cost of poor quality - target $\leq 2\%$ by 2026-11-10 (Q-KPI-04)

Axis 3 - Continual improvement

- Involve every team in the PDCA dynamic and develop personal leadership
- Treat root causes and verify the effectiveness of corrective actions
- Close corrective actions on time - target $\geq 90\%$ by 2026-05-14 (Q-KPI-05)

Axis 4 - Develop our people and their competence

- Preserve and develop organizational knowledge
- Plan careers and anticipate jobs and skills

Axis 5 - Meet applicable requirements

- Determine, monitor and review all applicable requirements (legal, customer, other)
- Develop a culture of quality and integrity

Axis 6 - Grow with our suppliers and partners

- Select and evaluate suppliers on quality, delivery and HSE
- Share scorecards and build development plans

Figure — Quality policy — vision and strategic axes with their objectives.

Axis 7 - Modernize our tools and infrastructure

- Digitize records and business reporting
- Upgrade the premises, equipment and flows

Commitments of top management

As chief executive, I commit to:

- Satisfy the requirements of our customers and the applicable legal and other requirements;
- Provide the resources, competence and infrastructure needed for the management system to work;
- Delegate to our management system manager, Tariq Saleh, the responsibility and authority for planning, running and monitoring the system and reporting on its performance;
- Set measurable objectives consistent with this policy and review them at each management review;
- Continually improve the management system and its performance.

Everyone's role

It is essential that every manager deploys the quality management system at all levels of the organization, in a spirit of listening, dialogue and continual improvement. Every employee contributes by applying the procedures, reporting any nonconformity, hazard or idea, and taking part in the improvement actions.

Our management system drives our ambition; certification is only one step in a journey towards overall excellence. I count on the active participation of each of you so that together we build an efficient and sustainable company.

Communication and review of this policy

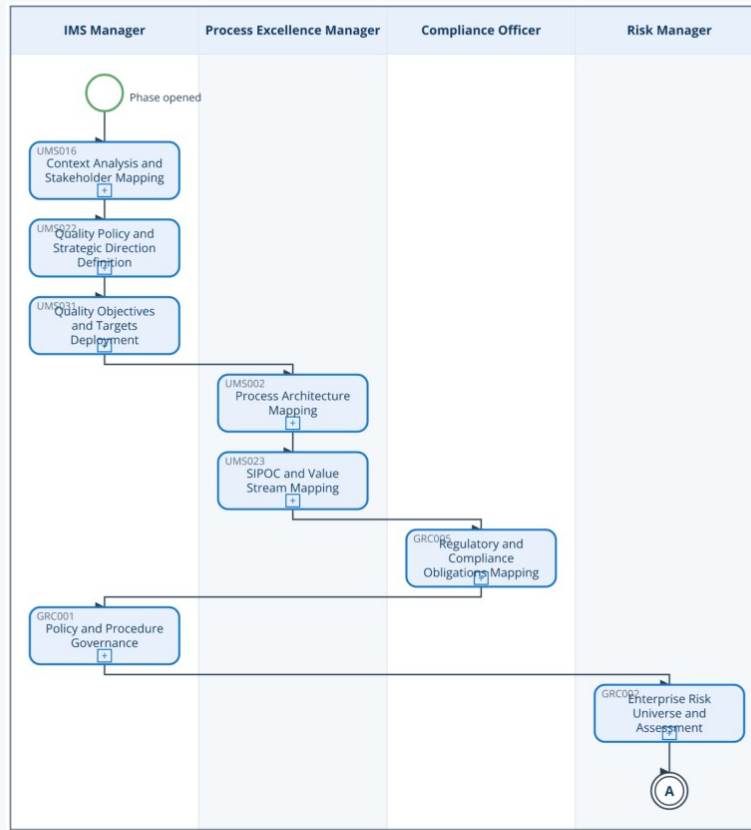

This policy is communicated to all staff at induction and by display, explained in team meetings, available to interested parties on request and on our website, and reviewed for continuing suitability at each management review (last review: 2026-09-15).

6. Process overview (BPMN)

Context To Strategy - overview, part 1 of 2

Figure — Procedure — BPMN overview of the phase.

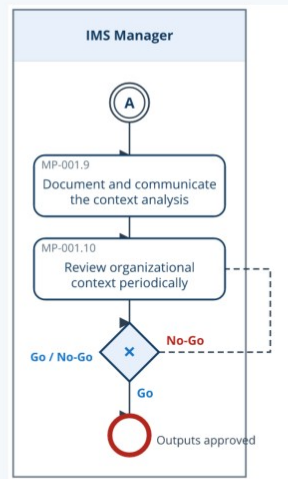

Context To Strategy - overview, part 2 of 2

7. Description of activities

7.1 UMS016 Context Analysis and Stakeholder Mapping

Purpose	Understand internal/external issues; identify interested parties; define IMS scope.
Trigger	Receipt or update of Internal issues, External issues from Top mgmt, Strategy team.
Process owner	IMS Manager
Status in this project	Completed

Figure — Procedure — SIPOC of each step and Go / No-Go criteria.

UMS016 Context Analysis and Stakeholder Mapping - part 2 of 2

#	Step (P)	Suppliers (S)	Inputs (I)	Outputs (O)	Customers (C)	Responsible
1	MP-001.1 Fix periodicity of strategic diagnosis	Top mgmt, Strategy team	Internal issues, External issues	Review periodicity fixed	IMS Manager	IMS Manager
2	MP-001.2 Identify external issues	IMS Manager	Review periodicity fixed	List with sources: external issues	IMS Manager	IMS Manager
3	MP-001.3 Identify internal issues	IMS Manager	List with sources: external issues	List with sources: internal issues	IMS Manager	IMS Manager
4	MP-001.4 Identify interested parties	IMS Manager	List with sources: internal issues	List with sources: interested parties	IMS Manager	IMS Manager
5	MP-001.5 Determine needs and expectations of interested parties	IMS Manager	List with sources: interested parties	Needs and expectations mapped to the interested parties	IMS Manager	IMS Manager
6	MP-001.6 Validate and cascade stakeholder requirements	IMS Manager	Needs and expectations mapped to the interested parties	Decision record with criteria (Go / No-Go)	IMS Manager	IMS Manager
7	MP-001.7 Identify interactions between processes	IMS Manager	Decision record with criteria (Go / No-Go)	List with sources: interactions between processes	IMS Manager	IMS Manager
8	MP-001.8 Define or review the management system scope	IMS Manager	List with sources: interactions between processes	List with sources: the management system scope	IMS Manager	IMS Manager

Figure — Procedure — BPMN of a macro process.

Finding	Grading	Clause	Area	Description	Due date	Status
F-01-2	Minor nonconformity	8.5.1	Operations	Control plan for service delivery not updated after process change	2026-05-14	Closed
F-01-3	Opportunity for improvement	9.1.3	Performance	KPI trend analysis not documented for two months	-	Noted

5. Nonconformities - detailed report

5.1 F-01-1 - Minor nonconformity - §7.5.3

Classification	Minor nonconformity - isolated lapse; does not affect the ability of the system to achieve intended results
Requirement (criterion)	Documented information shall be controlled: identification, review and approval, revision status (ISO 9001 §7.5.2, §7.5.3).
Nonconformity statement	Two controlled documents at service delivery had no revision status
Objective evidence	Work instruction and inspection form at the workstation printed without version or date; master list shows version 2.
Process / area	GRC008 Internal Audit and Assurance Cycle - Operations
Auditee	Samira Benali
Correction	Immediate correction made on the day of the audit
Root cause (auditee)	Requirement not translated into the working document; no check at the change
Corrective action	Address audit finding: Two controlled documents at service delivery had no revision status - Julien Moreau - due 2026-04-29 - Closed
Response due	2026-05-14
Verification of effectiveness	Evidence reviewed by the lead auditor; action effective - 2026-05-12
Status	Closed

5.2 F-01-2 - Minor nonconformity - §8.5.1

Classification	Minor nonconformity - isolated lapse; does not affect the ability of the system to achieve intended results
Requirement (criterion)	Production and service provision shall be carried out under controlled conditions, including monitoring at appropriate stages (ISO 9001 §8.5.1).
Nonconformity statement	Control plan for service delivery not updated after process change
Objective evidence	Control plan revision 1 does not include the new test step added in March; 3 job records without the test result.
Process / area	GRC008 Internal Audit and Assurance Cycle - Operations
Auditee	Julien Moreau
Correction	Immediate correction made on the day of the audit
Root cause (auditee)	Requirement not translated into the working document; no check at the change

Figure — Internal audit report — detailed report of the nonconformities.

D4 - Root cause analysis

Ishikawa (6M)

Category	Possible cause and verification
Man	New technician not yet qualified on the task
Method	Instruction did not include the final check
Machine	No machine cause found
Material	Parts conforming (certificates checked)
Measurement	Check performed but not recorded
Environment	Time pressure on urgent jobs

5 Whys

#	Why?
1	Why did the defect reach the customer? The final check was not performed.
2	Why was the final check not performed? It was not in the work instruction.
3	Why was it not in the instruction? The instruction was written before the new service line.
4	Why was it not updated? Changes to services did not trigger a document review.
5	Why? The change management process did not list documents to update.

Verified root causes

Occurrence: work instruction without final check. Non-detection: change management did not trigger a document review.

D5-D6 - Corrective actions and validation

Permanent corrective action	Owner	Due date	Verification / evidence
Add the final check with acceptance criteria to the work instruction	Nadia Chraibi	2025-12-30	Instruction v2 published; 5 jobs audited
Add "documents to update" to the change request form	Samira Benali	2026-01-09	Form updated; next 3 changes checked
Qualify the new technician on the task (supervised jobs)	Maya Laurent	2026-01-19	Competence matrix updated to level 3

Validation of effectiveness No recurrence over 3 months (0 of 120 jobs); customer confirmed satisfaction.

D7 - Prevention of recurrence

- Review the other work instructions for the same gap (horizontal deployment)
- Update the risk register and the control plan
- Share the lesson learned in the knowledge base

Figure — Corrective action report (8D) — root cause, actions and closure.

3. Review inputs (§9.3.2)

§9.3.2	Input	Status and trend	Assessment
a	Status of actions from previous reviews	9 / 14 closed	To watch
b	Changes in external and internal issues	5 issues reviewed; no change in scope	Satisfactory
c1	Customer satisfaction and feedback	81.5 vs target >= 85%	Action required
c2	Extent to which objectives have been met	0 / 4 on track	To watch
c3	Process performance and conformity	2 / 21 indicators on target	To watch
c4	Nonconformities and corrective actions	6 recorded, 5 closed	Satisfactory
c5	Monitoring and measurement results	Trend over 6 periods; 15 improving	Satisfactory
c6	Audit results	1 major, 8 minor, 5 observations / OFI	Action required
c7	Performance of external providers	2 class A, 2 B, 1 C	To watch
d	Adequacy of resources	Adequate; one additional technician requested for peak season	To watch
e	Effectiveness of actions on risks and opportunities	11 risks treated	Satisfactory
f	Opportunities for improvement	5 ideas in the improvement plan	Satisfactory

Figure — Management review minutes — inputs of §9.3.2.

External issue	Category (PESTLE)	Description and impact on the organization	Relevance	Source / evidence
Customers send requests through portals and messaging	Technological	Requests can be lost if they are not logged in one place.	Medium	Customer request log, sample of 60 requests

5. Internal issues

Internal issue	Category	Description and impact on the organization	Relevance	Source / evidence
Job sheet not signed	Process	No proof of service accepted; invoices disputed and paid late.	High	Review of records Jan-Oct 2025: 14% not compliant
Quote error	Commercial	Rework of quotes and margin loss; two customer complaints.	High	Quotation register: 9 corrections in Q3 2025
Workload peaks on service delivery	Resources	Late completion during summer peaks; overtime above 12%.	Medium	Planning board and overtime records
Know-how held by two senior staff	Competence	Dependency on two people; no written work instructions.	Medium	Competence matrix 2025

6. SWOT synthesis

Strengths	Weaknesses	Opportunities	Threats
Certified management system and documented processes Skilled and committed teams Close relationship with customers	job sheet not signed quote error	Digitize service delivery records on tablets Poka-yoke on service delivery	Strategic (market, customer loss) Operational (process failure, supply chain) Compliance (regulatory, certification)

7. Interested parties and their requirements

Ref.	Interested party	Internal / external	Needs and expectations	Compliance	Influence	Interest	Priority	How monitored
IP-1	Customers (local businesses)	External party	Service delivered on the agreed date, right first time Correct quotes and clear invoices ISO 9001 certification within 12 months	Yes	5	5	25	Survey and complaints
IP-2	Employees and their representatives	Internal party	Safe work, training and clear work instructions Workload planned during peaks Compliance with labour law, business licence and waste rules	Yes	4	4	16	Meetings and feedback

Figure — Context analysis — PESTLE, SWOT and interested parties.
